Of the 56 pupils in the London Mission Lower Secondary School on the 31st March 1895, 20 appertained to the Upper Primary and 36 to the Lower Secondary departments. The former figures have been clubbed by this office with those in the Lower Primary School of the same Mission for the purpose of this statement (Vide instructions printed at the foot of the form of Statement V-B circulated with Government Order dated 10th December 1891, No. 2193 Ed.), but in the statement I submitted by the Assistant Inspector of Schools they were shown in the Lower Secondary instead of in the Lower Primary School. Hence the difference in figures between these two statements.—

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following papers:—

From M.R.Ry. S. RAMU IYER, Avargal, B.A., Chairman, Municipal Council, Adóni, to the Chief Secretary to Government (through the Collector of Bellary) dated Adóni, 6th June 1895, No. 191.

I have the honour to submit my report on the Administration of the Madras District Municipalities Act IV of 1884 in the town of Adóni for the official year 1894–95, accompanied by usual statements.

I.—CONSTITUTION OF THE COUNCIL.

2. (1) The sanctioned strength of the council remained the same as in the previous year, viz., at sixteen, of whom one is the Revenue Divisional Officer who is *ex-officio* member, and fifteen, consisting of three officials and twelve non-officials, are persons appointed by Government. The actual strength on the last day of the year was, however, fifteen due to the vacancy of a non-official seat which occurred on the 8th March and has yet to be filled up.

(2) The office of the Chairman was held by me during the year, having been elected by the council on the 6th April 1894, in succession to M.R.Ry. K. Subbarayadu Pantulu Garu transferred from the district.

(3) The council held 36 meetings, excluding five which were adjourned for want of a quorum against 43 in 1893–94. The average attendance was 8·4 (officials 2·1 and non-officials 6·3) as against 7·7 (officials 1·8 and non-officials 5·9) in 1893–94, and thus showed an improvement. The greatest number of councillors present at any one meeting was thirteen and the last was six.

II.—RECEIPTS.

3. *Statement I.*—In the following abstract the receipts under several heads in 1894–95 are compared with those of the budget and revised estimates for the year and the actuals of 1893–94 :—

—	Actuals for 1893–94 (audited figures.)	Budget estimate, 1894–95.	Revised estimate, 1894–95.	Actuals for 1894–95.

From the above, it will be observed that the year opened with a balance of Rs. 7,666–9–0, and that the total receipts of the year, exclusive of the opening balance, amounted to Rs. 1,64,294–12–4, as against Rs. 1,63,700 as per revised estimate, and Rs. 96,536–12–4, the actuals of the previous year. There is an increase of Rs. 594–12–4 in the total income as compared with the revised estimate which occurred chiefly due to the increased receipts under "tax on arts" and "tax on buildings" which resulted from the realization of a much larger percentage of the current and arrear demands than had been anticipated. The variations are explained in detail below.

4. (1) *Tax on Buildings.*—This tax was levied at the same rate as in the previous year. The actuals under this head amounted to Rs. 10,706–9–0 against Rs. 10,300 anticipated in the revised estimate. The original demand was Rs. 10,115–12–0, exceeding that of the previous year by Rs. 417–6–0. The increase has already been explained in connection with the revised estimate for the year under report.

(2) The number of appeals preferred against the assessments was 62 and all of them were disposed off before the close of the year. In 36 cases, the original assessments were confirmed, in fourteen they were reduced, or remitted and in twelve cases appeals were rejected for want of deposits or other causes. The reductions and remissions granted by the council on appeals amounted to Rs. 44, or 1·4 per cent of the original demand.

(3) Of final demand (Rs. 10,071–2–0) Rs. 9,947–9–0 were collected during the year, leaving a balance of Rs. 123–9–0 outstanding at its close, which has been reduced by subsequent collections and remissions up to date to Rs. 14–2–0; of which eleven cases covering Rs. 12–10–0 are under criminal prosecutions and in the remaining case, the amount has to be written off as irrecoverable.

(4) The percentage of collection to demand during the year amounted to 98·8 per cent. against 94·2 in 1893–94, a result which, it is hoped, will be regarded as satisfactory. The assessment registers were ready on the 30th June 1894.

(5) The arrears outstanding at the beginning of the year were heavy—amounting to Rs. 906–14–0. Of this sum, Rs. 759 were collected before its close and Rs. 138–14–0 written off the accounts as irrecoverable, so that Rs. 9 only remained outstanding at the end of the year under report, which is due from one individual who has been prosecuted. The arrear collection thus came to 83·7 per cent. and was no doubt due to the increased efforts put forward on receipt of the severe remarks passed by Government in paragraph 3 (2) of its order, dated 10th August 1894, No. 1063 M., reviewing the annual report of this municipality for the year 1893–94.

(6) The average incidence of the tax on buildings was Rs. 1–13–10 against Rs. 1–12–7 in 1893–94, thus showing an increase of As. 1–3 per head.

5. (1) *Tax on Lands.*—This tax continued to be levied at two pies for every 80 square yards or 10 annas per acre. The net current demand, viz., Rs. 529–10–6, was almost the same as in 1893–94 and was imposed on 850 acres of land. Rs. 506–7–8 were realized, leaving a balance of Rs. 23–2–10 at the close of the year. Of this balance, Rs. 13–13–8 have since been collected, leaving still a balance of Rs. 9–5–2 due from two individuals, in one of which there is a question pending as to the correctness of the demand and in the other the defaulter is not forthcoming.

(2) The arrears outstanding at the commencement of the year amounted to Rs. 232-4–9, of which Rs. 228–14–8 were collected, and the balance Rs. 3–6–1 was remitted on account of overassessment.

6. (1) *Tax on Arts.*—This tax was levied at the same rates as in the previous year. The demand registers of this tax are prepared for each year. That of the year under report was ready on the 26th September 1894. The original current demand of the tax amounted to Rs. 8,113 or Rs. 109 in excess of the previous year's demand.

(2) The number of appeals preferred against the tax was 61 as against 118 in 1893–94. The result of the appeals was that in 33 cases the assessment was confirmed, in 23 it was reduced, in two it was remitted, and in three cases the appeals

were rejected for want of deposits or other causes. The remissions and reductions granted by the council on appeals amounted to Rs. 304, or 3·7 per cent. of the original demand against Rs. 354–8–0, or 4·4 per cent. in 1893–94.

(3) The final demand was Rs. 7,809 or Rs. 159–8–0 more than in 1893–94. The increase is due to the careful revision of the registers by the special sub-committee appointed for the purpose. The whole of the demand except Rs. 198–8–0 was realized within the close of the year. Of the balance, Rs. 131–8–0 has since been collected and Rs. 18 written off as irrecoverable, leaving a balance of Rs. 49 still to be cleared off. Of this amount, thirteen cases involving Rs. 21 are under criminal prosecutions and in fifteen cases involving Rs. 28, parties have left the town. Steps are being taken to realize the arrears in these cases.

(4) The percentage of collections to finally settled demand was 96·8 against 92·7 in 1893–94, a result which shows a considerable improvement over the previous year.

(5) The arrears outstanding at the commencement of the year were Rs. 1,031, of which Rs. 755 were realized, Rs. 263 written off as irrecoverable and Rs. 13 left uncollected at the close of the year. Of the latter sum, Rs. 12 have since been collected, leaving only one rupee for which a prosecution has been instituted.

(6) The total number of persons assessed to the tax on arts and the incidence per head were 1,873 and Rs. 4–2–8, respectively, as against 1,857 and Rs. 4–1–11 in 1893–94. The number of assessees was 7·1 per cent. of the population of the town.

(7) Before the irrecoverable arrears under the several heads of taxation were written off, each case was properly enquired into by the Tahsildar who is a councillor and scrutinized by me.

7. *Tax on Vehicles, Animals and Carts.*—The rate of tax on carts was raised from half rate to the maximum during the year under report. The taxes on animals and other vehicles continued to be levied at the same rate as before. The receipts under this head amounted to Rs. 2,704–8–0 against Rs. 2,730, anticipated in the revised estimate, and Rs. 1,929, the actuals of the previous year. The increase of Rs. 775–8–0 over previous year, being due chiefly to the increased rate charged on carts.

The slight decrease of Rs. 26 under tax on animals, as compared with the revised estimate, calls for no remarks.

8. (1) *Coercive process.*—The number of warrants issued during the year was 1,891 against 1,444 in 1893–94. Adding to this, the unexecuted warrants at the close of the year 1893–94 the total was 2,094. Of these 1,828 were executed and cancelled within the year, leaving 266 unexecuted at the close of the year. The warrants covered Rs. 3,786–10–10, of which Rs. 3,174–10–8 were realized. Property was distrained in five cases but the arrears were paid up in all cases before the date fixed for sale.

(2) Ninety-nine prosecutions were instituted during the year for default of payment. Of these, 81 were withdrawn on parties paying the taxes before trial or judgment, fifteen were tried and adjudicated upon by the magistracy, resulting in convictions and infliction of penalties amounting to Rs. 15–2–0 and three cases are still pending before the magistracy in consequence of the disappearance of the defaulters.

9. *Tolls.*—These were levied at the full schedule rates authorized by the Act. There were seven toll-gates and all of them were leased out to contractors. The gross collections including interest amounted to Rs. 4,851–15–6. Deducting from this a sum of Rs. 11–14–0 on account of charges incurred in the purchase of toll-gate boards, there resulted a net income of Rs. 4,840–1–6. Of this sum, Rs. 1,210–0–4 were paid to the District Board, Bellary, being one-fourth share due to it, and the balance of Rs. 3,630–1–2 was credited to municipal funds.

10. *Incidence of taxation.*—The incidence of taxation per head of population according to census of 1891 was As. 15–11 including tolls and As. 13–8 excluding them against As. 14–4 and As. 12–3, respectively, in the preceding year. The

incidence was higher than in the previous year owing to the collection of large outstanding arrears of previous years under "Tax on Arts" and "Tax on Buildings" and to the raising of the "Tax on Carts."

11. (1) *Miscellaneous Receipts.*—The revenue from this source amounted to Rs. 1,38,187–9–10 against the revised estimate of Rs. 1,38,250 and Rs. 72,984–5–5, the actuals of the previous year.

(2) *Avenues.*—Rupees 1–13–0 only were realized from the sale of avenue clippings against sum of Rs. 20 expected from it in the revised estimate, the decrease being due to the want of operations under this head.

(3) *Sale-proceeds of old materials, &c.*—The amount realized from this source was Rs. 82–6–0, or Rs. 32–6–0 in excess of the revised estimate. The increase is due to a large collection of useless materials which had accumulated in the office having been sold at the close of the year.

(4) *Sale-proceeds of night-soil, street refuse, &c.*—The amount realized under this head is made up of (1) Rs. 138, (2) Rs. 313–15–5, and (3) Rs. 63–15–9, being respectively the sale proceeds of night-soil, of street refuse and of conservancy bullocks and carbolic acid, giving a total of Rs. 515–15–2 against the revised estimate of Rs. 650 and against Rs. 804–1–8, the actuals of previous year. The decrease of Rs. 134–0–10 as compared with the revised estimate is nominal and was due to the fact of the night-soil accumulated at the depôt during the year not having been sold before the close of the year. The amount of Rs. 138 shown above under this head represents a portion of the receipts from the sale of previous year's accumulations realized in the beginning of the year. The accumulations in the depôt during the year have since been sold and realized Rs. 392 which will, of course, come into the accounts of the current year.

(5) *Fees from Educational Institutions.*—The fees realized from this source amounted to Rs. 271–14–9, showing a slight increase of Rs. 21–14–9 over the revised estimate. This increase was due chiefly to the improved attendance of pupils in the Muhammadan salary-result school.

(6) *Income from Markets.*—The actual income under this head hardly varies from the revised estimate. As usual the right of collecting the Market fees in the only municipal market, which goes by the name of Victoria Jubilee market, was sold by public auction and realized Rs. 1,230–12–3, which is just the figure put down in the revised estimate. The falling off of Rs. 356–12–7 as compared with the previous year is accounted for by the fact that in the previous year the contractor having suffered loss, the bidders were more chary in running up the bids.

