No. 1705 M., 22ND OCTOBER 1895.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From M.R.Ry. V. RAMAMURTI CHETTI Garu, Chairman, Municipal Council, Anakápalle, to the Chief Secretary to Government (through the Head Assistant Collector, Vizagapatam), dated Anakápalle, 28th June 1895, No. 135.

I have the honour to submit my report on the administration of this municipality for 1894–95, together with the prescribed statements of receipts and charges.

I.—CONSTITUTION OF THE COUNCIL.

2. The maximum number of councillors for this municipality is thirteen as prescribed in G.O., No. 864, Financial, dated 30th April 1883. The constitution of the council on the 31st March 1895 was as shown below:—

Ex-officio councillor	1
Official councillors	3
Non-official councillors	9
Total	13

3. The office of Chairman was held by M.R.Ry. G. Venkatasastri Garu, the local Sub-Registrar of Assurances, from 1st April to 21st July 1894, who, on being transferred to Bikkavolu, vacated his seat handing over charge of the Chairman to the Head Assistant Collector, the Revenue Divisional officer and *ex-officio* councillor. The latter, with the consent of the municipal council, delegated his powers under section 32 (2) of the Act to M.R.Ry. K. Kotannah Puntulu Garu, a councillor and local Deputy Tahsildar, who held the office till 15th January 1895. I, the local Sub-Registrar, was elected as Chairman of the council on the 3rd December 1894 and my election was approved by Government in notification No. 8 published in the *Fort St. George Gazette*, dated 8th January 1895.

4. The privilege of election is not granted to this municipality. The council, however, elect their Chairman.

5. The total number of meetings actually held in the year was seventeen against the same number of the previous year. Besides these, six meetings had to be adjourned for want of quorum. The average attendance of the meetings actually held was 6·64 as detailed below:—

(*a*) Officials	2·17
(*b*) Non-officials	4·47
Total	6·64

The average attendance of Europeans was ·17, while that of Natives 6·47. Though there is no increase in the number of meetings actually held, it is to be noted that the average attendance of both officials and non-officials has improved during the year.

II.—RECEIPTS.

6. The following statement shows the several items of receipts of this municipality during the year as compared with those of the previous year and with the revised estimate :—

Items.	Actuals for 1893–94.	Actuals for 1894–95.	Increase.	Decrease.	Revised estimate for 1894–95.
	Rs.	Rs.	Rs.	Rs.	Rs.
Opening balance	1,148	1,082	..	66	1,080
Tax on Buildings and Lands	4,356	4,349	..	7	5,080
„ on Arts, &c.	1,258	1,051	..	207	1,200
„ on Vehicles with springs, animals and carts ..	514	555	41	..	640
Tolls	3,956	4,900	944	..	4,900
Total income from Taxation ..	10,084	10,855	985	214	11,820
Realization under Special Acts	..	30	30	..	..
Rent of land, buildings, &c., sale-proceeds of land, produce of lands, and sale-proceeds of old materials, &c.	79	25	..	54	40
Conservancy receipts	..	53	53	..	60
Fees and revenues from Educational Institutions ..	927	1,007	80	..	1,000
„ „ from Medical Institutions ..	..	..	..	..	20
„ „ from Markets and Slaughter-houses	682	593	..	89	630
License fees	74	117	43	..	80
Other fees	848	326	..	522	330
Fines under Municipal and other Acts	380	444	64	..	400

Miscellaneous	42	20	..	22	30
Advances recovered	175	60	..	115	..
Total Receipts ..	13,947	14,191	1,279	1,035	15,190
Total including balance ..	15,095	15,273	1,279	1,101	16,270

7. The year opened with a balance of Rs. 1,081–12–6. The total current receipts, inclusive of opening balance, amounted to Rs. 15,273–2–6 against Rs. 15,095–1–7, actuals of the previous year and Rs. 16,270 anticipated in the revised estimate. The increase over the actuals of the previous year is chiefly due to the increase under tolls, and the decrease under the revised estimate is due to over-estimate.

A.—Receipts from Taxation.

8. *House-tax.*—As usual, the tax under this head was levied at $6\frac{1}{4}$ per cent. on the annual rent value of the buildings. The assessment of the tax was based on the actual rental in case of buildings let out. As regards houses which were not leased out, the annual rent was deduced from the rent of a model house in the neighbourhood, regard being had to position, extent, accommodation, comforts, and lastly local demands. The house-tax register was thoroughly revised in the year under report both by my predecessors and by me. The result of the revision of this tax is that the demand has increased from Rs. 1,935–6–8 to Rs. 2,317–0–6, or Rs. 382 in round numbers. The procedure adopted in revising this tax register was reported in this office letter No. 1 M., dated 8th January 1895, embodied in G.O., No. 377 M., Local and Municipal, dated 8th March 1895, reviewing the budget for 1895–96. As the revision of the house-tax had to be thoroughly and very carefully carried out, it occupied more or less the whole year. The frequent changes in the office of the Chairman might also have contributed to the pretty long time taken up for the revision.

The demand originally fixed under this head was Rs. 2,336–3–6. The council remitted on appeal Rs. 19–3–0, leaving Rs. 2,317–0–6 as final demand. Of this amount, Rs. 1,906–15–2 or 82·3 per cent. were collected during the year, leaving a balance of Rs. 410–1–4 to be adjusted in the current year. Of this amount of Rs. 410–1–4, Rs. 186–11–0 were since realized and Rs. 43–8–4 were subsequently found to be irrecoverable. The small balance still outstanding will be adjusted ere long.

The arrears outstanding at the commencement of the year, together with those of the previous years, amounted to Rs. 372, of which Rs. 200 were collected in the year under report, leaving a balance of Rs. 172 for adjustment in the current year. The reasons for non-adjustment of the whole outstanding arrears will be found in paragraph 10 (*a*) *infra*.

9. *Land-tax.*—The demand under this head was Rs. 2,393–14–2 against Rupees 2,400–13–1 of 1893–94. Rs. 2,141–3–6 or 89·47 per cent. were collected during the year, leaving a balance of Rs. 252–10–8 to be adjusted in the current year. The difference of Rs. 6–14–10 in the demand was due to the remission of the sum granted to the proprietor of the Anakápalle estate in favour of 22 acres of land taken up by the East Coast Railway department. Under G.O., No. 658 M., dated 25th May 1894, the East Coast Railway is liable to pay land-tax and I have addressed the Manager of the East Coast Railway on the subject. A copy of the Government order was also forwarded to the Manager at his request and the matter is still pending disposal.

The arrears outstanding at the commencement of the year, together with those of the previous years, amounted to Rs. 684–15–3, of which Rs. 101–4–2 were collected in the year under report, leaving a balance of Rs. 583–11–1 for adjustment in the current year.

The land-tax register was revised in the year under report. The total extent of land assessed in the year was 4,435 $\frac{96}{100}$ acres. The assessment was based on the extent of land and the nature of the soil, the rates being $2\frac{58}{121}$ pies on every 80 square yards of land in "Cheruvulopala," $1\frac{119}{121}$ pies in "Etiavala," $1\frac{59}{121}$ pies in "Ava" and $\frac{120}{121}$ pies in "Cheruvavenaka" divisions, sanctioned in G.O., Mis. No. 948 M., Local and Municipal, dated 24th September 1886.

10. *Tax on Arts, &c.*—The demand originally fixed by me under this head was Rs. 1,338–8–0. The council remitted on appeal Rs. 138, and Rs. 28 were written off the accounts as irrecoverable on account of death of certain tax-payers during the year. Thus the demand, as finally settled, is therefore Rs. 1,200–8–0, of which Rs. 1,019 or 84·9 were collected within the year, leaving a balance of Rs. 153–8–0 for adjustment in the current year. Of this balance, viz., Rs. 153–8–0, Rs. 37 were since realized and Rs. 70–8–0 were subsequently found to be irrecoverable. The small balance, viz., Rs. 46, will be collected shortly.

The arrears of the previous year were Rs. 81, of which Rs. 32 were collected during the year, leaving a balance of Rs. 49 to be adjusted in the current year. As usual, the profession-tax register was revised during the year. The number of persons finally assessed to the tax on arts, &c., in each class was as follows :—

	Number of persons assessed.	Total assessment.
		Rs.
Class I	...	..
„ II	..	..
„ III	9	225
„ IV	14	168
„ V	$31\frac{1}{2}$	189
„ VI	113	339
„ VII	$4\frac{1}{2}$	9
„ VIII	$270\frac{1}{2}$	$270\frac{1}{2}$
Total ..	$442\frac{1}{2}$	$1,200\frac{1}{2}$

10A. The chief causes for the outstanding arrears above referred to were the frequent changes in the office of Chairman and the difficulty in ascertaining the whereabouts of certain of the tax-payers who left the town and want of time for the minute enquiry into every detail. I have already represented that a careful and thorough revision of the house-tax had taken up much of the time of the council, leaving little or no time for a satisfactory adjustment of the arrears. A sub-committee will be formed shortly and every effort will be taken for a full and thorough adjustment of the arrears.

11. *Tax on Animals and Vehicles and Registration of Carts.*—The receipts under these heads amounted to Rs. 309–8–0 and Rs. 245 against Rs. 290–4–0 and Rupees 214–0–0, respectively, of the previous year.

12. *Coercive Processes.*—In 437 cases distress warrants were issued, of which 233 were those that were executed and cancelled and 204 that remained unexecuted at the close of the year. In no case was property sold.

13. *Tolls.*—The privilege of collecting tolls during the year under report was sold to the highest bidder for Rs. 7,000 against Rs. 9,890 of the last year. The decrease was due to the opening of the East Coast Railway. As in last year, tolls were levied at six gates. No expenditure was incurred during the year for establishment as the tolls were leased out. The share at 30 per cent. due to the district board was paid within the year. Rs. 4,900 were collected as municipal share within the year against Rs. 3,956 of 1893–94. It is but just that the municipal council should be entitled to a larger share of tolls income as represented in this office letter No. 1 M., dated 8th January 1895, giving cover to the budget for the current year embodied in G.O., No. 377 M., dated 8th March 1895.

14. *Incidence of Taxation.*—The total average incidence was As. 10–3 including tolls and As. 5–7 excluding them, against As. 9–6 and As. 5–9, respectively, of last year. The increase over the former is due to the increased percentage in the municipal share of tolls and the slight decrease under the latter may be attributed to the fact that the collections under tax on arts, &c., fell off owing to the desertion of all railway contractors paying profession-tax.

B.—Miscellaneous Receipts.

15. The total receipts under this head amounted to Rs. 3,336 against Rs. 3,865 of the previous year as may be seen from the accompanying statement :—

	1894–95.	1893–94.
	Rs.	Rs.
(*a*) Rent of lands, buildings, &c., sale-proceeds of land, produce of lands, and sale-proceeds of old materials, &c.	25	79
(*b*) Sale-proceeds of night-soil, street-refuse, &c.	53	..
(*c*) Fees and revenues from markets and slaughter-house	593	682
(*d*) Fees from educational institutions	1,007	927
(*e*) License fees	117	74
(*f*) Other fees	326	848
(*g*) Fines under Municipal and other Acts	444	382
(*h*) Grants from Government	..	19
(*i*) Grants from local funds	500	500
(*j*) Recoveries for services rendered to private individuals	161	137
(*k*) Miscellaneous	20	42
(*l*) Advances recovered	60	175
(*m*) Realization under Special Acts	30	..
Total	3,336	3,865

16. *Rent of Lands, Buildings, &c.*—Rs. 25 entered under this head were composed of the following :—

(*a*) The municipal garden near the municipal middle school building was leased out for an annual rent of Rs. 5. This amount was realized during the year.

