JULY.

Municipal Report.

Reviewing the Anantapur — for 1894–95.

June 1895, No. 1286, consented to the transfer of the new police hospital to the Municipality on the condition that accommodation for the police is elsewhere provided. The council's proposals in this matter are awaited.

(4) *Vaccination and Vital Statistics.*—The total number of vaccine operations performed during the year rose from 383 to 466, but the quality of the work turned out showed a further retrogression, only 88·2 per cent. of the total number of cases having been successful against 90·3 in 1893–94. There was also a decline in the number of infants vaccinated, and the cost of each successful operation, though slightly less than in the previous year, was still double the general average for municipalities in that year. These poor results are attributed by the Medical Officer to the fact that the vaccinator had to perform the duties of registrar of births and deaths in addition to vaccination work during a portion of the year and to the unwillingness of the people to allow their children to be vaccinated. Every effort should be made to effect an improvement in the current year.

As compared with the previous year, the number of births registered was larger and the number of deaths fewer, but in neither case can the returns be regarded as at all complete and the subject demands the continued attention of the council. No improvement can be expected in this direction unless prosecutions are systematically instituted for failure to report these occurrences.

(5) *Sanitation.*—Nearly 98 per cent. of the allotment under this head was utilized and the expenditure amounted to almost 20 per cent. of the receipts. From paragraph 3 of the District Surgeon's report it appears that the council is devoting more attention to the sanitation of the town, but there is evidently considerable scope for improvement. In especial, the covering over of the existing drains should be prevented and householders made to clean out their cess-pools regularly instead of waiting till they become offensive. In this connection, the council's attention will be drawn to the Collector's remarks in paragraph 3 of his endorsement.

5. *General Remarks.*—The year closed with a balance of only Rs. 234, or 1·8 per cent. of the receipts.

In some respects the administration of the municipality showed an advance on that of the previous year, but other matters, such as sanitation, education, infantile vaccination and the registration of vital statistics demand the full attention of the council. The Government trusts that the present Chairman will spare no pains to improve the administration of municipal affairs.

(True Extract.)

J. F. PRICE,
Chief Secretary.

To the Chairman, Municipal Council, Anantapur.
" Collector of Anantapur.
" President, District Board, Anantapur.
" Accountant-General.
" Director of Public Instruction.
" Surgeon-General.
" Sanitary Commissioner.
" Sanitary Engineer.
Editors' Table.

Exd. C. M. Brisson.

the Chairman should remember that under the third paragraph the responsibility of fixing the assessments lies, in the first instance, upon him alone. Owing to the revision of the registers, the demand of the tax on buildings showed a slight increase but that of the tax on arts and professions remained almost stationary.

(2) The current collections under the taxes on arts and buildings were fairly good, but under the land-tax they were very poor, only 23·2 per cent. of the demand having been realized within the year. This result is ascribed to the delay consequent on the revision of the registers and to the fact that the collection of the tax was held in abeyance pending the disposal of an application from the ryots for remission. The arrears should now be collected without further delay. The arrear collections were better than in the previous year and were generally satisfactory.

(3) There was an increase in the receipts from school-fees and market rents, and a large advance in the revenue from tolls, which is ascribed partly to keen, if not reckless competition at the sale of the farm, and partly to the fact that the gates were leased out separately.

(4) The number of houses served by the private scavenging agency fell from 124 to 106 and the receipts from the source from Rs. 216 to Rs. 209, as compared with the previous year, but the system continued to be worked at a small profit to the council. With reference to the Chairman's remarks at the close of paragraph 26 of the report, the council's attention will again be drawn to the observations of the Sanitary Commissioner on this subject in his last inspection notes, and to the provisions of section 207 of the Act. If this latter section were enforced and the owners of insanitary premises were systematically prosecuted, it ought to be possible to extend the system of private scavenging much farther than it has been.

4. *Expenditure*—(1) *Public Works.*—No new work was undertaken during the year. The outlay on communications amounted to Rs. 511, or only 27·3 per cent. of the net municipal income from tolls, against the prescribed minimum of 50 per cent., the revised estimate itself only providing for an expenditure of Rs. 610. The town roads are, however, reported by the Revenue Divisional Officer to have been in fair order. The council should take into early consideration the Collecrtor's remarks in paragraph 3 of his endorsement regarding the many advantages that would result from the opening out of a direct road from the town to the railway station.

(2) *Education.*—The net expenditure on education was Rs. 726, or 10·2 per cent. of the income from taxation. Of this sum rather more than two-fifths was devoted to primary and the remainder to secondary education. As in the previous year, the municipal council maintained a high school on the salary system and a primary school for Muhammadans on the salary-result system. There was a marked improvement in the attendance at these institutions and the average cost of educating each pupil in the former fell from Rs. 36–11–2 to Rs. 5–7–0. No candidates were sent up for the Matriculation examination and neither of the two that appeared for the Lower Secondary examination was successful. From the results of the departmental examinations, the work done in the primary school also does not appear to have been satisfactory. The council continued to aid two primary schools with result grants. The strength of these schools showed a slight decline, the results of the grant examinations were poor, and more than 16 per cent. of the allotment for grants was allowed to lapse. The total number of boys under instruction in the municipal and aided schools, however, rose from 219 to 244, being 46·7 per cent. of the male population of school-going age. The sanction of Government is necessary for the alterations in the establishment of the high school referred to in paragraph 35 of the Chairman's report. A proposition statement in the prescribed form should be submitted without delay.

(3) *Medical Relief.*—The number of in-patients treated at the municipal hospital rose from 62 to 94, but there was a decline of 1,187 in the number of out-patients, which is explained by the District Surgeon in paragraph 5 (*d*) of his report. The midwife attached to this institution attended 101 cases of labour, against 87 in 1893–94 and 112 in 1892–93. With reference to paragraph 2 of the Collector's endorsement, it is observed that the Judicial Department has, in G.O., dated 17th

(5) Employment of a separate birth and death registrar and not entrust the vaccinator with that work, which recommendation has been adopted.

4. *Vaccination.*—Vaccination is compulsory in this municipality and the vaccinator works under the immediate supervision of the District Medical and Sanitary Officer. The total number of cases vaccinated during the year under report was 466 against 383 in the year previous, thus showing an increase of 83 cases. Of the cases vaccinated, 410 were successful, 28 unsuccessful and 28 unknown. Infantile vaccination under one year of age out of the total number vaccinated during the year amounted to 179 cases, of which 173 were successful and 6 unknown. The total number of births registered from 1st October 1893 to 30th September 1894 was 151, of which 102 were vaccinated, 22 left the town, 25 died and 2 were reported to the magistrate for non-compliance with the vaccination rules. Percentage of successful cases of primary vaccination being 97·14 and of re-vaccination 80·47. The average cost of each successful case was As. 9 against As. 9–10 in the previous year. The work of the vaccinator has been satisfactory; he had to perform the duties of registrar of births and deaths for four months in the year in addition to his own work. The vaccination is in a backward state in this town and surrounding villages. People are averse to it and do not produce their children for vaccination until they are served with notices.

5. *Hospitals and Dispensaries*—(*a*) *Nature and sufficiency of Accommodation.*—The present building consists of (1) main ward with eight beds, which was in the occupation of police sick till the 21st July 1894 when it was transferred to the municipality on their removal to the new building for the police near the railway station; (2) a small ward with four beds in continuation of main ward towards the west is used as office room for the District Medical and Sanitary Officer; (3) attached to this a small room in the verandah used as store room; (4) a small room behind the main building for two female patients, and a kitchen. There are two thatched sheds; one is for the accommodation of six patients and it was repaired during the year and the other close to the surgery for the examination of private cases. The surgery room is small and scarcely sufficient for the purpose.

(*b*) *State of repair of Buildings.*—The whole building was condemned on more than one occasion by the Surgeon-General with the Government of Madras and the Sanitary Commissioner on account of its situation being on a lower level than the large tank in close proximity, its being surrounded by paddy fields, and of the dilapidated condition of the building which is very old and leaks in several places during the rains. The question of construction of a new hospital has been under the consideration of the municipality since 1888. Plans and estimates were prepared and sites were selected in different places and abandoned for some reason or other and nothing has been done as yet to realize this long-felt want. Many patients were refused admission for want of proper accommodation.

(*c*) *State of repair of Furniture.*—The hospital furniture will require to be replaced soon, as the articles now in use are old and worn out. Bedding and clothing were provided during the year.

