GOVERNMENT OF MADRAS.
FINANCIAL DEPARTMENT.

11th September 1877, No. 2286.

Municipal—Report.

Read the following papers:—

No. 79. *From J. H. MASTER, Esq., Collector and President of the Municipal Commission, Bellary, to the Chief Secretary to Government, dated Raichur, 11th July 1877, No. 243.*

I have the honor to report on the working of the Municipality at Adoni during 1876-77, the estimates for which period received the sanction of Government in their Order No. 779, dated 3rd May 1876, and a supplemental Budget in their Order No. 195, dated 20th January 1877.

2. The actual receipts and charges amounted to Rupees 25,033-4-6 and Rupees 14,811-1-11, against Rupees 29,262 and Rupees 28,511 estimated: the causes which led to the submission of a supplemental Budget have been detailed in my letter of 9th January 1877, No. 11, embodied in the latter order.

3. I am able to repeat the remark I made in my last report on this Municipality, that the estimates were framed so as to afford a sufficiently accurate forecast of what might be expected to be carried out during the year.

4. The Vice-President, whose report I enclose, explains all the variations from the estimate as to need little or no comment from me.

5. In paragraph 4 of Proceedings of the Madras Government, dated 28th August 1876, No. 1537, information as to elementary education was called for. The Vice-President in paragraph 19 of his report remarks on the condition of the two schools in the Municipality—one Telugu and the other Mahomedan—with a staff of four and two Masters, respectively.

6. The average attendance is given as 89 and 50, against 91 and 51 of the previous year. The maintenance of the numbers during such a severe famine as the one we are now experiencing shows that these schools are appreciated. The results of the examination conducted by the Deputy Inspector of Schools is very satisfactory. The Vice-President does not afford the information required in the latter part of paragraph 4 of the Government Order quoted above, "regarding the total requirements of the town in respect of elementary instructions and the extent to which the arrangements already made by the Commissioners are calculated to meet them." He will be called on now to supply this omission, and the information when received will be duly submitted.

7. It is gratifying also to record the continued success of the Civil Dispensary as an institution freely resorted to by all classes: but the number treated during the year under report is only 6,659 against 9,930 of the previous year, the decrease is due to a large number of persons being treated at the Famine Hospital. This number the Vice-President estimates at 500, so that this would not altogether account for the great disproportion of upwards of 3,000 between this year and the last. Considering the year under report to be quite an exceptional one as regards epidemic disease, the number relieved should be greater than in an ordinary year. I will call upon the Vice-President for explanation on this point.

8. There has been a falling off of 185 in cases vaccinated; due, as the Vice-President remarks, to the absence of the Vaccinator for a month.

9. Much attention is paid by the members of this Municipality to the conservancy of this large town. The water-supply has engaged their particular attention, and all the wells have been cleared out to ensure a better supply.

10. The general health of the town has been bad; cholera and small-pox having visited it as epidemics. The absence of a suitable Dispensary building rendered it impossible to treat the patients under any other better protection than leaf pavilions; the erection of a suitable building will now be proceeded with, the sanctioned design having been received and a large sum being in hand.

11. The Auditor's report accompanies. The Vice-President promises compliance with the suggestions therein laid down.

12. In the interests of the public service there have been frequent changes during the year in the office of Tahsildar, who has generally been Vice-President of the Municipality also.

This has been unfortunate in some ways for the Municipality.

13. The present Vice-President is a non-official member of the Commission elected by his brother Commissioners.

ENCLOSURE No. 1.

From P. MANIKAM MUDALIAR, Vice-President of the Adoni Municipal Commission, to the President of the Adoni Municipal Commission, Bellary, dated Adoni, 27th June 1877, No. 20.

As directed in paragraph 9 of G.O., No. 1347, of the 25th April 1877, I have the honor to submit, herewith, the accounts of this Municipality for the official year 1876-77 in the forms therein prescribed.

2. The report of the Hospital Assistant in charge of the Municipal Dispensary on the health of the town and that of the Annual Auditor are herein enclosed.

3. The original and the supplemental Budget Estimates received the sanction of Government in their Orders No. 779 of 3rd May 1876, and No. 195 of 20th January 1877, respectively.

4. The latter contained instructions that only the net receipts from Tolls should be brought to account, deducting Local Fund share as directed in G.O., No. 2126, of 27th November last; the figures entered in the two items, viz., 1 (e) and (5) of Statements I and II that accompanied the Budget originally submitted and reviewed by Government in their Order, No. 779, of 3rd May 1876, are thus altered or omitted under the appropriate heads of the Statements now accompanying this report.

5. The actual receipts and charges amounted to Rupees 25,033-4-6 and Rupees 14,811-1-11, against Rupees 29,262 and Rupees 28,511, respectively, shown in the Budget Estimates; the causes of variations thereof together with other information regarding the improvements done to the town during the year are explained hereunder.

6. *Rates and Taxes, &c.*, (1).—The decrease under 1 (a) and (b) of the demand assessed was Rupees 373-13-8, of which a sum of Rupees 241-14-0, due by the Madras Railway Company, was paid after the close of the year and the rest being left in arrears to be collected during the current year. The decrease under 1 (d) and (e) and 1 (h) is attributable to the death of certain animals on account of scarcity of fodder, and to the discontinuance of certain trades from which a certain amount of fees was expected to be realizable at the time of preparing Budget Estimates. The increase under 1 (f) is due to the great number of new carts being registered on account of excessive traffic in the town. Regarding the collection from Tolls I have no remark to offer.

7. *Contribution from Special Funds, &c.*—The decrease under 3 (a) is unaccountable owing to the uncertainty of income from that source.

8. *Contribution from Local Funds*, (4).—The income under 4 (b) "Hospitals and Dispensaries" was estimated at Rupees 500 as one-fourth of the Local Fund contribution towards their current charges and was accordingly allotted in the original Budget, but the Circle Board paid only Rupees 490 on the plea that their estimate under that head was to that extent only. Hence the decrease under this head.

9. *Fines and Fees, &c.*, (5).—The increase under this head is due to the strict supervision over the sanitation of the town and consequent increase in the number of prosecutions under the conservancy classes.

10. *Fees in Schools, &c.*, (6).—The increase under this head is attributable to the low estimate

11. *Rent of Houses, &c.*, (7).—The income under this head includes the sum of Rs. 165, Rupees 57, and Rupees 4-5-4, respectively, being the rent on Cart-stand, Markets, and Slaughter-houses; the former sum, through misapprehension, has hitherto been included under the head of Fees to be levied under Section 136 of the Act, and is now transferred to this head which is the proper one to add in.

12. *Payments for Municipal services, &c.*—The increase under 8 (a) is due to the greater number of applications for the services of private toties than was expected and to the collection of arrears.

13. *Endowments, &c.*, (9).—The income under this head includes the sum of Rupees 4,404, the funded capital to be spent upon the erection of new Dispensary, and Rupees 30, the sale proceeds of medicines; but those sums were not received owing to non-construction of Dispensary building and to non-sale of medicines in the Dispensary.

14. *Miscellaneous*, (10).—The increase under 10 (a) is due to the non-sale of sweepings collected by the Municipality during the latter part of the year, as there was no demand for it, and the increase under 10 (c) and 10 (d) is due to the sale of Municipal cart and of Municipal ground; to the sale proceeds of sundry articles accumulated in the office and of disinfecting powder to the public at its prime cost to use it freely when clearing cess-pits attached to their houses to avoid offensive smell arising therefrom. Regarding the heads (11 and 12) I have no remarks to offer.

15. *STATEMENT II—Expenditure. GRANT I—Public Works.*—"Under New Works, Communications," a sum of Rupees 1,500 was provided for expenditure upon works detailed under (a) of Statement II-A, but as the allotment set apart for the first was found barely sufficient for its requirement, the Commissioners intended to have the sum allotted for the second, whose construction was considered to be unnecessary, transferred to the former for its completion, but they together with the most part of the latter (Petty works and Reserve) were not carried out owing to the often changes in the office of the Vice-President during the year under report.

16. Under 1 (b) a sum of Rupees 12,090 was provided for expenditure, of which only Rupees 730-8-4 were spent upon some of the works particularized under (b) of the Statement II-A, leaving a large balance of Rupees 11,359-7-8, which was intended to be spent on the erection of new Dispensary and the same remained to be spent under other heads constituting the item are the savings; a detailed information as to the nature of works executed is appended against each item of the statement concerned.

17. The amount allotted for the work shown under 1 (c) and 1 (d) of the said statement was exceeded by Rs. 14-5-4 and Rupees 59-5-7, respectively; they are satisfactorily executed and are of useful improvements—(1), was the revetting side-drains of a road leading to Kellechpett; (2), was the improving of a well which supplies water to about one-third of the population; the sides (both east and west) were revetted with rough stone to avoid mud falling into and thus filling it up. Two Choultries or Mantapams for the reception of travellers were built of stone in chunam on both sides of the steps of the said well and they are now used by the people freely. The work exhibited under Miscellaneous was not carried out as the season did not permit to have the same to be done.