(*b*) Rs. 20 were on account of sale-proceeds of empty kerosine-oil tins and unserviceable articles and old materials, &c. The sale-proceeds of old materials of the municipal dispensary building which was repaired were included in the amount for 1893–94. Hence the decrease in the amount of the year under report.

17. *Sale-proceeds of Night-soil, Street-refuse, &c.*—Rs. 53 were collected during the year on account of sale-proceeds of sweepings of the municipal cart-stand and of street-sweepings.

18. *Rent of Markets and Slaughter-house.*—The right of collecting fees in the municipal markets, viz., vegetable market and fish bazaar, was leased out for Rupees

415 against Rs. 450 of the previous year. The decrease was due to want of competition. The whole amount, viz., Rs. 415, was collected during the year. The Municipal slaughter-house was leased out for Rs. 98, which amount was fully realized during the year. The ground-rent of market godowns was collected departmentally as usual. The total demand was Rs. 119–12–3 being fixed at the rate of three pies per diem for each site of the ground. Of this, Rs. 77–3–9 were collected within the 31st March 1895, leaving a balance of Rs. 42–8–6 for adjustment in the current year; Rs. 21–3–0 were since collected and the small balance will be adjusted ere long. The arrears outstanding at the beginning of the year are Rs. 24–2–6, of which Rs. 2–13–0 were collected during the year, leaving a balance of Rs. 21–5–6 for adjustment in the current year.

19. *Fees and revenues from Educational Institutions*—amounted to Rs. 1,007 against Rs. 927 of the previous year and Rs. 1,000 of the revised estimate. The increase is due to the increased attendance of the Municipal Upper Primary school.

20. *License Fees.*—The amount collected as license fees was Rs. 117 against Rs. 74 of the previous year and Rs. 80 of the revised estimate. The item being of a fluctuating nature calls for no remark for the increase.

21. *Other Fees—Cart-stand Fees.*—The right of collecting cart-stand fees was leased out during the year for Rs. 325 against Rs. 835 of the previous year. The decrease was due to want of competition, as the number of carts halting in the Municipal cart-stand was affected owing to the opening of the East Coast Railway. The whole of the leased amount was collected within the year. Rs. 27–15–6 were spent in the year under report for the repairs of the thatched sheds in the Municipal cart-stand; hence the net revenue from cart-stand was Rs. 297 in round numbers.

22. *Fines under Municipal and other Acts*—were Rs. 444 against Rs. 380 of the previous year. The increase was due to the institution of more nuisance cases in the year with a view of improving the sanitary condition of the town.

23. *Grants from Government.*—Nothing was realized under this head during the year for the following reasons :—

(1) No results grant was earned by the girls in the Municipal Muhammadan school.

(2) The gymnast being untrained no provincial grant was drawn on his account.

(3) With a view to draw in a lump sum the whole amount of provincial stipendiary grant for the training of the gymnastic instructor after ascertaining the total expenditure, nothing was drawn during the year.

24. *Grants from Local Funds.*—Rs. 500 were the usual amount of contribution sreceived from the Taluk Board, Narsapatam, for the upkeep of the municipal dispenary.

25. *Recoveries for services rendered to Private Individuals.*—Under this head Rupees 147–14–0 were collected as private scavenging fees against Rs. 125–2–0 of last year, and Rs. 13–2–0 as fees for cleaning cess-pools of certain private individuals against Rs. 11–8–0 of the previous year. The increase is due to the large number of private latrines brought under municipal private scavenging agency in the third quarter of the year under report.

26. *Miscellaneous.*—Rs. 17 were realized as fees for numbering carts, and Rs. 3–6–0 as "refunds of expenditure of previous year" on account of damages to Municipal lanterns.

27. *Realizations under Special Acts.*—Rs. 30 were realized during the year on account of fees for granting license under Act II of 1888 (Places of Public Resort Act).

III.—EXPENDITURE.

28. The subjoined statement shows the different heads of expenditure incurred during the year as compared with those of 1893–94 and the revised estimate for 1894–95 :—

Charges.	Actuals, 1893–94.	Actuals, 1894–95.	Revised estimate, 1894–95.

Refunds other than the current collections	7	..	..
Total ..	1,467	1,440	1,480
Balance ..	1,082	588	1,060
Grand Total ..	15,095	15,273	16,270

29. *Grant I, Public Works.*—The expenditure on public works, including the cost of establishment, tools and plant and contingencies, amounted to Rs. 4,523 or 30·7 per cent. of the total expenditure of the year against Rs. 3,405 of 1893–94 and Rs. 4,200 of the revised estimate. The increase over the revised estimate is due to the payment of compensation for the lands taken up for burial and burning grounds and for sinking a drinking-water well near Gollavidhi.

30. *Communications.*—The outlay on communications was Rs. 2,353 against Rs. 2,098 of the previous year and Rs. 2,420 of the revised estimate. Of this amount, Rs. 40 were spent on new works and Rs. 2,313 on repairs.

31. The total length of roads in the municipality was 12 miles 4 furlongs and 73 yards; the total length of roads maintained by the council is 11 miles 5 furlongs and 86 yards; the total length of metalled roads is 9 miles 3 furlongs and 14 9 yards; the total length of gravelled roads is 1 mile 2 furlongs and 150 yards; and the total length of unmetalled roads is 7 furlongs and 7 yards. Most of the town roads are in good order.

32. *Drainage.*—No new drains were constructed during the year for want of a drainage scheme.

33. *Repairs—Drainage.*—A sum of Rs. 67–9–6 was spent on petty repairs to the earthen channel between the Bundigadu street masonry drain and the old river channel and the Kotina Vidhi drain.

34. *New Works—Water-supply.*—As reported in paragraph 32 of the last year's administration report, the construction of the drinking-water well at Sarabunda was completed during the year at a cost of Rs. 385–2–10 and is being freely used by the public. The water is said to be good and healthy.

The drinking-water well at Lakshmidevipeta having fallen down during heavy floods of 1893, was re-constructed during the year under report at a cost of Rs. 140–1–2. A sum of Rs. 115–12–0 was spent in acquiring a piece of land for sinking Gollavidhi well which is now under progress.

35. *Repairs—Water-supply.*—Rs. 90–10–2 were spent during the year in repairing four public wells and the bathing-water tank in the town which urgently required repairs.

36. *New Works—Buildings.*—Under this head Rs. 572 were spent for the following purposes:—

	RS.	A.	P.
(*a*) Constructing tatty walls to the Municipal Upper Primary school	10	6	0
(*b*) Value of iron sheets, &c., for constructing an iron moveable latrine	91	3	0
(*c*) Compensation for the land taken up for burial and burning grounds	470	7	0
Total ..	572	0	0

37. *Repairs—Buildings.*—A sum of Rs. 250–4–8 was spent under this head for the following purposes:—

	RS.	A.	P.
Repairs to the Municipal Middle school building	34	0	8
Do. to the thatched stalls in the vegetable market	35	13	2
Do. to the eighteen mud-wall latrines and the thatched sheds in the Municipal cart-stand	180	6	10
Total ..	250	4	8

38. *Tools and Plant, &c.*—Rs. 46–11–10 were spent under this head for purchasing measuring-tape, parallel rulers, &c., and some country-made tools, repairs to the existing tools, and for public works contingencies.

39. *Establishment.*—Rs. 192 were spent under this head towards the pay of the Municipal overseer.

40. *Tolls and Road Charges.*—The total cost incurred in improving the town roads was Rs. 2,353 out of the actual receipts of Rs. 4,900 from tolls or 48 per cent.

41. *Grant II, Education.*—There were one Middle school, one Upper Primary school and nine Lower Primary schools including Muhammadan school and that for Pariahs. The total cost incurred under this head was Rs. 2,559 against Rs. 3,063 of the previous year as noted below:—

	1893–94. RS.	1894–95. RS.
(1) Municipal Schools—		
(1) Salary System—		
(*a*) Middle school	1,425	1,237
(2) Salary-result System—		
(*a*) Secondary schools	..	..
(*b*) Primary schools	1,483	1,150

	1893–94.	1894–95.
	Rs.	Rs.
(3) Grant-in-Aid Schools—		
(1) Salary-grants	..	..
(2) Results-grants—		
(*a*) Secondary	..	..
(*b*) Primary	..	56
Normal stipends	..	64
Inspection	5	..
Miscellaneous	150	52
Total ..	3,063	2,559

The decrease in the year under report is due to the following :—

(1) *Under Middle school.*—During a portion of the year 1893–94 M.R.Ry. Kameswararao Pantulu, the then Headmaster of the Middle school, was paid at the rate of Rs. 50 per mensem, whereas during the year under report the pay of his successor was only Rs. 40 a month. A sum of Rs. 175, being the old advance given to the headmaster for purchasing chemical apparatus, &c., was adjusted in 1893–94 under "Contingencies of the Middle school."

(2) *Under Primary schools.*—Arrears of result grants to the Municipal Upper Primary school and to the Muhammadan school were paid during the year 1893–94.

(3) *Under Miscellaneous.*—A sum of Rs. 29–14–8 which was applied for to be paid towards the maintenance of the so-called Reading Club was not paid during the year 1894–95, as the necessity for such payment was not made clear to the council. But a similar amount was paid in the year 1893–94. During the absence of the permanent gymnast, who was sent to the Training College, Rajahmundry, for being trained, no substitute could be employed, none being available.

(*a*) *Municipal Middle school.*—The number of boys under instruction on the 31st March 1895 was 40 against 37 on the corresponding date of the previous year. The increase is very slight. I apprehend that further increase cannot be expected owing to the high rates of school-fees; besides the town population consists mostly of cultivators and petty traders who are content perhaps with vernacular education they receive in pial schools. In the Lower Secondary examination six passed out of eleven sent up, of whom four passed in all subjects and two passed in compulsory subjects only.

(*b*) *Salary results-school.*—There were ten schools maintained under this system against the same number of schools of the previous year. There were thus one Upper Primary school, one Primary school for Muhammadan boys and one Primary school for Paraiya boys and seven Primary schools for Hindu boys. The total number of boys reading in all the Municipal Primary schools was 318, of whom twelve were girls, against 316. The slight increase in the number of boys calls for no remark. The number of boys and girls of the school-going age in the town was 2,551 as per last census, of whom 491 or 19 per cent. were under instruction in school. The usual statements received from the Assistant Inspector of Schools are enclosed.

(*c*) *Result Grants.*—There were two schools aided by results grants, of which one was a night school. The number of boys reading in these schools on the 31st March 1895 was 53 and the amount of grant earned by the teachers was Rs. 40–10–0. A sum of Rs. 15–14–10, arrears of result grant of the previous year, was paid in the year under report.

(*d*) *Stipends.*—Rs. 64 were spent under this head on account of stipend to the Municipal gymnastic instructor under training in the Government Training College, Rajahmundry.

(*e*) *Miscellaneous.*—Rs. 52 were spent under this head towards the salary of the common gymnast for some months in the year.