(*d*) *Number of Patients treated as compared with previous years.*—The total number of patients treated during the year under review was 9,987, of which 94 cases were in- and the rest out- patients

The following table shows the working of the institution for the last five years:—

Years.	In-door.		Out-door.	
	Total treated.	Average daily sick.	Total treated.	Average daily sick.
1890–91	81	3·11	12,071	125·68
1891–92	81	2·72	10,413	108·29
1892–93	68	1·85	9,906	112·26
1893–94	62	1·64	11,080	113·59
1894–95	94	3·57	9,893	74·18

From the above table it will be observed that there is an increase of 32 in- and a decrease of 1,187 out- patients in the year under report compared with that of the previous year. The increase in the number of in-patients is accounted for by eight more beds being available since 21st July 1894 when the police sick were transferred to the new building; and the falling off in the number of out-patients is partly due to less prevalence of malarial fevers during the year on account of the large tank in proximity of the town receiving a very limited supply of water and thus rendering the town less damp, and partly to the frequent changes of medical subordinates and also to the prevalence of cholera in the town during the months of August and September 1894 which prevented the neighbouring villagers from seeking relief at this institution.

(*e*) *Mortality and actual causes of it.*—There were five deaths during the year against five in the previous year, one death from extravasation of urine, one from chronic ulceration of rectum, one from septicæmia the result of retention of membranes, and one from chronic Bright's disease.

(*f*) *Operations and Results.*—There were 31 major and 312 minor operations performed during the year against 24 major and 318 minor operations during the previous year, and no deaths followed any of the operations.

(*g*) *Establishment whether sufficient and efficient.*—Establishment consists of one compounder, one midwife, one ward cooly, one cook, one peon and one toty. The services of a nurse are required to attend upon females and children.

(*h*) *Midwives.*—Midwife Marthai, who was qualified at the Government Lying-in Hospital, Madras, conducted 101 cases against 87 in the previous year, showing a slight increase of fourteen cases over the last year and giving an average of more than eight cases a month. Her work is verified by the Assistant to the District Medical and Sanitary Officer, but she is made to put herself in evidence in the town frequently and to try and secure as many cases as possible. Her work has been fair considering the minimum of seven cases required of the local fund midwives in larger towns and the great opposition met with from barber women who are permanently attached to families to attend confinement cases. Her services are called when there is delay and difficulty in the case. She is paid Rs. 15 a month irrespective of results. Two-thirds of her pay are met from local funds and one-third from the municipality.

(*i*) There is no separate ward set apart for gosha and caste women. Whenever caste patients are admitted raw rations are issued and caste principles are maintained.

(*j*) *General Remarks.*—Many works of public utility were not carried out by the municipality for want of funds. The undersigned was in charge of the institution during the whole year.

Anantapur,
21*st May* 1895. (Signed) H. M. HAKIM, Surgeon-Major,
District Medical and Sanitary Officer.

Submitted.

Paragraph 9 *of this report.*—The mahazarnama referred to was forwarded to the Anantapur Tahsildar for report, which is awaited.

Paragraph 31 *of this report.*—The condition of the roads in the municipality is fair.

Anantapur,

Divisional Officer.

Ref. on C. No. 1394.

Submitted.

2. To my mind the most pressing questions in Anantapur are—(*a*) the extension of the town westward towards the tract near the railway station, (*b*) the provision of a decent hospital.

3. The town at present is much too crowded and too close under the tank-bund; the turning of a petty village into a district head-quarters has aggravated the original objections to the site by unduly crowding the houses and people. Hence the almost total absence of backyards and the consequent sanitary difficulties in the way of private latrines and private scavenging alluded to by the Chairman; hence also the objectionable condition of some of the lanes in the early morning. When there is a good head of water in the tank *nothing* can prevent the water-logging of a foul soil; hence fevers and other diseases; moreover, the high tank-bund, which overtops the houses, tends to prevent the free perflation of air, so that the heat of the stagnant air is something intolerable in the narrow lanes and crowded houses. Westward there is a good deal of gravel soil, completely open to the breezes and with excellent water at a moderate depth. If the municipal council could make the long-talked-of direct road from the existing village to the railway station, people would more readily take up building sites near the station, especially as a new agraháram is already being formed there and the Police Reserve lines and other buildings are to be located there. If gravel areas near the station were taken up by the council, marked out in proper plan, and sold or leased as building lots, it would effect a great sanitary improvement.

4. The building of a decent hospital is hardly less important. There is a Resident District Medical and Sanitary Officer with an Assistant Surgeon, &c. Their skill is largely unutilized, because there is no proper hospital for in-patients, and operations have to be most warily and sparingly undertaken by reason of the absence of accommodation and the chances of septicæmia. If the site for the new hospital be finally settled and a liberal grant made from Provincial funds, it would be the greatest of boons to the country-side. If the site selected be the open ground westward of the town near the railway station, or, if the large new police hospital and buildings already erected there be taken up for the municipal hospital after making provision for a smaller one for the police, it would tend towards the extension of the town westward, alluded to in paragraph 3 *supra*.

Anantapur,
3*rd June* 1895. (Signed) F. A. NICHOLSON,
Collector.

Order—dated 24th July 1895, No. 1168 M., Local and Municipal.

The receipts and charges of the Anantapur Municipality for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

	Actuals, 1893–94.	Budget Estimate, 1894–95.	Revised Estimate, 1894–95.	Actuals, 1894–95.

2. Owing to the failure of the municipal council to elect a Chairman at three successive meetings held for the purpose, the privilege of election was, towards the close of the year, withdrawn from it, and Surgeon-Major H. M. Hakim, the District Medical and Sanitary Officer, was nominated Chairman by Government. Thirty-two meetings were held by the municipal council against 35 in 1893–94, but four others were adjourned for want of a quorum. There was a decline in the average attendance of the official members, which, however, continued to be fair, but that of the non-officials, though somewhat better than in the previous year, was still indifferent.

3. *Receipts.*—(1) In paragraph 3 (1) of its review on the administration report for 1893–94, the Government pointed out that the system adopted by the municipal council in that year of estimating the annual rental of lands at their actual revenue assessment *plus* water-rate was irregular, and directed that the tax should be levied in accordance with the principles laid down in the Act. The registers of the tax were accordingly revised during the year under review with the result that the net demand and the average assessment per acre rose from Rs. 254 and As. 7–5, respectively, to Rs. 370 and As. 10–10. They were, however, still far below the figures of 1892–93. From paragraph 9 of the Chairman's report it appears that there is now a proposal before the municipal council to revert to the system adopted in 1893–94 of assessing the annual rental and to frame a bye-law under section 65 of the District Municipalities Act to legalize this procedure. This is altogether inadmissible, as the principles upon which the annual value of buildings and lands should be assessed are specifically laid down in section 65 (1) and no bye-law can be framed in contravention of the provisions of the section. The law must be strictly observed by the council, and

SUBJECT.

Subm: the administration report of the Anantapur Municipality for 1894-95

24 July 1168 Ghat 1896

JUNE 1895, No. M., LOCAL AND MUNICIPAL.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From Surgeon-Major H. M. HAKIM, Chairman, Municipal Council, Anantapur, to the Chief Secretary to Government (through the Revenue Divisional Officer and the Collector of Anantapur), dated 23rd May 1895, Ref. on C. No. 106.

I have the honour to submit the following report on the administration of the Anantapur Municipality for the official year 1894–95, together with all the prescribed statements:—

I.—CONSTITUTION OF THE MUNICIPAL COUNCIL.

2. Statement X shows the names of the councillors who held the office of Chairman during the year under report. M.R.Ry. D. Jagannádha Ráo Pantulu Gáru, the Revenue divisional officer and Chairman elect, having been transferred from the district, handed over charge to M.R.Ry. T. Runga Rao Gáru, the Treasury Deputy Collector and then councillor, who was placed by the Collector in charge of the Revenue division. He continued in office till the 16th April 1894 when the Revenue divisional officer, M.R.Ry. P. Pundarikakshudu Pantulu Garu, joined the division and assumed charge of the municipal office as ex-officio Chairman. Three meetings were held thereafter for the purpose of electing a Chairman and as none of the candidates had the required number of votes, the matter was reported to Government, who were pleased to appoint, in their order, Mis. No. 1961 M., of 15th December 1894, the District Medical and Sanitary Officer, *i.e.*, myself, as Chairman and withdraw the election privilege conferred on the council in 1888–89. I took charge on the 29th December 1894.

