Read the following papers.

No. 26. Extract from the Minutes of Consultation in the Revenue Department, dated 30th April 1858, No. 549.

Read the following Extract from the Proceedings of the Board of Revenue, dated 31st March 1858, No. 1144.

In Cons. 31st March 1858. Read letter from the Collector of Bellary, dated 21st October 1857, submitting a plan for the re-organization of the Village Taliary Force in that District.

From C. PELLY, Esq., Collector of Bellary ; to J. D. SIM, Esq., Acting Secretary to the Board of Revenue, Fort St. George, dated 24th October 1857, No. 128.

SIR,

1. I have the honor to acknowledge the receipt of the Proceedings of the Board of Revenue under date 12th August 1856, No. 2548, in which, with reference to my report* on the Village Police, I am instructed "to organize one Talook as a model, without however carrying the measure into effect until duly sanctioned," for the reformation of the Village Police. I am directed "to make careful enquiries into the real value of the Enams and Fees of the Talaries, &c., and to follow the principles laid down in paras. 6, 7, 9 and 11 of the Proceedings" under reply. These principles and one mentioned in para. 3 appear to be as follows:

* From Collector of Bellary, dated 26th May 1855.

1st. That one Talary, as a general rule, modified by circumstances, will suffice for a village with 800 inhabitants.

2nd. That 30 Rupees per annum partly in land, partly in money or fees, is a sufficient remuneration.

3rd. That measures be taken to prevent a continuance of the system of subdividing Enams among the heirs of deceased holders.

4th. That the surplus emoluments in some villages be made available to the deficiency of present emoluments in others, as the Board claim the right of Government to dispose of emoluments of this nature in such manner as the public service may require.

5th. To realize the fees now paid by the people and to carry them to the general fund for the payment of the Village Police.

6th. The gradual resumption of Gyrmissul Enams, and the making available to the public service all the emoluments, that have been set apart for the support of the Village Police

7th. The retention of the services of the Naud Talaries and Cavilgars only when it may be necessary to employ them as Talaries.

8th. The retention or dispensing with the services of the Cuttoobady and Cundachar Peons.

2. I have the honor now to submit in the first place, a scheme for organizing one Talook, viz., that of Bellary, on the plan proposed ; the accompanying statement contains the information required. It is made into two divisions, the first division shows all the villages, (114 in number) in which the present emoluments in land are sufficient at the rate of 30 Rupees for each Talary, for the future establishment as suggested by the Board, the second division exhibits the villages (51 in number) in which the present emoluments are insufficient for the support of the Talaries ; and in which it will be necessary to supply fresh funds either in land or cash.

No. 1.

3. There are at present in the Talook 506 Talaries, including Naud Talaries (who are in this scheme reckoned with the Talaries) who do duty ; though there are 1584 who are Talary Meerassidars, and take their turn of duty more or less with those actually in office, and share in the Enams, the land that has been held for many generations as Enam by this body of Talaries amounts to 24,289 acres, the present assessment on it (as per the Survey assessment

Col. 8.

* Original Survey Rupees.

Assessment.....	31,740	
Deduct estimated amount of reduction allowed on circar land assessment.	7,648	
Net proper assessme t	24,092	

† Col. 9.

reduced by the general remission given in 1824, on all Circar lands) is 24,092* Rupees, averaging about 1 Rupee per acre.†

4. It is very difficult, I may say impracticable, to obtain a correct estimate of the real value of these Enams to the holders of them. On entering into an investigation into this point, I took the opinions of the village authorities, but I could not rely on them. The village valuation of the real receipts by the owners, is, (except in a few trifling instances,) much below the nominal assessment of the land in Col. 9. That this is in a great measure true, I have no doubt, in most villages, as Enamdars seldom get the Circar assessment on their lands paid to them. On the
Col 10. whole, the village valuation amounts to only 10,151 Rupees or less than half the present survey reduced assessment of the land; but this I think is too low an estimate.

5. Finding it impracticable to obtain a really trustworthy valuation of the emoluments obtained from the land, I have adopted an estimate, which for the purpose in hand, will, I think give a generally fair valuation of the actual emoluments derived by the Enamdars from their Talary lands. It is *two-thirds* of the present assessment of the lands, and amounts on the whole
Col. 11. to 16,074 Rupees, which is 6,000 Rupees above the village valuation. The amount of Talary land actually under cultivation is only 17,839 Rupees; and this assessment will be reduced by the operation of the revision of the assessment (now in course,) to about Rupees 16,000, so the valuation I have given above of the real receipts by the Talaries is not perhaps too high on the whole. Upon this valuation of available emoluments, I have made my calculations for the future proposed establishment.

Cols. 14 to 18. 6. The establishment for the future is shown for each village in the statement. There are 168 villages in the Talook with only 15 hamlets. The population is 98,804 persons,
Cols. 2 to 5. and the revenue 1,92,473 Rupees. For this (carrying out the principle of giving 1 Talary to a village of 800 inhabitants as a general rule modified when circumstances would seem to require it) I have allowed 260 Talaries. The cost at 30 Rupees per annum would be 7800 Rupees. To meet this charge there is a total amount of land, the estimated value of which (on the calculation of $\frac{2}{3}$rds of the present assessment before alluded to) is 16,074 Rupees. There is thus a surplus of 8,274 Rupees. But there is not a surplus in every village. In 114 villages there is a surplus of 9,553 Rupees; but in 51 villages there is a deficiency of 1286 Rupees; the land being only 814 Rupees, whereas the amount required is 2100 Rupees. It has been suggested that the Talary emoluments in future should be made up by giving two-thirds in land and one-third in money. If this plan is adopted in the Bellary Talook, the result shews that 558 Rupees worth of land, and 728 Rupees in cash, would be required to complete the sum requisite to pay the Talary at the rate of 30 Rupees per annum.

7. In the first division of the statement which exhibits the villages in which there is an abundance of Enam lands, to meet the proposed charges, it will be seen that the number of Talaries required is 190; and the cost is, at 30 Rupees each, Rupees 5700, and that as the valuation of the emoluments (Col. 11) now available amounts to Rupees 15,253; there is consequently a surplus of Rupees 9,553. In the second division where the emoluments derived from the land are calculated to be less than are required, the number of Talaries is 70; and the cost would be at the same rate, viz., 30 Rupees each, Rupees 2,100 while the valuation of the present emoluments (Col. 11) is only 814 Rupees, leaving the deficiency before noticed of 1,286 Rupees.

8. But there is an important item of emoluments, the Meerah and Vurtnah fees yet to be
Col. 12. noticed. These on a calculation amount to about 4,179 Rupees. The Board have in view the realization of these fees from the ryots and carrying them to the general fund for the payment of the Village Police. But I cannot recommend that the collection of these fees by the Government should be made in the manner they are now paid by the ryots, direct to the Talaries. These fees are paid in kind for the most part by the people to the Talary. The people will not willingly pay these fees to the Government, as they now pay them to the Talary, and to collect them in kind would be vexatious and lead to much annoyance, if made by the Government servants.

