AUGUST 1895, No. 1, M., LOCAL AND MUNICIPAL.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :— D

From M.R.Ry. T. KOTHANDARAMA AIYAR Avargal, Chairman, Municipal Council, Máyavaram, to the Chief Secretary to Government (through the Sub-Collector of Tanjore), dated Máyavaram, 13th June 1895, No. 464.

I have the honour to submit my report on the working of the Máyavaram Municipality for the official year 1894–95, accompanied with the statements of receipts and charges prescribed by Government in its order, No. 2193 M., dated the 10th December 1891.

2. The budget estimate for the year under report was sanctioned by Government in its order, No. 416 M., dated the 31st March 1894, and modified by G.Os., dated the 18th August 1894, No. 1106 M., and 6th November 1894, Mis. No. 1641 M., and the revised estimate was passed in G.O., dated the 18th March 1895, No. 464 M.

3. The draft report was placed before the council at its meeting held on the 13th June 1895 and adopted. An extract from its proceedings is enclosed herewith.

CONSTITUTION OF THE COUNCIL.

4. The sanctioned maximum strength of the council is eighteen (five nominated and thirteen elected). At the beginning of the year the number on the rolls was fifteen while, at its close, the roll contained the maximum strength. The council, as it stood on the 31st March 1895, consisted of seventeen non-official members and one official member (the ex-officio councillor). All, except the ex-officio councillor, are natives.

5. *Nominations and Elections.*—The three (3) vacancies (one nominated and two elected) on the 31st March 1894 were filled up in the year (*vide* paragraph 4 of the last report). Besides the above vacancies, the seats of seven councillors (two nominated and five elected) fell vacant by efflux of time and they were all filled up within the year. The system of election by wards continued to prevail during the year. Three of the above five elected seats were actually contested, and their details appear in this office letters, dated 20th October 1894, No. 612, and 9th February 1895, No. 106. On the 19th October 1894 elections were held to fill up four vacancies (one in ward No. 2, one in ward No. 3, and two in ward No. 6). The contest was keen in wards Nos. II and VI. The number of electors that attended the poll of the former was 76 or 61·78 per cent. of the registered voters, while 67 out of 104 went to the poll of the latter ward. Again, on the 9th February 1895, an election was held to fill up a vacancy in ward No. II. There were four candidates, three of whom withdrew their candidature in favour of the fourth. Hence no poll was held on this occasion. The total number of registered voters for the year according to the franchise now in force was 637 or 2·6 per cent. of the population (23,765). Of this number 204 were eligible for election as councillors.

6. *Office of Chairman.*—M.R.Ry. T. A. Alaga Pillai Avargal, a non-official member, continued to act as Chairman up to the 31st October 1894, when the term of his councillorship expired, I also a non-official councillor, was elected as Chairman at the meeting held on the 23rd November 1894.

7. *Meetings of the Council.*—Twenty-seven meetings were actually held during the year besides three dissolved for want of quorum, the corresponding figures for the year previous being twenty and three, respectively. The average attendance at each meeting actually held was 8·5 including the four meetings attended by the ex-officio councillor, against nine in the previous year.

8. *Audit of Accounts.*—The accounts of the previous year were audited during the year and the audited figures have been adopted for the purpose of column 6 of statements I and II.

9. *Preparation of Registers.*—The registers of taxes on arts and buildings were revised as usual. The revision of the former tax resulted in a decrease of about Rs. 450 below the previous year's demand (Rs. 4,000), while there was a slight increase of Rs. 36 under house-tax. In regard to the land-tax, the previous year's assessment was adopted in full. The decrease under tax on arts seems to be due to the inactivity of the weaving manufacture as observed in paragraph 7 of the budget report embodied in G.O., dated the 18th March 1895, No. 464 M. The house and land tax assessments continued to be levied at $7\frac{1}{2}$ per cent. of the annual rent value which is the maximum rate permissible under the Act. The total number of buildings, subject to house-tax during the year, was 4,310 or 78·23 per cent. of the occupied and unoccupied houses, viz., 5,509 as per census of 1891. For this decrease —*vide* paragraph 6 of the annual report for 1890–91 :—

II.—Receipts.

10. The receipts under the several heads are compared in the following abstract with those of the previous year and the revised estimate :—

—	Actuals of 1894–95.	Actuals of 1893–94.	Revised estimate, 1894–95.

Fines under Municipal and other Acts	805 7 0	772 3 9	700 0 0
Grants and contributions	1,591 7 9	1,771 4 3	2,720 0 0
Miscellaneous	303 10 2	701 7 3	420 0 0
Advances recovered	525 0 0	10 0 0	....
Total, Receipts	39,455 5 3	31,011 12 8	36,710 0 0
Total, including balance	41,384 14 5	33,265 10 7	38,640 0 0

Compared with the actuals of the previous year and with the revised estimate of the year under report, the current receipts show an increase of Rs. 8,443–8–7 and Rs. 2,745–5–3, respectively, which appears mainly under taxes, sale-proceeds of lands, school-fees, income from markets and slaughter-house and 'advances,' while the expected income from grants and contributions fell during the year. The reasons for the variations are discussed below.

11 *Receipts from Taxation—Tax on Arts*—The arrear and current demand of this tax, after appeals had been decided, was Rs. 3,807. Of this sum, Rs. 3,579 was realized and Rs. 215 written off as irrecoverable. This leaves a small balance of Rs. 13 only at the close of the year, the whole of the arrear balance which remained at the commencement of the year having been adjusted mostly by collections and a little by writes-off. The number of persons assessed to this tax and the average incidence were 1,521 and Rs. 2–4–0 against 1,647 and Rs. 2–5–0, respectively, in the year previous, the small decrease in the incidence being due, as has been repeatedly urged to the continued depression of the weaving manufacture and to the absence of great sowcars liable to be taxed under the higher classes.

12. *Tax on Buildings.*—Out of Rs. 6,823–3–6, the current final demand, a sum of Rs. 6,760–14–9 was collected and Rs. 22–8–0 written off as irrecoverable, leaving a small balance of Rs. 39–12–9 at the close of the year. The arrear demand of Rs. 539–6–6 was reduced to a very small figure before the 31st March 1895 (Rs. 504–2–6 by collection and Rs. 32–4–0 by writes off). The remission granted by the council was almost *nil.* The number of houses taxed was 4,310 and the average incidence on them was Rs. 1–9–4. Unlike Tanjore and other large towns, this town cannot boast of magnificient buildings yielding high rents, and the storied houses are very few which is evidenced by the fact that, in spite of the vigorous attempts of the council to develop further this source of municipal revenue, 4,159 out of 4,310 houses taxed were assessed at sums not exceeding Rs. 5. The tax for the current year has been slightly raised in the Máyavaram division in conformity with the views of the council expressed in paragraph 8 of the last budget report.

13. *Tax on Lands.*— Out of a demand of Rs. 843–0–6, including arrears, Rs. 700–9–4 was collected against Rs. 600 expected in the revised estimate, Rs. 52–0–8 was written off, leaving a balance of Rs. 90–6–6. This tax was collected with considerable difficulty as in many cases, the proprietors of lands assessed were not easily ascertainable, the lands having changed many hands since last revision. The total extent of lands assessed during the year was $1,119\frac{1}{2}$ acres, or the same as in the previous year. With the exception of the small balances under the above three taxes, the arrear and current dues under all other items having a fixed demand have been adjusted in full before the close of the year. The balance under market rents, arrears, has since been adjusted. Pending the final decision of an appeal in the Tanjore District Court, the adjustment of the small balance under "licenses" and "rent of lands" is deferred.

14. *Taxes on vehicles, animals and carts.*—The collections under these taxes amount to Rs. 2,415–4–0, or Rs. 95–4–0 in excess of the sum entered in the revised estimate. This was due to the stricter supervision exercised as well to the further increase in the number of jatkas and ponies during the year.

15. *Tolls.*—The whole of the current and arrear demand amounting to Rs. 6,715 and Rs. 165–12–0, respectively, was collected within the year. The collection was leased out to a contractor and it was levied at three-fourths of the schedule rates in the eleven gates of this municipality. The current year's contract amount has come up to Rs. 7,000, or Rs. 100 more than the budget figure.

16. *Rent of lands and buildings.*—The income from rent of lands increased from Rs. 160 in the revised estimate to Rs. 207, which is nearly the full demand for the year. While preparing the revised estimate it was thought that a sum of Rs. 26 will have to be written off and Rs. 20 to remain uncollected. But the case was otherwise, as only a small sum of Rs. 1–8–0 had to be written off, and a trifling balance of As. 15 only was left uncollected at the close of the year. This result is due to great vigilance and vigour in the matter of collections. The amount realized under "rent of buildings" was Rs. 132–1–5, or Rs. 2–1–5 over the revised estimate.

17. *Avenues.*—The income from this source rose from Rs. 350 in the revised estimate to Rs. 565–2–6. The increase is due to the removal from road side of a number of tamarind trees at the request of the owners of houses injuriously affected by the growth of the trees. The removal was permitted upon the house-owners paying into the municipality ten years' estimated income from the trees ; and the trees so removed were sold to advantage in public auction.

18. *Sale of lands and buildings.*—The old travellers' bungalow and a portion of its compound ordered to be sold by Government in its order, dated the 22nd September 1893, Mis. No. 1279 M., was sold in public auction at the meeting held on the 10th January 1895 for Rs. 5,000, which is Rs. 2,000 in excess of the sum anticipated in the budget.

19. *Sale of street refuse.*—The sum realized under this head was Rs. 127–15–9 or Rs. 7–15–6 above the previous year's actuals, but Rs. 42–0–3 below the revised estimate. The council will try its best to improve the income from this source.

20. *Fees and fines from municipal schools*—Fees are levied in the municipal high and primary schools, Máyavaram, and in the Salary-results Primary school, Tiruvilandur. The income realized from these institutions come up to Rs. 9,656–6–6,

including fines, against Rs. 9,050 in the revised estimate and Rs. 7,936-14-3 of the actuals of 1893-94. While preparing the revised estimate, the council fixed Rupees 9,550 as the probable income in consideration of the large admissions then expected in the High and Primary schools, Máyavaram. But the amount so fixed was reduced by the Director to Rs. 9,050. For the reasons explained in paragraph 19 of the budget report of the year under review, no fees are levied in the Saliya and Muhammadan schools, Kornad, which are intended for the backward classes. However, at the suggestion of the Assistant Inspector of Schools, the council has recently resolved to levy fees from Hindoo boys attending the Muhammadan school. To further the cause of female education, no fees are, as usual, levied in the Municipal Girl's school, Máyavaram.

21. *Sale of Medicines.*—The sum realized under this head was Rs. 87-13-6 or Rs. 12-2-6 below the revised estimate. This is a fluctuating item.