18. *Repairs.*—"Under 2 (a) Communications," the expenditure of Rupees 406-5-10, or an excess of Rupees 6-5-10, was incurred against an estimate of Rupees 400, in repairing all the roads in the town. The amount expended under 2 (b) was Rupees 137-11-11 against an allotment of Rupees 289, in restoring main wall of a female latrine situated near Gowlivada with sun-dried bricks and plastering the same thoroughly; and rebuilding all seats of stone with chunam of a male latrine situated near Vencauncary, and in flooring the same with flags. All other sundry repairs required for this as well as the latrine situated near Bandy-stand were also carried out. No expenditure was incurred to repair the Dispensary, &c., as nothing was considered urgent. The other items under this grant call for no remarks.

19. *Grant II (Education).*—The expenditure under this head was Rs. 1,240-7-9 (which is within the Budget allotment); of this Rupees 1,054-15-9 were spent in maintaining a Telugu and Mahomedan schools, the former consists of four Masters and one peon, and the latter two Masters and one peon. Their progress is as satisfactory as in the previous years. The average daily attendance during the year under report was 89 in the former and 50 in the latter, as against 91 and 51, respectively, in the preceding year. The slight fall in them is due to the boys attending the relief works for their maintenance. For the same reason the saving under head (4) was effected. The Deputy Inspector of Schools of the Circle reports very favorably on these schools. He states that in the Telugu School, the reading, meaning of words and phrases, Geography and Arithmetic, was one and all "good," and that in Hindustani School, the reading was "good," meaning of words and phrases "fair," and parsing "poor." The examination of the class was "fair" in Arithmetic and Geography and "very fair" in dictation.

20. GRANT III.—*Sanitation and Medical Services. Hospitals and Dispensaries.*—Under 1 (a) and 1 (d) a saving of Rs. 406-5-7 was effected owing to the less salary of Second-class Hospital Assistant who is now in charge of the Municipal Dispensary instead of First-class Hospital Assistant who held the office till April 1876, and was transferred to Mysore Commission in the beginning of May of that year, and to stoppages in the pay of other subordinates for absence, &c., and non-purchase of furniture for the contemplated new Dispensary; but out of the saving of Rs. 406-5-7 an excess sum of Rs. 79-4-0 was spent under 1 (b) and 1 (c) over the Budget grant in purchasing necessary medicines and in dieting more indoor patients on account of the prevalence of epidemic diseases. The working of the Dispensary was very satisfactory as it had been more freely resorted to by the townspeople as well as by the people of adjacent villages. The total number of patients (both in and out) treated during the year was 6,659 as against a total number of 9,930 in the preceding year. The falling is attributed to very nearly 500 people of poor, old, and infirm classes obtaining relief at the Famine Hospital in the shape of ordinary medicines, dressings, and food.

21. *Registration of Births and Deaths.*—It has been well attended to by appointing the second Gumastah of the office to detect both the unreported births and deaths and keep the register accurately. There were 695 births and 1,653 deaths, as against 797 and 1,109, respectively, in the previous year.

22. *Vaccination.*—The number vaccinated during the year was 730, of which 706 were proved successful and 24 unsuccessful or otherwise, as against 915 in the preceding year. This falling off of 185 cases is due to the Vaccinator's absence on one month's sick leave. The amount spent under this head was Rupees 125-8-9, as against an allotment of Rupees 140.

23. *Conservancy.*—A sum of Rupees 5,908-8-5 was spent under this head against the Budget allotment of Rs. 5,951. The decrease under 4 (a), 4 (b), and 4 (c) is due partly to the stoppages in the pay of the establishment for absence and other causes and to the less charge incurred in feeding conservancy bullocks with prickly-pear instead of grass and straw, and lastly to the non-clearance of some of the fresh-water wells as they had a small quantity of water in them. The increase under other items of the head is attributable partly to the low estimate and partly to the spreading of sand of six inches deep in almost all of the latrines for better sanitation; to the employment of two extra men to clean the seats of two masonry latrines with water every day; to the purchase of iron tubs to be fixed in lanes for the purpose of urinals, and to the purchase of other necessities required to arrest the spread of cholera and small-pox. The conservancy of the town was well attended to. A sufficient number of sweepers and toties were employed to keep the town and latrines clean under the orders of an Inspector and four peons. The sweepings were daily removed by a Municipal cart and by buffalo men. The side-drains were also cleaned by the sweepers at their leisure hours.

24. The Public and Private latrines were daily cleaned and their contents removed for burial to a long distance outside the town.

25. GRANT IV.—*Lighting.*—The cost under this head was below the estimate. The kerosene-oil required to light six lamp-posts (newly added to seventy-eight, making a total of eighty-four) was not purchased as they were received after great delay in the year.

26. Rupees 431-7-2 under head (5) were spent, out of an allotment of Rupees 460, in watering avenues and in fencing them with thorns and they are in a flourishing condition. No fresh avenue trees were planted owing to the failure of rain during the year under report. The amount allotted under head (7) is slightly increased by the omission (in the supplemental Budget) of famine batta paid to the Dispensary peon. The work of numbering houses was not carried out owing to not having a competent man to do the work, the sum spent under the head was to the purchase of paints, &c., required for the purpose.

27. GRANT V.—*Head Office.* (1).—The establishment was the same as in the last year, but there was saving of Rupees 41 and odd under both the Establishment and Contingencies. The fee of Annual Auditor and contribution towards the pay of a clerk employed in the President's office, which were hitherto included in the once contingent charges, are now shown separately under heads concerned in the Statement II of the year.

28. *Accounts.*—The accounts of the Municipality were audited by Mr. S. R. Vacha, Agent for Messrs. Dymes and Co., who is unconnected with the Commission. The omissions referred to in paragraph 4 of his report will be set right.

29. In paragraph 5 the Auditor points out a difference of Rupees 30 in the cash balance of the year. I beg to represent that the sum was drawn from the Treasury and left in the hands of the Manager to meet contingent charges, as it seemed to have not been debited in the cash book as has been drawn. I, through misapprehension, ordered the sum to be returned to the Treasury crediting in the cash-book, in order to reconcile the transaction with both the Municipal cash book and the Treasury accounts as required by you often.

No. 79-A. From J. H. MASTER, Esq., Collector and President of the Municipal Commission, Bellary, to the Chief Secretary to Government, dated Bellary, 31st July 1877, No. 261.

With reference to paragraphs 6 and 7 of my report on the working of the Adoni Municipality during the year 1876-77, submitted under date the 11th instant, I have the honor to forward the further information furnished by the Vice-President as regards the requirements of the town in respect of elementary education and the falling off in the number of sick treated at the Civil Dispensary at that station.

2. It will be observed that, besides the Telugu and Hindustani Schools under the management of the Commissioners, there are eleven pial schools in the town, of which five only have been recommended for results grants by the Deputy Inspector of Schools, the remaining six being considered of a trifling character. There are no schools aided on the system of salary grants and on the combined system of salary and results grants, but the Commissioners are prepared to introduce these into the existing schools if favorably reported upon by the Educational authorities.

3. The decrease in the number of sick persons treated at the dispensary is owing, it will be seen, to a good many of the poor people of the town and of the adjoining villages having had recourse to the relief operations set on foot by the Government at a distance from the town on account of the famine.

ENCLOSURE No. 1.

From P. MANIKAM MOODALIAR, Vice-President of the Adoni Municipal Commission, to the President of the Adoni Municipal Commission, dated Adoni, 19th July 1877, No. 29.

With reference to your docket, No. 132, of the 11th instant, I have the honor to inform you that there are two Municipal Schools—one teaching Telugu and the other teaching Hindustani—with a staff of six masters and two peons. Their cost is entirely defrayed from the Municipal Funds. The average daily attendance in these schools is 139, and the cost per pupil is Rupees 6-8-1. Besides these there are 11 pial schools in the town, and five only of them have been recommended for results grants by the Deputy Inspector of Schools. The average daily attendance in them being 183, the other six schools, with a number of 104 boys on the rolls, remain unaided. They are of a transient character depending upon the mercy of their supporters and lasting only for some months in the year. There are no schools existing in the town aided on the system of salary grants and on the combined system of salary and results grants, but the Commissioners can afford as fund available and are willing to introduce them (systems) into the existing schools if the Educational authorities consider it feasible and beneficial to their interests.