9. In this talook the supposed value of the fees is sufficient to pay almost half the cost of the village Talary establishment now submitted on the scale proposed by the Board. The value of the fees amounts, it is supposed, to about 4,179 Rupees; and though they may not be paid

with great regularity, varying according to the out-turn of the harvest, and being different in almost every village, yet the sum set down is probably pretty correct. These fees having been exacted (where they exist) from time immemorial, the Government have a right to take them into consideration in fixing the emoluments of the village servants.

10. But in order to collect the fees on the part of Government for general purposes, it would be necessary and would, I think, be in itself a good measure to compound them, and to collect them in a different shape, fixed on a scale to be universally applicable throughout the district. The ryots constantly complain of the payment of these fees, they press heavily on the ryots in some places, and are generally a source of petty oppression and interference with the ryots. In lieu therefore of continuing the present system of collecting ill-defined fees for themselves by the village officers, I would recommend that all fees of every kind, and not only the Talary fees, be collected by direct money assessment on the ryots, and the amount carried to credit of Government, for meeting the cost of the general Village Police and revenue duties.

No. 3. 11. I beg to submit a memo. showing the amount that would be realized by a general uniform rate for the whole Talook, as compared with the assumed valuation of the fees now levied, not only by Talaries, but by all village officers. It will be observed that the valuation of the fees of all kinds, paid to 9 classes of village servants, who perform Circar duties, amounts to 14,397 Rupees. By levying a general rate of one Anna in the Rupee upon all Circar and Enam land under cultivation, the sum to be realized would be 20,392 Rupees or 5,995 Rupees in excess of the estimated value of the fees now paid to village servants. This does not include the fees paid to certain members of the village community who can hardly be called Government servants, such as the barber, carpenter, smith, &c., with whom and the ryots, as respects their private arrangements, the Government need not interfere. The 9 classes of servants above alluded to, strictly speaking, perform public duties, and with their fees alone it seems necessary to interfere. Though the amount by the one Anna cess in this talook will realize more than the
See enclosure No, 4. estimated valuation of the fees, yet for the whole district the one Anna cess will exactly correspond with the whole amount of fees.

12. From the fees thus realized can be made up the salaries of the Talaries in those 51 villages where it has been shown that the emoluments are too small.

13. The entire abolition of the present system of fees will no doubt cause some dissatisfaction, but as it will be general, and as the commutation system will be accepted rather as a boon by the ryots, as it will free them from numerous petty exactions and interferences. On the whole, I think it will give satisfaction, and undoubtedly, unless the Government relinquish entirely all claims on the fees, it seems the only satisfactory method of determining the Government rights and realizing their demand.

14. Modifying the present system of fees, and adopting the suggestion of the Board of making them applicable for the general services of the village, I have excluded the sum now collected by the Talaries from the estimate of their future emoluments.

15. There will be seen that after provision is made for the limited number of 260 Talaries for village duties of this talook, there remain 246 Talaries who now do duty, and there is a large excess of available funds amounting on the calculation before made, (and exclusive of fees) to a sum of 8,274 Rupees. It may be questioned therefore whether the proposed number and pay of the Talaries is sufficient, when it is taken into consideration that so many more have been employed from time immemorial, and their emoluments in the Bellary talook are so far beyond the amount now proposed to be given to the body on the Board's scale of 30 Rupees per year.

16. My opinion however is that the salary of $2\frac{1}{2}$ Rupees per month on the land valuation will not be a sufficient remuneration for the Talary; and I should prefer to make it 3 Rupees a month as recommended before by myself, and as laid down by Colonel Munro, especially as the sum is not payable in cash, but in land. I do not care about increasing the proposed permanent number of Talaries for the immediate village duties, but I would turn the surplus to good account by employing them to watch the highways. Indeed this is a very necessary work, and in a district where the villages are so distant from one another, it is more necessary than it would perhaps be in a thickly populated district.

17. I purpose therefore to establish 20 ghâts or stations as per the accompanying list, on
See enclosure No. 5. the principal roads in the talook. Each station will consist of 5 Talaries,

whose duty it will be to patrol in parts of the road where passengers are most liable to be molested by highway men, and foot-pads and at night to congregate at a neighbouring village. For this duty, I propose allowing about 300 of the Talaries, including 42 Cavalies. Their salaries are calculated at the same rate as the other Talaries. These Talaries now perform duty with the proposed number of village Talaries in the village. But I propose that they should be made to watch the roads wherever their services within the talook may be required. But this service will not be required of them for the whole year round, but only for a period of 4 months, viz., 100 men at a time, and when not on this duty, they will have to render assistance in their respective villages as may be required. There are 67 Cavilgars in the talook, whose peculiar duty it is to perform this kind of work, but their Enams are small. I have taken 42 of this class to complete the number of 300 for ghaut duties.

18. I look upon this establishment of 20 road stations as very important. If well superintended, it will be very efficient in checking and putting down highway robbery and gang robbery also.

19. I do not propose the resumption of the existing hereditary Enams. They have been held for a very long period by the owners, and very great discontent would be the consequence of resuming the Talary Enams, and it would deprive many men, who are chiefly of the Beder or Boya caste, (a class much given to robbery, especially when in need,) of their present means of livelihood. But I do not think they have a right to claim to be exempted from the services I would now require from them. But still I anticipate not a little opposition from them in requiring them to perform any duties out of their villages, not hitherto customary. I do not however think that the Government are called upon to yield to them; and I would recommend that they should have the option of accepting this service now to be imposed, in consideration of the Enams they enjoy, or of relinquishing such part of their Meerassy as is in excess of a fair remuneration for the ordinary village Talary duty.

20. The Talary Enams in the Bellary Talook are undoubtedly very large, greater than in any other talook. They are considerable in a few other of the Black Land talooks; but in the rest of the district, they are not large. In a few villages of the Bellary talook, the Talary Enams are exorbitantly large and far beyond the requirements of the village. But these Enams have been held for many generations perhaps, and have not been interfered with by the British Government for a period of upwards of half a century. Should it therefore ever be in contemplation to resume these Talary Enams, the measure should be deferred until a general investigation into the titles of all Enams of the district is determined on, and in the mean time at least the most should be made of the existing Meerassy emoluments by exacting service from the holders of them. On this principle therefore, I have made my propositions.

21. The following Memo. will show how the existing emoluments will be disposed of in payment of the service to be performed. In the former part of this report I have assumed the remuneration suggested by the Board, viz., 30 Rupees per annum as the payment of the Talary, in order to show what the result would then be. But as stated above, I think 30 Rupees insufficient, and would recommend 36 Rupees, and on this scale is based the following scheme for the Bellary talook.