(7) *Sale-proceeds and Composition fees of Medicines.*—The income derived from this source amounted to Rs. 54–15–2, or Rs. 14–15–2 in excess of the revised estimate. The increase is due to the fact that the value of medicines sold in 1893–94 was realized in the year under report.

(8) *Other fees.*—This head includes distraint fees, license fees, cart-stand fees, &c. The only important item is license fees which amounted to Rs. 534–3–8 against the revised estimate of Rs. 550 and Rs. 508–5–8, the actuals of the previous year.

(9) *Fines under Municipal and Other Acts.*—These amounted to Rs. 480–13–0 against Rs. 500 shown in revised estimate. The decrease is small and calls for no remarks.

(10) *Grants and Contributions from Government.*—The whole amount of grant Rs. 81,000 promised by Government from provincial funds for expenditure on the water-supply project was received during the year under report. A grant of Rs. 50, for which credit has been taken in the budget at the suggestions of the Director of Public Instruction for payment of results grant to girls attending the municipal schools was not drawn, there being no necessity to utilize it since no girls attended any of the municipal schools.

(11) *Contributions from Local Funds.*—The receipts under this head amounted to Rs. 635–8–2 against Rs. 610 in the revised estimate. The increase of Rs. 25–8–2 is due chiefly to the increased expenditure in the municipal hospital towards which the district board contributed one-eighth of its current charges.

(12) *Private Scavenging Fees.*—The income under this head amounted to Rupees 1,927–11–1 or Rs. 27–11–1 in excess of the revised estimate and Rs. 48–14–6 in excess of the actuals of the previous year. It will be seen that the income from this source is gradually increasing. The current demand under this head was Rupees 1,931–15–6, of which Rs. 1,915–8–5 were collected and Rs. 4–0–6 were written off the accounts as irrecoverable, leaving a balance of Rs. 12–6–7 outstanding at the close of the year. The arrear demand at the commencement of the year was Rs. 24–8–8, of which Rs. 12–2–8 were collected, and the remainder was struck off the accounts as irrecoverable. It has been found difficult to insist upon prepayment in all cases, owing to the fact that a large number of the persons who avail themselves of the services of the municipal toties are poor Muhammadans.

(13) *Advances recovered.*—Rupees 51,000 which had been placed at the disposal of the Sanitary Engineer to Government, Madras, in 1893–94 for meeting English drafts for pipes, machinery, &c., ordered from England and other purposes, Rupees 42–10–0 paid for process fees and Rs. 19–1–6 incurred in the removal of obstructions in a nallah were adjusted during the year under report.

Expenditure.

12. *Statement II—III.*—In the following abstract the expenditure under several heads in 1894–95 is compared with the budget and revised estimates for the year and the actuals of 1893–94 :—

13. (1) *Grant I, Public Works.*—The outlay on public works was Rupees 91,532–10–3 against the revised estimate of Rs. 1,39,370, showing a decrease of Rs. 47,837–5–9, which is chiefly made up of a sum of Rs. 1,321 under communications—new works, Rs. 6,211 under buildings—new works, Rs. 39,574 under water-supply, Rs. 476 under communications—repairs.

(2) *Roads.*—The expenditure on roads was Rs. 502–13–3. Of this, Rs. 179–1–0 were spent on the new work in connection with the widening of Kumbardiddi road and Rs. 323–12–3 on sundry repairs to existing roads, against Rs. 1,500 and Rupees 800 respectively provided in the revised estimate. Subsequent to the submission of the administration report for the year 1893–94, it was decided, in view of the bad state of the roads and the insufficient allotment made in the budget for them, to stop further outlay on widening streets and devote the available funds towards the re-metalling and gravelling of the chief town roads; but no expenditure was actually incurred before the close of the year on this account. Several causes contributed to this result. In the first place, the repair of the roads could not be taken in hand until the water-pipes were laid. This work went on till the end of December. Then tenders were invited for collection of metal and gravel. There were but few tenders, owing to the fact that all the available contractors, of whom there are only a few in this place, were engaged on the water-works. A contractor was secured in February 1895, but he had not completed the work of collection and stacking before the end of the year; hence the low expenditure referred to. The council hopes, however, that the roads will be put into thorough order in the course of the current year.

(3) The total length of the roads maintained by the council is $8\frac{3}{4}$ miles, of which 5 miles are metalled and $3\frac{3}{4}$ gravelled. With the exception of those roads where pipes are laid, all the other roads were merely gravelled and kept in a tolerable condition.

(4) *Tolls and road charges.*—The total expenditure on communications amounted to 13·9 per cent. of the net toll receipts against 80·5 in 1893–94, the low percentage being due to the circumstances represented in paragraph 13 (2) *Supra*. The deficiency will be made up this year.

(5) *Buildings.*—The expenditure under this head amounted to Rs. 3,571–2–3 against an allotment of Rs. 9,780 provided in the revised estimate. The following are the works provided for execution in the year under report:—

—	Estimate.	Expenditure. In 1894–95.	Expenditure. Up to 1894–95.
	Rs. A. P.	Rs. A. P.	Rs. A. P.
Incomplete works of 1893–94.			
1. Constructing travellers' bungalow	4,900 0 0	1,290 2 2	4,587 7 5
2. Improving the Jubilee market	3,500 0 0	820 0 0	1,250 0 0
3. Constructing two zinc latrines	1,480 0 0	772 2 9	1,422 2 9
4. Do. two urinals	150 0 0	..	80 0 0
Works provided for 1894–95.			
5. Constructing Municipal office	7,320 0 0	16 8 8	16 8 8
6. Do. zinc latrines	740 0 0	316 0 0	316 0 0
7. Improvements to latrines	230 0 0	53 11 8	53 11 8
8. Do. to slaughter-houses	250 0 0	..	..
9. Repairs to buildings and latrines	300 0 0	302 9 0	302 9 0

Incomplete works.—Work No. 1 was commenced in 1892–93 and completed during the year under report. The account was finally settled in the year.

The decrease as compared with the estimate is due to transfer of Rs. 324–12–7 on account of furniture, &c., bought for the use of the bungalow, to 4 (*b*) contingencies under Grant IV from Grant I—new works, buildings, as per instructions conveyed in clause (5) of paragraph 1 of the official memorandum from Government, dated 26th July 1894, No. 605. As reported in paragraph 47 of the administration report for 1893–94, embodied in G.O., dated 10th August 1894, No. 1063 M., the bungalow is still occupied by the supervisor in charge of the Adóni water-works. It is likely to become available for public use in the course of the current year.

Improvements to the Jubilee market (*work No.* 2).—These were commenced in 1893–94 and completed during the year under report. The total outlay incurred on it was Rs. 3,422–3–9, the amount estimated being Rs. 3,500. There was thus a saving of Rs. 77–12–3, notwithstanding an outlay of Rs. 78–3–1 incurred in the execution of certain extra works not provided for in the estimate, which is due to the action of the council in putting up the contract for competition among those who tendered for the work. Only a sum of Rs. 820 was paid in the year under report, the final bill having been presented by the contractor since the close of the year. He has now been paid Rs. 1,809–3–9, the balance of Rs. 363,* being withheld for payment until a good fall of rain occurs so as to see whether the roof is rain-proof.

* Since paid.

The two zinc latrines (work No. 3) which were under execution in 1893–94 were completed during the year under report. The expenditure incurred on them in the year under report was Rs. 772–2–9 and up to the year Rs. 1,422–2–9, which represents the actual value of work done as compared with the estimate of Rs. 1,480.

A sum of Rs. 150 had been provided for two urinals (work No. 4). These were constructed but not paid for in the year, as the contractor has not submitted his bill.

New works.—The construction of a municipal office (work No. 5) for which an allotment of Rs. 5,000 was made in the budget could not be taken up during the year under report, owing to the site proposed for the building not having been yet acquired. The proposal for acquiring the site is before Government. It must be admitted that the proposal should have been sent up earlier and the omission is regretted. Tenders for executing the work have been called for.

The new latrine (work No. 6) for which provision was made in the budget of the year under report was under construction at the close of the year, only a sum of Rs. 316 out of an allotment of Rs. 740 having been spent on it. The slow progress of the work is due to the difficulty in procuring the services of a contractor, and to the contractor to whom the work has been entrusted being engaged on the large concern of water-works.

Of Rs. 230 provided in the budget for the improvement of latrines (work No. 7), only Rs. 53–11–8 were spent in the improvement of Venkennakéri male latrines. The short outlay was due to the fact that the municipality had an inefficient overseer, whom they had to dispense with, and they could not get a proper hand, though the vacancy was duly advertised.

The improvements to the slaughter-houses (work No. 8) for which a sum of Rs. 250 had been allotted were not undertaken as they had to be postponed pending receipt of the suggestions of the Sanitary Commissioner as to the nature of the improvements required. These were received with his inspection notes, dated 2nd February 1895, and the Sanitary Engineer to Government has been requested to favour the council with a plan and estimate to give effect to them.

An expenditure of Rs. 302–9–0 against an allotment of Rs. 300 was incurred in executing repairs (work No. 9) to the works enumerated below :—

		RS.	A.	P.
1.	Repairs to Municipal office	27	12	10
2.	Do. to cattle shed	11	5	10
3.	Municipal chattram	15	4	4
4.	Havennapet poor school	40	12	1
5.	Latchuram's latrine	99	8	10
6.	Gowlivada latrine	32	15	7
7.	Kilchipet latrine	60	13	9
8.	Municipal hospital	13	15	9
	Total ..	302	9	0

(6) *Drainage and Water-supply.*—Rupees 146–9–10 only out of an allotment of Rs. 300 were spent in clearing drains of their accumulated silt, there being no necessity for uilizing the balance. The water-supply project was commenced in 1893–94 and is approaching completion. The expenditure incurred during the year was Rs. 86,625–12–9 against the revised estimate of Rs. 1,26,200. Up to the close of the year under report Rs. 1,22,402–2–11 out of the estimated sum of Rs. 1,62,000 had been spent. Details of the works carried out will, it is presumed, be furnished in the departmental report of the Sanitary Engineer.

14 (1) *Grant II, Education.*—The total expenditure on education exclusive of the outlay on school buildings (Rs. 40–12–1) debited to Grant I was Rs. 3,185–7–2 against Rs. 3,580 in the revised estimate for the year and Rs. 3,709–0–11, the actuals of the previous year. The decrease as compared with the revised estimate occurred under "result stipends" and "contingencies" in the salary result system schools and under "result grant schools," and was due in the first case to the grant earned by all the schools having been much less than had been anticipated; in the second to the non-purchase of furniture and other articles provided for in the budget, and in the third to the non-payment within the year of grant earned by some of the result grant schools owing to the late receipt of the certifying memoranda from the Assistant Inspector of Schools, III Division.

(2) *Training Schools.*—Nothing was spent on this account.

(3) *Municipal Schools.*—As in the previous year the municipal council maintained five schools on the salary result system. The total number on the rolls and the average attendance at these schools on the 31st March 1895 were 337 and 302 respectively against 367 and 292 on the corresponding date in the previous year. There was a falling off in the strength which has not been explained by the Educational Department. Information has been called for on this point. The decrease appears entirely in Hindu schools, while the strength of the schools intended exclusively for Muhammadans was stationary. The attendance, however, showed considerable improvement. These schools sent up for the standard examination 240 pupils, of whom 126 passed, which is rather a low percentage of success. The total cost of these schools was Rs. 1,964–2–0 and the net cost to the municipal council after taking

credit for the fees amounting to Rs. 271–14–9 was Rs. 1,692–3–3 against Rupees 2,160–8–4 in 1893–94. The average cost of educating each pupil in these schools was Rs. 5–9–8 against Rs. 7–6–5 in the previous year. The cause of the decrease has already been explained. All these schools were examined by the Assistant Inspector of Schools, Third Division, and the result is reported to be fair.

