SEPTEMBER.

Municipal Report.

Reviewing the Ellore — for 1894–95.

(3) *Medical Relief.*—There was a further increase in the number of patients treated at the municipal hospital. The number of labour cases attended by the midwife also showed a satisfactory advance. The cart-stand in the vicinity of the hospital, referred to in paragraph 5 (*j*) of the hospital assistant's report, should be kept in a more sanitary condition.

(4) *Vaccination and Vital Statistics.*—The reported number of persons vaccinated during the year declined by ninety-seven, but the quality of the work is again stated to have been good. Though 665 births were registered during the year, the number of successful cases of infantile vaccination was only 535. This is not satisfactory. Better results should be obtained in the current year.

Notwithstanding the remarks in paragraph 4 (4) of G.O., dated 20th July 1894, No. 926 M., the registration of vital statistics, instead of improving, was more defective than ever. The returns are obviously incomplete, and yet there were only eleven prosecutions for failure to register. This is yet another instance of the laxity of the council's administration.

(5) *Sanitation.*—The expenditure under this head amounted to 95·1 per cent. of the allotment and was 22·7 per cent. of the current receipts. It was observed in the review of the administration of 1893–94 that, notwithstanding the remarks in the review for the year previous, no improvement of any importance had been effected in the sanitary condition of the town, but in the year under report the only step in this direction that appears to have been taken is the provision of twelve additional dust-bins. The Chairman's report on the condition of the town is once again meagre, but the hospital assistant, the Revenue divisional officer and the Sanitary Commissioner, the notes of whose last inspection are printed in G.O., dated 6th May 1895, No. 801 M., are unanimous in pronouncing the existing state of things to be unsatisfactory in the last degree. The matter has been fully dealt with in the order last quoted, and the council is warned that immediate and energetic action must be taken to improve matters. With reference to his remark on the subject of mooring boats in the Kistna Canal in paragraph 24 of his report, the Chairman's attention will be invited to G.O., dated 29th August 1895, No. 1409 M.

5. *General Remarks.*—The year closed with a balance of Rs. 5,990 or 20·6 per cent. of the receipts. The council cannot, therefore, plead that want of funds has prevented it from carrying out the reforms that were urged upon it in G.O., dated 20th July 1894, No. 926 M., reviewing the report for 1893–94. Except in the collection of the principal taxes, the administration of the municipality has, in spite of the strictures in that order, been inefficient and lax in almost every direction, and especially so in the matter of sanitation, private scavenging, infantile vaccination and the registration of vital statistics, although the council's special attention was called to these points therein. The Chairman and the municipal council will now be warned that, unless a marked improvement is shown in each and every one of these directions, both in the report specially called for in paragraph 3 (3) and in that upon the administration of the current year, the Government will consider the desirability of taking steps under section 13 of the Act to deprive the council of the privilege which it now enjoys of electing its own Chairman, and to reduce the proportion which the elective seats now bear to those to which nominations are made.

(True Extract.)

G. S. FORBES,
for *Chief Secretary.*

To the Chairman, Municipal Council, Ellore.
" Collector of Gódávari.
" President, District Board, Gódávari.
" Accountant-General.
" Director of Public Instruction.
" Surgeon-General.
" Sanitary Commissioner.
" Sanitary Engineer.
Editors' Table.

Enclosure.

Concise Annual Report on Municipal Hospital, Ellore, for the official year 1894–95.

Public Health.—The public health of the place is not so good as in last year. The most common diseases were dysentery, malarial fevers, syphilitic affections, rheumatic affections, gonorrhœa, scurvy, diseases of the nervous system, beri-beri, diseases of the eye, diseases of the lungs, diseases of liver, bowel-complaints, ulcers and skin diseases.

2. *Vital Statistics.*—The vital statistics are herewith sent in a form attached.

3. *Sanitation.*—Sanitation is much the same as in last year. The proposals made last year for the removal of wood yards and the rubbish depôt at Dhasirimatam have not yet been carried out. As for the water-supply of the town, most of the people in Ellore town and almost all of Powerpet drink Krishna canal water, which is polluted in many ways by boatmen and boat passengers while the boats stand in the heart of the town, and also polluted by the general public of the place by bathing, washing, &c. In this connection, I would suggest that boats be made to stand beyond the limits of the town towards the east so as to prevent all possible pollution which happen otherwise. To a better hygienic condition of the water I would also suggest that water may be conserved as the water is not liable to any pollution above the town.

4. *Vaccination.*—The total number of cases vaccinated by municipal vaccinators P. Subbaroyadu and I. Narayanasamy were 2,219 against 2,297 cases of the past year. At the dispensary 157 cases were vaccinated against 176 of the past year. The decrease in the number of cases operated on at the dispensary is due to my transfer to Local Fund dispensary, Tuni, during the months of June and July 1894 and also to the absence of civil apothecary from February, on the 12th of which he died.

5. *Hospitals and Dispensaries*—(*a*) *Nature and sufficiency of accommodation.*—This hospital has a male and a female ward, a lying-in ward, a shed for contagious diseases, a cholera shed, a well and two latrines, one for males and the other for females, a linen room, two patients' property rooms, an office room and a hall for prescribing for out-patients and a dispensary room. The accommodation is sufficient.

(*b*) *State of repair of buildings.*—The main building and wards do not require any repairs, but as remarked by the District Medical and Sanitary Commissioner the hospital compound wall is not yet completed. The materials are being gathered and [illegible] The dug out.

(*c*) *State of repair of furniture.*—All articles of furniture are in good order.

(*d*) *Number of patients treated as compared with previous years*—

Years.	Total number of In-door.	Out-door.
1892–93	457	9,380
1893–94	423	11,337
1894–95	425	11,569

(*e*) *Mortality and actual causes of it.*—There were 28 deaths in the in-door patients, of whom seven died of dysentery, two of malarial fevers, two of secondary syphilis, one of gonorrhœa, seven of beri-beri, one of phthisis pulmonalis, one of threatened abortion, one of apoplexy, five of diseases of digestive organs and one of local injury.

(*f*) *Operations and results.*—Major operations performed in the hospital are 25 and minor operations 285, all of which proved successful.

(*g*) *Establishment whether sufficient and efficient.*—It is sufficient and efficient. The civil apothecary died on the 12th February 1895 and I am in charge of the hospital since that period.

(*h*) *Midwives—Work actually done.*—The midwife conducted 110 out and two in-door cases against 63 out and seven in-door cases.

(*i*) *If Dispensaries for Caste and Gosha Women who cannot or will not attend the ordinary dispensaries have been working, a special note should be added on their working.*—There is no such institution here.

(*j*) *General Remarks.*—There is a cart-stand close to the hospital compound. As the emanation of foul smells coming from that place is injurious to the health of the patients, it is highly desirable that the cart-stand be removed to some other distant locality.

Ellore,
25th April 1895.

3rd Class Hospital Assistant,
Municipal Hospital.

Dis. No. 1586-Rev.

Forwarded.

2. The roads in the municipality are, on the whole, in very fair order.

3. It may not be out of place to remark that practically nothing seems to have been done during the year to improve the sanitation of the town. The wood-yards and rubbish depôt have not yet been removed in spite of the remarks passed by Government in the review of the municipal report for 1893–94. The wood merchants were prosecuted before the Deputy Collector in charge of the Division and not before the Head Assistant Magistrate as stated by the chairman in paragraph 24 of his report. The sanitation of the town is susceptible of considerable improvement, and appears to call for the personal attention of the chairman.

4th June 1895.

From the Chairman, Municipal Council, Ellore, dated 10th June 1895, No. 12.

Abstract.—Submitting the statements on the progress of education in the Ellore Municipality for 1894–95.

Order—dated 12th September 1895, No. 1478 M., Local and Municipal.

The receipts and charges of the Ellore Municipality for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

	Actuals, 1893–94.	Budget estimate, 1894–95.	Revised estimate, 1894–95.	Actuals, 1894–95.
Receipts.	Rs.	Rs.	Rs.	Rs.
Balance brought forward	3,042	3,710	6,900	6,902
Tax on Arts	3,340	3,200	3,200	4,019
,, Buildings and Lands	6,615	6,950	7,000	8,452
,, Vehicles and Animals	1,064	1,150	1,100	987
,, Carts	1,830	1,900	1,850	1,778
Tolls	6,209	6,200	7,010	7,010
Realizations under Special Acts	14	20	10	30
Rent of Lands, Buildings, &c., and Sale-proceeds of Lands, &c. ..	298	300	320	294
Conservancy Receipts	..	150	150	192
Fees and Revenue from Educational Institutions	80	1,060	160	158
,, ,, Medical Institutions	5	10	10	..
Income from Markets and Slaughter-houses	1,488	2,990	1,490	1,485
License Fees	1,184	1,100	1,000	1,030
Other Fees	425	500	430	418
Fines under Municipal and other Acts	698	600	700	715
Grants and Contributions from Government	128	70	50	47
,, ,, from Local Boards	2,667	2,050	1,660	1,660
Recoveries for Services to Private Individuals	760	840	740	779
Miscellaneous	70	70	70	38
Advances Recovered	100	200	200	..
Total ..	30,017	33,070	34,050	35,994

27. The improvements made during the year are (1) new slaughter-house under construction; (2) twelve iron dust-bins were purchased; (3) a piece of land purchased to erect latrines; and (4) another piece for rubbish depôt.