2. With regard to paragraph 2, I beg to represent that the decrease in the number of the sick noticed therein is attributable to a great many of the poor people of the town and of the adjoining villages who were obtaining treatment in the dispensary having been compelled by distress to abandon their home and seek relief at a distance from the town. Those who were provided with work in and about the town could not attend the dispensary for fear of being dismissed for absence at the time of muster, which generally takes place in the morning and which therefore collapses with the business hours of the dispensary.

ENCLOSURE No. 2.

ANNUAL REPORT of the CIVIL DISPENSARY, ADONI, for the Year 1876-77.

The Dispensary, as reported last year, is still in the same old building which belongs to the Municipality, nothing has been done up to date as to the erection of the proposed new building.

2. The following shows the number treated, &c., during the year:—

	EUROPEANS.		NATIVES.	
	In.	Out.	In.	Out.
Remained on 31st March 1876	..	..	3	59
Admitted during the year	..	3	79	6,515
Total treated	..	3	82	6,574
Discharged	..	3	62	6,429
Died	..	..	12	74
Remaining on 31st March 1877	..	..	8	71

The Dispensary has six beds, four for male and two for female patients.

Eight hundred and twenty-three cases were vaccinated during the year, 797 proved successful.

The streets and public roads were daily swept and kept clean by twenty sweepers, under the supervision of the Conservancy Inspector; the dust and sweepings, &c., from the bins were daily removed by Municipal carts and buffalo men.

Owing to the failure of rain, famished coolies collected into the town from all villages amounting to a daily number of from twenty-five to thirty thousand.

Cholera broke out in a severe form among the coolies and the townspeople during the month of December; although it is still continuing in and villages close to the town, the severity of the form has greatly subsided.

Cholera and small-pox were the two epidemic diseases that created great havoc among the townspeople and famine coolies. Most of the cases have been treated in cholera and small-pox sheds erected by the relief authorities; besides the sheds mentioned above, relief authorities have established a Famine Hospital for the relief of the general sick, poor and old and infirm paupers; from 400 to 500 people obtain relief at the hospital in shape of ordinary medicines, dressings, and food daily; this is the chief cause of the decrease in the number of attendance at the Municipal Dispensary.

Febricula, ague, rheumatism, conjunctivitis, inflammation of membrane tympanum, diarrhoea, dysentery, ulcers, and itch were the prevailing diseases during the year.

The list of operations performed in the Dispensary during the year 1876-77 is hereunder appended:—

Disease.	No.	Nature of Operations.	Result.
Tooth-ache	60	Extracting teeth	Successful.
Foreign body in nose	2	Removed	Do.
Fracture of humerus	1	Splint and Bandage, &c.	Do.
Do. of ulna and radius	6	Do. do.	Do.
Do. of leg, both bones	2	Do. do.	Do.
Dislocation of elbow	1	Reduced	Do.

	RS.	A.	P.
Remained on 31st March 1876	11,323	7	3
Received from Municipal Fund	652	9	6
Do. from Local Fund	635	3	0
Total	12,611	3	9
Expended	1,642	14	5
Balance on 31st March 1877	10,968	5	4

The Dispensary building is in tolerable repair.

I certify that the order regarding the custody of poisonous drugs issued by Principal Inspector-General, Medical Department, dated 23rd January 1863, are fully carried out.

ADONI,
1st April 1877.

(Signed) V. BARATHALWAR,
Hospital Assistant in charge Civil Dispensary.

No. 80. ORDER THEREON, 11th September 1877, No. 2286.

The receipts and charges of the Adoni Municipality for 1876-77 are compared below with the estimates and with the actuals of the preceding year:—

RECEIPTS.	Actuals, 1875-76.	Estimates, 1876-77.	Actuals, 1876-77.
	RS.	RS.	RS.
Rates on Houses and Lands	6,106	6,816	6,442
Taxes on Vehicles and Animals	1,532	1,500	1,458
Registration of Carts	601	520	670
Tolls	3,090	3,113	3,113
Licenses	384	380	137
Assignments by Government	44	35	24

Balances	9,326	748	10,222
Total	24,370	29,259	25,033

2. Excluding the opening balance and the appropriation of Rupees 4,404 from the Capital Endowment of the Dispensary which was proposed but not carried out, the income for the year was Rupees 15,706, of which taxes yielded Rupees 11,820 against an estimate of Rupees 12,329, the decrease being more than compensated by an increase under other items of revenue.

3. The amount allotted for expenditure was Rupees 28,511, but only Rupees 14,811 were expended as the Dispensary building for which a sum of Rupees 11,000 was assigned could not be undertaken owing to the late date at which the standard plan was sanctioned. The public works carried out though few in number were of a useful character.

4. As compared with the previous year, there was an increase of Rupees 53 in the educational expenditure mostly under Results Grants. The Telugu and Hindustani Schools under the charge of the Commissioners appear to have progressed satisfactorily. This is not the case with elementary education, the total number of boys receiving instruction being only 426 out of a school-going population of 1,740. The matter should receive attention when the present famine disappears. The Commissioners should also take into consideration, at an early date, the present state of female education in the town. A beginning in this direction should be made without delay.

5. Under Medical and Sanitary Services, the charges are less than the estimate, the bulk of the saving being due to the substitution of a second class for a first-class Hospital Assistant. Many of the town and suburban residents were compelled by the famine to resort to relief-works organised outside the town, and therefore applied to the Famine Hospital for medical aid. This partly accounts for the large decrease in the attendance at the Dispensary. There was also a falling off in the number of vaccinations owing to the absence of the vaccinator for a month.

6. The Government note with satisfaction the increased attention paid to the sanitation and water-supply of the town. The outbreak of cholera and small-pox rendered such operations specially incumbent on the Municipal Commissioners, and should in future claim their systematic attention. The Government, however, generally congratulate the Commissioners on the results of their labors for the benefit of their fellow-townsmen.

7. The accounts appear to have been carefully kept, and the instructions on the subject well attended to. The only item calling for remark is the entry of permanent road coolies under Establishment. They should more properly have appeared under Works.

GOVERNMENT OF MADRAS.

FINANCIAL DEPARTMENT.

11th September 1877, No. 2286

Municipal—Report.

Read the following papers :—

No. 779. From J. H. MASTER, Esq., Collector and President of the Municipal Commission, Bellary, to the Chief Secretary to Government, dated Raichur, 11th July 1877, No. 243.

I have the honor to report on the working of the Municipality at Adoni during 1876-77, the estimates for which period received the sanction of Government in their Order No. 779, dated 3rd May 1876, and a supplemental Budget in their Order No. 195, dated 20th January 1877.

2. The actual receipts and charges amounted to Rupees 25,033-4-6 and Rupees 14,811-1-11, against Rupees 29,262 and Rupees 28,511 estimated: the causes which led to the submission of a supplemental Budget have been detailed in my letter of 9th January 1877, No. 11, embodied in the latter order.

3. I am able to repeat the remark I made in my last report on this Municipality, that the estimates were framed so as to afford a sufficiently accurate forecast of what might be expected to be carried out during the year.

4. The Vice-President, whose report I enclose, explains all the variations from the estimate as to need little or no comment from me.

5. In paragraph 4 of Proceedings of the Madras Government, dated 28th August 1876, No. 1537, information as to elementary education was called for. The Vice-President in paragraph 19 of his report remarks on the condition of the two schools in the Municipality—one Telugu and the other Mahomedan—with a staff of four and two Masters, respectively.

6. The average attendance is given as 89 and 50, against 91 and 51 of the previous year. The maintenance of the numbers during such a severe famine as the one we are now experiencing shows that these schools are appreciated. The results of the examination conducted by the Deputy Inspector of Schools is very satisfactory. The Vice-President does not afford the information required in the latter part of paragraph 4 of the Government Order quoted above, "regarding the total requirements of the town in respect of elementary instructions and the extent to which the arrangements already made by the Commissioners are calculated to meet them." He will be called on now to supply this omission, and the information when received will be duly submitted.

7. It is gratifying also to record the continued success of the Civil Dispensary as an institution freely resorted to by all classes: but the number treated during the year under report is only 6,659 against 9,930 of the previous year, the decrease is due to a large number of persons being treated at the Famine Hospital. This number the Vice-President estimates at 500, so that this would not altogether account for the great disproportion of upwards of 3,000 between this year and the last. Considering the year under report to be quite an exceptional one as regards epidemic disease, the number relieved should be greater than in an ordinary year. I will call upon the Vice-President for explanation on this point.

8. There has been a falling off of 185 in cases vaccinated; due, as the Vice-President remarks, to the absence of the Vaccinator for a month.

Obdt. of 118773 30/9/77.

FINANCIAL.

THE PRESIDENT OF THE MUNICIPAL COMMISSION.

G.O., 11th September 1877, No. 2286.

SEPTEMBER.
Nos. 79-80.

Municipal—Reports.—Annual Report of Adoni Municipality for 1876-77, reviewed.