3. The sanctioned strength of the council is twelve and it was full on the 31st March last.

4. The number of meetings actually held during the year was 32 against 35 in the previous year. Four meetings—two called in April, one in November, and the other in December—were adjourned for want of a quorum. The average attendance of the councillors at each meeting actually held was 5·9 as in the previous two years, that of the officials being 1·7 and of the non-officials 4·2 against 1·9 and 4·0 in the previous year, respectively. A statement showing the number of meetings attended by each councillor is herewith submitted. Election of councillors is not in force in this municipality.

II.—Receipts.

5. The following abstract compares the actuals of the year with the revised estimate and the actuals of the preceding year:—

Items.	Actuals of 1893–94.	Revised estimate for 1894–95.	Actuals of 1894–95.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.	Rs.
Balance brought forward	1,484	200	201	1	..
Tax on arts	1,231	1,300	1,289	..	11
„ on buildings	2,683	3,000	2,785	..	215

Interest on investments	99	90	111	21	..
Grants from Government	885	1,100	1,118	18	..
„ from Local boards	889	1,350	1,083	..	267
Other grants and contributions	100	1	..	..	..
Private scavenging fees	216	250	209	..	41
Refunds of expenditure of previous year	..	3	3	..	..
Fees for numbering carts	3	10	8	..	2
Other items	7	5	14	9	..
Advances recovered	2	2	2	..	..
Total ..	13,089	13,910	13,448	778	1,240

6. Inclusive of the opening balance, the receipts realized during the year from all the sources aggregated Rs. 13,448, against Rs. 13,910 and Rs. 13,089 — the amounts of the revised estimate and the actuals of the previous year, respectively. Compared with the revised estimate there is a net decrease of Rs. 462, which occurs under different heads, as explained below.

7. *Receipts from Taxation—Tax on Arts.*—The tax under this head was levied under all the classes of Schedule A of the Act. The list was revised as usual. The net current demand amounted to Rs. 1,303, of which Rs. 1,164–8–0 were collected and Rs. 63–8–0 written off the accounts as irrecoverable, leaving a balance at the close of the year of Rs. 75; of this Rs. 58 have since been collected and the rest are under prosecutions.

The arrears at the commencement of the year were Rs. 140–8–0, of which Rs. 124–2–0 were collected, Rs. 10–6–0 written off as irrecoverable. The balance of Rs. 6, which relates to two parties, is also under prosecution.

8. *Tax on Buildings.*—This tax was, as in the previous years, levied at 6 per cent. of the annual rental of the buildings. It was revised this year by a sub-committee appointed by the council for the purpose. The net current demand was fixed at Rs. 2,695–5–5, of which Rs. 2,526–5–11 were collected, Rs. 5–5–0 remitted on account of vacant houses and Rs. 28–12–6 written off as irrecoverable, leaving a balance of Rs. 134–14–0 at the close of the year. Of this Rs. 126–8–0 have since been collected, Rs. 2–3–0 remitted on account of vacant houses and Rs. 5–7–0 written off as irrecoverable, leaving a balance of As. 12 still to be collected and this is under prosecution.

I regret to record that there was a long delay on the part of the sub-committee in revising the tax, owing to which the demand could not be formally fixed earlier than the 10th September; but for this there would be no balance outstanding under this head.

The arrears at the beginning of the year amounted to Rs. 332–10–11. It was, according to the audit report, only Rs. 331–10–11, the difference of Re. 1 being due

to wrong totalling. Of this amount Rs. 258–12–5 were collected, Rs. 61–12–0 written off, leaving a balance of Rs. 12–2–6. Prosecutions were instituted against three parties for Rs. 11–4–0 out of this amount; and this leaves a remainder of Rs. 14–6, out of this again As. 6–6 were since realized and As. 8 written off. One of the defaulters paid up As. 6. The balance of Rs 10–14–0 is expected to be recovered before the close of the month, the cases being posted by the court for enquiry to the 27th instant.

9. *Tax on Lands.*—The current demand under this head, as originally fixed, amounted to Rs. 210. The assessment was fixed, as in the previous year, at $7\frac{1}{2}$ per cent. on twice the revenue assessment on the land, *plus* water tax, if any. But Government having, in paragraph 3 (i) of its order, No. 1154 M., dated 27th August 1894, objected to the percentage and to the mode of calculating the annual rental, for reasons given therein, the percentage was reduced to 6 with the sanction of Government—*vide* G.O., No. 1812 M., Mis., dated 27th November 1894. At the suggestion of the Tahsildar, Rs. 20 on every acre of wet land and twice the revenue assessment on dry lands was taken to be their annual rental. The demand thus revised amounted to Rs. 369–13–10, of which Rs. 85–8–2, which mostly relate to the first half, were collected, leaving a balance of Rs. 284–5–8. The revision of this tax, as above referred to, was adopted by the council in December 1894 and the necessary notification required by the Act was published in the District Gazette dated 15th January 1895. The demand could not therefore be fixed earlier than the 20th February. The service of notices was commenced in March, and before the expiry of the time allowed for taking steps for the recovery of the tax the land-holders of the place formed into an association and presented a mahazar to the council to reconsider the revised mode of assessment as it told hard upon the ryot population, especially so far as it related to 1894–95, as in that year almost 90 per cent. of the cultivable area was left barren, the tank solely on which depend these lands for cultivation not having received a supply. The matter has been referred by the council at its meeting of the 30th ultimo to the Deputy Collector, Anantapur, for his opinion, and pending the receipt of a reply, steps for the realization of the amounts are held in abeyance.

In the meeting of the 15th instant it was proposed by Councillor M.R.Ry. P. Audimúrthy Rão Gáru, on the analogy of section 64 of the Local Boards Act (V of 1884, Madras), that the same datum as was adopted in the year 1893–94 may be observed permanently year after year, showing by statistics of the past five years that, taking on an average, the original and the revised data will, in course of three years, prove to be the same, since in the former case the adversity of season will not be considered, whereas in the latter in the spirit of the section it should be.

The Anantapur tank receives a supply sufficient for cultivation only once in three years.

It was also proposed that this mode of calculating the annual rental of lands should be in the form of a bye-law under section 65 of the Act. The matter was deferred for further discussion and when finally disposed of will be submitted to Government for sanction. But meanwhile in view to the early adjustment of the arrears of this tax, I beg respectfully to request that Government may be pleased to favour the council with its views on the subject. The figure under this head in the revised estimate for the year under report is Rs. 900, instead of Rs. 700. The difference of Rs 200 is partly due to miscalculation and partly to waste lands also having been erroneously taken to account in calculating the municipal assessment. The extent of land assessed by the municipality is 547 acres, 19 viss, 2 cuntas, as in the previous year. Vacant house-sites are, as usual, charged at 2 annas per eighty square yards. The arrears at the beginning of the year amounted to Rs. 361–10–5, of which Rs. 320–14–4 were collected and Rs. 29–9–4 written off, leaving a balance of Rs. 11–2–9.

10. *Tax on Vehicles and Animals.*—The income from these two sources, aggregating Rs. 358–12–0, fell short of the revised estimate and the actuals of the preceding year by Rs. 41–4–0 and Rs. 46–4–0, respectively. The decrease under tax on animals is due, it is said, to cattle belonging to poor ryots having been kept in other villages where fodder was available cheap.

11. *Tax on Carts*.—The actuals exceeded those of the previous year and the revised estimate by Rs. 63 and Rs. 26–8–0, respectively.

The increase is apparently due to some of the poor ryots having kept carts for hiring them and thereby earning their livelihood, since for want of a supply to the tank, as already stated, there was no cultivation.

12. The number of distress warrants issued during the year was 122 for Rupees 250–6–0 against 183 in the previous year for Rs. 482–8–11. Together with those remaining unexecuted at the commencement of the year the number for execution came up to 253, the amount involved being Rs. 485; of these 229 were either cancelled or executed and Rs. 453–13–4 realized, thus leaving a balance of 24 at the close of the year for Rs. 31–3–0. One of these issued for As. 8 was since cancelled, the amount being written off. Twenty-two for Rs. 30–7–0 executed and one for As. 12 having been returned unexecuted, there having been no property for distraint, a prosecution was instituted against the party concerned.

