(2) *Education*.—The net outlay on education of the income from taxation. Of this, Rs. 21 remainder to primary, education. The municipal primary schools on the salary-results system primary schools, as against four in the previous year, there was an improvement in the attendance the results of the departmental and grant examination, regret, however, that nearly 10 per cent. of the pupils failed to lapse, and that, although the percentage of improvement was higher than in most other towns, the proportion of pupils receiving instruction in the municipal and aided schools (35·9 per cent.) continued to be much below the percentage (54·2 per cent.) in 1893-94. In view of the small amount in the total allotment for grants, the reason for the small portion of paragraph 39 of his report for the year 1900-01 examined for grants does not appear to be satisfactory. The out of the thirty-four teachers employed in the municipal schools possessed trained teachers' certificates. The municipal schools none but duly-qualified teachers in its own schools holding the grants payable to them should be doing the same.

It would appear desirable that the educational branch of its work and ascertain what less expenditure.