9. Much attention is paid by the members of this Municipality to the conservancy of this large town. The water-supply has engaged their particular attention, and all the wells have been cleared out to ensure a better supply.

10. The general health of the town has been bad; cholera and small-pox having visited it as epidemics. The absence of a suitable Dispensary building rendered it impossible to treat the patients under any other better protection than leaf pavilions; the erection of a suitable building will now be proceeded with, the sanctioned design having been received and a large sum being in hand.

11. The Auditor's report accompanies. The Vice-President promises compliance with the suggestions therein laid down.

12. In the interests of the public service there have been frequent changes during the year in the office of Tahsildar, who has generally been Vice-President of the Municipality also.

This has been unfortunate in some ways for the Municipality.

13. The present Vice-President is a non-official member of the Commission elected by his brother Commissioners.

ENCLOSURE No. 1.

From P. MANIKAM MUDALIAR, Vice-President of the Adoni Municipal Commission, to the President of the Adoni Municipal Commission, Bellary, dated Adoni, 27th June 1877, No. 20.

As directed in paragraph 9 of G.O., No. 1347, of the 25th April 1877, I have the honor to submit, herewith, the accounts of this Municipality for the official year 1876-77 in the forms therein prescribed.

2. The report of the Hospital Assistant in charge of the Municipal Dispensary on the health of the town and that of the Annual Auditor are herein enclosed.

3. The original and the supplemental Budget Estimates received the sanction of Government in their Orders No. 779 of 3rd May 1876, and No. 195 of 20th January 1877, respectively.

4. The latter contained instructions that only the net receipts from Tolls should be brought to account, deducting Local Fund share as directed in G.O., No. 2126, of 27th November last; the figures entered in the two items, viz., 1 (e) and (5) of Statements I and II that accompanied the Budget originally submitted and reviewed by Government in their Order, No. 779, of 3rd May 1876, are thus altered or omitted under the appropriate heads of the Statements now accompanying this report.

5. The actual receipts and charges amounted to Rupees 25,033-4-6 and Rupees 14,811-1-11, against Rupees 29,262 and Rupees 28,511, respectively, shown in the Budget Estimates; the causes of variations thereof together with other information regarding the improvements done to the town during the year are explained hereunder.

6. *Rates and Taxes, &c.*, (1).—The decrease under 1 (a and b) of the demand assessed was Rupees 373-13-8, of which a sum of Rupees 241-14-0, due by the Madras Railway Company, was paid after the close of the year and the rest being left in arrears to be collected during the current year. The decrease under 1 (d and e) and 1 (h) is attributable to the death of certain animals on account of scarcity of fodder, and to the discontinuance of certain trades from which a certain amount of fees was expected to be realizable at the time of preparing Budget Estimates. The increase under 1 (f) is due to the great number of new carts being registered on account of excessive traffic in the town. Regarding the collection from Tolls I have no remark to offer.

7. *Contribution from Special Funds, &c.*—The decrease under 3 (a) is unaccountable owing to the uncertainty of income from that source.

8. *Contribution from Local Funds*, (4).—The income under 4 (b) "Hospitals and Dispensaries" was estimated at Rupees 500 as one-fourth of the Local Fund contribution towards their current charges and was accordingly allotted in the original Budget, but the Circle Board paid only Rupees 490 on the plea that their estimate under that head was to that extent only. Hence the decrease under this head.

9. *Fines and Fees, &c.*, (5).—The increase under this head is due to the strict supervision over the sanitation of the town and consequent increase in the number of prosecutions under the conservancy classes.

10. *Fees in Schools, &c.*, (6).—The increase under this head is attributable to the low estimate

11. *Rent of Houses, &c.*, (7).—The income under this head includes the sum of Rs. 165, Rupees 57, and Rupees 4-5-4, respectively, being the rent on Cart-stand, Markets, and Slaughter-houses; the former sum, through misapprehension, has hitherto been included under the head of Fees to be levied under Section 136 of the Act, and is now transferred to this head which is the proper one to add in.

12. *Payments for Municipal services, &c.*—The increase under 8 (a) is due to the greater number of applications for the services of private toties than was expected and to the collection of arrears.

13. *Endowments, &c.*, (9).—The income under this head includes the sum of Rupees 4,404, the funded capital to be spent upon the erection of new Dispensary, and Rupees 30, the sale proceeds of medicines; but those sums were not received owing to non-construction of Dispensary building and to non-sale of medicines in the Dispensary.

14. *Miscellaneous*, (10).—The decrease under 10 (a) is due to the non-sale of sweepings collected by the Municipality during the latter part of the year, as there was no demand for it, and the increase under 10 (c) and 10 (d) is due to the sale of Municipal cart and of Municipal ground; to the sale proceeds of sundry articles accumulated in the office and of disinfecting powder to the public at its prime cost to use it freely when clearing cess-pits attached to their houses to avoid offensive smell arising therefrom. Regarding the heads (11 and 12) I have no remarks to offer.

15. *STATEMENT II—Expenditure. GRANT I—Public Works.*—"Under New Works, Communications," a sum of Rupees 1,500 was provided for expenditure upon works detailed under (a) of Statement II-A, but as the allotment set apart for the first was found barely sufficient for its requirement, the Commissioners intended to have the sum allotted for the second, whose construction was considered to be unnecessary, transferred to the former for its completion, but they together with the most part of the latter (Petty works and Reserve) were not carried out owing to the often changes in the office of the Vice-President during the year under report.

16. Under 1 (b) a sum of Rupees 12,090 was provided for expenditure, of which only Rupees 730-8-4 were spent upon some of the works particularized under (b) of the Statement II-A, leaving a large balance of Rupees 11,359-7-8; this includes the sum to be spent on the erection of new Dispensary and the sums remained to be spent under other heads constituting the item are the savings; a detailed information as to the nature of works executed is appended against each item of the statement concerned.

17. The amount allotted for the work shown under 1 (c) and 1 (d) of the said statement was exceeded by Rs. 14-5-4 and Rupees 53-5-7, respectively; they were satisfactorily executed and are of useful improvements—(1), was the revetting side-drains of a road leading to Kellechpett; (2), was the improving of a well which supplies water to about one-third of the population; the sides (both east and west) were revetted with rough stone to avoid mud falling into and thus filling it up. Two Choultries or Mantapams for the reception of travellers were built of stone in chunam on both sides of the steps of the said well and they are now used by the people freely. The work exhibited under Miscellaneous was not carried out as the season did not permit to have the same to be done.

18. *Repairs.*—"Under 2 (a) Communications," the expenditure of Rupees 406-5-10, or an excess of Rupees 6-5-10, was incurred against an estimate of Rupees 400, in repairing all the roads in the town. The amount expended under 2 (b) was Rupees 137-11-11 against an allotment of Rupees 289, in restoring main wall of a female latrine situated near Gowlivada with sun-dried bricks and plastering the same thoroughly; and rebuilding all seats of stone with chunam of a male latrine situated near Vencanuary, and in flooring the same with flags. All other sundry repairs required for this as well as the latrine situated near Bandy-stand were also carried out. No expenditure was incurred to repair the Dispensary, &c., as nothing was considered urgent. The other items under this grant call for no remarks.

19. *GRANT II—(Education).*—The expenditure under this head was Rs. 1,240-7-9 (which is within the Budget allotment); of this Rupees 1,054-15-9 were spent in maintaining a Telugu and Mahomedan schools, the former consists of four Masters and one peon, and the latter two Masters and one peon. Their progress is as satisfactory as in the previous years. The average daily attendance during the year under report was 89 in the former and 50 in the latter, as against 81 and 51, respectively, in the preceding year. The slight fall in them is due to the boys attending the relief works for their maintenance. For the same reason the saving under head (4) was effected. The Deputy Inspector of Schools of the Circle reports very favorably on these schools. He states that in the Telugu School, the reading, meaning of words and phrases, Geography and Arithmetic, was one and all "good," and that in Hindustani School, the reading was "good," meaning of words and phrases "fair," and parsing "poor." The examination of the class was "fair" in Arithmetic and Geography and "very fair" in dictation.

20. GRANT III.—*Sanitation and Medical Services. Hospitals and Dispensaries.*—Under 1 (a) and 1 (d) a saving of Rs. 406-5-7 was effected owing to the less salary of Second-class Hospital Assistant who is now in charge of the Municipal Dispensary instead of First-class Hospital Assistant who held the office till April 1876, and was transferred to Mysore Commission in the beginning of May of that year, and to stoppages in the pay of other subordinates for absence, &c., and non-purchase of furniture for the contemplated new Dispensary; but out of the saving of Rs. 406-5-7 an excess sum of Rs. 79-4-0 was spent under 1 (b) and 1 (c) over the Budget grant in purchasing necessary medicines and in dieting more indoor patients on account of the prevalence of epidemic diseases. The working of the Dispensary was very satisfactory as it had been more freely resorted to by the townspeople as well as by the people of adjacent villages. The total number of patients (both in and out) treated during the year was 6,659 as against a total number of 9,930 in the preceding year. The falling is attributed to very nearly 500 people of poor, old, and infirm classes obtaining relief at the Famine Hospital in the shape of ordinary medicines, dressings, and food.