22. *Income from markets.*—There are two markets in the town—one at Máyavaram for the sale of vegetable and the other a private market at Kornad for the sale of fish. The former, a municipal market, consists of a large tiled building divided into ten bazaars with a large shed on masonry pillars in front thereof. There are also two houses and five bazaars adjoining the above market. Agreeably to the suggestion of the Sanitary Commissioner, the council is making arrangements to construct a fish market of their own and steps are being taken to purchase a suitable site. The current demand under this head amounted to Rs. 589. The whole of this sum, together with Rs. 120-8-0 out of the arrear demand of Rs. 231-8-0, was collected within the year; Rs. 40 of the arrear balance was since collected in the current year, and the remainder remitted by the council in consideration of some loss sustained by the contractor of 1891-92, when the vegetable market could not be conveniently located within the market compound owing to the construction of market buildings that year. The lease for the current year fetched a large sum.

23. *Income from Slaughter-house.*—The municipality owns a slaughter-house at Kornad which is now a completely tiled building, and it was leased out to a contractor for Rs. 300 against Rs. 215 in the year previous. The whole of this demand was collected within the year. The income from this source is likely to develop further, and the contract amount for the current year has come up to Rs. 340 owing to the fee levied for each animal slaughtered having been raised from pies 9 to pies 12.

24. *License Fees.*—A sum of Rs. 680-10-6 was realized, which is almost the same as in the year previous and Rs. 60-10-6 over the revised estimate.

25. *Fines under Municipal and other Acts.*—The income under this head for 1894-95 rose from Rs. 772-3-9 in the previous year to Rs. 805-7-0. This is a fluctuating item.

26. *Contribution from Government.*—During the year under report Rs. 991-7-9 only was received as contribution from Government as detailed below, while Rs. 2,000 was taken credit in the revised estimate :—

	Rs.	A.	P.
Salary grants for the high school	618	2	10
Results grants for the girls' school	212	15	0
Conductress' grant for the girls' school	26	5	3
Rent grant for the girls' school	25	10	8
Furniture grant for the girls' school	25	14	0
Grant on behalf of common gymnast	82	8	0
Total	991	7	9

An application was made for the payment of Rs. 930, the same being the balance of building grant claimed by the council from Provincial funds, as also for the increased grants for which some of the teachers are already eligible, but the Director of Public Instruction declined to grant them on the score of want of funds, although he allowed credit being taken to the extent of the amount applied for by the council (*vide* paragraph 2 of his letter embodied in G.O., dated the 31st March 1894, No. 416-M.

27. *Miscellaneous.*—The noteworthy item under this head is the private scavenging service. A sum of Rs. 252-12-0 was realized from this source against Rs. 280 in the revised estimate and Rs. 210-15-0 of the actuals of the previous year. This revenue is expected to increase in the current year, as vigorous measures have been adopted by the council to bring a large number of houses under this system, and as the rates for the service have been doubled with effect from 1st April 1895.

28. *Advances recovered.*—The sum of Rs. 525 entered under this head was the amount adjusted during the year out of the arrear advance, which remained unadjusted at the commencement of the year. Of the above sum Rs. 5-0-7 was refunded in cash and the remainder was adjusted by works.

III.—Expenditure.

29. The following abstract shows the expenditure under the several heads as compared with the figures of the previous year, and with the revised estimate for 1894-95 :—

—	Actuals, 1894-95.	Actuals, 1893-94.	Revised estimate, 1894-95.
	Rs. A. P.	Rs. A. P.	Rs. A. P.

Advances	610 0 0	530 0 0	90 0 0
Total, Expenditure	33,438 0 7	31,336 1 5	35,860 0 0
Closing Balance	7,946 13 10	1,929 9 2	2,780 0 0
Total	41,384 14 5	33,265 10 7	38,640 0 0

The total charges exceeded those of the previous year by Rs. 2,101-15-2 and was below the revised estimate by Rs. 2,421-15-5, the increase over the actuals of the previous year occurring under all grants except grant I, and the decrease below the revised estimate occurring chiefly under grant I.

30. *Grant I, Public Works.*—The total outlay on public works amounted to Rs. 5,466–10–0, against the revised estimate of Rs. 8,770 and actuals of Rs. 5,630–6–6. It was equivalent to 14 per cent. of the receipts of the year and 16 per cent. of the entire expenditure. The decrease, as compared with the revised estimate, was due mainly to the non-utilization of the whole amount provided for the construction of the new travellers' bungalow and for the extension of the High school building.

31. *Communications.*—The expenditure on roads was Rs. 2,914–1–10 or 64 per cent. of the net revenue from tolls after deducting the expenditure on the repair of toll-gates and the Local Fund share, against the revised estimate of Rs. 2,590 and actuals of 1893–94, Rs. 2,386–7–8. Of this, a sum of Rs. 314–10–9 was spent on new works and Rs. 2,599–7–1 on repairs against Rs. 258–3–9 and Rs. 2,128–3–11, respectively, in the previous year. The total extent of the roads and streets maintained by the municipality during the year under report was miles 30, furlongs 6, yards 190, of which miles 2, furlongs 3 were gravelled and miles 28, furlongs 3, yards 190 unmetalled. The length of the roads and streets metalled and unmetalled, under the control of the municipality was the same as in the previous year, viz., miles 34, furlongs 6, yards 150. The portion of road No. 2 from Kornad sign post up to small bazaar street in the west, a distance of about 2 furlongs, was thoroughly remetalled. The level of some streets was raised. Almost all the roads and streets were thoroughly repaired by sectioning. With the exception of a portion of the gravel road which has to be remetalled this year, all the other roads are in a fairly satisfactory condition.

32. *Buildings.*—The outlay under this head was Rs. 1,147–2–9 under new works and Rs. 106–5–9 under repairs, making a total of Rs. 1,253–8–6, against Rs. 2,420–5–1 in 1893–94 and against Rs. 4,800 in the revised estimate. The decrease below the revised estimate is explained in paragraph 30 *supra*.

During the year under review, 12 tatty latrines were constructed, the market shed was renewed, a new cholera shed was built in the hospital compound, the thatched shed in front of the hospital main building and the thatched portion of the municipal slaughter-house were converted into tiled ones, and a doorway was constructed and iron doors were put up in front of the vegetable market building. Owing to some difference of opinion in respect to the plans and estimate, the two works, viz., the construction of the new travellers' bungalow and the extension of the High School building were not taken on hand, although a portion of the materials required for the same has been purchased. The Superintending Engineer has to be addressed again on the subject.

33. *Water-supply.*—The total expenditure on water-supply amounted to Rupees 906–0–7 against Rs. 457–7–10 in 1893–94; and Rs. 990 in the revised estimate. Of this, a sum of Rs. 479–4–3 was spent on new works, in sinking four new wells and in the construction of platforms for five municipal wells and Rs. 426–12–4 on repairs, Rs. 375–14–7 of the latter item was the pay of six tank watchmen and of the temporary coolies employed for digging wells and springs in the Cauvery during the hot season and the remainder was expended in effecting sundry repairs to the flight of steps on the south bank of Vellalarkoil tank, and to the water-pump and water-cart. The decrease below the revised estimate under establishment is due to fines and stoppages.

34. *Establishment.*—As in the previous year, an overseer on Rs. 25 and a maistry on Rs. 6 per mensem were continued for the supervision of all the public works, and the cost of the establishment during the year was Rs. 371.

35. *Grant II, Education.*—The total outlay on education, excluding the expenditure on school buildings (Rs. 360–2–4 shown under Grant I) amounted to Rupees 12,228–7–11 against Rs. 12,050 in the revised estimate, and Rs. 11,026–1–9, the actuals of 1893–94, the increase occurring under "Salary" and Salary-results schools and the decrease under "Results grants."

36. *Training Schools.*—A sum of Rs. 30 provided in the budget was paid to the inspecting schoolmaster, the same being the remuneration proposed for training the payal school teachers to pass the Primary School examination. Nine out of 11 teachers trained under him have passed the examination.

37. *Municipal Schools on Salary system.*—The two schools, viz., the High and the Upper Primary schools, Máyavaram, continued to be maintained under this system during the year. The expenditure under this head amounted to Rs. 9,371–2–11 under establishment and contingencies against Rs. 9,050 in the revised estimate. The increase which occurs under contingencies was caused by the purchase of glass almyrahs and by the making of benches with backs for the use of the two schools.

38. *Municipal Schools on the Salary-result system.*—The Lower Secondary Girls' school, Máyavaram, and the Upper Primary Boys' school, Tiruvilandur, the Muhammadan and Saliya schools at Kornad were maintained under this system at a cost of Rs. 989–4–0 under fixed payments, Rs. 542–3–3 under results grants and Rupees 366–10–2 under contingencies, the corresponding figures of the revised estimate being Rs. 990, Rs. 430 and Rs. 220 respectively. Except the Muhammadan school, all the three remaining schools earned much more than was anticipated in the budget; the teachers of the boys' schools were paid the full grants earned, while those of the girls school, 62½ per cent. of the grant received from Provincial funds in view to reduce the net cost. These schools were supplied with a few benches with backs, black boards, &c.

39. *Results Grants.*—A sum of Rs. 480–4–0 was paid to 15 schools as per certifying memoranda received, although Rs. 900 was provided in the budget. The number of schools registered for aid during the year under report was 24 (20 days' schools and 4 night schools), including 2 schools supplementally recommended against 26 in the year previous. Of the above 24 schools, 22 schools were examined for grants, two of the registered schools having been amalgamated and converted into a salary-results school for Saliyas. Fifteen of the schools examined earned grants, the remaining seven schools having failed to secure grants owing to want of required attendance, &c. Three hundred and thirty-nine pupils were examined for grants in the fifteen aided schools, three being for pariahs, and 242 of them passed, 28 having secured merit grants, the corresponding figures for the year previous being 363, 291 and 209, respectively. The decrease in the number passed for merit is due probably to the raising of the minimum mark required for the purpose. When compared with the results of the previous year, the year under review shows considerable decline in the number of aided schools, and the scholars examined and passed for grants. This is due mainly to the fact that so many as seven schools became ineligible for grant, owing to the strict enforcement of rules regarding average attendance and partly to the conversion of two aided schools into a salary-result school as already observed.

40. *Inspection.*—During the year under report an inspecting schoolmaster on Rs. 17 was continued at a cost of Rs. 204 on account of salary, and Rs. 19–12–3 for contingencies against Rs. 200 and Rs. 20 in the revised estimate. The work done by this officer is reported to be fair.

41. *Miscellaneous.*—A sum of Rs. 225–3–4 was spent under this head against Rs. 210 in the revised estimate. Of the above sum, Rs. 182–15–0 was the salary and contingencies of the common gymnast, and Rs. 32–11–4 of the balance was the cost of three benches with backs and two black-boards with stands supplied to two of the results schools. The sum of Rs. 9–9–0 appearing under "other items" comprises the yearly subscription of Rs. 5 paid as usual to the "Physical Training" and "Field Games" Association, Madras, and Rs. 4–9–0 paid for printing the annual combined list of the results schools.

