Remarks.

N.B. The figures relating to the College Department of the Noble College are not included in this statement.

× The Eurasian School at Bachupeta aided from Provincial funds was closed during the year under report.

⁎ One new school was opened for Fisherman class at Gilakaladindi.

(a) 1 School was amalgamated with the Noble Branch School Inugudurru

1 was closed on account of the serious illness of the teacher.

1 was closed as the teacher joined the Training School

1 was closed for want of sufficient remuneration to the teacher.

4 Hence the decrease of 4 Schools under "aided"

There are as many as 11 unaided schools in the municipality most of them being the new schools opened by the ~~Brahmin~~ Bruigu community during the year.

The red ink figures are inserted in the Municipal Office.

Chairman,
[illegible]

Note.—1. *Where an institution is aided from Provincial or Local (or Municipal) Funds, it should be shown against Provincial or Local (or Municipal) according as it has received a larger grant from Provincial or Local (or Municipal) Funds.*
2. *No comments should be made except as notes entered in the column of remarks.*
3. *This statement should be submitted in time to reach the Presidents of Local Boards or the Chairmen of Municipals concerned before the 1st May.*

JULY 1895, No. , M. LOCAL AND MUNICIPAL.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From J. W. MAIDEN, Esq., Chairman, Municipal Council, Masulipatam, to the Chief Secretary to Government (through the Collector of Kistna), dated 12th June 1895, No. 210.

I have the honour to submit herewith my report and statements of the working of this municipality for the year 1894–95 together with the council's resolution, No. 2, dated 31st May 1895, approving of the same.

I.—CONSTITUTION OF THE COUNCIL.

2. The number of councillors sanctioned for this municipality is twenty including the *ex-officio* councillor. Six of these are officials and fourteen non-officials. The increase in the number of the officials is due to the public prosecutor having been included under the officials by the Collector of Kistna, as the former receives an allowance from Government as a public prosecutor. On the 31st March 1895 the number of councillors on the list was eighteen. The vacancy caused by the death of M.R.Ry. M. Venkaji Rao Pantulu Garu was not filled up, as the Collector wanted some information regarding my nominee. The other vacancy caused by Saiyid Alli Sahib Bahadur who has gone on furlough was subsequently filled up by the appointment of his successor M.R.Ry. Narayanaswami Aiyar Avargal, Deputy Collector in charge of the Treasury, Kistna. Twenty-seven meetings were convened during the year, of which 24 were actually held against 30 of last year. The average attendance of the official and non-official members was 1·17 and 8·13 against 1·27 and 8·87 respectively of the previous year. The attendance of both the officials and non-officials is on the whole poor.

II.—RECEIPTS.

3. The year opened with a balance of Rs. 2,751–15–2 (+ Rs. 27 cash in hand) against Rs. 4,226–2–6 of the last year. The receipts under the various heads of account amounted to Rs. 50,124–12–9 against Rs. 45,038–3–11, the actuals of 1893–94, the revised estimate for the year under report being Rs. 58,870. In the subjoined statement the differences under the various heads of account are shown :—

Particulars.	Actuals of 1893–94.	Actuals of 1894–95.	Revised estimate of 1894–95.	Variations between columns 3 and 4.
Rates and Taxes.				
(*a*) Tax on arts	Rs. A. P. 8,185 8 0	Rs. A. P. 9,190 8 0	Rs. A. P. 9,900 0 0	Rs. A. P. — 709 8 0
(*b*) ,, on buildings	9,227 8 1	11,021 0 7	13,000 0 0	— 1,978 15 5
(*c*) ,, on lands	672 8 9	965 0 2	2,400 0 0	— 1,434 15 10
(*d*) Water-tax	1,757 1 10	2,377 10 2	3,240 0 0	— 862 5 10
(*e*) Tax on vehicles	679 8 0	724 8 0	720 0 0	+ 4 8 0
(*f*) ,, on animals	878 4 0	967 8 0	920 0 0	+ 47 8 0
(*g*) ,, on carts	924 0 0	1,160 0 0	1,000 0 0	+ 160 0 0
(*h*) Tolls	10,136 9 2	8,884 9 1	10,420 0 0	— 1,535 6 11
(*i*) Penalties on account of (I) tax on arts	..	1 8 0	..	+ 1 8 0
Total ..	32,460 15 10	35,292 4 0	41,600 0 0	— 6,307 12 0
Revenue derived from municipal property apart from taxation	7,161 7 0	9,423 7 2	9,560 0 0	— 136 8 10
Grants and contributions	4,809 14 4	4,474 14 2	6,850 0 0	— 2,455 1 10
Miscellaneous	605 14 9	934 3 5	860 0 0	+ 154 3 5
Total ..	45,038 3 11	50,124 12 9	58,870 0 0	— 8,745 3 3

4. The taxation per head of population was Rs. 1-4-8 against Rs. 1-2-7 of the previous year. The reason for the increase is that more money was collected during the year under report.

A.—Municipal Rates and Taxes.

5. *Tax on Arts, &c.* (*Section* 103).—The receipts under this head amounted to Rs. 9,190-8-0 against the revised estimate of Rs. 9,900 and the actuals of Rupees 8,185-8-0 for 1893-94. To recover the arrears of 1891-92, 1892-93 and 1893-94, I instructed two tax-collectors to prosecute the defaulters. Ninety-five cases were instituted to recover an amount of Rs. 304-8-0, the amount collected being Rs. 139. The fines imposed in these cases came up to Rs. 18-6-0. In 61 cases, the amount claimed was recovered. In 6 of these cases the amount of tax fixed by me was reduced and 22 cases have been dismissed altogether. In 12 cases the amount claimed was not recovered, though the Bench Magistrates punished the defaulters. Rs. 1-8-0 was imposed on a party as a penalty for tax on arts.

6. *Tax on Buildings* (*Section* 63).—The amount collected during the year was Rs. 11,021-0-7 against Rs. 13,000, the revised estimate of the year and Rupees 9,227-8-1, the actuals of the previous year. House-tax registers were revised during the year under report and the demand was raised from Rs. 10,128 to Rs. 12,563-4-5, though the tax-payers bitterly complained of this measure and threw all sorts of obstacles in the way of the council by putting in numerous appeals. Remissions to the amount of Rs. 150-3-2 were granted this year on account of vacant buildings.

7. *Tax on Lands* (*Section* 63).—The tax collected under this head amounted to Rs. 965-0-2 against the revised estimate of Rs. 2,400 and the actuals of Rs. 672-8-9 of the previous year. The land-tax registers were revised during 1891-92.

8. *Water-tax on Lands and Buildings.*—The revised estimate of the year was Rs. 3,240 and the amount collected was Rs. 2,377-10-2 against the actuals of Rs. 1,757-1-10 of the last official year. This tax is collected along with house and land-tax at 1½ per cent. on the rental value of lands and buildings. As the water-supply of the town is imperfect, and as several suburbs of the town are not supplied with Kistna water, the tax is not much liked by the people and is paid under protest.

9. *Tax on Vehicles with Springs and Palanquins* (*Section* 77).—The amount collected during the year under report came up to Rs. 724-8-0 against the revised estimate of Rs. 720 and the actuals of Rs. 679-8-0 of the previous year.

10. *Tax on Animals* (*Section* 77).—The amount collected under this head was Rs. 967-8-0 against the revised estimate of Rs. 920 and Rs. 878-4-0, the actuals of the previous year.

11. *Tax on Carts and other Vehicles without Springs* (*Section* 85).—The amount anticipated in the revised estimate was Rs. 1,000 and the amount actually collected was Rs. 1,160 against the actuals of Rs. 924 for the last official year. The increase is due to more carts having been licensed during the year.

12. *Tolls* (*Section* 91).—The amount of the bid for the year was Rs. 16,905. The contractor began to collect tolls illegally on vehicles and animals going out of the municipal limits. He was warned several times not to collect money on out-going animals and vehicles. This made no impression upon the contractor. The Council then ordered tables of tolls to be put up at the expense of the contractor in English and vernacular drawing the attention of the public to the illegal collection, and ordered the people not to pay up tolls on out-going vehicles and animals. This annoyed the contractor and he declined to pay the kists. He claimed a refund of Rs. 4,000 for the loss he incurred in tolls which he was not allowed to collect on out-going vehicles and animals. The council had to attach the farm for arrears of kists due, and to sell it at the contractor's risk and loss forfeiting the deposit given by him. The amount actually collected during the year came up to Rs. 13,288-9-0. One-third of this amount was paid to the district board as contribution due to them, and the amount actually credited to the municipal accounts was only Rs. 8,884-9-1 (after deducting the cost of repairing the toll shed against the revised estimate of Rs. 10,420 and Rs. 10,136-9-2, the actuals of the previous year. The Government Promissory

notes deposited by the contractor were subsequently sold by the council by public auction and the sale-proceeds of Rs. 3,349-11-7 were credited to the municipal funds this year. For the balance still due the council tried to distrain the property of the contractor, but it was not feasible, as the whole of his property was transferred to some one else. The contractor died subsequently. The council propose to file a suit against the heirs of the contractor and recover the balance due, if practicable, within the current official year.

13. *Revenue derived from Municipal Property and powers apart from Taxation*—(*a*) (i) *Rent of Lands.*—The amount of the bid for Challa bazaar for the year was Rs. 170, the revised estimate for the year being Rs. 180. The amount actually collected came up to Rs. 170-2-7 against the actuals of Rs. 240-3-6 in the previous year.

14. (ii) *Rent of Buildings.*—The amount anticipated in the revised estimate for the Police hospital rent was Rs. 180 and the amount actually collected came up to Rs. 150, the actuals of the last official year being Rs. 165. This short collection was due to the rent of the last three months not having been paid by the District Medical and Sanitary officer, Kistna, in time.

15. (iii) *Avenue Receipts.*—The amount actually collected under this head came up to Rs. 26-1-9 against Rs. 20 anticipated in the revised estimate and the actuals of Rs. 31-13-0 for 1893-94.

16 (iv) *Fees from Travellers' Bungalows.*—The collections under this head amounted to Rs. 38-8-0 against the revised estimate of Rs. 50 and Rs. 28-8-0, the actuals for the previous year. The traveilers' bungalow at the Fort is not very often availed of by the European travellers as it is far away from the European quarters of the town.

17. (*b*) (ii) *Produce of Lands and Gardens.*—The amount realized under this head for the sale of grass in the Batchupeta tank was Rs. 4-8-0 against the revised estimate of Rs. 30 and As. 12, the actuals of 1893-94.

18. (*b*) (iii) *Sale-proceeds of Old Materials, empty Oil-cans, Packing Cases, &c.*—The amount collected under this head came up to Rs. 115-4-5 against Rs. 100 anticipated in the revised estimate while the actuals of the previous year were only Rupees 94-2-6.

19. (*c*) *Conservancy Receipts, Sale-proceeds of Night-soil, Street Refuse, &c.*—At the time of the sale of farms for the year under report, a contractor offered Rs. 30 for burnt street sweepings, but this offer was not accepted by the council, as they intended to burn the rubbish in the "Silchar" cinerator, as recommended by the Sanitary Commissioner for Madras, and use the clinker formed for road material; hence there were no receipts under this item during the year under report. Night-soil is being trenched in the Weld's reserve as an experiment in the hopes that a demand may be created when the inhabitants perceive a practical proof of the advantage of the night-soil as a manure.

20. (*d*) (i) *Fees from Educational Institutions.*—The amount anticipated in the revised estimate was Rs. 10 and the amount actually collected was Rs. 3-8-6, while the actuals for 1893-94 were Rs. 55-6-0. As all the salary result schools maintained by the council are for backward classes, such as Panchamas, fishermen and labourers, the council, on the recommendation of the Educational authorities, exempted the children of backward classes from payment of school-fees.

21. (*e*) (i) *Sale-proceeds and Composition Fees of Medicines.*—The amount anticipated in the revised estimate was Rs. 100 and the amount actually collected came up to Rs. 75-13-0 against the actuals of Rs. 99-12-4 for the last official year. The amount of sale-proceeds of medicines is now brought to account very carefully, as the District Medical and Sanitary officer is exercising a thorough supervision over the accounts maintained in the hospitals.

22. (*f*) (i) *Income from Markets.*—The vegetable market was leased out by the council for Rs. 4,425 and the fish market for Rs. 1,500 for the year under report. The amount anticipated in the revised estimate was Rs. 5,930, and the amount

actually collected was Rs. 6,026–11–0 against the actuals of Rs. 3,353–2–4 for the year 1893–94. The increase is due to the interest collected for late payment of kists and to the collection of arrears of last year.

23. (*f*) (ii) *Income from Slaughter-houses.*—The amount anticipated in the revised estimate (Rs. 430) was collected on this account against the actuals of Rs. 266–4–6 for the previous year. The increase is due to the rise of the bid during the year.

24. (*g*) *Other Fees*—(i) *Distraint Fees.*—Rs. 1–6–0 was collected against Rs. 20 of the revised estimate and Rs. 1–10–0, the actuals of the last official year. Property was distrained only in seven cases. It is not possible to distrain the property of the defaulters in all the cases for which warrants are issued. Sometimes the tax-payers shut up their doors against the distraining officer and refuse to accept the receipts presented for the property distrained. In every case of distraint the assistance of the Police becomes absolutely necessary.

25. (ii) *License Fees.*—In the revised estimate Rs. 1,200 were anticipated, and the amount actually collected came up to Rs. 1,103 against Rs. 980, the actuals for the last official year.

