	14,153 7 5	15,426 14 10	1,566 10 0	293 2 7
	19,547 3 8	19,814 5 5	1,566 10 0	1,299 8 3
Net increase ..	..	..	267 1 9	..

4. The year began with the balance of Rs. 4,387-6-7 against Rs. 5,393-12-3.

5. The receipts for the year amounted to Rs. 15,426-14-10 against Rupees 14,153-7-5 of the previous year, while the figures for the revised estimate were Rs. 15,380. There has thus been an increase of Rs. 1,273-7-5 over the last year's figures which occurs chiefly under house and land taxes, carts licensing fees, private scavenging fees, &c.

6. The house and land taxes were revised towards the close of the year 1892-93.

7. One thousand nine hundred and twenty-five houses were assessed to the tax on buildings against 1,866 in the previous year. The settled demand for the year was Rs. 4,940-12-4, of which Rs. 4,839-4-9 was collected, Rs. 2-6-6 was remitted on account of vacant houses and Rs. 99-1-1 remain to be collected; of this amount Rs. 32-3-11 has since been realized; of the arrear demand of Rs. 584-4-11, Rupees 498-10-10 was collected and Rs. 85-10-1 was written off as irrecoverable; 97·9 per cent. of the current demand and 85·4 per cent. of the arrear demand were collected against 88·7 and 72·2 per cent., respectively, of the previous year.

8. *Land Tax.*—The year started with a current demand of Rs. 660-9-4 and an arrear demand of Rs. 96-10-7, making a total of Rs. 757-3-11 against Rs. 688-15-10 of the previous year. The whole of the current demand was collected during the year except As. 5-3 which was remitted on account of vacancy; out of the arrear demand, Rs. 3-6-1 had to be remitted and Rs. 93-4-5 was collected, leaving a balance of one pie which has since been collected.

9. *Vacant sites.*—The total demand for the year including the arrears amounted to Rs. 81-15-0; of this amount Rs. 31-12-8 was collected, Rs. 32-2-1 was written off as irrecoverable and Rs. 18-0-3 remain to be collected at the close of the year.

10. *Tax on Vehicles, &c.*—The receipts under this head show an increase of Rs. 90-6-0 over the figures of the last year. The increase is due to a number of springed vehicles having come into existence.

11. *Tolls.*—The seven toll-gates when put up to auction fetched Rs. 4,145 against Rs. 3,925 of the previous year. The net receipts after deducting the district board's share and one-third expenditure incurred on tolls amounted to Rs. 2,735-13-10.

12. *Incidence of Taxation.*—The population according to the census of 1891 was 12,330. The average incidence of taxation was As. 13-8 and As. 10-2 including and excluding tolls against As. 12-3 and As. 8-8, respectively, of the preceding year.

Other Receipts.

13. *Rent of Lands.*—The rent paid for manufacturing saltpetre was Rs. 8 less than that of the previous year owing to rainy season.

(ii) *Rent of Buildings.*—Rupees 43-5-9 was collected as rent from the civil apothecary for the municipal bungalow he occupies. The decrease is owing to the fact that the building was vacant for some time owing to the change of apothecaries.

(iii) *Avenue Receipts.*—The increase under this head is due to a larger number of withered avenue trees having been sold in auction besides the avenue tamarind trees fetched a larger amount.

14. *Produce of Lands and Gardens.*—The sum of Rs. 20-9-9 represents the amount collected from the lessee of the municipal garden situated within the precincts of the railway chattram.

15. *Conservancy Receipts.*—There are two rubbish depôts; 8,760 cart-loads of rubbish were collected in the two depôts and when sold they fetched only Rs. 135-13-0. A separate site has been purchased for a night-soil and a rubbish depôt. The night-soil is buried in trenches. No sale could be effected as the people are averse to this manure.

16. *Fees in Schools.*—The decrease of Rs. 95-11-4 below the last year's figures is due to the fact that a good number of students after completing the course of study left the municipal primary schools for prosecuting their studies elsewhere. This withdrawal was not compensated by an equal number of admissions during the year.