28. There are eighteen public latrines, nine have brick-wall enclosures and nine tatty enclosures.

29. The carts hired by the council during the year for purposes of conservancy were two for cleansing drains, three for cess-pools, five for removing rubbish and one for night-soil. They are hired at Rs. 15 each per month. All the carts are of the common country pattern with bamboo baskets, except the night-soil cart, which is of iron, and the cess-pool carts with wooden barrels.

30. *Grant IV, Lighting and Miscellaneous Municipal purposes*—(1) *Lighting.*—Rupees 1,785–10–9 were spent against Rs. 1,880 estimated. The decrease of Rs. 94–5–3 under expenditure is due to contingent charges which cannot be accurately estimated.

During the latter part of the year 100 new lamps were put up, thus raising the number to 279 on the 31st March 1895.

(2) (ii) *Slaughter-house.*—Rupees 80 were provided and Rs. 76–10–11 were spent, the slight difference calls for no remarks.

(4) *Travellers' Bungalow.*—Rupees 90–2–3 were spent against an estimate of Rs. 90.

(8) *Fire and* (9) *Other Charges.*—Rupees 1,174–10–5 were spent against the revised estimate of Rs. 1,270. The decrease of Rs. 95–5–7 is partly due to nothing being spent during the year under head "Fire" and mostly to "Other charges," the items of which cannot be accurately estimated.

31. *Grant V*—(*a*) *General Establishment*—(1) *Office Establishment.*—Rupees 1,443–4–9 were spent against Rs. 1,450, the decrease is due to stoppages.

(*b*) *Collection of Municipal Taxes* (i) *Establishment.*—Rupees 174 were spent and Rs. 180 were estimated, the decrease of Rs. 6 is due to round figure being employed in the estimate.

(ii) *Contingencies.*—Rupees 160 were estimated and Rs. 90–3–6 spent, the decrease is due to the purchase of a very small number of account books and printed forms during the year.

(*c*) *Collection of Tolls* (ii) *Contingencies.*—Rupees 60 were provided in the estimate and Rs. 56–6–6 were spent as printing charges of toll-tickets.

(*d*) *Office Contingencies other than* (*b*) (ii).—Rupees 223–2–2 or Rs. 36–13–10 were spent against Rs. 260 in the revised estimate, as this is a fluctuating item, the decrease needs no explanation.

(*e*) *Contribution for Central Office and Audit Establishments.*—Rupees 120 were provided and that amount was paid during the year.

32. *Advances recoverable.*—Rupees 300–9–11 represents the amount to be recovered from the Executive Engineer, Kistna, on account of ferry charges in connection with the repairs of the iron bridge, and to payment made for gravel, awaiting adjustment to its proper head.

33. *Pensions and Gratuities.*—Rupees 28–8–4 spent under this head represents the charges incurred on account of sending a Sanitary Inspector from this municipality to Madras for training to the Medical College in hygiene.

IV.—CLOSING BALANCE.

34. The year closed with a balance of Rs. 5,990–4–0 against an estimated balance of Rs. 3,600. The increase of Rs. 2,390–4–0 is due to an increase in actual receipts of Rs. 1,944–6–1 and to a decrease of Rs. 445–13–11 in actual expenditure.

35. The accounts of the year under report were not audited.

36. This report was approved at meeting, dated 23rd May 1895.

34 unsuccessful and four unknown. The average cost for successful case was As. 4 against As. 2–8 of the previous year. The increase in the cost of each case is due to the purchase of glycerine paste.

The number of births registered during the year was 665 and the number of children under one year of age successfully vaccinated was 505 against 443 of last year. During the year 11 died from small-pox against 12 of last year. The first-class vaccinator vaccinated on an average 101 and the second-class vaccinator 84 cases per month. The medical subordinates attached to the municipal hospital vaccinated 157, of which 150 proved successful against 176 of the previous year. The decrease of 26 cases is due to the transfer of the hospital assistant to Tuni for a time and to the death of the civil apothecary in February last. The number of prosecutions instituted for failure to have children vaccinated was 303 against 321 of last year.

(4) *Registration of Births and Deaths.*—The decrease of Rs. 5–4–8 under establishment is due to stoppages, and of Rs. 1–13–3 under contingencies needs no explanation.

There were during the year 11 deaths from small-pox, 110 from fevers, 50 from bowel-complaints, 1 from suicides, 8 from accidents and 380 from all other causes against 116 deaths from cholera, 12 from small-pox, 119 from fevers, 69 from bowel-complaints, and 424 from all other causes. Thus the death-rate per mille of population is 19·09 against 25·18 of last year. The number of births registered during the year was 665 against 764 of previous year, the ratio per mille being 22·63 against 26·00 of last year. Eleven prosecutions were instituted for failure to register births and deaths, of these eight were convicted and three dismissed.

(5) *Conservancy; Road-cleaning and Road-watering.*—Rupees 4,039–2–0 were spent on account of (1) establishment against a provision of Rs. 4,050 in the revised estimate; the decrease is due to fines and stoppages.

(ii) *Hire of Carts, &c.*—Rupees 900 were estimated, but Rs. 1,124–7–11 were spent. The increase of Rs. 224–7–11 is due entirely to the purchase of a piece of ground under the Acquisition Act for a rubbish depôt for Rs. 230.

(*b*) *Private Scavenging.*—The decrease in actuals of Rs. 7–2–7 under establishment and Rs. 16–3–7 under hire of carts, &c., is due to fines and stoppages.

(*c*) *Cess-pool Service.*—Rupees 175–10–7 under establishment and Rs. 531–1–5 under hire of carts and Rs. 7–0–3 under contingencies were spent against an estimated allotment of Rs. 180, Rs. 540 and Rs. 50, respectively. In the case of the two former the decrease is due to fines and stoppages and in the latter it is due to cess-pool barrels not requiring as much repairs as was estimated.

(*d*) *Cholera Charges.*—Rupees 78–2–2 were paid for temporary establishment and contingent charges in the current year on account of last year, and I am glad to state that there was no cholera in the year under report.

(*e*) *Contingencies.*—The decrease of Rs. 21–2–9 under the estimate cannot be accurately accounted for as it is a fluctuating item.

25. The number of houses under the private scavenging system was 186 on the 31st March 1895 against 215 of last year. The fall is due partly to the peoples' unwillingness to place themselves under municipal control and chiefly to the constant strikes here among scavengers. Whenever they are fined for neglect of work or pay deducted for absence from service without leave, they strike work and cause any amount of inconvenience to the town. During recent strikes among scavengers on account of the chairman's attempts to reduce their number as per last budget, the council was obliged temporarily to retain the usual number in spite of Government Order to the contrary, to prevent great inconvenience and public nuisance caused to the people by the strike. I have written to so many municipalities for a supply of scavengers, but in vain. I trust that the provision in the new bill for such strikes will be an ample check for future strikes.

26. The cess-pools are 27 in number (of these there are 18 paying Rs. 12 and 9 paying Rs. 9 per year each) against 31 of the previous year.

year. The number of schools to which grants were paid during the year was 17 against 15 of the previous year. The number of pupils examined during the year was 431 and those passed 300 or 69·60 per cent. against 285 and 200 or 70·17 per cent. respectively of previous year. On the whole the progress made during the year is satisfactory.

23. The difference in the number of aided schools and the number on the rolls between the statements sent by the Assistant Inspector of Schools and municipal statement is due to one school being closed during the year as reported by the Assistant Inspector of Schools in statement I and the difference in the number on the rolls on 31st March 1895 is due to the same officer treating the C. M. Church school as a lower secondary school.

24. *Grant III (Sanitation and Medical Services)*—(1) *Hospitals and Dispensaries.*—Rs. 4,439–2–4 were spent against Rs. 4,480, the estimated allotment. The decrease of Rs. 40–13–8 is due chiefly to a decrease in establishment, owing to the death of the civil apothecary in charge of the hospital in the latter part of the official year. The number of patients treated in the hospital during the year was 11,994, of these 425 are in-patients and 11,569 out-patients against 423 and 11,337 of the previous year, thus showing an increase of two in in—and 232 in out-patients during the year under report. The cost per patient is As. 6 against As. 5–8 of the previous year; the increase is chiefly due to an increase of Rs. 700 in the cost of medicines and supplies.

I may mention here that, from a resolution of the hospital sub-committee and the remarks of the divisional officer, it will appear that this hospital has been well managed by the hospital assistant without a civil apothecary. There is, I am glad to observe, a saving of Rs. 340 by the careful management of the hospital sub-committee than last year.