26. (*g*) (iii) *Cart-stand Fees.*—The cart-stands in the town were leased out to the toll-contractor alluded to in paragraph 12 *supra* for the year under report for Rs. 1,005. As the contractor was irregular in payment of kists, the farm was resold at his risk and loss, and the amount of his deposit was forfeited. The amount collected came up to Rs. 845–10–11 against Rs. 1,000 anticipated in the revised estimate and the actuals of Rs. 825–11–1 for 1893–94. The balance will be collected from the heirs of the contractor, if practicable.

27. (*g*) (iv) *Other Fees—For extracts from the Birth Register.*—Two applications for extracts having been received, one rupee was collected against Rs. 10 anticipated in the revised estimate and Rs. 3, the actuals of 1893–94.

28. (*h*) *Fines under Municipal and other Acts.*—The amount originally budgeted under this head was Rs. 800. This amount was reduced to Rs. 300 in the revised estimate, as the receipts during the first eight months of the year were not sufficiently large. The amount actually collected came up to Rs. 431–13–0 against Rs. 990–14–0 of the previous year. The decrease is due to the less number of prosecutions instituted by the Police and to the nominal fines imposed by the Bench Magistrates.

29. (5) *Grants and Contributions*—(*a*) *From Government.*—(i) *Education—Municipal Schools.*—Rs. 5 were realized as provincial grant for girls in Panchama schools against Rs. 12–13–5 of the previous year. In the revised estimate this sum was not anticipated as the council thought that the Panchama girls in question were not eligible for grants. Contribution due for the gymnastic instructor is still due from Government which will be drawn this year.

30. (*b*) *From Local Boards*—(ii) *Medical.*—In the revised estimate Rs. 4,500 were anticipated to be collected from the district board, being half the expenditure incurred by the council for the maintenance of the two hospitals. The amount actually received within the official year came up to Rs. 2,659–14–2 against Rs. 3,778–0–5, the actuals of the last official year. Bills for the balance due were sent up during the year, but they were not passed for payment in time to be included in the accounts of the year.

31. (iii) *Other Purposes.*—Rs. 1,800 budgeted for the maintenance of the main and cantonment roads was received against Rs. 1,019–0–6, the actuals of the last official year.

32. (*c*) *Other Grants and Contributions*—(ii) *Medical.*—The amount due from the heirs of the late Honorary Surgeon U. Venkataswami Nayudu was not collected, as the whole of his property was attached by the Civil Courts.

33. 6. *Miscellaneous*—(*a*) *Recoveries on account of services rendered to Private Individuals*—(i) *Private Scavengering.*—The amount collected under this head came up to Rs. 491–2–6 against the revised estimate of Rs. 570 and the actuals of Rupees 478–15–6 of the previous year. The arrears outstanding are now collected.

34. (*a*) (ii) *Other Purposes.*—Under this head Rs. 95 were collected against an estimate of Rs. 100 on account of cess-pools. The amount collected last year under this head was Rs. 62–14–0. The increase is due to more cess-pools brought under municipal management. Rupees 75–8–0 was received from a party for the construction of a conduit in Ramanayudupeta.

35. (*b*) *Other Items*—(i) *Fishery Rents.*—Rs. 45–6–0 were realized during the year against Rs. 50 provided in the revised estimate, while the actuals of the previous year were Rs. 24–5–3. The collections are chiefly for lotus leaves in the Fort ditch.

36. (iii) *Fee for numbering Carts.*—The amount anticipated to be realized under this item was Rs. 60, the amount actually collected being Rs. 36–4–0 against the actuals of Rs. 39–4–0 of the previous year.

37. (7) *Extraordinary and Debt*—(*d*) *Advances*—(i) *Permanent.*—Under this head Rs. 50 given to the overseer for carrying out public works were adjusted.

38. (ii) *Others.*—The advances given to the Municipal subordinates for filing prosecution lists before the Bench Magistracy were adjusted, and the amount advanced to the scavengering contractor for bringing in more men was also recovered and adjusted during the year.

III.—Expenditure.

39. The expenditure incurred under the various grants is shown in the following statement compared with the revised estimate of the year under report and the actuals of the previous year:—

Details of expenditure.	Actuals of 1893–94.	Actuals of 1894–95.	Revised estimate of 1894–95.	Variations.
1	2	3	4	5
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Grant I—				
Public Works, &c.	15,796 11 3	17,032 12 8	17,720 0 0	— 687 3 4
Grant II—				
Education	4,624 9 1	5,004 2 8	5,900 0 0	— 895 13 4
Grant III—				
Sanitation and Medical	17,303 0 8	18,609 7 10	18,850 0 0	— 240 8 2
Grant IV—				
Lighting, &c.	3,706 1 8	4,571 8 1	4,850 0 0	— 278 7 11
Grant V—				
General Supervision Establishment	4,925 7 2	4,972 4 8	4,550 0 0	+ 422 4 8
Advances Recoverable	160 15 8	52 0 0	..	+ 52 0 0
Refunds of other than current collections ..	..	17 0 0	30 0 0	— 13 0 0
Balance—				
(*a*) Municipal Fund	2,747 8 11	2,644 8 0	9,720 0 0	— 7,075 8 0
Total ..	49,264 6 5	52,903 11 11	61,620 0 0	— 8,716 4 1

40. *Grant I, Public Works.*—The total expenditure under this grant amounted to Rs. 17,032–12–8 against Rs. 17,720, the revised estimate of the year. There were certain works carried out beyond the sanctioned allotment, in anticipation of the council's sanction, which was obtained in May 1895—*vide* Resolution No. 10 of 11th May 1895. There were also certain bills left unpaid at the end of the year, owing to their estimates not having been sanctioned in time. Thus it is clear that works under this grant were carried out to the limit of the revised estimate.

41. Under new works—communications Rs. 42–3–3 were paid on account of arrears on boat stand road, completed during the previous year, against Rs. 110, the balance of the work estimate provided for in the revised estimate.

42. Under new works—buildings Rs. 834–12–3 were expended against Rs. 1,850, the revised estimate. The expenditure incurred was on dust-bins, Silchar cinerator and stalls at Robertsonpet, as shown in statement II-A.

43. *Part I, New Works.*—The decrease in expenditure is due to latrines not having been built for want of sanctioned estimates.

44. Under water-supply works a conduit, at Ramanayudupet for which a contribution of Rs. 75–8–0 was received, was constructed at a cost of Rs. 70–6–5 against an estimate for Rs. 185. The work will be resumed this year.

45. Under repairs—communications the works enumerated in part II and repairs as per statement II-A were carried out to the extent of Rs. 7,858–13–6 against Rs. 7,316, the sanctioned allotment of the year. The excess was met from savings on other individual works and the provision for drainage and water-supply.

46. Under buildings—repairs, toll sheds, latrines, markets and slaughter-houses were repaired, and the dispensary building was whitewashed, &c., for Rs. 373–12–4 against an estimate of Rs. 139 sanctioned for this work. The excess expenditure was likewise met from the savings.

47. Under drainage works Rs. 879–9–6 were expended against Rs. 1,000, the provision in the revised estimate. The savings were utilized where necessary.

48. Under water-supply works—repairs, Chakirevupalem conduit and some others were put into order. The ditch at the Fort was also attended to. The total expenditure came to Rs. 1,259–6–2 against Rs. 1,230 of the revised estimate, the excess having been sanctioned from the unutilized provisions under this grant.

49. Under water-supply establishment a lascar on Rs. 6 was employed throughout the year, and also two watchers at Batchupet tank and Fort ditch were engaged. The total cost is Rs. 88 against Rs. 90 of the revised estimate.

50. Under (3) Establishment Rs. 887 were shown against Rs. 960, the revised estimate. The less expenditure was owing to the cost of the overseer's establishment having been proportionately debited to grants III and IV for the clearance of noxious vegetation and the preservation of avenues.

51. Against a provision of 150, Rs. 133–12–1 were utilized for the repairs of tools and plant and the purchase of 59 iron pots, rammers, &c.

52. Under contributions Rs. 2,820 were paid to the Local Fund board for the Fort road repairs, and Rs. 1,364 against Rs. 1,370 were paid to the Public Works Department for water-supply.

53. *Grant II, Education*—(i) *Training Schools — (a) Contributions to Local Boards.*—Rs. 200 were paid to the Local Fund board as contribution for the carpentry class attached to the Masulipatam Normal school.

54. (2) *Municipal Schools*—(ii) *Salary-result System*—(*a*) *Fixed Payments.*—Rs. 725 were paid to the teachers of the Municipal schools against Rs. 750 provided for in the revised estimate. The difference is due to the Gilakaladindi fishermen school not having been started till after the 30th of April 1894, and to the teacher having been paid only for ten months instead of twelve months as per budget, and to the old rate of pay having been paid to the teacher of the Muhammadan school for March 1894.

55. (*b*) *Result Stipends.*—Rs. 320–0–2 were paid against Rs. 220, the revised estimate. The increase is due to the fact that the teaching staff exerted themselves more creditably during the year under report, and to the Muhammadan school teachers having been paid arrears of the previous year.

56. (*c*) *Contingencies.*—Under contingencies Rs. 201–7–0 were disbursed against the reduced provision of Rs. 180 in the revised estimate.

57. (3) *Salary Grants.*—Rs. 868–5–4 were disbursed to the managers of the Hindu High school and the Noble College against Rs. 750 of the revised estimate. The increase is due to some arrears grant having been paid during the year.

58. (4) *Result Stipends.*—The provision in the revised estimate was Rs. 3,000, of which Rs. 2,213–5–10 were paid to the managers of two Lower Secondary, ten Upper Primary and twelve Lower Primary schools according to the certifying memoranda received from the Inspecting officers, and no bill was outstanding in the Municipal office at the end of the year.

59. (5) *Inspection*—(*a*) *Contributions to Local Boards.*—Rs. 60 were paid to the board for the Muhammadan Inspecting schoolmaster at Rs. 5 per mensem.

60. (6) *Municipal Inspections*—(i) *Establishment.*—Rs. 248–14–8 were disbursed to the Inspecting schoolmaster who had gone on leave on medical certificate for three

months against Rs. 250 provided in the revised estimate. The saving was owing to no substitute having been appointed for him for some time during this period.

61. (ii) *Contingencies.*—Rs. 8–8–0 were expended against Rs. 20, the estimate. The less charge was due to the above cause.

62. *Miscellaneous*—(*a*) *Building, Furniture, &c., Grants.*—No Manager of any result school applied for any building or furniture grant during the year, and hence the provision has lapsed.

63. (*b*) *Common Gymnasium*—(i) *Establishment.*—For some days the gymnastic instructor went on leave without pay, and so Rs. 145–2–6 only were disbursed to him against Rs. 150 of the revised estimate.

64. Under contingencies Rs. 13–7–2 were expended against Rs. 20, the revised estimate.

65. Thus the total expenditure under this grant came to Rs. 5,004–2–8 against Rs. 5,900, the provision. This is about 12 per cent. of the total receipts under rates and taxes and markets, &c. During the year under report the Gilakaladindi fishermen school was started, and four of the old result schools were closed; two result schools were however newly opened—one at Malakapoor for Muhammadans and the other at Sukurlabad for Hindus. Of the four schools closed during the year, one was amalgamated with the Noble Hindu Branch at Inuguduru, and the teachers of the other three schools left them to better themselves elsewhere according to convenience. The number of unpassed teachers in the aided schools was reduced during the year to ten, and it is hoped that this number would be replaced by more efficient men this year. There are also many unpassed men in other schools, and as the Inspecting schoolmaster has lately opened a sessional school to train such men, the efficiency will gradually be secured.

66. The examination results of the year were very fair as remarked by the Assistant Inspector of Schools.

67. The population of school-going age according to the statement of the Assistant Inspector of Schools was 2,788 and 3,031 of boys and girls, while those that received instruction were 2,703 and 112 respectively (exclusive of girls' schools). This was at 96·9 and 3·6 per cent. The attendance of the boys in the six Municipal schools was not fair on the whole, and is even very unsatisfactory in the Muhammadan and the night schools. The average cost of educating pupils in these schools was Rs. 7–7–4. The cost of educating Muhammadan boys was Rs. 9–14–10 against Rs. 9–4–0. This was however due to arrears of the previous year having been paid during the year under report. At the two Panchama schools instruction was imparted at Rs. 5–15–2 against Rs. 6–11–1 of the previous year. This is satisfactory. The night schools at Nizampet and Chintaguntapalem cost Rs. 5–6–7 against Rs. 5–9–5 of the previous year. The fisherman school at Gilakaladindi has cost Rs. 7–1–4. This is rather high, but all the pupils presented for examination came out successful, which is very satisfactory.

68. There are also some unaided schools in this municipality which have been recently started by the Vaisyas prompted by religious factions. These and others will be brought under the aided list, if the educational rules on the subject are complied with.

69. *Grant III—(i) Hospitals and Dispensaries*—(*a*) *Establishment.*—Rupees 1,984–14–0 were disbursed against Rs. 2,000, the revised estimate.

70. (*b*) *Medicines and Supplies.*—Rs. 2,763–3–3 were expended against Rs. 2,900, the increased provision in the revised estimate. There were some dues yet to be paid to the contractor, but as bills were not received, payments were not made.

71. (*c*) *Diet of Patients.*—Rs. 1,103–14–0 were expended against Rs. 1,100, the reduced provision in the revised estimate.