13. *Tolls*.—The privilege of collecting tolls during the year under report was leased out for Rs. 2,495, which, compared with the actuals of the previous year, shows a heavy increase of Rs. 1,315 and may be ascribed partly to reckless competition and partly to each of the toll-gates having been separately leased out. The number of toll gates was four. The general incidence of taxation per head of population (6,994) was Rs. 1–0–3 including tolls and As. 11–11 excluding them, against As. 13–7 and As. 11–7, respectively, in the preceding year.

14. *Fees under Act II of* 1888.—The actuals show an increase of Rs. 70 over the revised estimate of Rs. 30 and it is due to a circus party having been granted permission for erecting a pavilion for three days.

15. *Rent of Lands, Buildings, &c.*—The decrease is too small to call for any remarks.

16. *Sale-proceeds of Lands, Gardens, &c.*—The aggregate income under this head, which includes items (*b*) (i), (ii) and (iii), is very much the same as in the previous year and falls short of the revised estimate by Rs. 57, the large decrease occurring under "Produce of lands, gardens." It is due to the failure of crops raised in the Jubilee Park from want of water for irrigation. Of late, the park has proved itself an utter failure as it depends for its irrigation solely on the tank, which receives a good supply only once in two or three years. There is a large well in the park which could maintain the sundry crops at least, but unfortunately all its side revetment gave way and dropped into the well. The municipality cannot undertake to put it in order from the heavy cost of about Rs. 300 which it may involve it in. In consideration of these circumstances Mr. Nicholson, the Collector, suggested that either some of the lands forming the park may be sold, and with the funds thus obtained the remaining portion improved, or a portion of the park may be utilized for building the proposed municipal hospital. The council acquiesced in the former suggestion, but further action in the matter is deferred pending the settlement of a site for the proposed municipal hospital, which is now before the medical authorities for decision.

17. *Conservancy Receipts*.—There was more rubbish accumulated during the year under report than in the two previous years. The income was expected to be more than the revised estimate, but for want of a good demand for manure, the tank not having had a sufficient supply and consequently cultivation having been carried on to a limited extent, the actuals fell off the revised estimate by Rs. 30.

18. *Fees from Educational Institutions*.—The receipts under this head amounted to Rs. 1,931–12–0, viz., Rs. 1,893–6–3 from the high school and Rs. 38–5–9 from the Muhammadan salary-result school. Seeing the sad state of the high school when the revised estimate was framed in that all the matriculation class boys abandoned the school and the strength of the other classes was also gradually reducing, in the revised estimate credit was taken for Rs. 1,300 against Rs. 1,712 of the previous year. This misfortune to the school, it is said, was consequent upon the Government Order suggesting to the Director the advisability of abolishing the upper secondary department of the school. But the one since received, sanctioning the retention of

the high school and granting a munificent aid, and the appointment of an M.A. and a B.A. as headmaster and second assistant of the school, respectively, allayed the apprehensions of the public regarding the abolition of the school and was an inducement, not only to the pupils who unavoidably left the school to rejoin it, but for others also. There was thus an increase of income under this head over the revised estimate by Rs. 600 nearly. In this connection I should express my sincere thanks to the Inspector of Schools for the pains and interest he has taken in bringing the school to its present status and in securing qualified teachers for the vacancies.

19. *Sale-proceeds and Composition Fees of Medicines*.—The actuals show a decrease of Rs. 25 below the revised estimate. This is due to a few old bills for medicines dealt out to some of the itinerant survey officials of the temporary section whose whereabouts are not known and to persons drawing a small pay of Rs. 15 and 20 having had to be written off the accounts.

20. *Income from Markets and Slaughter-houses*.—The actuals fell off the revised estimate by Rs. 11. This is due to the slaughter-house contractor not having paid the last month's kist within the close of the year. It was collected in April.

21. *Other Fees*.—The net decrease in the actuals compared with the revised estimate amounts to Rs. 15—Rs. 9 under distraint fees and Rs. 6 under license fees; the former is due to there not having been as many cases for distraint as were expected from the dilatory habits of the taxpayers, and the latter to the closing of two oil-boiling houses, upon each of which the prescribed fee of Rs. 3 would have been collected.

22. *Fines under Municipal and other Acts*.—Year by year there has been a remarkable decrease of revenue under this head. The actuals fell off the revised estimate by Rs. 2[illegible] nearly, and it is due to the unsatisfactory state of law relating to nuisances, under which several cases get off scot-free, rendering the expensive municipal arrangements in regard to sanitation practically useless.

23. *Interest on Investments*.—Owing to the conversion of the 4 per cent. stock notes into 3½ per cent. ones, the difference of interest on these notes at the rates was paid by Government which accounts for the increase of Rs. 20 over the revised estimate.

24. *Grants from Government*.—The decrease below the revised estimate is too small to call for any remarks.

25. *Grants from Local Boards*.—The actuals under this head amounted to Rs. 1,082–10–0; deducting from this, as was done in the revised estimate, the contribution of Rs. 59–14–0 paid to the district board on account of the hospital for the first time during the year under report, there results a net decrease of Rs. 327–4–0 which is due to the non-adjustment to the credit of this municipality within the close of the year of the district board contribution towards the hospital for February 1895.

26. *Private Scavenging Fees*.—The actuals came up to Rs. 209, against Rs. 250 and 216, the amount of the revised estimate for the year and the actuals of the preceding year respectively. Year after year the bills relating to closed latrines were being shown under balance and the number of such latrines included in the figure given in Statement XI. There was scarcely any case in which the balance was collected.

As this procedure always gave rise to incorrect statistics, in the year under report such of the bills as aforesaid were cancelled and only collectable items shown under balance. The balance under this head was Rs. 10–11–0 and this has since been collected. The number of latrines on 31st March last was 106 against 124 in the preceding year, which included 15 latrines that were actually closed in the last quarter. Almost all the houses peculiar to this town are so constructed that there are no open spaces attached to them for opening latrines, and where there happens to be any there is sure to be a well, in close proximity whereof latrines shall not be kept. Notwithstanding, their number can be larger than 106, but for the necessity of the house-owners to attach privies to their houses where it can be done without violating sanitary regulations being obviated by the lenient section of the Nuisance Act which so runs as to make the commission of nuisances on any public street, lane

or thoroughfare alone an offence and the people consequently resorting to the fields close to their houses. During the year under report this facility was the more owing to most of the fields having been left uncultivated for want of water. It is a vain expectation that in this municipality the private scavenging system can be extended.

27. *Refunds of Expenditure of previous year.*—Out of Rs. 2–14–0, Re. 1 was the amount paid to a local merchant in 1892–93 in excess by a mistake in the total of the bill, and Rs. 1–14–0, the demurrage paid on a railway parcel received from Madras and refunded by railway authorities as it accrued owing to the neglect of the station-master.

28. *Other Items* (6) (*b*) (iv).—The following items make up the amount of Rs. 14–1–3 shown under this head:—

	Rs.	A.	P.
(1) Penalty on overdue kists imposed on market contractor ..	5	0	0
(2) Portion of Rs. 16–8–0 remitted by Mr. K. C. Manavedan Raja as animal and vehicle tax for 1894–95, first half, the head of credit for Rs. 3 being unknown and no reply having been received even after repeated reminders	3	0	0
(3) Excess collections of house, land and profession taxes for 1892–93 and 1893–94 not claimed	5	13	3
(4) Portion of house-tax appeal deposits ordered by the council to be refunded to appellants in 1892–93—whereabouts of parties unknown	0	4	0
Total ..	14	1	3

III.—Expenditure.

29. The subjoined abstract exhibits the expenditure during the year under different heads as compared with the revised estimate of the year and the actuals of the preceding year:—

Heads.	Actuals of 1893–94.	Revised estimate for 1894–95.	Actuals of 1894–95.	Increase.	Decrease.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Grant I, Public Works—					
2. Repairs—

Savings bank	6 15 0	..	7 5 0	7 5 0	..
Total Expenditure ..	12,887 12 0	13,540 0 0	13,214 2 11	549 14 2	875 11 3
Grand Total ..	13,089 6 9	13,910 0 0	13,448 7 9	..	..

30. The total expenditure during the year amounted to Rs. 13,214–2–11, against Rs. 13,540 the amount of the revised estimate, and Rs. 12,887–12–0, the actuals of the preceding year.

