2/1639 M/95

No. 110

Municipal Office

Cochin, 9 May 1895

From

D. R. Viegas Esqr.

Chairman Delegate Municipa

Council, Cochin

To

The Sanitary Engineer

Madras.

Sir,

In appending herewith extracts from the inspection notes of the Sanitary Commissioner on his inspection of Cochi in November last, I have the honor to request you will favour me with your opinion on the pattern of latrines most suitable to be adopted in this Municipality and a plan and specification for the Construction of a public slaughter house.

I have &c.

(sd) D. R. Viegas.

Chairman Delegate.

(c) Night soil Conservancy – Two latrine are placed along the Kalvetti channe that defaecation takes place direct into the water. As the ebb leaves the sewage sediment exposed, it is not desirable that this mode should be further pursued. n the same principle latrines are uilt by the Municipality so that discharge can occur into the backwater. can see no objection to this, provided defaecation takes place at a spot so distant from the shore, that it will not be uncovered by the receding of the tide. Considering the small amount of faecal matter likely to be thus disposed of and the large volume of water subject to ebb & flow at this point, I think it safe to ignore the possibility of faecal matter being washed on shore. The pattern of latrines now used for this purpose is however very poor, irrespective of the fact that they are at present in very bad repair. By the addition of a pump and small storage cistern attached to each atrine, it ought to be possible to

have a good [illegible] washing faecal matter from the latrine automatically into the sea. Possibly it would be cheap to float the latrines on pontoons. On these points the Council should consult the Sanitary Engineer. In Chellai the same practice is observed and is open to objection on the same ground as in the case of the Kalvetti channel

Slaughter houses — All are private. It is unnecessary to describe them. They all fail to fulfil sanitary requirements.

From the above, it is evident that both in the matter of markets & slaughter houses, Cochin is behind the age. It would be advisable to erect a proper slaughter house on a correct plan, as well as a General market. Both the investments imply not only better safety, but increase to the Municipal income. I advise that plans for

both

that the [illegible] taking place directly interred

GOVERNMENT OF MADRAS.

OFFICE OF SANITARY ENGINEER,

Fort St. George, 17th May 1895.

Local & Municipal Dep
CURRENT No. 1639

From

J. A. JONES, ESQ., MEM. INST. C.E., F.R.S.E.,
SANITARY ENGINEER TO GOVERNMENT,

To

The Chief Secretary to Government,
Local & Municipal Department

SIR,

I have the honor to forward copies of three communications (undernoted) I have received and to request the orders of Government thereon.

1. Letter from the Chairman, Municipal Council, Palghat, No. 1602 date 9th May 1895 to the Sanitary Enginee

1. Letter from the Chairman Delegate, Municipal Council, Cochi No. 110 dated 9th May 1895 to the Sanitary Engineer.

1. Letter from the District Medica & Sanitary Officer, Coimbatore, No. 1936 dated 10th May 1895 to th Secretary to the Sanitary Boa

I do not think that it was ever ~
ntended by Government that this office
should be an office for the design of
works required by Municipalities. If that
s desired, the staff must be very greatly
ncreased. As it is, so large a portion of
he staff is engaged in type drawings
or the Sanitary Board, in revising plans
nd estimates sent in by local boards
and Municipal Councils, that I am ~
practically ashamed of the small ~
amount of work being done in regard
to the main objects for which this office
was instituted viz, the design and
construction of major works of water
supply & drainage. ~~so much so that~~ I
can plainly see that I shall not be ~
ble this year to overtake half the ~
chemes I have been ordered to deal
with.

. Again under the present consti-
tution of the Board the references ~
ackwards & forwards, and the frequent
eturn of designs and estimates for
evision, and further information and
reports

reports called for from Local Council
Boards adds very considerably to ~
Sanitary Board work.

4 Government will have notic
in the Sanitary & Dy. Sanitary Com-
missioners' inspection notes many
references such as "Plans for this shou
be obtained from the Sanitary Boar
this practically means "Sanitary Engine
and I think that there must be some
definite limit decided as to the nature
of the work to be done by this office.

5. I trust Government will ~
observe that I am not of opinion that
the work should not be done here, or that
it would not probably be better done
here than by agency locally available,
nor am I making any complaint that
the work is such that it cannot be
undertaken – but I wish to obtain ~
merely such orders as will limit the
amount of work in proportion to the
staff available, so that the work may
now be diminished and not allowed
to increase in the future, and so as to

admit

admit of proposed schemes and work in reference to ~~the~~ construction having that attention which ought to be given to them — otherwise not only the subordinate but the Supervising Staff must be increased.

I have the honor to be,

Sir,

Your most obdt. Servt.

Sanitary Engineer to Govt.

LOCAL AND MUNICIPAL DEPARTMENT.

Current No. 1639 M.

From the Sanitary Engineer.

I dont think the San: Engr. shd. be required to prepare plans & estes for petty works & ~~[illegible]~~ of a miscellaneous nature. One of the items mentioned is a slaughter house. He might be asked to prepare a standard plan which wd. be generally useful.

J.B.
24/6/95

FOR ORDERS.

The Sanitary Engineer brings to notice that the municipal councils of Palghat & Cochin & the District Medical & Sanitary officer of Coimbatore have asked him to prepare plans & estimates for minor sanitary works & requests orders as to whether he should do so. He represents that as matters stand at present, he has not got a sufficiently strong staff to deal satisfactorily with his legitimate work of designing

1639 m

Re preparation of plans & estimates for minor sanitary works.

I think that the course suggested in the note is the proper one. There can be no doubt that the establishment of the Sanitary Engr. is not strong enough to carry on the preparation of plans & estimates for large water supply and drainage schemes and of comparatively petty works for 76 municipalities.

Either the municipalities must prepare their own plans and estimates & send them on for approval, a system which as the majority — one might almost say the whole of them — ~~[illegible]~~ [illegible] are unable to properly carry out — or the S. E.'s estabt. must be increased by the addition of draughtsmen and Estimators who might be partly paid by contributions from municipalities.

This however seems a matter for the Sanitary Bd. to consider

Current No. of 189 , dated from the

Current No. 1639 m. of 1895, dated 17th May 1895 from the Sanitary Engineer to Government.

Order.

The Government does not consider that the Sanitary Engineer should be required to prepare plans and estimates for petty works of a miscellaneous nature proposed to be undertaken by local bodies. ~~They~~ latter should, however be guided, as far as possible, by the Standard plans, ~~if any~~, issued by the Sanitary Board.

Note for H.M.

Standard plans have already been issued for a slaughter-house and a bullock slaughter house vide page 22 of the Sanitary Engineer's report for 1892 put up.

With reference to H.M.'s remark on page 3 of the note it is submitted that, though it is the Sanitary Engineer who has actually to deal with these requisitions for plans etc, it is to the Sanitary Board that they are sent and it is as Sanitary Board that he replies to them. Moreover it is the Sanitary Commissioner who instigates the sending of the majority. Perhaps therefore it would be as well to let the Board give an opinion upon ~~these~~ this question. It is only the fact that the rules prescribed in G.O. no 2380 / 16.11.94 have not yet come into force that enables the Sanitary Engineer to write direct to Govt as he has done in this instance. Had they been in force the matter would probably have gone before a full board under para 6 of that G.O.