(4) *Grant-in-aid Schools.*—On the 31st March 1895 the number of these schools was 16 with 620 pupils as against 18 schools with 732 pupils on the corresponding, date in 1894. This is accounted for by three schools, which earned grants formally having been closed, while a new one was brought under inspection for the first time during the year under report. Of these schools, one was secondary and 16 primary schools. From these schools, 493 pupils were presented for examination, of whom 302 were found qualified for grants against 538 and 388, respectively, in 1893–94. The total grant earned by these schools amounted to Rs. 1,004–9–0, of which a sum of Rs. 926–11–0 was disbursed within the year and Rs. 77–14–0 after its close in consequence of the late receipt of the certifying memoranda. Result grants were paid at the maximum rates to all the municipal schools and to such other schools as continued to employ trained or certificated teachers, and at 75 per cent. to all other schools aided from municipal funds.

(5) There were eight other schools with 182 pupils on the 31st March 1895. Of these, one girls' school is maintained by the Government, and the rest are maintained by private individuals. There only means is the amount of fees which they get from the boys. These individuals do not wish their schools to be registered for grants, because they are either incompetent or unwilling to maintain the necessary registers and to observe the rules on the subject. In the unaided Muhammadan schools nothing but religious instruction is imparted and in other schools elementary instruction is given.

(6) The total number of boys receiving instruction in the schools maintained and aided from municipal funds was 957 or 48·1 per cent. against 1,099 or 55·3, respectively, of the male population of the school-going age.

(7) *Inspection.*—As in the previous year there were two inspecting schoolmasters, a Musalman and a Hindu. Their work during the year as guaged by the number of days spent by them on inspection and the number of pupils examined was fair, but the Hindu schools apparently need more competent and closer inspection. The inspecting schoolmaster who was untrained has been sent for training in the Government Training school at Bellary, and it is hoped that he will return better equipped with knowledge. The cost to the municipality on their account was Rs. 294–10–2 against Rs. 283–14–5 in the previous year.

(8) *Miscellaneous.*—Under this head nothing was spent.

15. *Grant III, Sanitation and Medical Services*—(1) *Hospitals and Dispensaries.*—The expenditure under this head amounted to Rs. 3,771–12–5 against Rs. 3,700 in the revised estimate and Rs. 2,684–7–4, the actuals of the previous year. Compared with the revised estimate there is an increase of Rs. 71–12–5 under "medicines and supplies" owing to the purchase of large quantity of medicines on extra indents submitted by the civil apothecary in charge of the municipal hospital, Adóni. The large increase over the actuals of the previous year was due to the payments made in the year on account of medicines received in 1893–94 as well as those received in the year under report, and to the increased pay of the civil apothecary. The decrease of Rs. 53–4–7 under diet of patients is owing to the smaller number of admissions among the in-patients. The variations in other items under this head are slight and call for no remarks.

(2) The total number of patients treated in the hospital was 79 in-patients and 11,634 out-patients against 90 and 16,054, respectively, in 1893–94. The large falling off in the number of out-patients is ascribed by the civil apothecary in medical charge of the hospital to the health of the town being better in the year under report, and a consequent dimunition in the number of cases under sore-eyes and malarial fevers.

(3) *Midwives.*—The midwife attached to the municipal hospital attended 66 cases or an average of five cases per month against 100 cases, giving an average of eight in the preceding year. The large falling off is due to there being frequent changes in the personnel of the midwives. Two midwives successively resigned. The present one took charge only in September 1894. It will take some time before she makes herself acquainted with the people and secures their confidence.

(4) *Contributions to Provincial and Local Funds.*—The total amount paid to Provincial funds amounted to Rs. 853 against Rs. 160 in the revised estimate and Rs. 163, the actuals of the previous year. There is a large increase over the revised estimate figures and actuals of the previous year, which is due apparently to the contributions having been calculated on the total receipts including the special grant and loan from Government.

(5) *Medical training of women.*—The council has nothing to add in regard to the medical training of women to what had already been stated in paragraph 60 of its administration report for 1893–94 embodied in G.O., dated 10th August 1894, No. 1063 M., Local and Municipal.

(6) *Vaccination.*—The statistics relating to vaccination are given in Statement XIII accompanying this report. The total outlay on vaccination was Rs. 389–1–7 against Rs. 420 allotted in the revised estimate. The variation is slight and calls for no remarks. The total number of operations performed by the municipal vaccinator was 1,396 against 1,127 in the previous year. Of the former, 1,259 were primary vaccination and 137 revaccination of the total number (1,396). Of cases, 1,180 or 84·5 per cent. were reported to have been successful against 1,052 or 88·1 per cent. in the previous year. The total number of successful operations amounted to 44·9 per mille of the population against 40·0 per mille in 1893–94. The total number of children under one year successfully operated upon was 796 or 30·3 per mille of the population against 701 or 26·7 per mille in the preceding year. Six hundred and eighty-five prosecutions for failure to have children vaccinated were instituted during the year against 189 in 1893–94. Animal lymph was used throughout the year. The average cost of each successful operation was As. 5–3 against As. 6–1 in the previous year. The vaccinator's work is supervised by the civil apothecary in medical charge, municipal hospital, Adóni, who verified 866 cases against 680 in 1893–94.

(7) The number of operations performed by the civil apothecary in charge of the municipal hospital, Adóni, is given below as compared with that of the previous year :—

		1893–94.	1894–95.
(*a*)	Number of operations performed with animal lymph ..	210	204
	Do. of successful operations	160	190
(*b*)	Do. of operations below one year of age	75	37
	Do. of successful operations	54	33

(8) *Vital Statistics.*—The following abstract shows the number of births and deaths registered during the year under report as compared with the previous year :—

—	Births.	Rate per mille.	Deaths.	Rate per mille.
1893–94	851	32·4	612	23·3
1894–95	955	36·3	642	24·4

It will be observed from the above figures that registration was more complete than in 1893–94. The year under report was more healthy than the previous one, and this probably accounts for the apparently small increase which has resulted in the number of deaths registered from the efforts which have been made to improve the registration since the receipt of the remarks passed in second part of paragraph 4 (4) of G.O., dated 10th August 1894, No. 1063 M., Local and Municipal. Eighty-one prosecutions were instituted for failure to register births and deaths. The expenditure on this account amounted to Rs. 158–8–0 against Rs. 150 in the revised estimate.

(9) *Conservancy.*—The expenditure on conservancy, road-cleaning and road-watering amounted to Rs. 7,672–7–1 against the revised estimate of Rs. 8,300 and Rupees 7,239–11–8, the actuals of the previous year. The decrease as compared with the revised estimate was caused by the non-utilization within the year of the amounts set apart for eradicating prickly-pear existing by the side of pathways in the outskirts of the town and by the fall in the prices of gram and fodder bought for the use of the municipal cattle. The Percentage of expenditure to the total ordinary receipts (excluding special grants from provincial funds) was 23·8 against 23·6 in 1893–94. The conservancy of the town was, on the whole, well attended to. An establishment consisting of one inspector, two maistries, six peons, 39 toties (23 public and 16 private), 30 sweepers, two water-bearers and one cattle-shed keeper with two rubbish and eight night-soil carts (five iron and three wooden ones) is maintained for the purpose. As in the previous year there were 125 dust-bins, of which 51 were moveable and the remainder immoveable ones. The former are made of iron and the latter of stone slabs fixed upright in the ground. The council has deferred purchasing more dust-bins, which are really necessary, under the advice of the Sanitary Commissioner, who has promised to favour it with suggestions as to the pattern of dust-bins to be sent for. As already stated in clause 2 of paragraph 70 of the administration report of this municipality for 1893–94 embodied in G.O., dated 10th August 1894, No. 1063 M., the removal and disposal of sweepings was carried out by leasing the privilege to a contractor. This system is condemned by the Sanitary Commissioner as most objectionable from a sanitary point of view, although it is financially profitable to the municipality. The council proposes to reconsider the arrangements when framing the next year's budget. The contents of dust-bins are now being deposited in a place somewhat further away from the town than before in deference to the views of the Sanitary Commissioner. There were sixteen latrines on the 31st March 1895, while those on the corresponding date of 1894 were fifteen. The two zinc latrines commenced in 1893–94, and left incomplete at its close, were completed during the year under report and they have taken the place of a mud-walled latrine in Gowlivada which had been demolished as unsuited for the purpose. Two zinc urinals were built in the year under report as already stated, one of them being in the place of an enclosure of stone slabs. Of the total number of latrines, six are made of zinc sheets, six of masonry walls and four mud walled. They were cleaned twice a day and kept in a satisfactory state. Three iron carts (two for the removal of night-soil and one for urine), 75 buckets for deposit of night-soil, and five iron scrapers for scavengers were bought during the year under report at a cost of Rs. 383. There were five urinals on the 31st March 1895, while those on the corresponding date of 1894 were four. Of the former, three were made of zinc sheets and two of granite slabs.

(10) *Private Scavenging.*—The exact number of private latrines is not known. There were 826 latrines served by the municipal agency on the 31st March 1895, while those on the corresponding date in 1893–94 were 806. The income derived from this source was Rs. 1,927–11–1, while the charges amounted to Rs. 1,751–9–0, the profit to the municipality being Rs. 176–2–1. The expenditure in the year as compared with the previous year showed an increase of Rs. 432–11–5, which was due to the outlay on the purchase of night-soil carts, &c. The number of toties dovoted to this source remained the same, viz., 16, costing Rs. 121 per mensum.

(11) The night-soil from both the public and private latrines was taken to the depôt which is more than a mile away from the town and is buried there in trenches and covered with earth. The suggestions of the Sanitary Commissioner regarding the size of trenches and the method of covering them are being attended to.

16. *Grant IV, Lighting and Miscellaneous*—(1) *Lighting.*—The expenditure under this head amounted to Rs. 1,280–11–6 or Rs. 19–4–6 below the revised estimate. The decrease is small and does not call for any remarks. Sixteen new lamps were put up in the year, thus increasing the total to 176. The lighting of the town was carried on departmentally as in previous years.

(2) *Markets and Slaughter-houses.*—The improvements to the markets that had been taken in hand were completed during the year. Nothing was done to the slaughter-houses for reasons already explained in paragraph 13 (5) *supra.*

(3) *Choultries.*—The expenditure on this account consisted of the pay of the sweeper employed to keep the choultry clean. The daily average number of people halted was three. The expenditure on this account was Rs. 24, or Rs. 6 less than the revised estimate. The chattram is a poor concern and hardly serves the purpose for which it is intended.

(4) *Avenues.*—The expenditure under this head was Rs. 76–8–0, or Rs. 3–8–0 less than the revised estimate. The decrease is slight and calls for no remarks.

(5) *Other charges.*—These amounted to Rs. 534–3–5 against Rs. 620 in the revised estimate and Rs. 349–1–8, the actuals of the previous year. The decrease is due to no charges for the destruction of stray dogs having been incurred, no necessity having arisen for incurring the same. The savings in the cost of printing proceedings, &c., also contributed to the decrease.

17. *Grant V, General Establishment*—(1) *Office.*—The charges under this head amounted to Rs. 2,599–1–3 against Rs. 2,720 as per revised estimate, and Rupees 2,765–5–10, the actuals of the previous year. The decrease of Rs. 120–14–9, as compared with the revised estimate, is due to the reduced amount charged on account of books and forms supplied by the contractor through the Accountant-General.

18. A copy of the council's resolution approving the report is enclosed.

19. The statements I, II, III and IV showing the statistics of all municipal schools in the town received from the Assistant Inspector of Schools, Third Division, and the report of the Civil Apothecary in medical charge of the municipal hospital, Adóni, on the working of the hospital and on the sanitation of the town accompany.

I—

ENCLOSURE.