72. (*d*) *Sundries and Contingencies.*—Rs. 1,628–1–2 were expended against the increased provision of Rs. 1,500 for the year. This was unavoidable as chatrangies (carpets) cumblies and brass vessels, iron cots, &c., were supplied to the two hospitals on account of in-patients. The work in the two hospitals has increased

compared with that of the previous year. 285 in-patients and 25,297 out-patients were treated during the year against 238 and 16,251 of the previous year. The average number of patients treated daily was 19·29 and 138·28 against 14·32 and 105·5 of the previous year, respectively. The total was 157·57 against 119·82 of the previous year. Information as to the number of successful and unsuccessful cases is not available; but the operations performed during the year seem to have been on the whole good, as the mortality was but 3 per cent. The work done in the hospitals is very creditable and is due to the efforts of the present District Medical and Sanitary officer, Surgeon-Major W. F. Thomas, and his assistants. The number of labour cases attended by the Eurasian and Native midwives rose from 126 to 179. As for other particulars, the reports received from the District Surgeon are enclosed. The services rendered by Miss Jane Claridge, the lady Apothecary in charge of the Women and Children's hospital, are very much appreciated in the town. Ten beds are now available for in-patients in the women and children's hospital against none in the previous year. A temporary shed had to be erected for treatment of venereal diseases. Both the Native and European families as well as Muhammadan Ghosha women are freely resorting to the women and children's hospital. A long-felt want in this town has been supplied by the opening of this hospital, and the council is very proud of it.

73. (2) (*a*) *Contributions to Provincial Funds for* (i) *Medical College*, (ii) *Sanitary Inspection*, (iii) *Medical Reserve*.—The staff was paid according to bills received from the Accountant-General, but no bill having been received for (IV) Cutlers' Establishment, nothing was paid during the year.

74. (*b*) For the clerk attached to the Civil dispensary Rs. 30 were paid as contribution to the local board.

75. (3) *Vaccination*—(*a*) *Establishment*.—Rs. 338 were paid to the vaccinators against Rs. 340, the revised estimate of the year.

76. (*b*) *Contingencies*.—Under contingencies Rs. 401–15–11 were disbursed against Rs. 400, the revised estimate. The number of vaccine operations performed during the year was 2,920—112 by medical subordinates and 2,808 by municipal vaccinators. Of these, 2,792 were successful and 119 unsuccessful, and 9 unknown. Of the year's total, 1,044 were on children below one year of age and the rest on those above that age. The cost of a single operation performed during the year by Municipal vaccinators was As. 4–3 against As. 4–9 of the previous year; 2,196 notices were issued to parents or guardians to have their children vaccinated, and in 75 cases summons of prosecutions were served on them. These cases were pending at the end of the year and the results are yet to be communicated. The vaccine operations are personally supervised by the District Medical and Sanitary officer, Kistna, and his assistants. All the children to be vaccinated are invariably brought to the depôt in the hospital compound and are operated on with fresh animal lymph obtained from the calf.

77. (4) *Registration of Births and Deaths*—(*a*) *Establishment*.—Rs. 256–3–1 were disbursed to the two registrars against Rs. 260, the provision in the revised estimate. The less expenditure was owing to the Head registrar having been on leave without pay for some time.

78. (*b*) *Contingencies*.—Under this head Rs. 35–11–4 were expended against Rs. 20 in the revised estimate. The excess expenditure was necessary, because five notice boards regarding births and deaths were hung up in some conspicuous parts of the town. The number of births during the year was 1,014, while those of deaths amounted to 1,002. This was at 26·13 and 25·82 per mille of the population respectively. 39 prosecutions in the case of births and 42 prosecutions in the case of deaths were instituted, &c., during the year. Of the prosecutions instituted regarding births, as many as 22 were successful, while of those of deaths 19 cases proved successful. The fines imposed in all these cases fetched Rs. 22.

79. (5) *Conservancy, road-cleaning and Road-watering*—(*a*) (i)—*Establishment*.—Rs. 4,467–10–5 were disbursed against Rs. 4,490 of the year's provision. The less expenditure was owing to absences, fines, &c.

80. (ii) *Other charges, &c.*—Rs. 3,372–12–6 were expended against Rs. 3,330, the year's provision. The excess expenditure was unavoidable and unforseen. The charges were chiefly on account of hired carts, brooms and broomsticks.

81. (*b*) (i) *Private Scavenging*.—Rs. 751–15–3 were paid against Rs. 810, the year's revised estimate. The decrease is due to the smallness of fines inflicted. The number of private latrines that were on the list at the beginning of the year was 303. Twenty-eight new private latrines were brought under municipal agency during the year, the total being 331. The amount realized as fees was Rs. 491–2–6. Private scavengering is very unpopular, and my efforts to make it self-supporting were not successful.

82. (ii) *Contingencies, such as cost of scavenging carts, &c.*—Rs. 640–9–11 were spent against Rs. 590, the revised estimate. The charges were chiefly hire of carts, brooms, &c.

83. *Cholera charges*.—Rs. 20 were disbursed under arrears against Rs. 200, the revised estimate.

84. (*d*) *Contingencies*.—Nothing was spent against the provision of Rs. 20 for contingencies.

85. *Removal of prickly-pear and noxious vegetation, &c.*—Rs. 416–9–0 were expended against Rs. 450, the year's revised estimate. In this expenditure was included the proportionate cost of the overseer's establishment supervision.

86. The total expenditure under Grant III was Rs. 18,609–7–10 against Rupees 18,850, the year's provision in the revised estimate.

87. *Grant IV, Lighting*—(*a*) *Establishment*.—The lighting of the town was done by departmental agency. For this purpose ten lamp lighters were employed at Rs. 5 each. Exclusive of fines, the expenditure incurred was Rs. 585–12–0 against Rupees 600, the revised estimate of the year. The town was as usual lighted from the fifth day after the full moon to the fourth day after the new moon.

88. Under contingencies Rs. 2,221–1–11 were expended against Rs. 2,250 provided in the revised estimate. Thirty-two new iron lamp-posts were purchased for Rs. 512–8–0, and the rest was spent for kerosine oil, wicks, repairs to lanterns and for providing ladders and lanterns to the masonry pillar in the Robertsonpet square.

89. *Markets*.—Rs. 177 were paid to the inspector and the toti who constituted the market establishment, the estimate being Rs. 180.

90. Under contingencies Rs. 5–9–0 were expended for notice boards against Rs. 10 put down in the revised estimate. During the year under report twelve persons were prosecuted for not observing the market bye-laws, and the fines imposed on them amounted to Rs. 70–8–0. There were also twelve other cases pending at the end of the year.

91. *Slaughter-houses*.—Rs. 120 were paid to the Superintendent and the toti under him, and nothing was expended under contingencies.

92. (4) *Travellers' Bungalow*.—Establishment consisted of but one watcher on Rs. 6 a month. The total was Rs. 72.

93. Under contingencies Rs. 37–7–0 were expended against Rs. 50 of the revised estimate for repairing windows and supplying tin-pots, &c.

94. (5) *Avenues*—(*a*) *Establishment*.—Under this head Rs. 41 were shown as the proportionate cost of the overseer's establishment for supervising avenue work.

95. The expenditure under contingencies was Rs. 556–3–1 for planting new cocoanut and mango trees and watering, fencing and weeding young plants.

96. A provision of Rs. 50 was made for the repairs of the fire-engine which was sent up to the Bezwada workshops, but no bill having been received for the charges, no payment was made.

97. Rs. 152–5–0 were expended for the destruction of wild animals and snakes, &c., against a reduced provision of Rs. 180 for the year. The animals killed were 96 cobras, 34 other snakes, 200 pigs, 147 dogs, 349 bitches and 3 mad jackals.

98. Under printing Rs. 125–12–7 only were paid for against Rs. 300 for printing quarterly proceedings and annual returns, &c.

99. The provision for V—Other items, was Rs. 500 and the expenditure shown against this was—

	Rs.	A.	P.
For time gun	312	15	9
For Telephone contribution	63	5	8
For Law charges	85	11	0
For proclamation by beat of tom-tom	14	9	4
Land-cess, &c.	0	11	9
Total ..	477	5	6

100. *Grant V—(a) General Establishment.*—Rs. 2,317–11–2 were spent against Rs. 2,340, the provision for the year. The less expenditure was owing to leaves granted on loss of pay.

101. (ii) *Inspection.*—Rs. 358–1–0 were paid to the chairman for carriage allowance against Rs. 360. There was delay in obtaining fresh sanction to the chairman's appointment, and hence the saving.

102. *(b) Collection of Municipal taxes.*—Rs. 1,027–13–6 were paid to tax collectors against Rs. 1,050, the revised estimate. The less expenditure was owing to a bill collector having been dismissed and no substitute appointed for him for some time.

103. *Office Contingencies.*—The expenditure under this head came to Rupees 1,028–11–0 against Rs. 560, the revised estimate of the year. The excess expenditure was unavoidable, as bills for forms supplied by the Accountant-General and local presses were received at the end of the year and paid for, and as stationery was supplied from this source to the overseer's establishment, &c.

104. *(c)* Rs. 240 as provided were paid as contribution for Central office and audit establishment. Thus the total under Grant V came to Rs. 4,972–4–8 against Rs. 4,550, the year's provision.

105. *Advances recoverable*—(6) *Others.*—Under this head Rs. 52 were advanced to scavengers and were recovered during the year.

106. Under refunds of other than current collections Rs. 17 were paid during the year against Rs. 30, the provision in the revised estimate.

107. The total expenditure under all heads came to Rs. 50,259–3–11 against Rs. 51,900, and including the balance of Rs. 2,644–8–0, the grand total came to Rs. 52,903–11–11 against Rs. 61,620, the year's revised estimate.

ENCLOSURES.

ANNUAL concise report on the working of the Municipal Hospitals, Masulipatam, Kistna district, for the official year 1894–95.

I have the honour to submit the concise report on the working of the Municipal Hospitals, Masulipatam, Kistna district, for the official year ending 31st March 1895.

(I) *Public Health.*—The general health-condition of the town of Masulipatam has been good. The town is within the endemic area of beri-beri and malarial fevers. The town is perennially haunted by fevers, bowl complaints, cholera and small-pox. Season has also a marked influence on diseases; the cold weather (November to February) being the most fatal to natives and the dry hot months (March to June) the healthiest. During the year under review there was very little of cholera. There were no deaths from cholera as against 62 of last year. As regards small-pox there were in all nine deaths, and out of this number three were infants. Last year there were two deaths from small-pox. Ophthalmia and simple conjunctivitis were present in an epidemic form during the hot months. Other diseases prevalent were fevers, dysentery, diseases of the ear, diseases of the skin and ulcers.

(II) *Vital Statistics.*—The subjoined table shows the vital statistics for 1894–95 as compared with 1893–94:—

	1893–94.	1894–95.
Number of births	1,108	1,014
Birth rate per mille of population	28·55	26·12
Number of deaths	1,150	1,001
Death rate per mille of population	29·63	25·79

Under the head of infant-mortality there were 340 deaths against 387. Of nine deaths from small-pox, three were among infants. Vital statistics are carefully kept and so reliability can be placed on them.

(III) *Sanitation.*—Masulipatam town is situated $3\frac{1}{4}$ miles from the sea on a low-lying plain, and is surrounded by open country. The plain between the town and sea-coast becomes a swamp during the rains. The every day Indian experiences of fouling of water, of carelessness in spreading of infectious diseases, and committal of nuisances, all afford breeding ground of cholera, other epidemics, fevers and diarrhoea. The town including the Fort is divided into seven wards, and these wards are under inspectors who are responsible for conservancy; and also under the supervision of the ward councillors. There are 34 conservancy carts with 84 sweepers. The staff of sweepers is fairly sufficient. Street sweepings are first deposited outside the town and then burned in (6) six cinerators. Conservancy staff is under the management of the chairman, municipal council. There are thirteen public latrines—six for men and seven for women, scattered about the different parts of the town. Drinking-water is obtained from the river Kistna by means of the Bezwada canal by an open channel, conducted to the limits of the municipality and thence by a covered conduit to the centre of the town into a big masonry reservoir, and from this water is distributed by conduits to all parts of the town. There are about 113 good drinking-water wells and two tanks set apart for drinking purposes. The municipal conservancy inspectors see that the sources of drinking-water are not polluted. There are no masonry drains, but there are side-cuttings along roads, streets and lanes, and in consequence of this drainage is very defective.

The general and fundamental sanitary defects are:—

(1) The unsatisfactory character of the water-supply;
(2) the absence of an effective system for the disposal of sewage.

Houses are also defective as regards drainage, and in consequence house waste water and foul water find their way into public streets and lanes and thus contaminate the sub-soil. There are a number of cess-pools, and these ought to be cleansed as often as possible. When epidemics occurred the District Medical and Sanitary Officer and his medical staff visited the effected places to render all assistance in their power, and to advise the people to observe simple rules of sanitation and to render medical aid. During my sanitary inspections of the town, I personally verified 779 cases of vaccination performed during the year, of these cases 90 per cent. were successful.

The following recommendations were made:—

That all drinking-water wells and tanks should be provided with watchmen to prevent the supply being defiled and all such wells to have masonry platforms and drains; removal of prickly-pear as much as possible; substitution of moveable (made of corrugated zinc sheets) for fixed masonry dust-bins; cattle to be housed away from dwelling houses. The surface of ground surrounding houses, huts, &c., should be frequently swept and so kept clean and free from nuisances; all holes or gaps in the ground where water is likely to collect in the rains and in consequence of which herbage quickly springs up ought to be filled up with earth; should there be much jungle or other vegetation around houses, huts, &c., it should be cleaned away; night-soil to be sold by auction. When there is no demand for sweepings and night-soil on the part of ryots, a garden outside the town might be found in which such could be utilized. A good deal of nuisance being committed on some streets, the police should rigorously enforce the conservancy clauses of the Police Act; councillors should exert themselves by systematically inspecting their wards as often as possible to see that their streets are

kept clean, and that the Sanitary Inspectors are up to their work. In respect to sewage, in the absence of complete system of drainage, it might be possible in certain places to construct small lengths of masonry drains which would enable the sewage of certain parts of the town to be discharged upon fields direct. Sufficiently suitable drains, better than none at all, can be made by laying upon puddled clay country-made half-tiled pipes, that can be made cheaply by any village potter; where it can be afforded these tiles can be made to secure fair efficiency by dipping them into boiling tar and pitch before laying, and by uniting the ends by portland cement. The town ought not to contain unhealthy localities; houses ought not to be permitted to be built on damp, unhealthy sites; buildings ought not to be constructed so as to impede the circulation of air and incidence of light.

