G.O., No. 1807, M., 31st Oct. 1895.

OCTOBER.

Administration Report.

Reviewing the — of the Coimbatore Municipal Council for 1894–95.

2. The number of meetings held by the municipal council was twenty-three as in the previous year. The average attendance of the non-official members declined and was indifferent, while notwithstanding the remarks in paragraph 2 of G.O., No. 1195 M., dated 4th September 1894, that of the officials continued to be very poor. Twelve seats were filled by election during the year and eight of them were contested, 75·3 per cent. of the voters concerned attending the poll.

3. *Receipts.*—(1) Owing apparently to the revision of the registers, the net current demand of the tax on buildings rose from Rs. 15,366 to Rs. 16,917. Under the tax on lands the demand showed a decline of Rs. 76, for which no explanation has been offered. The collections under these heads improved and were, on the whole, good.

(2) There was an increase in the receipts from the tax on vehicles, animals and carts, from avenues and from license fees, but owing to want of competition the income from markets declined. The amount realized from the sale of sweepings advanced, but the revenue from this source is capable of much further development.

(3) The number of houses served by the private scavenging agency, it is noticed with regret, fell from 461 to 416, but the service was worked at a profit of Rs. 218 to the municipal council, instead of at a loss of Rs. 336 as in 1893–94. It is observed that arrears of fees amounting to Rs. 295 were written off as irrecoverable. This would not have been necessary, had the council followed the repeated orders of Government to collect the fees in advance; it is hoped that these instructions will be fully carried out in the current year. The fact that the people object to paying in advance is no reason for allowing arrears to accumulate and in such cases the course pointed out in paragraph 3 (3) of G.O., No. 1195 M., dated 4th September 1894, should be invariably followed. The municipal council should also see that the Sanitary Inspectors keep a careful watch over the premises of those persons who have not joined the private scavenging system and prosecute such of them as fail to keep their backyards in a cleanly condition.

4. *Expenditure*—(1) *Public Works.*—No new work of any importance was undertaken during the year. The outlay on communications amounted to Rs. 6,610 or 64·5 per cent. of the income from tolls. The Divisional officer has not reported upon the condition of the roads and this omission should now be supplied. Last year they were stated to have been in bad order. In this connection, the municipal council's attention will be drawn to the Collector's remarks in the concluding portion of paragraph 4 of his endorsement.

(2) *Education.*—The net expenditure on education was Rs. 5,169, or 15·5 per cent. of the income from taxation. All but Rs. 1,078 of this was devoted to primary education. As in the previous year, the municipal council maintained seven primary schools on the salary-result system and aided two secondary, and twenty-four primary schools against twenty in 1893–94, with grants. There was a noteworthy increase in the attendance at these institutions taken together and the results obtained at the departmental and grant examinations were fair, but it is matter for regret that nearly 7 per cent. of the allotment for grants was again allowed to lapse. No information has been furnished regarding the working of the salary-grant schools, an omission which should be supplied in future reports. The total number of boys under instruction in the municipal and aided schools rose from 68·2 to 77·4 per cent. of the male population of school-going age. The proportion of uncertificated teachers employed in these institutions is once more high. It should be at once reduced.

(3) *Medical Relief.*—There was again a marked increase in the number of patients treated both at the municipal hospital and at the dispensary for women and children, which is ascribed by the District Surgeon to the growing popularity of the institutions. One hundred and twenty-eight cases of labour were attended by the municipal midwife and the female apothecary, against 130 in 1893–94.

(4) *Vaccination and Vital Statistics.*—The reported number of persons vaccinated during the year increased by 187. The quality of the work also improved and was satisfactory, the ratio of success being 98·7 against 90·8 per cent. in 1893–94. Infantile vaccination made some progress, but the total number of infants successfully vaccinated was only 26·5 per mille of the population, or about two-thirds of the registered number of births.

Order—No. 1807 M., dated 31st October 1895.

The receipts and charges of the Coimbatore Municipality for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94:—

(3) The number of houses served by the private scavenging agency, it is noticed with regret, fell from 461 to 416, but the service was worked at a profit of Rs. 218 to the municipal council, instead of at a loss of Rs. 336 as in 1893–94. It is observed that arrears of fees amounting to Rs. 295 were written off as irrecoverable. This would not have been necessary, had the council followed the repeated orders of Government to collect the fees in advance; it is hoped that these instructions will be fully carried out in the current year. The fact that the people object to paying in advance is no reason for allowing arrears to accumulate and in such cases the course pointed out in paragraph 3 (3) of G.O., No. 1195 M., dated 4th September 1894, should be invariably followed. The municipal council should also see that the Sanitary Inspectors keep a careful watch over the premises of those persons who have not joined the private scavenging system and prosecute such of them as fail to keep their backyards in a cleanly condition.