17. *Sale-proceeds and composition fees of medicines.*—The rules regarding the distribution of medicines are being enforced more systematically than hitherto.

18. *Income from Markets.*—The weekly market when put up to auction fetched Rs. 1,219 and the remainder represents the rent of stalls built in the Raja market (daily market) and of butcher stalls. The net receipts after deducting Rs. 206-4-6 was Rs. 1,144-3-6.

19. *License Fees.*—This comprises the following items:—

	Rs.	A.	P.
Oil mills	116	0	0
Timber depôts	15	0	0
Bamboo shops	6	0	0
Gunpowder shop	5	0	0
Storing materials	56	11	5
Erecting marriage pandal	18	11	6
Total ..	217	6	11

The total income was Rs. 217-6-11 against Rs. 159-12-10 of the previous year.

20. *Cart-stand Fees.*—The two cart-stands were sold in auction and fetched only Rs. 140 against Rs. 130 in the previous year. Steps are being taken to prevent bandies stopping in the streets obstructing the traffic now and then.

21. *Fines.*—The actual amount collected under fines come up to Rs. 122-4-0 against Rs. 145-4-0 of the last year.

22. *Other Grants and Contribution.*—Rupees 127-6-9 represent the moiety of the pay, &c., of the inspecting schoolmaster employed by the Erode and Karúr municipalities recovered from the Karúr municipal council.

23. *Private Scavenging Fees.*—Out of a current demand of Rs. 303-2-0 Rupees 301-4-0 was collected, leaving a balance of Rs. 1-14-0, which amount has since been collected. There were two hundred houses registered for the system on the last day of the year against 181 of the preceding year. Each division peon has been directed to supervise this branch of work personally and the house-owners have been requested to sign the peon's beat book in token of the work having been satisfactorily done. The book is periodically examined and complaints enquired into and defects remedied at once. The system is making gradual progress. There are still some 160 cess-pits in the town and steps will be taken to close some of them during the current year.

24. *Other Miscellaneous receipts*—call for no remarks.

III—Charges.

25. The following statement compares the year's expenditure with that of the year previous:—

26. *Grant I, New Works—(a) Communications.*—More than double the amount provided in the budget for New Works—Communications was spent during the year in erecting revetment in affixing boulder stones and in metalling more important roads.

27. *Buildings.*—Two more latrines have been erected during the year with zinc sheet walls and seats.

28. *Drainage.*—A sum of Rs. 32-10-6 was spent in erecting a small drain to the back of the Sulivan street to drain off the sewage water that stagnates in the bye-lane into the main ditch.

29. *Water-supply.*—Three wells have been sunk near the Kalingaroyen channel as the channel water is being polluted from higher up the stream; besides, the fort well had to be deepened further.

30. *Repairs, Communications.*—A sum of Rs. 1,439-10-2 was spent in repairing the town roads against Rs. 1,348-2-2. The increase is on account of a larger number of roads having been repaired during the year. The total mileage of roads within the municipal limits is $15\frac{1}{2}$ miles and that maintained by the council is $12\frac{1}{2}$—metalled 5 and gravelled $7\frac{1}{2}$. The roads are in good condition.

(*b*) *Buildings.*—The amount spent under this head is for the usual annual repairs for the municipal buildings.

Water-supply.—Some of the wells had to be deepened for scarcity of water.

Contingencies.—Buckets, ropes, &c., were purchased for the use of the three new wells sunk near the Kalingaroyen channel.

31. *Grant II Education*—(1) *Training Schools, (b) Stipends to Normal Students.*—The student was sent for training in the middle of the year instead of at the beginning.

32. *Schools on Salary Results System, (b) Results Grants.*—The actual amount earned by the three schools under the control of the council came up to Rs. 525-8-11 against Rs. 565-6-11.

(*c*) *Contingencies.*—The increase of Rs. 67-2-3 is due to the purchase of furniture, &c., for the use of the municipal schools.

33. *Results Grants.*—The increase of Rs. 59-9-2 over the last year's figures is on account of the results schools having earned higher grants. Results grants are paid at 75 per cent. of the amount actually earned.