42. *Progress of Education.*—The statements showing the statistics and progress of education in the municipality during the year under review, as furnished by the Assistant Inspector of Schools and the Sub-Assistant Inspector of Girls' Schools, are submitted herewith. From the above statements it will be observed that the number of schools (Government, Board, Aided, Unaided and Indigenous) rose from 46 (of which four were girls' schools with 266 girls), on the 31st March 1894 to 49 (of which four were girls' schools with 275 girls) on the corresponding date of the year under

report; and the pupils from 1,788 boys and 278 girls to 1,988 boys and 330 girls, respectively, showing thus an increase of three schools with 200 boys and 52 girls in all the boys and girls' schools together.

The above increase of pupils occurs in all the municipal schools and the causes for the decrease in the number of aided schools and pupils are explained in paragraph 39 *supra*, which have contributed to the large increase under unaided schools. The proportion of boys under instruction in the various classes of schools to the children of school-going age (calculated at 15 per cent. of the whole population as per census of 1891) rose from 100·3 in 1893–94 to 114·9 in 1894–95. There is a similar increase in the percentage of girls under instruction.

43. *Teaching Staff.*—The number of teachers employed in all the boys' schools rose from 76 in 1893–94 to 85 in the year under report, of whom 13 hold trained teachers' certificates, 9 untrained teachers' certificates, 32 general education certificates and the remaining 31 were unpassed men, the corresponding figures for the previous year being 9, 7, 21 and 39. The number of qualified teachers shows an increase, while the number of unpassed men has diminished, a major portion of this unpassed number being contributed by the unaided and indigenous schools. Out of thirteen teachers employed in the girls' schools only three (one male and two females) hold untrained teachers' certificates, five general education certificates and the rest are unpassed. The pay of one unpassed mistress in the municipal girls' school has been reduced for her failure to qualify herself under the educational rules in view to find funds for entertaining an additional qualified mistress.

44. *Results of Examination.*—Twenty-two pupils that appeared for the Matriculation examination from the Municipal High school, Máyavaram, of whom 7 passed against 6 out of 21 in the year previous. In the Lower Secondary examination 18 passed out of 34 that appeared For the Primary school examination, 62 pupils were presented from all the municipal schools, of whom 52 passed. With the exception of the Muhammadan school which passed no pupils but of 3 presented, all the other municipal schools acquitted themselves very satisfactorily in the public examinations.

45. *Grant III, Sanitation, &c.* The expenditure under this grant amounted to Rs. 9,776–9–10 against Rs. 9,890 of the revised estimate and Rs. 9,467–11–5 the actuals of 1893–94, the increase occurring under "Hospitals."

46. *Hospitals* —A sum of Rs. 2,770–0–6 was spent in maintaining the Webster hospital, Máyavaram, against Rs. 2,700 of the revised estimate and Rs. 2,831–1–1 of the actuals of the previous year. The outlay on establishment was Rs. 1,819–2–7 which is the same as the revised estimate. The sum of Rs. 422–8–6 under "Medicines" comprises Rs. 146–12–6, the value of bazaar medicines and Rs. 275–12–0, the value of European medicines, instruments, &c. The increase under "diet of patients" seems to be due to a corresponding increase in the number of in-patients.

47. From the accompanying annual report of the civil apothecary, it will be seen that the total number of in and out patients treated in the hospital during the year under review was 194 and 8,810 against 186 and 7,718, respectively, in the previous year. Nine cases of the former and two of the latter proved fatal against 11 and 8, respectively, in the previous year. The causes of the above deaths are explained by the apothecary in paragraph 5 (*e*) of his report. The average attendance of out-patients rose from 46·71 to 53·62; but that of the in-patients remained almost stationary. The midwife attached to the Webster hospital attended 114 labour cases or 36 less than in the previous year. She continued to draw As. 8 for every case in excess of the prescribed minimum of ten cases per mensem. She exceeded the minimum by nine cases in three months for which she was allowed Rs. 4–8–0, in addition to her fixed pay, viz., Rs. 8 per mensem. The proposals of the medical authorities to construct a cholera shed in the hospital compound and put up a tiled shed in lieu of the thatched shed in front of the main building for the convenience of out-patients have been carried out. In the current year provision is made for the construction of a new dead-house in a different locality as proposed by the District

Medical and Sanitary officer. As this is a charge on Government funds, the necessary application will be submitted ere long. The proposal to construct a separate ward for the use of high caste in-patients will be considered in the next budget and that to construct a building in the hospital compound for the apothecary's quarters will be carried out when funds may be available. The supply of new furniture referred to in paragraph 5 (*c*) of the apothecary's report will be made on the receipt of the necessary indent.

48. *Contributions.*—A sum of Rs. 100 was paid to Government for contribution to sanitary inspection and Rs. 169–6–6 to local funds towards the maintenance of the Tanjore District Medical school, District Surgeon's establishment, and reserve medical staff.

49. *Vaccination.*—The expenditure on vaccination amounted to Rs. 318–13–11, which is Rs. 11–2–1 below the revised estimate. The decrease is under contingencies which was due to the failure of calf lymph and to the consequent cessation of the vaccine work for a few days. The vaccination was conducted on the compulsory system and the operation was performed mostly from calf-to-arm. The total number of operations performed by the municipal vaccinator and the civil apothecary was 926, of which 920 cases were successful. The high percentage of success was probably due to the use of lymph fresh from the calf and also to careful operations. Of the above number, the vaccinator successfully vaccinated 876 cases and the apothecary 44, the corresponding figures for the previous year being 750 and 56, respectively. Of the total number of cases vaccinated, 819 were by calf-to-arm vaccination and 107 by glycerine paste. The number of infants successfully operated upon was 687 by the vaccinator and 25 by the civil apothecary. The civil apothecary who supervises the vaccinator's work reports that he has verified more than 63 per cent. of the cases operated upon by the vaccinator; 84 cases were reported to the Magistrate during the year under section 138 of the Act, and in no case was a fine levied, as, with the exception of a few, the others got their children vaccinated before actual prosecutions. The cost of successfully vaccinating each case during the year came up to Annas 5–10 against As. 5–9 in the previous year, the increase having been caused by the entertainment of a calf-peon during the year.

50. *Registration of Births and Deaths.*—A sum of Rs. 155–5–4 was spent under this head against Rs. 152–4–0 the actuals of previous year. The total number of births and deaths registered in the town during the year was 688 and 649 against 843 and 808, respectively, in the previous year. In spite of the strict supervision exercised, there has been a fall in the number of births registered, and the number of deaths has diminised by 159. There were 9 cases of cholera, 7 of small-pox, 152 of fever and 58 from bowel complaints and 423 from other causes. The corresponding figures for the previous year being 106, 8, 160, 128 and 406, respectively. There were 31 still-born cases which are not included in the above figures. The few cases of cholera were brought about by persons who halted in the town after visiting Tiruvannámalai and other cholera stricken places. While there were cases of cholera in the outlying villages, this town was almost free from it.

The total number of cases prosecuted for failure to give information regarding births and deaths was 10 and 9, respectively, against 28 on the whole in the previous year. And the amount of fines levied in the above nineteen cases was Rs. 7–14–0.

51. *Conservancy.*—The expenditure under this head was Rs. 6,262–15–7 against Rs. 6,430 of the revised estimate. The decrease under the conservancy establishment and "hire of carts" was due to fines and stoppages, as well as to the non-utilization of the provision for the purchase of sewage cart. The establishment consisted of three nuisance inspectors, five peons, sixteen sweepers, six road cleaning toties and twelve private scavenging toties which shows an increase of one sweeper one street toty and three private scavenging toties over those in the previous year.

52. *Grant IV, Lighting, &c.*—The total outlay under this grant amounted to Rs. 2,281–10–11 or Rs. 211–10–11 in excess of the revised estimate. The increase is mainly under "lighting" and "other charges."

53. *Lighting.*—A sum of Rs. 1,560–7–0 was spent under this head against Rs. 1,440 in the revised estimate. The increase under contingencies was caused by the purchase of a large number of big chimneys and reservoirs in lieu of the small ones. The lighting work was performed departmentally as in the previous year by thirteen machalchies supervised by a Superintendent. The lamps were lighted according to the phases of the moon for at least seventeen days in a month The number of lamps lighted during the year was, as in 1893–94, 227, of which 129 were on iron posts, 95 on stone posts, 2 on masonry pillars and one, a bracket fixed to a wall.

54. *Avenues.*—The sum spent under this head was Rs. 310–13–8, while the figure in the revised estimate was Rs. 340. The decrease which occurs under "contingencies" was caused by the non-utilization within the year, of a portion of the sum set apart for the plantation of cocoa plants, as the season continued to be unfavourable for such plantation.

55. *Other Charges.*—Out of Rs. 398–8–9 spent under this head, Rs. 19–15–6 was incurred in giving rewards for killing stray dogs, Rs. 215–10–8 for printing proceedings, Rs. 40–15–6 for defending certain civil suits, and Rs. 99 for fixing limit stones, for which advances were made in 1893–94, and adjusted during the year under review. The inclusion of the last adjusted figure in the statement was the main cause of the increase under this head.

56. *Grant V, Supervision and Management.*—The total cost under this head amounted to Rs. 2,351–10–1 against Rs. 2,260 in the revised estimate and Rupees 2,295–8–0, the actuals of 1893–94. The decrease under "office establishment" was caused by allowing a reduced pay to the acting manager, and the increase under "office contingencies" was due to the purchase of stationery articles, &c., in a lump so as to stand for a few months in the current year also. The total expenditure under this grant amounted to nearly 6 per cent. of the ordinary current receipts against the limit of 10 per cent. prescribed by Government.

57. *Repayment of Debt and Interest.*—During the year under review, loans amounting to Rs. 722–15–10 were repaid, of which Rs. 475 was for the principal and Rs. 247–15–10 for interest.

58. *Advances.*—The unadjusted advance which remained at the commencement of the year was adjusted during the year, and Rs. 610 out of the advance made in the year under report remained unadjusted at its close.

59. In conclusion, I have much pleasure in stating that, during the short time I have been in charge of the office, I have had the hearty and willing co-operation of the councillors to whom my thanks are due.

ENCLOSURES.

CONCISE Annual Report of the Municipal Hospital, Máyavaram, for the official year 1894–95.

1. *Public Health.*—The population of the town Máyavaram according to the late census is 23,675. The number of patients that were treated in the municipal hospital during the official year 1894–95 were 9,004, of which 194 are in-door and 8,810 are out-door. The public health of the town was comparatively good throughout the year. So also of the taluk for most part of the year. But towards the latter part, *i e.*, during the months of December, January, February and March the public health suffered a little from the epidemic of cholera, the history of which as far as could be traced seems to be due to the importation from the cholera affected localities. A few sporadic cases occurred in the town during the same period which was also due to importation, but fortunately the disease did not spread and commit much havoc as it did in some villages. The few villages where cholera appeared in the months of February and March suffered most from the high temperature and from scarcity of water especially good drinking water-supply.

2. *Vital Statistics.*—The births and deaths of the town are registered by three sanitary inspectors which is consolidated or compiled by a registrar in the municipal office. The total number of births and deaths statement appended.

Statement of Births and Deaths.