The municipality effected as much improvement in sanitation generally as the funds at their disposal enable them, regarding the various recommendations made by Government in previous orders and by the District Medical and Sanitary Officer during the year. The sanitary staff was increased as recommended by the Sanitary Commissioner; a silchar cinerator was put up; Rs. 2,000 spent on water-supply, 35 extra dust-bins were constructed and 40 extra lamps were put up.

IV. Vaccination.—The subjoined table compares the vaccination work for two years:—

—	1893–94.						1894–95.					
	Total.	Successful.	Unsuccessful.	Unknown.	Percentage of grant.	Vaccination under one year.	Total.	Successful.	Unsuccessful.	Unknown.	Percentage of grant.	Vaccination under one year.
By Medical Subordinates ..	6	..	6	..	..	6	112	89	14	9	79·46	20
By Municipal Vaccinators ..	2,461	2,332	129	..	94·75	74	2,808	2,703	105	..	96·26	1,024
Total ..	2,467	2,332	135	..	..	80	2,920	2,792	119	9	..	1,044

These good results, both in the number vaccinated and the quality of work turned out, show that care has been taken, and interest evinced in vaccination. The total number of births registered was 1,014 and the operation on children under one year of age was 1,044, of which 1,043 were successfully protected during the year. During my sanitary inspections, I personally verified 779 cases of vaccination performed during the year and of these cases 90 per cent. were successful.

V. Hospitals—(*a*) *Nature and sufficiency of accommodation.*—Two hospitals were maintained by the municipality against one in 1893–94. The new women and children's hospital was opened on 3rd July 1894. The main hospital gives accommodation for 24 male in-patients, and the women and children's hospital gives accommodation for 10 female in-patients, making a total of 34 beds against 24 of last year.

(*b*) *State of repair of buildings.*—The main hospital building is in a dirty condition and needs urgent repairs. It is one of the poorest of the district hospitals I have ever seen. I believe the municipality intend thoroughly to repair this building which sadly needs looking into. The women and children's hospital is held in a rented building in the heart of the town and this building is in a fairly good condition. The municipality, I believe, intend to build a new hospital. I hope this will be done soon, as I am sure the work of the women and children's hospital is much appreciated in the town.

(*c*) *State of Repair of Furniture, &c.*—Furniture and fittings are fairly good and sufficient. New bedding and clothing must be supplied to the women and children's hospital.

(*d*) *Number of patients treated as compared with four previous years.*—In the subjoined tabular statement is exhibited the total sick treated in both institutions compared with that of the previous four years:—

—	1890–91.		1891–92.		1892–93.		1893–94.		1894–95.	
	Total treated.	Average daily sick.	Total treated.	Average daily sick.	Total treated.	Average daily sick.	Total treated.	Average daily sick.	Total treated.	Average daily sick.
In-patients	156	12·30	261	18·97	224	16·42	238	14·32	285	19·29
Out-patients	18,149	118·39	19,969	130·51	20,727	135·62	16,251	105·50	25,297	138·28
Total ..	18,305	130·69	20,230	149·48	20,951	152·04	16,489	119·82	25,582	157·57

It is satisfactory to note that the total number of in and out patients treated shows an increase of over 9,000 compared with that of last year; and is the largest number treated in Masulipatam from the foundation of the main hospital. This increase testifies to the growth of the popularity of the institutions and an increasing appreciation of European methods of treatment.

(*e*) *Mortality and actual causes of it.*—The deaths are greatly due to the practice of sending sick persons for treatment after they are given over by the native quacks as a last resource. They are further swelled by miserable pilgrims from the north of India, who are picked up on the roads in the last stage of exhaustion and brought in either by the police or by the village munsiff only to die. These pilgrims travel on half-starved, often chronically affected with fever, diarrhœa and dysentery, &c. Notwithstanding this, the mortality of those who were treated in both institutions is 3·5 per cent. of total treated.

(*f*) *Operations and results.*—The following statement shows the number of operations performed compared with that of four previous years:—

Operations.	1890–91.	1891–92.	1892–93.	1893–94.	1894–95.
Major	8	11	20	58	133
Minor	731	756	870	628	884
Total ..	739	767	890	686	1,017

The results of the operations performed in 1894–95 have been very good and show a mortality of 3 per cent. for major operations and 6 per cent. for minor operations.

(*g*) *Establishment whether sufficient and efficient.*—I should like to have an extra hospital assistant attached to the main hospital; at present I have only one; and considering the very large number of out-patients that resort to the hospital and that frequently aid is wanted at nights the services of a second man is much needed. An extra ward servant is also needed. The establishment of the women and children's hospital is sufficient for the present. The establishment of both institutions is, on the whole, efficient.

(*h*) *Midwives—work actually done.*—In the women and children's hospital there are two qualified midwives attached—Eurasian midwife Mrs. Vieyra and one native midwife. In connection with the women and children's hospital there are two caste and gosha wards attached. A room is also set apart for lying-in cases. Labour cases are attended either as in-patients in the women and children's hospital or at the houses of patients.

The subjoined table shows the number of labour cases attended during the past five years:—

—	1890–91.	1891–92.	1892–93.	1893–94.	1894–95.
Cases of labour ..	199	215	229	126	179

(*i*) *If dispensaries for Caste and Gosha women who cannot or will not attend the ordinary dispensaries have been working, a special note should be added on their working.*—I have great pleasure in submitting the report sent in by ~~Lady~~ Apothecary Miss Jane Claridge. Her work is very much appreciated in the town. And I am fully confident that better results will be shown in future. I cannot too strongly urge the necessity of a new building being constructed for the women and children's hospital. A large number of ladies and gentlemen, Europeans and Natives, have subscribed towards this very laudable object. I am given to understand that both the Kistna District Board and the Masulipatam Municipal Board are ready to subscribe handsomely towards this object. I hope to see a good building constructed—an example I hope that will be followed by every district in the Madras Presidency.

(*Miss Claridge's Report.*)

ANNUAL Concise report for 1894–95 of the women and children's hospital, Masulipatam.

(1) *Public Health.*—Written by the District Medical and Sanitary officer, Kistna.

(2) *Vital Statistics.*—Written by the District Medical and Sanitary officer, Kistna.

(3) *Sanitation.*—Written by the District Medical and Sanitary officer, Kistna.

(4) *Vaccination.*—Written by the District Medical and Sanitary officer, Kistna.

(5) *Hospital*—(*a*) *Nature and sufficiency of accommodation.*—As a tentative measure the hospital is held in a hired building in the heart of the town. It is hoped the municipality will build a new hospital. The hospital affords accommodation for ten patients.

(*b*) *State of repair of building.*—The present building is in a fairly good state of repair.

(*c*) *State of repair of furniture.*—The furniture of the hospital is sufficient and in good order. Hospital bedding and clothing is not sufficient.

(*d*) *Number of patients treated as compared with four previous years.*—This hospital was opened on 3rd July 1894. Since this date there have been 97 in-patients and 4,808 out-patients treated with a daily average attendance of in-patients 5·16, out-patients 34·72.

(*e*) *Mortality and actual causes of it.*—The mortality has been very small, the actual causes being the very chronic cases and cases in a moribund state being admitted as in-patients.

(*f*) *Operations and results.*—During the period under review, 43 major and 132 minor operations were performed with good results. Obstetric cases contributed the large number of major operations.

(*g*) *Establishment whether sufficient and efficient.*—For the present the establishment is sufficient and, on the whole, efficient.

(*h*) *Midwives—work actually done.*—During the year under review, I conducted 44 cases of labour. Eurasian midwife Mrs. Vieyra, 78 cases and native midwife Varadayi, 57 cases, making in all 179 against 126 cases attended last year.

(*i*) *If dispensaries for Caste and Gosha women who cannot or will not attend the ordinary dispensaries have been working, a special note should be added on their working.*—It is hoped that caste and gosha women will attend the hospital more freely. During the period under review we have had many caste and gosha women coming to the hospital for treatment, particularly so as in-patients.

(*j*) *General remarks.*—I am put in sole independent charge of the hospital. Surgeon-Major W. F. Thomas, District Medical and Sanitary officer, Kistna, inspects my hospital frequently. Several ladies of the station have also visited this institution. The general tenor of remarks is good.

(Signed) J. CLARIDGE,
~~Lady Apothecary.~~

General remarks.—Assistant Surgeon T. R. Lakshmana Perumal Pillai was in medical charge from 1st to 11th April 1894; after this date I was appointed Acting District Medical and Sanitary officer, Kistna. The continued increase in the number of patients seeking medical aid, and the starting of the new women and children's hospital necessitated a larger outlay on medicines, hospital bedding, clothing and new instruments. The diet charges have been much reduced.

MASULIPATAM,
29*th April* 1895.

(Signed) W. F. THOMAS, Surgn.-Major,
Ag. Dist. Medl. and Sany. Officer, Kistna.

Forwarded to the Chairman, Municipal Council, Masulipatam.

MASULIPATAM,
29*th April* 1895.

(Signed) W. F. THOMAS, Surgn.-Major,
Ag. Dist. Medl and Sany. Officer, Kistna.

C. No. 870-Eng.

Forwarded to the Collector.

I have seen all the roads within the municipality and under its control. They are in a far more satisfactory condition now. Much attention has been paid to all the roads, and places where there were defects, have been properly mended.

(Signed) C. KRISHNASWAMI NAYUDU,
Deputy Collector.

Submitted to the Chief Secretary to Government, Local and Municipal Department, Madras.

2. The report is disfigured by faults of style attributable probably to the chairman's absence at the time it was prepared.

3. The chairman is to be congratulated on the steady improvement in municipal administration. The ward system has been recently introduced, and it is to be hoped that the individual councillors will show greater interest now in their public duties. The fall in average attendance at the council meetings does not augur well.

4. The condition of the roads is much improved. Sanitation is also better. But the very small amount of night-soil brought daily to the Weld Forest Reserve shows either that the scavengers do not clean the latrines, or that the public do not use them. There is little doubt that the latter is the chief reason and matters are not likely to alter so long as there are so many open spaces, gardens and compounds within easy reach of every part of the town. The Bench Magistrates do not improve matters by punishing nuisance cases with "nominal fines" as the chairman says.

5. The town's most urgent wants are improved drainage and improved water-supply.

MASULIPATAM,
25*th June* 1895.

The fall in the receipts from fines is to be regretted.

(4) The private scavenging system made no material progress during the year. The number of houses served rose from 312 to 331, but this still represents only about one-third of the total number of private latrines in the town, and the system was again worked at a heavy loss to the council. The chairman reports that the service is very unpopular and that his efforts to make it self-supporting have not been successful, but the obstacles in the way of its extension have been overcome in other towns, and there appears to be no reason why they should be insurmountable in Masulipatam. The people should be made to understand, by the systematic prosecution of persons who fail to keep their premises clean, that the municipal council will not tolerate any infringement of the sanitary provisions of the law. The chairman will report the action which the municipal council proposes to take on these remarks.

No. 1661 M., Local and Municipal, 16th October 1895.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper :—

From J. W. MAIDEN, Esq., Chairman, Municipal Council, Masulipatam, to the Chief Secretary to Government (through the Collector of Kistna), dated 12th June 1895, No. 210.

I have the honour to submit herewith my report and statements of the working of this municipality for the year 1894–95 together with the council's resolution, No. 2, dated 31st May 1895, approving of the same.

I.—Constitution of the Council.

2. The number of councillors sanctioned for this municipality is twenty including the *ex-officio* councillor. Six of these are officials and fourteen non-officials. The increase in the number of the officials is due to the public prosecutor having been included under the officials by the Collector of Kistna, as the former receives an allowance from Government as a public prosecutor. On the 31st March 1895 the number of councillors on the list was eighteen. The vacancy caused by the death of M.R.Ry. M. Venkaji Rao Pantulu Garu was not filled up, as the Collector wanted some information regarding my nominee. The other vacancy caused by Saiyid Ali Sahib Bahadur who has gone on furlough was subsequently filled up by the appointment of his successor M.R.Ry. Narayanaswami Aiyar Avargal, Deputy Collector in charge of the Treasury, Kistna. Twenty-seven meetings were convened during the year, of which 24 were actually held against 30 of last year. The average attendance of the official and non-official members was 1·17 and 8·13 against 1·27 and 8·87 respectively of the previous year. The attendance of both the officials and non-officials is on the whole poor.

II.—Receipts.

3. The year opened with a balance of Rs. 2,751–15–2 (+ Rs. 27 cash in hand) against Rs. 4,226–2–6 of the last year. The receipts under the various heads of account amounted to Rs. 50,124–12–9 against Rs. 45,038–3–11, the actuals of 1893–94, the revised estimate for the year under report being Rs. 58,870. In the subjoined statement the differences under the various heads of account are shown :—

Total ..	45,038 3 11	50,124 12 9	58,870 0 0	— 8,745 3 3

4. The taxation per head of population was Rs. 1-4-8 against Rs. 1-2-7 of the previous year. The reason for the increase is that more money was collected during the year under report.

A.—Municipal Rates and Taxes.