34. There were three schools under the management of the council. The masters are all trained; besides the council aided five schools during the year. Statement V that accompanies the report gives full particulars regarding these schools. Besides

the above there is a girls school under the management of Government and a middle school under private management. The council is not in a position to say anything about the latter as it furnishes no returns to this office.

35. *Grant III—Sanitation and Medical Services*—(1) *Hospitals and Dispensaries*—(*a*) *Establishment.*—The large increase under this head over the last year's amount is due to the fact that a civil apothecary on higher pay has been posted by the Surgeon-General instead of one on a less pay.

(*b*) *Medicines, &c.*, are being sent for from England direct.

(*d*) *Sundries and Contingencies.*—The increase under this head is due to the purchase of an almirah for keeping medicines, a pair of scale and weights and some other sundry things for the use of the hospital. The hospital is being appreciated by the general public. People come from distant villages for medical help. The number of in-patients treated during the year was 118 and out-patients 13,325 against 144 and 11,582 respectively of the previous year. The midwife attached to the hospital attended 140 labour cases against 135 of the year previous.

36. *Vaccination.*—There is a first-class vaccinator employed by this municipality. The cost of vaccination came up to Rs. 164–8–3. The vaccinator performed 640 cases against 613 in the preceding year, of which 584 cases were successful against 522. All these cases were performed with glycerine paste; of the 584 successful cases 356 were on children under one year of age. The vaccinator performed 51 re-vaccination successfully. Seventy-seven persons were reported to magistrate for refusing to get their children vaccinated. The civil apothecary performed 60 vaccinations, of which 55 were successful; of the 55 successful cases, 27 were on children under one year of age. The average cost of successful vaccination was As. 4–6 against As. 7–7. The statement appended below compares the results of vaccination for the last five years. Vaccination is compulsory in this municipality:—

Years.	Number vaccinated.	Successful.	Unsuccessful.	Unknown.
1890–91	517	513	3	1
1891–92	627	558	40	29
1892–93	773	721	41	11
1893–94	581	522	59	..
1894–95	640	584	54	2

37. *Registration of Vital Statistics.*—The following figures explain the registration of births and deaths for the last five years:—

Years.	Birth.	Death.	Birth-rate per mille.	Death-rate per mille.	Population.
1890–91	349	346	35	35	9,864
1891–92	316	304	26	25	
1892–93	334	282	27	23	12,330
1893–94	476	516	39	42	
1894–95	400	342	32	28	

Of the total number of deaths 93 succumbed to fever against 63, 42 to dysentery against 25, 5 to wounds, snake-bite 1 against 1 and 200 to all other causes against 239. There was also one case of suicide. There were 74 prosecutions for failure to register births and deaths, of which 51 for births and 23 for deaths. There was no cholera during the year under report.

38. (5) (*a*) (*i*) *Establishment.*—In 1893–94 the inspector was on leave without pay for about two months, the overseer doing the work in addition to his own, hence the difference.

(ii) Rupees 568–8–9 was spent in purchasing a land for a rubbish and night-soil depôt and the remainder represents the cost of repairing the rubbish and night-soil carts and of digging trenches in the night-soil depôt.

39. There are seventeen latrines—four zinc sheet, five pucka built and eight mud-wall enclosures. They are all supplied with buckets. The latrines are cleaned twice a day. Thirty-five notices were issued for dirty backyards and there were three prosecutions. There are 24 sweepers with 12 carts, 16 scavengers with 11 carts; besides there are four scavengers solely employed in attending private latrines. There are also six drain-cleaners with three carts. A sewage farm has been recently enclosed near the jungle stream and drain sewage is being utilized for cultivation and guinea grass is being grown there. The grass thrives well.

40. *Grant IV, Lighting, &c.*—There are 111 lanterns for the town against 103 in the previous year. A lighting superintendent on Rs. 8 per month looks after the lighting of the town assisted by four masalchies on Rs. 4–8–0 each. Their salaries deducting stoppages came up to Rs. 293–4–4.

(*b*) *Contingencies.*—The decrease of Rs. 100–2–11 below the last year's figures is accounted for by the fact that no burners and chimneys were purchased; besides the kerosine oil is sent for at a cheaper rate.