The midwife attended 112 cases against 70 of the previous year or 42 more. From the above you will find that the work turned out by the midwife is satisfactory.

(i) With reference to paragraph 3 of the hospital assistant's report regarding sanitation, I have the honour to inform as follows:—(*a*) the wood merchants were prosecuted for not removing the wood-yards from within municipal limits before the Head Assistant Magistrate, Gódávari, but on certain technical grounds they were thrown out. They will be again prosecuted in the course of the year if they do not remove their wood-yards.

(ii) The Dasadu matam rubbish depôt will be closed as soon as the rubbish deposited there is removed by the parties who purchased it lately. Plans and estimates to remove the depôt further off the matam are under preparation.

(iii) The subject regarding the mooring of boats in the Kistna canal and thereby polluting the water-supply both of the canal and the only fresh-water tank has already been brought to the notice of Government and nothing has been done yet in that connection. The council hopes that Government will be pleased to take early steps to remove the mooring of boats from the present locality to down the Madapally sluice as the water-supply to Gazivilly Vari tank has to be made from above the said channel.

(iv) Regarding the state of repair of buildings paragraph 5 (*b*), the buildings and the wall therein referred to have been taken on hand and will reach completion within a week or two.

(2) (*a*) *Contributions to Provincial Funds.*—Rs. 238 or Rs. 88 more were contributed during the year. The increase is due chiefly to the rate of contribution towards the Medical College being raised from Rs. 44 of the previous year to Rs. 137 in the current year as demanded by the Accountant-General—*vide* Treasury Deputy Collector's letter, dated 21st February 1895, No. 1118-Acc. of 1895.

(3) *Vaccination.*—Rs. 541–1–10 were spent against a provision of Rs. 450; the increase of Rs. 91–1–10 is due mostly to the purchase of fresh animal vaccine (glycerine paste) from the Rajahmundry depôt at a cost of Rs. 130–12–0.

The number of cases vaccinated during the year was 2,219 against 2,297 of the previous year or 78 cases less. Of the 2,219 cases vaccinated, 2,181 were successful.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following papers:—

From M.R.Ry. C. SITARAMAYYA Pantulu Garu, Chairman, Municipal Council, Ellore, to the Chief Secretary to Government, dated 25th May 1895, No. 10.

I have the honour to submit the administration report of the Ellore Municipality for 1894–95, together with the usual statements and the reports of the medical officer on the working of the hospital and educational report by the Assistant Inspector of Schools, Second Division.

I.—Constitution of the Council.

1. Statement X gives the constitution of the council. The number of councillors on the 31st March 1895 was seventeen against eighteen, the prescribed number.

2. I have been chairman from the beginning of the year up to 28th October last, the date on which my councillorship expired. After being re-elected as a councillor, I was again elected as chairman by the council on 15th January and gazetted on the 19th March 1895; during the interval, the Revenue Divisional officer was in charge of the office of chairman.

3. There were six vacancies during the year and one vacancy of the previous year among the elected councillors. The delay in filling the vacancy of the previous year is due to Government ordering re-election in their G.O., dated 2nd August 1894, Mis. No. 1011. All the above vacancies were caused by the expiry of their term of office. Elections were held to fill in these vacancies in September and November last; my reports on the result of these elections, dated 22nd September 1894, No. 4, and 17th November 1894, No. 24, give all the details. There were two vacancies among the nominated councillors during the year—one caused by the member resigning his office and the other by the expiry of his term. Of these, the former was filled during the year and the latter has not been filled up to date.

4. The total number of meetings actually held during the year was 43 against 37 and those adjourned for want of quorum were four against three of the previous year. The average attendance at each meeting was 8·95 against 7·94 of the previous year, that of the officials being ·56 and of non-officials 8·39 against ·16 and 7·78 respectively of the previous year. From the above it will be seen that there was a rise in the attendance of both the official and non-official members of the council during the year under report.

II.—Receipts.

A.—Receipts from Taxation.

5. *Tax on Arts.*—The increase of Rs. 819 over the revised estimate is due partly to the collection of arrears and partly to the thorough revision of the list.

(*a*) The demand originally assessed for the current year was Rs. 4,065, of which Rs. 176–8–0 were remitted by the council on appeal. Rs. 3,715–8–0 were collected, Rs. 65 were written off as irrecoverable and Rs. 108 left uncollected at the close of the year.

(*b*) Of the arrears of previous year, viz., Rs. 310–8–0, Rs. 303–8–0 were collected, Rs. 6–8–0 written off and As. 8 left uncollected from oversight.

(*c*) Three hundred and ninety-two warrants were issued against 252 of the previous year and Rs. 708 were collected in 372 cases after issue of warrants.

6. *Tax on Buildings.*—The increase of Rs. 1,418–11–6 over the revised estimate is due chiefly to the collection of arrears and to the collection of the current demand with the exception of Rs. 52–10–0 only.

(*a*) The demand originally assessed was Rs. 7,365–10–0, of which Rs. 2–13–6 were remitted, Rs. 7,278–5–6 collected, Rs. 21–7–0 remitted on account of vacant houses, Rs. 10–6–0 written off the accounts and Rs. 52–10–0 left uncollected at the close of the year.

(*b*) Of Rs. 967–7–0, the arrears of previous year, Rs. 940–6–0 were collected, Rs. 21–13–0 written off and Rs. 5–4–0 still uncollected.

(*c*) During the year 1,565 warrants were issued against 574 of the previous year. In 1,458 cases Rs. 1,234–8–0 were collected without distraint and in 47 cases property was distrained but nothing sold.

7. *Tax on Lands.*—The increase of Rs. 32–14–0 over the revised estimate is due to the arrear and current demand being almost fully collected.

The current demand was Rs. 191–2–0 and the amount collected was Rs. 185–1–0, thus leaving only a balance at the close of the year of Rs. 6–1–0. This is due to the fact that the owners of the land left the town and their whereabouts are unknown.

(*a*) Under this tax, of the arrear of Rs. 55–9–0, Rs. 47–13–0 were collected and Rs. 7–12–0 written off.

(*b*) Ninety warrants were issued against 82 warrants of previous year. In 76 cases Rs. 57–13–0 were collected and the remaining left unexecuted during the year.

8. *Tax on Vehicles with springs.*—Rs. 133–8–0 were collected against Rs. 150 in the revised estimate, the decrease is due to a few vehicles not being licensed during the year as they were not used.

9. The decrease of Rs. 96–4–0 under *Tax on Animals* and of Rs. 72 under *Tax on Carts* in actuals under that of the revised estimate figure is due to a further fall in wheeled traffic since the opening of the railway.

10. *Tolls.*—The right of collecting tolls was sold for Rs. 7,010 and the amount was fully realized during the year.

11. The incidence of taxation per head of population as per statement I, head 2, is As. 12–2 including tolls and As. 8–3 excluding it against As. 10–5 and As. 7 of the previous year. Thus there is a perceptible rise in the incidence of taxation.

B.—Miscellaneous Receipts.

12. *Realization under Special Acts*—(*c*) *Fees under Act II of* 1888.—Rs. 30 were realized against Rs. 10 anticipated; the increase is due to the unexpected arrival of the Great Indian Circus in the last quarter of the year.

13. *Revenue derived from Municipal property and powers apart from taxation.*—Rs. 3–4–0 were realized under (*a*) (i) *Rent of Lands* and Rs. 7–4–0 under (iii) *Avenue Receipts* against Rs. 20, the revised estimate figure.

(*a*) (iv) *Fees from Travellers' bungalow.*—Rs. 200 were estimated and Rs. 212 realized.

(*b*) (iii) *Sale-proceeds of old materials, &c.*—Rs. 70–15–6 were realized against Rs. 100 estimated. The decrease Rs. 29–0–6 cannot be explained as it is a fluctuating item.

(*c*) *Conservancy Receipts.*—The increase of Rs. 42 over the estimate is chiefly due to the competition among bidders.

(*d*) (i) *Fees from Educational institutions.*—Rs. 158–2–0, against Rs. 160 estimated, were realized.

(*e*) (i) *Sale-proceeds and composition fees of Medicines.*—Only As. 6–6 were realized. In this connection I may mention here that the attention of the hospital sub-committee has already been drawn and rules have been framed by them to sell medicines and to collect monthly subscriptions from important people in the town, but the rules could not have been brought into force before the passing of last year's budget as there was no peon and proper supply of medicines.

(*f*) (ii) *Income from Slaughter-houses.*—The right of collecting these fees was sold for Rs. 1,485 and the same was realized. The difference of Rs. 5 between it and the revised estimate is due to round figure being used.

(*g*) *Other fees.*—Rs. 1,447–13–0 or Rs. 17–13–0 more than the estimate were collected. The slight differences in the items of this head need no explanation.