5. *Tax on Arts, &c.* (*Section* 103).—The receipts under this head amounted to Rs. 9,190-8-0 against the revised estimate of Rs. 9,900 and the actuals of Rupees 8,185-8-0 for 1893-94. To recover the arrears of 1891-92, 1892-93 and 1893-94, I instructed two tax-collectors to prosecute the defaulters. Ninety-five cases were instituted to recover an amount of Rs. 304-8-0, the amount collected being Rs. 139. The fines imposed in these cases came up to Rs. 18-6-0. In 61 cases, the amount claimed was recovered. In 6 of these cases the amount of tax fixed by me was reduced and 22 cases have been dismissed altogether. In 12 cases the amount claimed was not recovered, though the Bench Magistrates punished the defaulters. Rs. 1-8-0 was imposed on a party as a penalty for tax on arts.

6. *Tax on Buildings* (*Section* 63).—The amount collected during the year was Rs. 11,021-0-7 against Rs. 13,000, the revised estimate of the year and Rupees 9,227-8-1, the actuals of the previous year. House-tax registers were revised during the year under report and the demand was raised from Rs. 10,128 to Rs. 12,563-4-5, though the tax-payers bitterly complained of this measure and threw all sorts of obstacles in the way of the council by putting in numerous appeals. Remissions to the amount of Rs. 150-3-2 were granted this year on account of vacant buildings.

7. *Tax on Lands* (*Section* 63).—The tax collected under this head amounted to Rs. 965-0-2 against the revised estimate of Rs. 2,400 and the actuals of Rs. 672-8-9 of the previous year. The land-tax registers were revised during 1891-92.

8. *Water-tax on Lands and Buildings.*—The revised estimate of the year was Rs. 3,240 and the amount collected was Rs. 2,377-10-2 against the actuals of Rs. 1,757-1-10 of the last official year. This tax is collected along with house and land-tax at $1\frac{1}{2}$ per cent. on the rental value of lands and buildings. As the water-supply of the town is imperfect, and as several suburbs of the town are not supplied with Kistna water, the tax is not much liked by the people and is paid under protest.

9. *Tax on Vehicles with Springs and Palanquins* (*Section* 77).—The amount collected during the year under report came up to Rs. 724-8-0 against the revised estimate of Rs. 720 and the actuals of Rs. 679-8-0 of the previous year.

10. *Tax on Animals* (*Section* 77).—The amount collected under this head was Rs. 967-8-0 against the revised estimate of Rs. 920 and Rs. 878-4-0, the actuals of the previous year.

11. *Tax on Carts and other Vehicles without Springs* (*Section* 85).—The amount anticipated in the revised estimate was Rs. 1,000 and the amount actually collected was Rs. 1,160 against the actuals of Rs. 924 for the last official year. The increase is due to more carts having been licensed during the year.

12. *Tolls* (*Section* 91).—The amount of the bid for the year was Rs. 16,905. The contractor began to collect tolls illegally on vehicles and animals going out of the municipal limits. He was warned several times not to collect money on out-going animals and vehicles. This made no impression upon the contractor. The Council then ordered tables of tolls to be put up at the expense of the contractor in English and vernacular drawing the attention of the public to the illegal collection, and ordered the people not to pay up tolls on out-going vehicles and animals. This annoyed the contractor and he declined to pay the kists. He claimed a refund of Rs. 4,000 for the loss he incurred in tolls which he was not allowed to collect on out-going vehicles and animals. The council had to attach the farm for arrears of kists due, and to sell it at the contractor's risk and loss forfeiting the deposit given by him. The amount actually collected during the year came up to Rs. 13,288-9-0. One-third of this amount was paid to the district board as contribution due to them, and the amount actually credited to the municipal accounts was only Rs. 8,884-9-1 (after deducting the cost of repairing the toll shed against the revised estimate of Rs. 10,420 and Rs. 10,136-9-2, the actuals of the previous year. The Government Promissory

notes deposited by the contractor were subsequently sold by the council by public auction and the sale-proceeds of Rs. 3,349-11-7 were credited to the municipal funds this year. For the balance still due the council tried to distrain the property of the contractor, but it was not feasible, as the whole of his property was transferred to some one else. The contractor died subsequently. The council propose to file a suit against the heirs of the contractor and recover the balance due, if practicable, within the current official year.

13. *Revenue derived from Municipal Property and powers apart from Taxation*—(*a*) (i) *Rent of Lands.*—The amount of the bid for Challa bazaar for the year was Rs. 170, the revised estimate for the year being Rs. 180. The amount actually collected came up to Rs. 170-2-7 against the actuals of Rs. 240-3-6 in the previous year.

14. (ii) *Rent of Buildings.*—The amount anticipated in the revised estimate for the Police hospital rent was Rs. 180 and the amount actually collected came up to Rs. 150, the actuals of the last official year being Rs. 165. This short collection was due to the rent of the last three months not having been paid by the District Medical and Sanitary officer, Kistna, in time.

15. (iii) *Avenue Receipts.*—The amount actually collected under this head came up to Rs. 26-1-9 against Rs. 20 anticipated in the revised estimate and the actuals of Rs. 31-13-0 for 1893-94.

16. (iv) *Fees from Travellers' Bungalows.*—The collections under this head amounted to Rs. 38-8-0 against the revised estimate of Rs. 50 and Rs. 28-8-0, the actuals for the previous year. The travellers' bungalow at the Fort is not very often availed of by the European travellers as it is far away from the European quarters of the town.

17. (*b*) (ii) *Produce of Lands and Gardens.*—The amount realized under this head for the sale of grass in the Batchupeta tank was Rs. 4-8-0 against the revised estimate of Rs. 30 and As. 12, the actuals of 1893-94.

18. (*b*) (iii) *Sale-proceeds of Old Materials, empty Oil-cans, Packing Cases, &c.*—The amount collected under this head came up to Rs. 115-4-5 against Rs. 100 anticipated in the revised estimate while the actuals of the previous year were only Rupees 94-2-6.

19. (*c*) *Conservancy Receipts, Sale-proceeds of Night-soil, Street Refuse, &c.*—At the time of the sale of farms for the year under report, a contractor offered Rs. 30 for burnt street sweepings, but this offer was not accepted by the council, as they intended to burn the rubbish in the "Silchar" cinerator, as recommended by the Sanitary Commissioner for Madras, and use the clinker formed for road material; hence there were no receipts under this item during the year under report. Night-soil is being trenched in the Weld's reserve as an experiment in the hopes that a demand may be created when the inhabitants perceive a practical proof of the advantage of the night-soil as a manure.

20. (*d*) (i) *Fees from Educational Institutions.*—The amount anticipated in the revised estimate was Rs. 10 and the amount actually collected was Rs. 3-8-6, while the actuals for 1893-94 were Rs. 55-6-0. As all the salary result schools maintained by the council are for backward classes, such as Panchamas, fishermen and labourers, the council, on the recommendation of the Educational authorities, exempted the children of backward classes from payment of school-fees.

21. (*e*) (i) *Sale-proceeds and Composition Fees of Medicines.*—The amount anticipated in the revised estimate was Rs. 100 and the amount actually collected came up to Rs. 75-13-0 against the actuals of Rs. 99-12-4 for the last official year. The amount of sale-proceeds of medicines is now brought to account very carefully, as the District Medical and Sanitary officer is exercising a thorough supervision over the accounts maintained in the hospitals.

22. (*f*) (i) *Income from Markets.*—The vegetable market was leased out by the council for Rs. 4,425 and the fish market for Rs. 1,500 for the year under report. The amount anticipated in the revised estimate was Rs. 5,930, and the amount

actually collected was Rs. 6,026–11–0 against the actuals of Rs. 3,353–2–4 for the year 1893–94. The increase is due to the interest collected for late payment of kists and to the collection of arrears of last year.

23. (*f*) (ii) *Income from Slaughter-houses.*—The amount anticipated in the revised estimate (Rs. 430) was collected on this account against the actuals of Rs. 266–4–6 for the previous year. The increase is due to the rise of the bid during the year.

24. (*g*) *Other Fees*—(i) *Distraint Fees.*—Rs. 1–6–0 was collected against Rs. 20 of the revised estimate and Rs. 1–10–0, the actuals of the last official year. Property was distrained only in seven cases. It is not possible to distrain the property of the defaulters in all the cases for which warrants are issued. Sometimes the tax-payers shut up their doors against the distraining officer and refuse to accept the receipts presented for the property distrained. In every case of distraint the assistance of the Police becomes absolutely necessary.

25. (ii) *License Fees.*—In the revised estimate Rs. 1,200 were anticipated, and the amount actually collected came up to Rs. 1,103 against Rs. 980, the actuals for the last official year.

26. (*g*) (iii) *Cart-stand Fees.*—The cart-stands in the town were leased out to the toll-contractor alluded to in paragraph 12 *supra* for the year under report for Rs. 1,005. As the contractor was irregular in payment of kists, the farm was resold at his risk and loss, and the amount of his deposit was forfeited. The amount collected came up to Rs. 845–10–11 against Rs. 1,000 anticipated in the revised estimate and the actuals of Rs. 825–11–1 for 1893–94. The balance will be collected from the heirs of the contractor, if practicable.

27. (*g*) (iv) *Other Fees—For extracts from the Birth Register.*—Two applications for extracts having been received, one rupee was collected against Rs. 10 anticipated in the revised estimate and Rs. 3, the actuals of 1893–94.

28. (*h*) *Fines under Municipal and other Acts.*—The amount originally budgeted under this head was Rs. 800. This amount was reduced to Rs. 300 in the revised estimate, as the receipts during the first eight months of the year were not sufficiently large. The amount actually collected came up to Rs. 431–13–0 against Rs. 990–14–0 of the previous year. The decrease is due to the less number of prosecutions instituted by the Police and to the nominal fines imposed by the Bench Magistrates.

29. (5) *Grants and Contributions*—(*a*) *From Government.*—(i) *Education—Municipal Schools.*—Rs. 5 were realized as provincial grant for girls in Panchama schools against Rs. 12–13–5 of the previous year. In the revised estimate this sum was not anticipated as the council thought that the Panchama girls in question were not eligible for grants. Contribution due for the gymnastic instructor is still due from Government which will be drawn this year.

30. (*b*) *From Local Boards*—(ii) *Medical.*—In the revised estimate Rs. 4,500 were anticipated to be collected from the district board, being half the expenditure incurred by the council for the maintenance of the two hospitals. The amount actually received within the official year came up to Rs. 2,659–14–2 against Rs. 3,778–0–5, the actuals of the last official year. Bills for the balance due were sent up during the year, but they were not passed for payment in time to be included in the accounts of the year.

31. (iii) *Other Purposes.*—Rs. 1,800 budgeted for the maintenance of the main and cantonment roads was received against Rs. 1,019–0–6, the actuals of the last official year.

32. (*c*) *Other Grants and Contributions*—(ii) *Medical.*—The amount due from the heirs of the late Honorary Surgeon U. Venkataswami Nayudu was not collected, as the whole of his property was attached by the Civil Courts.

33. 6. *Miscellaneous*—(*a*) *Recoveries on account of services rendered to Private Individuals*—(i) *Private Scavengering.*—The amount collected under this head came up to Rs. 491–2–6 against the revised estimate of Rs. 570 and the actuals of Rupees 478–15–6 of the previous year. The arrears outstanding are now collected.

34. (*a*) (ii) *Other Purposes.*—Under this head Rs. 95 were collected against an estimate of Rs. 100 on account of cess-pools. The amount collected last year under this head was Rs. 62–14–0. The increase is due to more cess-pools brought under municipal management. Rupees 75–8–0 was received from a party for the construction of a conduit in Ramanayudupeta.

35. (*b*) *Other Items*—(i) *Fishery Rents.*—Rs. 45–6–0 were realized during the year against Rs. 50 provided in the revised estimate, while the actuals of the previous year were Rs. 24–5–3. The collections are chiefly for lotus leaves in the Fort ditch.

36. (iii) *Fee for numbering Carts.*—The amount anticipated to be realized under this item was Rs. 60, the amount actually collected being Rs. 36–4–0 against the actuals of Rs. 39–4–0 of the previous year.

37. (7) *Extraordinary and Debt*—(*d*) *Advances*—(i) *Permanent.*—Under this head Rs. 50 given to the overseer for carrying out public works were adjusted.

38. (ii) *Others.*—The advances given to the Municipal subordinates for filing prosecution lists before the Bench Magistracy were adjusted, and the amount advanced to the scavengering contractor for bringing in more men was also recovered and adjusted during the year.

III.—Expenditure.

39. The expenditure incurred under the various grants is shown in the following statement compared with the revised estimate of the year under report and the actuals of the previous year:—

Details of expenditure.	Actuals of 1893–94.	Actuals of 1894–95.	Revised estimate of 1894–95.	Variations.
1	2	3	4	5
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Grant I—				
Public Works, &c.	15,796 11 3	17,032 12 8	17,720 0 0	— 687 3 4
Grant II—				
Education	4,624 9 1	5,004 2 8	5,900 0 0	— 895 13 4
Grant III—				
Sanitation and Medical	17,303 0 8	18,609 7 10	18,850 0 0	— 240 8 2
Grant IV—				
Lighting, &c.	3,706 1 8	4,571 8 1	4,850 0 0	— 278 7 11
Grant V—				
General Supervision Establishment	4,925 7 2	4,972 4 8	4,550 0 0	+ 422 4 8
Advances Recoverable	160 15 8	52 0 0	..	+ 52 0 0
Refunds of other than current collections ..	..	17 0 0	30 0 0	— 13 0 0
Balance—				
(*a*) Municipal Fund	2,747 8 11	2,644 8 0	9,720 0 0	— 7,075 8 0
Total ..	49,264 6 5	52,903 11 11	61,620 0 0	— 8,716 4 1

40. *Grant I, Public Works.*—The total expenditure under this grant amounted to Rs. 17,032–12–8 against Rs. 17,720, the revised estimate of the year. There were certain works carried out beyond the sanctioned allotment, in anticipation of the council's sanction, which was obtained in May 1895—*vide* Resolution No. 10 of 11th May 1895. There were also certain bills left unpaid at the end of the year, owing to their estimates not having been sanctioned in time. Thus it is clear that works under this grant were carried out to the limit of the revised estimate.