From M.R Ry. S. J. PARTHASARATHY IYER, Civil Apothecary in Medical charge, Adóni, to the Chairman, Municipal Council (through the District Medical and Sanitary Officer, Bellary), dated Adóni, 1st April 1894.

I have the honour to submit the following administration report on the state and progress of the municipal hospital and on the sanitation of Adóni for the official year ending 1894–95.

Public Health.—The health of the people compares favourably with that of the previous year, there being less malarial fevers and sore-eyes.

2. *Vital Statistics.*—Births and deaths are registered by a clerk in the municipal office specially deputed to the work. (*a*) Births registered, excluding born dead, are 955 against 851 of last year. (*b*) Deaths from all causes, excluding born dead, are 642 against 612 of last year. (*c*) Deaths from cholera *nil* against three of last year. (*d*) Deaths from fevers 223 against 303 of last year. (*e*) Deaths from all other causes 419 against 307 of last year. Registration of vital statistics was conducted more systematically in the year under report than in the preceding year.

3. *Sanitation.*—There are 5 urinals and 16 public and 826 private latrines for a population of about 26,000. Efforts are being made to build more. Private scavenging system has been in force since 1871. The night-soil is removed to the "seven acres," where it is disposed of in trenches. The refuse of the town is collected in dust-bins, 125, to be removed by a contractor to a selected place about a furlong from the town for eventual use as manure. There are about 600 cess-pools, which are large wells, allowing sub-soil drainage. It has been recommended (*i*) that these should be closed and the refuse water be collected in select impervious cisterns. Efforts are being made by the municipality to close the old cess-pools one after the other, and to sanction digging new pits lined with impervious cement; (*ii*) that large iron tubs, specially constructed, be placed in the pits made for collecting urine and other refuse matter by the side of all iron latrines and urinals. In other respects the sanitation of the town is fair, being looked after by the sanitary staff.

Drainage.—Same as last year. The *water-supply* project has almost been completed. The water undergoes filtration before supply in the town. The supply is from a tank called Nallacheruvu and a spring Ramgherry. Rs. 1,05,679–2–6 out of an estimated cost of Rs. 1,62,000 were spent on the water-supply project.

Slaughter-house.—Same as last year.

4. *Vaccination.*—Annimal vaccination was maintained throughout the year. It is carried

on under the superintendence of the apothecary. Total number of cases vaccinated in the town with animal lymph for the official year ending is 1,600, of which 204 were performed by the apothecary. Number of children vaccinated under one year is 936, of which 829 were successful. The expenditure incurred upon animal vaccination is Rs. 187–13–1* against Rs. 203–11–3. Number of calves inoculated is 62 against 70 of last year. Out of 62 calves inoculated, 3 were unsuccessful. The decrease in the charges is due to the less number of calves operated. There is an increase of 99 operations as compared with that of 1893–94. According to the birth lists supplied by the mortuary clerk of the Municipal office there is not a single child who is six months' old that is unprotected. There are a few cases unprotected among children under ten years and above four years. The census of such children will be supplied to the vaccinator by the municipality. Vaccination is being systematically conducted for the past four or five years. Instructions contained in G.O., dated 19th October 1894, No. 1502 M., is strictly adhered to.

* This is only the cost of maintaining animal lymph.

(Signed) S. RAMU IYER,
Chairman.

5. *Hospitals and Dispensaries.*—(*a*) Accommodation sufficient and good.

(*b*) Latrines* ill-ventilated and in a bad state of repairs; so also is the cook-room, as per my letter, dated 29th November 1894, No. 60, to the District Medical and Sanitary Officer, Bellary.

* Provision has been made in the current year's budget for the repair of latrines and the works will be taken in hand shortly and completed in the year.

(Signed) S. RAMU IYER,
Chairman.

(*c*) Furniture sufficient and in a good state of repairs.

(*d*) Number of patients treated as compared with previous years. In 1892–93 in-patients 83, average number 5·81; out-patients 13,279, average number 93·85. In 1893–94 in-patients 90, average number 3·89; out-patients 16,654, average number 108·29. In 1894–95 total number of in-patients treated was 79, and the average number 3·12; total number of out-patients treated is 11,634, and the average number was 78·23.

The decrease of 11 among the in, and 5,020 among the out, patients is due to the health of the town being better than in the preceding year, as there were less number of malarial fevers and sore eyes.

The most common diseases among the out-patients were malarial fevers, diseases of the eye and diseases of the digestive system, and those among the in-patients were diseases of the connective tissue, malarial fevers and diseases of the digestive system and local injuries.

(*e*) Mortality and actual causes of it—two deaths from lung diseases, one from secondary syphilis, one from malarial fevers, one from general debility and old age, one from gangrene of right fore-arm, the result of compound fracture and one from disease of the heart.

(*f*) Operations and results. Among the in-patients there was one major and eight minor operations.

Among the out-patients there were 8 major and 442 minor operations; none of the operations were attended with any deaths. Among the 8 major operations, two were fractures. There is a decrease of two cases in the major, excluding fractures, and 228 among the main operations.

(*g*) Establishment whether sufficient and efficient. It is sufficient and efficient.

(*h*) *Midwives.*—Work actually done. During the year under report, midwife Thoyamma succeeded Mrs. Tristram and conducted 14 cases from latter part of June 1894 to middle of August, when Thippamma, a trained midwife, succeeded. She conducted 52 cases.

The total number of cases conducted is 66 against 100 of last year. She is paid on result system, the minimum number of cases being nine to entitle her to her fixed pay (Rs. 15).

(*i*) No caste and gosha women dispensary.

(*j*) Expenditure during the year under report, as compared with the previous year, is as follows: salaries of medical subordinates for 1894–95 are Rs. 1,536–10–8. There is an increase of Rs. 570–12–6, which is due to the promotion of the apothecary in charge since the 23rd April 1894. Salaries of servants are Rs. 542–6–7 against Rs. 625–2–5 of last year; the decrease of Rs. 82–11–10 represents saving in the pay of the midwife and the compounder owing to the vacancy in the appointment of the former for 2½ months and to the employment of a pupil compounder on less pay, viz., Rs. 5 per mensem. The dieting of patients costs Rs. 96–11–5 against Rs. 207–14–3. The decrease of Rs. 111–2–10 is due to the less daily average number of in-patients treated than in the previous year. Medical stores and instruments cost Rupees 1,260–1–1 against Rs. 615–5–3. The increase of Rs. 644–11–10 is due to the payment made during the year for the medicines bought in 1893–94. Miscellaneous and contingencies cost Rs. 275–14–8 against Rs. 211–7–11. This slight variation of Rs. 64–6–9 calls for no remarks.

This is a second-class hospital wholly supported by the municipality except $\frac{1}{8}$ of the pay of Civil Apothecary in medical charge which is borne by the Provincial funds.

To the Chairman, Municipal Council, Adóni.

No. 1521.

Forwarded.

BELLARY,
12*th May* 1895.

(Signed) J. W. EVANS, *Surgeon-Major,*
Dist. Medl. and Sanitary Officer.

Forwarded.

2. There is nothing to add to what has been said in the report regarding the state of the roads. The work of repair is now going on, and it is hoped that, by the end of the year, they will be put in proper order.

ADÓNI,
15*th June* 1895.

(Signed) S. RAMU IYER,
Deputy Collector.

Forwarded. There seems to have been a marked improvement in administration.

18*th June* 1895.

(Signed) H. TREMENHEERE,
Collector.

ORDER—dated 25th August 1895, No. 1535 M., Local and Municipal.

The receipts and charges of the Adóni Municipality for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

2. The municipal council met thirty-six times against forty-three in the previous year. The number of meetings adjourned for want of a quorum rose from two to five, which is not satisfactory. The average attendance of the members improved and was fair.

3. *Receipts.*—(1) The net current demands of the taxes on arts and professions and buildings increased by Rs. 159 and Rs. 421, respectively, but that of the tax on lands remained almost stationary.

(2) The collections under the principal taxes showed a decided improvement on those of the previous year and were, on the whole, satisfactory. Arrears amounting to Rs. 263 and Rs. 139, respectively, under the taxes on arts and buildings were however written off the books as irrecoverable. Had the council been more prompt in realising its dues in former years, this loss of revenue would probably have been avoided.

(3) Coercive measures were adopted to a larger extent than in 1893–94, but it is not creditable to the municipal executive that so many warrants should have remained unexecuted at the close of the year.

(4) The income from tolls improved slightly and, owing to the enhancement of the rate from one-half to the maximum, the collections under the tax on carts nearly doubled, for reasons explained in paragraphs 11 (4) and (6) of the Chairman's report. The receipts from the sale of sweepings and market rents declined. The fall in the revenue from fines is regrettable as it is apparently an indication that the police and the municipal executive were less energetic in preventing the committal of nuisances.

(5) The number of houses served by the private scavenging agency and the collections under this head improved, but the service was worked at a profit of only Rs. 176, against Rs. 351 in 1893–94. This result is apparently due to larger expenditure during the year on the purchase of night-soil carts and on establishment. As less than one-sixth of the total number of houses assessed to the tax on buildings is at present served by this agency, its operation are evidently capable of further extension and the council should make real efforts to achieve this end in the current year. The alleged difficulty in collecting the private scavenging fees in advance does not seem to Government to be insurmountable.

4. *Expenditure*—(1) *Public Works.*—The most important work under execution during the year was the water-supply scheme, on which a sum of Rs. 1,22,402–2–11 out of an estimate of Rs. 1,62,000 was spent up to the 31st March 1895. The travellers' bungalow and the two zinc latrines, which were in course of construction in 1893–94, were also completed, and certain improvements were effected in the Jubilee market. For reasons explained in paragraph 13 (2) of the Chairman's report, the total outlay on communications amounted to only Rs. 503, or 13·9 per cent. of the net municipal revenue from tolls against the minimum of 50 per cent. prescribed by Government. The roads in the town, with the exception of those where the water-supply pipes are being laid, are, however, stated to have been in tolerably fair condition. The portion of the allotment for communications that has lapsed should be spent upon the roads in the current year.

(2) *Education.*—The net expenditure on education was Rs. 2,914, or 11·2 per cent. of the receipts from taxation. Of this, all but Rs. 198 was devoted to primary education. The municipal council continued to maintain five schools on the salary-result system and aided one secondary and fifteen primary schools, against seventeen in 1893–94, with result grants. Taken as a whole, the attendance at the municipal and aided institutions declined, owing, in the case of the latter, to the closure of three schools which were aided in the previous year. The results of the departmental and grant examinations were not satisfactory and more than 7 per cent. of the allotment for result grants was allowed to lapse. The attention of the Director of Public Instruction will be drawn to the delay in the submission of the certifying memoranda referred to in paragraph 14 (1) of the Chairman's report. The total number of boys under instruction in the municipal and aided schools fell from 55·3 to 48·1 per cent. of the male population of school-going age. The explanation of the fall in the strength of the municipal schools, which is stated to have been called for from the Educational Department, should be submitted to Government. The proportion of unpassed teachers employed in the aided schools was still large. These men should not be made to qualify themselves, the grants to them being further reduced or entirely with held until they do so.

(3) *Medical Relief.*—The

Chief Secretary.

No. 1555 M., Local and Municipal, 25th September 1895.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper:—

From M.R.Ry. S. RAMU AIYAR, Avargal, B.A., Chairman, Municipal Council, Ádóni, to the Chief Secretary to Government (through the Collector of Bellary) dated Ádóni, 6th June 1895, No. 191.

I have the honour to submit my report on the administration of the Madras District Municipalities Act IV of 1884 in the town of Ádóni for the official year 1894–95, accompanied by usual statements.

I.—Constitution of the Council.

2. (1) The sanctioned strength of the council remained the same as in the previous year, viz., at sixteen, of whom one is the Revenue Divisional Officer who is *ex-officio* member, and fifteen, consisting of three officials and twelve non-officials, are persons appointed by Government. The actual strength on the last day of the year was, however, fifteen due to the vacancy of a non-official seat which occurred on the 8th March and has yet to be filled up.