42. *Grant III, Sanitation and Medical Service—Hospitals and Dispensaries.*—There was one dispensary maintained by the council during the year in which the number of out-patients treated was 8,979 against 8,067, while that of in-patients was

107 against 93 of the preceding year. The increase both in the number of in and out patients is reported to be due in the case of the former to non-admission of in-patients for six months in the last year when the hospital building was under repair and in the case of the latter to the increasing popularity of the institution. The midwife attached to the municipal dispensary attended 92 labour cases against 145 of the preceding year. The decrease is due to the absence of the midwife on leave for two months during which period no substitute could be appointed for want of a qualified midwife. At the close of the year the midwife resigned her appointment and the resignation was accepted at the suggestion of the District Medical and Sanitary officer. I applied to the District Medical and Sanitary officer to nominate a qualified midwife to be employed in the place of the one resigned. He forwarded my application to the Superintendent of the Government Lying-in Hospital, Madras, who in reply stated that none was available at the time and that when available one would be sent. Waiting for some time after the receipt of the above reply I again addressed the District Medical and Sanitary officer on the same subject. In reply I was again informed that none was available in either the Government or Mr. Ramaswami's Lying-in Hospital. An intimation was also promised when one is available. Rs. 1,832 were spent for maintaining the dispensary against Rs. 1,813 of the previous year and Rs. 1,820 of the revised estimate. The increase over the last year was due to the fact that a larger number of in-patients were admitted in the year under report than that of the previous year. The working of the hospital may be said to have been satisfactory. The hospital assistant's report is enclosed.

43. *Vaccination.*—One second-class vaccinator, by name Shaikh Daud, was employed by the municipality on a monthly pay of Rs. 10. Vaccination has been compulsory in this municipality from the 1st November 1891. The total number of operations performed by him during the year was 1,289 against 1,296 of the previous year. The slight decrease is reported to have been due to the scarlet fever that prevailed at the close of the year. Of the total number of vaccinations performed by the vaccinator 1,197 were successful, 75 unsuccessful and 17 unknown. Of the number of vaccinations 367 were on children under one year of age, of which 354 were successful, 11 unsuccessful and 2 unknown. The number of births registered during the year being 627, the number of infantile vaccinations was thus 58·5 per cent. of the births. Sixty reports were submitted under section 138 of the Act to the Taluk Magistrate against 60 persons for failure to get their children vaccinated. All the vaccine operations were performed by means of animal lymph supplied from the Local Fund depôt, Vizagapatam.

The total cost of vaccination was Rs. 143 against Rs. 187 of the previous year and Rs. 160 of the revised estimate. The decrease under the last year was due to the fact that the practice of paying the parents or guardians of vaccinated children at 6 pies for each successful case was withdrawn during the year. The average cost of each successful case was As. 1–11 against As. 2–5 of last year. No vaccine operations were performed by the local medical officer of the station, the Government having in paragraph 7 of G.O., No. 1235 M., Local and Municipal, dated 15th September 1889, observed that "vaccination by medical subordinates is now discretionary." As in last year the duty of vaccine inspection was entrusted to the local medical officer of the town.

44. *Vital Statistics.*—The total number of births registered was 627 against 637 of 1893–94, of which 351 were males and 276 females against 282 males and 355 females, respectively, of the preceding year, or 36·9 per thousand of population as per last census. The total number of deaths registered was 449 against 434 of last year, of which 269 were males and 180 females against 249 males and 185 females, respectively, or 26·4 per thousand of population as per census of 1891. The slight increase in the number of deaths over the last year calls for no special remark. The following were the causes of death registered during the year :—

Cholera	..
Small-pox	1
Fever	181
Bowel complaints	..
Dysentery	17

Diarrhœa	12
Accidents	7
Snake-bite	1
Other causes	230
Total ..	449

45. *Conservancy.*—The expenditure incurred under this head during the year was Rs. 3,353 against Rs. 3,285 of last year and Rs. 3,390 of the revised estimate. The slight increase over the last year is due to the increased cost of private scavenging establishment in consequence of the increase in the number of private latrines during the year. It was 23·7 per cent. of the total receipts. The roads and streets were daily swept and kept clean. There were ten fixed masonry and 35 iron moveable dust-bins. The town sweepings were daily carted to the cinerators and there burnt. Some of the town sweepings, together with those of the cart-stand, were sold away during the year for Rs. 53. There were 23 public latrines at the close of the year against the same number of latrines of last year. There were five conservancy carts at work including the iron hand-cart for night soil during the year.

46. *Private Scavenging.*—The number of private latrines under the Municipal agency on the 31st March 1895 was 129 against 63 on the corresponding date of the previous year. The increase in the number of private latrines over the last year is due to the large number of prosecutions instituted for failure to keep private latrines clean. The expenditure incurred for cleaning the private latrines was Rs. 227 against Rs. 230 of the revised estimate.

47. *General Health.*—The health of the general public may be pronounced to have been satisfactory during the year.

48. *Grant IV—Lighting.*—The town was lighted during the year by 105 lamps against 104 of the previous year, of which one was purchased during the year. The total expenditure incurred was Rs. 414 against Rs. 427 of the previous year. The slight decrease in the expenditure under last year was due to the fluctuations in the prices of kerosine oil, &c., purchased for the purpose. The charges were as follow:—

	Rs.	A.	P.
(*a*) Establishment charges	143	3	6
(*b*) Contingencies	270	6	9
Total ..	413	10	3

49. *Markets—Contingencies.*—A sum of Rs. 22–8–0 was paid on account of the rent of Fish Bazaar's site occupied by the municipality.

50. *Avenues.*—Rs. 3 were spent under this head towards the pay of the abolished avenue keeper for March 1894.

51. *Miscellaneous Charges* amounted to Rs. 132 against Rs. 90 of the previous year and Rs. 810 of the revised estimate. The decrease under the revised estimate was due to the following transfers of the amount of expenditure under the item of "Compensation for land." Rs. 470–7–0 being the amount of compensation for the land taken up by the municipality for burial and burning grounds was transferred to "Grant I—New Works Buildings." Rs. 115–12–0, amount of compensation paid towards the land taken up for sinking a drinking-water well, was transferred to "New Works."

Water-supply.—Rs. 49–13–0, amount of compensation for the land taken up for night-soil farm, was transferred to Grant III.

Conservancy Contingencies.—The miscellaneous charges were composed of the following items:—

	Rs.	A.	P.
Printing charges	121	8	9
Rewards for the destruction of stray pigs, &c.	0	6	0
Tom-tom, &c., charges	9	15	6
Total ..	131	14	3

52. *Contributions to Provincial Funds.*—These were Rs. 121, being composed of the following items:—

	Rs.
Contribution to Medical College	70
Sanitary inspection	44
Medical Reserve staff	7
Total ..	121

53. *Supervision and Management.*—The total charges incurred under this head were Rs. 1,436 against Rs. 1,360 of the previous year. The increase over the last year was due to the payment during the year of the arrears of office house-rent. The charges were composed of the following items:—

	Rs.	A.	P.
Office establishment	684	0	0
Inspection	61	7	3
Collection establishment	285	0	6
Purchase of account books, paper, &c.	61	2	4
Office contingencies	264	8	8
Contribution to the Central Office establishment	80	0	0
Total ..	1,436	2	9

54. *IV—Closing Balance.*—This was Rs. 588 against Rs. 1,082 of the previous year.

55. The accounts for the year under report were audited in May last.

56. *Concluding Remarks.*—In conclusion I beg to state that I held the office of chairman for only two months and fifteen days towards the close of the year. A portion of this period was spent by me in the revision of house-tax of a few hundreds of houses which were found to have been left without revision. Thus I had had a very little time at my disposal to sift thoroughly every branch of the administration. Hence also the old outstanding arrears which as I have already represented in paragraph 10 (*a*) will be fully adjusted in the year current.

—

ENCLOSURE.

ANNUAL Concise Medical Report of the Municipal Hospital at Anakápalle for the official year 1894–95.

I. General state of public health.—Public health was generally good in the town.

II. Cholera.—No case was reported to have occurred either in the town or in the taluk during the year.

III. Small-pox.—This disease appeared sporadically in the town to a slight extent, causing only one death in the month of November 1894. Measles and chicken-pox prevailed epidemically in the town and in the surrounding country.

IV. Malarial fever.—Intermittent fever of all types prevailed, as usual, easily yielding to the treatment of cinchona alkaloids.

V. Prevailing diseases.—The most common diseases that prevailed during the year in the order of their frequency were (ulcers, itch and other skin diseases, dyspepsia and other diseases of digestive system, worms, ague, diseases of the ear, rheumatic affections, diseases of the eye, diseases of respiratory system, anœmia and other general diseases, diseases of nervous system, abscess, diarrhœa, dysentery, wounds and other local injuries, syphilitic affections, general debility, leprosy, diseases of generative system and spleen diseases).

General Remarks.—The hospital building was thoroughly repaired at the close of the year 1893–94, and it was occupied in the beginning of the year under report. The working of the institution continued to be appreciated by all classes of people. It was inspected by the District Medical and Sanitary officer of Vizagapatam on the 10th July 1894.

The following table shows the number of in and out patients treated and the daily average attendance during the past five official years including the year under report:—

—	1890–91.		1891–92.		1892–93.		1893–94.		1894–95.	
	Number treated.	Average daily attend-ance.	Number treated.	Average daily attend-ance.	Number treated.	Average daily attend-ance.	Number treated	Average daily attend-ance.	Number treated.	Average daily attend-ance.
In-patients	115	6·61	133	7·83	112	6·53	43	3·92	107	5·41
Out-patients	7,072	40·82	7,592	45·13	6,999	41·42	8,067	51·62	8,979	50·63

As the building was under repairs, no in-patients were taken for six months in the year 1893–94; hence the number was only 43 in that year, while the same was 107 in the year under report. The number of out-patients treated during the year under report was 8,979 against 8,067 of the previous year. The increase was 912. This increase was due to the increased popularity of the institution. The average daily number of in-patients was 5·41 against 3·92 of the previous year. The average daily attendance of out-patients was 50·63 against 51·62 of the previous year.

Surgical Operations.—There were no major operations during the year. Two hundred and seventy-nine minor operations were performed by the medical subordinate in charge during the year against 312 of the previous year. Of these minor operations many were capital as in the last year.

Financial statement.—Rs. 1,937–2–2 were spent for maintaining the hospital during the year. This amount includes Rs. 105 contributed by Government towards one-eighth salary of medical subordinate. Rs. 500 were contributed by the Taluk Board of Narsapatam. The net cost to municipality was therefore Rs. 1,332–2–2.

Midwife's work.—The midwife attached to the institution conducted 92 labour cases during the year, comprising 84 natural, 5 tedious, 1 premature, 1 still-born and 1 retained placenta. The number of labour cases conducted by her in the previous year was 145. Her absence on leave for two months in the year partly accounts for the decrease. She resigned her post on the 17th March 1895. In place of her, no other midwife is appointed as yet, none being available for the present.

Sanitary condition of the town of Anakápalle.—The main roads and streets of the town were daily swept and kept clean. The narrow lanes and the corners of Paraiya streets were in backward condition. The practice of storing rubbish in front and in backyards of some of the cultivators' houses especially in Goverapaulem portion of the town continued to exist. Most of them being cultivators they insist upon storing the rubbish to use it as manure after it is made to stay one year. The defective state of drainage continued. The private scavenging system was improved during the year. The number of private latrines under the municipal control was 129 at the close of the year. At the close of the previous official year, the number was only 63. They were increased by 66 during the yearunder report. The drinking-water tank and wells were guarded from contamination. The two drinking-water wells which had been situated close to the public latrines and which had been condemned by the Sanitary Commissioner were closed during the year. In lieu of them one well was sunk at Surabunda by the side of the trunk road, which requires only a platform. This well has been very largely used by the people. For the second well, land was acquired. The work is now under progress and will be completed in a couple of months. As proposed by the Sanitary Commissioner, the cinerator near the slaughter-house was closed and another in lieu of it was built in Santabayaloo during the year.