4. *Expenditure*—(1) *Public Works.*—No new work of any importance was undertaken during the year. The outlay on communications amounted to Rs. 6,610 or 64·5 per cent. of the income from tolls. The Divisional officer has not reported upon the condition of the roads and this omission should now be supplied. Last year they were stated to have been in bad order. In this connection, the municipal council's attention will be drawn to the Collector's remarks in the concluding portion of paragraph 4 of his endorsement.

(2) *Education.*—The net expenditure on education was Rs. 5,169, or 15·5 per cent. of the income from taxation. All but Rs. 1,078 of this was devoted to primary education. As in the previous year, the municipal council maintained seven primary schools on the salary-result system and aided two secondary, and twenty-four primary schools against twenty in 1893–94, with grants. There was a noteworthy increase in the attendance at these institutions taken together and the results obtained at the departmental and grant examinations were fair, but it is matter for regret that nearly 7 per cent. of the allotment for grants was again allowed to lapse. No information has been furnished regarding the working of the salary-grant schools, an omission which should be supplied in future reports. The total number of boys under instruction in the municipal and aided schools rose from 68·2 to 77·4 per cent. of the male population of school-going age. The proportion of uncertificated teachers employed in these institutions is once more high. It should be at once reduced.

(3) *Medical Relief.*—There was again a marked increase in the number of patients treated both at the municipal hospital and at the dispensary for women and children, which is ascribed by the District Surgeon to the growing popularity of the institutions. One hundred and twenty-eight cases of labour were attended by the municipal midwife and the female apothecary, against 130 in 1893–94.

(4) *Vaccination and Vital Statistics.*—The reported number of persons vaccinated during the year increased by 187. The quality of the work also improved and was satisfactory, the ratio of success being 98·7 against 90·8 per cent. in 1893–94. Infantile vaccination made some progress, but the total number of infants successfully vaccinated was only 26·5 per mille of the population, or about two-thirds of the registered number of births.

2. The number of meetings held by the municipal council was twenty-three as in the previous year. The average attendance of the non-official members declined and was indifferent, while notwithstanding the remarks in paragraph 2 of G.O., No. 1195 M., dated 4th September 1894, that of the officials continued to be very poor. Twelve seats were filled by election during the year and eight of them were contested, 75·3 per cent. of the voters concerned attending the poll.

3. *Receipts.*—(1) Owing apparently to the revision of the registers, the net current demand of the tax on buildings rose from Rs. 15,366 to Rs. 16,917. Under the tax on lands the demand showed a decline of Rs. 76, for which no explanation has been offered. The collections under these heads improved and were, on the whole, good.

(2) There was an increase in the receipts from the tax on vehicles, animals and carts, from avenues and from license fees, but owing to want of competition the income from markets declined. The amount realized from the sale of sweepings advanced, but the revenue from this source is capable of much further development.

(3) The number of houses served by the private scavenging agency, it is noticed with regret, fell from 461 to 416, but the service was worked at a profit of Rs. 218 to the municipal council, instead of at a loss of Rs. 336 as in 1893–94. It is observed that arrears of fees amounting to Rs. 295 were written off as irrecoverable. This would not have been necessary, had the council followed the repeated orders of Government to collect the fees in advance; it is hoped that these instructions will be fully carried out in the current year. The fact that the people object to paying in advance is no reason for allowing arrears to accumulate and in such cases the course pointed out in paragraph 3 (3) of G.O., No. 1195 M., dated 4th September 1894, should be invariably followed. The municipal council should also see that the Sanitary Inspectors keep a careful watch over the premises of those persons who have not joined the private scavenging system and prosecute such of them as fail to keep their backyards in a cleanly condition.

4. *Expenditure*—(1) *Public Works.*—No new work of any importance was undertaken during the year. The outlay on communications amounted to Rs. 6,610 or 64·5 per cent. of the income from tolls. The Divisional officer has not reported upon the condition of the roads and this omission should now be supplied. Last year they were stated to have been in bad order. In this connection, the municipal council's attention will be drawn to the Collector's remarks in the concluding portion of paragraph 4 of his endorsement.

