EXPLANATORY REMARKS.

(a) As the Cotton Duties Act was in force during only three months of the past year, the collections of excise duty in 1895-96 and 1896-97 have been estimated with reference to the actuals for the first four months of the current year and the average collections in the seven months from January 1895.

(b) The revised estimate of export duty for the current year is fixed with reference to the actuals of the first four months of the current year and to the proportion of the actuals of 1894-95 to those of the first four months of that year. The budget estimate has been fixed with reference to the average of the actuals of the last five years. The revenue under this item generally depends upon the season and crops.

(c) The estimates of Collectors under warehouse and wharf rents for 1895-96 and 1896-97 amount to Rs. 48,700 and Rs. 48,140, respectively. The actuals in the first four months of the current year were Rs. 19,122, but as the actuals of the last year were only Rs. 30,149, the Collector's estimates have not been raised.

(d) As the collection of import duty on cotton goods commenced only in January 1895, and as the imports in the earlier months of 1895 were unusually large owing to large consignments of cotton goods having been indented for by speculators, the figures in the earlier months of 1895 cannot be taken as a guide for the estimates for the current and ensuing years. The collections of import duty on cotton goods in the first four months of the current year were Rs. 5,68,367. Taking the collections in each of the remaining eight months of the year at the same figure as in July (Rs. 98,170), the estimate for the current year is Rs. 13,53,700. For the reasons stated above, the monthly average for the ensuing year cannot be taken at more than a lakh. The estimate for that year is therefore entered at 12 lakhs. The receipts from the other articles in the first four months of the current year were Rs. 7,41,158 and in the last eight months of 1894-95 they were Rs. 17,01,570. The total of these two amounts, Rs. 24,42,728, is taken as the estimate for the current and ensuing years for these articles. The estimated total import duty under all articles for the current year is therefore Rs. 37,96,400, and for the ensuing year Rs. 36,42,700.

(e) The import duty on cotton goods is estimated for the current and ensuing years with reference to the actuals for the first four months of the current year and the average of the actuals of the seven months from January 1895.

(f) The import duty on other articles in the first four months of the current year amounted to Rs. 18,619 and the actuals for the last eight months of the past year were Rs. 38,181. The estimates for the current and ensuing years are therefore entered at Rs. 56,800.

(g) The revised estimate of export duty for the current year is fixed with reference to the actuals for the first four months of the current year and the proportion of the actuals of 1894-95 to those of the first four months of that year. The budget estimate is fixed with reference to the average of the actuals of the last five years.

EXPLANATORY REMARKS.

(a) As the Cotton Duties Act was in force during only three months of the past year, the collections of excise duty in 1895-96 and 1896-97 have been estimated with reference to the actuals for the first four months of the current year and the average collections in the seven months from January 1895.

(b) The revised estimate of export duty for the current year is fixed with reference to the actuals of the first four months of the current year and to the proportion of the actuals of 1894-95 to those of the first four months of that year. The budget estimate has been fixed with reference to the average of the actuals of the last five years. The revenue under this item generally depends upon the season and crops.

(c) The estimates of Collectors under warehouse and wharf rents for 1895-96 and 1896-97 amount to Rs. 48,700 and Rs. 48,140, respectively. The actuals in the first four months of the current year were Rs. 19,122, but as the actuals of the last year were only Rs. 30,149, the Collector's estimates have not been raised.

(d) As the collection of import duty on cotton goods commenced only in January 1895, and as the imports in the earlier months of 1895 were unusually large owing to large consignments of cotton goods having been indented for by speculators, the figures in the earlier months of 1895 cannot be taken as a guide for the estimates for the current and ensuing years. The collections of import duty on cotton goods in the first four months of the current year were Rs. 5,68,367. Taking the collections in each of the remaining eight months of the year at the same figure as in July (Rs. 98,170), the estimate for the current year is Rs. 13,53,700. For the reasons stated above, the monthly average for the ensuing year cannot be taken at more than a lakh. The estimate for that year is therefore entered at 12 lakhs. The receipts from the other articles in the first four months of the current year were Rs. 7,41,158 and in the last eight months of 1894-95 they were Rs. 17,01,570. The total of these two amounts, Rs. 24,42,728, is taken as the estimate for the current and ensuing years for these articles. The estimated total import duty under all articles for the current year is therefore Rs. 37,96,400, and for the ensuing year Rs. 36,42,700.

(e) The import duty on cotton goods is estimated for the current and ensuing years with reference to the actuals for the first four months of the current year and the average of the actuals of the seven months from January 1895.

(f) The import duty on other articles in the first four months of the current year amounted to Rs. 18,619 and the actuals for the last eight months of the past year were Rs. 38,181. The estimates for the current and ensuing years are therefore entered at Rs. 56,800.

(g) The revised estimate of export duty for the current year is fixed with reference to the actuals for the first four months of the current year and the proportion of the actuals of 1894-95 to those of the first four months of that year. The budget estimate is fixed with reference to the average of the actuals of the last five years.