ANAKAPALLE,
1*st April* 1895.

(Signed) KAREEM SAHEB,
Hospital Assistant in Medical Charge.

Cur. No. 1395.

Forwarded.

2. The roads are well swept and clean. Some of them do not seem to have been properly repaired. It is stated that this is owing to the changes in the Chairmen during the year.

3. Mr. Elwin, the Acting Head Assistant Collector, made personal efforts to induce the ryots to use the sweepings as manure with some success.

NARSAPATAM,
3*rd July* 1895.

(Signed) K. NARASIMHA RAO,
Temp. Dy. Collector in charge.

ENCLOSURE.

REMARKS of R. MORRIS, Esq., Acting Collector of Vizagapatam, on the Anakápalle Municipality.

One of the two condemned wells referred to in paragraph 5 of the Deputy Sanitary Commissioner's notes printed in G.O., No. 1101 M., Local and Municipal, dated 17th August 1894, is closed, a new well being dug at some distance in an unobjectionable place close to the road-way. There is, however, no platform round the well, the consequence being that there is no efficient means of draining away the waste water. A platform should be built as soon as possible and a small drain to take the waste water, either into the adjoining fields or into the road-side drain. The other objectionable well is still in use, but will be closed, when a new well which has been excavated at some distance off in an unobjectionable place and the construction of the masonry work of which is in progress, is completed. I have myself doubts as to whether this condemned well (Gollavidhi well) is really so badly situated as the Deputy Sanitary Commissioner thinks. The nearest point of the female latrine is twice the depth of the well away from the well's mouth, and the latrine is therefore outside the cone of drainage into the well.

2. A burying and burning ground has been provided at a spot selected by Mr. Willock outside the town near the river. Burying and burning inside the town is still unprohibited however.

3. The hospital buildings have been thoroughly repaired. The latrine is worked in the dry earth system, but nothing is done to keep the earth required for use during wet weather dry. It should be kept in a covered place.

4. Night-soil is now buried in shallow trenches. No depôt has been opened as there is no sale. The municipality has acquired a piece of land in which the night-soil is being buried and which is to be ploughed up and cultivated departmentally as an object lesson to the ryots in the neighbourhood. I hope the experiment will succeed. The Chairman should take all possible pains to that end, so that the ryots may see the advantages of using the stuff as manure, and later on of buying it from the municipality.

5. The town sweepings are sold, but no one knows whether the purchaser uses them for manure or not.

6. The latrines are still abominable places. The chairman says a moveable galvanized iron latrine has been bought and will be put together this year, and others will be bought as funds admit. One or two should be bought each year. The latrines so called are now not so public as formerly as tatties have been put up all round them, but the toties take no steps to insist on people going inside. It is not improbable that in order to reduce their own work they do all they can to induce visitors to squat outside the latrines. The consequences are nasty. The toties should be made to gather up the excreta deposited not only inside the latrines, but also those which are emitted outside. They should also be fined if any man uses the ground outside the latrines. They will then see that it will be desirable to induce people to go inside. The galvanized iron latrines should be capable of being taken to pieces and moved, so that when the soil in one place gets foul the latrine may be shifted and for this purpose no portion of the spaces where there are latrines should be allowed to be used for building purposes. The remarks on the management of dry-earth latrines in the Jail Code might be studied with great advantage

7. The roads, when I visited the town, were in good order.

8. The open drain remarked by the Deputy Sanitary Commissioner will take time and money to improve. The adjoining ryots have not at all times a use for the waste water, and cannot be compelled to bale it when they do not require it. When they do want it they are glad enough to take it. Any further extension of the drain in its present direction means that it must either run up hill or a deepish drain must be excavated so as to lead the water through some highish ground to an irrigation channel to the east.

9. The floor of the slaughter-house wants mending and painting with lime, or else reflooring with cement, so that blood may not sink into it. The drains from it also want attention.

Forwarded.

2. The municipality has lately been inspected by Mr. Morris, when Acting Collector. A copy of his remarks is sent herewith.

VIZAGAPATAM,
13*th July* 1895.

(Signed) L. C. MILLER,
Acting Collector.

ORDER—No. 1705 M., dated 22nd October 1895.

The receipts and charges of the Anakápalle Municipality for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94:—

	Actuals, 1893–94.	Budget estimate, 1894–95.	Revised estimate, 1894–95.	Actuals, 1894–95.
Receipts.	RS.	RS.	RS.	RS.
Balance brought forward	1,148	1,080	1,080	1,082
Tax on Arts	1,258	1,200	1,200	1,051
Tax on Buildings and Lands	4,356	4,280	5,080	4,349

2. The number of meetings held by the municipal council was the same as in the previous year, viz., seventeen. The attendance improved in the case of the official members and was fair, but in the case of the non-officials it declined slightly and was indifferent.

3. *Receipts.*—(1) Owing partly to a decline in the number of assessees and partly to the heavy remissions granted by the council on appeal, of which no explanation has been offered, the net current demand of the tax on arts and professions fell from Rs. 1,413 to Rs. 1,201. The house and land tax registers were revised during the year, with the result that the demand under the former head rose by Rs. 382, while that under the latter remained almost stationary. The average incidence of the taxes on arts and buildings declined and was very low, being only Rs. 2–11–5 and Rs. 1–4–9 against a general average of Rs. 4 and Rs. 2–3–0, respectively, for all municipalities in 1893–94. These sources of revenue are apparently, therefore, capable of further development, and the attention of the council is invited to the necessity of effecting this in the current year.

(2) The current collections under the principal taxes declined slightly and were again not satisfactory, while the arrear realizations continued to be exceedingly bad. Notwithstanding the remarks in paragraph 3 (2) of G.O., No. 1062 M., dated 10th August 1894, arrears relating to 1889–90 still remained unadjusted at the close of the year. The explanation for this very unsatisfactory state of things offered in paragraph 10 (*a*) of the chairman's report cannot be accepted as adequate. The Government trusts that the present chairman will spare no pains to adjust all outstandings before the close of the current year. The progress made in this direction should be reported to Government when the budget for the next year is submitted. The total number of warrants issued during the year was only about 28 per cent. of the number sent out in 1893–94, although the backward state of the collections rendered it essential that coercion should be resorted to more freely rather than more sparingly, and even these were not executed with promptitude.

(3) Owing to the opening of the East Coast Railway there was a considerable fall in the gross revenue from tolls, but the amount credited to municipal funds showed an increase when compared with the previous year, as the district board's share was reduced by one-half. There was also an advance in the receipts from the tax on animals and carts, school fees, license fees and fines, which is ascribed in the case of the last item to greater energy on the part of the Police and the municipal executive in detecting nuisance cases. The income from markets and cart-stand fees, however, showed a decline which is explained in paragraphs 18 and 21 of the chairman's report. A sum of Rs. 53 was realized for the first time from the sale of sweepings, and the Government trusts that the measures referred to in paragraph 4 of Mr. Morris' remarks will result in the growth of this source of revenue.

(4) The number of houses served by the private scavenging agency rose from 63 to 129, but the service was worked at a loss of Rs. 79 against Rs. 50 in the previous year. A portion of the fees was, once more, not collected in advance. This is not satisfactory, and Government trust that it will not have to animadvert upon the point again. Every endeavour should be made in the current year to bring all the private latrines in the town under the control of the municipal agency and the system should be rendered self-supporting. It is not equitable that the cost of a private service should be met by the revenues raised from the general body of rate-payers.

4. *Expenditure*—(1) *Public Works.*—With the exception of two drinking-water wells which were constructed at a cost of Rs. 525, no new work of any importance was undertaken during the year. The expenditure on communications amounted to Rs. 2,353, or only 48 per cent. of the income from tolls, but the town roads appear to have been maintained on the whole in good order. Such of them as stand in need of repairs should be attended to in the current year.

(2) *Education.*—The net expenditure on education was Rs. 1,552, or 14·3 per cent. of the income from taxation. Of this, Rs. 655 were spent on secondary and the remainder on primary education. As in the previous year the municipal council maintained a lower secondary school on the salary system and ten primary schools, one of which was for Muhammadans and another for Panchamas, on the salary-result system. The attendance at these institutions taken together remained almost stationary, but the results obtained at the examinations were fair. The net cost of educating each pupil in the lower secondary school increased and was excessive. Steps should be taken in the current year to reduce it. Two primary schools were also aided with result grants. The number of pupils in these institutions was 53, the results of the grant examinations were fair and the allotment for result grants was

exceeded by 12 per cent. The total number of boys under instruction in the municipal and aided schools rose from 26·8 to 31·3 per cent. of the male population of school-going age, but it was still far below the average for all municipalities in 1893–94, viz., 54·2 per cent. The proportion of untrained and unpassed teachers employed in the municipal and aided primary schools was again unduly high. The chairman is requested to report whether any, and if so, what action was taken on the remarks of Government in the concluding sentence of paragraph 4 (2) of G.O., No. 1062 M., dated 10th August 1894.

(3) *Medical relief.*—There was an increase of 64 and 912, respectively, in the number of in and out patients treated at the municipal hospital, which in the former case is attributed to the fact that in-patients were not admitted for six months in the previous year, as the hospital building was under repair, and in the latter to the growing popularity of the institution. The midwife attached to the hospital attended only 92 cases of labour against 145 in 1893–94, the short outturn being due to her absence on leave for two months in the year, during which time no substitute was available, and to her resignation on the 17th March 1895.

(4) *Vaccination and Vital Statistics.*—The reported number of persons vaccinated during the year fell from 1,423 to 1,289, and the quality of the work also deteriorated, the ratio of reported success having been only 92·9 against 94·6 per cent. in 1893–94. Infantile vaccination again made no progress and the total number of children under one year successfully protected was only 354 against 627 births registered during the year. These results are disappointing, and the council should pay increased attention to this branch of its work.

Fair attention appears to have been paid to the registration of vital statistics, but the recorded rates were below normal and no prosecutions for failure to report were instituted. As remarked by Government in its review of the previous year's report, these returns can never be expected to be complete until registration is made compulsory not only in name but in reality.

(5) *Sanitation.*—On conservancy, a sum of Rs. 3,353, or 98·9 per cent. of the allotment and 23·6 per cent. of the current receipts, was spent. From paragraph 45 of the chairman's report it appears that some attention is being paid to the sanitation of the town; but it is evident from the inspection notes of the Deputy Sanitary Commissioner recorded in G.O., No. 1410 M., dated 30th August 1895, and from the remarks of Mr. Morris that a great deal yet remains to be done in this direction. The council should take steps in the current year to remedy the various defects pointed out by these officers. Its special attention will be drawn to paragraph 6 of Mr. Morris' remarks.

5. *General Remarks.*—The year closed with a balance of only Rs. 588, or 4·1 per cent. of the receipts. The statements in paragraphs 6 and 28 of the Chairman's report were unnecessary and should, in future, be omitted. The administration of the municipality during the year under review showed some improvement on that of the previous year; but cannot yet be regarded as satisfactory. The collection of taxes, vaccination, the registration of vital statistics, and sanitation, all demand increased attention.

6. The delay of four weeks in the submission of this report is unsatisfactory and should be guarded against in future.

ORDER—No. 705 M., Local and Municipal, dated 22nd October 1895.