(2) *Education.*—The net expenditure on education was Rs. 5,169, or 15·5 per cent. of the income from taxation. All but Rs. 1,078 of this was devoted to primary education. As in the previous year, the municipal council maintained seven primary schools on the salary-result system and aided two secondary, and twenty-four primary schools against twenty in 1893–94, with grants. There was a noteworthy increase in the attendance at these institutions taken together and the results obtained at the departmental and grant examinations were fair, but it is matter for regret that nearly 7 per cent. of the allotment for grants was again allowed to lapse. No information has been furnished regarding the working of the salary-grant schools, an omission which should be supplied in future reports. The total number of boys under instruction in the municipal and aided schools rose from 68·2 to 77·4 per cent. of the male population of school-going age. The proportion of uncertificated teachers employed in these institutions is once more high. It should be at once reduced.

(3) *Medical Relief.*—There was again a marked increase in the number of patients treated both at the municipal hospital and at the dispensary for women and children, which is ascribed by the District Surgeon to the growing popularity of the institutions. 2. The number of meetings held by the municipal council was twenty-three as in the previous year. The average attendance of the non-official members declined and was indifferent, while notwithstanding the remarks in paragraph 2 of G.O., No. 1195 M., dated 4th September 1894, that of the officials continued to be very poor. Twelve seats were filled by election during the year and eight of them were contested, 75·3 per cent. of the voters concerned attending the poll.

3. *Receipts.*—(1) Owing apparently to the revision of the registers, the net current demand of the tax on buildings rose from Rs. 15,366 to Rs. 16,917. Under the tax on lands the demand showed a decline of Rs. 76, for which no explanation has been offered. The collections under these heads improved and were, on the whole, good.

(2) There was an increase in the receipts from the tax on vehicles, animals and carts, from avenues and from license fees, but owing to want of competition the income from markets declined. The amount realized from the sale of sweepings advanced, but the revenue from this source is capable of much further development.

(3) The number of houses served by the private scavenging agency, it is noticed with regret, fell from 461 to 416, but the service was worked at a profit of Rs. 218 to the municipal council, instead of at a loss of Rs. 336 as in 1893–94. It is observed that arrears of fees amounting to Rs. 295 were written off as irrecoverable. This would not have been necessary, had the council followed the repeated orders of Government to collect the fees in advance; it is hoped that these instructions will be fully carried out in the current year. The fact that the people object to paying in advance is no reason for allowing arrears to accumulate and in such cases the course pointed out in paragraph 3 (3) of G.O., No. 1195 M., dated 4th September 1894, should be invariably followed. The municipal council should also see that the Sanitary Inspectors keep a careful watch over the premises of those persons who have not joined the private scavenging system and prosecute such of them as fail to keep their backyards in a cleanly condition.

4. *Expenditure*—(1) *Public Works.*—No new work of any importance was undertaken during the year. The outlay on communications amounted to Rs. 6,610 or 64·5 per cent. of the income from tolls. The Divisional officer has not reported upon the condition of the roads and this omission should now be supplied. Last year they were stated to have been in bad order. In this connection, the municipal council's attention will be drawn to the Collector's remarks in the concluding portion of paragraph 4 of his endorsement.

(2) *Education.*—The net expenditure on education was Rs. 5,169, or 15·5 per cent. of the income from taxation. All but Rs. 1,078 of this was devoted to primary education. As in the previous year, the municipal council maintained seven primary schools on the salary-result system and aided two secondary, and twenty-four primary schools against twenty in 1893–94, with grants. There was a noteworthy increase in the attendance at these institutions taken together and the results obtained at the departmental and grant examinations were fair, but it is matter for regret that nearly 7 per cent. of the allotment for grants was again allowed to lapse. No information has been furnished regarding the working of the salary-grant schools, an omission which should be supplied in future reports. The total number of boys under instruction in the municipal and aided schools rose from 68·2 to 77·4 per cent. of the male population of school-going age. The proportion of uncertificated teachers employed in these institutions is once more high. It should be at once reduced.

(3) *Medical Relief.*—There was again a marked increase in the number of patients treated both at the municipal hospital and at the dispensary for women and children, which is ascribed by the District Surgeon to the growing popularity of the institutions. One hundred and twenty-eight cases of labour were attended by the municipal midwife and the female apothecary, against 130 in 1893–94.

(4) *Vaccination and Vital Statistics.*—The reported number of persons vaccinated during the year increased by 187. The quality of the work also improved and was satisfactory, the ratio of success being 98·7 against 90·8 per cent. in 1893–94. Infantile vaccination made some progress, but the total number of infants successfully vaccinated was only 26·5 per mille of the population, or about two-thirds of the registered number of births.