41. *Avenues.*—The three avenue coolies work under the supervision of the municipal overseer. The excessive heat and scarcity of water did not permit them to plant more trees on the road side. All the trees are thriving well.

42. *Public Gardens.*—One gardener is employed on Rs. 4 per mensem. He works in the hospital compound in the mornings and in the municipal office compound in the evenings. He planted sixteen new trees in the municipal office compound. All the trees are thriving well.

43 (9) (iii) *Printing.*—The increase of Rs. 91–14–3 over the last year's figure is due to the payment of a portion of the last year's amount.

(iv) *Compensation for Lands.*—The council paid Rs. 44–10–4 for acquiring land for a bye-law to be opened in the Sullivan street.

(v) *Other Items.*—The sum of Rs. 48–5–7 is made up of Rs. 18–4–10 land revenue for municipal lands, Rs. 29–0–9, cost of tin tickets to be affixed to carts and Re. 1 burial charges.

44. *Grant V, General Establishment.*—This calls for no remarks.

(*c*) *Collection of tolls, Contingencies.*—Four toll boards were prepared at a cost of Rs. 60 and the remainder represents the repairing of the old boards, &c.

45. *Office contingencies other than* (*b*)(*ii*).—The decrease of Rs. 91–6–8 below the last year's figures is due to the fact that the old stock of forms, stationery, &c., continued in use during the year under report.

46. Rupees 70 represents the usual contribution for central office and audit establishments.

47. The total expenditure for the year amounted to Rs. 19,242–15–1 against Rs. 15,159–13–1.

IV.—Closing Balance.

48. The year closed with a balance of Rs. 571–6–4 excluding the deposit balance of Rs. 1,762–13–5.

49. Numerical returns I, II, III and IV relating to education are herein enclosed.

50. The accounts were audited by Mr. C. Brito, Assistant Inspector of Local Fund Accounts.

51. A copy of the resolution of the council approving this report is herein enclosed.

Enclosure.

Annual concise report for the official year 1894–95.

Public Health.—The general health of the people has been fairly good during the year. The common diseases met with among out-door patients were diseases of the eye, ulcers, malarial fevers, diseases of the ear, skin and digestive system, and among in-patients local injuries,

ulcers and malarial fevers. There has been no epidemic of small-pox or cholera throughout the year either at the town or its vicinity, although cholera has been prevalent in many parts of the taluk during the last quarter of the official year. Timely freshes in the Cauvery and the opening of new wells in the town have been the factors to prevent any scarcity for drinking water.

2. *Vital Statistics.*—Number of births and deaths registered during the year were 398 and 344 * respectively against 482 and 523 of the previous year. There was no cholera during the year and this accounts for the fall in the registry of deaths, there having been 165 deaths from cholera only on the previous year.

* Should be 400 and 3,422.

3. *Sanitation.*—The sanitary condition of the town was, on the whole, good. The refuse of the town is carted off to the rubbish depôts, of which there are two, where it is stored and sold in auction. A new site for the night-soil depôt was purchased during the year near the toll-gate and the night-soil is being buried in trenches. There are ten hand-carts for the removal of the excreta. The weekly market sweepings are burnt in a cinerator built for the purpose. The conservancy of the town is attended to by a sanitary inspector assisted by five peons under the control of the chairman. There are 24 sweepers, 6 drain coolies and 16 toties. There are 14 latrines, all in good condition and cleanly kept. A new latrine was erected in the fort. The latrines are freely resorted to by the people. Private scavenging is in force and four scavengers are specially employed to do the work. There are 184 dust-bins against 163 of the previous year. The recommendations made by the Sanitary Commissioner are being attended to though slowly. The water-supply of the town is good, the chief sources being the Cauvery-Kalingaroyen channel, a tank in the fort and seven wells in the town. Four new wells were dug up by the side of the channel and one in the fort during the year under report. The tank in the fort has not been as yet closed as recommended, the water being reputed for guinea-worm. No arrangement has yet been made to set apart places for drinking, bathing and washing purposes in the channel. A sewage farm has been recently enclosed by the side of the jungle stream and the drain sewage is being utilized for cultivation. The latrine near the slaughter-house has not been removed, nor has anything been done to improve the butchers' market. The drainage of the town is defective, there being only one masonry drain for the Komati street. The side ditches were considerably improved during the year. There are a large number of cess-pools and care is taken that they are cleaned often.