The emoluments available in the talook are as follows:—

	No. of persons doing duty.	Sharers.	Total.	Rupees.
Value of the Talary Enam land at 2-3ds the Assessment.	506	1,078	1,584	16,074
Value of a share in two shrotriem villages...	.....	.....	.....	225
			Total.....	16,299
Fees...				4,179
				20,478
Value of Enam of Cavalies, No. 67...				819
do. Fees.				394
Total available Funds.....				21,691

Proposed future Establishment.

	No. of persons.	Amount Rupees.
No. of Talaries for village duty with pay at 36 Rs. per year...	260	9,360
No. for ghât, &c., duties...	258	9,288
Do. of Cavilgars...	42	1,512
Total sum required...	560	20,160
Of which available in land...		16,869
Do. in cash payment from fees...		3,291
Surplus...		1,531

22. I mentioned in the former part of this Report that there were 114 villages in which the present Enam land was sufficient for the proposed establishment, and 51 villages in which the land was not sufficient for the proposed remuneration at 30 Rupees per year. In fixing the pay at 36 Rupees, there will be a few more villages thrown out of the first into the second division, and it will be seen (statement No. 2) that now there are 93 villages in which the land is sufficient for the maintenance of the 161 Talaries required for the village duties of those villages, and that there is a surplus amounting to 8,514 Rupees in all in those villages. In 72 villages the land is insufficient to the amount of 1,807 Rupees. To make up the deficiency, a sum of 1,807 Rupees should on my proposition be taken from the Meerah Fund.

23. In arranging for the extra duties of ghât stations, I have gone on the principle, of requiring that the villages having an excess of Enam should supply one or more Talary for that duty in proportion to the amount of the excess of Enam enjoyed by the body of Talaries. In some villages the amount of excess is not quite sufficient to pay for the services of the Ghât Talary, and as the Enam of one village cannot be taken and given to the Talary to make up this deficiency in another, it will have to be made up from the general Meerah fund, and the extra small sum required for this purpose for the payment of the Iyen Talaries is Rupees 762, and for the present Cavilgars Rupees 722, in all Rupees 1,484.

See Col. 25 of statement No. 2.

24. And it will be observed in the statement that in some villages there is only a small surplus over after payment of the village Talary, and not at all sufficient to meet the payment of an extra Ghât Talary, such village will not be required to supply a Ghât Talary, and the excess of Enam amounting in the aggregate to Rupees 249 may be perhaps resumed or allowed to remain in the enjoyment of the present holder subject to resumption on lapse of heirs.

Note.— Total No. of present Talary and Cavalees...	1651
And 43 Talaries are to be newly entertained in proportion to the excess of enam in a few villages when the present number is found insufficient.	43
Total...	1694

25. The proposed plan provides for the services of 560 Talaries, at present there are 1,651 Talaries and Cavalees, of which 573 are supposed to do duty in turn, so that the Government will now have to dispense entirely with the services of 1,134 Talaries, who at present more or less perform service in turn and share in the Enams. But it will be difficult to put a stop to the present practice of dividing the Enams among the sharers. But it must be done by peremptory orders. The Talary actually in office must have the full enjoyment of the Enam. Shareholders may be permitted to arrange between themselves for taking a course of duty in turn (subject however to the permission of the Collector, which will be necessary to ensure the services of proper men); but the party in office must receive the full remuneration now to be granted while he actually does duty.

26. It should be understood however that, except in peculiar cases, none but a Meerassidar should be employed in the office of Talary as provided for in the Regulations. (See Sections 17 and 18, Regulation XI of 1816.)

27. The Naud Talaries are included in this report with the Talaries. Regarding the disposal of the Cavilgars, I have also stated the plan I would propose. There are at present 67 men, their Enam is valued at Rupees 819, and fees at 394 Rupees, in all, 1213 Rupees. I have proposed to retain only 42, and to require their services with the Talaries on the Ghat stations. There are no Cuttoobady peons in the Bellary talook, and as respects the Cundachar peons, this class of servants is found only in 10 villages. The Cundachar remission allowed to these men (226 persons) on their puttah lands as a remuneration, was Rupees 3,363; but the amount of the general

	Rupees.
Amount of Survey Assessment	6824
Cundachar remission	3363
Net payment	3461
Survey Assessment	6824
General remission	1712
Net payment	5112
New reduced assessment	3550

remission in all lands would give them Rupees 1,712, so that their real emoluments on the whole have been of not more value than 1,651 Rupees and the late new reduction of the assessment in the lands of these villages, would reduce the assessment on the lands of these Cundachar peons to a sum that leaves but a trifling sum, only 89 Rupees over, as a Cundachar remuneration. Some of these Cundachar peons have already relinquished their claim to remission, and been exempted from service in accordance with the orders of the Board; and the rest may be allowed to do the same.

28. By changing the present system and interfering with existing interests, opposition must of course be expected, and some difficulties will be met with, I doubt not, when carrying out the above plan of remodelling the Village Talary system of the Bellary talook, which I have now the honor to submit for the Board's consideration; but I have not taken any measures to carry it into operation until it is fully approved.

29. With the Ghat Talary establishment now proposed, there will not be any need for tannah stations of regular peons located in the talook, except perhaps at the large village of Seroogooppah, situated on the frontier, on the river Toombadra, where, under the Peishcar, a body of peons should be located. But there should be a small body of mounted Police 12 in number to patrol the talook, but this belongs more immediately to the talook General Police Force, and will not be included in the present calculation.

30. There should be a separate Police Officer whose duty would be to be continually on circuit, inspecting the Ghat stations and making enquiries every where; and he should have a small establishment of a Duffadar and six peons attached to him.

31. An extra Police during six months in the year when the Toombadra is fordable, has generally been employed to watch the frontier, but this is not now so necessary, but is some times required and may be employed when needed. The number in Bellary talook as sanctioned by Government, on the 12th August 1845, is 27 peons with batta, amounting to Rupees 309-6, for the 6 months.

32. The plan of organization therefore for the Bellary talook, is as follows:—

	No.	Rate of pay per mensem Rupees	Amount per annum
Village Talaries	260	3	9,360
Ghat Talaries to be employed on Ghats for 4 months, and for the remaining 8 months to do duty in village	300	3	10,800
Superintendant	1	35	420
Establishment.			
1 Duffadar		8	96
6 Peons		6	432
Saderward		2	24
			21,132
Batta to Superintendant and to Duffadar and Peons at 3 Rupees for every 10 Rupees of their salaries per month, for 9 months when actually marching	15		135

For payment of which, as I have shown above, there are funds amounting on a valuation to 21,691 Rupees. I am sanguine that this village Police force under proper control and subject to some severe rules for negligence, would prove of great advantage to the talook.

33. At present there is a sum of 993 Rupees paid as Jodee or quit rent by some of the Talary Meerassidars, but in the plan now proposed this will necessarily be relinquished.

34. I have, as the Board will observe, endeavoured to make the most of the existing Talary emoluments appertaining to this Talook. I fear that the emoluments in other talooks are not sufficient to make such a complete organization as that now proposed for Bellary talook. But No. 6. I beg to submit an estimate, showing to what extent on the same principle the funds of the other talooks could be advantageously availed of, and what would be necessary to meet the deficiency.