The receipts and charges of the Anakápalle Municipality for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

	Actuals, 1893–94.	Budget estimate, 1894–95.	Revised estimate, 1894–95.	Actuals, 1894–95.
Receipts.	Rs.	Rs.	Rs.	Rs.
Balance brought forward	1,148	1,080	1,080	
Tax on Arts	1,258	1,200	1,200	1,082

2. The number of meetings held by the municipal council was the same as in the previous year, viz., seventeen. The attendance improved in the case of the official members and was fair, but in the case of the non-officials it declined slightly and was indifferent.

3. *Receipts.*—(1) Owing partly to a decline in the number of assessees and partly to the heavy remissions granted by the council on appeal, the net current demand of the tax on arts and professions fell from Rs. 1,413 to Rs. 1,201. The house and land tax registers were revised during the year with the result that the demand under the former head rose by Rs. 382, while that under the latter remained almost stationary. The average incidence of the taxes on arts and buildings declined and was very low, being only Rs. 2-11-5 and Rs. 1-4-9 against a general average of Rs. 4 and Rupees 2-3-0, respectively, for all municipalities in 1893-94. These sources of revenue are apparently, therefore, capable of further development, and the attention of the council is invited to the necessity of effecting this in the current year.

(2) The current collections under the principal taxes declined slightly and were again not satisfactory, while the arrear realizations continued to be exceedingly bad. Notwithstanding the remarks in paragraph 3.(2) of G.O., No. 1062 M., dated 10th August 1894, the old arrears relating to 1889-90 still remained unadjusted at the close of the year. The explanation for this unsatisfactory state of things offered in paragraph 10 (*a*) of the chairman's report cannot be accepted as adequate. The Government trusts that the present chairman will spare no pains to adjust all the arrears before the close of the current year. The progress made in this direction should be reported to Government when the budget for the next year is submitted. The total number of warrants issued during the year was only about 28 per cent. of the number sent out in 1893-94, although the backward state of the collections rendered it essential that coercion should be resorted to more freely rather than more sparingly, and even these were not executed with promptitude.

(3) Owing to the opening of the East Coast Railway there was a considerable fall in the gross revenue from tolls, but the amount credited to municipal funds showed an increase when compared with the previous year, as the district board's share was reduced by one-half. There was also an advance in the receipts from the tax on animals and carts, school fees, license fees and fines, which is ascribed in the case of the last item to greater energy on the part of the Police and the municipal executive in detecting nuisance cases. The income from markets and cart-stand fees, however, showed a decline which is explained in paragraphs 18 and 21 of the chairman's report. A sum of Rs. 53 was realized for the first time from the sale of sweepings, and the Government trusts that the measures referred to in paragraph 4 of Mr. Morris' remarks will result in the development of this source of revenue.

(4) The number of houses served by the private scavenging agency rose from 63 to 129, but the service was worked at a loss of Rs. 79 against Rs. 50 in the previous year. A portion of the fees was once more not collected in advance. This is not satisfactory. Every endeavour should be made in the current year to bring all the private latrines in the town under the control of the municipal agency and the system should be rendered self-supporting. It is not equitable that the cost of a private service should be met by the revenues raised from the general body of rate-payers.

4. *Expenditure*—(1) *Public Works.*—With the exception of two drinking-water wells which were constructed at a cost of Rs. 525, no new work of any importance was undertaken during the year. The expenditure on communications amounted to Rs. 2,353 or only 48 per cent. of the income from tolls, but the town roads appear to have been maintained on the whole in good order. Such of them as stand in need of repairs should be attended to in the current year.

(2) *Education.*—The net expenditure on education was Rs. 1,552 or 14·3 per cent. of the income from taxation. Of this, Rs. 655 were spent on secondary and the remainder on primary education. As in the previous year the municipal council maintained a lower secondary school on the salary system and ten primary schools, one of which was for Muhammadans and another for Panchamas, on the salary-result

—	1890–91.		1891–92.		1892–93.		1893–94.		1894–95.	
	Number treated.	Average daily attendance.	Number treated.	Average daily attendance.	Number treated.	Average daily attendance.	Number treated.	Average daily attendance.	Number treated.	Average daily attendance.
In-patients	115	6·61	133	7·83	112	6·83	43	3·92	107	5·41
Out-patients	7,072	40·82	7,592	45·13	6,999	41·42	8,067	51·62	8,979	50·63

As the building was under repairs, no in-patients were taken for six months in the year 1893–94; hence the number was only 43 in that year, while the same was 107 in the year under report. The number of out-patients treated during the year under report was 8,979 against 8,067 of the previous year. The increase was 912. This increase was due to the increased popularity of the institution. The average daily number of in-patients was 5·41 against 3·92 of the previous year. The average daily attendance of out-patients was 50·63 against 51·62 of the previous year.

Surgical Operations.—There were no major operations during the year. Two hundred and seventy-nine minor operations were performed by the medical subordinate in charge during the year against 312 of the previous year. Of these minor operations many were capital as in the last year.

Financial statement.—Rs. 1,937–2–2 were spent for maintaining the hospital during the year. This amount includes Rs. 105 contributed by Government towards one-eighth salary of medical subordinate. Rs. 500 were contributed by the Taluk Board of Narsapatam. The net cost to municipality was therefore Rs. 1,332–2–2.

Midwife's work.—The midwife attached to the institution conducted 92 labour cases during the year, comprising 84 natural, 5 tedious, 1 premature, 1 still-born and 1 retained placenta. The number of labour cases conducted by her in the previous year was 145. Her absence on leave for two months in the year partly accounts for the decrease. She resigned her post on the 17th March 1895. In place of her, no other midwife is appointed as yet, none being available for the present.

Sanitary condition of the town of Anakápalle.—The main roads and streets of the town were daily swept and kept clean. The narrow lanes and the corners of Pariah streets were in backward condition. The practice of storing rubbish in front and in backyards of some of the cultivators' houses especially in Goverapaulem portion of the town continued to exist. Most of them being cultivators they insist upon storing the rubbish to use it as manure after it is made to stay one year. The defective state of drainage continued. The private scavenging system was improved during the year. The number of private latrines under the municipal control was 129 at the close of the year.

At the close of the previous official year, the number was only 63. They were increased by 66 during the year under report. The drinking-water tank and wells were guarded from contamination. The two drinking-water wells which had been situated close to the public latrines and which had been condemned by the Sanitary Commissioner were closed during the year. In lieu of them one well was sunk at Surabunda by the side of the trunk road, which requires only a platform. This well has been very largely used by the people. For the second well, land was acquired. The work is now under progress and will be completed in a couple of months. As proposed by the Sanitary Commissioner, the cinerator near the slaughter-house was closed and another in lieu of it was built in Santabayaloo during the year.

ANAKAPALLE,
1*st April* 1895.

(Signed) KAREEM SAHEB,
Hospital Assistant in Medical Charge.

EXTRACT from the Proceedings of the Municipal Councillors of the Town of Anakápalle at the Special Meeting held on the 28th June 1895.

(III) Read draft report prepared by the Chairman on the administration of this municipality for 1894–95.

Approved.

(Signed) V. RAMAMURTI CHETTY,
Chairman.

REMARKS of R. Morris, Esq., Acting Collector of Vizagapatam, on the Anakápalle Municipality.

One of the two condemned wells referred to in paragraph 5 of the Deputy Sanitary Commissioner's notes printed in G.O., dated 17th August 1894, No. 1101 M., Local and Municipal, is closed, a new well being dug at some distance in an unobjectionable place close to the road-way. There is, however, no platform round the well, the consequence being that there is no efficient means of draining away the waste water. A platform should be built as soon as possible and a small drain to take the waste water, either into the adjoining fields or into the road-side drain. The other objectionable well is still in use, but will be closed, when a new well which has been excavated at some distance off in an unobjectionable place and the construction of the masonry work of which is in progress, is completed. I have myself doubts as to whether this condemned well (Gollavidhi well) is really so badly situated as the Deputy Sanitary Commissioner thinks. The nearest point of the female latrine is twice the depth of the well away from the well's mouth, and the latrine is therefore outside the cone of drainage into the well.

2. A burying and burning ground has been provided at a spot selected by Mr. Willock outside the town near the river. Burying and burning inside the town is still unprohibited however.

3. The hospital buildings have been thoroughly repaired. The latrine is worked in the dry earth system, but nothing is done to keep the earth required for use during wet weather dry. It should be kept in a covered place.

4. Night-soil is now buried in shallow trenches. No depôt has been opened as there is no sale. The municipality has acquired a piece of land in which the night-soil is being buried and which is to be ploughed up and cultivated departmentally as an object lesson to the ryots in the neighbourhood. I hope the experiment will succeed. The Chairman should take all possible pains to that end, so that the ryots may see the advantages of using the stuff as manure, and later on of buying it from the municipality.

5. The town sweepings are sold, but no one knows whether the purchaser uses them for manure or not.

6. The latrines are still abominable places. The chairman says a moveable galvanized iron latrine has been bought and will be put together this year, and others will be bought as funds admit. One or two should be bought each year. The latrines so called are now not so public as formerly as tatties have been put up all round them, but the toties take no steps to insist on people going inside. It is not improbable that in order to reduce their own work they do all they can to induce visitors to squat outside the latrines. The consequences are nasty. The toties should be made to gather up ~~not only~~ the excreta deposited not only inside the latrines, but also those which are emitted outside. They should also be fined if any man uses the ground outside the latrines. They will then see that it will be desirable to induce people to go inside. The galvanized iron latrines should be capable of being taken to pieces and moved, so that when the soil in one place gets foul the latrine may be shifted and for this purpose no portion of the spaces where there are latrines should be allowed to be used for building purposes. The remarks on the management of dry-earth latrines in the Jail Code might be studied with great advantage.

7. The roads, when I visited the town, were in good order.

8. The open drain remarked by the Deputy Sanitary Commissioner will take time and money to improve. The adjoining ryots have not at all times a use for the waste water, and cannot be compelled to bale it when they do not require it. When they do want it they are glad enough to take it. And further extension of the drain in its present direction means that it must either run up hill or a deepish drain must be excavated so as to lead the water through some highish ground to an irrigation channel to the east.

9. The floor of the slaughter-house wants mending and painting with lime, or else reflooring with cement, so that blood may not sink into it. The drains from it also want attention.

Cur. No. 1395.

Forwarded.

2. The roads are well swept and clean. Some of them do not seem to have been properly repaired. It is stated that this is owing to the changes in the chairmen during the year.

3. Mr. Elwin, the Acting Head Assistant Collector, made personal efforts to induce the ryots to use the sweepings as manure with some success.

NARSAPATAM,
3*rd July* 1895.

Acting Collector.

Diarrhœa	19
Accidents	7
Snake-bite	1
Other causes	230
Total	449

45. *Conservancy.*—The expenditure incurred under this head during the year was Rs. 3,353 against Rs. 3,285 of last year and Rs. 3,390 of the revised estimate. The slight increase over the last year is due to the increased cost of private scavenging establishment in consequence of the increase in the number of private latrines during the year. It was 23·7 per cent. of the total receipts. The roads and streets were daily swept and kept clean. There were ten fixed masonry and 35 iron moveable dust-bins. The town sweepings were daily carted to the cinerators and there burnt. Some of the town sweepings, together with those of the cart-stand, were sold away during the year for Rs. 53. There were 23 public latrines at the close of the year against the same number of latrines of last year. There were five conservancy carts at work including the iron hand-cart for night soil during the year.