(2) The office of the Chairman was held by me during the year, having been elected by the council on the 6th April 1894, in succession to M.R.Ry. K. Subbarayadu Pantulu Garu transferred from the district.

(3) The council held 36 meetings, excluding five which were adjourned for want of a quorum, against 43 in 1893–94. The average attendance was 8·4 (officials 2·1 and non-officials 6·3) as against 7·7 (officials 1·8 and non-officials 5·9) in 1893–94, and thus showed an improvement. The greatest number of councillors present at any one meeting was thirteen and the least was six.

II.—Receipts.

3. *Statement I.*—In the following abstract the receipts under several heads in 1894–95 are compared with those of the budget and revised estimates for the year and the actuals of 1893–94 :—

From the above, it will be observed that the year opened with a balance of Rs. 7,666–9–0, and that the total receipts of the year, exclusive of the opening balance, amounted to Rs. 1,64,294–12–4, as against Rs. 1,63,700 as per revised estimate, and Rs. 96,536–12–4, the actuals of the previous year. There is an increase of Rs. 594–12–4 in the total income as compared with the revised estimate which occurred chiefly owing to the increased receipts under "tax on arts" and "tax on buildings" which resulted from the realization of a much larger percentage of the current and arrear demands than had been anticipated. The variations are explained in detail below.

4. (1) *Tax on Buildings.*—This tax was levied at the same rate as in the previous year. The actuals under this head amounted to Rs. 10,706–9–0 against Rs. 10,300 anticipated in the revised estimate. The original demand was Rs. 10,115–12–0, exceeding that of the previous year by Rs. 417–6–0. The increase has already been explained in connection with the revised estimate for the year under report.

(2) The number of appeals preferred against the assessments was 62 and all of them were disposed of before the close of the year. In 36 cases, the original assessments were confirmed, in fourteen they were reduced or remitted, and in twelve cases appeals were rejected for want of deposits or other causes. The reductions and remissions granted by the council on appeals amounted to Rs. 44, or 0·4 per cent. of the original demand.

(3) Of the final demand (Rs. 10,071–2–0) Rs. 9,947–9–0 were collected during the year, leaving a balance of Rs. 123–9–0 outstanding at its close, which has been reduced by subsequent collections and remissions up to date to Rs. 14–2–0; of which eleven cases covering Rs. 12–10–0 are under criminal prosecution and in the remaining case, the amount has to be written off as irrecoverable.

(4) The percentage of collection to demand during the year amounted to 98·8 per cent. against 94·2 in 1893–94, a result which, it is hoped, will be regarded as satisfactory. The assessment registers were ready on the 30th June 1894.

(5) The arrears outstanding at the beginning of the year were heavy—amounting to Rs. 906–14–0. Of this sum, Rs. 759 were collected before its close and Rs. 138–14–0 written off the accounts as irrecoverable, so that Rs. 9 only remained outstanding at the end of the year under report, which is due from one individual who has been prosecuted. The arrear collection thus came to 83·7 per cent. and was no doubt due to the increased efforts put forward on receipt of the severe remarks passed by Government in paragraph 3 (2) of its order, No. 1063 M., dated 10th August 1894, reviewing the annual report of this municipality for the year 1893–94.

(6) The average incidence of the tax on buildings was Rs. 1–13–10 against Rs. 1–12–7 in 1893–94, thus showing an increase of As. 1–3 per head.

5. (1) *Tax on Lands.*—This tax continued to be levied at two pies for every 80 square yards or 10 annas per acre. The net current demand, viz., Rs. 529–10–6, was almost the same as in 1893–94 and was imposed on 850 acres of land. Rs. 506–7–8 were realized, leaving a balance of Rs. 23–2–10 at the close of the year. Of this balance, Rs. 13–13–8 have since been collected, leaving still a balance of Rs. 9–5–2 due from two individuals, in one of which there is a question pending as to the correctness of the demand and in the other the defaulter is not forthcoming.

(2) The arrears outstanding at the commencement of the year amounted to Rs. 232–4–9, of which Rs. 228–14–8 were collected, and the balance Rs. 3–6–1 was remitted on account of overassessment.

6. (1) *Tax on Arts.*—This tax was levied at the same rates as in the previous year. The demand registers of this tax are prepared for each year. That of the year under report was ready on the 26th September 1894. The original current demand of the tax amounted to Rs. 8,113 or Rs. 109 in excess of the previous year's demand.

(2) The number of appeals preferred against the tax was 61 as against 118 in 1893–94. The result of the appeals was that in 33 cases the assessment was confirmed, in 23 it was reduced, in two it was remitted, and in three cases the appeals

were rejected for want of deposits or other causes. The remissions and reductions granted by the council on appeals amounted to Rs. 304, or 3·7 per cent. of the original demand, against Rs. 354–8–0 or 4·4 per cent. in 1893–94.

(3) The final demand was Rs. 7,809 or Rs. 159–8–0 more than in 1893–94. The increase is due to the careful revision of the registers by the special sub-committee appointed for the purpose. The whole of the demand except Rs. 198–8–0 was realized within the close of the year. Of the balance, Rs. 131–8–0 has since been collected and Rs. 18 written off as irrecoverable, leaving a balance of Rs. 49 still to be cleared off. Of this amount, thirteen cases involving Rs. 21 are under criminal prosecution and in fifteen cases involving Rs. 28, parties have left the town. Steps are being taken to realize the arrears in these cases.

(4) The percentage of collections to finally settled demand was 96·8 against 92·7 in 1893–94, a result which shows a considerable improvement over the previous year.

(5) The arrears outstanding at the commencement of the year were Rs. 1,031, of which Rs. 755 were realized, Rs. 263 written off as irrecoverable and Rs. 13 left uncollected at the close of the year. Of the latter sum, Rs. 12 have since been collected, leaving only one rupee for which a prosecution has been instituted.

(6) The total number of persons assessed to the tax on arts and the incidence per head were 1,873 and Rs. 4–2–8, respectively, as against 1,857 and Rs. 4–1–11 in 1893–94. The number of assessees was 7·1 per cent. of the population of the town.

(7) Before the irrecoverable arrears under the several heads of taxation were written off, each case was properly enquired into by the Tahsildar who is a councillor and scrutinized by me.

7. *Tax on Vehicles, Animals and Carts.*—The rate of the tax on carts was raised from half to the maximum during the year under report. The taxes on animals and other vehicles continued to be levied at the same rate as before. The receipts under this head amounted to Rs. 2,704–8–0 against Rs. 2,730, anticipated in the revised estimate, and Rs. 1,929, the actuals of the previous year. The increase of Rs. 775–8–0 over previous year being due chiefly to the increased rate charged on carts.

The slight decrease of Rs. 26 under tax on animals, as compared with the revised estimate, calls for no remarks.

8. (1) *Coercive process.*—The number of warrants issued during the year was 1,891 against 1,442 in 1893–94. Adding to this, the unexecuted warrants at the close of the year 1893–94 the total was 2,094. Of these 1,828 were executed and cancelled within the year, leaving 266 unexecuted at the close of the year. The warrants covered Rs. 3,786–10–10, of which Rs. 3,174–10–8 were realized. Property was distrained in five cases, but the arrears were paid up in all cases before the date fixed for sale.

(2) Ninety-nine prosecutions were instituted during the year for default of payment. Of these, 81 were withdrawn on parties paying the taxes before trial or judgment, fifteen were tried and adjudicated upon by the magistracy, resulting in convictions and infliction of penalties amounting to Rs. 15–2–0 and three cases are still pending before the magistracy in consequence of the disappearance of the defaulters.

9. *Tolls.*—These were levied at the full schedule rates authorized by the Act. There were seven toll-gates and all of them were leased out to contractors. The gross collections including interest amounted to Rs. 4,851–15–6. Deducting from this a sum of Rs. 11–14–0 on account of charges incurred in the purchase of toll-gate boards, there resulted a net income of Rs. 4,840–1–6. Of this sum, Rs. 1,210–0–4 were paid to the District Board, Bellary, being one-fourth share due to it, and the balance of Rs. 3,630–1–2 was credited to municipal funds.

10. *Incidence of Taxation.*—The incidence of taxation per head of the population according to census of 1891 was As. 15–11 including tolls and As. 13–8 excluding them against As. 14–4 and As. 12–3, respectively, in the preceding year. The

incidence was higher than in the previous year owing to the collection of large outstanding arrears of previous years under "Tax on Arts" and "Tax on Buildings" and to the raising of the "Tax on Carts."

11. (1) *Miscellaneous Receipts.*—The revenue from this source amounted to Rs. 1,38,187–9–10 against the revised estimate of Rs. 1,38,250 and Rs. 72,984–5–5, the actuals of the previous year.

(2) *Avenues.*—Rupees 1–13–0 only were realized from the sale of avenue clippings against sum of Rs. 20 expected from it in the revised estimate, the decrease being due to the want of operations under this head.

(3) *Sale-proceeds of old Materials, &c.*—The amount realized from this source was Rs. 82–6–0, or Rs. 32–6–0 in excess of the revised estimate. The increase is due to a large collection of useless materials which had accumulated in the office having been sold at the close of the year.

(4) *Sale-proceeds of Night-soil, Street Refuse, &c.*—The amount realized under this head is made up of (1) Rs. 138, (2) Rs. 313–15–5, and (3) Rs. 63–15–9, being respectively the sale-proceeds of night-soil, of street refuse and of conservancy bullocks and carbolic acid, giving a total of Rs. 515–15–2 against the revised estimate of Rs. 650 and against Rs. 804–1–8, the actuals of previous year. The decrease of Rs. 134–0–10 as compared with the revised estimate is nominal and was due to the fact of the night-soil accumulated at the depôt during the year not having been sold before the close of the year. The amount of Rs. 138 shown above under this head represents a portion of the receipts from the sale of previous year's accumulations realized in the beginning of the year. The accumulations in the depôt during the year have since been sold and realized Rs. 392 which will, of course, come into the accounts of the current year.

(5) *Fees from Educational Institutions.*—The fees realized from this source amounted to Rs. 271–14–9, showing a slight increase of Rs. 21–14–9 over the revised estimate. This increase was due chiefly to the improved attendance of pupils in the Muhammadan salary-result school.

(6) *Income from Markets.*—The actual income under this head hardly varies from the revised estimate. As usual the right of collecting the market fees in the only municipal market, which goes by the name of Victoria Jubilee market, was sold by public auction and realized Rs. 1,230–12–3, which is just the figure put down in the revised estimate. The falling off of Rs. 356–12–7 as compared with the previous year is accounted for by the fact that in the previous year the contractor having suffered loss, the bidders were more chary in running up the bids.

(7) *Sale-proceeds and Composition Fees of Medicines.*—The income derived from this source amounted to Rs. 54–15–2, or Rs. 14–15–2 in excess of the revised estimate. The increase is due to the fact that the value of medicines sold in 1893–94 was realized in the year under report.

(8) *Other Fees.*—This head includes distraint fees, license fees, cart-stand fees, &c. The only important item is license fees which amounted to Rs. 534–3–8 against the revised estimate of Rs. 550 and Rs. 508–5–8, the actuals of the previous year.

(9) *Fines under Municipal and Other Acts.*—These amounted to Rs. 480–13–0 against Rs. 500 shown in revised estimate. The decrease is small and calls for no remarks.

(10) *Grants and Contributions from Government.*—The whole amount of grant Rs. 81,000 promised by Government from provincial funds for expenditure on the water-supply project was received during the year under report. A grant of Rs. 50, for which credit has been taken in the budget at the suggestion of the Director of Public Instruction for payment of results grant to girls attending the municipal schools, was not drawn, there being no necessity to utilize it since no girls attended any of the municipal schools.

(11) *Contributions from Local Funds.*—The receipts under this head amounted to Rs. 635–8–2 against Rs. 610 in the revised estimate. The increase of Rs. 25–8–2 is due chiefly to the increased expenditure in the municipal hospital towards which the district board contributed one-eighth of its current charges.