Such of the items as ~~under which~~ remarkable variations, as compared with the revised estimate, occur, are explained below:—

31. *Repairs*—(*a*) *Communications.*—Out of the allotment of Rs. 610 in the revised estimate only Rs. 511–4–5 were actually spent in the year. More than the unexpended portion (98–11–7) should have been spent had the road which had almost been completed by the contractor been given over by him in good condition before the close of the year, as first promised.

32. (*a*) *Buildings.*—The actual expenditure under this head when the revised estimate for the year was framed amounted to Rs. 112–0–11, but an allotment of Rs. 140—*i.e.*, nearly Rs. 28 more than what was then spent—was made for executing sundry repairs to the high school building, but the cost was not incurred, it having shortly thereafter been decided that the school building should be demolished at once for erecting a new school-house on the site.

33. (*d*) (*i*) *Repairs to Waterworks.*—There is a falling off in the actuals below the revised estimate by Rs. 6–13–0. This amount was intended, it appears, for the construction of a masonry drain round the Garabhávi to carry off the surplus water, but was not utilized as the work was undertaken and paid for by Councillor, Mr. Imam-ud-din Saib, who had also the kindness of getting a masonry cistern built in the vicinity of the well for the surplus water to be diverted into, as suggested by the District Medical and Sanitary Officer.

34. *Tools and Plant, &c.*—Out of the allotment of Rs. 10 only a paltry sum of As. 6 was spent for buying one small spade. The rest was not utilized, there having been no necessity for tools, the road repairs having been given over on contract.

35. *Municipal School on Salary System*—(*a*) *Establishment.*—The actuals exceed the revised estimate by Rs. 98 nearly. It is due to the reduced scale of the school establishment having been brought to effect, at the request of the schoolmasters, from the 18th February, instead of from January 1895, as was proposed at the time of framing the revised estimate.

(*b*) *Contingencies.*—The increase of Rs. 66 over the revised estimate is due partly to the purchase of some class-books and partly to the unforeseen charge of purchasing a set of physical apparatus for the school at a cost of Rs. 54, it having been desired by the Director of Public Instruction, in his Proceedings, No. 2447, dated 2nd March 1895, that the school should be provided with the necessary apparatus without delay.

The scale of the high school establishment given in Statement II-B shows a deviation from that sanctioned in G.O., No. 425 M., Mis., dated 13th March 1895, in the case of the second and third assistant masters, whose pay as sanctioned should be Rs. 40 and 30, respectively. But Rs. 50 and Rs. 40 are entered—the former with the sanction of the Director of Public Instruction, the Inspector of Schools having expressed his inability to obtain a qualified graduate for the second assistant's post for less than Rs. 50, and the latter by the council itself in consideration of the long and faithful service of the third assistant, V. Komarasamy Iyer, a Government servant. An application for the additional allotment thus required will be submitted to Government soon after the receipt of the salary-grant application from the Director of Public Instruction to whom it was submitted for favour of sanction.

36. Deducting the actual amount of Provincial grant received and the school fees realized during the year, the net expenditure borne by the municipality for maintaining the high school amounted to Rs. 402–4–1, Rs. 627–12–8 for the upper secondary, and Rs. 225–8–7 for the lower secondary, department. The average net cost per pupil in each department was as detailed in the margin. The large decrease in the net cost is due to the larger income for reasons given in paragraph 18 *supra*, and to a reduction in the expenditure, the place of the headmaster having been vacant for the major portion of the year, and latterly also to the introduction of the

	1893–94. Rs. A. P.	1894–95. Rs. A. P.
Upper Secondary Department ..	87 15 3	23 4 0
Lower Secondary Department ..	9 10 2	4 12 9

reduced scale from February 1895. The strength of the school on the 31st March 1895 was 100 and the average attendance throughout the year showed much improvement, being 74 in the year under report against 56 in the previous year. But it is a matter for regret that, for reasons given in paragraph 18, there was no matriculation at all in the latter part of the year and in the lower secondary department only two candidates presented themselves for examination and even they failed. It is expected that under the existing arrangements in the current year the school will show satisfactory results. The instruction imparted in gymnastic exercises was, as usual, good. There was no addition made to the library. The educational statements received from the Assistant Inspector of Schools are submitted herewith. Of the figures given therein those under (1) "Grants from Government," and (2) "Fixed salaries" relating to the upper secondary department are incorrect. The former shows an increase of Rs. 4–4–1, which is the amount of grant drawn on behalf of two masters and refunded to Government on the objection of the Accountant-General that it was not supported by proper authority. The latter shows an increase of Rs. 2–6–9, which is the amount of fine imposed on and recovered from the acting headmaster and should have been deducted from the cost of establishment. The educational statements were corrected accordingly and the matter intimated to the Assistant Inspector of Schools for his information and guidance. In these statements the figures relating to the primary department are given, but as I think that it is incorrect they are not included in Statement V–A, for, till 1st April 1895, since when this department was sanctioned by Government to be re-attached to the high school, it had no concern with the municipality, but was working like a private school, in view to the preliminary arrangements being made so as to commence work from 1st April.

37. *Municipal School on Salary-results System.*—The actual expenditure amounted to Rs. 129–8–10, against the revised estimate of Rs. 150; the decrease occurring under results grants and contingencies. The year under report was the first one the present trained teacher was in charge of the school and consequently the number of pupils expected to be eligible for grant could not be got up. The allotment of Rs. 10 under contingencies was made in the revised estimate for supplying the school with Hindustani maps of the district and of the Presidency and for stationery, &c.; the former, the teacher reports, will not be available for some time more, being in print. Hence the decrease in the expenditure under this head.

38. *Results-Grants.*—The actuals show a decrease of Rs. 41 and Rs. 71, compared with the revised estimate and the actuals of 1893–94 respectively. It is due to the bad results produced by the lower primary department of the two pial schools at the grant examination.

39. *Hospitals and Dispensaries.*—The expenditure under this head amounted to Rs. 3,092–12–2, against Rs. 3,030 and Rs. 1,528–1–11, the amount of the revised estimate and the actuals of the previous year respectively. The items under which large variations occur are explained below.

40. *Establishment.*—The actuals, being slightly in excess of the revised estimate, call for no remarks. The decrease of Rs. 100 nearly below the actuals of the previous year is due to the 1st-class hospital assistant having been replaced by a 3rd-class officer.

41. *Medicines and Supplies.*—The actuals fell short of the revised estimate by Rs. 57, which is owing to an error in calculating Indian money on £26–18–0 then due to Messrs. Burgoyne, Burbidges and Co, London. All the arrear bills have been paid up.

42. There is an increase of Rs. 32 under "Diet of patients" and Rs. 36 under "Sundries and contingencies." Both these items should be taken together, since in the latter are included extras which form part of diet. This increase of Rs. 68 is due to larger admissions of in-patients than was expected at the time of framing the revised estimate.

43. *Contributions to Local Boards.*—As stated in paragraph 25 *supra*, in the revised estimate the amount of contribution expected to be paid to the district board was deducted from the hospital contribution expected from it. The revised estimate is therefore *nil* against this item.

44. Ninety-four in, and 9,893 out, patients were treated in the hospital during the year, against 62 and 11,080, respectively, in the previous year. The increase in the latter is due to more accommodation having been available for the admission of in-patients owing to the removal of the Police hospital to the building newly constructed for it. There is a large decrease of 1,249 in the number of out-patients treated for reasons explained by the District Medical and Sanitary Officer in his report, which is also submitted herewith. The work of the midwife showed some improvement, the number of labour cases attended by her in the year having been 101 against 87 in the previous year. During the year, bedding and clothing were supplied to the hospital as also the almirah referred to in paragraph 4 (3) of G.O., No. 1151 M., dated 24th August 1894. The construction of a new hospital had to be postponed owing to difference of opinion as to the site best suited for the purpose. The District Magistrate and the Police authorities were requested to hand over to the municipality for its hospital the newly-built Police hospital building. These two questions are yet pending.

45. *Contribution to Provincial Funds.*—The amount of revised estimate, *i.e.*, Rs. 100, was based on the usual budget figure. The actuals show an increase of Rs. 33 and they were paid as per Accountant-General's advice.

46. *Vaccination.*—The establishment was as usual. Compared with the revised estimate there was a saving of Rs. 9–8–0 under contingencies, but the actuals of the year exceeded those of the preceding year by Rs. 18 nearly. This is due to an increase of 83 in the number of operations made in the year over those in the year 1893–94. The average cost of each successful operation consequently fell from Annas 9–10 to Annas 9. Compared with the birth-rate the work of the vaccinator must be said to be satisfactory as rightly observed by the District Medical and Sanitary Officer, who has the direct supervision of the work. Seventeen prosecutions, against eleven in the previous year, were instituted for failure to have children vaccinated. The detail results of operations are given in the accompanying report of the District Medical and Sanitary Officer.