Statement of the number of Talaries, and their present Emoluments, and the future proposed Establishment framed on the principles laid down by the Board of Revenue in their Proceedings of 12th August 1856, for each Village in the Talook of Bellary, shewing the Villages in which the present Emoluments are sufficient, and those in which the Emoluments are inadequate, in the Bellary District.

Talooks where Enams are not sufficient. Talooks where present Enams are in excess.

Bellary, Collector's Office, 24th October 1857.

E. E. C. PELLY, *Collector.*

NOTE.—(A.) The number of Ghat stations are calculated with reference merely to the size of the Talook, as this statement does not do more than exhibit the probable result of carrying out a scheme proposed for the Talook of Bellary.

B) In Bellary Talook where the land emoluments are sufficient to employ the extra Talaries in turn at 4 months at a time, provision is made for the exchange, but in many other Talooks as it will be necessary to pay these Ghat Talaries by cash payments, this statement estimates for their services for the whole year through at the Ghat stations, when the existing emoluments allow of it in a Talook, a shorter period of Ghat duty is assigned.

(C and D.) The Meerah will be carried to the General Fund as proposed in Bellary, and the Jody will have to be remitted.

Mr. Pelly was directed to arrange and report measures for the reformation of the Taliary portion of the Village Police. With this view the present emoluments, both in land and fees, were to form a general fund for the payment of this

Pro. 12th August 1856, No. 2548. class of persons, each Taliary was to receive Rupees 30 per annum, part or Rupees 18 in land and part or Rupees 12 in money; and Taliaries were to be nominated in the proportion of about 1 to 800 inhabitants. The services of the individuals designated Naud Taliaries and Cavilgars, were to be retained only when it might be necessary to employ these persons as Taliaries. The official emoluments allotted for the support of Taliaries were to be enjoyed by those only who may be actually appointed to the office, and the practice, by which relatives were permitted sometimes to participate in the emoluments of the office, as Gyrmissaldars, was to be entirely, though gradually, discontinued.

2. It was the wish of the Board that the Collector should consider whether a payment altoPara. 6. gether in cash would not be preferable to one partly in cash and partly in land

3. In his present letter, Mr. Pelly shews how the proposed reformation may be carried out, and submits statements exhibiting the details for one Talook, viz. Bellary, prepared as a model for the more general extension of the scheme. The Naud Taliaries are merged in the plan as directed by the Board.

4. As regards the Talook of Bellary. The total number of Taliaries in this Talook is 1584. All these persons participate in the emoluments of office and take their turn of duty more or less, but the actual number who serve is 506 or rather less than 3 per village on an average, and in the proportion of one Taliary to 195 inhabitants. Mr. Pelly proposes to reduce the number of permanently appointed Taliaries to 260 which is in the proportion of one Taliary to 380 persons, but this is an average and not a standard generally adopted as shewn in the margin. A standard for general adoption was no doubt impracticable, the number to be permanently retained seems to be regulated so far as can be judged from the statement, by the present serving number and the emoluments attached to the office in these cases. Thus in Caralagoondy, mentioned in the margin above, which has a population of 795 persons only, there are no less than 30 Meerassy Taliaries of whom 6 persons are registered and actually serving. The official emoluments in this village in land and fees are estimated at Rupees 178, of which Rupees 108 only will be required for the 3 Taliaries proposed to be permanently appointed.

	178

Statement No. I.
This Statement does not include the Cuttoobadies, &c.

	Rs.
Land	8,274
Fees	4,179
	12,453

5. The present entire emoluments attached to the office of Taliary in the Bellary talook consist of land Rupees 16,074, and fees Rupees 4,179, total Rupees 20,253. The emoluments in land and cash assigned to the 260 Taliaries to be permanently retained would amount, at the increased rate of Rupees 36 per annum proposed by Mr. Pelly, to Rupees 9,360, thus leaving a surplus of Rupees 10,893 inclusive of fees to be used in meeting the expenditure for the general arrangement.

6. The particulars of the general arrangement are shewn in Statement No. 6, but the calculation is based on a payment of Rupees 36 instead of Rupees 30 per annum, and provision is made for a more efficient state of the village Police by the appointment of the Taliaries as station guards at the outskirts of villages. Mr. Pelly is of opinion that Rupees 30 per annum is an inadequate payment and would prefer giving each man 36 Rupees per annum which he observes is the rate laid down by Sir T. Munro; this increase to their proposed scale the Board would not object to adopt. From para. 15 of his letter, it seems that, even with station guards, the number of Taliaries he has proposed to be employed in future is insufficient, considering the actual number who are called out at present to do duty. Mr. Pelly however is prepared (para. 16) to give up the point as to the number to be employed on village duties, as distinguished from station guards, if his proposition as regards the latter can be secured.

7. The station guards it is proposed to pay at the same rate as the village Taliaries, viz., Rupees 36 per annum, and it appears from para. 17 that they will be required to patrol, even beyond the limits of their own villages. Mr. Pelly attaches very great importance to this part of the proposed arrangement, though he expects considerable opposition to it, when service is found to be required beyond the village.

8. Following Mr. Pelly's proposition of increased pay and station guards, the number of Taliaries required for the Bellary talook would be 560 with an annual charge of Rupees 20,160. To meet this there are assets in the talook in land and fees amounting to Rupees 21,297, thus leaving a surplus of Rupees 1,137 towards the required expenditure for the whole district, instead of Rupees 12,453 as before shewn under a less efficient arrangement. As in para. 15 so in para. 25 Mr. Pelly hints at the probability of larger number of Taliaries than 560 being found necessary, if the village Police is to be really placed on an efficient footing; apart however from this probability, Mr. Pelly's plan involves a charge for a small patrolling party to be continually on circuit in the Talook which would absorb the greater portion, if not the whole, of the above surplus of Rupees 1,137, leaving in fact no fund to meet the deficiency in the other talooks of the district, where the existing emoluments are considerably less.

Statement No. 2.

	No.
Village Taliaries	260
Station and Ghat do	258
Do. Cavilgars	42
	560

Note.—The assets shewn in No. 2 differ slightly from the amount entered in No 1, as the former includes the emoluments of ceriain Cavilgars.
Paras. 30 to 32.

	Men.	Rs.
Village service	2,961	1,06,596
Out Stations	2,565	92,340
	5,526	1,98,936

Assets.	Rs.	
Land at ½ the survey Assessment reduced	88,416	
Fees	34,769	
		1,23,185
Deficit	75,751	

9. The arrangement for the whole district, consisting of 2,425 villages, exclusive of hamlets, is given in detail in Statement No. 6. The number of Taliaries thus required, including both village and out station service, would be 5,526 involving, at Rupees 36 per man, a yearly charge of Rupees 1,98,936. The assets for meeting this charge amount to Rupees 1,23,185 only, thus leaving a deficiency of Rupees 75,751 to be made up in some way.