The table shows a continuous and satisfactory increase, both in the number treated and in the daily average sick, a strong proof of the growing popularity of the institutions and an appreciation of European methods of treatment.

In-door.—The total treated was 503 against 504 in 1893–94. The number of deaths was 44 or 8·7 against 49 or 9·7 per cent. and the average daily sick was 21·49 against 21·02.

Out-door.—There were 45,867 patients treated against 36,969 in 1893–94, showing an increase of 8,898. The increase is observed in both institutions, viz., main hospital from 19,072 to 23,774 and women and children's dispensary from 17,897 to 22,093. The average daily attendance has also increased to 292·26 against 233·68, viz., main hospital from 100·15 to 122·29, women and children's dispensary from 133·53 to 148·48.

Surgical Operations.—The number of major and minor operations has considerably increased, 116 major and 1,715 minor against 87 and 1,280 respectively in the previous year; of these 67 major and 831 minor operations were done at the main hospital, 49 major and 884 minor at the women and children's dispensary. There were four deaths—two cases of complex labour in which podalic version was performed in one, and craniotomy in the other, one puerperal convulsion in which forceps were used and the fourth induction of premature labour for puerperal eclampsia.

8. *Midwifery.*—The total number of parturition cases attended by the midwife attached to the municipal hospital and by the lady apothecary attached to the women and children's dispensary was 128 against 130 in the previous year, viz., 87 natural and 41 otherwise, of these 50 by the lady apothecary in private residences, 27 natural and 23 otherwise; the midwife confined 24 in hospital and 54 in the town against 33 and 53 respectively in the previous year. The midwife is paid on result system.

COIMBATORE, 17*th May* 1895. (Signed) J. F. FITZPATRICK, Surgeon-Lt.-Col., *District Medical and Sanitary Officer.*

Current No. 227-Rev.

Forwarded.

(Signed) T. V. NARAYANASWAMI AIYAR,
19*th July* 1895. *Deputy Collector.*

Endorsement on the annual report of the Coimbatore Municipality for 1894–95, dated 18th July 1895, No. 768.

Forwarded for the orders of Government.

2. *Constitution.*—Although at the end of the year there was only one official member, there appear to have been three at its commencement, and their average attendance should have been more than one; that of non-officials might also have been more than eight, seeing that the number of them was as many as seventeen for the greater part of the year.

3. *Financial.*—The year opened with a deficit of Rs. 2,238–13–11 and the total receipts amounted to Rs. 46,509–10–9. The net total receipts were therefore Rs. 44,270–12–10 against Rs. 43,060, the sanctioned estimate, and Rs. 43,720, the revised estimate of the year, and Rs. 43,819–9–7, the actuals of the preceding year. The increase occurs chiefly in the items (1) tax on buildings, (2) avenue receipts and (3) produce of lands, garden, &c.

4. The total charges were Rs. 43,665–15–4 or Rs. 1,595–15–4 more than the sanctioned estimate and Rs. 1,325–15–4 in excess of the revised estimate. A large expenditure chiefly in the items (1) repairs of communications, (2) results grants, (3) medicines and supplies and (4) sundries and contingencies, which is explained by the chairman, accounts for the increase. Compared with the actuals of the preceding year,

there is a falling off in the total charges of Rs. 2,392–8–2, which is due to greater expenditure in 1893–94 on account of (1) repairs to buildings and to works under drainage, (2) sundries and contingencies under hospitals and dispensaries and (3) conservancy.

Works.—There were no new works in the year under report, and the repairs to roads, buildings, &c., are detailed in part II of statement II-A. The expenditure on the upkeep of roads amounted to Rs. 6,609 and formed 64 per cent. of the net income from tolls. Of the amount Rs. 3,927–10–8 were paid for road materials, Rupees 1,784–12–0 were spent on account of the pay of road coolies, Rs. 281–6–7 on revetment to roads, repair of culverts and removing road earth, and the remainder Rs. 616–0–6 on the repair of four roads and a lane.

Under buildings, the hospital and latrines were repaired, while under "drainage" and "water-supply," the repairs of four drains and six wells and a pond was carried out. The removal of earth from the side drains was also effected under the former head and the emptying of a popular teppakulam of its dirty water and the cleansing of a well under the latter.