(*h*) *Fines under Municipal and other Acts.*—Rs. 715–6–5 were realized against Rs. 700 estimated. The statement showing the different classes of offences will follow.

13. (5) *Grants and Contributions*—(*a*) *From Government*—(1) *Education, other purposes.*—Rs. 47–5–0 were realized against Rs 50 in the revised estimate. This is a Provincial grant paid as stipend towards the salary of the gymnastic instructor.

(*b*) *From Local Boards*—(ii) *Medical.*—Rs. 1,659–12–10 were paid as contribution by the Local Fund Board towards Ellore municipal hospital charges.

14. (6) *Miscellaneous*—(*a*) *Recoveries on account of services rendered to private individuals.*—Rs. 779–6–0 or Rs. 39–6–0 more were realized under this head. The increase is chiefly due to recoveries under private scavenging realizing Rs. 36 more than was anticipated.

(*b*) *Other items.*—The decrease of Rs. 32–4–10 in the items under this head cannot accurately be accounted for as they are of a fluctuating nature.

15. (7) *Extraordinary and debt*—(*a*) *Advances.*—Nothing was recovered under this item.

16. The total actual receipts including the opening balance were Rs. 35,994–6–1 against the revised estimate figure Rs. 34,050, thus showing an increase of Rupees 1,944–6–1 in the actuals which has been explained above.

17. Statement I-A is left blank as there are no endowments entrusted to the municipal council.

III.—EXPENDITURE.

18. *Grant I (Public Works).*—Rs. 9,286–5–9 were spent under this grant against an estimated amount of Rs. 9,310. The decrease of Rs. 23–10–3 in the actuals is explained as follows.

(1) *New Works*—(*a*) *Communications.*—The decrease of Rs. 167–9–10 is chiefly due to the road proposed to be constructed from Burra well to canal bank not having been constructed during the year owing to certain difficulties in the acquisition of the land required for the road. It is now almost settled and steps will be taken to construct the road. The amount however has been utilized for repairs to communications.

(*b*) *Buildings.*—Rs. 1,759–13–10 or Rs. 1,340–2–2 less than the estimate were spent; the decrease is due to the non-completion of the municipal office, slaughter-house and pucka latrines during the year from want of proper supply of material in the local bazaar. This amount has however been spent on repairs to buildings and communications.

(*d*) *Water-supply.*—For the construction of platforms, &c., to wells Rs. 150 were provided, but nothing was spent during the year in that connection, hence the decrease of Rs. 150 in actuals.

(2) *Repairs*—(*a*) *Communications.*—The increase in actuals of Rs. 1,525–9–7 over the estimate is due to roads other than those provided in the estimate being repaired as they were very much broken up and the repairs had to be urgently taken up.

(*b*) *Buildings.*—Only Rs. 200 were provided and Rs. 457–1–4 were spent. The increase is due to unforeseen repairs being done to the travellers' bungalow and tatty latrines.

(*c*) *Drainage.*—Under this head Rs. 750 were provided and that spent being Rs. 643–14–2, and the balance Rs. 106–1–10 was spent in repairing certain works for reaso stated above.

(*d*) *Water-supply.*—The decrease of Rs. 74–4–1 under this head is chiefly due to the council's intention of spending a large sum for completely repairing the Gazivilly tank next year as this is the only fresh-water tank in the town.

25/7/96
6 points or
Retention when the action ordered in general terms is specific

(3) *Establishment.*—Rs. 820 were provided and Rs. 814–5–9 were spent.

(4) *Tools and plant and other stores.*—The increase of Rs. 37–7–0 is due to the purchase of more road-making tools than was estimated, as those in stock were found to be unserviceable.

19. *Grant II, Education* (1).—The amount allotted under this head was Rs. 3,290 and that spent was Rs. 2,989–8–2. Thus the decrease in expenditure was Rs. 300–7–10 which is accounted for as follows.

(2) *Municipal Schools*—(i) *On Salary System*—(*a*) *Establishment.*—The decrease of Rs. 106–0–11 is due to the establishment not being brought up to its full strength until the latter part of the year.

(*b*) *Contingencies.*—The decrease of Rupees 42–14–2 is small and needs no explanation.

(ii) *On Salary Results System.*—The decrease of Rs. 141–13–10 under this head is due chiefly to result grants earned being poor. The teachers concerned have been warned.

(3) *Salary Grants.*—The increase of Rs. 53–8–0 is due to arrear grants for the months of February and March 1894 being paid during the current year at the higher rate.

(4) *Result Grants.*—Rs. 943–3–4 or Rs. 56–12–8 less than the allotment were paid during the year to aided schools.

(6) *Inspection*—(*b*) *Municipal Inspectors.*—The decrease of Rs. 11–5–3 is due mostly to contingent charges under this head.

(7) *Miscellaneous*—(*b*) *Common Gymnasium.*—Rs. 134–10–0 were spent against an estimated allotment of Rs. 120. The increase of Rs. 14–10–0 is chiefly due to contingencies, under which item the repairs to the gymnasium yard, &c., were charged.

(*c*) *Other items.*—Rs. 20 were provided and Rs. 10–5–0 spent.

20. *Municipal Salary System Schools.*—The number of pupils on the rolls on 31st March 1895 was 66 boys. The strength of the school in the lower secondary department including the upper primary department is 70 boys. The total expenditure from the date of opening of the school to the end of April last in the shape of school salaries, house rents and other charges is Rs. 564–11–10 and the income realized in the shape of school fees within the first four months of this year is Rs. 537–8–0. Thus it will be seen that the amount required from the municipal funds is only Rs. 27–3–10 for the last six months from the date of starting the school, which is merely nominal. It will be evident from the above that the school is almost, if not entirely, self-supporting and a reference to the progress report appended will further show the gradual and steady growth of the school. The council hopes, in the circumstances stated above, that the Government will be pleased to accord its sanction for its permanency.

21. *Municipal Salary Result System Schools.*—The number of pupils on the rolls on 31st March 1895 was 94 boys against 105 boys and 3 girls of last year. The decrease is chiefly due to the transfer of the school from one locality to another. The grants earned during the year were worse than last year, the decrease being chiefly due to the poor results of the Hindu Primary school. However I trust that under the able management of the Headmaster, Municipal Middle school, the school will soon prosper.

The results of school examination were poorer than last year, for of 61 pupils examined only 23 passed against 63 and 38 of the previous year, the percentage of passes to examined being 37·70 against last year's 60·3.

22. *Result Schools aided from Municipal Funds.*—Seventeen schools were aided during the year against 15 of the previous year. Of the 17 only one school received grant for 1892–93; therefore 16 schools actually received aid during the current year. The grants earned were Rs. 779–7–0 and that paid were Rs. 664–9–0 for the current year together with an arrear grant of Rs. 278–10–4, thus making the total grant paid to aided schools to amount to Rs. 943–3–4 against Rs. 717–10–2 of the previous

do not appear to have worked satisfactorily and in which the results of the examinations were again poor, it declined. The council aided one secondary school with salary grants and seventeen primary schools with result grants against one and fourteen, respectively, in 1893–94. The decline in the strength of the former institution was counterbalanced by an increase in that of the latter, but here again the performances in the grant examinations were poor, and in spite of the remarks upon this point in the last two annual reviews, more than one-third of the allotment for result grants was allowed to lapse. Notwithstanding the orders in paragraph 4 (2) of G.O., dated 20th July 1894, No. 926 M., ~~50 per cent.~~ of the teachers in the aided schools were still unpassed, and it does not appear that the grants payable to them were either reduced or withheld as was directed. The Chairman will be requested to explain why these instructions were not followed. The total number of boys under instruction in the municipal and aided schools rose from 774 to 895, or 41·7 per cent. of the male population of school-going age, but it was still much below the general average for municipalities in 1893–94. It is apparent that there is ample scope for improvement in this branch of the council's duties. The question of ~~retaining the~~ lower secondary school ~~permanently~~ will be considered on receipt of the report from the Director called for in G.O., dated 3rd April 1895, No. 601 M.

(3) *Medical Relief.*—There was a further increase in the number of patients treated at the municipal hospital. The number of labour cases attended by the midwife also showed a satisfactory advance. The cart-stand in the vicinity of the hospital, referred to in paragraph 5 (*j*) of the hospital assistant's report, should be kept in a more sanitary condition.

(4) *Vaccination and Vital Statistics.*—The reported number of persons vaccinated during the year declined by nine[illegible]-seven, but the quality of the work is stated to have again been good. Though 665 births were registered during the year, the number of successful cases of infantile vaccination was only 535. This is not satisfactory. Better results should be obtained in the current year.

~~In spite of~~ the remarks in paragraph 4 (4) of G.O., dated 20th July 1894, No. 926 M., the registration of vital statistics, instead of improving, was more defective than ever. The returns are obviously incomplete, and yet there were only eleven prosecutions for failure to register. This is yet another instance of the laxity of the council's administration.