47. *Registration of Births and Deaths.*—The amount in the revised estimate under Establishment was Rs. 30, but that sanctioned by Government in order, Mis. No. 660 M., dated 10th May 1895, was Rs. 24. The actuals are by about Rs. 2 below this figure, the appointment of the death and birth registrar having been made after a few days had elapsed in December instead of from 1st December as expected.

The allotment of Rs. 10 under contingencies could not be utilized, the required forms not having been supplied within the close of the year. During the year 207 births and 102 deaths were registered against 149 and 117, respectively, in the previous year, and the birth and death rates per mille were 29·6 and 14·5 against 21·3 and 16·7. As in the previous year, there were no cases of failure to register births or deaths.

48. *Conservancy and Road-cleaning.*—The only variation calling for remarks occurs under Establishment, the decrease of Rs. 29 being due to the savings in the pay of the conservancy inspector. The large increase above the actuals of the preceding year is due to there having been a separate conservancy inspector on Rs. 25 instead of the Public Works overseer looking after this work also drawing a horse allowance of Rs. 10 per mensem as was the case in the previous years.

49. As in the previous years, the number of public latrines was eight (three for males and five for females). Of these, four are built with brick, one with stone, and the rest with sun-dried mud brick. There were no alterations or improvements made to them in the year. Dry-earth was used in all of them.

50. For reasons given in paragraph 26 the number of private latrines on 31st March 1895 was 106 against 130 in the preceding year. These were cleaned twice a day and the work was supervised by the conservancy inspector.

The cost of private scavenging establishment, consisting of three scavengers, was Rs. 198 as in the previous year. During the year the service was worked at a net profit of Rs. 11–2–4 against Rs. 18–6–0 in the previous year.

51. *Lighting.*—The actuals under contingencies exceed the revised estimate by Rs. 26, due to the obtaining of spare burners, chimneys and wick from Madras, as they were sold here at nearly double the cost.

52. *Public Garden.*—The net difference under this head is too small to call for any remarks. The decrease of expenditure under Establishment is due to the savings in the pay of the second gardener.

53. *Rewards for destruction of Wild Animals.*—The decrease of about Rs. 3 is due to there not having been as many stray dogs destroyed in the year as was originally expected.

54. *Printing.*—The decrease of Rs. 45 in the actuals compared with the revised estimate is due to the bills for printing proceedings of February and March not having been received for payment till after the close of the year.

55. *Other Items.*—Rs. 81-14-3 under this head is made up of the following items :—

		Rs.	A.	P.
(1)	Remuneration for preparing a sketch of the park	5	0	0
(2)	Assessment on lands forming the Jubilee park	64	2	9
(3)	Miscellaneous—			
	(i) Fees for numbering carts	10	8	6
	(ii) Tom-toming notices	2	3	0
	Total ..	81	14	3

The decrease of Rs. 8 under this head is due to the sign-boards of streets not having been replaced during the year under report.

56. The only item under Grant V requiring an explanation for its variation is (*d*) Office contingencies other than (*b*) (ii). Compared with the revised estimate the actuals show an increase of Rs. 124 and it is mostly due to the payment of the following items, which were not anticipated at the time of framing the revised estimate :—

		Rs.	A.	P.
(1)	Rent of Rs. 3-4-0 a month from June 1894 on the Government building occupied by this office	28	9	7
(2)	Charge for advertising the vacancy of the clerk's post of this office as resolved by the council	10	0	0
(3)	Printing municipal account forms in 1894-95	75	10	2
	Total ..	114	3	9

57. *Instalments paid during the Year.*—The district board paid to the municipality a contribution of Rs. 2,000 for the purpose of building a new school-house. This amount had to be refunded to them, the construction of the building having since been undertaken by Government. Towards the liquidation of this amount the council proposed to pay back to the district board the whole monthly contribution and consequently Rs. 1,020 was allotted under this head in the revised estimate, but circumstances having changed, the council, with the consent of the district board, so modified its resolution as to pay Rs. 50 a month for the purpose. Hence the large decrease below the revised estimate.

58. *Refunds of other than current Collections.*—In the year 1892-93 Government entrusted the municipality with Rs. 264 for constructing a temporary dead-house attached to the municipal hospital. Only Rs. 128-11-4 were spent for the purpose and the balance of Rs. 135-4-8 was appropriated for municipal purposes and had to be repaid during the year under report without delay at the instance of the Accountant-General though the charge was not included in the revised estimate. Rs. 3 is the profession tax paid in 1893-94 by Mr. Story, the Salt and Abkári Inspector, Anantapur. It was refunded to him by the council on his proving by his diary that he did not exercise his profession in the municipality for 60 days in the half-year, as required by section 55 of the Act.

Building Fund.—The amount shown under this head in Statement II for 1893-94 was Rs. 4,000. It should have been only Rs. 800, since the amount of Rs. 3,200 shown in that statement under "Refunds of other than current collections," being a portion of the building fund, should have been deducted from it. This correction has been made in the current year's statement. Hence the reduction of the *minus* balance from Rs. 3,798-5-3 to Rs. 1,034-4-10.

59. The year closed with a balance of Rs. 234-4-10 against Rs. 201-10-9 in the previous year. The former should have been more had the district board contribution due for February been paid before the close of the year.

60. *General Remarks.*—During his last inspection of this municipality the Sanitary Commissioner made certain remarks and suggestions. Detail replies were noted against each of them and the report submitted to Government. But as Government remarked in their review on the last administration report that the action taken by the council on the suggestions should be dealt with fully in the report, I beg to add them here. The Executive Engineer, to whom was referred the question of diverting the sub-soil water under pressure from the tank or at least keeping it within definite bounds, says that it can be done only by removal of tank, town, or wet cultivation, and there is, in fact, nothing possible for the council to do in the matter.

The suggestion of declaring the tank to be reserved for drinking purposes and guarding it against pollution is being attended to. The Police authorities have been requested to watch this and the Bellary bridge and rigorously prosecute such persons as commit nuisances there. The tank is just receiving a supply and when it receives sufficient for drinking purposes a watchman will be entertained for it.

The drain which took its rise near Garabhávi and flowed a long distance through the street has been put a stop to by the construction of a masonry drain round the Garabhávi so as to carry off the surplus water to a cistern constructed close by for the purpose.

Anki Obannah, who signified his willingness to the Sanitary Commissioner, as mentioned in his notes, of keeping in repair the well called Charumallappali's well, has been requested to do so with the promise of designating it after his name. He had not done anything in the matter, and as it is not obligatory on him, if he does not do it the council will undertake it when funds are available.

The removal of night-soil in baskets having been remarked as objectionable, iron sanitary buckets with moveable covers were obtained and supplied to the toties in December last.

Designs of Donaldson's patented latrines have been obtained and their adoption will be considered when funds are available. In conclusion I respectfully beg to submit that it is not a matter Government is unaware of that this municipality has no funds to spare for anything beyond the up-keep of the present arrangements. The receipts are just sufficient to meet the expenditure. The municipality is burdened with a heavy debt of Rs. 2,500 nearly, and, even arranging the expenditure on the most economical data, it would be full six years before the debt could be liquidated, and till that time all the endeavours of the council to carry out the suggestions of the Sanitary Commissioner and the District Medical and Sanitary Officer, who have not considered the finances of the municipality in making their suggestions, will be in vain.

61. A copy of the council's resolution approving the report is herewith submitted.

ENCLOSURE.

ADMINISTRATION Report on the working of the Municipal Hospital, Anantapur, for the official year 1894-95.

1. *Public Health.*—The health of the town during the year under report has been good. A mild epidemic of cholera broke out in the month of August 1894. It was imported from neighbouring villages, where it prevailed in an epidemic form. It assumed a sporadic form towards the beginning of September and subsided by the

second week of that month. The total number of seizures was fourteen with four deaths. All precautionary measures were adopted to prevent the spread of the disease and met with willing co-operation of the then Chairman. Fever prevailed to less extent than the year previous, being 863 against 2,142 in the previous year. The prevalence of fevers is more or less concomitant with the supply of water in the tank and the amount of wet cultivation carried out and is directly due to the raising of the sub-soil water. Many devices have been proposed but found not feasible or too expensive, and I am afraid could be only obviated, as the Executive Engineer facetiously remarks, by the removal of tank, town or wet cultivation.