—	1891–92.	1892–93.	1893–94.	1894–95.
Births	823	787	843	716
Rate per mille	34·7	33·1	35·5	30·1
Deaths	853	633	808	667
Rate per mille	35·01	26·6	34·1	28·06

3. *Sanitation.*—The sanitary condition of the town was tolerably kept up good during the year under review. The refuse, *i.e.*, the sweepings, &c., of the town were daily carted away outside the municipal limits and there they were deposited in the two rubbish depôts and disposed of to mirasidars for manuring purposes. There are now nearly thirteen public latrines in the town. The night-soil refuse from these public latrines and from the latrines of private dwellings is all carted away daily by the night-soil carts outside the town and buried in trenches. But the number of toties engaged to look after these public latrines and of private dwellings where private scavengering is in force are not sufficient to meet the demand. Further these toties have to look after the streets and lanes where night-soil nuisance is committed the most.

Water-supply.—The supply is abundant and generally good. The sources are from the river Cauvery, reserved tanks and wells both public and private. There are four reserved tanks set apart for drinking purposes and guarded by watchman. But the feeder channels of these tanks sometimes forms the recipient channels of the drainage of the town and at that time the water of the reserved tanks are defiled. There were nearly ten public wells at the commencement of the year, and an addition of ten more wells were newly sunk during the close of the year. Besides these there are many private wells—the water of which is generally good.

Drainage.—The drainage of the town is more a natural than artificial and is sadly defective and rendered more so by the blockage of the tunnels built for draining during the past years, and no measures are adopted for clearing them out. The surplus rainfall drains partially into the Cauvery and Palancauvery and the rest of the water stagnates and soaks in the town. There are more than 28 cess-pools in the town and they are said to be cleaned by the owners themselves three or four times a year. The one sewage cart newly organized by the municipality for the cleansing of these pools is hardly sufficient to meet the demand of the town.

4. *Vaccination.*—The vaccination work turned out by the medical subordinate—statement attached. As there is a municipal vaccinator in the town working under the compulsory system and under the direct supervision of the medical subordinate almost all the possible cases according to the birth register have been vaccinated. His work has been carefully supervised and more than 63 per cent. of his cases during the year have been verified by the medical subordinate.

5. *Hospitals and Dispensaries.*—The hospital (*a*) buildings consist of a central or main block, in which the dispensary, store and consulting rooms are located and four detached wards affording accommodation to only twelve in-patients of both sexes. There is no separate ward for high caste patients and the demand for which is being more and more keenly felt. A permanent tiled shed in front of the central block and a cholera shed are the two new additions during the year under report. But the dead-house is left untouched and neither repairs or removal to another site as suggested by the District Medical and Sanitary officer has been made.

(*b*) The hospital buildings are in good state of repairs excepting the dead-house and the latrine for males. But the walls require replastering in some places and general whitewashing.

(*c*) Some of the furniture requires repairs and the new furnitures sanctioned by the District Medical and Sanitary officer have not yet been supplied.

(*d*) Number of patients treated as compared with previous years. Statement attached shows an increase in both in and out door patients. But the provision of a caste ward will increase the number of in-patients.

(*e*) Mortality and actual causes of it. There were nine cases of deaths among in-door and two among out-door.

In-door.—Local injuries, two. Cause tetanus.

Out-door.—General dropsy, two. Cause, old age and debility.

Chronic dysentery, two.
Chronic, stricture gonorrhœa one. Cause, rupture of urethra.
Cholera, three.
General injuries, one. Cause, severe and extensive burn.

Assistant Surgeon in charge.

Endorsement on No. 2334-Rev.

Forwarded.

2. *Paragraph* 7.—The Sub-Collector can only attend when he is on tour at Máyavaram.

(2) *Paragraph* 19.—Street refuse is not utilised as recommended by the Sanitary Commissioner in his inspection notes of this year.

(3) *Paragraph* 31.—The cost of granite from Trichinopoly is, I believe, prohibitive. The roads at present are as good as can reasonably be expected.

(4) *Paragraph* 51.—It does not appear why the allotment for a sewage cart was not utilised. A real difficulty in this municipality is to get toties. The class who at present do the work have other means of livelihood and strike when they find their work under the municipality getting irksome.

2. The late Chairman Mr. Kothandarama Aiyar took great interest in his work and did his work well.

N. E. MARJORIBANKS,
Ag. Sub-Collector.

27*th June* 1895.

Endorsement on Cur. No. 508-Finl.

Submitted to Government in the Local and Municipal Department.

2. *Paragraphs* 11 *to* 14 *of the report.*—The collections were good except under "land tax." The arrears under this head have been outstanding for many years dating from 1888–89; while so, why a comparatively large number of warrants, namely, 86 covering Rs. 51–9–4 have been left unexecuted at the close of the year is not understood. Moreover, the land-tax registers have not been revised subsequent to 1889–90. By careful scrutiny, I am inclined to think that the amount realized by taxation of arts, buildings and lands is capable of considerable enhancement.

3. *Paragraph* 31.—The metalled portion of their roads was in a disgraceful condition in the last wet weather. The council has spent as much as their resources allowed during the year in repairs. They should, however, contrive to allot more money to keep the little they have in proper order.

4. *Paragraphs* 37 *and* 38, *Education.*—The municipal council deserves credit for having managed its schools successfully and at the small cost of As. 13–2 per pupil per annum. In the matter of results grants when the provision in the budget was Rs. 900 and Rs. 561–0–6 only was earned by 15 out of 24 schools registered, the fact that as much as Rs. 80–12–6 (Rs. 561–0–6 *minus* Rs. 480–4–0) or 14·44 per cent. has been withheld from three schools shows that the rules have been strictly enforced.

5. *Paragraph* 49.—That 920 out of 926 cases vaccinated have proved successful is hardly credible as also the statement that 712 infants under one year of age were vaccinated during the year, while the total number of births was only 688.

6. *Statement No. VII.*—Rs. 33–3–0 is shown as expenditure on works, construction or repair of toll-sheds, but statement No. II-A furnishes details for only Rs. 30. Probably the difference represents the rent of toll-sheds included in item 9 (viii) under Grant IV. Rent of cart-stands and toll-sheds, Rs. 18–15–0. This should have been clearly exhibited.

7. *Statement No. IX.*—The number of "occupied" houses as per census of 1891 is 4,585. Of these, 4,310 have been assessed by the municipal council and the Chairman refers to the explanation given in the previous year's administration report for not bringing to assessment the remaining number of houses. How far this explanation (that temples, chavadies, &c., have been left unassessed) will satisfactorily account for the 275 houses omitted requires investigation by the council.

Municipal Report for
1894-95

C.l.
P.S.

No. 1666 M., 18TH OCTOBER 1895.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. T. KODANDARAMA AIYAR Avargal, Chairman, Municipal Council, Máyavaram, to the Chief Secretary to Government (through the Sub-Collector of Tanjore), dated Máyavaram, 13th June 1895, No. 464.

I have the honour to submit my report on the working of the Máyavaram Municipality for the official year 1894–95, accompanied with the statements of receipts and charges prescribed by Government in its order, No. 2193 M., dated the 10th December 1891.

2. The budget estimate for the year under report was sanctioned by Government in its order, No. 416 M., dated the 31st March 1894, and modified by G.Os., No. 1106 M., dated the 18th August 1894, and Mis. No. 1641 M., 6th November 1894, and the revised estimate was passed in G.O., No. 464 M., dated the 18th March 1895.

3. The draft report was placed before the council at its meeting held on the 13th June 1895 and adopted. An extract from its proceedings is enclosed herewith.

I.—CONSTITUTION OF THE COUNCIL.

4. The sanctioned maximum strength of the council is eighteen (five nominated and thirteen elected). At the beginning of the year the number on the rolls was fifteen while, at its close, the roll contained the maximum strength. The council, as it stood on the 31st March 1895, consisted of seventeen non-official members and one official member (the ex-officio councillor). All, except the ex-officio councillor, are natives.

5. *Nominations and Elections.*—The three (3) vacancies (one nominated and two elected) on the 31st March 1894 were filled up in the year (*vide* paragraph 4 of the last report). Besides the above vacancies, the seats of seven councillors (two nominated and five elected) fell vacant by efflux of time and they were all filled up within the year. The system of election by wards continued to prevail during the year. Three of the above five elected seats were actually contested, and their details appear in this office letters, dated 20th October 1894, No. 612, and 9th February 1895, No. 106. On the 19th October 1894 elections were held to fill up four vacancies (one in ward No. 2, one in ward No. 3, and two in ward No. 6). The contest was keen in wards Nos. II and VI. The number of electors that attended the poll of the former was 76 or 61·78 per cent. of the registered voters, while 67 out of 104 went to the poll of the latter ward. Again, on the 9th February 1895, an election was held to fill up a vacancy in ward No. II. There were four candidates, three of whom withdrew their candidature in favour of the fourth. Hence no poll was held on this occasion. The total number of registered voters for the year according to the franchise now in force was 637 or 2·6 per cent. of the population (23,765). Of this number 204 were eligible for election as councillors.

6. *Office of Chairman.*—M.R.Ry. T. A. Alaga Pillai Avargal, a non-official member, continued to act as Chairman up to the 31st October 1894, when the term of his councillorship expired, I also a non-official councillor, was elected as Chairman at the meeting held on the 23rd November 1894.

7. *Meetings of the Council.*—Twenty-seven meetings were actually held during the year besides three dissolved for want of quorum, the corresponding figures for the year previous being twenty and three, respectively. The average attendance at each meeting actually held was 8·5 including the four meetings attended by the ex-officio councillor, against nine in the previous year.

8. *Audit of Accounts.*—The accounts of the previous year were audited during the year and the audited figures have been adopted for the purpose of column 6 of statements I and II.

9. *Preparation of Registers.*—The registers of taxes on arts and buildings were revised as usual. The revision of the former tax resulted in a decrease of about Rs. 450 below the previous year's demand (Rs. 4,000), while there was a slight increase of Rs. 36 under house-tax. In regard to the land-tax, the previous year's assessment was adopted in full. The decrease under tax on arts seems to be due to the inactivity of the weaving manufacture as observed in paragraph 7 of the budget report embodied in G.O., No. 464 M., dated the 18th March 1895. The house and land tax assessments continued to be levied at $7\frac{1}{2}$ per cent. of the annual rent value which is the maximum rate permissible under the Act. The total number of buildings, subject to house-tax during the year, was 4,310 or 78·23 per cent. of the occupied and unoccupied houses, viz., 5,509 as per census of 1891. For this decrease —*vide* paragraph 6 of the annual report for 1890–91 :—

II.—RECEIPTS.