46. *Privte Scavenging.* The number of private latrines under the Municipal agency on the 31st March 1895 was 129 against 63 on the corresponding date of the previous year. The increase in the number of private latrines over the last year is due to the large number of prosecutions instituted for failure to keep private latrines clean. The expenditure incurred for cleaning the private latrines was Rs. 227 against Rs. 230 of the revised estimate.

47. *General Health.*—The health of the general public may be pronounced to have been satisfactory during the year.

48. *Grant IV—Lighting.*—The town was lighted during the year by 105 lamps against 104 of the previous year, of which one was purchased during the year. The total expenditure incurred was Rs. 414 against Rs. 427 of the previous year. The slight decrease in the expenditure under last year was due to the fluctuations in the prices of kerosine oil, &c., purchased for the purpose. The charges were as follow:—

	Rs.	A.	P.
(*a*) Establishment charges	143	3	6
(*b*) Contingencies	270	6	9
Total	413	10	3

49. *Markets—Contingencies.*—A sum of Rs. 22–8–0 was paid on account of the rent of Fish Bazaar's site occupied by the municipality.

50. *Avenues.*—Rs. 3 were spent under this head towards the pay of the abolished avenue keeper for March 1894.

51. *Miscellaneous Charges,* amounted to Rs. 132 against Rs. 90 of the previous year and Rs. ~~1,250~~ of the revised estimate. The decrease under the revised estimate was due to the following transfers of the amount of expenditure under the item of "Compensation for land." Rs. 470–7–0 being the amount of compensation for the land taken up by the municipality for burial and burning grounds was transferred to Grant I—New Works Buildings." Rs. 115–12–0, amount of compensation paid towards the land taken up for sinking a drinking-water well, was transferred to "New Works."

Water-supply.—Rs. 49–13–0, amount of compensation for the land taken up for night-soil farm, was transferred to Grant III.

Conservancy Contingencies.—The miscellaneous charges were composed of the following items:—

	Rs.	A.	P.
Printing charges	121	8	9
Rewards for the destruction of stray pigs, &c.	0	6	0
Tom-tom, &c., charges	9	15	6
Total	131	14	3

52. *Contributions to Provincial Funds.*—These were Rs. 121 being composed of the following items:—

	Rs.
Contribution to Medical College	70
Sanitary inspection	44
Medical Reserve staff	7
Total	121

53. *Supervision and Management.*—The total charges incurred under this head were Rs. 1,436 against Rs. 1,360 of the previous year. The increase over the last year was due to the payment during the year of the arrears of office house-rent. The charges were composed of the following items:—

	Rs.	A.	P.
Office establishment	684	0	0
Inspection	61	7	3
Collection establishment	285	0	6
Purchase of account books, paper, &c.	61	2	4
Office contingencies	264	8	8
Contribution to the Central Office establishment	80	0	0
Total	1,436	2	9

54. *IV—Closing Balance.*—This was Rs. 588 against Rs. 1,082 of the previous year.

55. The accounts for the year under report were audited in May last.

56. *Concluding Remarks.*—In conclusion I beg to state that I held the office of chairman for only two months and fifteen days towards the close of the year. A portion of this period was spent by me in the revision of house-tax of a few hundreds of houses which were found to have been left without revision. Thus I had had a very little time at my disposal to sift thoroughly every branch of the administration. Hence also the old outstanding arrears which as I have already represented in paragraph 10 (*a*) will be fully adjusted in the year current.

—

ENCLOSURES.

ANNUAL Concise Medical Report of the Municipal Hospital at Anakápalle for the official year 1894–95.

I. *General state of public health.*—Public health was generally good in the town.

II. *Cholera.*—No case was reported to have occurred either in the town or in the taluk during the year.

III. *Small-pox.*—This disease appeared sporadically in the town to a slight extent, causing only one death in the month of November 1894. Measles and chicken-pox prevailed epidemically in the town and in the surrounding country.

IV. *Malarial fever.*—Intermittent fever of all types prevailed, as usual, easily yielding to the treatment of cinchona alkaloids.

V. *Prevailing diseases.*—The most common diseases that prevailed during the year in the order of their frequency were (ulcers, itch and other skin diseases, dyspepsia and other diseases of digestive system, worms, ague, diseases of the ear, rheumatic affections, diseases of the eye, diseases of respiratory system, anœmia and other general diseases, diseases of nervous system, abscess, diarrhœa, dysentery, wounds and other local injuries, syphilitic affections, general debility, leprosy, diseases of generative system and spleen diseases).

General Remarks.—The hospital building was thoroughly repaired at the close of the year 1893–94, and it was occupied in the beginning of the year under report. The working of the institution continued to be appreciated by all classes of people. It was inspected by the District Medical and Sanitary officer of Vizagapatam on the 10th July 1894.

The following table shows the number of in and out patients treated and the daily average attendance during the past five official years including the year under report:—

107 against 43 of the preceding year. The increase both in the number of in and out patients is reported to be due in the case of the former to non-admission of in-patients for six months in the last year when the hospital building was under repairs and in the case of the latter to the increased popularity of the institution. The midwife attached to the municipal dispensary attended 92 labour cases against 145 of the preceding year. The decrease is due to the absence of the midwife on leave for two months during which period no substitute could be appointed for want of a qualified midwife. At the close of the year the midwife resigned her appointment and the resignation was accepted at the suggestion of the District Medical and Sanitary officer. I applied to the District Medical and Sanitary officer to nominate a qualified midwife to be employed in the place of the one resigned. He forwarded my application to the Superintendent of the Government Lying-in Hospital, Madras, who in reply stated that none was available at the time and that when available one would be sent. Waiting for some time after the receipt of the above reply I again addressed the District Medical and Sanitary officer on the same subject. In reply I was again informed that none was available in either the Government or Mr. Ramaswamy's Lying-in Hospital. An intimation was also promised when one is available. Rs. 1,832 were spent for maintaining the dispensary against Rs. 1,813 of the previous year and Rs. 1,820 of the revised estimate. The increase over the last year was due to the fact that a larger number of in-patients were admitted in the year under report than that of the previous year. The working of the hospital may be said to have been satisfactory. The hospital assistant's report is enclosed.

43. *Vaccination.*—One second-class vaccinator, by name Sheik Davood, was employed by the municipality on a monthly pay of Rs. 10. Vaccination has been compulsory in this municipality from the 1st November 1891. The total number of operations performed by him during the year was 1,289 against 1,296 of the previous year. The slight decrease is reported to have been due to the scarlet fever that prevailed at the close of the year. Of the total number of vaccinations performed by the vaccinator 1,197 were successful, 75 unsuccessful and 17 unknown. Of the number of vaccinations 367 were on children under one year of age, of which 354 were successful, 11 unsuccessful and 2 unknown. The number of births registered during the year being 627, the number of infantile vaccination was thus 58·5 per cent. of the births. Sixty reports were submitted under section 138 of the Act to the Taluk Magistrate against 60 persons for failure to get their children vaccinated. All the vaccine operations were performed by means of animal lymph supplied from the Local Fund depôt, Vizagapatam.

The total cost of vaccination was Rs. 143 against Rs. 187 of the previous year and Rs. 160 of the revised estimate. The decrease under the last year was due to the fact that the practice of paying the parents or guardians of vaccinated children at 6 pies for each successful case was withdrawn during the year. The average cost of each successful case was As. 1–11 against As. 2–5 of last year. No vaccine operations were performed by the local medical officer of the station, the Government having in paragraph 7 of G.O., dated 15th September 1889, No. 1235 M., Local and Municipal, observed that "vaccination by medical subordinates is now discretionary." As in last year the duty of vaccine inspection was entrusted to the local medical officer of the town.

44. *Vital Statistics.*—The total number of births registered was 627 against 637 of 1893–94, of which 351 were males and 276 females against 282 males and 355 females, respectively, of the preceding year, or 36·9 per thousand of population as per last census. The total number of deaths registered was 449 against 434 of last year, of which 269 were males and 180 females against 249 males and 185 females, respectively, or 26·4 per thousand of population as per census of 1891. The slight increase in the number of deaths over the last year calls for no special remark. The following were the causes of death registered during the year:—

Cholera	1
Small-pox	181
Fever	..
Bowel complaints	17
Dysentery	..

	1893–94. Rs.	1894–95. Rs.
(3) Grant-in-Aid Schools—		
(1) Salary-grants	..	..
(2) Results-grants—		
(*a*) Secondary	..	..
(*b*) Primary	..	56
Normal stipends	..	64
Inspection	5	..
Miscellaneous	150	52
Total	3,063	2,559

The decrease in the year under report is due to the following:—

(1) *Under Middle school.*—During a portion of the year 1893–94 Mr. Kamesvararow Pantulu, the then Headmaster of the Middle school, was paid at the rate of Rs. 50 per mensem, whereas during the year under report the pay of his successor was only Rs. 40 a month. A sum of Rs. 175, being the old advance given to the headmaster for purchasing chemical apparatus, &c., was adjusted in 1893–94 under "Contingencies of the Middle school."

(2) *Under Primary schools.*—Arrears of results grants to the Municipal Upper Primary school and to the Muhammadan school were paid during the year 1893–94.

(3) *Under Miscellaneous.*—A sum of Rs 29–14–8 which was applied for to be paid towards the maintenance of the so-called Reading Club was not paid during the year 1894–95, as the necessity for such payment was not made clear to the council. But a similar amount was paid in the year 1893–94. During the absence of the permanent gymnast, who was sent to the Training College, Rajahmundry, for being trained, no substitute could be employed, none being available.

(*a*) *Municipal Middle school.*—The number of boys under instruction on the 31st March 1895 was 40 against 37 on the corresponding date of the previous year. The increase is very slight. I apprehend that further increase cannot be expected owing to the high rates of school-fees; besides the town population consists mostly of cultivators and petty traders who are content perhaps with vernacular education they receive in pial schools. In the Lower Secondary examination six passed out of eleven sent up, of whom four passed in all subjects and two passed in compulsory subjects only.

(*b*) *Salary Results schools.*—There were ten schools maintained under this system against the same number of schools of the previous year. There were thus one Upper Primary school, one Primary school for Muhammadan boys and one Primary school for Pariah boys and seven Primary schools for Hindu boys. The total number of boys reading in all the Municipal Primary schools was 318, of whom twelve were girls, against 316. The slight increase in the number of boys calls for no remark. The number of boys and girls of the school-going age in the town was 2,551 as per last census, of whom 491 or 19 per cent. were under instruction in school. The usual statements received from the Assistant Inspector of Schools are enclosed.

(*c*) *Results Grants.*—There were two schools aided by results grants, of which one was a night school. The number of boys reading in these schools on the 31st March 1895 was 53 and the amount of grant earned by the teachers was Rs. 40–10–0. A sum of Rs. 15–14–10, arrears of results grant of the previous year, was paid in the year under report.

(*d*) *Stipends.*—Rs. 64 were spent under this head on account of stipend to the Municipal gymnastic instructor under training in the Government Training College, Rajahmundry.

(*e*) *Miscellaneous.*—Rs. 52 were spent under this head towards the salary of the common gymnast for some months in the year.

42. *Grant III, Sanitation and Medical Service— Hospitals and Dispensaries.*—There was one dispensary maintained by the council during the year in which the number of out-patients treated was 8,979 against 8,067, while that of in-patients was

Balance ..	1,082	588	1,060
Grand Total ..	15,095	15,273	16,270

29. *Grant I, Public Works.*—The expenditure on public works, including the cost of establishment, tools and plants and contingencies, amounted to Rs. 4,523 or 30·7 per cent of the total expenditure of the year against Rs. 3,405 of 1893–94 and Rs. 4,200 of the revised estimate. The increase over the revised estimate is due to the payment of compensation for the lands taken up for burial and burning grounds and for sinking a drinking-water well near Gollavidhi.