2. *Vital Statistics.*—There were 207 births and 102 deaths registered during the year against 142 births and 117 deaths in the previous year. Cholera 6, small-pox *nil*, fevers 38, bowel complaints 1, all other causes 57. There were frequent changes in the post of registrar of births and deaths. Bill-collectors, vaccinator and peon were employed on this important work, which cannot be considered to have been satisfactorily carried out, but there has been visible improvement since the permanent employment of a man for the post.

3. *Sanitation.*—(1) The conservancy staff consists of one inspector, two peons, fourteen sweepers, three private scavenging toties and eight public latrine toties and four carts (three rubbish and one night-soil cart). The night-soil cart is old and of obsolete pattern and will have soon to be replaced by one of approved pattern.

(2) The street sweepings and house refuse are collected in dust-bins and carted daily to the rubbish depôt situated about a mile-and-a-half on the northern side of the town along the Gooty road, and the night-soil from 8 public and 106 private latrines is removed in an iron covered cart and buried in trenches close to the rubbish depôt. The latrines are mere enclosures and none of them are provided with seats. Three are of mud, four of brick and one of stone. Dry-earth is being used, but hardly efficiently at all times and much less during the wet months. The municipality are trying hard to find ways and means for the construction of covered latrines, but I am afraid it will take years before the object is realized. Only a limited number of people resort to these latrines and a greater portion go to fields.

(3) *Drainage.*—There is no proper system of drainage. The main streets are provided with side-drains lined with rough stones to carry away surface and storm water to the adjacent fields, but they are built over by owners of houses and are therefore difficult of access for cleaning. Small streets and lanes have side cuttings. Every house has one or more covered cesspools and they are cleaned only when full and choked or the smell emanating from them is very offensive. These cesspools are the sources of great danger to the drinking-water wells which are close to the dwelling-houses. Steps are being taken to enforce the construction of cesspools of impermeable material whenever permission is sought to repair the old one or open a new one.

(4) Drinking-water is obtained from a large tank and twelve wells. The tank water, which is generally much polluted by washing and bathing, is used chiefly by Brahmin and Komti communities and this source of water-supply is very limited. Of the twelve good-water wells "Garabhavi" is much used for drinking purposes and it was cleaned of its silt and a cemented cistern was constructed to receive waste water which is daily removed. With the exception of a few wells all are provided with parapet walls, and notice boards are fixed warning people from contaminating them.

(5) The following suggestions were made by the District Medical and Sanitary Officer and adopted by the municipality:—

(1) The toties were provided with covered iron buckets to remove night-soil from houses and latrines.

(2) Building of pucca latrine with roof and seats, but this was postponed owing to want of funds.

(3) Repairing the meat market and having the floor with Cuddapah slabs which is under consideration.

(4) Entertainment of a trained sanitary inspector was suggested and is under consideration.

(5) Employment of a separate birth and death registrar and not entrust the vaccinator with that work, which recommendation has been adopted.

4. *Vaccination.*—Vaccination is compulsory in this municipality and the vaccinator works under the immediate supervision of the District Medical and Sanitary Officer. The total number of cases vaccinated during the year under report was 466 against 383 in the year previous, thus showing an increase of 83 cases. Of the cases vaccinated, 410 were successful, 28 unsuccessful and 28 unknown. Infantile vaccination under one year of age out of the total number vaccinated during the year amounted to 179 cases, of which 173 were successful and 6 unknown. The total number of births registered from 1st October 1893 to 30th September 1894 was 151, of which 102 were vaccinated, 22 left the town, 25 died and 2 were reported to the magistrate for non-compliance with the vaccination rules. Percentage of successful cases of primary vaccination being 97·14 and of re-vaccination 80·47. The average cost of each successful case was As. 9 against As. 9–10 in the previous year. The work of the vaccinator has been satisfactory; he had to perform the duties of registrar of births and deaths for four months in the year in addition to his own work. The vaccination is in a backward state in this town and surrounding villages. People are averse to it and do not produce their children for vaccination until they are served with notices.

5. *Hospitals and Dispensaries*—(*a*) *Nature and sufficiency of Accommodation.*—The present building consists of (1) main ward with eight beds, which was in the occupation of police sick till the 21st July 1894 when it was transferred to the municipality on their removal to the new building for the police near the railway station; (2) a small ward with four beds in continuation of main ward towards the west is used as office room for the District Medical and Sanitary Officer; (3) attached to this a small room in the verandah used as store room; (4) a small room behind the main building for two female patients, and a kitchen. There are two thatched sheds; one is for the accommodation of six patients and it was repaired during the year and the other close to the surgery for the examination of private cases. The surgery room is small and scarcely sufficient for the purpose.

(*b*) *State of repair of Buildings.*—The whole building was condemned on more than one occasion by the Surgeon-General with the Government of Madras and the Sanitary Commissioner on account of its situation being on a lower level than the large tank in close proximity, its being surrounded by paddy fields, and of the dilapidated condition of the building which is very old and leaks in several places during the rains. The question of construction of a new hospital has been under the consideration of the municipality since 1888. Plans and estimates were prepared and sites were selected in different places and abandoned for some reason or other and nothing has been done as yet to realize this long-felt want. Many patients were refused admission for want of proper accommodation.

(*c*) *State of repair of Furniture.*—The hospital furniture will require to be replaced soon, as the articles now in use are old and worn out. Bedding and clothing were provided during the year.

(*d*) *Number of Patients treated as compared with previous years.*—The total number of patients treated during the year under review was 9,987, of which 94 cases were in, and the rest out, patients.

The following table shows the working of the institution for the last five years:—

Years.	In-door.		Out-door.	
	Total treated.	Average daily sick.	Total treated.	Average daily sick.
1890–91	81	3·11	12,071	125·68
1891–92	81	2·72	10,413	108·29
1892–93	68	1·85	9,906	112·26
1893–94	62	1·64	11,080	113·59
1894–95	94	3·57	9,893	74·18

second week of that month. The total number of seizures was fourteen with four deaths. All precautionary measures were adopted to prevent the spread of the disease and met with willing co-operation of the then Chairman. Fever prevailed to less extent than the year previous, being 863 against 2,142 in the previous year. The prevalence of fevers is more or less concomitant with the supply of water in the tank and the amount of wet cultivation carried out and is directly due to the raising of the sub-soil water. Many devices have been proposed but found not feasible or too expensive, and I am afraid could be only obviated, as the Executive Engineer facetiously remarks, by the removal of tank, town or wet cultivation.

2. *Vital Statistics.*—There were 207 births and 102 deaths registered during the year against 142 births and 117 deaths in the previous year. Cholera 6, small-pox *nil*, fevers 38, bowel complaints 1, all other causes 57. There were frequent changes in the post of registrar of births and deaths. Bill-collectors, vaccinator and peon were employed on this important work, which cannot be considered to have been satisfactorily carried out, but there has been visible improvement since the permanent employment of a man for the post.

3. *Sanitation.*—(1) The conservancy staff consists of one inspector, two peons, fourteen sweepers, three private scavenging toties and eight public latrine toties and four carts (three rubbish and one night-soil cart). The night-soil cart is old and of obsolete pattern and will have soon to be replaced by one of approved pattern.

(2) The street sweepings and house refuse are collected in dust-bins and carted daily to the rubbish depôt situated about a mile-and-a-half on the northern side of the town along the Gooty road, and the night-soil from 8 public and 106 private latrines is removed in an iron covered cart and buried in trenches close to the rubbish depôt. The latrines are mere enclosures and none of them are provided with seats. Three are of mud, four of brick and one of stone. Dry-earth is being used, but hardly efficiently at all times and much less during the wet months. The municipality are trying hard to find ways and means for the construction of covered latrines, but I am afraid it will take years before the object is realized. Only a limited number of people resort to these latrines and a greater portion go to fields.

(3) *Drainage.*—There is no proper system of drainage. The main streets are provided with side-drains lined with rough stones to carry away surface and storm water to the adjacent fields, but they are built over by owners of houses and are therefore difficult of access for cleaning. Small streets and lanes have side cuttings. Every house has one or more covered cesspools and they are cleaned only when full and choked or the smell emanating from them is very offensive. These cesspools are the sources of great danger to the drinking-water wells which are close to the dwelling-houses. Steps are being taken to enforce the construction of cesspools of impermeable material whenever permission is sought to repair the old one or open a new one.