10. The receipts under the several heads are compared in the following abstract with those of the previous year and the revised estimate :—

—	Actuals of 1894–95.	Actuals of 1893–94.	Revised estimate, 1894–95.
	RS. A. P.	RS. A. P.	RS. A. P.
Opening balance	1,929 9 2	2,253 13 11	1,930 0 0
Receipts from taxation	18,558 2 3	17,247 8 3	18,110 0 0
Rent of lands, buildings and avenues	904 3 11	799 0 6	640 0 0
Sale-proceeds of lands and buildings	5,000 0 0	....	3,000 0 0
Produce of lands, gardens, and sale of materials	94 13 11	105 3 7	80 0 0
Sale of street refuse	127 15 9	120 0 3	170 0 0
Fees and fines from educational institutions	9,656 6 6	7,936 14 3	9,050 0 0
Sale of medicines	87 13 6	100 4 3	100 0 0
Income from markets and slaughter-houses	1,009 8 0	661 8 0	990 0 0
License and other fees	790 12 6	786 6 4	730 0 0
Fines under Municipal and other Acts	805 7 0	772 3 9	700 0 0
Grants and contributions	1,591 7 9	1,771 4 3	2,720 0 0
Miscellaneous	303 10 2	701 7 3	420 0 0
Advances recovered	525 0 0	10 0 0	....
Total, Receipts ..	39,455 5 3	31,011 12 8	36,710 0 0
Total, including balance ..	41,384 14 5	33,265 10 7	38,640 0 0

Compared with the actuals of the previous year and with the revised estimate of the year under report, the current receipts show an increase of Rs. 8,443–8–7 and Rs. 2,745–5–3, respectively, which appears mainly under taxes, sale-proceeds of lands, school-fees, income from markets and slaughter-house and 'advances,' while the expected income from grants and contributions fell during the year. The reasons for the variations are discussed below.

11 *Receipts from Taxation—Tax on Arts*—The arrear and current demand of this tax, after appeals had been decided, was Rs. 3,807. Of this sum, Rs. 3,579 was realized and Rs. 215 written off as irrecoverable. This leaves a small balance of Rs. 13 only at the close of the year, the whole of the arrear balance which remained at the commencement of the year having been adjusted mostly by collections and a little by writes-off. The number of persons assessed to this tax and the average incidence were 1,521 and Rs. 2–4–0 against 1,647 and Rs. 2–5–0, respectively, in the year previous, the small decrease in the incidence being due, as has been repeatedly urged to the continued depression of the weaving manufacture and to the absence of great sowcars liable to be taxed under the higher classes.

12. *Tax on Buildings.*—Out of Rs. 6,823–3–6, the current final demand, a sum of Rs. 6,760–14–9 was collected and Rs. 22–8–0 written off as irrecoverable, leaving a small balance of Rs. 39–12–9 at the close of the year. The arrear demand of Rs. 539–6–6 was reduced to a very small figure before the 31st March 1895 (Rs. 504–2–6 by collection and Rs. 32–4–0 by writes off). The remission granted by the council was almost *nil*. The number of houses taxed was 4,310 and the average incidence on them was Rs. 1–9–4. Unlike Tanjore and other large towns, this town cannot boast of magnificient buildings yielding high rents, and the storied houses are very few which is evidenced by the fact that, in spite of the vigorous attempts of the council to develop further this source of municipal revenue, 4,159 out of 4,310 houses taxed were assessed at sums not exceeding Rs. 5. The tax for the current year has been slightly raised in the Máyavaram division in conformity with the views of the council expressed in paragraph 8 of the last budget report.

13. *Tax on Lands.*—Out of a demand of Rs. 843–0–6, including arrears, Rs. 700–9–4 was collected against Rs. 600 expected in the revised estimate, Rs. 52–0–8 was written off, leaving a balance of Rs. 90–6–6. This tax was collected with considerable difficulty as in many cases, the proprietors of lands assessed were not easily ascertainable, the lands having changed many hands since last revision. The total extent of lands assessed during the year was $1{,}119\frac{1}{2}$ acres, or the same as in the previous year. With the exception of the small balances under the above three taxes, the arrear and current dues under all other items having a fixed demand have been adjusted in full before the close of the year. The balance under market rents, arrears, has since been adjusted. Pending the final decision of an appeal in the Tanjore District Court, the adjustment of the small balance under "licenses" and "rent of lands" is deferred.

14. *Taxes on vehicles, animals and carts.*—The collections under these taxes amount to Rs. 2,415–4–0, or Rs. 95–4–0 in excess of the sum entered in the revised estimate. This was due to the stricter supervision exercised as well to the further increase in the number of jatkas and ponies during the year.

15. *Tolls.*—The whole of the current and arrear demand amounting to Rs. 6,715 and Rs. 165–12–0, respectively, was collected within the year. The collection was leased out to a contractor and it was levied at three-fourths of the schedule rates in the eleven gates of this municipality. The current year's contract amount has come up to Rs. 7,000, or Rs. 100 more than the budget figure.

16. *Rent of lands and buildings.*—The income from rent of lands increased from Rs. 160 in the revised estimate to Rs. 207, which is nearly the full demand for the year. While preparing the revised estimate it was thought that a sum of Rs. 26 will have to be written off and Rs. 20 to remain uncollected. But the case was otherwise, as only a small sum of Rs. 1–8–0 had to be written off, and a trifling balance of As. 15 only was left uncollected at the close of the year. This result is due to great vigilance and vigour in the matter of collections. The amount realized under "rent of buildings" was Rs. 132–1–5, or Rs. 2–1–5 over the revised estimate.

17. *Avenues.*—The income from this source rose from Rs. 350 in the revised estimate to Rs. 565–2–6. The increase is due to the removal from road side of a number of tamarind trees at the request of the owners of houses injuriously affected by the growth of the trees. The removal was permitted upon the house-owners paying into the municipality ten years' estimated income from the trees; and the trees so removed were sold to advantage in public auction.

18. *Sale of lands and buildings.*—The old travellers' bungalow and a portion of its compound ordered to be sold by Government in its order, Mis. No. 1279 M., dated the 22nd September 1893, was sold in public auction at the meeting held on the 10th January 1895 for Rs. 5,000, which is Rs. 2,000 in excess of the sum anticipated in the budget.

19. *Sale of street refuse.*—The sum realized under this head was Rs. 127–15–9 or Rs. 7–15–6 above the previous year's actuals, but Rs. 42–0–3 below the revised estimate. The council will try its best to improve the income from this source.

20. *Fees and fines from municipal schools.*—Fees are levied in the municipal high and primary schools, Máyavaram, and in the Salary-results Primary school, Tiruvilandur. The income realized from these institutions come up to Rs. 9,656–6–6,

including fines, against Rs. 9,050 in the revised estimate and Rs. 7,936–14–3 of the actuals of 1893–94. While preparing the revised estimate, the council fixed Rupees 9,550 as the probable income in consideration of the large admissions then expected in the High and Primary schools, Máyavaram. But the amount so fixed was reduced by the Director to Rs. 9,050. For the reasons explained in paragraph 19 of the budget report of the year under review, no fees are levied in the Saliya and Muhammadan schools, Kornad, which are intended for the backward classes. However, at the suggestion of the Assistant Inspector of Schools, the council has recently resolved to levy fees from Hindoo boys attending the Muhammadan school. To further the cause of female education, no fees are, as usual, levied in the Municipal Girls' school, Máyavaram.

21. *Sale of Medicines.*—The sum realized under this head was Rs. 87–13–6 or Rs. 12–2–6 below the revised estimate. This is a fluctuating item.

22. *Income from markets.*—There are two markets in the town—one at Máyavaram for the sale of vegetable and the other a private market at Kornad for the sale of fish. The former, a municipal market, consists of a large tiled building divided into ten bazaars with a large shed on masonry pillars in front thereof. There are also two houses and five bazaars adjoining the above market. Agreeably to the suggestion of the Sanitary Commissioner, the council is making arrangements to construct a fish market of their own and steps are being taken to purchase a suitable site. The current demand under this head amounted to Rs. 589. The whole of this sum, together with Rs. 120–8–0 out of the arrear demand of Rs. 231–8–0, was collected within the year; Rs. 40 of the arrear balance was since collected in the current year, and the remainder remitted by the council in consideration of some loss sustained by the contractor of 1891–92, when the vegetable market could not be conveniently located within the market compound owing to the construction of market buildings that year. The lease for the current year fetched a large sum.

23. *Income from Slaughter-house.*—The municipality owns a slaughter-house at Kornad which is now a completely tiled building, and it was leased out to a contractor for Rs. 300 against Rs. 215 in the year previous. The whole of this demand was collected within the year. The income from this source is likely to develop further, and the contract amount for the current year has come up to Rs. 340 owing to the fee levied for each animal slaughtered having been raised from pies 9 to pies 12.

24. *License Fees.*—A sum of Rs. 680–10–6 was realized, which is almost the same as in the year previous and Rs. 60–10–6 over the revised estimate.

25. *Fines under Municipal and other Acts.*—The income under this head for 1894–95 rose from Rs. 772–3–9 in the previous year to Rs. 805–7–0. This is a fluctuating item.

26. *Contribution from Government.*—During the year under report Rs. 991–7–9 only was received as contribution from Government as detailed below, while Rs. 2,000 was taken credit in the revised estimate :—

	RS.	A.	P.
Salary grants for the high school	618	2	10
Results grants for the girls' school	212	15	0
Conductress' grant for the girls' school	26	5	3
Rent grant for the girls' school	25	10	8
Furniture grant for the girls' school	25	14	0
Grant on behalf of common gymnast	82	8	0
Total	991	7	9

An application was made for the payment of Rs. 930, the same being the balance of building grant claimed by the council from Provincial funds, as also for the increased grants for which some of the teachers are already eligible, but the Director of Public Instruction declined to grant them on the score of want of funds, although he allowed credit being taken to the extent of the amount applied for by the council (*vide* paragraph 2 of his letter embodied in G.O., No. 416 M., dated the 31st March 1894).

27. *Miscellaneous.*—The noteworthy item under this head is the private scavenging service. A sum of Rs. 252–12–0 was realized from this source against Rs. 280 in the revised estimate and Rs. 210–15–0 of the actuals of the previous year. This revenue is expected to increase in the current year, as vigorous measures have been adopted by the council to bring a large number of houses under this system, and as the rates for the service have been doubled with effect from 1st April 1895.

28. *Advances recovered.*—The sum of Rs. 525 entered under this head was the amount adjusted during the year out of the arrear advance, which remained unadjusted at the commencement of the year. Of the above sum Rs. 5–0–7 was refunded in cash and the remainder was adjusted by works.

III.—EXPENDITURE.

29. The following abstract shows the expenditure under the several heads as compared with the figures of the previous year, and with the revised estimate for 1894–95 :—

—	Actuals, 1894–95.	Actuals, 1893–94.	Revised estimate, 1894–95.
	RS. A. P.	RS. A. P.	RS. A. P.