10. Mr. Pelly has experienced much difficulty in discovering the real value of the Enam lands to their owners. The villagers estimate it at less than half the survey assessment. In Statement No. 1 for the Bellary talook it is estimated at ⅔ of the survey assessment reduced as it appears, to the standard at which the assessment of the district generally will remain when the revision now in progress shall have been completed. In the general arrangement as exhibited in Statement No. 6, the value of the Enams is assumed at only ½ the survey assessment after this revision.

Paras. 4 and 5
Statement No. 1, Col 11
Note.—In Col. 11 of No. 1 the value of the Enam is stated to be Rupees 16,299 for the Bellary Talook at ⅔ of the reduced assessment. In Col. 6 of No 6 the same amount is entered for the Bellary Talook, though the heading of this Col. is designed to shew the half value only. This discrepancy requires explanation

11. Supposing the whole of the Taliary Enams to be resumed and fully cultivated, a gain of Rupees 3,417 would accrue to the State. But these lands are not now fully cultivated and it is not to be expected that, when the direct interest felt in them by their present owners has been withdrawn, a more favorable result in this respect will take place. The State will not thus be a gainer by the resumption. It is rather probable that they will not obtain sufficient funds by that measure to meet the deficiency of Rupees 75,751 already shewn. Apart from this consideration, it is no part of Mr. Pelly's plan that the Enam lands should be resumed. Such a measure would excite, it is stated, very great discontent and be otherwise inexpedient.

Deduct		
Jodee paid to the Cirkar Statement No. 6, Column 29	9,248	
Gain	3,417	

Para. 19.

12. Mr. Pelly is decidedly of opinion that the village fees as at present found should be resumed and a cess of one anna per Rupee of the assessment both of Government and Enam land, should be substituted for it, to be collected by Government and to form a fund towards defraying not only the charge for Taliaries but also the expenditure incurred on account of official payments to the other public servants of the village. The fund thus to accrue cannot be separately shewn for the Taliaries as it is proposed that the one anna cess should cover the fees of the village officers generally. Statement No. 4 is intended to shew this part of the proposition under consideration. It is there found that the present fees of the village servants, as enumerated in the margin, entitled to official emoluments amount to Rupees 2,15,792, and that the proposed one anna cess would yield 2,15,803, of which Rupees 71,493 would be collected from holders of enam lands. The new fund at the rate proposed would not thus yield a larger income than what is now, though only nominally, enjoyed, and a Jodee of Rupees 13,578 is payable on the present fees which the Government would be required to surrender under the new arrangement. The Assessment of the enam lands held by the several classes of servants above mentioned, is as much as Rupees 8,60,860 on which a Jodee of Rupees 98,244 is payable to Government, but the Taliary alone is at present under consideration.

Statement No. 4, Col. 21.
Do. Col 17 at foot.
Do. Col 20.

13. Mr. Pelly's proposition embraces two important reforms, viz., firstly, the thorough reformation of the Village Police, and, secondly, the collection and payment of village fees under systematic arrangements. The Board are fully sensible of the value and importance of an improved Village Police, and desire to see its officers encouraged in their legitimate functions unchecked by the interference of Huzzoor and Talook Peons; but while admitting that Mr. Pelly's provision for station guards and patrols, by diminishing the number of Talook Peons so employed, tends to further this end, they are unable to recommend the scheme in its present form for the approval of Government, because Mr. Pelly has not shewn how far his proposed extension of the Village force would dispense with the Talook peons. The Board understand the reconstruction of district Police to be under consideration, and are sensible that the plan now before them might clash with its proposed details; their object therefore in laying before the Government Mr. Pelly's letter with their own comments upon his plan is simply to afford information which may prove useful at the present time, the Village Police being calculated under a proper system to take an important place in a scheme for the reconstruction of the Police arrangement of the country.

14. Under this view, the Board abstain from discussing the means by which the proposed outlay involved in Mr. Pelly's scheme could be provided for.

15. The total number of Candachar Peons in the whole district is not mentioned by Mr. Pelly, but it appears from para. 21 of his letter that there will not be any difficulty in bringing the lands held by this class of Peons to full assessment, service being no longer required of them. Some, Mr. Pelly says, have already relinquished their claims to remission with exemption from service, and the rest it is added may be allowed to do the same.

16. In submitting Mr. Pelly's proposition for the orders of Government, the Board desire to record their appreciation of the great importance of the subject, and to add that they are prepared on learning the views of Government with reference to the scope which may be given to the Village Police without interfering with other projected changes, to state more precisely how far Mr. Pelly's proposals seem to them to merit the sanction of the Government.

(A true Extract.)

(Signed) G. S. FORBES,
Secretary.

Revenue Department.

Extract from the Proceedings of the Board of Revenue dated 12th August 1856.

Read again letter from the Collector of Bellary, dated 26th May 1855, relative to the village
In Cons. 4th June 1855. Police of his district.

1. The Collector has prefixed to the above report a very useful abstract of the correspondence which has already passed on the subject of the village Police of the Bellary district. It is unnecessary for the Board to review this part of Mr. Pelly's letter and they will therefore pass at once to the question of reforming the Police establishment as now existing.

2. The number of villages in the district is stated to be 2758 exclusive of 1695 dependent hamlets. At present 2216 villages are provided with 4584 Taliaries "performing duty."

3. The Collector considers that of the total number of villages 560 are too small to require separate Taliaries and proposes to entertain 3219 officers of this class for the remaining 2198 villages. The number of Taliaries required for a village must depend not only on its population but on its size, the number of hamlets dependent on it, and other local considerations of which the Collector must necessarily be the best judge. On this point therefore the Board will only remark that generally, one Taliary for every village with 800 inhabitants would appear to be sufficient. In such villages as contain 8 or 10,000 inhabitants it seems preferable to have a certain number of Taliaries and to establish a Tannah of regular peons in aid of the Taliary establishment, than to increase the latter force to the extent that the population might otherwise seem to require.

4. The Survey Assessment value of the existing Enams and the Marah amounts to Rupees 2,08,612 or Rupees 1,64,389 for the former and Rupees 44,223 for the latter. Of the Enams however a large portion (Rupees 37,255) is stated to have been long left uncultivated and on a portion a jody of Rupees 8754 is collected. Moreover the Survey Assessment is independent of the established reduction of 25 per cent since granted on all Circar lands. These reductions bring down the assessed value of the Enams to Rupees 87,819 while the actual receipts of the Taliaries from these lands is estimated at only Rupees 52,858, their Marah in like manner being believed to yield only Rupees 32,639. Thus the actual emoluments of the present Taliaries are supposed to be Rupees 76,743.

5. Mr. Pelly proposes to make the Taliaries' emoluments equivalent to 36 Rupees per annum, and estimates the extra expense to Government at Rupees 62,758.

