Fort St. George, Judicial Consultation, 17th November 1857.

No. 11. Read the following letter from J. ROHDE, Esq., Inspector of Prisons, Paulghaut; to E. MALTBY, Esq., Acting Chief Secretary to the Government of Fort St. George, dated 19th October 1857.

SIR,

In reference to Extract from the Minutes of Consultation, dated the 29th September 1857, No. 1260, declining to pass a prospective estimate for a work-shed at the Cuddapah Jail, as proposed in my letter of the 5th September 1857, for sanction, on the ground that my statements were too general to warrant to sanction the erection of the work-shed, as an emergent work, and calling on me to furnish in a tabular form, information relative to the size and description of the building, the number of Convicts to be accommodated, and the number of those at present employed without and within the Jail, the work on which they are to be engaged, and the number of the guards to be dispensed with, I have the honor to furnish a statement as directed, but I may remark that, where numbers are uncertain and variable, I do not think a tabular statement a very fair mode of conveying information.

2. The details of dimensions and description of building, I derive from the Engineer's estimate returned, the saving of 300 Rupees a year on extra guards, implies a saving of 25 Rupees monthly, or the pay of five peons, which ordinarily would be the guard over 20 Convicts. The half-yearly return shews that there are 371 prisoners, of whom 21 are employed at the forge, in weaving and basket-making, and 32 in paper making, 30 being employed otherwise about the Court and Jail, but it is only the 21 prisoners (there are often many more) employed in a number of rubbishing sheds outside the Jail, that I especially alluded to, the matter was stated in my original report. The building will also furnish accommodation for labor to such characters as it may not be safe to employ outside, in all there will be space for 40 to 50 prisoners, and the number of peons beyond the permanent establishment would not, under any circumstances, exceed one-half that over prisoners engaged outside. Strictly no extra peons are allowable for prisoners so employed and were it not for the bad characters specially detained, none would be needed.

(Signed) J. ROHDE,
Inspector of Prisons.

Estimate for a Shed for employment, within the walls of the Cuddapah Jail, of Prisoners now engaged as Artificers outside the walls.

Building a lean to against the rear wall of the hinder ward, the pillars and walls of brick in Lime mortar, the roof of Palmyra rafters, bamboo reapers and $\frac{1}{2}$ round tiles.

Length. Ft.	Breadth. Ft.	Height. Ft.	Masonry.	Roof.	Number to be accom- modated.	Advantage.	Remarks.
162	10	8	Burnt brick in lime mortar. Half round tiles over bambooreap- ers, palmyra rafters and 1st class jungle-wood bressummers.		40—50	Increased security and the removal to within the Jail of 20-30 prisoners now en- gaged as weavers, mat makers, &c., without the walls, besides giving work- shed for 20 others, and consequent saving in ex- tra guards at $1\frac{1}{4}$ Rupees to each prisoner so em- ployed.	No extra guard is allowed to prisoners working in- side the Jail, but where the number is large and there are many bad cha- racters among them, about 1 to 8 prisoners. Instead of 1 to 4 may, till proper buildings are provided, be needed.

Paulghaut,
Office of Inspector of Prisons,
19th October 1857.

(Signed) J. ROHDE,
Inspector of Prisons.

No. 12. ORDER THEREON, No. 1471; dated 11th November 1857.

The Government resolve to postpone the consideration of the subject of erecting a workshed at the Jail at Cuddapah, until the restriction imposed by the Government of India in regard to Public Works be withdrawn.

(Signed) T. PYCROFT,
Chief Secretary.