Conservancy	6,262 15 7	5,875 9 7	6,430 0 0
Total	9,776 9 10	9,467 11 5	9,890 0 0
GRANT IV—			
Lighting	1,560 7 0	1,351 3 10	1,440 0 0
Avenue, &c., Public Gardens	322 11 2	378 12 10	360 0 0
Other Charges	398 8 9	219 15 1	270 0 0
Total	2,281 10 11	1,949 15 9	2,070 0 0
GRANT V—			
Office Establishment and Inspection	1,226 8 10	1,258 5 3	1,250 0 0
Collection	555 1 11	520 11 10	560 0 0
Contingencies	362 8 4	254 1 5	250 0 0
Contribution for Central Office and Audit Establishment	207 7 0	262 5 6	200 0 0
Total	2,351 10 1	2,295 8 0	2,260 0 0
Debt	722 15 10	436 6 0	730 0 0
Advances	610 0 0	530 0 0	90 0 0
Total, Expenditure	33,438 0 7	31,336 1 5	35,860 0 0
Closing Balance	7,946 13 10	1,929 9 2	2,780 0 0
Total	41,384 14 5	33,265 10 7	38,640 0 0

The total charges exceeded those of the previous year by Rs. 2,101–15–2 and was below the revised estimate by Rs. 2,421–15–5, the increase over the actuals of the previous year occurring under all grants except grant I, and the decrease below the revised estimate occurring chiefly under grant I.

30. *Grant I, Public Works.*—The total outlay on public works amounted to Rs. 5,466–10–0, against the revised estimate of Rs. 8,770 and actuals of Rs. 5,630–6–6. It was equivalent to 14 per cent. of the receipts of the year and 16 per cent. of the entire expenditure. The decrease, as compared with the revised estimate, was due mainly to the non-utilization of the whole amount provided for the construction of the new travellers' bungalow and for the extension of the High school building.

31. *Communications.*—The expenditure on roads was Rs. 2,914–1–10 or 64 per cent. of the net revenue from tolls after deducting the expenditure on the repair of toll-gates and the Local Fund share, against the revised estimate of Rs. 2,590 and actuals of 1893–94, Rs. 2,386–7–8. Of this, a sum of Rs. 314–10–9 was spent on new works and Rs. 2,599–7–1 on repairs against Rs. 258–3–9 and Rs. 2,128–3–11, respectively, in the previous year. The total extent of the roads and streets maintained by the municipality during the year under report was miles 30, furlongs 6, yards 190, of which miles 2, furlongs 3 were gravelled and miles 28, furlongs 3, yards 190 unmetalled. The length of the roads and streets metalled and unmetalled, under the control of the municipality was the same as in the previous year, viz., miles 34, furlongs 6, yards 150. The portion of road No. 2 from Kornad sign post up to small bazaar street in the west, a distance of about 2 furlongs, was thoroughly remetalled. The level of some streets was raised. Almost all the roads and streets were thoroughly repaired by sectioning. With the exception of a portion of the gravel road which has to be remetalled this year, all the other roads are in a fairly satisfactory condition.

32. *Buildings.*—The outlay under this head was Rs. 1,147–2–9 under new works and Rs. 106–5–9 under repairs, making a total of Rs. 1,253–8–6, against Rs. 2,420–5–1 in 1893–94 and against Rs. 4,800 in the revised estimate. The decrease below the revised estimate is explained in paragraph 30 *supra*.

During the year under review, 12 tatty latrines were constructed, the market shed was renewed, a new cholera shed was built in the hospital compound, the thatched shed in front of the hospital main building and the thatched portion of the municipal slaughter-house were converted into tiled ones, and a doorway was constructed and iron doors were put up in front of the vegetable market building. Owing to some difference of opinion in respect to the plans and estimate, the two works, viz., the construction of the new travellers' bungalow and the extension of the High School building were not taken on hand, although a portion of the materials required for the same has been purchased. The Superintending Engineer has to be addressed again on the subject.

33. *Water-supply.*—The total expenditure on water-supply amounted to Rupees 906–0–7 against Rs. 457–7–10 in 1893–94; and Rs. 990 in the revised estimate. Of this, a sum of Rs. 479–4–3 was spent on new works, in sinking four new wells and in the construction of platforms for five municipal wells and Rs. 426–12–4 on repairs, Rs. 375–14–7 of the latter item was the pay of six tank watchmen and of the temporary coolies employed for digging wells and springs in the Cauvery during the hot season and the remainder was expended in effecting sundry repairs to the flight of steps on the south bank of Vellalarkoil tank, and to the water-pump and water-cart. The decrease below the revised estimate under establishment is due to fines and stoppages.

34. *Establishment.*—As in the previous year, an overseer on Rs. 25 and a maistry on Rs. 6 per mensem were continued for the supervision of all the public works, and the cost of the establishment during the year was Rs. 371.

35. *Grant II, Education.*—The total outlay on education, excluding the expenditure on school buildings (Rs. 360–2–4 shown under Grant I) amounted to Rupees 12,228–7–11 against Rs. 12,050 in the revised estimate, and Rs. 11,026–1–9, the actuals of 1893–94, the increase occurring under "Salary" and Salary-results schools and the decrease under "Results grants."

36. *Training Schools.*—A sum of Rs. 30 provided in the budget was paid to the inspecting schoolmaster, the same being the remuneration proposed for training the payal school teachers to pass the Primary School examination. Nine out of 11 teachers trained under him have passed the examination.

37. *Municipal Schools on Salary system.*—The two schools, viz., the High and the Upper Primary schools, Máyavaram, continued to be maintained under this system during the year. The expenditure under this head amounted to Rs. 9,371–2–11 under establishment and contingencies against Rs. 9,050 in the revised estimate. The increase which occurs under contingencies was caused by the purchase of glass almyrahs and by the making of benches with backs for the use of the two schools.

38. *Municipal Schools on the Salary-result system.*—The Lower Secondary Girls' school, Máyavaram, and the Upper Primary Boys' school, Tiruvilandur, the Muhammadan and Saliya schools at Kornad were maintained under this system at a cost of Rs. 989–4–0 under fixed payments, Rs. 542–3–3 under results grants and Rupees 366–10–2 under contingencies, the corresponding figures of the revised estimate being Rs. 990, Rs. 430 and Rs. 220 respectively. Except the Muhammadan school, all the three remaining schools earned much more than was anticipated in the budget; the teachers of the boys' schools were paid the full grants earned, while those of the girls school, 62½ per cent. of the grant received from Provincial funds in view to reduce the net cost. These schools were supplied with a few benches with backs, black boards, &c.

39. *Result Grants.*—A sum of Rs. 480–4–0 was paid to 15 schools as per certifying memoranda received, although Rs. 900 was provided in the budget. The number of schools registered for aid during the year under report was 24 (20 days' schools and 4 night schools), including 2 schools supplementally recommended against 26 in the year previous. Of the above 24 schools, 22 schools were examined for grants, two of the registered schools having been amalgamated and converted into a salary-result school for Saliyas. Fifteen of the schools examined earned grants, the remaining seven schools having failed to secure grants owing to want of required attendance, &c. Three hundred and thirty-nine pupils were examined for grants in the fifteen aided schools, three being for pariahs, and 242 of them passed, 28 having secured merit grants, the corresponding figures for the year previous being 363, 291 and 209, respectively. The decrease in the number passed for merit is due probably to the raising of the minimum mark required for the purpose. When compared with the results of the previous year, the year under review shows considerable decline in the number of aided schools, and the scholars examined and passed for grants. This is due mainly to the fact that so many as seven schools became ineligible for grant, owing to the strict enforcement of rules regarding average attendance and partly to the conversion of two aided schools into a salary-result school as already observed.

40. *Inspection.*—During the year under report an inspecting schoolmaster on Rs. 17 was continued at a cost of Rs. 204 on account of salary, and Rs. 19–12–3 for contingencies against Rs. 200 and Rs. 20 in the revised estimate. The work done by this officer is reported to be fair.

41. *Miscellaneous.*—A sum of Rs. 225–3–4 was spent under this head against Rs. 210 in the revised estimate. Of the above sum, Rs. 182–15–0 was the salary and contingencies of the common gymnast, and Rs. 32–11–4 of the balance was the cost of three benches with backs and two black-boards with stands supplied to two of the results schools. The sum of Rs. 9–9–0 appearing under "other items" comprises the yearly subscription of Rs. 5 paid as usual to the "Physical Training" and "Field Games" Association, Madras, and Rs. 4–9–0 paid for printing the annual combined list of the results schools.

42. *Progress of Education.*—The statements showing the statistics and progress of education in the municipality during the year under review, as furnished by the Assistant Inspector of Schools and the Sub-Assistant Inspector of Girls' Schools, are submitted herewith. From the above statements it will be observed that the number of schools (Government, Board, Aided, Unaided and Indigenous) rose from 46 (of which four were girls' schools with 266 girls), on the 31st March 1894 to 49 (of which four were girls' schools with 275 girls) on the corresponding date of the year under

report; and the pupils from 1,788 boys and 278 girls to 1,988 boys and 330 girls, respectively, showing thus an increase of three schools with 200 boys and 52 girls in all the boys and girls' schools together.

The above increase of pupils occurs in all the municipal schools and the causes for the decrease in the number of aided schools and pupils are explained in paragraph 39 *supra*, which have contributed to the large increase under unaided schools. The proportion of boys under instruction in the various classes of schools to the children of school-going age (calculated at 15 per cent. of the whole population as per census of 1891) rose from 100·3 in 1893–94 to 114·9 in 1894–95. There is a similar increase in the percentage of girls under instruction.

43. *Teaching Staff.*—The number of teachers employed in all the boys' schools rose from 76 in 1893–94 to 85 in the year under report, of whom 13 hold trained teachers' certificates, 9 untrained teachers' certificates, 32 general education certificates and the remaining 31 were unpassed men, the corresponding figures for the previous year being 9, 7, 21 and 39. The number of qualified teachers shows an increase, while the number of unpassed men has diminished, a major portion of this unpassed number being contributed by the unaided and indigenous schools. Out of thirteen teachers employed in the girls' schools only three (one male and two females) hold untrained teachers' certificates, five general education certificates and the rest are unpassed. The pay of one unpassed mistress in the municipal girls' school has been reduced for her failure to qualify herself under the educational rules in view to find funds for entertaining an additional qualified mistress.

44. *Results of Examination.*—Twenty-two pupils that appeared for the Matriculation examination from the Municipal High school, Máyavaram, of whom 7 passed against 6 out of 21 in the year previous. In the Lower Secondary examination 18 passed out of 34 that appeared. For the Primary school examination, 62 pupils were presented from all the municipal schools, of whom 52 passed. With the exception of the Muhammadan school which passed no pupils out of 3 presented, all the other municipal schools acquitted themselves very satisfactorily in the public examinations.

45. *Grant III, Sanitation, &c.*—The expenditure under this grant amounted to Rs. 9,776–9–10 against Rs. 9,890 of the revised estimate and Rs. 9,467–11–5 the actuals of 1893–94, the increase occurring under "Hospitals."

46. *Hospitals.*—A sum of Rs. 2,770–0–6 was spent in maintaining the Webster hospital, Máyavaram, against Rs. 2,700 of the revised estimate and Rs. 2,831–1–1 of the actuals of the previous year. The outlay on establishment was Rs. 1,819–2–7 which is the same as the revised estimate. The sum of Rs. 422–8–6 under "Medicines" comprises Rs. 146–12–6, the value of bazaar medicines and Rs. 275–12–0, the value of European medicines, instruments, &c. The increase under "diet of patients" seems to be due to a corresponding increase in the number of in-patients.