41. Under new works—communications Rs. 42–3–3 were paid on account of arrears on boat stand road, completed during the previous year, against Rs. 110, the balance of the work estimate provided for in the revised estimate.

42. Under new works—buildings Rs. 834–12–3 were expended against Rs. 1,850, the revised estimate. The expenditure incurred was on dust-bins, Silchar cinerator and stalls at Robertsonpet, as shown in statement II-A.

43. *Part I, New Works.*—The decrease in expenditure is due to latrines not having been built for want of sanctioned estimates.

44. Under water-supply works a conduit, at Ramanayudupet for which a contribution of Rs. 75–8–0 was received, was constructed at a cost of Rs. 70–6–5 against an estimate for Rs. 185. The work will be resumed this year.

45. Under repairs—communications the works enumerated in part II and repairs as per statement II-A were carried out to the extent of Rs. 7,858–13–6 against Rs. 7,316, the sanctioned allotment of the year. The excess was met from savings on other individual works and the provision for drainage and water-supply.

46. Under buildings—repairs, toll sheds, latrines, markets and slaughter-houses were repaired, and the dispensary building was whitewashed, &c., for Rs. 373–12–4 against an estimate of Rs. 139 sanctioned for this work. The excess expenditure was likewise met from the savings.

47. Under drainage works Rs. 879–9–6 were expended against Rs. 1,000, the provision in the revised estimate. The savings were utilized where necessary.

48. Under water-supply works—repairs, Chakirevupalem conduit and some others were put into order. The ditch at the Fort was also attended to. The total expenditure came to Rs. 1,259–6–2 against Rs. 1,230 of the revised estimate, the excess having been sanctioned from the unutilized provisions under this grant.

49. Under water-supply establishment a lascar on Rs. 6 was employed throughout the year, and also two watchers at Batchupet tank and Fort ditch were engaged. The total cost is Rs. 88 against Rs. 90 of the revised estimate.

50. Under (3) Establishment Rs. 887 were shown against Rs. 960, the revised estimate. The less expenditure was owing to the cost of the overseer's establishment having been proportionately debited to grants III and IV for the clearance of noxious vegetation and the preservation of avenues.

51. Against a provision of 150, Rs. 133–12–1 were utilized for the repairs of tools and plant and the purchase of 59 iron pots, rammers, &c.

52. Under contributions Rs. 2,820 were paid to the Local Fund board for the Fort road repairs, and Rs. 1,364 against Rs. 1,370 were paid to the Public Works Department for water-supply.

53. *Grant II, Education*—(i) *Training Schools* — (*a*) *Contributions to Local Boards.*—Rs. 200 were paid to the Local Fund board as contribution for the carpentry class attached to the Masulipatam Normal school.

54. (2) *Municipal Schools*—(ii) *Salary-result System*—(*a*) *Fixed Payments.*—Rs. 725 were paid to the teachers of the Municipal schools against Rs. 750 provided for in the revised estimate. The difference is due to the Gilakaladindi fishermen school not having been started till after the 30th of April 1894, and to the teacher having been paid only for ten months instead of twelve months as per budget, and to the old rate of pay having been paid to the teacher of the Muhammadan school for March 1894.

55. (*b*) *Result Stipends.*—Rs. 320–0–2 were paid against Rs. 220, the revised estimate. The increase is due to the fact that the teaching staff exerted themselves more creditably during the year under report, and to the Muhammadan school teachers having been paid arrears of the previous year.

56. (*c*) *Contingencies.*—Under contingencies Rs. 201–7–0 were disbursed against the reduced provision of Rs. 180 in the revised estimate.

57. (3) *Salary Grants.*—Rs. 868–5–4 were disbursed to the managers of the Hindu High school and the Noble College against Rs. 750 of the revised estimate. The increase is due to some arrears grant having been paid during the year.

58. (4) *Result Stipends.*—The provision in the revised estimate was Rs. 3,000, of which Rs. 2,213–5–10 were paid to the managers of two Lower Secondary, ten Upper Primary and twelve Lower Primary schools according to the certifying memoranda received from the Inspecting officers, and no bill was outstanding in the Municipal office at the end of the year.

59. (5) *Inspection*—(*a*) *Contributions to Local Boards.*—Rs. 60 were paid to the board for the Muhammadan Inspecting schoolmaster at Rs. 5 per mensem.

60. (6) *Municipal Inspections*—(i) *Establishment.*—Rs. 248–14–8 were disbursed to the Inspecting schoolmaster who had gone on leave on medical certificate for three

months against Rs. 250 provided in the revised estimate. The saving was owing to no substitute having been appointed for him for some time during this period.

61. (ii) *Contingencies.*—Rs. 8–8–0 were expended against Rs. 20, the estimate. The less charge was due to the above cause.

62. *Miscellaneous*—(*a*) *Building, Furniture, &c., Grants.*—No Manager of any result school applied for any building or furniture grant during the year, and hence the provision has lapsed.

63. (*b*) *Common Gymnasium*—(i) *Establishment.*—For some days the gymnastic instructor went on leave without pay, and so Rs. 145–2–6 only were disbursed to him against Rs. 150 of the revised estimate.

64. Under contingencies Rs. 13–7–2 were expended against Rs. 20, the revised estimate.

65. Thus the total expenditure under this grant came to Rs. 5,004–2–8 against Rs. 5,900, the provision. This is about 12 per cent. of the total receipts under rates and taxes and markets, &c. During the year under report the Gilakaladindi fishermen school was started, and four of the old result schools were closed; two result schools were however newly opened—one at Malakapoor for Muhammadans and the other at Sukurlabad for Hindus. Of the four schools closed during the year, one was amalgamated with the Noble Hindu Branch at Inuguduru, and the teachers of the other three schools left them to better themselves elsewhere according to convenience. The number of unpassed teachers in the aided schools was reduced during the year to ten, and it is hoped that this number would be replaced by more efficient men this year. There are also many unpassed men in other schools, and as the Inspecting schoolmaster has lately opened a sessional school to train such men, the efficiency will gradually be secured.

66. The examination results of the year were very fair as remarked by the Assistant Inspector of Schools.

67. The population of school-going age according to the statement of the Assistant Inspector of Schools was 2,788 and 3,031 of boys and girls, while those that received instruction were 2,703 and 112 respectively (exclusive of girls' schools). This was at 96·9 and 3·6 per cent. The attendance of the boys in the six Municipal schools was not fair on the whole, and is even very unsatisfactory in the Muhammadan and the night schools. The average cost of educating pupils in these schools was Rs. 7–7–4. The cost of educating Muhammadan boys was Rs. 9–14–10 against Rs. 9–4–0. This was however due to arrears of the previous year having been paid during the year under report. At the two Panchama schools instruction was imparted at Rs. 5–15–2 against Rs. 6–11–1 of the previous year. This is satisfactory. The night schools at Nizampet and Chintaguntapalem cost Rs. 5–6–7 against Rs. 5–9–5 of the previous year. The fisherman school at Gilakaladindi has cost Rs. 7–1–4. This is rather high, but all the pupils presented for examination came out successful, which is very satisfactory.

68. There are also some unaided schools in this municipality which have been recently started by the Vaisyas prompted by religious factions. These and others will be brought under the aided list, if the educational rules on the subject are complied with.

69. *Grant III*—(*i*) *Hospitals and Dispensaries*—(*a*) *Establishment.*—Rupees 1,984–14–0 were disbursed against Rs. 2,000, the revised estimate.

70. (*b*) *Medicines and Supplies.*—Rs. 2,763–3–3 were expended against Rs. 2,900, the increased provision in the revised estimate. There were some dues yet to be paid to the contractor, but as bills were not received, payments were not made.

71. (*c*) *Diet of Patients.*—Rs. 1,103–14–0 were expended against Rs. 1,100, the reduced provision in the revised estimate.

72. (*d*) *Sundries and Contingencies.*—Rs. 1,628–1–2 were expended against the increased provision of Rs. 1,500 for the year. This was unavoidable as chatrangies (carpets) cumblies and brass vessels, iron cots, &c., were supplied to the two hospitals on account of in-patients. The work in the two hospitals has increased

compared with that of the previous year. 285 in-patients and 25,297 out-patients were treated during the year against 238 and 16,251 of the previous year. The average number of patients treated daily was 19·29 and 138·28 against 14·32 and 105·5 of the previous year, respectively. The total was 157·57 against 119·82 of the previous year. Information as to the number of successful and unsuccessful cases is not available; but the operations performed during the year seem to have been on the whole good, as the mortality was but 3 per cent. The work done in the hospitals is very creditable and is due to the efforts of the present District Medical and Sanitary officer, Surgeon-Major W. F. Thomas, and his assistants. The number of labour cases attended by the Eurasian and Native midwives rose from 126 to 179. As for other particulars, the reports received from the District Surgeon are enclosed. The services rendered by Miss Jane Claridge, the lady Apothecary in charge of the Women and Children's hospital, are very much appreciated in the town. Ten beds are now available for in-patients in the women and children's hospital against none in the previous year. A temporary shed had to be erected for treatment of venereal diseases. Both the Native and European families as well as Muhammadan Ghosha women are freely resorting to the women and children's hospital. A long-felt want in this town has been supplied by the opening of this hospital, and the council is very proud of it.

73. (2) (*a*) *Contributions to Provincial Funds for* (i) *Medical College*, (ii) *Sanitary Inspection*, (iii) *Medical Reserve.*—The staff was paid according to bills received from the Accountant-General, but no bill having been received for (IV) Cutlers' Establishment, nothing was paid during the year.

74. (*b*) For the clerk attached to the Civil dispensary Rs. 30 were paid as contribution to the local board.

75. (3) *Vaccination*—(*a*) *Establishment.*—Rs. 338 were paid to the vaccinators against Rs. 340, the revised estimate of the year.

76. (*b*) *Contingencies.*—Under contingencies Rs. 401–15–11 were disbursed against Rs. 400, the revised estimate. The number of vaccine operations performed during the year was 2,920—112 by medical subordinates and 2,808 by municipal vaccinators. Of these, 2,792 were successful and 119 unsuccessful, and 9 unknown. Of the year's total, 1,044 were on children below one year of age and the rest on those above that age. The cost of a single operation performed during the year by Municipal vaccinators was As. 4–3 against As. 4–9 of the previous year; 2,196 notices were issued to parents or guardians to have their children vaccinated, and in 75 cases summons of prosecutions were served on them. These cases were pending at the end of the year and the results are yet to be communicated. The vaccine operations are personally supervised by the District Medical and Sanitary officer, Kistna, and his assistants. All the children to be vaccinated are invariably brought to the depôt in the hospital compound and are operated on with fresh animal lymph obtained from the calf.

77. (4) *Registration of Births and Deaths*—(*a*) *Establishment.*—Rs. 256–3–1 were disbursed to the two registrars against Rs. 260, the provision in the revised estimate. The less expenditure was owing to the Head registrar having been on leave without pay for some time.

78. (*b*) *Contingencies.*—Under this head Rs. 35–11–4 were expended against Rs. 20 in the revised estimate. The excess expenditure was necessary, because five notice boards regarding births and deaths were hung up in some conspicuous parts of the town. The number of births during the year was 1,014, while those of deaths amounted to 1,002. This was at 26·13 and 25·82 per mille of the population respectively. 39 prosecutions in the case of births and 42 prosecutions in the case of deaths were instituted, &c., during the year. Of the prosecutions instituted regarding births, as many as 22 were successful, while of those of deaths 19 cases proved successful. The fines imposed in all these cases fetched Rs. 22.

79. (5) *Conservancy, road-cleaning and Road-watering*—(*a*) (i)—*Establishment.*—Rs. 4,467–10–5 were disbursed against Rs. 4,490 of the year's provision. The less expenditure was owing to absences, fines, &c.

80. (ii) *Other charges, &c.*—Rs. 3,372–12–6 were expended against Rs. 3,330, the year's provision. The excess expenditure was unavoidable and unforseen. The charges were chiefly on account of hired carts, brooms and broomsticks.

81. (*b*) (i) *Private Scavenging.*—Rs. 751–15–3 were paid against Rs. 810, the year's revised estimate. The decrease is due to the smallness of fines inflicted. The number of private latrines that were on the list at the beginning of the year was 303. Twenty-eight new private latrines were brought under municipal agency during the year, the total being 331. The amount realized as fees was Rs. 491–2–6. Private scavengering is very unpopular, and my efforts to make it self-supporting were not successful.

82. (ii) *Contingencies, such as cost of scavenging carts, &c.*—Rs. 640–9–11 were spent against Rs. 590, the revised estimate. The charges were chiefly hire of carts, brooms, &c.

83. *Cholera charges.*—Rs. 20 were disbursed under arrears against Rs. 200, the revised estimate.

84. (*d*) *Contingencies.*—Nothing was spent against the provision of Rs. 20 for contingencies.

85. *Removal of prickly-pear and noxious vegetation, &c.*—Rs. 416–9–0 were expended against Rs. 450, the year's revised estimate. In this expenditure was included the proportionate cost of the overseer's establishment supervision.

86. The total expenditure under Grant III was Rs. 18,609–7–10 against Rupees 18,850, the year's provision in the revised estimate.