6. The Board observe however that the payment fixed by Government in South Arcot is only Rupees 30 per annum, of which 12 Rupees is given in money and 18 Rupees in good arable land and they are inclined to consider this a sufficient remuneration for the same class in Bellary. The Board desire to have the Collector's opinion on the question of whether payment wholly in cash, or partly in cash, and partly by rent-free land, would be the more desirable system in Bellary, and in the latter case, what means could in Mr. Pelly's opinion be adopted to prevent a continuance of the system which has hitherto been so common of sub-dividing some Enams among heirs of deceased holders, until but a small fraction is left for the party actually performing duty. At the rate sanctioned for South Arcot the entire emoluments of 3219 Taliaries would be Rupees 96,570, of which sum Rupees 38,628 would be in money and Rupees 57,942 in land. The extra expense would thus be about Rupees 20,000, supposing the estimate of the Taliaries' present emoluments to be correct, which however is very doubtful. The Collector it is observed states in para. 51 that "the surplus in some villages cannot be made available for the deficiencies in other places," but he assigns no reason for this opinion and the Board are not prepared to abandon the right of Government to dispose emoluments of this nature in such manner as the public service may require. A fair degree of consideration may well be shewn in special cases where a sudden change would be productive of hardship, but it is undoubtedly part of the Government plan to make the surplus emoluments of one village meet the deficiencies of another, and their right to do so seems unquestionable.

7. It is also part of the Government scheme, wherever practicable to realise the fees now paid by the people and carry them to the general fund for the payment of the village Police.

8. Mr. Pelly will specially notice these two points, in his next report.

9. There is also another subject on which the Board request full information, viz., the enjoyment of the Enams, &c., by persons who perform no service. In statement No. 3 enclosed in

Mr. Mellor's report, 27th June 1844, the Board find it stated that the Taliary Enams are shared by 10,981 persons, of whom only 4,740 perform the service for which the Enams were granted. It is unnecessary to point out the evils of such a system or the necessity of applying an effectual remedy to it. The Board are not unaware of the difficulties that may present themselves to an immediate resumption of Gyrmissul Enams, but while they would request the opinion of the Collector upon the best means of making available to the public service all the emoluments which have been set apart for its support, they are of opinion that now that the village Police is to be put in a state of efficiency, advantage should be taken of all future lapses among Gyrmissuldars to appropriate the Enams they held to the purpose for which they were granted.

10. The Board concur with the Collector that the Potel should have considerable control over the Taliary, but they cannot go so far as to vest the Potels with such powers of punishment as Mr. Pelly suggests. The Potel can always complain to the Collector if the Taliary neglects his duty and if his representation is correct, it will be supported by the village communities, on whose expression of dissatisfaction it will generally be safer to rely. The Board agree also in much that the Collector urges in para. 53, but this part of his letter does not require consideration here. His suggestions in para. 54 regarding the testimony of approvers do not fall within the Board's province.

11. The Board also agree with the Collector that the services of the Naud Taliaries and cavalgars should be retained only when it may be necessary to employ them as Taliaries. As regards the Cuttoobadies the Collector will be requested to report more particularly. The Board are under the impression that these men still retain a vivid recollection of having been Military retainers, that they object to be employed on many of the duties which peons ordinarily perform, such as conveying messages or letters, and it is desirable that their feelings in respect to the performance of the duties of a Taliary should be correctly ascertained before they be incorporated with that class of servants. If required as Guards at any particular station, the Board think it will be preferable to place them on the permanent establishment as peons on fixed pay.

	Number.	Entire Emoluments.	No. of men doing duty.	Emoluments of those who do duty.	No. who do no duty.	Emoluments of those who do no duty.
Naud Taliaries...	630	5730	456	4823	174	907
Cavalgars..	776	9560	449	7551	327	2009
Cuttoobadies.....	3837	26,408	2746	18,481	1091	7927
	5243	41,698	3651	30,855	1592	10,843

This is however a question of detail which can be settled hereafter. The number of each class and their emoluments is shown in the margin. It will be seen that of 3,837 Cuttoobadies, 1,091 do no duty and yet on an average, receive as much as those who are required to serve.

12. The Board have passed orders separately, regarding the Cundachar peons. In consequence of those orders all of this class, the remission on whose lands does not exceed the ordinary Chowtaye, will at once be dispensed with, and the same course may probably be followed with regard to the remainder whose emoluments are stated to be little in excess of the Chowtaye. The condition of service being withdrawn.

Pro. to Collr. 19th July 1855.

No. of Cundachars. } 1315.

Total Emoluments } 13,216 of which exceeding Chowtaye Rs. 6331.

13. The Collector has not stated whether the emoluments of the Naud Taliars, &c., include what they would receive as Chowtaye, but the Board presume this is not the case.

Taliaries Enam	87,819
Marah	44,223
Naud Taliaries, &c.	41,698
Cundachars	6331
	180,071

14. From the above the Board perceive that the entire emoluments of the village Police as now established amount to about Rupees 180,071 as shown in the margin.

15. The reference to which the Collector's present letter is a reply, was intended to be limited only to the village Police and not to the regular establishment. The efficiency of the village establishment depends however, materially on the support they receive from a well trained and paid body of regular peons, placed at judiciously selected stations, and affording them ready aid without in any way encroaching on their proper functions. The number of Police peons certainly seems very small for so large and populous a district as Bellary, but more

detailed information is necessary to enable the Board to judge of the best means of placing this department on a proper footing.

16. Considering the many points on which careful enquiry is necessary before the Board can submit a well devised scheme for the reformation of the village Police for the consideration of Government, they think it best to adopt the plan proposed by Mr. Pelly, viz., to authorise him to organise one Talook as a model without however carrying his measures into effect until duly sanctioned. They therefore request that he will follow this plan as soon as possible, making the careful enquiries pointed out in para. 52 of his letter particularly into the real value of the Enams and fees of the Taliaries &c., and following the principles laid down in paras. 6,7,9 and 11 of these proceedings.

(Signed) G. S. FORBES,
Secretary.

* From Bellary 23rd Feby. in Con. 31st March 1858. No. 919.

P. S.—Since the above Proceedings were drafted, the Board have received a further letter* from the Collector, enclosing one from his Sub-Collector, on the subject of the Village Police in the Talooks of the Sub-Division. This communication, and its accompaniments, are submitted for the information of Government.

(Signed) G. S. FORBES,
Secretary.

From C. PELLY, Esq., Collector of Bellary; to G. S. FORBES, Esq., Secretary to the Board of Revenue, Fort Saint George, dated 23rd February 1858, No. 24.

SIR,

I lately had the honor to submit a report on the proposed organization of the Village Police of the talook of Bellary in this district. I requested the Sub-Collector to submit a similar report for a single talook in the Sub Division, and I beg to send Mr. Arbuthnott's re-
* 16th November 1857. port* on that subject for the talook of Anantapoor.

From the Honorable D. ARBUTHNOTT, Sub-Collector of Bellary; to C. PELLY, Esq., Collector of Bellary, dated Pengondah, 16th November 1857, No. 70.