(12) *Private Scavenging Fees.*—The income under this head amounted to Rupees 1,927–11–1 or Rs. 27–11–1 in excess of the revised estimate and Rs. 48–14–6 in excess of the actuals of the previous year. It will be seen that the income from this source is gradually increasing. The current demand under this head was Rupees 1,931–15–6, of which Rs. 1,915–8–5 were collected and Rs. 4–0–6 were written off the accounts as irrecoverable, leaving a balance of Rs. 12–6–7 outstanding at the close of the year. The arrear demand at the commencement of the year was Rs. 24–8–8, of which Rs. 12–2–8 were collected, and the remainder was struck off the accounts as irrecoverable. It has been found difficult to insist upon prepayment in all cases, owing to the fact that a large number of the persons who avail themselves of the services of the municipal toties are poor Muhammadans.

(13) *Advances recovered.*—Rs. 51,000 which had been placed at the disposal of the Sanitary Engineer to Government, Madras, in 1893–94 for meeting English drafts for pipes, machinery, &c., ordered from England and other purposes, Rupees 42–10–0 paid for process fees and Rs. 19–1–6 incurred in the removal of obstructions in a nallah were adjusted during the year under report.

III.—Expenditure.

12. *Statement II.*—In the following abstract the expenditure under several heads in 1894–95 is compared with the budget and revised estimates for the year and the actuals of 1893–94 :—

——	Actuals for 1893–94.	Budget estimate for 1894–95.	Revised estimate for 1894–95.	Actuals for 1894–95.

13. (1) *Grant I, Public Works.*—The outlay on public works was Rupees 91,532–10–3 against the revised estimate of Rs. 1,39,370, showing a decrease of Rs. 47,837–5–9, which is chiefly made up of a sum of Rs. 1,321 under communications—new works, Rs. 6,211 under buildings—new works, Rs. 39,574 under water-supply, Rs. 476 under communications—repairs.

(2) *Roads.*—The expenditure on roads was Rs. 502–13–3. Of this, Rs. 179–1–0 were spent on the new work in connection with the widening of Kumbardiddi road and Rs. 323–12–3 on sundry repairs to existing roads, against Rs. 1,500 and Rs. 800 respectively provided in the revised estimate. Subsequent to the submission of the administration report for the year 1893–94, it was decided, in view of the bad state of the roads and the insufficient allotment made in the budget for them, to stop further outlay on widening streets and devote the available funds towards the re-metalling and gravelling of the chief town roads; but no expenditure was actually incurred before the close of the year on this account. Several causes contributed to this result. In the first place, the repair of the roads could not be taken in hand until the water-pipes were laid. This work went on till the end of December. Then tenders were invited for collection of metal and gravel. There were but few tenders, owing to the fact that all the available contractors, of whom there are only a few in this place, were engaged on the water-works. A contractor was secured in February 1895, but he had not completed the work of collection and stacking before the end of the year; hence the low expenditure referred to. The council hopes, however, that the roads will be put into thorough order in the course of the current year.

(3) The total length of the roads maintained by the council is $8\frac{3}{4}$ miles, of which 5 miles are metalled and $3\frac{3}{4}$ gravelled. With the exception of those roads where pipes are laid, all the other roads were merely gravelled and kept in a tolerable condition.

(4) *Tolls and Road Charges.*—The total expenditure on communications amounted to 13·9 per cent. of the net toll receipts against 80·5 in 1893–94, the low percentage being due to the circumstances represented in paragraph 13 (2) *supra*. The deficiency will be made up this year.

(5) *Buildings.*—The expenditure under this head amounted to Rs. 3,571–2–3 against an allotment of Rs. 9,780 provided in the revised estimate. The following are the works provided for execution in the year under report:—

—	Estimate.	Expenditure. In 1894–95.	Expenditure. Up to 1894–95.
Incomplete works of 1893–94.	Rs. A. P.	Rs. A. P.	Rs. A. P.
1. Constructing travellers' bungalow	4,900 0 0	1,290 2 2	4,587 7 5
2. Improving the Jubilee market	3,500 0 0	320 0 0	1,250 0 0
3. Constructing two zinc latrine s	1,480 0 0	772 2 9	1,422 2 9
4. Do. two urinals	150 0 0	..	80 0 0
Works provided for 1894–95.			
5. Constructing Municipal office	7,320 0 0	16 8 8	16 8 8
6. Do. zinc latrines	740 0 0	316 0 0	316 0 0
7. Improvements to latrines	230 0 0	53 11 8	53 11 8
8. Do. to slaughter-houses	250 0 0	..	..
9. Repairs to buildings and latrines	300 0 0	302 9 0	302 9 0

Incomplete works.—Work No. 1 was commenced in 1892–93 and completed during the year under report. The account was finally settled in the year.

The decrease as compared with the estimate is due to transfer of Rs. 324–12–7 on account of furniture, &c., bought for the use of the bungalow, to 4 (*b*) contingencies under Grant IV from Grant I—new works, buildings, as per instructions conveyed in clause (5) of paragraph 1 of the official memorandum from Government, dated 26th July 1894, No. 605. As reported in paragraph 47 of the administration report for 1893–94, embodied in G.O., No. 1063 M., dated 10th August 1894, the bungalow is still occupied by the supervisor in charge of the Adóni water-works. It is likely to become available for public use in the course of the current year.

Improvements to the Jubilee Market (work No. 2).—These were commenced in 1893–94 and completed during the year under report. The total outlay incurred on it was Rs. 3,422–3–9, the amount estimated being Rs. 3,500. There was thus a saving of Rs. 77–12–3, notwithstanding an outlay of Rs. 78–3–1 incurred in the execution of certain extra works not provided for in the estimate, which is due to the action of the council in putting up the contract for competition among those who tendered for the work. Only a sum of Rs. 820 was paid in the year under report, the final bill having been presented by the contractor since the close of the year. He has now been paid Rs. 1,809–3–9, the balance of Rs. 363 * being withheld for payment until a good fall of rain occurs so as to see whether the roof is rain-proof.

* Since paid.

The two zinc latrines (work No. 3) which were under execution in 1893–94 were completed during the year under report. The expenditure incurred on them in the year under report was Rs. 772–2–9 and up to the year Rs. 1,422–2–9, which represents the actual value of work done as compared with the estimate of Rs. 1,480.

A sum of Rs. 150 had been provided for two urinals (work No. 4). These were constructed but not paid for in the year, as the contractor has not submitted his bill.

New Works.—The construction of a municipal office (work No. 5) for which an allotment of Rs. 5,000 was made in the budget could not be taken up during the year under report, owing to the site proposed for the building not having been yet acquired. The proposal for acquiring the site is before Government. It must be admitted that the proposal should have been sent up earlier and the omission is regretted. Tenders for executing the work have been called for.

The new latrine (work No. 6) for which provision was made in the budget of the year under report was under construction at the close of the year, only a sum of Rs. 316 out of an allotment of Rs. 740 having been spent on it. The slow progress of the work is due to the difficulty in procuring the services of a contractor, and to the contractor to whom the work has been entrusted being engaged on the large concern of water-works.

Of Rs. 230 provided in the budget for the improvement of latrines (work No. 7), only Rs. 53–11–8 were spent in the improvement of Venkennakéri male latrines. The short outlay was due to the fact that the municipality had an inefficient overseer, whom they had to dispense with, and they could not get a proper hand, though the vacancy was duly advertised.

The improvements to the slaughter-houses (work No. 8) for which a sum of Rs. 250 had been allotted were not undertaken as they had to be postponed pending receipt of the suggestions of the Sanitary Commissioner as to the nature of the improvements required. These were received with his inspection notes, dated 2nd February 1895, and the Sanitary Engineer to Government has been requested to favour the council with a plan and estimate to give effect to them.

An expenditure of Rs. 302–9–0 against an allotment of Rs. 300 was incurred in executing repairs (work No. 9) to the works enumerated below :—

	Rs.	A.	P.
1. Repairs to municipal office	27	12	10
2. Do. to cattle shed	11	5	10
3. Municipal chattram	15	4	4
4. Havennapet poor school	40	12	1
5. Latchuram's latrine	99	8	10
6. Gowlivada latrine	32	15	7
7. Kilchipet latrine	60	13	9
8. Municipal hospital	13	15	9
Total ..	302	9	0

(6) *Drainage and Water-supply.*—Rs. 146–9–10 only out of an allotment of Rs. 300 were spent in clearing drains of their accumulated silt, there being no necessity for utilizing the balance. The water-supply project was commenced in 1893–94 and is approaching completion. The expenditure incurred during the year was Rs. 86,625–12–9 against the revised estimate of Rs. 1,26,200. Up to the close of the year under report Rs. 1,22,402–2–11 out of the estimated sum of Rs. 1,62,000 had been spent. Details of the works carried out will, it is presumed, be furnished in the departmental report of the Sanitary Engineer.

14 (1) *Grant II, Education.*—The total expenditure on education, exclusive of the outlay on school buildings (Rs. 40–12–1) debited to Grant I, was Rs. 3,185–7–2 against Rs. 3,580 in the revised estimate for the year and Rs. 3,709–0–11, the actuals of the previous year. The decrease as compared with the revised estimate occurred under "result stipends" and "contingencies" in the salary-result system schools and under "result grant schools," and was due in the first case to the grant earned by all the schools having been much less than had been anticipated ; in the second to the non-purchase of furniture and other articles provided for in the budget, and in the third to the non-payment within the year of grant earned by some of the result grant schools owing to the late receipt of the certifying memoranda from the Assistant Inspector of Schools, III Division.

(2) *Training Schools.*—Nothing was spent on this account.

(3) *Municipal Schools.*—As in the previous year the municipal council maintained five schools on the salary-result system. The total number on the rolls and the average attendance at these schools on the 31st March 1895 were 337 and 302 respectively against 367 and 292 on the corresponding date in the previous year. There was a falling off in the strength which has not been explained by the Educational Department. Information has been called for on this point. The decrease appears entirely in Hindu schools, while the strength of the schools intended exclusively for Muhammadans was stationary. The attendance, however, showed considerable improvement. These schools sent up for the standard examination 240 pupils, of whom 126 passed, which is rather a low percentage of success. The total cost of these schools was Rs. 1,964–2–0 and the net cost to the municipal council after taking

credit for the fees amounting to Rs. 271–14–9 was Rs. 1,692–3–3 against Rupees 2,160–8–4 in 1893–94. The average cost of educating each pupil in these schools was Rs. 5–9–8 against Rs. 7–6–5 in the previous year. The cause of the decrease has already been explained. All these schools were examined by the Assistant Inspector of Schools, Third Division, and the result is reported to be fair.

(4) *Grant-in-aid Schools.*—On the 31st March 1895 the number of these schools was 16 with 620 pupils as against 18 schools with 732 pupils on the corresponding date in 1894. This is accounted for by three schools, which earned grants formerly having been closed, while a new one was brought under inspection for the first time during the year under report. Of these schools, one was secondary and 16 primary schools. From these schools, 493 pupils were presented for examination, of whom 302 were found qualified for grants against 538 and 388, respectively, in 1893–94. The total grant earned by these schools amounted to Rs. 1,004–9–0, of which a sum of Rs. 926–11–0 was disbursed within the year and Rs. 77–14–0 after its close in consequence of the late receipt of the certifying memoranda. Result grants were paid at the maximum rates to all the municipal schools and to such other schools as continued to employ trained or certificated teachers, and at 75 per cent. to all other schools aided from municipal funds.

(5) There were eight other schools with 182 pupils on the 31st March 1895. Of these, one girls' school is maintained by the Government, and the rest are maintained by private individuals. Their only means is the amount of fees which they get from the boys. These individuals do not wish their schools to be registered for grants, because they are either incompetent or unwilling to maintain the necessary registers and to observe the rules on the subject. In the unaided Muhammadan schools nothing but religious instruction is imparted and in other schools elementary instruction is given.