87. *Grant IV, Lighting*—(*a*) *Establishment.*—The lighting of the town was done by departmental agency. For this purpose ten lamp lighters were employed at Rs. 5 each. Exclusive of fines, the expenditure incurred was Rs. 585–12–0 against Rupees 600, the revised estimate of the year. The town was as usual lighted from the fifth day after the full moon to the fourth day after the new moon.

88. Under contingencies Rs. 2,221–1–11 were expended against Rs. 2,250 provided in the revised estimate. Thirty-two new iron lamp-posts were purchased for Rs. 512–8–0, and the rest was spent for kerosine oil, wicks, repairs to lanterns and for providing ladders and lanterns to the masonry pillar in the Robertsonpet square.

89. *Markets.*—Rs. 177 were paid to the inspector and the toti who constituted the market establishment, the estimate being Rs. 180.

90. Under contingencies Rs. 5–9–0 were expended for notice boards against Rs. 10 put down in the revised estimate. During the year under report twelve persons were prosecuted for not observing the market bye-laws, and the fines imposed on them amounted to Rs. 70–8–0. There were also twelve other cases pending at the end of the year.

91. *Slaughter-houses.*—Rs. 120 were paid to the Superintendent and the toti under him, and nothing was expended under contingencies.

92. (4) *Travellers' Bungalow.*—Establishment consisted of but one watcher on Rs. 6 a month. The total was Rs. 72.

93. Under contingencies Rs. 37–7–0 were expended against Rs. 50 of the revised estimate for repairing windows and supplying tin-pots, &c.

94. (5) *Avenues*—(*a*) *Establishment.*—Under this head Rs. 41 were shown as the proportionate cost of the overseer's establishment for supervising avenue work.

95. The expenditure under contingencies was Rs. 556–3–1 for planting new cocoanut and mango trees and watering, fencing and weeding young plants.

96. A provision of Rs. 50 was made for the repairs of the fire-engine which was sent up to the Bezwada workshops, but no bill having been received for the charges, no payment was made.

97. Rs. 152–5–0 were expended for the destruction of wild animals and snakes, &c., against a reduced provision of Rs. 180 for the year. The animals killed were 96 cobras, 34 other snakes, 200 pigs, 147 dogs, 349 bitches and 3 mad jackals.

98. Under printing Rs. 125–12–7 only were paid for against Rs. 300 for printing quarterly proceedings and annual returns, &c.

99. The provision for V—Other items, was Rs. 500 and the expenditure shown against this was—

	Rs.	A.	P.
For time gun	312	15	9
For Telephone contribution	63	5	8
For Law charges	85	11	0
For proclamation by beat of tom-tom	14	9	4
Land-cess, &c.	0	11	9
Total ..	477	5	6

100. *Grant V—(a) General Establishment.*—Rs. 2,317–11–2 were spent against Rs. 2,340, the provision for the year. The less expenditure was owing to leaves granted on loss of pay.

101. (ii) *Inspection.*—Rs. 358–1–0 were paid to the chairman for carriage allowance against Rs. 360. There was delay in obtaining fresh sanction to the chairman's appointment, and hence the saving.

102. (*b*) *Collection of Municipal taxes.*—Rs. 1,027–13–6 were paid to tax collectors against Rs. 1,050, the revised estimate. The less expenditure was owing to a bill collector having been dismissed and no substitute appointed for him for some time.

103. *Office Contingencies.*—The expenditure under this head came to Rupees 1,028–11–0 against Rs. 560, the revised estimate of the year. The excess expenditure was unavoidable, as bills for forms supplied by the Accountant-General and local presses were received at the end of the year and paid for, and as stationery was supplied from this source to the overseer's establishment, &c.

104. (*c*) Rs. 240 as provided were paid as contribution for Central office and audit establishment. Thus the total under Grant V came to Rs. 4,972–4–8 against Rs. 4,550, the year's provision.

105. *Advances recoverable*—(6) *Others.*—Under this head Rs. 52 were advanced to scavengers and were recovered during the year.

106. Under refunds of other than current collections Rs. 17 were paid during the year against Rs. 30, the provision in the revised estimate.

107. The total expenditure under all heads came to Rs. 50,259–3–11 against Rs. 51,900, and including the balance of Rs. 2,644–8–0, the grand total came to Rs. 52,903–11–11 against Rs. 61,620, the year's revised estimate.

Enclosure.

Annual concise report on the working of the Municipal Hospitals, Masulipatam, Kistna district, for the official year 1894–95.

I have the honour to submit the concise report on the working of the Municipal Hospitals, Masulipatam, Kistna district, for the official year ending 31st March 1895.

(I) *Public Health.*—The general health-condition of the town of Masulipatam has been good. The town is within the endemic area of beri-beri and malarial fevers. The town is perennially haunted by fevers, bowl complaints, cholera and small-pox. Season has also a marked influence on diseases; the cold weather (November to February) being the most fatal to natives and the dry hot months (March to June) the healthiest. During the year under review there was very little of cholera. There were no deaths from cholera as against 62 of last year. As regards small-pox there were in all nine deaths, and out of this number three were infants. Last year there were two deaths from small-pox. Ophthalmia and simple conjunctivitis were present in an epidemic form during the hot months. Other diseases prevalent were fevers, dysentery, diseases of the ear, diseases of the skin and ulcers.

(II) *Vital Statistics.*—The subjoined table shows the vital statistics for 1894–95 as compared with 1893–94 :—

	1893–94.	1894–95.
Number of births	1,108	1,014
Birth rate per mille of population	28·55	26·12
Number of deaths	1,150	1,001
Death rate per mille of population	29·63	25·79

Under the head of infant-mortality there were 340 deaths against 387. Of nine deaths from small-pox, three were among infants. Vital statistics are carefully kept and so reliability can be placed on them.

(III) *Sanitation.*—Masulipatam town is situated $3\frac{1}{4}$ miles from the sea on a low-lying plain, and is surrounded by open country. The plain between the town and sea-coast becomes a swamp during the rains. The every day Indian experiences of fouling of water, of carelessness in spreading of infectious diseases, and committal of nuisances, all afford breeding ground of cholera, other epidemics, fevers and diarrhoea. The town including the Fort is divided into seven wards, and these wards are under inspectors who are responsible for conservancy; and also under the supervision of the ward councillors. There are 34 conservancy carts with 84 sweepers. The staff of sweepers is fairly sufficient. Street sweepings are first deposited outside the town and then burned in (6) six cinerators. Conservancy staff is under the management of the chairman, municipal council. There are thirteen public latrines—six for men and seven for women, scattered about the different parts of the town. Drinking-water is obtained from the river Kistna by means of the Bezwada canal by an open channel, conducted to the limits of the municipality and thence by a covered conduit to the centre of the town into a big masonry reservoir, and from this water is distributed by conduits to all parts of the town. There are about 113 good drinking-water wells and two tanks set apart for drinking purposes. The municipal conservancy inspectors see that the sources of drinking-water are not polluted. There are no masonry drains, but there are side-cuttings along roads, streets and lanes, and in consequence of this drainage is very defective.

The general and fundamental sanitary defects are :—

(1) The unsatisfactory character of the water-supply;
(2) the absence of an effective system for the disposal of sewage.

Houses are also defective as regards drainage, and in consequence house waste water and foul water find their way into public streets and lanes and thus contaminate the sub-soil. There are a number of cess-pools, and these ought to be cleansed as often as possible. When epidemics occurred the District Medical and Sanitary Officer and his medical staff visited the effected places to render all assistance in their power, and to advise the people to observe simple rules of sanitation and to render medical aid. During my sanitary inspections of the town, I personally verified 779 cases of vaccination performed during the year, of these cases 90 per cent. were successful.

The following recommendations were made :—

That all drinking-water wells and tanks should be provided with watchmen to prevent the supply being defiled and all such wells to have masonry platforms and drains; removal of prickly-pear as much as possible; substitution of moveable (made of corrugated zinc sheets) for fixed masonry dust-bins; cattle to be housed away from dwelling houses. The surface of ground surrounding houses, huts, &c., should be frequently swept and so kept clean and free from nuisances; all holes or gaps in the ground where water is likely to collect in the rains and in consequence of which herbage quickly springs up ought to be filled up with earth; should there be much jungle or other vegetation around houses, huts, &c., it should be cleaned away; night-soil to be sold by auction. When there is no demand for sweepings and night-soil on the part of ryots, a garden outside the town might be found in which such could be utilized. A good deal of nuisance being committed on some streets, the police should rigorously enforce the conservancy clauses of the Police Act; councillors should exert themselves by systematically inspecting their wards as often as possible to see that their streets are

kept clean, and that the Sanitary Inspectors are up to their work. In respect to sewage, in the absence of complete system of drainage, it might be possible in certain places to construct small lengths of masonry drains which would enable the sewage of certain parts of the town to be discharged upon fields direct. Sufficiently suitable drains, better than none at all, can be made by laying upon puddled clay country-made half-tiled pipes, that can be made cheaply by any village potter; where it can be afforded these tiles can be made to secure fair efficiency by dipping them into boiling tar and pitch before laying, and by uniting the ends by portland cement. The town ought not to contain unhealthy localities; houses ought not to be permitted to be built on damp, unhealthy sites; buildings ought not to be constructed so as to impede the circulation of air and incidence of light.

The municipality effected as much improvement in sanitation generally as the funds at their disposal enable them, regarding the various recommendations made by Government in previous orders and by the District Medical and Sanitary Officer during the year. The sanitary staff was increased as recommended by the Sanitary Commissioner; a silchar cinerator was put up; Rs. 2,000 spent on water-supply, 35 extra dust-bins were constructed and 40 extra lamps were put up.

IV. Vaccination.—The subjoined table compares the vaccination work for two years:—

—	1893–94.						1894–95.					
	Total.	Successful.	Unsuccessful.	Unknown.	Percentage of grant.	Vaccination under one year.	Total.	Successful.	Unsuccessful.	Unknown.	Percentage of grant.	Vaccination under one year.
By Medical Subordinates ..	6	..	6	..	..	6	112	89	14	9	79·46	20
By Municipal Vaccinators ..	2,461	2,332	129	..	94·75	74	2,808	2,703	105	..	96·26	1,024
Total ..	2,467	2,332	135	..	..	80	2,920	2,792	119	9	..	1,044

These good results, both in the number vaccinated and the quality of work turned out, show that care has been taken, and interest evinced in vaccination. The total number of births registered was 1,014 and the operation on children under one year of age was 1,044, of which 1,043 were successfully protected during the year. During my sanitary inspections, I personally verified 779 cases of vaccination performed during the year and of these cases 90 per cent. were successful.

V. Hospitals—(*a*) *Nature and sufficiency of accommodation.*—Two hospitals were maintained by the municipality against one in 1893–94. The new women and children's hospital was opened on 3rd July 1894. The main hospital gives accommodation for 24 male in-patients, and the women and children's hospital gives accommodation for 10 female in-patients, making a total of 34 beds against 24 of last year.

(*b*) *State of repair of buildings.*—The main hospital building is in a dirty condition and needs urgent repairs. It is one of the poorest of the district hospitals I have ever seen. I believe the municipality intend thoroughly to repair this building which sadly needs looking into. The women and children's hospital is held in a rented building in the heart of the town and this building is in a fairly good condition. The municipality, I believe, intend to build a new hospital. I hope this will be done soon, as I am sure the work of the women and children's hospital is much appreciated in the town.

(*c*) *State of Repair of Furniture, &c.*—Furniture and fittings are fairly good and sufficient. New bedding and clothing must be supplied to the women and children's hospital.

(*d*) *Number of patients treated as compared with four previous years.*—In the subjoined tabular statement is exhibited the total sick treated in both institutions compared with that of the previous four years:—

—	1890–91.		1891–92.		1892–93.		1893–94.		1894–95.	
	Total treated.	Average daily sick.	Total treated.	Average daily sick.	Total treated.	Average daily sick.	Total treated.	Average daily sick.	Total treated.	Average daily sick.
In-patients	156	12·30	261	18·97	224	16·42	238	14·32	285	19·29
Out-patients	18,149	118·39	19,969	130·51	20,727	135·62	16,251	105·50	25,297	138·28
Total ..	18,305	130·69	20,230	149·48	20,951	152·04	16,489	119·82	25,582	157·57

It is satisfactory to note that the total number of in and out patients treated shows an increase of over 9,000 compared with that of last year; and is the largest number treated in Masulipatam from the foundation of the main hospital. This increase testifies to the growth of the popularity of the institutions and an increasing appreciation of European methods of treatment.

(*e*) *Mortality and actual causes of it.*—The deaths are greatly due to the practice of sending sick persons for treatment after they are given over by the native quacks as a last resource. They are further swelled by miserable pilgrims from the north of India, who are picked up on the roads in the last stage of exhaustion and brought in either by the police or by the village munsiff only to die. These pilgrims travel on half-starved, often chronically affected with fever, diarrhœa and dysentery, &c. Notwithstanding this, the mortality of those who were treated in both institutions is 3·5 per cent. of total treated.

(*f*) *Operations and results.*—The following statement shows the number of operations performed compared with that of four previous years:—

Operations.	1890–91.	1891–92.	1892–93.	1893–94.	1894–95.
Major	8	11	20	58	133
Minor	731	756	870	628	884
Total ..	739	767	890	686	1,017

The results of the operations performed in 1894–95 have been very good and show a mortality of 3 per cent. for major operations and 6 per cent. for minor operations.

(*g*) *Establishment whether sufficient and efficient.*—I should like to have an extra hospital assistant attached to the main hospital; at present I have only one; and considering the very large number of out-patients that resort to the hospital and that frequently aid is wanted at nights the services of a second man is much needed. An extra ward servant is also needed. The establishment of the women and children's hospital is sufficient for the present. The establishment of both institutions is, on the whole, efficient.