(5) *Sanitation.*—The expenditure under this head amounted to 95·1 per cent. of the allotment and was 23·4 per cent. of the current receipts. It was observed in the review of the administration of 1893–94 that, notwithstanding the remarks in the review for the year previous, no improvement of any importance had been effected in the sanitary condition of the town, but in the year under report the only step in this direction that appears to have been taken is the provision of twelve additional dust-bins. The Chairman's report on the condition of the town is once again meagre, but the hospital assistant, the Revenue divisional officer and the Sanitary Commissioner, the notes of whose last inspection are printed in G.O., dated 6th May 1895, No. 801 M., are unanimous in pronouncing the existing state of things to be unsatisfactory in the last degree. The matter has been fully dealt with in the order quoted above and the council are warned that immediate and energetic action must be taken to improve matters.

(6) *General Remarks.*—The year closed with a balance of Rs. 5,990 or 20·6 per cent. of the receipts. The council cannot, therefore, plead that want of funds has prevented it from carrying out the reforms that were urged upon it in G.O., dated 20th July 1894, No. 926 M., reviewing the report for 1893–94. Except in the collection of the principal taxes, the administration of the municipality has, in spite of the strictures in that order, been inefficient and lax in almost every direction, and especially so in the matter of sanitation, private scavenging, infantile vaccination and the registration of vital statistics, although the council's special attention was called to these points therein. ~~The Government cannot permit its instructions to be disregarded in this manner, and, as a mark of its dissatisfaction with the administration~~

2. The municipal council held forty-three meetings against thirty-seven in 1893–94. The average attendance of the non-official members continued to be fair, but that of the ~~one official—the Revenue divisional officer—~~ though it improved somewhat, was still very poor. The Collector should again ~~inform him~~ that Government expects him to attend the meetings of the council as often as his other duties will permit. Seven seats were filled by election and six of these were contested, 37·8 per cent. of the voters concerned attending the poll.

3. *Receipts.*— (1) There was an increase of Rs. 186 in the net current demand of the tax on arts, and of Rs. 154 in that of the tax on buildings. The demand under the land-tax remained almost stationary. Except in the case of the arrears of this last, the collections under the principal taxes—owing, apparently, to increased resort to coercive measures—improved appreciably and were, on the whole, satisfactory.

(2) The income from tolls increased, but there was a decline in that from license fees which should have been explained. A small sum was, for the first time for several years, realized by the sale of the town-sweepings. The council should ~~endeavour~~ to further develop this source of revenue in the current year.

(3) It is noted with dissatisfaction that the number of houses served by the private scavenging agency again fell (from 215 to 186), and that the system was again worked at a loss (Rs. 339) to the council. This is the third successive annual review in which it has been pointed out to the council that this branch of its work has been seriously neglected. In that for last year attention was called to the necessity of prosecuting those house-holders who declined to join the system and yet kept their premises in an insanitary condition. The statement submitted with the second of the letters read above shows, however, that not a single prosecution under section 221 of the Act was instituted during the whole course of the year under report. In view of this fact, and seeing that in many other towns the system is working satisfactorily, it is, in the opinion of Government, idle for the Chairman to represent, as he does, that in Ellore the unwillingness of the people to join it and the strikes among the toties are insurmountable obstacles to its success. The Government cannot but consider that its failure must be due to a reprehensible want of interest in the matter on the part of the council and its executive, and that steps to enforce compliance with the orders already issued are called for.

4. *Expenditure*—(1) *Public Works.*—The only new works of any importance undertaken during the year were the extension of the municipal office building and the construction of a slaughter-house, and upon these only Rs. 625 and Rs. 650, respectively, were spent, against budget allotments of Rs 1,000 in each case. It is observed with ~~displeasure~~ that the latrines for which provision was made in the budget for 1893–94 have not even yet been constructed, and that the Chairman again offers as an excuse for this neglect a plea which in the last annual review was pronounced by Government to be totally inadequate. ~~The Government must insist upon the immediate completion of these works.~~ No explanation ~~whatever~~ is given for the omission to spend any of the budget allotment for the improvement of wells. ~~The Chairman will now supply the omission.~~ The outlay on communications was Rs. 5,358, or 76·5 per cent. of the net municipal income from tolls. The sanction of Government should have been obtained for the transfer of Rs. 167–9–10 from New Works to Repairs—Communications, referred to in paragraph 18 of the Chairman's report. The town roads are reported by the Revenue divisional officer to have been in very fair order, but in the notes of his recent inspection of the town, the Sanitary Commissioner remarks that, with a single exception, their condition was bad. The expenditure upon them should have been sufficient to keep them in excellent order, and it would appear that this branch of the council's work requires close scrutiny.

(2) *Education.*—The net expenditure on education amounted to Rs. 2,784, or 12·5 per cent. of the income from taxation. Of this sum about two-fifths were spent on secondary, and the remainder on primary education. To the four primary schools on the salary-results system a lower secondary school on the salary system was added. The attendance at the newly-opened school was fair, but in the others, which

From the Chairman, Municipal Council, Ellore, dated 10th June 1895, No. 12.

ABSTRACT.—Submitting the statements on the progress of education in the Ellore Municipality for 1894–95.

ORDER—dated August 1895, No. M., Local and Municipal.

The receipts and charges of the Ellore Municipality for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

	Actuals, 1893-94.	Budget Estimate, 1894–95.	Revised estimate, 1894–95.	Actuals, 1894–95.
Receipts.	RS.	RS.	RS.	RS.

Dis. No. 1586-Rev.

Forwarded.

2. The roads in the municipality are, on the whole, in very fair order.

3. It may not be out of place to remark that practically nothing seems to have been done during the year to improve the sanitation of the town. The wood-yards and rubbish depôt have not yet been removed in spite of the remarks passed by Government in the review of the municipal report for 1893–94. The wood merchants were prosecuted before the Deputy Collector in charge of the Division and not before the Head Assistant Magistrate as stated by the chairman in paragraph 24 of his report. The sanitation of the town is susceptible of considerable improvement, and appears to call for the personal attention of the chairman.

(Signed) L. G. MOORE,
Ag. Head Assistant Collector.

Ag. Collector.

4*th June* 1895.

ENCLOSURE.

CONCISE Annual Report on Municipal Hospital, Ellore, for the official year 1894–95.

Public Health.—The public health of the place is not so good as in last year. The most common diseases were dysentery, malarial fevers, syphilitic affections, rheumatic affections, gonorrhœa, scurvy, diseases of the nervous system, beri-beri, diseases of the eye, diseases of the lungs, diseases of liver, bowel-complaints, ulcers and skin diseases.

2. *Vital Statistics.*—The vital statistics are herewith sent in a form attached.

3. *Sanitation.*—Sanitation is much the same as in last year. The proposals made last year for the removal of wood yards and the rubbish depôt at Dhasirimatam have not yet been carried out. As for the water-supply of the town, most of the people in Ellore town and almost all of Powerpet drink Krishna canal water, which is polluted in many ways by boatmen and boat passengers while the boats stand in the heart of the town, and also polluted by the general public of the place by bathing, washing, &c. In this connection, I would suggest that boats be made to stand beyond the limits of the town towards the east so as to prevent all possible pollution which happen otherwise. To a better hygienic condition of the water I would also suggest that water may be conserved as the water is not liable to any pollution above the town.

4. *Vaccination.*—The total number of cases vaccinated by municipal vaccinators P. Subbaroyadu and I. Narayanasamy were 2,219 against 2,297 cases of the past year. At the dispensary 157 cases were vaccinated against 176 of the past year. The decrease in the number of cases operated on at the dispensary is due to my transfer to Local Fund dispensary, Tuni, during the months of June and July 1894 and also to the absence of civil apothecary from February, on the 12th of which he died.

5. *Hospitals and Dispensaries—(a) Nature and sufficiency of accommodation.*—This hospital has a male and a female ward, a lying-in ward, a shed for contagious diseases, a cholera shed, a well and two latrines, one for males and the other for females, a linen room, two patients' property rooms, an office room and a hall for prescribing for out-patients and a dispensary room. The accommodation is sufficient.

(*b*) *State of repair of buildings.*—The main building and wards do not require any repairs, but as remarked by the District Medical and Sanitary officer and the Sanitary Commissioner the two sheds are quite unfit for accommodation and immediate repairs seem highly necessary. The hospital compound wall is not yet completed. The materials are being gathered and foundation dug out.

(*c*) *State of repair of furniture.*—All articles of furniture are in good order.

(*d*) *Number of patients treated as compared with previous years—*

Years.	Total number of In-door.	Out-door.
1892–93	457	9,380
1893–94	423	11,337
1894–95	425	11,569

(*e*) *Mortality and actual causes of it.*—There were 28 deaths in the in-door patients, of whom seven died of dysentery, two of malarial fevers, two of secondary syphilis, one of gonorrhœa, seven of beri-beri, one of phthisis pulmonalis, one of threatened abortion, one of apoplexy, five of diseases of digestive organs and one of local injury.

