ENCLOSURES. 8

FROM

NORTH ARCOT, DISTRICT BOARD'S OFFICE,

Chittoor, 15th June 1895.

Local & Municipal Dept
CURRENT No. 1711-L

S. H. Wynne Esquire

President, District Board,
North Arcot.

To

THE CHIEF SECRETARY TO GOVERNMENT,
LOCAL AND MUNICIPAL DEPARTMENT,
Madras.

through the Sanitary Commissioner, for Madras.

Sir,

I have the honour to report that, as the existing system of vaccine lymph supply has been found to be not working satisfactorily, the District Board, on the recommendation of the District Medical and Sanitary officer, and for the reasons stated in the first of his two letters quoted in the margin* (copies enclosed), have resolved to establish a lymph depôt at Vellore to supply a portion of the district for the present with animal lymph. The Inspector of Vaccination and Deputy Sanitary Commissioner is also in favor of the measure as will be seen from his letter dated the 11th May 1894 No 678/V, copy of which is herewith submitted. Copies of resolutions of the District Board on the subject and a statement giving particulars of the estimated cost of the upkeep of the depôt, together with a proposition statement for the establishments required in connection with it are also enclosed. I request, therefore, that

*letter No 989 dated 16th April 1894.
—— 1889 —— 19th July 1894.

that Government will be pleased to accord its sanction for the establishment of the depôt and the proposition statement.

2. In this connection, I solicit early orders of Government on my letter No 1271 dated the 11th ultimo requesting the transfer of the building known as the "Armourer's Shop", at Vellore to the District Board for the location of the depôt in question.

I have the honor to be,

No 989

Office of District Surgeon,
North Arcot.
Vellore. 16th April 1894.

From
Surgeon Major W. A. Lee
Ag District Surgeon,
North Arcot.

To
The President, District Board,
North Arcot.

Sir,

I have the honour to recommend that depôts for the preparation of preserved animal lymph be opened in this district, the present system of lymph supply being in my opinion an eminently unsatisfactory one, and for the following reasons.

I. The difficulty in procuring calves at the several head quarters of the 1st class vaccinators whereby frequent interruptions in the maintenance of a continuous lymph supply by transmission from calf to calf must necessarily occur with a corresponding reduction in the outturn of work.

II. The cruelty involved in marching about from village to village these vaccinated animal while suffering from the fever induced by the operation and with a large, raw, inflamed and therefore highly painful inoculated area o the abdominal surface.

III. The impossibility under such conditi of keeping the wounds and therefore the lymph fr from dust, dirt, and extraneous foreign matte and living organisms.

IV. The difficulty in getting subjects for vaccination at the precise time of maturity of the vesicles on the calf.

V. The very unsatisfactory material supplied for vaccination purposes to the second class and probationary vaccinators, viz, "Scabs" which are sent by hand, wrapped in paper, and which besides vaccine germs, are also likely to contain pus-generating (micro-cocci) germs as well; these latter producing spurious sores which may be mistaken for and are often returned as "successful vaccinations".

VI Because with improved lymph both better results can be obtained and also better protection against small-pox, while there will be a large reduction in the number of false returns by vaccinators, who are either misled by these spurious sores above described, or else tempted to show better results than could possibly be expected from the bad quality of the material with which they work.

2. I may draw your attention to the following extracts from the Report on Vaccination in the Madras Presidency for 1892-93.

Page 4 — "Glycerinie paste tends more and more to take place of lymph used direct from calf to arm so that probaly the cost per case will continue to diminish."

Page 20 — "With one or two central depôts in a district and a good supply of Laigan tubes, 20 calves monthly ought to furnish sufficient paste for a population of two millions."

3. Information as to cost of working this scheme together with other details can no doubt be obtained from districts where it is already

in

in operation, e.g, South Canara and Tanjore.

I have &c.

No 1889. Office of District Surgeon, North Arcot.

Enclosures. 2. Vellore 19th July 1894

From

Surgeon Major W. A. Lee
Ag District Surgeon,
North Arcot.

To

The President, District Board,
North Arcot.

Sir,

With reference to your endorsement, No 1223 Ref on G.L.F. dated 27th May 1894, I have the honor to enclose estimates showing probable cost of opening a vaccine depôt for either the whole or a portion of the district. I think that in the first instance it would be better to commence with supplying a portion of the district only, as sufficient calves may not be available at this place. The Vellore Taluk Vaccinator at Pallikonda inoculated 82 calves last year, and the Vellore Municipal Vaccinators 42 - a total of 124.

2. The number of calves inoculated in the district was 868, and the number of persons successfully vaccinated therefrom was 51176, an average of 59 per calf; whereas with a depôt the necessary quantity of lymph for the same number would have been yielded by 168 calves - there would thus be a saving of Rs 800 in hire of calves alone, independent of feeding charges - ie - provided calves can be hired for the depôt at the same rate as they are now throughout the district.