30. *Communications.*—The outlay on communications was Rs. 2,353 against Rs. 2,098 of the previous year and Rs. 2,420 of the revised estimate. Of this amount, Rs. 40 were spent on new works and Rs. 2,313 on repairs.

31. The total length of roads in the municipality was 12 miles 4 furlongs and 73 yards; the total length of roads maintained by the council is 11 miles 5 furlongs and 86 yards; the total length of metalled roads is 9 miles 3 furlongs and 149 yards; the total length of gravelled roads is 1 mile 2 furlongs and 150 yards; and the total length of unmetalled roads is 7 furlongs and 7 yards. Most of the town roads are in good order.

32. *Drainage.*—No new drains were constructed during the year for want of a drainage scheme.

33. *Repairs—Drainage.*—A sum of Rs. 67–9–6 was spent on petty repairs to the earthen channel between the Bundigadu street masonry drain and the old river channel and the Kotina Vidhi drain.

34. *New Works—Water-supply.*—As reported in paragraph 32 of the last year's administration report, the construction of the drinking-water well at Sarabunda was completed during the year at a cost of Rs. 385–2–10 and is being freely used by the public. The water is said to be good and healthy.

The drinking-water well at Lakshmidevipeta having fallen down during heavy floods of 1893, was re-constructed during the year under report at a cost of Rs. 140–1–2. A sum of Rs. 115–12–0 was spent in acquiring a piece of land for sinking Gollavidhi well which is now under progress.

35. *Repairs—Water-supply.*—Rs. 90–10–2 were spent during the year in repairing four public wells and the bathing-water tank in the town which urgently required repairs.

36. *New Works—Buildings.*—Under this head Rs. 572 were spent for the following purposes:—

	RS.	A.	P.
(*a*) Constructing tatty walls to the Municipal Upper Primary school	10	6	0
(*b*) Value of iron sheets, &c., for constructing an iron moveable latrine	91	3	0
(*c*) Compensation for the land taken up for burial and burning grounds	470	7	0
Total ..	572	0	0

37. *Repairs—Buildings.*—A sum of Rs. 250–4–8 was spent under this head for the following purposes:—

	RS.	A.	P.
Repairs to the Municipal Middle school building	34	0	8
Do. to the thatched stalls in the vegetable market	35	13	2
Do. to the eighteen mud-wall latrines and the thatched sheds in the Municipal cart-stand	180	6	10
Total ..	250	4	8

38. *Tools and Plants, &c.*—Rs. 46–11–10 were spent under this head for purchasing measuring-tape, parallel rulers, &c., and some country-made tools, repairs to the existing tools, and for public works contingencies.

39. *Establishment.*—Rs. 192 were spent under this head towards the pay of the Municipal overseer.

40. *Tolls and Road Charges.*—The total cost incurred in improving the town roads was Rs. 2,353 out of the actual receipts of Rs. 4,900 from tolls or 48 per cent.

41. *Grant II, Education.*—There were one Middle school, one Upper Primary school and nine Lower Primary schools including Muhammadan school and that for Pariahs. The total cost incurred under this head was Rs. 2,559 against Rs. 3,063 of the previous year as noted below:—

	1893–94. RS.	1894–95. RS.
(1) Municipal Schools—		
(1) Salary System—		
(*a*) Middle school	1,425	1,237
(2) Salary-results System—		
(*a*) Secondary schools	..	..
(*b*) Primary schools	1,483	1,150

11. *Tax on Animals and Vehicles and Registration of Carts.*—The receipts under these heads amounted to Rs. 309–8–0 and Rs. 215 against Rs. ~~279–8–0~~ and Rupees ~~208–8–0~~, respectively, of the previous year.

12. *Coercive Processes.*—In 437 cases distress warrants were issued, of which 233 were those that were executed and cancelled and 204 that remained unexecuted at the close of the year. In no case was property sold.

13. *Tolls.*—The privilege of collecting tolls during the year under report was sold to the highest bidder for Rs. 7,000 against Rs. 9,890 of the last year. The decrease was due to the opening of the East Coast Railway. As in last year, tolls were levied at six gates. No expenditure was incurred during the year for establishment as the tolls were leased out. The share at 30 per cent. due to the district board was paid within the year. Rs. 4,900 were collected as municipal share within the year against Rs. 3,956 of 1893–94. It is but just that the municipal council should be entitled to a larger share of tolls income as represented in this office letter No. 1 M., dated 8th January 1895, giving cover to the budget for the current year embodied in G.O., dated 8th March 1895, No. 377 M.

14. *Incidence of Taxation.*—The total average incidence was As. 10–3 including tolls and As. 5–7 excluding them, against As. 9–6 and As. 5–9, respectively, of last year. The increase over the former is due to the increased percentage in the municipal share of tolls and the slight decrease under the latter may be attributed to the fact that the collections under tax on arts, &c., fell off owing to the desertion of all railway contractors paying profession-tax.

B.—Miscellaneous Receipts.

15. The total receipts under this head amounted to Rs. 3,336 against Rs. 3,865 of the previous year as may be seen from the accompanying statement :—

	1894–95.	1893–94.
	Rs.	Rs.
(*a*) Rent of lands, buildings, &c., sale-proceeds of land, produce of lands, and sale-proceeds of old materials, &c.	25	79
(*b*) Sale-proceeds of night-soil, street-refuse, &c.	53	..
(*c*) Fees and revenues from markets and slaughter-house	593	682
(*d*) Fees from educational institutions	1,007	927
(*e*) License fees	117	74
(*f*) Other fees	326	848
(*g*) Fines under Municipal and other Acts	444	382
(*h*) Grants from Government	..	19
(*i*) Grants from local funds	500	500
(*j*) Recoveries for services rendered to private individuals	161	137
(*k*) Miscellaneous	20	42
(*l*) Advances recovered	60	175
(*m*) Realization under Special Acts	30	..
Total	3,336	3,865

16. *Rent of Lands, Buildings, &c.*—Rs. 25 entered under this head were composed of the following :—

(*a*) The municipal garden near the municipal middle school building was leased out for an annual rent of Rs. 5. This amount was realized during the year.

(*b*) Rs. 20 were on account of sale-proceeds of empty kerosine-oil tins and unserviceable articles and old materials, &c. The sale-proceeds of old materials of the municipal dispensary building which was repaired were included in the amount for 1893–94. Hence the decrease in the amount of the year under report.

17. *Sale-proceeds of Night-soil, Street-refuse, &c.*—Rs. 53 were collected during the year on account of sale-proceeds of sweepings of the municipal cart-stand and of street-sweepings.

18. *Rent of Markets and Slaughter-house.*—The right of collecting fees in the municipal markets, viz., vegetable market and fish bazaar, was leased out for Rupees

415 against Rs. 450 of the previous year. The decrease was due to want of competition. The whole amount, viz., Rs. 415, was collected during the year. The Municipal slaughter-house was leased out for Rs. 98, which amount was fully realized during the year. The ground-rent of market godowns was collected departmentally as usual. The total demand was Rs. 119–12–3 being fixed at the rate of three pies per diem for each site of the ground. Of this, Rs. 77–3–9 were collected within the 31st March 1895, leaving a balance of Rs. 42–8–6 for adjustment in the current year; Rs. 21–3–0 were since collected and the small balance will be adjusted ere long. The arrears outstanding at the beginning of the year is Rs. 24–2–6, of which Rs. 2–13–0 were collected during the year, leaving a balance of Rs. 21–5–6 for adjustment in the current year.

19. *Fees and revenues from Educational Institutions*—amounted to Rs. 1,007 against Rs. 927 of the previous year and Rs. 1,000 of the revised estimate. The increase is due to the increased attendance of the Municipal Upper Primary school.

20. *License Fees.*—The amount collected as license fees was Rs. 117 against Rs. 74 of the previous year and Rs. 80 of the revised estimate. The item being of a fluctuating nature calls for no remark for the increase.

21. *Other Fees—Cart-stand Fees.*—The right of collecting cart-stand fees was leased out during the year for Rs. 325 against Rs. 835 of the previous year. The decrease was due to want of competition, as the number of carts halting in the Municipal cart-stand was affected owing to the opening of the East Coast Railway. The whole of the leased amount was collected within the year. Rs. 27–15–6 were spent in the year under report for the repairs of the thatched sheds in the Municipal cart-stand; hence the net revenue from cart-stand was Rs. 297 in round numbers.

22. *Fines under Municipal and other Acts*—were Rs. 444 against Rs. 382 of the previous year. The increase was due to the institution of more nuisance cases in the year with a view of improving the sanitary condition of the town.

23. *Grants from Government.*—Nothing was realized under this head during the year for the following reasons :—

(1) No results grant was earned by the girls in the Municipal Muhammadan school.

(2) The gymnast being untrained no provincial grant was drawn on his account.

(3) With a view to draw in a lump sum the whole amount of provincial stipendiary grant for the training of the gymnastic instructor after ascertaining the total expenditure, nothing was drawn during the year.

24. *Grants from Local Funds.*—Rs. 500 were the usual amount of contribution received from the Taluk Board, Narsapatam, for the upkeep of the municipal dispensary.

25. *Recoveries for services rendered to Private Individuals.*—Under this head Rupees 147–14–0 were collected as private scavenging fees against Rs. 125–2–0 of last year, and Rs. 13–2–0 as fees for cleaning cess-pools of certain private individuals against Rs. 11–8–0 of the previous year. The increase is due to the large number of private latrines brought under municipal private scavenging agency in the third quarter of the year under report.

26. *Miscellaneous.*—Rs. 17 were realized as fees for numbering carts, and Rs. 3–6–0 as "refunds of expenditure of previous year on account of damages to Municipal lanterns.

27. *Realization under Special Acts.*—Rs. 30 were realized during the year on account of fees for granting license under Act II of 1888 (Places of Public Resort Act).

III.—Expenditure.

28. The subjoined statement shows the different heads of expenditure incurred during the year as compared with those of 1893–94 and the revised estimate for 1894–95 :—.

II.—Receipts.

6. The following statement shows the several items of receipts of this municipality during the year as compared with those of the previous year and with the revised estimate :—

Items.	Actuals for 1893–94.	Actuals for 1894–95.	Increase.	Decrease.	Revised estimate for 1894–95.

Total Receipts ..	13,947	14,191	1,279	1,035	15,190
Total including balance ..	15,095	15,273	1,279	1,101	16,270

7. The year opened with a balance of Rs. 1,081–12–6. The total current receipts, inclusive of opening balance, amounted to Rs. 15,273–2–6 against Rs. 15,095–1–7, actuals of the previous year and Rs. 16,270 anticipated in the revised estimate. The increase over the actuals of the previous year is chiefly due to the increase under tolls, and the decrease under the revised estimate is due to over-estimate.