47. From the accompanying annual report of the civil apothecary, it will be seen that the total number of in and out patients treated in the hospital during the year under review was 194 and 8,810 against 186 and 7,718, respectively, in the previous year. Nine cases of the former and two of the latter proved fatal against 11 and 8, respectively, in the previous year. The causes of the above deaths are explained by the apothecary in paragraph 5 (*e*) of his report. The average attendance of out-patients rose from 46·71 to 53·62; but that of the in-patients remained almost stationary. The midwife attached to the Webster hospital attended 114 labour cases or 36 less than in the previous year. She continued to draw As. 8 for every case in excess of the prescribed minimum of ten cases per mensem. She exceeded the minimum by nine cases in three months for which she was allowed Rs. 4–8–0, in addition to her fixed pay, viz., Rs. 8 per mensem. The proposals of the medical authorities to construct a cholera shed in the hospital compound and put up a tiled shed in lieu of the thatched shed in front of the main building for the convenience of out-patients have been carried out. In the current year provision is made for the construction of a new dead-house in a different locality as proposed by the District

Medical and Sanitary officer. As this is a charge on Government funds, the necessary application will be submitted ere long. The proposal to construct a separate ward for the use of high caste in-patients will be considered in the next budget and that to construct a building in the hospital compound for the apothecary's quarters will be carried out when funds may be available. The supply of new furniture referred to in paragraph 5 (*c*) of the apothecary's report will be made on the receipt of the necessary indent.

48. *Contributions.*—A sum of Rs. 100 was paid to Government for contribution to sanitary inspection and Rs. 169–6–6 to local funds towards the maintenance of the Tanjore District Medical school, District Surgeon's establishment, and reserve medical staff.

49. *Vaccination.*—The expenditure on vaccination amounted to Rs. 318–13–11, which is Rs. 11–2–1 below the revised estimate. The decrease is under contingencies which was due to the failure of calf lymph and to the consequent cessation of the vaccine work for a few days. The vaccination was conducted on the compulsory system and the operation was performed mostly from calf-to-arm. The total number of operations performed by the municipal vaccinator and the civil apothecary was 926, of which 920 cases were successful. The high percentage of success was probably due to the use of lymph fresh from the calf and also to careful operations. Of the above number, the vaccinator successfully vaccinated 876 cases and the apothecary 44, the corresponding figures for the previous year being 750 and 56, respectively. Of the total number of cases vaccinated, 819 were by calf-to-arm vaccination and 107 by glycerine paste. The number of infants successfully operated upon was 687 by the vaccinator and 25 by the civil apothecary. The civil apothecary who supervises the vaccinator's work reports that he has verified more than 63 per cent. of the cases operated upon by the vaccinator; 84 cases were reported to the Magistrate during the year under section 138 of the Act, and in no case was a fine levied, as, with the exception of a few, the others got their children vaccinated before actual prosecutions. The cost of successfully vaccinating each case during the year came up to Annas 5–10 against As. 5–9 in the previous year, the increase having been caused by the entertainment of a calf-peon during the year.

50. *Registration of Births and Deaths.*—A sum of Rs. 155–5–4 was spent under this head against Rs. 152–4–0 the actuals of previous year. The total number of births and deaths registered in the town during the year was 688 and 649 against 843 and 808, respectively, in the previous year. In spite of the strict supervision exercised, there has been a fall in the number of births registered, and the number of deaths has diminised by 159. There were 9 cases of cholera, 7 of small-pox, 152 of fever and 58 from bowel complaints and 423 from other causes. The corresponding figures for the previous year being 106, 8, 160, 128 and 406, respectively. There were 31 still-born cases which are not included in the above figures. The few cases of cholera were brought about by persons who halted in the town after visiting Tiruvannámalai and other cholera stricken places. While there were cases of cholera in the outlying villages, this town was almost free from it.

The total number of cases prosecuted for failure to give information regarding births and deaths was 10 and 9, respectively, against 28 on the whole in the previous year. And the amount of fines levied in the above nineteen cases was Rs. 7–14–0.

51. *Conservancy.*—The expenditure under this head was Rs. 6,262–15–7 against Rs. 6,430 of the revised estimate. The decrease under the conservancy establishment and "hire of carts" was due to fines and stoppages, as well as to the non-utilization of the provision for the purchase of sewage cart. The establishment consisted of three nuisance inspectors, five peons, sixteen sweepers, six road cleaning toties and twelve private scavenging toties which shows an increase of one sweeper one street toty and three private scavenging toties over those in the previous year.

52. *Grant IV, Lighting, &c.*—The total outlay under this grant amounted to Rs. 2,281–10–11 or Rs 211–10–11 in excess of the revised estimate. The increase is mainly under "lighting" and "other charges."

53. *Lighting.*—A sum of Rs. 1,560–7–0 was spent under this head against Rs. 1,440 in the revised estimate. The increase under contingencies was caused by the purchase of a large number of big chimneys and reservoirs in lieu of the small ones. The lighting work was performed departmentally as in the previous year by thirteen machalchies supervised by a Superintendent. The lamps were lighted according to the phases of the moon for at least seventeen days in a month. The number of lamps lighted during the year was, as in 1893–94, 227, of which 129 were on iron posts, 95 on stone posts, 2 on masonry pillars and one, a bracket fixed to a wall.

54. *Avenues.*—The sum spent under this head was Rs. 310–13–8, while the figure in the revised estimate was Rs. 340. The decrease which occurs under "contingencies" was caused by the non-utilization within the year, of a portion of the sum set apart for the plantation of cocoa plants, as the season continued to be unfavourable for such plantation.

55. *Other Charges.*—Out of Rs. 398–8–9 spent under this head, Rs. 19–15–6 was incurred in giving rewards for killing stray dogs, Rs. 215–10–8 for printing proceedings, Rs. 40–15–6 for defending certain civil suits, and Rs. 99 for fixing limit stones, for which advances were made in 1893–94, and adjusted during the year under review. The inclusion of the last adjusted figure in the statement was the main cause of the increase under this head.

56. *Grant V, Supervision and Management.*—The total cost under this head amounted to Rs. 2,351–10–1 against Rs. 2,260 in the revised estimate and Rupees 2,295–8–0, the actuals of 1893–94. The decrease under "office establishment" was caused by allowing a reduced pay to the acting manager, and the increase under "office contingencies" was due to the purchase of stationery articles, &c., in a lump so as to stand for a few months in the current year also. The total expenditure under this grant amounted to nearly 6 per cent. of the ordinary current receipts against the limit of 10 per cent. prescribed by Government.

57. *Repayment of Debt and Interest.*—During the year under review, loans amounting to Rs. 722–15–10 were repaid, of which Rs. 475 was for the principal and Rs. 247–15–10 for interest.

58. *Advances.*—The unadjusted advance which remained at the commencement of the year was adjusted during the year, and Rs. 610 out of the advance made in the year under report remained unadjusted at its close.

59. In conclusion, I have much pleasure in stating that, during the short time I have been in charge of the office, I have had the hearty and willing co-operation of the councillors to whom my thanks are due.

ENCLOSURE.

CONCISE Annual Report of the Municipal Hospital, Máyavaram, for the official year 1894–95.

1. *Public Health.*—The population of the town Máyavaram according to the late census is 23,675. The number of patients that were treated in the municipal hospital during the official year 1894–95 were 9,004, of which 194 are in-door and 8,810 are out-door. The public health of the town was comparatively good throughout the year. So also of the taluk for most part of the year. But towards the latter part, *i.e.*, during the months of December, January, February and March the public health suffered a little from the epidemic of cholera, the history of which as far as could be traced seems to be due to the importation from the cholera affected localities. A few sporadic cases occurred in the town during the same period which was also due to importation, but fortunately the disease did not spread and commit much havoc as it did in some villages. The few villages where cholera appeared in the months of February and March suffered most from the high temperature and from scarcity of water especially good drinking water-supply.

2. *Vital Statistics.*—The births and deaths of the town are registered by three sanitary inspectors which is consolidated or compiled by a registrar in the municipal office. The total number of births and deaths statement appended.

Statement of Births and Deaths.

—	1891–92.	1892–93.	1893–94.	1894–95.
Births	823	787	843	716
Rate per mille	34·7	33·1	35·5	30·1
Deaths	853	633	808	667
Rate per mille	35·01	26·6	34·1	28·06

3. *Sanitation.*—The sanitary condition of the town was tolerably kept up good during the year under review. The refuse, *i.e.*, the sweepings, &c., of the town were daily carted away outside the municipal limits and there they were deposited in the two rubbish depôts and disposed of to mirasidars for manuring purposes. There are now nearly thirteen public latrines in the town. The night-soil refuse from these public latrines and from the latrines of private dwellings is all carted away daily by the night-soil carts outside the town and buried in trenches. But the number of toties engaged to look after these public latrines and of private dwellings where private scavengering is in force are not sufficient to meet the demand. Further these toties have to look after the streets and lanes where night-soil nuisance is committed the most.

Water-supply.—The supply is abundant and generally good. The sources are from the river Cauvery, reserved tanks and wells both public and private. There are four reserved tanks set apart for drinking purposes and guarded by watchman. But the feeder channels of these tanks sometimes forms the recipient channels of the drainage of the town and at that time the water of the reserved tanks are defiled. There were nearly ten public wells at the commencement of the year, and an addition of ten more wells were newly sunk during the close of the year. Besides these there are many private wells—the water of which is generally good.

Drainage.—The drainage of the town is more a natural than artificial and is sadly defective and rendered more so by the blockage of the tunnels built for draining during the past years, and no measures are adopted for clearing them out. The surplus rainfall drains partially into the Cauvery and Palancauvery and the rest of the water stagnates and soaks in the town. There are more than 28 cess-pools in the town and they are said to be cleaned by the owners themselves three or four times a year. The one sewage cart newly organized by the municipality for the cleansing of these pools is hardly sufficient to meet the demand of the town.

4. *Vaccination.*—The vaccination work turned out by the medical subordinate—statement attached. As there is a municipal vaccinator in the town working under the compulsory system and under the direct supervision of the medical subordinate almost all the possible cases according to the birth register have been vaccinated. His work has been carefully supervised and more than 63 per cent. of his cases during the year have been verified by the medical subordinate.

5. *Hospitals and Dispensaries.*—The hospital (*a*) buildings consist of a central or main block, in which the dispensary, store and consulting rooms are located and four detached wards affording accommodation to only twelve in-patients of both sexes. There is no separate ward for high caste patients and the demand for which is being more and more keenly felt. A permanent tiled shed in front of the central block and a cholera shed are the two new additions during the year under report. But the dead-house is left untouched and neither repairs or removal to another site as suggested by the District Medical and Sanitary officer has been made.

(*b*) The hospital buildings are in good state of repairs excepting the dead-house and the latrine for males. But the walls require replastering in some places and general whitewashing.