3. A shed paved with stone or other impermeable flooring would be required, and its cost should be added to the estimate, unless

some public building be made available.

4. I would suggest that part of the building, a portion of which is now being repaired for the Vellore stationary Sub Magistrate's office, may be utilized for the purposes of a lymph depôt.

I have &c.

(Signed) W. A. Lee Surgeon Major
Ag District Surgeon.

No 678/V.

Office of Sanitary Commissioner
Fort St George, 19th May 1894.

From

Surgeon-Captain W. B. Bannerman M.D.
Inspector of Vaccination and
Deputy Sanitary Commissioner

To

The President, District Board,
North Arcot.

Sir,

In reply to your letter No 988 dated Chittoor 29th April 1894, I have the honor to say that I agree with the opinion expressed by the acting District Medical and Sanitary Officer as to the unsatisfactory methods adopted in your district for the supply of vaccine lymph.

A printed circular was recently issued from this office giving full particulars of the method to be followed for the cultivation and preservation of lymph, and a copy was sent to you on the 28th March 1894.

One depôt at the head quarter station of the District Medical and Sanitary Officer will, I believe, be ample for the whole district. The staff should consist of one 1st class vaccinator to inoculate the calves and prepare the lymph, and he should have a cooly as calf tender. In South Canara, another cooly is entertained to bring calves from villages and to return them to their ~~owner~~ owners after operation; he also helps on inoculation days and whenever not engaged in bringing or returning calves.

In South Canara, the daily allowance of food for 3 calves was 30 lbs of green grass, 12 lbs of straw, 1 seer of conjee and 1 seer of oil cake; a little extra conjee being given to the calves immediately after removal of the lymph. Provision will also have to be made for the erection of a good shed, purchase of instruments &c, as laid down in the circular above referred to. The following list× will enable you to form an idea of the probable cost of establishment and feeding; changes doubtless being required in prices of articles and wages.

× adopted by the Anantapur District Board

	Rupees
Pay of 1st class vaccinator at Rs 18	216
Pay of a cooly for feeding calves at Rs 5	60
Cooly for bringing calves and returning them to owners at Rs 5	60
Hire of seven cows at Rs 2 each	168
Feeding at Rs 10 per month	120
Bed straw at Re 1 per mensem.	12
Shaving charges.	12
Occasional coolies to help on inoculation days at Rs 2 per month.	24
Postage at Rs 2 per month	24
Miscellaneous charges.	114
Batta to mothers.	10
Other contingencies and Miscellaneous.	300
Remuneration to vaccinators	200
Total Rs	1320

The most important matter as far as the Revenue Authorities are concerned is to see that proper arrangements are made for the regular supply of calves, without which the whole scheme will of course fall to the ground.

I have &c

(Signed) T. Balasundram
Manager and Assistant
for Inspector of Vaccination
& Dy Sanitary Commissioner
Madras.

Dated 22 August 1894
No. 4161.

From
The Assistant Inspector
of Schools, 8 Division

To
The Manager, Native High School,
Satyamangalam.

Sir,

It is observed that yours is an unaided School and unrecognised under the Madras educational rules. I should like to know what difficulties lie in the way of your School being placed on better basis than it seems to be. I make this enquiry with a view to make a better provision for lower Secondary education in the Satyamangalam Taluk than there is at present. I request therefore that you will kindly let me know the following particulars in regard to your School

(1) Invested fund.
(2) Sufficiency of furniture, apparatus and other appliances.
(3) Accommodation: whether rented or School's own and in what condition
(4) Staff: how far satisfying the education rules.

(5) Strength of each class.

2. I see that there is only one Upper Secondary form and that too weakly attended. A **pucka** middle School would be better than a poor High School.

3. In case you have no good hopes of maintaining your School long I should like to know if you are prepared to give it over to the Taluk Board with what property it has. As to the existing teachers such of them as satisfy the educational rules or can soon do so, may be recommended to be retained.

OFFICE OF THE ASSTT. INSPECTOR OF SCHOOLS, 8TH DIVISION,
HEAD QUARTERS, COIMBATORE,

26th March 1895.

No. 1586

FROM
THE ASSISTANT INSPECTOR OF SCHOOLS,
8TH DIVISION.

TO
THE PRESIDENT OF THE
Taluk BOARD,
Satyamangalam

SIR, Thro' the Inspector of Schools, Western Circle

I have the honor to return your endorsement No. $\frac{u}{23.11.94}$ regarding Lower Secondary Education in the Satyamangalam town with the following remarks. I should have forwarded them earlier but that I wanted to ascertain matters for myself which I did ~~a few days~~ some time ago when I had to visit the town.