(*f*) *Operations and results.*—Major operations performed in the hospital are 25 and minor operations 285, all of which proved successful.

(*g*) *Establishment whether sufficient and efficient.*—It is sufficient and efficient. The civil apothecary died on the 12th February 1895 and I am in charge of the hospital since that period.

(*h*) *Midwives—Work actually done.*—The midwife conducted 110 out and two in-door cases against 63 out and seven in-door cases.

(*i*) *If Dispensaries for Caste and Gosha Women who cannot or will not attend the ordinary dispensaries have been working, a special note should be added on their working.*—There is no such institution here.

(*j*) *General Remarks.*—There is a cart-stand close to the hospital compound. As the emanation of foul smells coming from that place is injurious to the health of the patients, it is highly desirable that the cart-stand be removed to some other distant locality.

ELLORE,
25*th April* 1895.

(Signed) D. P. SUBRAYALU NAIDU,
3rd Class Hospital Assistant,
Municipal Hospital.

34 unsuccessful and four unknown. The average cost for successful case was As. 4 against As. 2–8 of the previous year. The increase in the cost of each case is due to the purchase of glycerine paste.

The number of births registered during the year was 665 and the number of children under one year of age successfully vaccinated was 505 against 443 of last year. During the year 11 died from small-pox against 12 of last year. The first-class vaccinator vaccinated on an average 101 and the second-class vaccinator 84 cases per month. The medical subordinates attached to the municipal hospital vaccinated 157, of which 150 proved successful against 176 of the previous year. The decrease of 26 cases is due to the transfer of the hospital assistant to Tuni for a time and to the death of the civil apothecary in February last. The number of prosecutions instituted for failure to have children vaccinated was 303 against 321 of last year.

(4) *Registration of Births and Deaths.*—The decrease of Rs. 5–4–8 under establishment is due to stoppages, and of Rs. 1–13–3 under contingencies needs no explanation.

There were during the year 11 deaths from small-pox, 110 from fevers, 50 from bowel-complaints, 1 from suicides, 8 from accidents and 380 from all other causes against 116 deaths from cholera, 12 from small-pox, 119 from fevers, 69 from bowel-complaints, and 424 from all other causes. Thus the death-rate per mille of population is 19·09 against 25·18 of last year. The number of births registered during the year was 665 against 764 of previous year, the ratio per mille being 22·63 against 26·00 of last year. Eleven prosecutions were instituted for failure to register births and deaths, of these eight were convicted and three dismissed.

(5) *Conservancy, Road-cleaning and Road-watering.*—Rupees 4,039–2–0 were spent on account of (1) establishment against a provision of Rs. 4,050 in the revised estimate; the decrease is due to fines and stoppages.

(ii) *Hire of Carts, &c.*—Rupees 900 were estimated, but Rs. 1,124–7–11 were spent. The increase of Rs. 224–7–11 is due entirely to the purchase of a piece of ground under the Acquisition Act for a rubbish depôt for Rs. 230.

(*b*) *Private Scavenging.*—The decrease in actuals of Rs. 7–2–7 under establishment and Rs. 16–3–7 under hire of carts, &c., is due to fines and stoppages.

(*c*) *Cess-pool Service.*—Rupees 175–10–7 under establishment and Rs. 531–1–5 under hire of carts and Rs. 7–0–3 under contingencies were spent against an estimated allotment of Rs. 180, Rs. 540 and Rs. 50, respectively. In the case of the two former the decrease is due to fines and stoppages and in the latter it is due to cess-pool barrels not requiring as much repairs as was estimated.

(*d*) *Cholera Charges.*—Rupees 78–2–2 were paid for temporary establishment and contingent charges in the current year on account of last year, and I am glad to state that there was no cholera in the year under report.

(*e*) *Contingencies* —The decrease of Rs. 21–2–9 under the estimate cannot be accurately accounted for as it is a fluctuating item.

25. The number of houses under the private scavenging system was 186 on the 31st March 1895 against 215 of last year. The fall is due partly to the peoples' unwillingness to place themselves under municipal control and chiefly to the constant strikes here among scavengers. Whenever they are fined for neglect of work or pay deducted for absence from service without leave, they strike work and cause any amount of inconvenience to the town. During recent strikes among scavengers on account of the chairman's attempts to reduce their number as per last budget, the council was obliged temporarily to retain the usual number in spite of Government Order to the contrary, to prevent great inconvenience and public nuisance caused to the people by the strike. I have written to so many municipalities for a supply of scavengers, but in vain. I trust that the provision in the new bill for such strikes will be an ample check for future strikes.

26. The cess-pools are 27 in number (of these there are 18 paying Rs. 12 and 9 paying Rs. 9 per year each) against 31 of the previous year.

27. The improvements made during the year are (1) new slaughter-house under construction; (2) twelve iron dust-bins were purchased; (3) a piece of land purchased to erect latrines; and (4) another piece for rubbish depôt.

28. There are eighteen public latrines, nine have brick-wall enclosures and nine tatty enclosures.

29. The carts hired by the council during the year for purposes of conservancy were two for cleansing drains, three for cess-pools, five for removing rubbish and one for night-soil. They are hired at Rs. 15 each per month. All the carts are of the common country pattern with bamboo baskets, except the night-soil cart, which is of iron, and the cess-pool carts with wooden barrels.

30. *Grant IV, Lighting and Miscellaneous Municipal purposes*—(1) *Lighting.*—Rupees 1,785–10–9 were spent against Rs. 1,880 estimated. The decrease of Rs. 94–5–3 under expenditure is due to contingent charges which cannot be accurately estimated.

During the latter part of the year 100 new lamps were put up, thus raising the number to 279 on the 31st March 1895.

(2) (ii) *Slaughter-house.*—Rupees 80 were provided and Rs. 76–10–11 were spent, the slight difference calls for no remarks.

(4) *Travellers' Bungalow.*—Rupees 90–2–3 were spent against an estimate of Rs. 90.

(8) *Fire and* (9) *Other Charges.*—Rupees 1,174–10–5 were spent against the revised estimate of Rs. 1,270. The decrease of Rs. 95–5–7 is partly due to nothing being spent during the year under head "Fire" and mostly to "Other charges," the items of which cannot be accurately estimated.

31. *Grant V*—(*a*) *General Establishment*—(1) *Office Establishment.*—Rupees 1,443–4–9 were spent against Rs. 1,450, the decrease is due to stoppages.

(*b*) *Collection of Municipal Taxes* (1) *Establishment.*—Rupees 174 were spent and Rs. 180 were estimated, the decrease of Rs. 6 is due to round figure being employed in the estimate.

(ii) *Contingencies.*—Rupees 160 were estimated and Rs. 90–3–6 spent, the decrease is due to the purchase of a very small number of account books and printed forms during the year.

(*c*) *Collection of Tolls* (ii) *Contingencies.*—Rupees 60 were provided in the estimate and Rs. 56–6–6 were spent as printing charges of toll-tickets.

(*d*) *Office Contingencies other than* (*b*) (ii).—Rupees 223–2–2 or Rs. 36–13–10 were spent against Rs. 260 in the revised estimate, as this is a fluctuating item, the decrease needs no explanation.

(*e*) *Contribution for Central Office and Audit Establishments.*—Rupees 120 were provided and that amount was paid during the year.

32. *Advances recoverable.*—Rupees 300–9–11 represents the amount to be recovered from the Executive Engineer, Kistna, on account of ferry charges in connection with the repairs of the iron bridge, and to payment made for gravel, awaiting adjustment to its proper head.

33. *Pensions and Gratuities.*—Rupees 28–8–4 spent under this head represents the charges incurred on account of sending a Sanitary Inspector from this municipality to Madras for training to the Medical College in hygiene.

IV.—Closing Balance.

34. The year closed with a balance of Rs. 5,990–4–0 against an estimated balance of Rs. 3,600. The increase of Rs. 2,390–4–0 is due to an increase in actual receipts of Rs. 1,944–6–1 and to a decrease of Rs. 445–13–11 in actual expenditure.

35. The accounts of the year under report were not audited.

36. This report was approved at meeting, dated 23rd May 1895.

year. The number of schools to which grants were paid during the year was 17 against 15 of the previous year. The number of pupils examined during the year was 431 and those passed 300 or 69·60 per cent. against 285 and 200 or 70·17 per cent. respectively of previous year. On the whole the progress made during the year is satisfactory.

23. The difference in the number of aided schools and the number on the rolls between the statements sent by the Assistant Inspector of Schools and municipal statement is due to one school being closed during the year as reported by the Assistant Inspector of Schools in statement I and the difference in the number on the rolls on 31st March 1895 is due to the same officer treating the C. M. Church school as a lower secondary school.