(6) The total number of boys receiving instruction in the schools maintained and aided from municipal funds was 957 or 48·1 per cent. against 1,099 or 55·3, respectively, of the male population of the school-going age.

(7) *Inspection.*—As in the previous year there were two inspecting schoolmasters, a Musalman and a Hindu. Their work during the year as guaged by the number of days spent by them on inspection and the number of pupils examined was fair, but the Hindu schools apparently need more competent and closer inspection. The inspecting schoolmaster who was untrained has been sent for training in the Government Training school at Bellary, and it is hoped that he will return better equipped with knowledge. The cost to the municipality on their account was Rs. 294–10–2 against Rs. 283–14–5 in the previous year.

(8) *Miscellaneous.*—Under this head nothing was spent.

15. *Grant III, Sanitation and Medical Services*—(1) *Hospitals and Dispensaries.*—The expenditure under this head amounted to Rs. 3,771–12–5 against Rs. 3,700 in the revised estimate and Rs. 2,684–7–4, the actuals of the previous year. Compared with the revised estimate there is an increase of Rs. 71–12–5 under "medicines and supplies" owing to the purchase of large quantity of medicines on extra indents submitted by the civil apothecary in charge of the municipal hospital, Ádóni. The large increase over the actuals of the previous year was due to the payments made in the year on account of medicines received in 1893–94 as well as those received in the year under report, and to the increased pay of the civil apothecary. The decrease of Rs. 53–4–7 under diet of patients is owing to the smaller number of admissions among the in-patients. The variations in other items under this head are slight and call for no remarks.

(2) The total number of patients treated in the hospital was 79 in-patients and 11,634 out-patients against 90 and 16,654, respectively, in 1893–94. The large falling off in the number of out-patients is ascribed by the civil apothecary in medical charge of the hospital to the health of the town being better in the year under report, and a consequent diminution in the number of cases under sore-eyes and malarial fevers.

(3) *Midwives.*—The midwife attached to the municipal hospital attended 66 cases or an average of five cases per month against 100 cases, giving an average of eight in the preceding year. The large falling off is due to there being frequent changes in the personnel of the midwives. Two midwives successively resigned. The present one took charge only in September 1894. It will take some time before she makes herself acquainted with the people and secures their confidence.

(4) *Contributions to Provincial and Local Funds.*—The total amount paid to Provincial funds amounted to Rs. 853 against Rs. 160 in the revised estimate and Rs. 163, the actuals of the previous year. There is a large increase over the revised estimate figures and actuals of the previous year, which is due apparently to the contributions having been calculated on the total receipts including the special grant and loan from Government.

(5) *Medical training of women.*—The council has nothing to add in regard to the medical training of women to what had already been stated in paragraph 60 of its administration report for 1893–94 embodied in G.O., No. 1063 M., dated 10th August 1894.

(6) *Vaccination.*—The statistics relating to vaccination are given in Statement XIII accompanying this report. The total outlay on vaccination was Rs. 389–1–7 against Rs. 420 allotted in the revised estimate. The variation is slight and calls for no remarks. The total number of operations performed by the municipal vaccinator was 1,396 against 1,127 in the previous year. Of the former, 1,259 were primary vaccination and 137 revaccination of the total number (1,396). Of cases, 1,180 or 84·5 per cent. were reported to have been successful against 1,052 or 88·1 per cent. in the previous year. The total number of successful operations amounted to 44·9 per mille of the population against 40·0 per mille in 1893–94. The total number of children under one year successfully operated upon was 796 or 30·3 per mille of the population against 701 or 26·7 per mille in the preceding year. Six hundred and eighty-five prosecutions for failure to have children vaccinated were instituted during the year against 189 in 1893–94. Animal lymph was used throughout the year. The average cost of each successful operation was As. 5–3 against As. 6–1 in the previous year. The vaccinator's work is supervised by the civil apothecary in medical charge, municipal hospital, Ádóni, who verified 866 cases against 680 in 1893–94.

(7) The number of operations performed by the civil apothecary in charge of the municipal hospital, Ádóni, is given below as compared with that of the previous year :—

		1893–94.	1894–95.
(*a*)	Number of operations performed with animal lymph ..	210	204
	Do. of successful operations	160	190
(*b*)	Do. of operations below one year of age	75	37
	Do. of successful operations	54	33

(8) *Vital Statistics.*—The following abstract shows the number of births and deaths registered during the year under report as compared with the previous year :—

—	Births.	Rate per mille.	Deaths.	Rate per mille.
1893–94	851	32·4	612	23·3
1894–95	955	36·3	642	24·5

It will be observed from the above figures that registration was more complete than in 1893–94. The year under report was more healthy than the previous one, and this probably accounts for the apparently small increase which has resulted in the number of deaths registered from the efforts which have been made to improve the registration since the receipt of the remarks passed in second part of paragraph 4 (4) of G.O., No. 1063 M., dated 10th August 1894. Eighty-one prosecutions were instituted for failure to register births and deaths. The expenditure on this account amounted to Rs. 158–8–0 against Rs. 150 in the revised estimate.

(9) *Conservancy.*—The expenditure on conservancy, road-cleaning and road-watering amounted to Rs. 7,672–7–1 against the revised estimate of Rs. 8,300 and Rupees 7,239–11–8, the actuals of the previous year. The decrease as compared with the revised estimate was caused by the non-utilization within the year of the amounts set apart for eradicating prickly-pear existing by the side of pathways in the outskirts of the town and by the fall in the prices of gram and fodder bought for the use of the municipal cattle. The percentage of expenditure to the total ordinary receipts (excluding special grants from provincial funds) was 23·8 against 23·6 in 1893–94. The conservancy of the town was, on the whole, well attended to. An establishment consisting of one inspector, two maistries, six peons, 39 toties (23 public and 16 private), 30 sweepers, two water-bearers and one cattle-shed keeper with two rubbish and eight night-soil carts (five iron and three wooden ones) is maintained for the purpose. As in the previous year there were 125 dust-bins, of which 51 were moveable and the remainder immoveable ones. The former are made of iron and the latter of stone slabs fixed upright in the ground. The council has deferred purchasing more dust-bins, which are really necessary, under the advice of the Sanitary Commissioner, who has promised to favour it with suggestions as to the pattern of dust-bins to be sent for. As already stated in clause 2 of paragraph 70 of the administration report of this municipality for 1893–94 embodied in G.O., No. 1063 M., dated 10th August 1894, the removal and disposal of sweepings was carried out by leasing the privilege to a contractor. This system is condemned by the Sanitary Commissioner as most objectionable from a sanitary point of view, although it is financially profitable to the municipality. The council proposes to reconsider the arrangements when framing the next year's budget. The contents of dust-bins are now being deposited in a place somewhat further away from the town than before in deference to the views of the Sanitary Commissioner. There were sixteen latrines on the 31st March 1895, while those on the corresponding date of 1894 were fifteen. The two zinc latrines commenced in 1893–94, and left incomplete at its close, were completed during the year under report and they have taken the place of a mud-walled latrine in Gowlivada which had been demolished as unsuited for the purpose. Two zinc urinals were built in the year under report as already stated, one of them being in the place of an enclosure of stone slabs. Of the total number of latrines, six are made of zinc sheets, six of masonry walls and four mud walled. They were cleaned twice a day and kept in a satisfactory state. Three iron carts (two for the removal of night-soil and one for urine), 75 buckets for deposit of night-soil, and five iron scrapers for scavengers were bought during the year under report at a cost of Rs. 383. There were five urinals on the 31st March 1895, while those on the corresponding date of 1894 were four. Of the former, three were made of zinc sheets and two of granite slabs.

(10) *Private Scavenging.*—The exact number of private latrines is not known. There were 826 latrines served by the municipal agency on the 31st March 1895, while those on the corresponding date in 1893–94 were 806. The income derived from this source was Rs. 1,927–11–1, while the charges amounted to Rs. 1,751–9–0, the profit to the municipality being Rs. 176–2–1. The expenditure in the year as compared with the previous year showed an increase of Rs. 432–11–5, which was due to the outlay on the purchase of night-soil carts, &c. The number of toties devoted to this source remained the same, viz., 16, costing Rs. 121 per mensem.

(11) The night-soil from both the public and private latrines was taken to the depôt which is more than a mile away from the town and is buried there in trenches and covered with earth. The suggestions of the Sanitary Commissioner regarding the size of trenches and the method of covering them are being attended to.

16. *Grant IV, Lighting and Miscellaneous*—(1) *Lighting.*—The expenditure under this head amounted to Rs. 1,280–11–6 or Rs. 19–4–6 below the revised estimate. The decrease is small and does not call for any remarks. Sixteen new lamps were put up in the year, thus increasing the total to 176. The lighting of the town was carried on departmentally as in previous years.

(2) *Markets and Slaughter-houses.*—The improvements to the markets that had been taken in hand were completed during the year. Nothing was done to the slaughter-houses for reasons already explained in paragraph 13 (5) *supra.*

(3) *Choultries.*—The expenditure on this account consisted of the pay of the sweeper employed to keep the choultry clean. The daily average number of people who halted was three. The expenditure on this account was Rs. 24, or Rs. 6 less than the revised estimate. The chattram is a poor concern and hardly serves the purpose for which it is intended.

(4) *Avenues.*—The expenditure under this head was Rs. 76–8–0, or Rs. 3–8–0 less than the revised estimate. The decrease is slight and calls for no remarks.

(5) *Other charges.*—These amounted to Rs. 534–3–5 against Rs. 620 in the revised estimate and Rs. 349–1–8, the actuals of the previous year. The decrease is due to no charges for the destruction of stray dogs having been incurred, no necessity having arisen for incurring the same. The savings in the cost of printing proceedings, &c., also contributed to the decrease.

17. *Grant V, General Establishment*—(1) *Office.*—The charges under this head amounted to Rs. 2,599–1–3 against Rs. 2,720 as per revised estimate, and Rupees 2,765–5–10, the actuals of the previous year. The decrease of Rs. 120–14–9, as compared with the revised estimate, is due to the reduced amount charged on account of books and forms supplied by the contractor through the Accountant-General.

18. A copy of the council's resolution approving the report is enclosed.

19. The statements I, II, III and IV showing the statistics of all municipal schools in the town received from the Assistant Inspector of Schools, Third Division, and the report of the Civil Apothecary in medical charge of the municipal hospital, Adóni, on the working of the hospital and on the sanitation of the town accompany.

Enclosure.

From M.R Ry. S. J. PARTHASARATHI AIYAR, Civil Apothecary in Medical charge, Adóni, to the Chairman, Municipal Council (through the District Medical and Sanitary Officer, Bellary), dated Adóni, 1st April 1894.

I have the honour to submit the following administration report on the state and progress of the municipal hospital and on the sanitation of Adóni for the official year ending 1894–95.

Public Health.—The health of the people compares favourably with that of the previous year, there being less malarial fevers and sore-eyes.

2. *Vital Statistics.*—Births and deaths are registered by a clerk in the municipal office specially deputed to the work. (*a*) Births registered, excluding born dead, are 955 against 851 of last year. (*b*) Deaths from all causes, excluding born dead, are 642 against 612 of last year. (*c*) Deaths from cholera *nil* against three of last year. (*d*) Deaths from fevers 223 against 303 of last year. (*e*) Deaths from all other causes 419 against 307 of last year. Registration of vital statistics was conducted more systematically in the year under report than in the preceding year.

3. *Sanitation.*—There are 5 urinals and 16 public and 826 private latrines for a population of about 26,000. Efforts are being made to build more. Private scavenging system has been in force since 1871. The night-soil is removed to the "seven acres," where it is disposed of in trenches. The refuse of the town is collected in dust-bins, 125, to be removed by a contractor to a selected place about a furlong from the town for eventual use as manure. There are about 600 cess-pools, which are large wells, allowing sub-soil drainage. It has been recommended (*i*) that these should be closed and the refuse water be collected in select impervious cisterns. Efforts are being made by the municipality to close the old cess-pools one after the other, and to sanction digging new pits lined with impervious cement; (*ii*) that large iron tubs, specially constructed, be placed in the pits made for collecting urine and other refuse matter by the side of all iron latrines and urinals. In other respects the sanitation of the town is fair, being looked after by the sanitary staff.