2. Previous history of Secondary education in the town:

There existed a Government Middl School at Satyamangalam till 1878 when it was closed as I understand, not so much for short attendance as on account of its unsatisfactory condition resulting mainly from the dissentions among the teachers. The London Mission therefore opened a Middle School which they soon raised to the Status of a High School: Both these were aided institutions.

3. ~~But~~ The High School classes were found too costly and the Mission closed ~~it~~ them in 1884 retaining only the Middle School. Indigenous efforts were then made to have a high School and a Native High School was started with a Middle department attached to it. As a consequence of the rivalry resulting from this movement, the London Mission withdrew from their field of educational operations and closed their Middle School in 1886.

4. The Native High School thus left alone had a longer lease of life and was kept up till the close of the last year. Its equipment and organization, however, were so poor that it had to remain as an unaided and unrecognized institution all this period. Miserable was the instruction given and more harm than good was done to the School-going population.

5. I was alive to this unsatisfactory state of matters when I prepared my budget proposals for the Taluk Board for 1895–96 and addressed a letter to the manager (copy enclosed) offering to help him in what way I could in improving his School. It was further suggested that if he had no hopes of maintaining the School, he

when it was closed as I understand, not so much for short attendance as on account of its unsatisfactory condition resulting mainly from the dissentions among the teachers. The London Mission therefore opened a Middle School which they soon raised to the status of a High School: Both these were aided institutions.

3. ~~But~~ The High School classes were found too costly and the Mission closed ~~it~~ them in 1884 retaining only the Middle School. Indigenous efforts were then made to have a high School and a Native High School was started with a Middle department attached to it. As a consequence of the rivalry resulting from this movement, the London Mission withdrew from their field of educational operations and and closed their Middle School in 1886.

4. The Native High School thus left alone had a longer lease of life and was kept up till the close of the last year. Its equipment and organization, however, were so poor that it had to remain as an unaided and unrecognised institution all this period. Miserable was the instruction given and more harm than good was done to the School-going population.

5. I was alive to this unsatisfactory state of matters when I prepared my budget proposals for the Taluk Board for 1895-96 and addressed a letter to the manager (copy enclosed) offering to help him in what way I could in improving his School. It was further suggested that if he had no hopes of maintaining the School,

he might offer to hand it over to the Taluk Board, furniture and all. To this letter a reply was received after some months wherein the manager stated that he had closed the School.

6. Present State of education in the town:

There are now 4 Primary Schools in the town including the one maintained by the Taluk Board. Two of these are unrecognised and unaided. The Board School is the only institution that is kept up in a state of efficiency. It has 150 pupils on the rolls and they are more or less evenly distributed among the several classes. I examined it last month ~~some time ago~~ ~~a few days ago~~ with satisfactory results.

7. In addition to the School-going population distributed among these 4 Schools there are numbers of boys past the Primary stage of instruction idling away their time, whose parents are either unable or disinclined to send them to other places for continuing their studies. Coimbatore is the only place to which they could be so sent, but it is 42 miles off and unconnected by rail. Erode and Gopichettipalayam are nearer being 39 and 16 miles respectively, but unsatisfactory in the provision that exists in these places for Lower Secondary education.

8. Necessity for a Board Lower Secondary School:

In the interests, therefore, of the young boys passing out of the Primary School and in view of the out-of-the-way position of Satyamangalam it is very desirable that there should exist some provision for at least Lower Secondary education in the town. Its previous history points to the existence of such a want. It also shows that private enterprise is as yet unequal to adequately meet such a want. I would recommend therefore the opening of a first form class with effect from 1st April next.

9. The School may continue to be treated as vernacular as at present with English taught as an optional subject. If it be so treated the Taluk may levy what fee it deems fit from the 1st form pupils under article 8(d) of the fee-notification and I recommend that it be fixed at 8 annas a month.

0. The proposal would involve on the Board a net additional cost of Rs 60 a year as shown below:—

Receipts		Charges	Rs
From fees from a minimum probable number of 15 pupils	Rs 90	Pay of additional teacher at Rs 15 a month	180
		Results stipend for the same at 50 p. cent	50
From Provincial grants	100	Increased Contingencies etc	20
	Rs 190		250

11. I recommend that this additional net cost be met from the reserve funds. If it cannot be so done, the provision of the Kurumandur Board School, which is on the verge of closure from bad attendance and which has been recommended to be transferred elsewhere in this office No $\frac{3501}{25.7.94}$ may be utilized for the purpose. The Manager of the late High School has offered the furniture and apparatus of his School on condition that he be taken as 1st assistant hoping that a first grade middle school would get formed. I recommend the acceptance of the offer. He is a matriculate of experience and

in the town. Its previous history points

And can soon qualify himself for the Headmaster's place.
