CURRENT NO. 1347 mil

Proceedings of the Plague Commission Madras.

Read:— the following letter from the Collector of Trichinopoly Ref on C 64 of 99 823-3-1899.

I have the honor to inform you that the figures furnished in the plague estimates sent to you from this Office for Municipalities are those Consolidated out of the figures separately given to me by the Chairmen of the two Municipalities in this district. The Consolidated figures under each item of expenditure are sanctioned by you with the necessary modifications, if any. It is found difficult to ascertain exactly the amounts separately sanctioned to each of the Municipalities. As it is essential for the Chairmen to know the grants sanctioned to each of their Municipalities, I request to be informed if I may furnish you with separate figures for each Municipality.

No. 848 of 28.3.99.
The estimate for each Municipality may be given separately as proposed by the Collector.

Note

The plague estimates ^{now} ~~submitted~~ submitted by Collectors show under Municipal the total figures for all the municipalities in ^{their} ~~each~~ districts; and these figures are ^{checked and} ~~now~~ entered in the consolidated plague estimates. The Plague Commissioner has in the current read above, on a reference made by the Collector of Trichinopoly, issued instructions to all Collectors to show figures for each municipality ^{separately} in the plague estimates.

Submitted that the Financial department does not require figures for each municipality that it will be sufficient if the total figures for all the municipalities in a district are given in the plague estimates ^{as they are now done}. If the estimates for each municipality are exhibited in the consolidated plague estimates the bulk of the f.o. will be (enormously increased) There are

59 municipalities in the Presidency
and it will take up 59 pages to print
the figures relating to ^{the} municipalities
only. If the Plague Commissioner's

instructions are approved, it is
submitted that Collectors may be
instructed to show totals for all
municipalities in each column of
the estimates.

As the estimates will
be quarterly in future, perhaps
the ~~present~~ plan of separate figures
in each Municipality may be
used. This plan will make the
estimates more complete. It