Drainage.—Same as last year. The *water-supply* project has almost been completed. The water undergoes filtration before supply in the town. The supply is from a tank called Nallacheruvu and a spring Ramgherry. Rs. 1,05,679–2–6 out of an estimated cost of Rs. 1,62,000 were spent on the water-supply project.

Slaughter-house.—Same as last year.

Vaccination.—Animal vaccination was maintained throughout the year. It is carried on under the superintendence of the apothecary. Total number of cases vaccinated in the town with animal lymph for the official year ending is 1,600, of which 204 were performed by the apothecary. Number of children vaccinated under one year is 936, of which 829 were successful. The expenditure incurred upon animal vaccination is Rs. 187–13–1* against Rs. 203–11–3. Number of calves inoculated is 62 against 70 of last year. Out of 62 calves inoculated, 3 were unsuccessful. The decrease in the charges is due to the less number of calves operated. There is an increase of 99 operations as compared with that of 1893–94. According to the birth lists supplied by the mortuary clerk of the municipal office there is not a single child who is six months' old that is unprotected. There are a few cases unprotected among children under ten years and above four years. The census of such children will be supplied to the vaccinator by the municipality. Vaccination is being systematically conducted for the past four or five years. Instructions contained in G.O., No. 1502 M., dated 19th October 1894, is strictly adhered to.

* This is only the cost of maintaining animal lymph.

(Signed) S. RAMU AIYAR,
Chairman.

5. *Hospitals and Dispensaries.*—(*a*) Accommodation sufficient and good.

(*b*) Latrines* ill-ventilated and in a bad state of repairs; so also is the cook-room, as per my letter, dated 29th November 1894, No. 60, to the District Medical and Sanitary Officer, Bellary.

* Provision has been made in the current year's budget for the repair of latrines and the works will be taken in hand shortly and completed in the year.

(Signed) S. RAMU AIYAR,
Chairman.

(*c*) Furniture sufficient and in a good state of repairs.

(*d*) *Number of Patients treated as compared with previous years.*—In 1892–93 inpatints 83, average number 5·81; out-patients 13,279, average number 93·85. In 1893–94 in-patients 90, average number 3·89; out-patients 16,654, average number 108·29. In 1894–95 total number of in-patients treated was 79, and the average number 3·12; total number of out-patients treated is 11,634, and the average number was 78·23.

The decrease of 11 among the in, and 5,020 among the out, patients is due to the health of the town being better than in the preceding year, as there were less number of malarial fevers and sore eyes.

The most common diseases among the out-patients were malarial fevers, diseases of the eye and diseases of the digestive system, and those among the in-patients were diseases of the connective tissue, malarial fevers and diseases of the digestive system and local injuries.

(*e*) *Mortality and actual causes of it.*—Two deaths from lung diseases, one from secondary syphilis, one from malarial fevers, one from general debility and old age, one from gangrene of right fore-arm, the result of compound fracture and one from disease of the heart.

(*f*) *Operations and results.*—Among the in-patients there was one major and eight minor operations.

Among the out-patients there were 8 major and 442 minor operations; none of the operations were attended with any deaths. Among the 8 major operations, two were fractures. There is a decrease of two cases in the major, excluding fractures, and 228 among the main operations.

(*g*) *Establishment whether sufficient and efficient.*—It is sufficient and efficient.

(*h*) *Midwives—Work actually done.*—During the year under report, midwife Thayamma succeeded Mrs. Tristram and conducted 14 cases from latter part of June 1894 to middle of August, when Thippamma, a trained midwife, succeeded. She conducted 52 cases.

The total number of cases conducted is 66 against 100 of last year. She is paid on result system, the minimum number of cases being nine to entitle her to her fixed pay (Rs. 15).

(*i*) No caste and gosha women dispensary.

(*j*) Expenditure during the year under report, as compared with the previous year, is as follows: salaries of medical subordinates for 1894–95 are Rs. 1,536–10–8. There is an increase of Rs. 570–12–6, which is due to the promotion of the apothecary in charge since the 23rd April 1894. Salaries of servants are Rs. 542–6–7 against Rs. 625–2–5 of last year; the decrease of Rs. 82–11–10 represents saving in the pay of the midwife and the compounder owing to the vacancy in the appointment of the former for 2½ months and to the employment of a pupil compounder on less pay, viz., Rs. 5 per mensem. The dieting of patients costs Rs. 96–11–5 against Rs. 207–14–3. The decrease of Rs. 111–2–10 is due to the less daily average number

of in-patients treated than in the previous year. Medical stores and instruments cost Rupees 1,260–1–1 against Rs. 615–5–3. The increase of Rs. 644–11–10 is due to the payment made during the year for the medicines bought in 1893–94. Miscellaneous and contingencies cost Rs. 275–14–8 against Rs. 211–7–11. This slight variation of Rs. 64–6–9 calls for no remarks.

This is a second-class hospital wholly supported by the municipality except one-eighth of the pay of civil apothecary in medical charge which is borne by the provincial funds.

To the Chairman, Municipal Council, Adóni.

No. 1521.

Forwarded.

Bellary, 12*th May* 1895. (Signed) J. W. EVANS, *Surgeon-Major, Dist. Medl. and Sanitary Officer.*

Forwarded.

2. There is nothing to add to what has been said in the report regarding the state of the roads. The work of repair is now going on, and it is hoped that, by the end of the year, they will be put in proper order.

Ádóni, 15*th June* 1895. (Signed) S. RAMU AIYAR, *Deputy Collector.*

Forwarded. There seems to have been a marked improvement in administration.

18*th June* 1895. (Signed) H. TREMENHEERE, *Collector.*

Order—No. 1555 M., Local and Municipal, dated 25th September 1895.

The receipts and charges of the Ádóni Municipality for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

—	Actuals, 1893–94.	Budget estimate, 1894–95.	Revised estimate, 1894–95.	Actuals, 1894–95.

2. The municipal council met thirty-six times against forty-three in the previous year. The number of meetings adjourned for want of a quorum rose from two to five, which is not satisfactory. The average attendance of the members improved and was fair.

3. *Receipts.*—(1) The net current demand of the taxes on arts and professions and buildings increased by Rs. 159 and Rs. 421, respectively, but that of the tax on lands remained almost stationary.

(2) The collections under the principal taxes showed a decided improvement on those of the previous year and were, on the whole, satisfactory. Arrears amounting to Rs. 263 and Rs. 139, respectively, under the taxes on arts and buildings were however written off the books as irrecoverable. Had the council been more prompt in realising its dues in former years, this loss of revenue would probably have been avoided.

(3) Coercive measures were adopted to a larger extent than in 1893–94, but it is not creditable to the municipal executive that so many warrants should have remained unexecuted at the close of the year.

(4) The income from tolls improved slightly and, owing to the enhancement of the rate from one-half to the maximum, the collections under the tax on carts nearly doubled. For reasons explained in paragraph 11 (4) and (6) of the Chairman's report the receipts from the sale of sweepings and market rents declined. The fall in the revenue from fines is regrettable as it is apparently an indication that the police and the municipal executive were less energetic in preventing the committal of nuisances.

(5) The number of houses served by the private scavenging agency and the collections under this head improved. The service was worked at a profit of Rs. 176 against Rs. 351 in 1893–94. This result is apparently due to the improvement of the service by larger expenditure during the year on the purchase of night-soil carts and on establishment. As less than one-sixth of the total number of houses assessed to the tax on buildings is at present served by this agency, its operations are evidently capable of further extension and the council should make real efforts to achieve this end in the current year. The alleged difficulty in collecting the private scavenging fees in advance does not seem to Government to be insurmountable.

4. *Expenditure*—(1) *Public Works.*—The most important work under execution during the year was the water-supply scheme, on which a sum of Rs. 1,22,402–2–11 out of an estimate of Rs. 1,62,000 was spent up to the 31st March 1895. The travellers' bungalow and the zinc latrines, which were in course of construction in 1893–94, were also completed, and certain improvements were effected in the Jubilee market. For reasons explained in paragraph 13 (2) of the Chairman's report, the total outlay on communications amounted to only Rs. 503, or 13·9 per cent. of the net municipal revenue from tolls against the minimum of 50 per cent. prescribed by Government. The roads in the town, with the exception of those where the water-supply pipes are being laid, are, however, stated to have been in tolerably fair condition. The portion of the allotment for communications that has lapsed should be spent upon the roads in the current year.

(2) *Education.*—The net expenditure on education was Rs. 2,914, or 11·2 per cent. of the receipts from taxation. Of this, all but Rs. 198 was devoted to primary education. The municipal council continued to maintain five schools on the salary-result system and aided one secondary and fifteen primary schools against seventeen in 1893–94, with result grants. Taken as a whole, the attendance at the municipal and aided institutions declined, owing, in the case of the latter, to the closure of three schools which were aided in the previous year. The results of the departmental and grant examinations were not satisfactory and more than 7 per cent. of the allotment for result grants was allowed to lapse. The attention of the Director of Public Instruction will be drawn to the delay, referred to in paragraph 14 (1) of the Chairman's report, in the submission of the certifying memoranda. The total number of boys under instruction in the municipal and aided schools fell from 55·3 to 48·1 per cent. of the male population of school-going age. The explanation called for from the Educational Department in regard to the fall in the strength of the municipal schools should be submitted to Government. The proportion of unpassed teachers employed in the aided schools was still large. If these men do not qualify themselves the grants due to them should be further reduced or entirely withheld until they do so.

(3) *Medical Relief.*—There was a decline in the total number of patients treated at the municipal hospital, which is ascribed to the healthiness of the season and not to any decrease in the popularity of the institution. The midwife attached to the hospital attended only 66 cases of labour against 100 in 1893–94, the fall being attributed to frequent changes among those who held the post. The municipal council's attention will be drawn to the civil apothecary's remarks regarding the repairs to the hospital cook-room.

(4) *Vaccination and Vital Statistics.*—The reported number of persons vaccinated during the year rose from 1,501 to 1,600, but the quality of the work turned out deteriorated and was poor, the reported ratio of success being only 85·6 against 90·2 per cent. in 1893–94. Infantile vaccination also declined slightly, the number of children under one year successfully operated on having been 829 against 852 in 1893–94.

Back Papers, No. of 18

Owing, apparently, to the large number of prosecutions instituted during the year, the registration of vital statistics improved, but the returns were still far from complete, the recorded rates being much below the normal. This subject should receive the continued attention of the council.

(5) *Sanitation.*—The expenditure under this head, amounting to Rs. 7,672, fell short of the allotment by nearly ·9 per cent. From the concluding portion of paragraph 15 of the Chairman's report, it appears that some attention is being paid to the sanitation of the town, but it is evident from the inspection notes of the Sanitary Commissioner recorded in G.O., No. 732 M., dated 1st May 1895, that a great deal yet remains to be done in the matter. The council should take these notes as its guide in undertaking sanitary improvements and should carry out one after another, as funds permit, the various recommendations made in them.

5. *General Remarks.*—The year closed with a balance of Rs. 52,797, or 32 per cent. of the ordinary receipts, but the greater portion of this sum will be required for expenditure on the water-supply scheme.

The administration of the municipality during the year under review showed a marked improvement on that of the previous year and was, on the whole, fair, but the improvement of the roads, registration of vital statistics and sanitation are matters which demand increased attention.

The Chairman's report has been rendered unnecessarily lengthy by the insertion in paragraphs 3, 12 and 13 (5) of figures which were already included in the statements.

(True Extract).

G. S. FORBES,
for *Chief Secretary.*