4. *Vaccination.*—Sixty cases were vaccinated by the medical subordinate against 32 of the previous year, of which 55 were successful. The municipal vaccinator has had 640 cases during the year against 581 of the previous year, of which 579 † were successful; great care is taken that children are vaccinated before six months after their birth.

† Includes re-vaccination.

5. (*a*) The hospital is well built and affords accommodation for eight in-patients. The two buildings that were used as wards for contagious diseases were demolished during the year and new ones will be erected instead; a new cholera shed was raised during the year.

(*b*) The buildings were all repaired during the year and are in good condition.

(*c*) A new almirah was purchased for use of the hospital and the furniture is sufficient.

(*d*) There were 118 in-patients and 13,325 out-patients during the year against 144 and 11,582 of the previous year.

(*e*) There were ten deaths among the in-patients against 25 of the previous year and out of these seven were admitted in a moribund state, three phthisis, one dropsy, one criminal abortion, one penetrating wound of abdomen, one tertiary syphilis and from the remaining three deaths, two were from diarrhœa and one from starvation.

(*f*) Total number of major operations was 26 against 26 of the previous year and those of minor were 467 against 359 of the previous year.

(*g*) The establishment consists of an apothecary, compounder, midwife, ward- cooly, cook and toty. The necessity for the services of a peon to the hospital was pointed out by the various inspecting officers and it is hoped that the municipal council will see to it.

(*h*) The midwife attached to the hospital attended on 140 labour cases against 135 of the previous year. Great care is taken to check her work.

(*j*) On the whole the work of the hospital has been satisfactory in every way when compared with the previous years.

ERODE,
29th April 1895.

(Signed) P. SAMATHANAM PILLAI,
Civil Apothecary.

No. 1774.

Forwarded to the Chairman, Municipal Council, Erode.

COIMBATORE,
30th April 1895.

(Signed) M. AILSWORTH,
Asst. Surgeon, in temporary charge.

No. 1751.

Submitted.

2. The roads are maintained in a tolerably fair condition.

ERODE,
6th June 1895.

(Signed) T. M. SWAMINATHA AIYAR,
Acting Sub-Collector.

Endorsement on the Erode Municipal annual report for 1894–95.

Forwarded for the orders of Government.

2. The municipal council held 30 meetings against 34 * in 1893–94 and no meeting was adjourned for want of a *quorum*. There was an improvement in the average attendance of non-official councillors over the preceding year.

* Including one adjourned for want of a quorum.

3. The collection of taxes on houses and lands was better than in the previous year, and there was no case of distraint or sale of property.

4. The net income from tolls was Rs. 2,736, of which Rs. 1,440 or 52·63 per cent. were spent on road repairs, besides Rs. 2,721 on communications—new works. The mileage of roads, &c., maintained by the council remained the same as in last year. The roads are stated by the Revenue Divisional officer to be "in a tolerably fair condition." I have found them fair.

5. The net expenditure on education was Rs. 1,594 or 15·1 per cent. of the income from taxation, and the whole of this sum was spent on primary education. The municipal council maintained three primary schools on the salary-results system as in the preceding year and aided six others (not five as stated in the report) with results grants.

There was some advance in the number of boys and girls receiving instruction in the municipal as well as aided schools. From the results of the grant examinations, it appears that there was an improvement in all the standards except the two highest of the municipal schools. The total number of boys under instruction in both classes of schools increased from 531 to 616 or 66 per cent. of the male population of school-going age. The council should see that trained teachers only are employed in the aided schools.

6. (*a*) *Medical relief.*—There was a fall in the number of in-patients and a rise in that of out-patients treated at the municipal hospital. It is satisfactory that the institution is appreciated by the general public and that people from distant villages resort to it for treatment. The midwife attached to the institution attended 140 cases of labour against 135 in 1893–94.