21. *Registration of Births and Deaths.*—It has been well attended to by deputing the second Gamastah of the office to detect both the unreported births and deaths and keep the register accurately. There were 695 births and 1,653 deaths, as against 797 and 1,109, respectively, in the previous year.

22. *Vaccination.*—The number vaccinated during the year was 730, of which 706 were proved successful and 24 unsuccessful or otherwise, as against 915 in the preceding year. This falling off of 185 cases is due to the Vaccinator's absence on one month's sick leave. The amount spent under this head was Rupees 125-8-9, as against an allotment of Rupees 140.

23. *Conservancy.*—A sum of Rupees 5,908-8-5 was spent under this head against the Budget allotment of Rs. 5,951. The decrease under 4 (a), 4 (b), and 4 (c) is due partly to the stoppages in the pay of the establishment for absence and other causes and to the less charge incurred in feeding conservancy bullocks with prickly-pear instead of grass and straw, and lastly to the non-clearance of some of the fresh-water wells as they had a small quantity of water in them. The increase under other items of the head is attributable partly to the low estimate and partly to the spreading of sand of six inches deep in almost all of the latrines for better sanitation; to the employment of two extra men to clean the seats of two masonry latrines with water every day; to the purchase of iron tubs to be fixed in lanes for the purpose of urinals, and to the purchase of other necessities required to arrest the spread of cholera and small-pox. The conservancy of the town was well attended to. A sufficient number of sweepers and toties were employed to keep the town and latrines clean under the orders of an Inspector and four peons. The sweepings were daily removed by a Municipal cart and by buffalo men. The side-drains were also cleaned by the sweepers at their leisure hours.

24. The Public and Private latrines were daily cleaned and their contents removed for burial to a long distance outside the town.

25. GRANT IV.—*Lighting.*—The cost under this head was below the estimate. The kerosene-oil required to light six lamp-posts (newly added to seventy-eight, making a total of eighty-four) was not purchased as they were received after great delay in the year.

26. Rupees 431-7-2 under head (5) were spent, out of an allotment of Rupees 460, in watering avenues and in fencing them with thorns and they are in a flourishing condition. No fresh avenue trees were planted owing to the failure of rain during the year under report. The amount allotted under head (7) is slightly increased by the omission (in the supplemental Budget) of famine batta paid to the Dispensary peon. The work of numbering houses was not carried out owing to not having a competent man to do the work, the sum spent under the head was to the purchase of paints, &c., required for the purpose.

27. GRANT V.—*Head Office, (1).*—The establishment was the same as in the last year, but there was saving of Rupees 41 and odd under both the Establishment and Contingencies. The fee of Annual Auditor and contribution towards the pay of a clerk employed in the President's office, which were hitherto included in the office contingent charges, are now shown separately under heads concerned in the Statement II of the year.

28. *Accounts.*—The accounts of the Municipality were audited by Mr. S. R. Vacha, Agent for Messrs. Dymes and Co., who is unconnected with the Commission. The omissions referred to in paragraph 4 of his report will be set right.

29. In paragraph 5 the Auditor points out a difference of Rupees 30 in the cash balance of the year. I beg to represent that the sum was drawn from the Treasury and left in the hands of the Manager to meet contingent charges, as it seemed to have not been debited in the cash book as has been drawn. I, through misapprehension, ordered the sum to be returned to the Treasury crediting in the cash-book, in order to reconcile the transaction with both the Municipal cash book and the Treasury accounts as required by you often.

No. From J. H. MASTER, Esq., Collector and President of the Municipal Commission, Bellary, to the Chief Secretary to Government, dated Bellary, 31st July 1877, No. 261.

With reference to paragraphs 6 and 7 of my report on the working of the Adoni Municipality during the year 1876-77, submitted under date the 11th instant, I have the honor to forward the further information furnished by the Vice-President as regards the requirements of the town in respect of elementary education and the falling off in the number of sick treated at the Civil Dispensary at that station.

2. It will be observed that, besides the Telugu and Hindustani Schools under the management of the Commissioners, there are eleven pial schools in the town, of which five only have been recommended for results grants by the Deputy Inspector of Schools, the remaining six being considered of a trifling character. There are no schools aided on the system of salary grants and on the combined system of salary and results grants, but the Commissioners are prepared to introduce these into the existing schools if favorably reported upon by the Educational authorities.

3. The decrease in the number of sick persons treated at the dispensary is owing, it will be seen, to a good many of the poor people of the town and of the adjoining villages having had recourse to the relief operations set on foot by the Government at a distance from the town on account of the famine.

ENCLOSURE No. 1.

From P. MANIKAM MOODALIAB, Vice-President of the Adoni Municipal Commission, to the President of the Adoni Municipal Commission, dated Adoni, 19th July 1877, No. 29.

With reference to your docket, No. 132, of the 11th instant, I have the honor to inform you that there are two Municipal Schools—one teaching Telugu and the other teaching Hindustani with a staff of six masters and two peons. Their cost is met by a grant from the Municipal Funds. The average daily attendance in these schools is 139, and the cost per pupil is Rupees 6-8-1. Besides these there are 11 pial schools in the town, and five only of them have been recommended for results grants by the Deputy Inspector of Schools. The average daily attendance in them being 183, the other six schools, with a number of 104 boys on the rolls, remain unaided. They are of a transient character depending upon the mercy of their supporters and lasting only for some months in the year. There are no schools existing in the town aided on the system of salary grants and on the combined system of salary and results grants, but the Commissioners can afford as fund available and are willing to introduce them (systems) into the existing schools if the Educational authorities consider it feasible and beneficial to their interests.

2. With regard to paragraph 2, I beg to represent that the decrease in the number of the sick noticed therein is attributable to a great many of the poor people of the town and of the adjoining villages who were obtaining treatment in the dispensary having been compelled by distress to abandon their home and seek relief at a distance from the town. Those who were provided with work in and about the town could not attend the dispensary for fear of being dismissed for absence at the time of muster, which generally takes place in the morning and which therefore collapses with the business hours of the dispensary.

ENCLOSURE No. 2.

ANNUAL REPORT of the CIVIL DISPENSARY, ADONI, for the Year 1876-77.

The Dispensary, as reported last year, is still in the same old building which belongs to the Municipality, nothing has been done up to date as to the erection of the proposed new building.

2. The following shows the number treated, &c., during the year:—

	EUROPEANS.		NATIVES.	
	In.	Out.	In.	Out.
Remained on 31st March 1876			3	59
Admitted during the year		3	79	6,515
Total treated		3	82	6,574
Discharged		3	62	6,429
Died			12	74
Remaining on 31st March 1877			8	71

The Dispensary has six beds, four for male and two for female patients.

Eight hundred and twenty-three cases were vaccinated during the year, 797 proved successful.

The streets and public roads were daily swept and kept clean by twenty sweepers, under the supervision of the Conservancy Inspector; the dust and sweepings, &c., from the bins were daily removed by Municipal carts and buffalo men.

Owing to the failure of rain, famished coolies collected into the town from all villages amounting to a daily number of from twenty-five to thirty thousand.

Cholera broke out in a severe form among the coolies and the townspeople during the month of December; although it is still continuing in and villages close to the town, the severity of the form has greatly subsided.

Cholera and small-pox were the two epidemic diseases that created great havoc among the townspeople and famine coolies. Most of the cases have been treated in cholera and small-pox sheds erected by the relief authorities; besides the sheds mentioned above, relief authorities have established a Famine Hospital for the relief of the general sick, poor and old and infirm paupers; from 400 to 500 people obtain relief at the hospital in shape of ordinary medicines, dressings, and food daily; this is the chief cause of the decrease in the number of attendance at the Municipal Dispensary.

Febricula, ague, rheumatism, conjunctivitis, inflammation of membrane tympanum, diarrhoea, dysentery, ulcers, and itch were the prevailing diseases during the year.

The list of operations performed in the Dispensary during the year 1876-77 is appended:—

Disease.	No.	Nature of Operations.	Result.
Tooth-ache	60	Extracting teeth	Successful.
Foreign body in nose	2	Removed	Do.
Fracture of humerus	1	Splint and Bandage, &c. .. .	Do.
Do. of ulna and radius	6	Do. do.	Do.
Do. of leg, both bones	2	Do. do.	Do.
Dislocation of elbow	1	Reduced	Do.