24. *Grant III (Sanitation and Medical Services)*—(1) *Hospitals and Dispensaries.*—Rs. 4,439–2–4 were spent against Rs. 4,480, the estimated allotment. The decrease of Rs. 40–13–8 is due chiefly to a decrease in establishment, owing to the death of the civil apothecary in charge of the hospital in the latter part of the official year. The number of patients treated in the hospital during the year was 11,994, of these 425 are in-patients and 11,569 out-patients against 423 and 11,337 of the previous year, thus showing an increase of two in in and 232, in out-patients during the year under report. The cost per patient is As. 6 against As. 5–8 of the previous year; the increase is chiefly due to an increase of Rs. 700 in the cost of medicines and supplies.

I may mention here that, from a resolution of the hospital sub-committee and the remarks of the divisional officer, it will appear that this hospital has been well managed by the hospital assistant without a civil apothecary. There is, I am glad to observe, a saving of Rs. 340 by the careful management of the hospital sub-committee than last year.

The midwife attended 112 cases against 70 of the previous year or 42 more. From the above you will find that the work turned out by the midwife is satisfactory.

(i) With reference to paragraph 3 of the hospital assistant's report regarding sanitation, I have the honour to inform as follows:—(*a*) the wood merchants were prosecuted for not removing the wood-yards from within municipal limits before the Head Assistant Magistrate, Gódávari, but on certain technical grounds they were thrown out. They will be again prosecuted in the course of the year if they do not remove their wood-yards.

(ii) The Dasadu matam rubbish depôt will be closed as soon as the rubbish deposited there is removed by the parties who purchased it lately. Plans and estimates to remove the depôt further off the matam are under preparation.

(iii) The subject regarding the mooring of boats in the Kistna canal and thereby polluting the water-supply both of the canal and the only fresh-water tank has already been brought to the notice of Government and nothing has been done yet in that connection. The council hopes that Government will be pleased to take early steps to remove the mooring of boats from the present locality to down the Madapally sluice as the water-supply to Gazivilly Vari tank has to be made from above the said channel.

(iv) Regarding the state of repair of buildings paragraph 5 (*b*), the buildings and the wall therein referred to have been taken on hand and will reach completion within a week or two.

(2) (*a*) *Contributions to Provincial Funds.*—Rs. 238 or Rs. 88 more were contributed during the year. The increase is due chiefly to the rate of contribution towards the Medical College being raised from Rs. 44 of the previous year to Rs. 137 in the current year as demanded by the Accountant-General—*vide* Treasury Deputy Collector's letter, dated 21st February 1895, No. 1118-Acc. of 1895.

(3) *Vaccination.*—Rs. 541–1–10 were spent against a provision of Rs. 450; the increase of Rs. 91–1–10 is due mostly to the purchase of fresh animal vaccine (glycerine paste) from the Rajahmundry depôt at a cost of Rs. 130–12–0.

The number of cases vaccinated during the year was 2,219 against 2,297 of the previous year or 78 cases less. Of the 2,219 cases vaccinated, 2,181 were successful

12 September 1478

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper:—

From M.R.Ry. C. SITARAMAYYA Pantulu Garu, Chairman, Municipal Council, Ellore, to the Chief Secretary to Government, dated 25th May 1895, No. 10.

I have the honour to submit the administration report of the Ellore Municipality for 1894–95, together with the usual statements and the reports of the medical officer on the working of the hospital and educational report by the Assistant Inspector of Schools, Second Division.

I.—Constitution of the Council.

1. Statement X gives the constitution of the council. The number of councillors on the 31st March 1895 was seventeen against eighteen, the prescribed number.

2. I have been chairman from the beginning of the year up to 28th October last, the date on which my councillorship expired. After being re-elected as a councillor, I was again elected as chairman by the council on 15th January and gazetted on the 19th March 1895; during the interval, the Revenue Divisional officer was in charge of the office of chairman.

3. There were six vacancies during the year and one vacancy of the previous year among the elected councillors. The delay in filling the vacancy of the previous year is due to Government ordering re-election in their G.O., dated 2nd August 1894, Mis. No. 1011. All the above vacancies were caused by the expiry of their term of office. Elections were held to fill in these vacancies in September and November last; my reports on the result of these elections, dated 22nd September 1894, No. 4, and 17th November 1894, No. 24, give all the details. There were two vacancies among the nominated councillors during the year—one caused by the member resigning his office and the other by the expiry of his term. Of these, the former was filled during the year and the latter has not been filled up to date.

4. The total number of meetings actually held during the year was 43 against 37 and those adjourned for want of quorum were four against three of the previous year. The average attendance at each meeting was 8·95 against 7·94 of the previous year, that of the officials being ·56 and of non-officials 8·39 against ·16 and 7·78 respectively of the previous year. From the above it will be seen that there was a rise in the attendance of both the official and non-official members of the council during the year under report.

II.—Receipts.

A.—Receipts from Taxation.

5. *Tax on Arts.*—The increase of Rs. 819 over the revised estimate is due partly to the collection of arrears and partly to the thorough revision of the list.

(*a*) The demand originally assessed for the current year was Rs. 4,065, of which Rs. 176–8–0 were remitted by the council on appeal. Rs. 3,715–8–0 were collected, Rs. 65 were written off as irrecoverable and Rs. 108 left uncollected at the close of the year.

(*b*) Of the arrears of previous year, viz., Rs. 310–8–0, Rs. 303–8–0 were collected, Rs. 6–8–0 written off and As. 8 left uncollected from oversight.

(*c*) Three hundred and ninety-two warrants were issued against 252 of the previous year and Rs. 708 were collected in 372 cases after issue of warrants.

6. *Tax on Buildings.*—The increase of Rs. 1,418–11–6 over the revised estimate is due chiefly to the collection of arrears and to the collection of the current demand with the exception of Rs. 52–10–0 only.

(*a*) The demand originally assessed was Rs. 7,365–10–0, of which Rs. 2–13–6 were remitted, Rs. 7,278–5–6 collected, Rs. 21–7–0 remitted on account of vacant houses, Rs. 10–6–0 written off the accounts and Rs. 52–10–0 left uncollected at the close of the year.

(*b*) Of Rs. 967–7–0, the arrears of previous year, Rs. 940–6–0 were collected, Rs. 21–13–0 written off and Rs. 5–4–0 still uncollected.

(*c*) During the year 1,565 warrants were issued against 574 of the previous year. In 1,458 cases Rs. 1,234–8–0 were collected without distraint and in 47 cases property was distrained but nothing sold.

7. *Tax on Lands.*—The increase of Rs. 32–14–0 over the revised estimate is due to the arrear and current demand being almost fully collected.

The current demand was Rs. 191–2–0 and the amount collected was Rs. 185–1–0, thus leaving only a balance at the close of the year of Rs. 6–1–0. This is due to the fact that the owners of the land left the town and their whereabouts are unknown.

(*a*) Under this tax, of the arrear of Rs. 55–9–0, Rs. 47–13–0 were collected and Rs. 7–12–0 written off.

(*b*) Ninety warrants were issued against 82 warrants of previous year. In 76 cases Rs. 57–13–0 were collected and the remaining left unexecuted during the year.

8. *Tax on Vehicles with springs.*—Rs. 133–8–0 were collected against Rs. 150 in the revised estimate, the decrease is due to a few vehicles not being licensed during the year as they were not used.

9. The decrease of Rs. 96–4–0 under *Tax on Animals* and of Rs. 72 under *Tax on Carts* in actuals under that of the revised estimate figure is due to a further fall in wheeled traffic since the opening of the railway.

10. *Tolls.*—The right of collecting tolls was sold for Rs. 7,010 and the amount was fully realized during the year.

11. The incidence of taxation per head of population as per statement I, head 2, is As. 12–2 including tolls and As. 8–3 excluding it against As. 10–5 and As. 7 of the previous year. Thus there is a perceptible rise in the incidence of taxation.

B.—Miscellaneous Receipts.

12. *Realization under Special Acts*—(*c*) *Fees under Act II of* 1888.—Rs. 30 were realized against Rs. 10 anticipated; the increase is due to the unexpected arrival of the Great Indian Circus in the last quarter of the year.

13. *Revenue derived from Municipal property and powers apart from taxation.*—Rs. 3–4–0 were realized under (*a*) (i) *Rent of Lands* and Rs. 7–4–0 under (iii) *Avenue Receipts* against Rs. 20, the revised estimate figure.

(*a*) (iv) *Fees from Travellers' bungalow.*—Rs. 200 were estimated and Rs. 212 realized.

(*b*) (iii) *Sale-proceeds of old materials, &c.*—Rs. 70–15–6 were realized against Rs. 100 estimated. The decrease Rs. 29–0–6 cannot be explained as it is a fluctuating item.

(*c*) *Conservancy Receipts.*—The increase of Rs. 42 over the estimate is chiefly due to the competition among bidders.

(*d*) (i) *Fees from Educational institutions.*—Rs. 158–2–0, against Rs. 160 estimated, were realized.