(*h*) *Midwives—work actually done.*—In the women and children's hospital there are two qualified midwives attached—Eurasian midwife Mrs. Vieyra and one native midwife. In connection with the women and children's hospital there are two caste and gosha wards attached. A room is also set apart for lying-in cases. Labour cases are attended either as in-patients in the women and children's hospital or at the houses of patients.

The subjoined table shows the number of labour cases attended during the past five years:—

—	1890–91.	1891–92.	1892–93.	1893–94.	1894–95.
Cases of labour ..	199	215	229	126	179

(*i*) *If dispensaries for Caste and Gosha women who cannot or will not attend the ordinary dispensaries have been working, a special note should be added on their working.*—I have great pleasure in submitting the report sent in by the female Apothecary Miss Jane Claridge. Her work is very much appreciated in the town. And I am fully confident that better results will be shown in future. I cannot too strongly urge the necessity of a new building being constructed for the women and children's hospital. A large number of ladies and gentlemen, Europeans and Natives, have subscribed towards this very laudable object. I am given to understand that both the Kistna District Board and the Masulipatam Municipal Board are ready to subscribe handsomely towards this object. I hope to see a good building constructed—an example I hope that will be followed by every district in the Madras Presidency.

(*Miss Claridge's Report.*)

Annual Concise report for 1894–95 of the women and children's hospital, Masulipatam.

(1) *Public Health.*—Written by the District Medical and Sanitary officer, Kistna.

(2) *Vital Statistics.*—Written by the District Medical and Sanitary officer, Kistna.

(3) *Sanitation.*—Written by the District Medical and Sanitary officer, Kistna.

(4) *Vaccination.*—Written by the District Medical and Sanitary officer, Kistna.

(5) *Hospital*—(*a*) *Nature and sufficiency of accommodation.*—As a tentative measure the hospital is held in a hired building in the heart of the town. It is hoped the municipality will build a new hospital. The hospital affords accommodation for ten patients.

(*b*) *State of repair of building.*—The present building is in a fairly good state of repair.

(*c*) *State of repair of furniture.*—The furniture of the hospital is sufficient and in good order. Hospital bedding and clothing is not sufficient.

(*d*) *Number of patients treated as compared with four previous years.*—This hospital was opened on 3rd July 1894. Since this date there have been 97 in-patients and 4,808 out-patients treated with a daily average attendance of in-patients 5·16, out-patients 34·72.

(*e*) *Mortality and actual causes of it.*—The mortality has been very small, the actual causes being the very chronic cases and cases in a moribund state being admitted as in-patients.

(*f*) *Operations and results.*—During the period under review, 43 major and 132 minor operations were performed with good results. Obstetric cases contributed the large number of major operations.

(*g*) *Establishment whether sufficient and efficient.*—For the present the establishment is sufficient and, on the whole, efficient.

(*h*) *Midwives—work actually done.*—During the year under review, I conducted 44 cases of labour. Eurasian midwife Mrs. Vieyra, 78 cases and native midwife Varadayi, 57 cases, making in all 179 against 126 cases attended last year.

(*i*) *If dispensaries for Caste and Gosha women who cannot or will not attend the ordinary dispensaries have been working, a special note should be added on their working.*—It is hoped that caste and gosha women will attend the hospital more freely. During the period under review we have had many caste and gosha women coming to the hospital for treatment, particularly so as in-patients.

(*j*) *General remarks.*—I am put in sole independent charge of the hospital. Surgeon-Major W. F. Thomas, District Medical and Sanitary officer, Kistna, inspects my hospital frequently. Several ladies of the station have also visited this institution. The general tenor of remarks is good.

(Signed) J. CLARIDGE.

General remarks.—Assistant Surgeon T. R. Lakshmana Perumal Pillai was in medical charge from 1st to 11th April 1894; after this date I was appointed Acting District Medical and Sanitary officer, Kistna. The continued increase in the number of patients seeking medical aid, and the starting of the new women and children's hospital necessitated a larger outlay on medicines, hospital bedding, clothing and new instruments. The diet charges have been much reduced.

Masulipatam,
29*th April* 1895.

(Signed) W. F. THOMAS, Surgn.-Major,
Ag. Dist. Medl. and Sany. Officer, Kistna.

Forwarded to the Chairman, Municipal Council, Masulipatam.

Masulipatam,
29*th April* 1895.

(Signed) W. F. THOMAS, Surgn.-Major,
Ag. Dist. Medl. and Sany. Officer, Kistna.

C. No. 870-Eng.

Forwarded to the Collector.

I have seen all the roads within the municipality and under its control. They are in a far more satisfactory condition now. Much attention has been paid to all the roads, and places where there were defects, have been properly mended.

(Signed) C. KRISHNASWAMI NAYUDU,
Deputy Collector.

Submitted to the Chief Secretary to Government, Local and Municipal Department, Madras.

2. The report is disfigured by faults of style attributable probably to the chairman's absence at the time it was prepared.

3. The chairman is to be congratulated on the steady improvement in municipal administration. The ward system has been recently introduced, and it is to be hoped that the individual councillors will show greater interest now in their public duties. The fall in average attendance at the council meetings does not augur well.

4. The condition of the roads is much improved. Sanitation is also better. But the very small amount of night-soil brought daily to the Weld Forest Reserve shows either that the scavengers do not clean the latrines, or that the public do not use them. There is little doubt that the latter is the chief reason and matters are not likely to alter so long as there are so many open spaces, gardens and compounds within easy reach of every part of the town. The Bench Magistrates do not improve matters by punishing nuisance cases with "nominal fines" as the chairman says.

5. The town's most urgent wants are improved drainage and improved water-supply.

Masulipatam,
25*th June* 1895.

(Signed) J. N. ATKINSON,
Collector.

Order—No. 1661 M., Local and Municipal, dated 16th October 1895.

The receipts and charges of the Masulipatam Municipality for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94:—

—	Actuals, 1893–94.	Budget estimate, 1894–95.	Revised estimate, 1894–95.	Actuals, 1894–95.

2. The municipal council held twenty-four meetings against thirty in the previous year. The average attendance of the non-official members improved and was good, but that of the officials continued to be very poor. The Collector should inform the latter that the Government requires them to be more regular in their attendance in future, and should report to Government the names of those who neglect their duty in this respect. From paragraph 2 of the chairman's report it appears that six out of the twenty members on the council on the 31st March 1895 were officials. As this proportion is in excess of the limit fixed in section 11 of the District Municipalities Act, the Collector should call upon one of the official members to resign and recommend a non-official in his place.

3. *Receipts* (1).—Owing, apparently, to more careful assessment, there was an increase of Rs. 483 in the net current demand of the tax on arts and professions, but the advance would have been still greater if the council had not, for reasons which have been left unexplained, remitted as much as 9 per cent. of the original assessment. In the review of the previous year's report, the Government called for an explanation of the circumstances under which similar remissions were granted in 1893–94. This explanation does not appear to have yet been furnished. The chairman is requested to submit it at once, and to explain the delay. The registers of the tax on buildings were revised during the year under review, with the result that there was an increase of Rs. 2,434 in the net current demand under this head and of Rs. 488 under the water-tax. With reference to the Chairman's remarks at the end of paragraph 8 of his report the Council should consider whether it is not desirable to move Government to exempt, from the water-tax under section 75 (2) of the Act, those parts of the town to which the supply does not at present extend. The demand under the tax on lands remained almost stationary.

(2) The current collections of the arts and water-taxes, though slightly better than in the previous year, were still not satisfactory, the arrears amounting to nearly 17 per cent. under the former and 22 per cent. under the latter head. Under the tax on lands they were very poor, only about 33 per cent. of the demand having been realized. The current collections of house-tax declined slightly and were indifferent. The arrear realizations under all these heads were very backward. Although collections were in this unsatisfactory state, and notwithstanding the instructions of Government in paragraph 3 (2) of G.O., No. 1356 M., dated 1st October 1894, there was a decline in the number of warrants issued during the year and an increase in the warrants remaining unexecuted at its close, which were no less than 62 per cent. of the total number under disposal. This is discreditable to the municipal executive and the chairman should see that it does not recur in the current year. No improvement can be expected in the collections unless processes are issued as soon as arrears accrue and are then promptly executed. With reference to the remarks in paragraph 24 of his report, the attention of the chairman is drawn to G.O., No. 145 M., dated 10th February 1894.

(3) There was an increase in the revenue from the taxes on vehicles, animals and carts and from license fees, markets and slaughter-houses, but, for reasons explained in paragraph 12 of the chairman's report, the income from tolls declined. No revenue was realized from the sale of sweepings, as they were burnt in a cinerator, but it is observed that steps are being taken to create a demand for the night-soil. In this connection the attention of the municipal council will be drawn to the Collector's remarks in paragraph 4 of his endorsement. Under section 119 of the District Municipalities Act, the sanction of Government is necessary for the exemption from payment of fees of the pupils in the municipal schools referred to in paragraph 20 of the chairman's report. An application for this purpose should, therefore, be submitted through the Director of Public Instruction. The fall in the receipts from fines is to be regretted.

(4) The private scavenging system made no material progress during the year. The number of houses served rose from 312 to 331, but this still represents only about one-third of the total number of private latrines in the town, and the system was again worked at a heavy loss to the council. The chairman reports that the service is very unpopular and that his efforts to make it self-supporting have not

been successful, but the obstacles in the way of its extension have been overcome in other towns, and there appears to be no reason why they should be insurmountable in Masulipatam. The people should be made to understand, by the systematic prosecution of persons who fail to keep their premises clean, that the municipal council cannot, in the interests of the public health and convenience, tolerate any infringement of the sanitary provisions of the law. The chairman will report the action which the municipal council proposes to take on these remarks.

4. *Expenditure*—(1) *Public Works.*—No new work of any importance was undertaken during the year. The total outlay on communications amounted to Rs. 7,901 or 89·7 per cent. of the net municipal revenue from tolls, and the condition of the town roads is reported by the Collector to have much improved.

(2) *Education.*—The net expenditure on education was Rs. 4,996 or 14·2 per cent. of the receipts from taxation. Of this sum, all but Rs. 1,664 was spent on primary education. At the commencement of the year, there were five municipal primary schools on the salary-result system, which were mainly intended for Muhammadans and Panchamas, and to these was added another school for the benefit of the Gilakaladindi fishermen. The attendance at the old schools taken together showed a slight improvement, while at the new one it was fair. In the departmental examinations, the schools appear to have done fairly well on the whole. The council also aided two secondary schools with salary grants, and two secondary and twenty-three primary schools with result grants. The attendance at the aided schools declined considerably, but the results of the grant examinations were fair. It is to be regretted, however, that nearly 26 per cent. of the allotment for result grants was allowed to lapse and that the number of boys under instruction in the municipal and aided institutions again fell from 67·0 to 58·8 per cent. of the male population of school-going age. The proportion of unpassed teachers in the aided schools was still high. Notwithstanding the remarks of Government in paragraph 4 (2) of G.O., No. 1356 M., dated 1st October 1894, the subject of education does not appear to have received sufficient attention.

(3) *Medical Relief.*—There was a decline in the number of in-patients treated in the municipal hospital, but the attendance of out-patients showed a marked advance, which is attributed by the District Surgeon to the growing popularity of the institution. The women and children's hospital, which was opened on the 3rd July 1894, gave relief to 97 in-patients and 4,808 out-patients. The council's attention is drawn to the District Surgeon's remarks regarding the hospital buildings, the want of an additional hospital assistant in the main hospital and of new bedding and clothing in the women and children's hospital. The female apothecary attached to the women and children's hospital and the two midwives employed by the council attended in all 179 cases of labour against 126 in 1893–94, but the Government considers that there is scope for further advance in this direction.

(4) *Vaccination and Vital Statistics.*—Both in quantity and quality, vaccination showed an improvement. Infantile vaccination also made marked progress, in consequence, probably, of the prosecutions instituted by the council for failure to have children vaccinated.

There was a decline in the number of births and deaths registered during the year and in view of the fact that the rates recorded were much below the normal, especially in the case of births, the Government cannot accept the District Surgeon's statement that vital statistics are carefully kept and that the returns are reliable. As already pointed out in the review of the previous year's report, this subject demands increased attention from the municipal council.

(5) *Sanitation.*—On conservancy a sum of Rs. 9,669 or 95·5 per cent. of the allotment and 19·3 per cent. of the current receipts was spent. It is to be regretted that the chairman's report again furnishes no information regarding the sanitary condition of the town, notwithstanding the direction contained in G.O., No. 1356 M., dated 1st October 1894, that any progress made in carrying out the orders of Government on this subject should be noticed in the Administration report for 1894–95. The inspection notes of the Deputy Sanitary Commissioner recorded in G.O.,

No. 671 M., dated 17th April 1895, show, however, that much remains to be done in this direction. The council should carry out his recommendations one after another as funds permit.

5. *General Remarks.*—The year closed with a balance of Rs. 2,645 or only 5·3 per cent. of the current receipts. Notwithstanding the remark in paragraph 5 of G.O., No. 1356 M., dated 1st October 1894, the sanctioned allotments were again exceeded in some cases. The excess expenditure will now be admitted in the accounts, but a separate application should invariably be submitted in future. The attention of the chairman is drawn to the Collector's remarks in paragraph 2 of his endorsement. The length of the District Surgeon's report, especially paragraphs I to III of it, might well have been reduced.

The administration of the municipality showed some little improvement, but cannot yet be considered satisfactory. The collection of taxes, private scavenging, education, the registration of vital statistics and sanitation demand increased attention.