	RS.	A.	P.
Remained on 31st March 1876	11,323	7	3
Received from Municipal Fund	652	9	6
Do. from Local Fund	635	3	0
Total	12,611	3	9
Expended	1,642	14	5
Balance on 31st March 1877	10,968	5	4

The Dispensary building is in tolerable repair.

I certify that the order regarding the custody of poisonous drugs issued by Principal Inspector-General, Medical Department, dated 23rd January 1868, are fully carried out.

ADONI,
1st April 1877.

(Signed) V. BARATHALWAR,
Hospital Assistant in charge Civil Dispensary.

Sir,

P. Hamilton Macdonald
Vice President of the
Adm. Mut. Comm.

To

J. A. Macdonald Esq.
President of the
Adm. Mut. Comm.
Bellingham

19 Sir

As directed in para 9 of G.O. No. 1347 of the 25th April 1877, I have

the honor to submit herewith the accounts of this Municipality for the Official Year 1876-77 in the forms therein prescribed.

2. The report of the Hospital Officer in charge of the Municipal Dispensary on the health of the town and that of the Annual Auditor are herein enclosed.

3. The Original & the Supplemental Budget Estimates received the sanction of Government in the

G.O. No. 195 of 20th January 1877 respectively.

4. The latter contained instructions that only the net receipts from tolls should be brought to account deducting Local Fund share as directed in G.O. No. 2026 of 21st November last; the figures entered in the two items viz: 1(c) & (s) of Statement I & II

19

80. 2186/77.

that accompanied the Budget, originally submitted & reviewed by Government in their Order No. 779 of 3rd May 1876 are thus altered or omitted under the appropriate heads of the Statements now accompanying this report.

6. The Actual receipts and Charges amounted to Rs. 25,032-4-6 and Rs. 14,811-1-4 against Rs. 29,212 & Rs. 28,511, respectively shown in the Budget Estimates, the Causes of variations thereof together with other information regarding the improvements done to the town during the year are explained hereunder.

1. Rates and Taxes &c. (1). The decrease under 1(a & b) of the demand assessed was Rs. 370-15-8 of which a sum of Rs. 241-16-8 due by the Madras Railway Company was paid after the close of the year and the rest being left in arrears to be collected during the current year. The decrease under 1(a & b) & 1(c) is attributable to the death of certain animals

due to the decrease of certain trades from which a certain amount of fees was expected to be realizable at the time of preparing Budget Estimates. The increase under 1(d) is due to the great number of new carts being registered on account of excessive traffic in the town. Regarding the Collection from taxes I have no

remark to offer.

7. Contribution from Special Funds. The decrease under 2(a) is unaccountable owing to the uncertainty of income from that source.

8. Contribution from Local Funds (b). The income under 4(b) "Hospitals and Dispensaries" was Estimated at Rs. 500 as one-fourth of the Local Fund contribution towards their Current Charges & was accordingly allotted in the original Budget but the Civil Road paid only Rs. 490 on the plea that their estimate under that head was to that extent only. Hence the decrease under this head.

9. Fines &c. (5). The increase under this head is due to the supervision over the Sanitation of the town & consequent increase in the number of prosecutions under the Conservancy classes.

10. Fees in Schools &c. (6). The increase under this head is attributable to the new Estimate.

11. Rs. 1 of Fines. The increase under this head includes the sum of Rs. 160 & Rs. 4-5-4 respectively being the part on Cart stand, Chakras & Slaughter houses, the former sum, through misapprehension, has hitherto been included under the head of fees to be levied under Section 136 of the Act & is now transferred to this head which

is the proper one to add in.

12. Payments for Municipal Services. The increase under 8(a) is due to the greater number of applications for the services of private toilet than was expected & to the Collection of arrears. -

13. Endowments &c. The increase under this head includes the sum of Rs. 1000, the funded Capital to be spent upon the erection of a new Dispensary & Rs. 30, the sale proceeds of Medicines but those sums were not received owing to non-Construction of Dispensary building & to non-sale of Medicines in the Dispensary. -

14. Miscellaneous (10). The decrease under 10(c) is due to the non-sale of Sweepings Collected by the Municipality during the latter part of the year, as there was no demand for it & the increase under 10(c) & 10(d) is due to the sale of Municipal Cart & of Municipal ground, to the sale proceeds of sundry articles accumulated in the office & of disinfecting powder to the public at its prime cost to use it freely when clearing cess-pits attached to their houses to avoid offensive smell arising therefrom. Regarding the heads (11 & 12) I have no remarks to offer. -

15. Statement No. Expenditure. Public Works: - Under new works Commission "a sum of Rs. 1500 was provided for

23 for expenditure upon works detailed under (a) of Statement II A but as the allotment set apart for the first was found barely sufficient for its requirements the Commissioners intended to have the allotment for the second whose construction was considered to be unnecessary, transferred to the former for its completion but they together with the most part of the latter (Petty works and reserve) were not carried out owing to the often changes in the office of the Vice-President during the year under report. -

16. Under 1(c) a sum of Rs. 12090 was provided for expenditure, of which only Rs. 730-8-4, were spent upon some of the works particularized under (b) of the Statement II A, leaving a large balance of Rs. 11359-7-8, this includes the sum to be spent on the erection of new Dispensary and the sum remained to be spent under other heads contributing the item are the savings. A detailed information as to the nature of works executed is appended against item of the Statement covered. -

23 17. The amount allotted for the work shown under 1(c) & 1(d) of the said Statement, was executed by Rs. 14-5-4 & Rs. 59-8 respectively; they are satisfactorily executed

and one of useful improvements (1) was the re-laying side drains of a Road leading to Kallakpett (2) was the improving of a well which supplies water to about $\frac{1}{3}$ of the population; the sides (both east & west) were plastered with rough stone to avoid mud falling into & thus filling it up. Two Chaulis or Shantapans for the reception of travellers were built of stone in Chennai on both sides of the steps of the said well & they are now used by the people freely. The work exhibited under Miscellaneous was not carried out as the Season did not permit to have the same to be done.

18. Repairs. - Under 2(a) Commencement, the expenditure of Rs. 406-5-10, or an excess of Rs. 6-5-10, was incurred against an estimate of Rs. 400, in repairing all the roads in the town. The amount expended under 2(b) was Rs. 137-11-11 against an allotment of Rs. 239, in repairing main wall of a female latrine situated near Goshwada with low dirt bricks & plastering the same thoroughly; & rebuilding all seats of stone with Chennai of a male latrine situated near Vennamang & in flooring the same with flags. All other small repairs required for this as well as the latrine situated near Pandey-stand were also carried out.

25

but no expenditure was incurred to repair the Dispensary for as nothing was considered urgent. The other items under this grant call for no remarks.

19. Grant II. (Education). The expenditure under this head was Rs. 1240-7-9 (which is within the Budget allotment) of this Rs. 1000-0-0 were spent in maintaining a Telugu school and Mohamedan schools the former consists of 4 Masters & 100 pupils & the latter 2 Masters & 100 pupils. Their progress is as satisfactory as in the previous years. The average daily attendance during the year under report was 89 in the former & 50 in the latter as against 91 & 61 respectively in the preceding year. The slight fall in these is due to the boys attending the relief works for their maintenance. For the same reason the saving under head (4) was effected. The Deputy Inspector of Schools of the Circle reports very favourably on these schools. He states that in the Telugu school, the reading meaning of words and phrases was "good" and that in Hindustani school, the reading was "good" meaning of words & phrases "fair" & passing "poor". The examination of the class was "fair" in Arithmetic & Geography & "very fair" in dictation.

20. Grant III. Sanitation and Medical Services.

increase under other items of the head is attributable partly to the low rate of & partly to the spreading of sand & bricks deep in almost all of the latrines for better sanitation; to the employment of two extra men to clean the seats of two masonry latrines with water every day; to the purchase of ^{for the purpose of} the fire in tank for the purpose of animals & to the purchase of other materials required to arrest the spread of cholera & small pox. The Corporation of the town was well attended to, a sufficient number of sweepers & toties were employed to keep the town & latrines clean under the orders of an Inspector & four Peons. The sweepings were daily removed by a Municipal Cart & by buffalo men. The side drains were also cleaned by the Sweepers at their leisure hours.

24. The Public & Private latrines were daily cleaned & their contents removed for burial to a long distance outside the town.

25. Grant II. - Lighting. - The cost under this head was below the estimate. The kerosene oil required to light 6 Lamp posts (newly added to 18 making a total of 24) was not purchased as they were received after

29 26. great delay in the year. 88
Refused to 1-2 under head (5) were spent out of an allotment of Rs. 40, in watering staircases & in fencing them with thorns if they are in a flourishing condition. No fresh staircases were planted owing to the failure of rain during the year under report. The amount allocated under head (5) is slightly increased by the omission (in the Supplemental budget) of famine bhatta paid to the Dispensary Peon. The work of numbering houses was not carried out, owing to not having a competent man to do the work, the sum spent under the head was to the purchase of paints &c. required for the purpose.