(*b*) *Vaccination and Vital statistics.*—It is not known how the figures 640 under cases vaccinated and 584 under those successful, given in paragraph 35 of the chairman's report, were arrived at, but it is clear from statement XIII that the number of cases performed by the vaccinator was only 584 and that performed by the civil apothecary was 60. Of these, the successful cases were respectively 528 and 55. Successful cases of infantile vaccination amounted to 356 against 276 operated on in 1893–94. The number of births registered during the year was 400, so that the number of cases of infantile vaccination is very satisfactory. The cost of each successful case came to almost 5 annas and not 4 annas 6 pies as stated, and it is still capable of reduction when it is remembered that the average for the whole district is only 3 annas. The registration of births and deaths showed retrogression, the ratio per mille of the town population being 32 for births and 28 for deaths against 39 and 42 in the preceding year. It should be observed that there was no cholera during the year and that exclusive of the deaths by cholera in the previous year the number of deaths was 336.

(*c*) *Conservancy.*—The expenditure on sanitation was Rs. 4,020-10-7 or 97·8 per cent. of the budget allotment and 26 per cent. of the current receipts. The council appears to have paid some attention during the year to working the sanitary

clauses of the Act, purchased a new site for the rubbish depôt and started a sewage farm where it is said guinea grass is grown and thrives well. But from the civil apothecary's report it is clear that there is still considerable room for energetic action by the council in sanitation.

The municipal council might also utilize its night-soil, for which it is said there is no demand, in its own garden as manure as an example to the ryots of surrounding lands.

7. In checking the accounts the following discrepancies were discovered:—(1) Repair of toll sheds as per Part II, statement II-A, amounts to Rs. 19–3–7, while according to statement VII, column 4, the cost is only Rs. 6–3–7.

(2) It is not known how the sum of Rs. 1,409–2–2 deducted as the Local Fund share of toll receipts in statement I was arrived at.

(3) Rent of buildings is given as Rs. 43–5–9 in statements I and IV-A, while as per detailed statement, which is also sent, and in which that amount is entered as the total, it actually amounts to only Rs. 35–13–9. The entry of 8 annas opposite "school rent" in the detailed statement is obviously a clerical error for 8 rupees.

(4) Arrears of taxes should be Rs. 117–1–5 and not Rs. 117–1–0 as shown in the foot-note to statement II.

(5) Discrepancies are observed between the chairman's and civil apothecary's report as regards the number of births and deaths and the number of latrines.

(6) The expenditure on "communications under new works and under hospitals and dispensaries" is much in excess of the allotments as per sanctioned budget and revised estimate and would seem to be irregular.

(7) The charges for erecting a mud wall round Bandypettah ought, with reference to G.Os. No. 193-M of 15th February 1889, paragraph 2 (3) and No. 209 M., of 20th February 1889, paragraph 2 (1) to be shown under (*e*) Miscellaneous which head can be opened under G.O. No. 1009 M. of 13th June 1892.

(8) The use of tabular statements in the body of the report would, with reference to the remarks of Government in paragraph 11 of its order No. 1052 M. of 10th July 1891, seem to be unnecessary.

(9) From statement VI-A it appears that the additional allotments or transfers sanctioned by the council for communications under new works and water supply exceeded the limit prescribed by Government in its order No. 889 L. of 17th May 1894.

(10) The entries in columns 10 and 11 of statement I-A. opposite Agraharam chatram appear to be incorrect.

COIMBATORE,

2. Thirty meetings were held by the municipal council against thirty-three in 1893-94. The average attendance of the members improved and was satisfactory.

3. *Receipts.*—(1) There was an increase of Rs. 102 in the net current demand of the tax on buildings, but that of the tax on lands remained almost stationary. Except in the case of the arrears of the latter, the collections under these heads showed a marked improvement on the record of the previous year and were, on the whole, good. Coercive measures were adopted to a considerably larger extent than in 1893–94, and execution of the warrants was prompt.