SIR,

1. With reference to your letter dated 28th September 1856, requesting me to furnish you with a report on the state of the Village Police of one of the talooks in the Sub Division, and the measures necessary to render it efficient with a view to enable you to reply to the Board's Proceedings, under date 12th August 1856, I have the honor to submit a report founded on the investigation made by me in the Anantapore talook during the Jamabundy of Fusly 1266.

2. The Talaries who appeared before me, gave a preference generally to the system at present in force and are averse to any change. They neither wish the resumption of the Enams enjoyed by their Hissadars nor are they willing to relinquish any portion of their Enams, not even those that have been waste for many years. They are equally averse to be employed in other than their own villages even on additional remuneration.

3. The statements (herewith sent) will shew the number of Talaries actually doing duty and of their Hissadars, the net assessment of their Enams after deducting the general remission and that of the lands actually cultivated as also the estimated produce of their Enams, and the value of Marah and Vurtanah.

4. It is not however easy to ascertain the actual quantity of the produce of their Enams as required in para. 16 of the Board's Proceedings, as the Talaries get their lands cultivated as they can or as it suits their convenience, and no account of the produce has ever been kept by them. The estimate here given is made up from the statements of the Talaries and village officers, the value of the fees has also been estimated in the same way. No uniformity is observed in the payment of the Marahs. It varies in different years. It is paid both in money and grain, and sometimes in the latter in an unthrashed state as soon as the crop is cut. The Vurtanah is also collected on different occasions in different ways. In short, these fees are not in many villages paid according to the fixed rates in the Revazputtee, but are settled between the parties themselves.

Assessment of the whole Enam	5205
Deduct waste	1668
Actually cultivated	3537

	Acres.	Asst.
Dry lands	10,090	3104
Irrigated lands	268	2101
	10,358	5205

5. The produce of the Enams cannot be estimated in this talook at half of the assessment for the following reasons. 1st, there are no fertile ragud lands in this talook. 2nd, the greater portion are poor red lands changeable every three years. 3rd, the irrigated lands are too highly assessed. The holders of these Enams being unable to cultivate themselves, are obliged to give them to other Ryots at such rates as they may choose to pay. The annexed statement shews the produce estimated at half of the survey assessment on the whole of their Enams as well as of that under actual cultivation.

6. The survey assessment of Talary Enams in this talook amounts to Rupees 5205, and leaves a net assessment of Rupees 4231 after deducting the usual remissions. The produce of the Enams under cultivation is Rupees 1407 estimated on the statement of Talaries and the village officers, which about equals one-third of the assessment of the whole Enams. The amount at half of the survey assessment of the whole Enams is Rupees 2601, and that of the cultivated lands Rupees 1764, the difference, Rupees 837 being for the waste. The assessment of waste lands for Fusly 1266 is Rupees 1668, and is higher than what appears in the accounts prepared in Fus-

	Rs.
Fusly 1249	1385
,, 1260	1514
,, 1266	1668

lies 1249 and 1260 as is marginally shewn. The cause seems attributed to the heavy rains in Fusly 1260, and the consequent destruction of lands thereby.

7. I see no reasonable objection to the resumption of the Enam waste lands by Government as they are of no use to the Talaries, but the resumption should take place gradually as casualties occur.

8. The Marahs or grain fees are given by the Ryots to the Talaries for watching their crops, and if these were resumed by Government and ready money granted in lieu thereof, the Ryot not only looses his hold on the Talary but the latter also suffers to a considerable extent, as by this means he is prevented from taking home such grain as is cultivated in the season. I think it however impossible to carry into effect the orders of the Board until an uniform system in this respect is established throughout the District.

9. The present emoluments of Talaries are estimated in two ways, 1, At the half of the survey assessment of the whole Enam, and 2, at the same rate on cultivated lands including Marah and Vurtanah, and these have been compared with the proposed salary of 30 Rupees a year to each of the Talaries as is shewn in the above statement.

10. The total number of Talaries is 440, of whom those in the service are 218. The number of villages in which Talaries perform their duties by turns exceeds those in which they are permanently employed. In the event of certain numbers being permanently employed, the other share-holders will be deprived of the means of livelihood.

11. The Board consider that one Talary is sufficient for a village consisting of a population of 800 inhabitants. This restriction I think should be limited only to villages having no hamlets. There are 153 hamlets in the Anantapore Talook and some villages are situated on the sides of high roads in which the service of a single Talary is insufficient. I would therefore propose to employ 67 persons in excess of the number recommended by the Board. This increases the number to 202.

N. B.—The Police of London (exclusive of detectives) gives 1 Policeman to about 450 inhabitants.

12. The Talaries at present perform both Revenue and Police duties. On pressing occasions and when there is much work they avail themselves of the assistance of the other share-holders. In the event of the whole of the Enams and Marahs being apportioned to those actually performing duty, the others will not only withhold their assistance, but being deprived of lawful means of livelihood, will, I fear, betake themselves to theft and robbery. I would therefore propose

that the Talary Merassidars be permitted to hold there offices by turns, or if this plan is not approved of, that the other sharers be allowed to retain their shares of Enams during their lives, and as the shares lapsing by casualties, such orders as may be necessary may be issued.

13. The amount of Enams held by Talaries in service as well as those enjoyed by the other sharers are hereunder shewn.—

			Number of Talaries.			Asstt. of Enam.			Estimate of produce.			
		Number of Villages.	Those in duty.	Those who are not in duty.	Total.	On cultivated lands.	On lands in waste.	Total.	At half of the Asstt. on whole Enams.	At half of the Asstt. of cultivated Enams.	Marah and Vurtanah.	Total 11 and 12 colums.
1	2	3	4	5	6	7	8	9	10	11	12	13
Enjoyed by Talaries actually doing duty alone.	Enams enjoyed by the Talaries performing duties alone, though there are several sharers.	23	35	44	79	389	190	579	288	196	305	501
	Enjoyed by the Talaries performing duties who have no sharers.	39	83	...	83	1308	447	1755	878	653	798	1451
		62	118	44	162	1697	637	2334	1166	849	1103	1952
Enjoyed by those in duty and the sharers also.	Enjoyed by Talaries actually in duty.	59	100	...	100	758	456	1214	606	380	829	1209
	Enjoyed by Talaries who are not in office.		...	178	178	1076	581	1657	829	538	...	538
		59	100	178	278	1834	1037	2871	1435	918	829	1747
	Grand Total...	121	218	222	440	3531	1674	5205	2601	1767	1932	3699

The difference between the Enams held by the Talaries performing duties and those possessed by persons who are not in office, is owing to the excess in the Enams that have fallen to the share of the Talaries who are actually doing duty for Fusly 1266. The fees are received only by those who perform the duty, but as all the Merasidars take it by turns, each of them enjoys the fees when he is in office.