(4) Drinking-water is obtained from a large tank and twelve wells. The tank water, which is generally much polluted by washing and bathing, is used chiefly by Brahmin and Komti communities and this source of water-supply is very limited. Of the twelve good-water wells "Garabhavi" is much used for drinking purposes and it was cleaned of its silt and a cemented cistern was constructed to receive waste water which is daily removed. With the exception of a few wells all are provided with parapet walls, and notice boards are fixed warning people from contaminating them.

(5) The following suggestions were made by the District Medical and Sanitary Officer and adopted by the municipality :—

(1) The toties were provided with covered iron buckets to remove night-soil from houses and latrines.

(2) Building of pucca latrine with roof and seats, but this was postponed owing to want of funds.

(3) Repairing the meat market and having the floor with Cuddapah slabs which is under consideration.

(4) Entertainment of a trained sanitary inspector was suggested and is under consideration.

(5) Employment of a separate birth and death registrar and not entrust the vaccinator with that work, which recommendation has been adopted.

4. *Vaccination.*—Vaccination is compulsory in this municipality and the vaccinator works under the immediate supervision of the District Medical and Sanitary Officer. The total number of cases vaccinated during the year under report was 466 against 383 in the year previous, thus showing an increase of 83 cases. Of the cases vaccinated, 410 were successful, 28 unsuccessful and 28 unknown. Infantile vaccination under one year of age out of the total number vaccinated during the year amounted to 179 cases, of which 173 were successful and 6 unknown. The total number of births registered from 1st October 1893 to 30th September 1894 was 151, of which 102 were vaccinated, 22 left the town, 25 died and 2 were reported to the magistrate for non-compliance with the vaccination rules. Percentage of successful cases of primary vaccination being 97·14 and of re-vaccination 80·47. The average cost of each successful case was As. 9 against As. 9–10 in the previous year. The work of the vaccinator has been satisfactory; he had to perform the duties of registrar of births and deaths for four months in the year in addition to his own work. The vaccination is in a backward state in this town and surrounding villages. People are averse to it and do not produce their children for vaccination until they are served with notices.

5. *Hospitals and Dispensaries*—(*a*) *Nature and sufficiency of Accommodation.*—The present building consists of (1) main ward with eight beds, which was in the occupation of police sick till the 21st July 1894 when it was transferred to the municipality on their removal to the new building for the police near the railway station; (2) a small ward with four beds in continuation of main ward towards the west is used as office room for the District Medical and Sanitary Officer; (3) attached to this a small room in the verandah used as store room; (4) a small room behind the main building for two female patients, and a kitchen. There are two thatched sheds; one is for the accommodation of six patients and it was repaired during the year and the other close to the surgery for the examination of private cases. The surgery room is small and scarcely sufficient for the purpose.

(*b*) *State of repair of Buildings.*—The whole building was condemned on more than one occasion by the Surgeon-General with the Government of Madras and the Sanitary Commissioner on account of its situation being on a lower level than the large tank in close proximity, its being surrounded by paddy fields, and of the dilapidated condition of the building which is very old and leaks in several places during the rains. The question of construction of a new hospital has been under the consideration of the municipality since 1888. Plans and estimates were prepared and sites were selected in different places and abandoned for some reason or other and nothing has been done as yet to realize this long-felt want. Many patients were refused admission for want of proper accommodation.

(*c*) *State of repair of Furniture.*—The hospital furniture will require to be replaced soon, as the articles now in use are old and worn out. Bedding and clothing were provided during the year.

(*d*) *Number of Patients treated as compared with previous years.*—The total number of patients treated during the year under review was 9,987, of which 94 cases were in, and the rest out, patients.

The following table shows the working of the institution for the last five years:—

Years.	In-door.		Out-door.	
	Total treated.	Average daily sick.	Total treated.	Average daily sick.
1890–91	81	3·11	12,071	125·68
1891–92	81	2·72	10,413	108·29
1892–93	68	1·85	9,906	112·26
1893–94	62	1·64	11,080	113·59
1894–95	94	3·57	9,893	74·18

From the above table it will be observed that there is an increase of 32 in, and a decrease of 1,187 out, patients in the year under report compared with that of the previous year. The increase in the number of in-patients is accounted for by eight more beds being available since 21st July 1894 when the police sick were transferred to the new building; and the falling off in the number of out-patients is partly due to less prevalence of malarial fevers during the year, on account of the large tank in proximity of the town receiving a very limited supply of water and thus rendering the town less damp, and partly to the frequent changes of medical subordinates and also to the prevalence of cholera in the town during the months of August and September 1894 which prevented the neighbouring villagers from seeking relief at this institution.

(*e*) *Mortality and actual causes of it.*—There were five deaths during the year against five in the previous year, one death from extravasation of urine, one from chronic ulceration of rectum, one from septicæmia the result of retention of membranes, and one from chronic Bright's disease.

(*f*) *Operations and Results.*—There were 31 major and 312 minor operations performed during the year against 24 major and 318 minor operations during the previous year, and no deaths followed any of the operations.

(*g*) *Establishment whether sufficient and efficient.*—Establishment consists of one compounder, one midwife, one ward cooly, one cook, one peon and one toty. The services of a nurse are required to attend upon females and children.

(*h*) *Midwives.*—Midwife Marthay, who was qualified at the Government Lying-in Hospital, Madras, conducted 101 cases against 87 in the previous year, showing a slight increase of fourteen cases over the last year and giving an average of more than eight cases a month. Her work is verified by the Assistant to the District Medical and Sanitary Officer, but she is made to put herself in evidence in the town frequently and to try and secure as many cases as possible. Her work has been fair considering the minimum of seven cases required of the local fund midwives in larger towns and the great opposition met with from barber women who are permanently attached to families to attend confinement cases. Her services are called when there is delay and difficulty in the case. She is paid Rs. 15 a month irrespective of results. Two-thirds of her pay are met from local funds and one-third from the municipality.

(*i*) There is no separate ward set apart for gosha and caste women. Whenever caste patients are admitted raw rations are issued and caste principles are maintained.

(*j*) *General Remarks.*—Many works of public utility were not carried out by the municipality for want of funds. The undersigned was in charge of the institution during the whole year.

Divisional Officer.

Ref. on C. No. 1394.

Submitted.

2. To my mind the most pressing questions in Anantapur are—(*a*) the extension of the town westward towards the tract near the railway station, (*b*) the provision of a decent hospital.

3. (*a*) The town at present is much too crowded and too close under the tank-bund; the turning of a petty village into a district head-quarters has aggravated the original objections to the site by unduly crowding the houses and people. Hence the almost total absence of backyards and the consequent sanitary difficulties in the way of private latrines and private scavenging alluded to by the Chairman; hence also the objectionable condition of some of the lanes in the early morning. When there is a good head of water in the tank *nothing* can prevent the water-logging of a foul soil; hence fevers and other diseases; moreover, the high tank-bund, which overtops the houses, tends to prevent the free perflation of air, so that the heat of the stagnant air is something intolerable in the narrow lanes and crowded houses. Westward there is a good deal of gravel soil, completely open to the breezes and with excellent water at a moderate depth. If the municipal council could make the long-talked-of direct road from the existing village to the railway station, people would more readily take up building sites near the station, especially as a new agraháram is already being formed there and the Police Reserve lines and other buildings are to be located there. If gravel areas near the station were taken up by the council, marked out in proper plan, and sold or leased as building lots, it would effect a great sanitary improvement.

4. (*b*) The building of a decent hospital is hardly less important. There is a Resident District Medical and Sanitary Officer with an Assistant Surgeon, &c. Their skill is largely unutilized, because there is no proper hospital for in-patients, and operations have to be most warily and sparingly undertaken by reason of the absence of accommodation and the chances of septicæmia. If the site for the new hospital be finally settled and a liberal grant made from Provincial funds, it would be the greatest of boons to the country-side. If the site selected be the open ground westward of the town near the railway station, or, if the large new police hospital and buildings already erected there be taken up for the municipal hospital after making provision for a smaller one for the police, it would tend towards the extension of the town westward, alluded to in paragraph 3 *supra*.

ANANTAPUR,
3*rd June* 1895.