(2) Only Rs. 136 was realized from the sale of the town sweepings. This source of revenue is capable of further development and the municipal council's attention will be drawn to the Collector's suggestion in the latter portion of paragraph 6 (*c*) of his endorsement. There was a small increase in the income from license fees, but the decline under fines is unsatisfactory, as it apparently indicates laxity on the part of the municipal executive and the Police in enforcing the sanitary provisions of the law.

(3) The private scavenging system made but little progress during the year. It was worked at a small profit instead of at a small loss as in 1893–94, which is satisfactory; but the number of houses served was only 200 or nineteen more than in that year. This is only about 10 per cent. of the total number assessed to the tax on buildings, and the council must devote its earnest attention to the further extension of the service. The council was reminded in the review of the previous year's administration that the surest means to this end was the systematic prosecution of the owners of insanitary premises, but these instructions appear to have been followed with but little energy. The cess-pits referred to in paragraph 23 of the Chairman's report should be closed without delay.

4. *Expenditure*—(1) *Public Works.*—With the exception of two latrines and three drinking-water wells, which were constructed at a cost of Rs. 212 and Rs. 836, respectively, no new work of any importance was undertaken during the year. The total outlay on communications amounted to Rs. 4,162 or a little more than half as much again as the net municipal income from tolls, and the town roads are reported by the Collector to have been in fair order.

(2) *Education.*—The net expenditure on education was Rs. 1,595 or 15·0 per cent. of the income from taxation, and the whole of this was devoted to primary education. The municipal council continued to maintain three primary schools on the salary-result system and aided six others with result grants against five in 1893–94. There was an improvement in the attendance at them and the results obtained at the departmental and grant examinations were fair, but a large proportion (nearly one-fourth) of the allotment for grants was once again allowed to lapse. It is however satisfactory to note that the total number of boys under instruction in the municipal and aided schools rose from 57·8 to 67·1 per cent. of the male population of school-going age. It is observed that there are still three untrained teachers in the aided schools. The Chairman will be requested to report whether the council followed the instructions in paragraph 4 (2) of G.O., dated 30th July 1894, No. 994 M., that the grants paid to these men should be reduced or withheld if they have not qualified themselves.

(3) *Medical Relief.*—The number of in-patients treated at the municipal hospital fell from 144 to 118, but there was an increase of 1,743 in the attendance of out-patients, which, as the year was a healthy one, is apparently due to the growing popularity of the institution. The midwife attached to the hospital attended 140 cases of labour against 135 in 1893–94.

(4) *Vaccination and Vital Statistics.*—The vaccination returns are incomplete inasmuch as they do not include cases of re-vaccination. Excluding these, the reported number of operations increased slightly, the quality of the work turned out continued to be good, and the cost of each successful case by the municipal agency fell from As. 7–7 to As. 5. Infantile vaccination also made satisfactory progress, the number of infants protected having been 383 or only seventeen less than the registered number of births.

There was a marked decline in the registration of vital statistics, although the number of prosecutions instituted for failure to report the occurrence of births and deaths considerably increased. The fall in the case of deaths is ascribed to the absence of cholera during the year, but the returns in both cases were still below normal and incomplete. This subject demands the continued attention of the municipal council.

(5) *Sanitation.*—More than 98 per cent. of the allotment under this head was utilized and the expenditure amounted to 22·3 per cent. of the receipts. The Government is glad to learn from paragraph 3 of the civil apothecary's report that some improvement has been made in the sanitary condition of the town since it was last visited by the Sanitary Commissioner, but the council should not rest satisfied until all the defects noticed by that officer in his inspection notes recorded in G.O., dated 14th December 1894, No. 1944 M., have been remedied.

5. *General Remarks.*—The year closed with a balance of Rs. 629 or only 4·1 per cent. of the current receipts. The council must endeavour to increase the municipal revenue by every means in its power. The sanction of Government should have been obtained for the expenditure in excess of the sanctioned allotments referred to in paragraph 7 (6) of the Collector's endorsement. It will however be now admitted in the accounts.

Except as regards the registration of vital statistics, the administration of the municipality during the year under review was a decided improvement on that of the previous year, and was, on the whole, fairly efficient.