29 27. Grant V. - Head office (1). The Establishment was the same as in the last year, but there was ^{the} saving of Rs. 40 good under both the Establishment and Contingencies. The fee of Annual Auditor & Contribution towards the pay of a clerk employed in the President's office which was ^{the} in the office Contingent charges are now shown separately under heads concerned in the Statement II of the year.

28. Accounts. - The accounts of the Municipality were audited by Mr. M. Vacha, a ^{dep} ~~agent in charge of~~ ^{for} ~~Chopra~~ Dymal & Co., who

is unconnected with the Commission.

The omissions referred to in para 4 of his report will be set right.

29. In para 5, the auditor points out a difference of Rs 30 in the Cash balance of the year. I beg to represent that the sum was drawn from the treasury & left in the hands of the Manager to meet Contingent Charges as it seemed to have not been debited in the Cash book as has been drawn. I through misapprehension ordered the sum to be returned to the treasury crediting in the Cash book in order to reconcile the transactions with both the Municipal Cash book & the Treasury accounts as requested by you often.

I have the honor to be

Sir,

Your most obedient servant.

Grant II (Education) -				
1. Training Schools	1889 11/10 1192	1054 16 9	137 2 3	This sum is the saving under Establishment and Contingents affected, owing to the policy of the Head Master of the Telugu School having been paid Rs 20, instead of Rs 25, and stoppages for the pay of other subordinates for absence on leave &c and to the non-purchase of the books and furniture &c.
2. Principal Schools				
3. Salary Grants	97	200 2 10	38 8	For certain pupils who were studying in the High Schools, have left them on account of Examine. Hence the saving.
4. Result Grants				
5. Schools on the Combined System				
6. Unspecified	20	24		This sum was paid to Local Sanitary Committee for Educational Inspectors.
Grant III Sanitation and Medical Services	1889 10/10 1890	142 16 5	327 1 7	This saving was effected, owing to the engagement of 3 of salary of school class Sanitary Inspectors instead of 1, i.e. class and stoppages in the pay of other subordinates and non-purchase of furniture for the contemplated year. Disparaging, whereas the expenses, under other items considering the head is slightly increased, owing to the fact of purchasing the necessary medicines and to the increase of the number of indoor patients on account of prevalence of epidemic diseases.
2. Vaccinations	126 16 2	140	13 8 9	Due to the stoppages in the pay of Sanitary Inspectors on leave.
3. Registration of Births and Deaths	10			

Head.

Details for Estimates
Previous for current year
Year

Explanation of Variations

1. Conservancy.

£196 14 1 5951 0 5908 8 5

This is the saving effected by the stoppages in the pay of the establishment for absence on and non-purchase of required fadder etc for the principal cattle, as they were fed with prickly-pear in some months of the year, instead and lastly on clearance of the fresh water wells, as they had a small quantity of water in them. There is also increase in the allotment of other items of the fund which is attributable partly to the low estimate put partly to the spreading of sand in some of the latrines for better sanitation and lastly to the purchase of other necessities required to meet the wide spread of cholera and small pox.

Grant III -
1. Lighting.

917 6 5 405 0 966 4 3

Due to the non-purchase of Kerosene oil for nearly added 6 Lamp posts which were received after great delay in the year.

2. Markets.
3. School.
4. Washing Ponds.
5. Avenue.

386 12 4 40 0 437 2 2

Due to the non-purchase of Avenue carts, as extra bullocks were employed for watering fees during the year.

6. Numbering Houses.

50 0 0 17 8 10

As one competent man was then procured to number the houses this sum is left unexpended.

7. Travelling Allowance to Municipal Sanitary.

20 0 0 100 9 2 5 9 2

Due to the better paid to the Dispensary, having omitted in the Budget, as it was then unexpected.

Sir

2. I have checked the entries in the Cash Book which is neatly and carefully kept and have found the items supported by vouchers. The collections were properly remitted into the Treasury.

3. I have thoroughly examined all the collection and license books ~~re &c~~ and have found them irregularly brought up, but the totals of daily entries in them (with the exception of Magisterial Fine Book), have not been attested by either the initials of the Manager or of the Monthly Auditors, also, some of the Counterfoils of the licenses, have not been dated and initialed by the party who issues them, the attention of the Manager should be called for this irregularity.

4. The year under review, opened with a balance

												This

187

5. This statement shows a balance of Rs. 15,914-8-9, or Rs. 30-0-0 in excess to that of the actual Cash balance of Rupees 13,884-8-9. This sum of Rs. 30-0-0 was drawn by Cheque No. 1 for Contingent charges and was not debited in the Cash Book and ^{should have} been retained by the Manager (as suggested by my predecessor in his report para 5) but I find that according to the Vice President's order it was credited in the Cash Book on the 31st March and remitted to the Treasury, hence the difference.

6. The following is the explanatory memo showing the variations of income and expenditure during the year between the office Cash Book and the Treasury Accounts:-

	Income			Expenditure		
As per Cash Book	19,359	2	1	17,351	7	3
As per Treasury Accounts	19,363	14	9	17,381	7	5
Difference	4	12	8	30	0	2

7. The difference under receipts consists of two items viz: Rs. 4-12-8 and Rs. 0-0-2. The former was the sale proceeds of Municipal School Books lying in the form of cash and the latter was inadvertently overdrawn. Both these amounts were remitted to the Treasury without passing through the Cash Book. The difference under charges includes a sum of Rupees

No 30 and No 2 respectively being the amount drawn for Contingent Charges and the amount overdrawn through oversight, these were also not passed through the Cash Book. To avoid such differences it is most essential that the Manager should carefully see that each day's transaction agree with both the Cash Book and the Treasury accounts.

8. The closing balance as shown above is thus disposed of:-

In the Treasury.-	11, 4 4 4.	10	3
In Government papers.-	4, 4 0 10	13	11
or hands of the Purveyors.	1 5	0	0
or form of Books.	9	11	7
	15, 8 8 4	8	9

9. In conclusion I beg to offer my thanks to the several Municipal employees who gave me assistance in the audit and especially to C. Ramaswamy Naidoo who was very attentive and gave me satisfactory explanation on points I had to refer to him.

I beg to enclose the usual Certificate
I have the honor to be,

Sir,

Your Most Obedient Servant

[Signature]

Annual Auditor

Madras Municipal
Accounts

BELLARY COLLECTOR'S OFFICE.

No. 243.

Dated

Raiding Taluk Raiding.
15th July 1877.

From,

THE COLLECTOR & President Municipal Council
BELLARY

To,

The Chief Secretary to Government
Madras

Sir,

I have the honor to report on the working of the Municipality at Bellary during 1876-77 the estimates for which period received the sanction of Government in their order No 779 dated 3rd May 1876 and a Supplemental budget in their order No 195 dated 20th January 1877.

2. The actual receipts and charges amounted to Rupees 25033-4-6 & Rs 14811-1-11 against Rs 29262 & Rs 28511 estimated. The causes which led to the submission of a supplemental budget have been detailed in my letter of 9th January 1877 No 11 embodied in the latter order.

3. I am able to repeat the remarks I made in my last report on this Municipality, that the estimates were framed, so as to afford a sufficiently accurate fore cast of what might be expected to be carried out during the year.

4. The Vice President whose report I enclose explains all the variations from the estimate as to need little or no comment from me.

5. In para 4 of Proceedings of the Madras Government dated 28th August 1876, No 1537 information

ast Elementary Education, was called for. The Vice President in para 19 of his report remarks on the constitution of the 2 Schools in the Municipality, one Telugu and the other Mahamedan with a staff of 4 and 2 Masters respectively.

6. The average attendance is given as 89450 against 91451 of the previous year. The main reason for the decrease is due to the severe famine as the one we are now experiencing. It is to be hoped that these schools are appreciated. The results of the Examination conducted by the Deputy Inspector of Schools is very satisfactory. The Vice President does not afford the information required in the latter part of para 4 of the Government Order quoted above, regarding the total requirements of the town in respect of Elementary instructions and the extent to which the arrangements already made by the Commissioners are calculated to meet them. He will be called on now to supply this omission and the information when received will be duly submitted.

7. It is gratifying also to record the continued success of the Civil Dispensary as an Institution freely resorted to by all classes. But the no. treated during the year under report is only 6659 against 9930 of the previous year. The decrease is due to a large number of persons being treated at the Famine Hospital. This number the Vice President estimates at 500 so that this would not altogether account for the great disproportion of
upwards

73 upwards of 3000 between this year and the last. Considering the year under report to be quite an exceptional one as regards Epidemic disease the number relieved should be greater than in an ordinary year. I will call upon the Vice President for explanation on this point.