The Revenue Divisional officer has not reported on the condition of the roads as required. His attention has been drawn to the omission. For myself I have just joined the district and am therefore not in a position to say much about them; the main ones are broad and, though dusty, are metalled with kunkur, which stands rain well; but there is still room for improvement in many of the minor ones.

5. Education has been well attended to, the municipality aiding two secondary schools, itself maintaining seven primary schools as in the previous year, and the sum allotted for results grants being Rs. 300 more.

It is to be regretted that the provision of Rs. 130 for stipends to normal students was not utilized owing to candidates not having offered themselves to undergo training.

6. Some Rs. 19,000 was spent on sanitation and medical services, and the town has a good reputation for healthiness, but from the District Medical officer's note to the council on the subject, copy of which is enclosed, there is evidently great room for improvement here also; the *personnel* of the chairman, however, has recently been changed, and the attention of the council being drawn to the matter, this improvement will now, it is to be hoped, be gradually effected. The hospital service remains popular. The Karamadai railway accident added exceptionally to the numbers of in-patients in the previous year, but even so, there was only one in-patient less in the year under report and taking both hospital and branch dispensary together, 8,898 out-patients more.

7. In checking the accounts the following defects were found—

(1) Excess expenditure over budget provision on—

(i) (2) Repairs and communications under Grant I.

(ii) (*b*) Medicines and supplies and (*d*) sundries and contingencies under hospitals and dispensaries in Grant III.

(iii) "Printing" and (v) "other items" under (9) "other charges" subordinate to grant IV; and (iv) (*d*) office contingencies other than (*b*) (ii) under grant V.

(2) From statement V-B, it appears that two secondary schools were aided by the municipal council with a salary grant aggregating Rs. 1,077–10–5. But this is not shown in statement I furnished by the Assistant Inspector of Schools.

(3) The average net cost per pupil in each class of municipal schools comes to Rs. 12–9–10 and Rs. 3–10–2 and not Rs. 15–8–11 and Rs. 3–14–0 as shown in column 20 of statement V-A.

(Signed) H. A. SIM,
Ag. Collector.

COIMBATORE,
3*rd August* 1895.

The table shows a continuous and satisfactory increase, both in the number treated and in the daily average sick, a strong proof of the growing popularity of the institutions and an appreciation of European methods of treatment.

In-door.—The total treated was 503 against 504 in 1893–94. The number of deaths was 44 or 8·7 against 49 or 9·7 per cent. and the average daily sick was 21·49 against 21·02.

Out-door.—There were 45,867 patients treated against 36,969 in 1893–94, showing an increase of 8,898. The increase is observed in both institutions, viz., main hospital from 19,072 to 23,774 and women and children's dispensary from 17,897 to 22,093. The average daily attendance has also increased to 292·26 against 233·68, viz., main hospital from 100·15 to 122·29, women and children's dispensary from 133·53 to 148·48.

Surgical Operations.—The number of major and minor operations has considerably increased, 116 major and 1,715 minor against 87 and 1,280 respectively in the previous year; of these 67 major and 831 minor operations were done at the main hospital, 49 major and 884 minor at the women and children's dispensary. There were four deaths—two cases of complex labour in which podalic version was performed in one, and craniotomy in the other, one puerperal convulsion in which forceps were used and the fourth induction of premature labour for puerperal eclampsia.

8. *Midwifery.*—The total number of parturition cases attended by the midwife attached to the municipal hospital and by the lady apothecary attached to the women and children's dispensary was 128 against 130 in the previous year, viz., 87 natural and 41 otherwise, of these 50 by the lady apothecary in private residences, 27 natural and 23 otherwise; the midwife confined 24 in hospital and 54 in the town against 33 and 53 respectively in the previous year. The midwife is paid on result system.

Coimbatore, 17*th May* 1895. (Signed) J. F. FITZPATRICK, Surgeon-Lt.-Col., *District Medical and Sanitary Officer.*

Current No. 227-Rev.

Forwarded.

(Signed) T. V. NARAYANASWAMI AIYAR, *Deputy Collector.*

19*th July* 1895.

Endorsement on the annual report of the Coimbatore Municipality for 1894–95, dated 18th July 1895, No. 768.

Forwarded for the orders of Government.

2. *Constitution.*—Although at the end of the year there was only one official member, there appear to have been three at its commencement, and their average attendance should have been more than one; that of non-officials might also have been more than eight, seeing that the number of them was as many as seventeen for the greater part of the year.

