No 1478 of 95

Dated 15th October 1895.

From

A W B Higgins Esq
District Magistrate
Trichinopoly

To
The Chief Secretary to Government
Judicial Department
Madras.

Sir,
With reference to Government order
no 979 Judicial dated 10th May 1895, I
have the honor to report that no testings
were made, at the Port of Tuticorin,
of petroleum which solidify, or become
viscid at a temperature above 60° F.
The apparatus was supplied to
the Health Officer Tuticorin in April
last and he reports that no samples
arrived at that port or were pre-
sented for examination and that there-
fore no testings were made.

I have the honor to be
Sir

Sir,

I have the honour to report that I
have obtained several samples of Liquid
and Viscid Petroleum and am of the following
opinion.

The average flashing point of Liquid
Petroleum is about 96°.

The average flashing point of Viscid
Petroleum is 166°.

2. As was already intimated in this office
No 200 of 31/7/94 never any accidents occurred
in this Station from the present minimum legal
flashing point -

Despd 14/11/95

Sir,

With reference to Mr. Hill's letter
of the 13th April 1895, No. 598, I am directed
to report the result of the testing of petroleum
which solidify or become viscid at a tempe-
rature above 60° Fahr.

2. The Chemical Examiner, Madras, states
that the modified method of testing
crude Petroleum has been tried by him with
satisfactory results. He tested five

* Sago 9797 10 May 95.

samples of crude earth oil, imported from Rangoon, with the following results:—

No. of sample: the
[H.E. the statement on page 2 of the Chemical Examiner's letter in G.O. No. 643 J.D. 28.5.95]

The temperature indicated by the side thermometer was that of the flashing point and the highest difference between the results of three tests on each sample was only 2° Fahr. — the limit of variation prescribed being 4° Fahr.: S. Canara & Timorelly

3. The ~~Dist.~~ of Malabar report that the tests could not be ~~made~~ ^{undertaken} in their districts as no crude ^{oil} is imported there; ~~the Dist. of S. Canara & Timorelly also report that there was no occasion for testing any petroleum.~~

4. The Dt. Surgeon at Cocanada who obtained several samples of ligies & viscid petroleum, states that the average flashing point of the former was about 96° , while that of the latter — viscid Petroleum — was 166° .

W. 12 ugs 12/11/95

Note. The report called for in para 3 of India's letter in G.O. 1360 of 1895 has already gone. Please see G.O. 2729 J. 16.11.94