14. The information called for in the 9th para. of the Board's proceedings regarding the Enams of the Talaries not in office cannot be given, as all the Talaries perform duty and enjoy the Enams by turns. Should the proceeds of the entire Enams be given to the Talaries actually performing the duties, an additional expense to Government will be incurred as shewn below.

	Number of Talaries.	Average per each individual.	Amount of Enam.	Fees.	Cash payment.	Total.
Present emoluments.....	218	20 12	2601	1932	...	4533
Proposed for the future.....	202	30 ...	3636	...	2424	6060

If half of the assessment of the whole Enam be deducted from the proposed salary, it leaves the amount of Rupees..... 3459

If the Marah be added to the estimated produce of Enams as above stated, the remainder will be..... 1527

If it be the half of the assessment of Enams actually cultivated, the amount will be..... 4293

If Marah and Vurtanah be added to it, will reduce the amount to Rs. 2361

The estimated produce at half of the assessment of lands under cultivation together with the Marah and Vurtanah will, I think, be a reasonable remuneration to the Talaries. But the above is only for the Talaries in office and not for those who are out of office.

15. In five villages, viz., Singanamallah, Cheekroypettah, Coodar, Coracodoo and Aulmoor the Talaries are in the enjoyment of extensive Enams some of them are now nominated for village service and the remainder for service at the Ghauts near their villages.

16. It appears from the Proceedings of the Board that the Enams held by sharers are resumable as casualties occur. This has not been put in force up to this time. I have however given in the statement the produce of the Enam, and the Marah and Vurtanah received by the Talaries who are actually doing duty and the amount of proposed salary at Rupees 30 each per year as well as that of probable extra expense. An abstract is given below.

Number of Talaries.	Those whose service may be dispensed with.	Remains.	Number to be employed additionally.	Total.	Half of the Assessment of the whole Enams.	Half of the Assessment of the lands actually cultivated.	Marah and Vurtanah.	Total cols. 7 and 8.	Proposed salary at 30 Rupees each per annum.	Additional expense.	
										On cols. 6 and 8.	On col. 9.
1	2	3	4	5	6	7	8	9	10	11	12
218	21	197	5	202	1772	1229	1932	3161	6060	2356	2899

It will be seen that the amount of additional expense is higher by Rupees 829 or 538 respectively than that which is shewn in the foregoing para.

17. The present emoluments of 21 Talaries whose services are not required as above stated, amounts to Rupees 304 as now estimated, and as this amount also is to be allowed to the Talaries who are to be employed for the future, the former will have to be deprived of their Enams. They might however be employed in ghauts on the same rate of salary, viz., 30 Rupees each. The salary to be so conferred amounts to Rupees 630, but the surplus fund of Rupees 190, remaining in the 9 villages, Singanamallah, &c., as I have already mentioned, being taken for the purpose will reduce the amount to be paid by Government to Rupees 440.

18. The Jodee payable by the Talaries is Rupees 169, from the payment of which I recommend that they should be exempted, as the sum although important to them, is a mere trifle to Government.

19. The Cavaligars whose service is similar to that of the Talaries, are 21 in number. The assessment of their Enams amounts to Rupees 1035 and the Marah received by them is Rupees 280, making an aggregate of 1315 Rupees as remuneration. There are no Talaries in three villages of this talook, viz., Singanamallah, Cheekroyapettah and Mutlgondee and cavailgars perform the duties of Talaries. They have consequently been entered in my statement as Talaries and their Enams have also been included under the same head. There are some other Cavailgars enjoying Enams to an amount of 46 Rupees in the villages of Morataud and Tautecherlah and to an amount of 155 Rupees in Anandarowpettah and Needhanaradah. The holders of the Enams in the two former villages reside in the village of Oodarapoocondah of the Gootty talook and the others possessing the Enams in the two latter villages reside in the same villages. I propose to employ these persons for the future in this talook.

20. There are 42 Cuttoobadies in this talook, they appear to have been employed by former Government in villages where there was a deficiency of village servants in Revenue and Police but not in Military duties.

21. In all the villages the duties of watching at nights have been partly performed by other Merasidars, such as Washermen, Barbers and others and the practice should be allowed to continue, for in some villages these persons constitute the only Police.

22. With regard to the existing system of village Police there are several objections,

I. Men who like Talaries have lands to cultivate and are obliged to labour in their fields by day, must of necessity be indifferent guards at night.

II. Their office being a Meerasee or birth-right is apt to be looked on as a mere property without any corresponding duty on the part of the holder.

III. The difficulty of replacing them by different class of men when the Talaries have been removed for misconduct.

IV. The impossibility under the present system of removing them to other villages where their services are more required or for the purpose of breaking through a confederacy, when they are suspected of harbouring thieves.

V. In seasons of scarcity when their Enam lands are worthless, their poverty drives them to league with thieves and robbers.

VI. In the Anantapore talook there are upwards of 160 men of Corichawar caste who are all robbers to a man. These men are scattered through the talook and reside in about 40 villages. That these and other robbers receive assistance and countenance from many of the village officers is beyond all question, in fact no robbers could exist for any length of time without such assistance.

23. To break up any combination between the village Police and robbers or to watch narrowly the proceedings of the Corichawars and other robber castes would require a much larger force of Police peons than are at present maintained.

24. In Anantapore talook there are 46 Police peons and Duffadars, and of these about 29 are required on duty near the Tahsildar, leaving only 17 for general duty in a large extent of country containing 123 villages and with an area of about 700 square miles.

25. Village Talaries are chiefly useful for their intimate knowledge of every one in their own village and this information they could give if so inclined, but as a Police force to put down gang robberies they are merely useless.

26. I have mentioned that the Talaries could give valuable information when so inclined. The concealment of knowledge of crime by parties perfectly innocent of any participation is an evil of the most calamitous consequences, and to such an extent does it exist that the detection of crime is almost impossible.

27. Apathy and the wish to escape all trouble is one cause, but the chief reason is the dread of having to go to Bellary Courts.

28. The distance of course in many cases is very great and to avoid the trouble of the journey, not only will witnessess deny all knowledge of a case but even the sufferers the very men who have been robbed will deny their own property (when the value is small) rather than run the risk of being sent to Bellary, and I have had the question actually put to me by the owner whether in case the property was recognized he would be sent to Bellary.

29. I have long been of opinion that in districts like Bellary and Cuddapah where the robber castes are numerous, the suppression of gang robbery can be effected only in one of two ways, either by a very large permanent increase to our present Police force or by employing a separate force on the principle of the Thuggee Department.

(True Copy.)

(Signed) C. PELLY,
Collector.

Number of talaries as per account of fusly 1260... 605
Do. do. as per account of fusly 1266.. 440
Decrease..... 165

The decrease is in consequence of the number of talaries having been entered in the account prepared in fusly 1260 as equal to the number of villages of which they are Meeraseedars, although each talary is Meeraseedar of 3 or 4 villages. The correct number is entered in the account prepared in Fusly 1266. The Cavalegars in Singanamullah, Cheekroypettah and Mutlagondee are entered as talaries.
