the Committee appointed under G. O. No 454, dated 22-
2-94. *Judicial.*

I have the honour to be
sir,

Your most obedient servant

W. G. King

Surg. Lt Col.

Ag Sanitary Commissioner.

Current No. 6788 of 15 Dec 1894

For orders.

This current is the proceedings of the Committee appointed under G.O. of 22nd February 1894 No 454 Jvd. to draw up a drainage scheme for the Madras duranic Asylum. That order directed that the scheme should be as cheap & simple as possible. The Committee's report errs on the side of simplicity for it gives no details whatever. Its recommendations are that "the existing open cement lined drains ... shall be extended sufficiently to secure that all sewage shall be collected at a suitable point & thence be discharged for broad irrigation on the vacant land to the south of the buildings & within the asylum premises, it being understood that care will be taken to secure the separate removal of solid excreta" as at present; B that the Red hills water be filtered before distribution; C that the Madhavakam tank be effectually & permanently breached; D that the Oobespalem panchery be acquired & incorporated within the Asylum boundaries.

2. Proposal B has nothing to do with the drainage of the asylum as far as I can see, & should it be submitted be considered separately.

3. The map of the Madras put up shows the limits of the Asylum & the Madhavakam tank but not the Oobespalem panchery. Neither is it contained so as to show the respective levels of the tank & the

24-10

Drainage of the Madras
Lunatic Asylum

4. What the cost of these measures is likely to be is not stated. If the Madras tank is still used for cultivation as it is believed to be, the cost of breaching it will be high. - Should not the Surgeon General be told to send in estimates in consultation with the Consulting Architect & the Collector of Madras, or Municipal Commissioners of the land which it is proposed to acquire includes municipal property. It is impossible to take action without some idea of the cost of the measure

D
19.1

The proposals made are of the roughest description: it is submitted that the report should be returned for fuller information

C.S.

24/1/95

Order 30 June 195 - 1954
The proposals contained in the report received from the Sanitary Commissioner are of the roughest description & require decided amplification. The subject referred to the Committee has not been fully discussed in detail as it should have been. The report contains not the slightest information as to the probable cost of the measures advocated in it. It is consequently impossible for Govt to come to a decision upon the matter. With these remarks the report will be returned to the Sanitary Commissioner as President of the Committee with the request that he arrange for the report to be submitted within the shortest possible delay as possible. (from order) J. S. S. C. 24/1/95

H.M.

For orders

Is any map available showing the drainage of the Madras Lunatic Asylum? If so, please send it to the Sanitary Commissioner for his use.

There is no Res. Survey map available in the Sect. The only maps of 17 1/2 in. the Madras tank available are put up. Perhaps the Board of Res. may be able to supply some maps showing the drainage.

Please see the note in the L. A. Almanac for 1954.