(*c*) Some of the furniture requires repairs and the new furnitures sanctioned by the District Medical and Sanitary officer have not yet been supplied.

(*d*) Number of patients treated as compared with previous years. Statement attached shows an increase in both in and out door patients. But the provision of a caste ward will increase the number of in-patients.

(*e*) Mortality and actual causes of it. There were nine cases of deaths among in-door and two among out-door.

In-door.—Local injuries, two. Cause tetanus.

Out-door.—General dropsy, two. Cause, old age and debility.

Chronic dysentery, two.

Chronic, stricture gonorrhœa one. Cause, rupture of urethra.

Cholera, three.

General injuries, one. Cause, severe and extensive burn.

Mayavaram,
10*th April* 1895.

(Signed) M. DINADAYALU,
Civil Apothecary.
(„) D. GNANAM PILLAI,
Assistant Surgeon in charge.

Endorsement on No. 2334-Rev.

Forwarded.

2. (1) *Paragraph* 7.—The Sub-Collector can only attend when he is on tour at Máyavaram.

(2) *Paragraph* 19.—Street refuse is not utilised as recommended by the Sanitary Commissioner in his inspection notes of this year.

(3) *Paragraph* 31.—The cost of granite from Trichinopoly is, I believe, prohibitive. The roads at present are as good as can reasonably be expected.

(4) *Paragraph* 51.—It does not appear why the allotment for a sewage cart was not utilised. A real difficulty in this municipality is to get toties. The class who at present do the work have other means of livelihood and strike when they find their work under the municipality getting irksome.

3. The late Chairman Mr. Kodandarama Aiyar took great interest in his work and did his work well.

(Signed) N. E. MARJORIBANKS,
27*th June* 1895. *Ag. Sub-Collector.*

Endorsement on Cur. No. 508-Finl.

Submitted to Government in the Local and Municipal Department.

2. *Paragraphs* 11 *to* 14 *of the report.*—The collections were good except under "land tax." The arrears under this head have been outstanding for many years dating from 1888–89; while so, why a comparatively large number of warrants, namely, 86 covering Rs. 51–9–4 have been left unexecuted at the close of the year is not understood. Moreover, the land-tax registers have not been revised subsequent to 1889–90. By careful scrutiny, I am inclined to think that the amount realized by taxation of arts, buildings and lands is capable of considerable enhancement.

3. *Paragraph* 31.—The metalled portion of their roads was in a disgraceful condition in the last wet weather. The council has spent as much as their resources allowed during the year in repairs. They should, however, contrive to allot more money to keep the little they have in proper order.

4. *Paragraphs* 37 *and* 38, *Education.*—The municipal council deserves credit for having managed its schools successfully and at the small cost of As. 13–2 per pupil per annum. In the matter of results grants when the provision in the budget was Rs. 900 and Rs. 561–0–6 only was earned by 15 out of 24 schools registered, the fact that as much as Rs. 80–12–6 (Rs. 561–0–6 *minus* Rs. 480–4–0) or 14·44 per cent. has been withheld from three schools shows that the rules have been strictly enforced.

5. *Paragraph* 49.—That 920 out of 926 cases vaccinated have proved successful is hardly credible as also the statement that 712 infants under one year of age were vaccinated during the year, while the total number of births was only 688.

6. *Statement No. VII.*—Rs. 33–3–0 is shown as expenditure on works, construction or repair of toll-sheds, but statement No. II-A furnishes details for only Rs. 30. Probably the difference represents the rent of toll-sheds included in item 9 (viii) under Grant IV. Rent of cart-stands and toll-sheds, Rs. 18–15–0. This should have been clearly exhibited.

7. *Statement No. IX.*—The number of "occupied" houses as per census of 1891 is 4,585. Of these, 4,310 have been assessed by the municipal council and the Chairman refers to the explanation given in the previous year's administration report for not bringing to assessment the remaining number of houses. How far this explanation (that temples, chavadies, &c., have been left unassessed) will satisfactorily account for the 275 houses omitted requires investigation by the council.

Tanjore,
12*th July* 1895.

(Signed) E. C. RAWSON,
Ag. Collector.

Order—No. 1666 M., dated 18th October 1895.

The receipts and charges of the Máyavaram Municipality for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

—	Actuals, 1893–94.	Budget estimate, 1894–95.	Revised estimate, 1894–95.	Actuals, 1894–95.

Total	33,265	37,300	38,640	41,385

2. Twenty-seven meetings were held by the municipal council against twenty in 1893–94. The average attendance of the non-official members declined slightly and was less than it should have been, while the Revenue divisional officer, who was the only official member of the council, attended only four out of the twenty-seven meetings held. Five seats were filled by election during the year, and of these three were contested, 63 per cent. of the voters concerned attending the poll.

3. *Receipts.*—(1) The net current demand of the tax on arts, owing chiefly, it is stated, to the depression in the weaving trade, again fell, being Rs. 3,417 against Rs. 3,821 in the year previous. The demand under the tax on buildings, however, showed a slight increase, while that of the tax on lands remained practically unaltered. The registers of the last-mentioned tax, which are now six years old, should be thoroughly revised during the current year, and the result reported to Government. The attention of the municipal council is drawn to the Collector's remarks in paragraphs 2 and 7 of his endorsement.

(2) The collections under the principal taxes showed a marked improvement on those of the previous year and were, on the whole, good. This is probably due to the fact that coercion was resorted to more largely than in 1893–94, and that the warrants were executed with greater promptitude. The old arrears under the tax on lands should be adjusted without further delay.

(3) There was an increase in the income from tolls, school fees, markets and slaughter-houses, and fines; and a sum of Rs. 5,000 was realized by the sale of the old travellers' bungalow and a portion of the land attached to it. The receipts from license fees and sale of rubbish, however, remained almost stationary. It is hoped that the council's efforts to improve the revenue from the last-mentioned source will be attended with a greater measure of success in the current year. With regard to the remarks in paragraph 17 of the Chairman's report regarding the removal of the tamarind trees on the road side, it is presumed they have been replaced by other more suitable trees. Avenue trees should not be cut down unless there are very strong reasons for such a course.

(4) The number of houses served by the private scavenging agency rose from 279 to 423; but the service was worked at a loss of Rs. 274 to the municipal council against Rs. 242 in 1893–94. From paragraph 27 of the Chairman's report, however, it appears that steps are being taken by the municipal council to further extend the service and to make it self-supporting. It is not fair to the general tax-payer that he should have to bear the burden of the cost of a private service.

4. *Expenditure*—(1) *Public Works.*—No new work of any importance was under execution during the year. The delay in undertaking the construction of the travellers' bungalow and the extension of the high school building is to be regretted. The total outlay on communications amounted to Rs. 2,915, or 63·9 per cent. of the net revenue from tolls, and the Revenue divisional officer reports that the town roads were in as good a condition as could be expected. In this connection, the attention of the municipal council is drawn to the Collector's remarks in paragraph 3 of his endorsement.

(2) *Education.*—The net outlay on primary education was Rs. 2,141, while the council worked the secondary education in the town at a profit of Rs. 560. The total net expenditure was thus Rs. 1,581, or only 8·5 per cent. of the receipts from taxation. At the commencement of the year, the municipal council maintained a high school, a lower secondary school for girls and three primary schools for boys, one of these being for Muhammadans. To these another primary school for Saliya (silk-weaver) boys was added during the year. The attendance at all the existing municipal schools, especially at that for Muhammadans, improved and the number on the rolls of the new school was fair. The results of the Matriculation examination were poor, and of the Lower Secondary examination indifferent. The primary schools, however, appear to have done moderately well at the departmental examinations. The municipal council aided fifteen primary schools with result grants against twenty-two in 1893–94. The causes of this decline are explained in paragraph 39 of the Chairman's report and are attributed to the more strict enforcement of the rules. The attendance at these schools fell from 732 to 471, but the results of the grant examinations were, on the whole, fair. Owing to the fact that as many as seven schools failed to satisfy the conditions of aid, nearly 47 per cent. of the allotment for grants lapsed, and the number of boys under instruction in the municipal and aided schools fell from 85 to 81·4 per cent. of the male population of school-going age. There was some improvement in the teaching staff, but steps should be taken to reduce still further the number of unpassed teachers in the municipal and aided schools which is unduly high. In the former class of schools no unpassed teacher should be employed, and in the latter a substantial reduction of the grants or the withholding of them altogether should suffice to effect the required improvement.

(3) *Medical Relief.*—The number of in-patients treated in the municipal hospital showed only a slight increase, but that of the out-patients rose from 7,718 to 8,810. The midwife attached to the institution attended 114 cases of labour against 150 in the previous year.

(4) *Vaccination and Vital Statistics.*—Notwithstanding the remarks of Government in the review of the previous year's report, the total number of persons vaccinated fell from 946 to 926 and the total number of successful operations amounted to only 38·7 per mille of the population against a general average of 53 per mille for all municipalities in 1893–94. The quality of the work, however, if the figures can be trusted, showed a marked improvement. Infantile vaccination appears to have received some attention, the number of children under one year successfully protected being 712 against 688 births registered. In this connection, however, the attention of the municipal council is drawn to the Collector's remarks in paragraph 5 of his endorsement.

The registration of vital statistics deteriorated, and the returns, especially those relating to births, were clearly far from complete. Notwithstanding this, there was a decline in the number of prosecutions instituted for failure to register. This is unsatisfactory.

(5) *Sanitation.*—Nearly 98 per cent. of the allotment under this head was utilized and the expenditure amounted to 15·9 per cent. of the receipts. Notwithstanding the remarks in paragraph 4 (5) of G.O., No. 1391 M., dated 4th October 1894, the Chairman's report furnishes hardly any information regarding the sanitary condition of the town and does not state what action was taken to remedy the defects pointed out by the Sanitary Commissioner at his last visit and to improve the latrine accommodation in the municipality. This omission is regrettable. The next administration report should contain full particulars on these subjects. The inspection

notes of the Deputy Sanitary Commissioner recorded in G.O., No. 703 M., dated 26th April 1895, show that the condition of the town was far from satisfactory. The council should make real endeavours in the current year to carry out the various suggestions made by Dr. Bannerman. Steps should be taken to substitute latrines of suitable material and design for the tatti structures now in existence. The reasons for the omission to utilize the provision for a sewage-cart should have been explained.

5. *General Remarks.*—The year closed with a balance of Rs. 7,947, or 20·1 per cent. of the current receipts. The greater portion of this sum is, however, reserved for expenditure on the travellers' bungalow. The sanction of Government should be obtained for the employment for eleven months of the temporary peon for the collection of taxes. Provision was made in the budget for only six months. The statements in paragraphs 10 and 29 of the Chairman's report were unnecessary and should be omitted in future.

The administration of the municipality during the year under review showed a considerable improvement in some respects on that of the previous year, but cannot yet be regarded as efficient. The Government is pleased to note the testimony borne by the Sub-Collector to the good work done by the late Chairman, M.R.Ry. T. Kodandarama Aiyar.