A.—*Receipts from Taxation.*

8. *House-tax.*—As usual, the tax under this head was levied at $6\frac{1}{4}$ per cent. on the annual rent value of the buildings. The assessment of the tax was based on the actual rental in case of buildings let out. As regards houses which were not leased out, the annual rent was deduced from the rent of a model house in the neighbourhood, regard being had to position, extent, accommodation, comforts, and lastly local demands. The house-tax register was thoroughly revised in the year under report both by my predecessors and by me. The result of the revision of this tax is that the demand has increased from Rs. 1,935–6–8 to Rs. 2,317–0–6, or 382 in round numbers. The procedure adopted in revising this tax register was reported in this office letter No. 1 M., dated 8th January 1895, embodied in G.O., dated 8th March 1895, No. 377 M., Local and Municipal, reviewing the budget for 1895–96. As the revision of the house-tax had to be thoroughly and very carefully carried out, it occupied more or less the whole year. The frequent changes in the office of the Chairman might also be attributed to the pretty long time taken up for the revision.

The demand originally fixed under this head was Rs. 2,336–3–6. The council remitted on appeal Rs. 19–3–0, leaving Rs. 2,317–0–6 as final demand. Of this amount, Rs. 1,906–15–2 or 82·3 per cent. were collected during the year, leaving a balance of Rs. 410–1–4 to be adjusted in the current year. Of this amount of Rs. 410–1–4, Rs. 186–11–0 were since realized and Rs. 43–8–4 were subsequently found to be irrecoverable. The small balance still outstanding will be adjusted ere long.

The arrears outstanding at the commencement of the year, together with those of the previous years, amounted to Rs. 372, of which Rs. 200 were collected in the year under report, leaving a balance of Rs. 172 for adjustment in the current year. The reasons for non-adjustment of the whole outstanding arrears will be found in paragraph 10 (*a*) *infra*.

9. *Land-tax.*—The demand under this head was Rs. 2,393–14–2 against Rupees 2,400–13–1 of 1893–94. Rs. 2,141–3–6 or 89·47 per cent. were collected during the year, leaving a balance of Rs. 252–10–8 to be adjusted in the current year. The difference of Rs. 6–14–10 in the demand was due to the remission of the sum granted to the proprietor of the Anakápalle estate in favour of 22 acres of land taken up by the East Coast Railway department. Under G.O., dated 25th May 1894, No. 658 M., the East Coast Railway is liable to pay land-tax and I have addressed the Manager of the East Coast Railway on the subject. A copy of the Government order was also forwarded to the Manager at his request and the matter is still pending disposal.

The arrears outstanding at the commencement of the year, together with those of the previous years, amounted to Rs. 684–15–3, of which Rs. 101–4–2 were collected in the year under report, leaving a balance of Rs. 583–11–1 for adjustment in the current year.

The land-tax register was revised in the current year. The total extent of land assessed in the year was 4,435 $\frac{96}{100}$ acres. The assessment was based on the extent of land and the nature of the soil, the rates being 2 $\frac{58}{121}$ pies on every 80 square yards of land in "Cheruvulopala," 1 $\frac{19}{121}$ pies in "Etiavala," 1 $\frac{58}{121}$ pies in "Ava" and $\frac{120}{121}$ pies in "Cheruvavenaka" divisions, sanctioned in G.O., dated 24th September 1886, Mis. No. 948 M., Local and Municipal.

10. *Tax on Arts, &c.*—The demand originally fixed by me under this head was Rs. 1,338–8–0. The council remitted on appeal Rs. 138, and Rs. 28 were written off the accounts as irrecoverable on account of death of certain tax-payers during the year. Thus the demand, as finally settled, is therefore Rs. 1,200–8–0, of which Rs. 1,019 or 84·9 were collected within the year, leaving a balance of Rs. 153–8–0 for adjustment in the current year. Of this balance, viz., Rs. 153–8–0, Rs. 37 were since realized and Rs. 70–8–0 were subsequently found to be irrecoverable. The small balance, viz., Rs. 46, will be collected shortly.

The arrears of the previous year were Rs. 81, of which Rs. 32 were collected during the year, leaving a balance of Rs. 49 to be adjusted in the current year. As usual, the profession-tax register was revised during the year. The number of persons finally assessed to the tax on arts, &c., in each class was as follows :—

	Number of persons assessed.	Total assessment.
		Rs.
Class I	..	..
„ II	..	..
„ III	9	225
„ IV	14	168
„ V	31½	189
„ VI	113	339
„ VII	4½	9
„ VIII	270½	270½
Total ..	442½	1,200½

10A. The chief causes for the outstanding arrears above referred to were the frequent changes in the office of the Chairmanship and the difficulty in ascertaining the whereabouts of certain of the tax-payers who left the town and want of time for the minute enquiry into every detail. I have already represented that a careful and thorough revision of the house-tax had taken up much of the time of the council, leaving little or no time for a satisfactory adjustment of the arrears. A sub-committee will be formed shortly and every effort will be taken for a full and thorough adjustment of the arrears.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From M.R.Ry. V. RAMAMURTI CHETTI GARU, Chairman, Municipal Council, Anakápalle, to the Chief Secretary to Government (through the Head Assistant Collector, Vizagapatam), dated Anakápalle, 28th June 1895, No. 135.

I have the honour to submit my report on the administration of this municipality for 1894–95, together with the prescribed statements of receipts and charges.

I.—CONSTITUTION OF THE COUNCIL.

2. The maximum number of councillors for this municipality is thirteen as prescribed in G.O., dated ~~13th~~ April 1883, No. 864, Financial. The constitution of the council on the 31st March 1895 was as shown below:—

Ex-officio councillor	1
Official councillors	3
Non-official councillors	9
Total	13

3. The office of the Chairman was held by M.R.Ry. G. Venkatasastri Garu, the local Sub-Registrar of Assurances, from 1st April to 21st July 1895, who, on being transferred to Bikkavolu, vacated his seat handing over charge of the Chairman to the Head Assistant Collector, the Revenue Divisional officer and *ex-officio* councillor. The latter, with the consent of the municipal council, delegated his powers under section 32 (2) of the Act to M.R.Ry. K. Kotannah Puntulu Garu, a councillor and local Deputy Tahsildar who held the office till 15th January 1895. I, the local Sub-Registrar, was elected as Chairman of the council on the 3rd December 1894 and my election was approved by Government in notification No. 8 published in the *Fort St. George Gazette*, dated 8th January 1895.

4. The privilege of election is not granted to this municipality. The council, however, elect their Chairman.

5. The total number of meetings actually held in the year was seventeen against the same number of the previous year. Besides these, six meetings had to be adjourned for want of quorum. The average attendance of the meetings actually held was 6·64 as detailed below:—

(*a*) Officials	2·17
(*b*) Non-officials	4·47
Total	6.64

The average attendance of Europeans was ·17, while that of Natives 6·47. Though there is no increase in the number of meetings actually held, it is to be noted that the average attendance of both officials and non-officials has improved during the year.

Forwarded.

2. The Municipality has lately been ins=pected by Mr Morris when acting Collector – A copy of his remarks is sent herewith. I have joined this District only a few days ago and I have therefore no personal remarks to offer.

ok

4/3/7

[illegible] — aged [illegible]

when they do not require it. When they do want it they are glad enough to take it. And further extension of the drain in its present direction means that it must either run up hill or a deepish drain must be excavated so as to lead the water through some highish ground to an irrigation channel to the east.

7 The floor of the slaughter house wants mending and pointing with lime, or else reflooring with cement; so that blood may not sink into it. The drains from it also want attention.

24th June 95 } 127 R Morris
Vizagapatam } Acg Collector

of portion of the spaces where there are latrines should be allowed to be used for building purposes. The remarks on the management of dry earth latrines in the Jail Code might be studied with great advantage.

7. The Roads when visited the town were in good order.

8. The open drain remarked by the Dy Sanitary Commissioner will take time and money to improve. The adjoining ryots have not at all a use for the waste water, and cannot be compelled to take it.

to redu

they do all they can to
induce visitors to squ
outside the latrines.
The consequences are
nasty. The tolies shoul
be made to gather up
not only the Excreta
deposited not only in
the latrines, but also
those which are emitte
outside. They shou
also be fined if a
man found uses a
ground outside the
latrines. They will
then see that it will
be desirable to indu
people to go inside.
The galvanized iro
latrines should be cap
of being taken to pi
and moved so that
when the soil in or
place gets foul
latrine may be shif
and for this purpo

of using the stuff as manure.
and later on of buying it
from the Municipality.

5. The town sweepings
are sold: but no one
knows whether the purchaser
uses them for manure or not.

6. The latrines are still
abominable places. The
Chairman says a moveable
galvanized iron latrine
has been bought and will
be put together this year,
and others will be bought
as funds admit. One
or two should be bought
Each year. The latrines
so called are now not
so public as formerly as
tatties have been put
up all round them: but
the tolies take no steps
to insist on people going
inside. It is not im-
probable that in order
to reduce their own work

they do all there can to have been thoroughly repaired. The latrine is worked in the dry earth system but nothing is done to keep the earth required for use during wet weather dry. It should be kept in a covered place.

4. Night soil is now buried in shallow trenches. No depôt has been opened as there is no sale. The Municipality has acquired a piece of land in which the night soil is being buried and which is to be ploughed up and cultivated departmentally as an object lesson to the ryots in the neighbourhood. I hope the experiment will succeed. The Chairman should take all possible pains to that end, so that the ryots may see the advantages

well which has been excavated at some distance off in an unobjectionable place, and the construction of the masonry work of which is in progress, is completed. I have myself doubts as to whether this condemned well (Pobbaridhi well) is really so badly situated as the Dy Sanitary Commissioner thinks. The nearest point of the female latrine is twice the depth of the well away from the well's mouth and the latrine is therefore outside the cone of drainage into the well.

2. A burying and burning ground has been provided at a spot selected by Mr Willock outside the town near the river. Burying and burning inside the town is still unprohibited however.

3. The Hospital buildings

Remarks of R. Morris Esqr Cy

~~Collector~~ of Vizagapatam
on the Anakapalli Municipality

1. One of the two condemned wells referred to in para 5 of the Dy Sanitary Commissioner's notes printed in G. O. dated 17th August 1894 No 1101 M., Local and Municipal, is closed; a new well being dug at some distance in an unobjectionable place close to the roadway. There is however no plat=form round the well the consequence being that there is no efficient means of draining away the waste water. A plat=form should be built as soon as possible and a small drain to take the waste water either into the adjoining fields or into the road side drain. The other objectionable well is still in use but will be closed when a new

Note to Statement I.

1. Tax on arts, &c., is levied on ~~the first~~ all classes.
2. Tax on buildings is levied at 6¼ per cent. and tax on lands at * annas ~~per cent. of rent value.~~ for every 80 square yards.
3. Water-tax on buildings and lands is levied at nil per cent.
4. Tax on vehicles and animals is levied at — the maximum rates.
5. Tax on carts, &c., is levied at Rs. / per cart per annum.
6. Tolls are levied at half the maximum rates.
7. License-fees are levied at the rates sanctioned in G.O. dated 11th July 1891, No. 1075 M. Mis.
8. The house-tax registers were last revised in the official year 1894-95 and the land tax registers in the official year. 1894-95
9. Total extent of land assessed is 4435.96 acres.
10. The mode of estimating the annual rental of houses and lands is as follows:—

The House-tax assessment was based on the actual rent value in cases of houses let out. In cases in which houses are not leased out the actual rent of a model rented house in the vicinity was first ascertained from which the annual rental of the houses in question was calculated, regard being had to position, extent, accommodation, comforts and local demands.

The Land-tax is based at the acreage rates.

* At the rates sanctioned in G.O. dated 24th September 1886, No. 948 M. Mis.

Municipal Office, Anakapalle, 28th June 1895.

V. Jaganmohana Rao, Chairman.
