Not to be folded or roughly handled

13-10-28.

Proceedings of the Madras Government, Judicial Department,
13th April 1867.

Read the following papers:—

No. 86. From the Superintending Engineer, 6th Division, to the Secretary to Government, Public Works Department, Fort Saint George; dated Trichinopoly, 6th February 1867, No. 1314.

With reference to Proceedings of the Madras Government, No. 4084, dated 22nd December, I have the honor to request that you will be good enough to inform me whether any urinals are to be provided in the Latrine for the District Jail at Trichinopoly. They are provided in the plan forwarded by me on the 21st November.

No. 997.

2. The Inspector General of Jails, in his letter dated 13th December, requests that the earth bin may be provided in the centre, according to the standard plan. Is it intended that in this respect

No. 122.

only an alteration is to be made, or are washing troughs, such as are provided in the standard plan, to be supplied?

3. The addition of the washing troughs will nearly double the estimate. A cistern 5' x 2' is provided in the plan and estimate forwarded from this office on the 23rd November.

4. I would take the opportunity of inquiring whether any urinals are to be provided in the Latrine for the Central Jail. They find no place in the standard plan, nor is provision made therein for a poudrette bin or cart-shed. Are these to be provided separately?

Referred to the Judicial Department, with reference to the orders in that Department, No. 1968, dated 18th December 1866.

FORT SAINT GEORGE,
12th February 1867.

(Signed) C. A. ORR, Colonel, R. E.,
Secretary to Government, P. W. D.

Referred to the Inspector General of Jails, for report.

FORT SAINT GEORGE,
4th March 1867.

(Signed) A. J. ARBUTHNOT,
Chief Secretary.

No. 87. From the Inspector General of Jails, to the Chief Secretary to Government, Fort Saint George; dated Madras, 28th March 1867, No. 169.

I have the honor to return the letter of the Superintending Engineer, 6th Division, No. 1314, dated 6th ultimo, referred to me on the 4th instant, and to state that I do not recommend any alteration in the plan of the Latrine proposed for the District Jail at Trichinopoly, with

Judicial Department, 18th December 1866, No. 1968.

the exception of that regarding the position of the bin to contain earth for present use, and which I advised should be placed between the trenches, as being the most convenient arrangement.

2. I do not consider it necessary to provide separate urinals in the Latrine for the Central Jail, and recommend that the construction of the poudrette bin and cart-shed should be deferred, until our experience at the other Central Jails affords the means of ascertaining the most suitable dimensions for such buildings.

Ed. J. H. Burns.

It is similar in all essentials to the Bea-
-gulus plans but contains an important
improvement by Capt: Chryslie the Ex: En: at
Chatham. This consists in lowering the bottoms
of the trench or a level with the surface

of the grounds, and the ends open, so that
it is easier cleaned than at Bangor
where the benches are sunk and the
ends closed. The plan of Slaters for
the district jail is a fine one which was approved
by the Local Committee and will seem to
call for any remarks except as to the position
of the bin for Smith which I recommended
should be placed in the Centre in conformity
with the Standard plan - As to Windows
I think it is well to have them attached
to the prison or Slaters is made jails
where they are easily accessible, but the
distance to be gone over is a Centre

Jail is very considerable, and it is³
be very inconvenient to all concerned if
there is more wanted to meet them,
it is hard to go to the Jail: Slaters - a
trial or other convenient kind is each
Convenient will be much better, and
D. Mackenzie to whom I spoke as the
Subject agrees with me - It may
appear at first sight that Slaters is
valued the inconvenience, but I feel
sure Slaters will do so -

Yours truly
The Honble
A. J. Robertson