(*e*) (i) *Sale-proceeds and composition fees of Medicines.*—Only As. 6–6 were realized. In this connection I may mention here that the attention of the hospital sub-committee has already been drawn and rules have been framed by them to sell medicines and to collect monthly subscriptions from important people in town, but the rules could not have been brought into force before the passing of last year's budget as there was no peon and proper supply of medicines.

(*f*) (ii) *Income from Slaughter-houses.*—The right of collecting these fees was sold for Rs. 1,485 and the same was realized. The difference of Rs. 5 between it and the revised estimate is due to round figure being used.

(*g*) *Other fees.*—Rs. 1,447–13–0 or Rs. 17–13–0 more than the estimate were collected. The slight differences in the items of this head need no explanation.

(*h*) *Fines under Municipal and other Acts.*—Rs. 715–6–5 were realized against Rs. 700 estimated. The statement showing the different classes of offences will follow.

13. (5) *Grants and Contributions*—(*a*) *From Government*—(1) *Education, other purposes.*—Rs. 47–5–0 were realized against Rs. 50 in the revised estimate. This is a Provincial grant paid as stipend towards the salary of the gymnastic instructor.

(*b*) *From Local Boards*—(ii) *Medical.*—Rs. 1,659–12–10 were paid as contribution by the Local Fund Board towards Ellore municipal hospital charges.

14. (6) *Miscellaneous*—(*a*) *Recoveries on account of services rendered to private individuals.*—Rs. 779–6–0 or Rs. 39–6–0 more were realized under this head. The increase is chiefly due to recoveries under private scavenging realizing Rs. 36 more than was anticipated.

(*b*) *Other items.*—The decrease of Rs. 32–4–10 in the items under this head cannot accurately be accounted for as they are of a fluctuating nature.

15. (7) *Extraordinary and debt*—(*a*) *Advances.*—Nothing was recovered under this item.

16. The total actual receipts including the opening balance were Rs. 35,994–6–1 against the revised estimate figure Rs. 34,050, thus showing an increase of Rupees 1,944–6–1 in the actuals which has been explained above.

17. Statement I-A is left blank as there are no endowments entrusted to the municipal council.

III.—Expenditure.

18. *Grant I (Public Works).*—Rs. 9,286–5–9 were spent under this grant against an estimated amount of Rs. 9,310. The decrease of Rs. 23–10–3 in the actuals is explained as follows.

(1) *New Works*—(*a*) *Communications.*—The decrease of Rs. 167–9–10 is chiefly due to the road proposed to be constructed from Burra well to canal bank not having been constructed during the year owing to certain difficulties in the acquisition of the land required for the road. It is now almost settled and steps will be taken to construct the road. The amount however has been utilized for repairs to communications.

(*b*) *Buildings.*—Rs. 1,759–13–10 or Rs. 1,340–2–2 less than the estimate were spent; the decrease is due to the non-completion of the municipal office, slaughter-house and pucka latrines during the year from want of proper supply of material in the local bazaar. This amount has however been spent on repairs to buildings and communications.

(*d*) *Water-supply.*—For the construction of platforms, &c., to wells Rs. 150 were provided, but nothing was spent during the year in that connection, hence the decrease of Rs. 150 in actuals.

(2) *Repairs*—(*a*) *Communications.*—The increase in actuals of Rs. 1,525–9–7 over the estimate is due to roads other than those provided in the estimate being repaired as they were very much broken up and the repairs had to be urgently taken up.

(*b*) *Buildings.*—Only Rs. 200 were provided and Rs. 457–1–4 were spent. The increase is due to unforeseen repairs being done to the travellers' bungalow and tatty latrines.

(*c*) *Drainage.*—Under this head Rs. 750 were provided and that spent being Rs. 643–14–2, and the balance Rs. 106–1–10 was spent in repairing certain works for reasons stated above.

(*d*) *Water-supply.*—The decrease of Rs. 74–4–1 under this head is chiefly due to the council's intention of spending a large sum for completely repairing the Gazivilly tank next year as this is the only fresh-water tank in the town.

(3) *Establishment.*—Rs. 820 were provided and Rs. 814–5–9 were spent.

(4) *Tools and plant and other stores.*—The increase of Rs. 37–7–0 is due to the purchase of more road-making tools than was estimated, as those in stock were found to be unserviceable.

19. *Grant II, Education* (1).—The amount allotted under this head was Rs. 3,290 and that spent was Rs. 2,989–8–2. Thus the decrease in expenditure was Rs. 300–7–10 which is accounted for as follows.

(2) *Municipal Schools*—(i) *On Salary System*—(*a*) *Establishment.*—The decrease of Rs. 106–0–11 is due to the establishment not being brought up to its full strength until the latter part of the year.

(*b*) *Contingencies.*—The decrease of Rupees 42–14–2 is small and needs no explanation.

(ii) *On Salary Results System.*—The decrease of Rs. 141–13–10 under this head is due chiefly to result grants earned being poor. The teachers concerned have been warned.

(3) *Salary Grants.*—The increase of Rs. 53–8–0 is due to arrear grants for the months of February and March 1894 being paid during the current year at the higher rate.

(4) *Result Grants.*—Rs. 943–3–4 or Rs. 56–12–8 less than the allotment were paid during the year to aided schools.

(6) *Inspection*—(*b*) *Municipal Inspectors.*—The decrease of Rs. 11–5–3 is due mostly to contingent charges under this head.

(7) *Miscellaneous*—(*b*) *Common Gymnasium.*—Rs. 134–10–0 were spent against an estimated allotment of Rs. 120. The increase of Rs. 14–10–0 is chiefly due to contingencies, under which item the repairs to the gymnasium yard, &c., were charged.

(*c*) *Other items.*—Rs. 20 were provided and Rs. 10–5–0 spent.

20. *Municipal Salary System Schools.*—The number of pupils on the rolls on 31st March 1895 was 66 boys. The strength of the school in the lower secondary department including the upper primary department is 70 boys. The total expenditure from the date of opening of the school to the end of April last in the shape of school salaries, house rents and other charges is Rs. 564–11–10 and the income realized in the shape of school fees within the first four months of this year is Rs. 537–8–0. Thus it will be seen that the amount required from the municipal funds is only Rs. 27–3–10 for the last six months from the date of starting the school, which is merely nominal. It will be evident from the above that the school is almost, if not entirely, self-supporting and a reference to the progress report appended will further show the gradual and steady growth of the school. The council hopes, in the circumstances stated above, that the Government will be pleased to accord its sanction for its permanency.

21. *Municipal Salary Result System Schools.*—The number of pupils on the rolls on 31st March 1895 was 94 boys against 105 boys and 3 girls of last year. The decrease is chiefly due to the transfer of the school from one locality to another. The grants earned during the year were worse than last year, the decrease being chiefly due to the poor results of the Hindu Primary school. However I trust that under the able management of the Headmaster, Municipal Middle school, the school will soon prosper.

The results of school examination were poorer than last year, for of 61 pupils examined only 23 passed against 63 and 38 of the previous year, the percentage of passes to examined being 37·70 against last year's 60·3.

22. *Result Schools aided from Municipal Funds.*—Seventeen schools were aided during the year against 15 of the previous year. Of the 17 only one school received grant for 1892–93; therefore 16 schools actually received aid during the current year. The grants earned were Rs. 779–7–0 and that paid were Rs. 664–9–0 for the current year together with an arrear grant of Rs. 278–10–4, thus making the total grant paid to aided schools to amount to Rs. 943–3–4 against Rs. 717–10–2 of the previous

CURRENT No. 1390/95

Sir,

In returning the statements V (a) and V (b) sent with your letter No 98 6.5.95 I have the honor to state that I have verified the numerical portion of the statements with the returns furnished to this office.

2 The total number of aided primary schools as per statement I already sent to you is 15 and the number of pupils therein is 575 boys and 54 girls. The lohitiya agraharam mala school did not receive any aid for 1893-94 but it received some grant of 1892-93 in 1893-94. So it should

Statement No. I relating to General Statistics in Ellore Municipality

		1893.94			1894.95			Remarks.
		Number of Schools.	Number of pupils on 31st March.		Number of Schools.	Number of pupils on 31st March.		
			Boys.	Girls.		Boys.	Girls.	
Colleges	Government							During the year under report a Lower Secondary School was opened by the Municipality. The Standard of the C.M.S. Upper Primary School under the management of Revd. H. A. Alexander was raised by the opening of a 5th Standard class. The Standard of the unaided Hindu Middle School that existed last year was reduced to that of an Upper Primary Grade. The fall in the strength of the Municipal Primary Schools was partly due to the amalgamation of the Upper Primary Class of the Hindu Primary School with the Middle School. Of the six aided Primary Schools that disappeared during the year one became a Lower Secondary School and the other five (one of which was a night School) were closed for want of sufficient remuneration. There was on the whole a decrease of 28 pupils half of this being confined to the C.M.S High School.
