GOVERNMENT OF MADRAS.
FINANCIAL DEPARTMENT.

READ—the following papers :—

From H. R. GRIMES, Esq., Inspector-General of Jails, to the Chief Secretary to Government, dated Madras, 25th March 1887, No. 82.

The Public Works Department having consented to carry out certain repairs to jail buildings in the district jail at Palamcottah to the extent of Rs. 55, I have the honor to request you will be good enough to obtain the sanction of Government to the amount being placed at the disposal of the Public Works Department through the Examiner, Public Works Accounts.

Before according their sanction to this application, the Government desire to know what is the nature of the repairs necessary to the jail buildings, and why the agency of the Public Works Department is required in connection with work costing so small an amount as Rs. 55. The Inspector-General should have stated whether the money required could be spared from his budget allotment.

(Signed) H. E. STOKES,
Ag. Chief Secretary.

6th April 1887.

To the Inspector-General of Jails.

From H. R. GRIMES, Esq., Inspector-General of Jails, to the Chief Secretary to Government, dated Madras, 11th April 1887, No. 114.

I have the honor to state, in reply to reference on No. 1384 of 1887, Judicial, that the repairs necessary to the jail building of the district jail at Tinnevely, consist in making the under-trial wards, quarantine ward, and hospital secure from escape, by running iron rods along the apertures of the ridge ventilators.

2. The Superintendent reported to me in November 1886 that these buildings were insecure, and that an under-trial prisoner, an old offender (and who has since been transported for life), had climbed up to the roof of the ward he was in during the day-time, and informed a fellow prisoner that he could get through the opening of the ridge ventilator. The Superintendent had satisfied himself that an escape could be effected through these openings, and suggested a good stout iron rod being placed along the openings, which would prevent attempts to escape being made; he further suggested that as he had no prisoners able to do any work of this kind, it might be done by the Executive Engineer. I addressed the Superintendent of the Circle on the subject, who caused an estimate for the work to be made, which amounted to Rs. 55; this amount I sanctioned, and directed the Superintendent of the Jail to pay it to the Executive Engineer when the work was completed. I was afterwards informed that this could not be done. Whereupon I wrote the Accountant-General requesting that Rs. 55 be placed at the Executive Engineer's disposal; in reply to which I was informed by the Accountant-General that the sanction of Government in the Financial Department should be obtained for the transfer of funds to the Public Works Department for the work in question, as well as in other similar cases; hence my letter to Government, dated 25th March 1887, No. 82.

3. I regret that I did not state that the money could be spared from my budget allotment.

ORDER—dated 29th April 1887, No. 539, Financial.

The transfer of the amount, which has already been paid, is sanctioned.