8. There has been a falling off in cases vaccinated, due as the Vice President remarks, to the absence of the Vaccinator for a month.

9. Much attention is paid by the members of this Municipality to the conservancy of this large town. The water supply has engaged their particular attention & all the wells have been cleared out to ensure a better supply.

10. The general health of the town has been bad, Cholera & small pox, among others, it is Epidemics. The absence of a suitable Dispensary building rendered it impossible

73 to treat the patients under any other better protection than leaf pavilions the erection of a suitable building will now be proceeded with, the sanctioned design having been received and a large sum being in hand.

11. The Auditor's report accompanies. The Vice President promises compliance with the suggestions therein laid down.

12. In the interests of the public service there have been frequent changes during the year in the office of Tahsildar, who has generally been Vice President of the Municipality also.

This has been unfortunate in some

ways for the Municipality.

13. The present Vice President is a non official member of the Commission elected by his brother Commissioners.

I have the honor to be,

Sir,

Your most Obedient Servant.

J. R. Mastin
Collector & President

Reporting on the
working of the
Municipality

Received
16 July 1877

The Chief Secy. to Govt

Dated 11 July 1877 No. 243.

BELLARY COLLECTOR'S OFFICE.

Final
DEPARTMENT.

Oct: 29/1877

Adony Mutl. Comm. Office
19 July 1877.

From

P. Maitham Chodas
Vice President of the
Adony Mutl. Comm.

To

J. H. Master Esq.,
President of the
Adony Mutl. Comm.

Sir

With reference to your docket
No. 182 of the 11th inst. I have the
honor to inform you that there are (2)
Two Municipal Schools, one teaching Telugu
& the other teaching Hindustani with a staff
of 6 teachers & 2 Peons. Their cost is entirely
defrayed from the Municipal Funds. The
average daily attendance in these schools
is 189 & the cost per pupil is Rs. 6-8-1. Besides
these there are 11 free schools in the town
and 5 only of these have been recommended
for possible grants by the Deputy Inspector
of Schools. The average daily attendance
in these being 183, the other 6 schools with
a number of 104 boys on the rolls remain
unaided. They are of a transient character
depending up on the mercy of their supporters.

and lasting only for some months in
the year. There are no schools existing in
the town aided on the system of salary
grants and on the ^{combined} system of salary and
result grants but the Commissioners
can afford as fund available & are
willing to introduce them (systems) into
the existing schools if the Educational
Authorities consider it feasible & beneficial
to their interests. —

2. With regard to paragraph (2)
I beg to represent that the decrease in the
number of the sick noticed therein is
attributable to a great many of the
poor people of the town & of the adjoining
villages who were obtaining treatment
in the Dispensary having been compelled
by distress to abandon their home and seek
relief at a distance from the town. Those
who were provided with work in & about
the town could not attend the Dispensary
for fear of being dismissed for absence
at the time of Muster which generally
takes place in the morning & which is
therefore collapsed with the business hours
of the Dispensary. I have the honor to be

Yours most obedient servant

Phanibant

Vice President
Chdoy Moul Comm.

The Dispensary as reported last year is still in the same old building which belongs to the Municipality nothing has been done up to date, as to the erection of the proposed new building.

The following shows the number treated
per dining the year.

European		Native	
In	Out	In	Out
Remained on 31 st March 1876.		3	59
Admitted during the year		79	65/5
Fatal treated	3	82	66/4
Discharged	3	62	60/2
Died		12	7/4
Remaining on 31 st March 1877		8	7/1

The Dispensary has six beds 4 for male and 2 for female patients.
823 Cases were Vaccinated during the year
797 proved successful.

The streets and Public roads were daily swept and kept clean by 20 Sweepers under the supervision of the Commissioner, sweeping the dust and Sweeping See from the Pains were daily removed by Municipal carts and Buffalo Men.

Owing to the failure of rain, furnished
cookies collected into the Town from all
Villages amounting to a daily number of
from 25 to 30 Thousand.

Bellaury.
Dates 19- } July 1877.
Dec

Cholera broke out in a severe form among the coolies and the town people during the month of December, although it is still continuing in and villages close to the town the severity of the form has greatly subsided.

Cholera and small pox were the two Epidemic diseases that created great havoc among the town people and famine coolies, (most of the cases have been treated in cholera and small pox sheds erected by the Relief authorities besides the sheds mentioned above, Relief authorities have established a Famine Hospital for the Relief of the general sick poor and old and infirm paupers from 400 to 500 people obtain relief at the Hospital in shape of ordinary medicines, dressings and food daily, this is the chief cause of the decrease in the number of attendance at the Municipal Dispensary.

Helicula, Ague, Rheumatism, Compunctive Inflammation, Typh, Diarrhoea, Dysentery, Ulcers and Itch were the prevailing diseases during the year.

The list of operations performed in the Dispensary during the year 1876-77 is hereunder appended.

Disease	No.	Nature of Operations	Result.
Tooth ache	60	Extracting teeth	Successful
Foreign body in nose	2	Removed	do
Fracture Humerus	1	Splint & Bandage	do
Palma & Radialis	6	do	do
Leg both bones	2	do	do
Dislocation Elbow	1	Reduced	do

Remained on 31 st March 1876	11323	7	3
Received from Municipal Fund	652	9	6
do. Local funds	635	3	
Total	12610	3	9
Expended	1642	16	
Balance on 31 st March 1877.	10968	5	4

The Dispensary building is in tolerable repair.

I certify that the order regarding the Custody of Poisonous drugs issued by Principal Inspector General Medical Department dated 23rd January 1863 are fully carried out.

Ballary Collector's Office
Dated { 31st July 1877

No 261

From

The Collector & President
Ballary.

To The Chief Secretary to Govt.
Madras.

With reference to para
687 of my report on the working
of the Adoni Municipality
during the year 1876/77 submitted
under date the 11th Inst. I have
the honor to forward the further
information furnished by the
Vice President, as regards the
requirements of the Town in
respect of Elementary Education
& the falling off. The
of sick treated at the Civil
Dispensary at that station.

2 It will be observed that 83
besides the Telugu & Hindustani
schools under the management
of the Commisshnars there
are 11 pial schools in the Town
of

1876-77

Civil Dispensary Station

Annual Medical Report

1876-77

Exchange Civil Dispensary

Despatched 31st Aug 1877

of which 5 only have been recommended for results grants by the Deputy Inspector of schools, the remaining 6 being considered of a trifling character. There are no schools aided on the system of salary grants & on the combined system of salary & results grants, but the Commissioners are prepared to introduce these into the existing schools if favorably reported upon by the Educational authorities.

3. The decrease in the number of sick persons treated at the Dispensary, is owing, it will be seen, to a good many of the poor people of the Town & of the adjoining villages having had recourse to the Relief operations set on foot by the Govt at a distance from the Town on account of the famine.

I have the honor to be

Yours most Obedt Servt

W. Master
Collector & President

PROCEEDINGS OF THE MADRAS GOVERNMENT.

89 Excluding the opening balance and the appropriation of Rs 4400 from the Capital Endowment of the Dispensary which was proposed but not carried out, the income for the year was Rs 15,706 of which taxes yielded Rs 11,820 against an estimate of Rs 12,329, the surplus being more than compensated by an increase under other items of revenue.

The amount allotted for expenditure was Rs 28511, but only 14811 were expended as the Dispensary building for which a sum of Rs 11,000 was assigned, could not be undertaken owing to the late date at which the standard plan was sanctioned. The Public Works carried out though

though few in number were
of a useful character.

As compared with
the previous year, there was
an increase of Rs 53 in the
Educational expenditure mostly
under Douglas Grants. The
Telugu and Hindustani schools
under the charge of the Com-
missioners to have progressed
satisfactorily. This is not
the case with elementary
education, the total number
of boys receiving instruction
being only 426 out of a
school going population
of 1740. The matter should
receive attention when the
present famine disappears.

Under Medical and
Sanitary services the charges
are less than the estimate,
the

* The Comr. since also take into consideration
as an extra outlay for the purpose of the town
sanitation. The present state of the town
is such that a large sum is required to be
expended for the purpose of the town
sanitation. The present state of the town
is such that a large sum is required to be

sanitation.

Sanitation was
the best of the
present state.

91

the bulk of the saving
being due to the substitution
of a 2nd class for 1st class
Hospital Assistant. Many
of the town and suburban
residents were compelled by
the famine to resort to
relief works organised
outside the town and therefore
resorted to the Famine Hospital.

This partly accounts
for the large decrease in the
attendance at the Dispensary.
There was also a falling off
in the number of vaccinations
owing to the absence of the
vaccinator for a month.

The Govt note with
satisfaction the increased
attention paid to the mainte-
nance and water supply of
the town. The outbreak of
Cholera and small Pox