3. *Financial.*—The year opened with a deficit of Rs. 2,238–13–11 and the total receipts amounted to Rs. 46,509–10–9. The net total receipts were therefore Rs. 44,270–12–10 against Rs. 43,060, the sanctioned estimate, and Rs. 43,720, the revised estimate of the year, and Rs. 43,819–9–7, the actuals of the preceding year. The increase occurs chiefly in the items (1) tax on buildings, (2) avenue receipts and (3) produce of lands, garden, &c.

4. The total charges were Rs. 43,665–15–4 or Rs. 1,595–15–4 more than the sanctioned estimate and Rs. 1,325–15–4 in excess of the revised estimate. A large expenditure chiefly in the items (1) repairs of communications, (2) results grants, (3) medicines and supplies and (4) sundries and contingencies, which is explained by the chairman, accounts for the increase. Compared with the actuals of the preceding year,

there is a falling off in the total charges of Rs. 2,392–8–2, which is due to greater expenditure in 1893–94 on account of (1) repairs to buildings and to works under drainage, (2) sundries and contingencies under hospitals and dispensaries and (3) conservancy.

Works.—There were no new works in the year under report, and the repairs to roads, buildings, &c., are detailed in part II of statement II-A. The expenditure on the upkeep of roads amounted to Rs. 6,609 and formed 64 per cent. of the net income from tolls. Of the amount Rs. 3,927–10–8 were paid for road materials, Rupees 1,784–12–0 were spent on account of the pay of road coolies, Rs. 281–6–7 on revetment to roads, repair of culverts and removing road earth, and the remainder Rs. 616–0–6 on the repair of four roads and a lane.

Under buildings, the hospital and latrines were repaired, while under "drainage" and "water-supply," the repairs of four drains and six wells and a pond was carried out. The removal of earth from the side drains was also effected under the former head and the emptying of a popular teppakulam of its dirty water and the cleansing of a well under the latter.

The Revenue Divisional officer has not reported on the condition of the roads as required. His attention has been drawn to the omission. For myself I have just joined the district and am therefore not in a position to say much about them; the main ones are broad and, though dusty, are metalled with kunkur, which stands rain well; but there is still room for improvement in many of the minor ones.

5. Education has been well attended to, the municipality aiding two secondary schools, itself maintaining seven primary schools as in the previous year, and the sum allotted for results grants being Rs. 300 more.

It is to be regretted that the provision of Rs. 130 for stipends to normal students was not utilized owing to candidates not having offered themselves to undergo training.

6. Some Rs. 19,000 was spent on sanitation and medical services, and the town has a good reputation for healthiness, but from the District Medical officer's note to the council on the subject, copy of which is enclosed, there is evidently great room for improvement here also; the *personnel* of the chairman, however, has recently been changed, and the attention of the council being drawn to the matter, this improvement will now, it is to be hoped, be gradually effected. The hospital service remains popular. The Karamadai railway accident added exceptionally to the numbers of in-patients in the previous year, but even so, there was only one in-patient less in the year under report and taking both hospital and branch dispensary together, 8,898 out-patients more.

7. In checking the accounts the following defects were found—

(1) Excess expenditure over budget provision on—

(i) (2) Repairs and communications under Grant I.

(ii) (*b*) Medicines and supplies and (*d*) sundries and contingencies under hospitals and dispensaries in Grant III.

(iii) "Printing" and (v) "other items" under (9) "other charges" subordinate to grant IV; and (iv) (*d*) office contingencies other than (*b*) (ii) under grant V.

(2) From statement V-B, it appears that two secondary schools were aided by the municipal council with a salary grant aggregating Rs. 1,077–10–5. But this is not shown in statement I furnished by the Assistant Inspector of Schools.

(3) The average net cost per pupil in each class of municipal schools comes to Rs. 12–9–10 and Rs. 3–10–2 and not Rs. 15–8–11 and Rs. 3–14–0 as shown in column 20 of statement V-A.

Coimbatore, 3*rd August* 1895. (Signed) H. A. SIM, *Ag. Collector.*

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

The principal source is from wells; almost every house has its own well; the quality is generally bad.

There are 27 public wells, 2 tanks and 1 teppakolam within the municipal limits. The tanks were dry during the whole year. The teppakolam in the neighbourhood of Brahmin quarters has a watchman. All the wells have masonry platforms and walls, but the surroundings are not satisfactory, some being quite close to drains and cess-pools.

5. *Drainage.*—There is no proper system of drainage, the existing drains are side-ditches and, as a rule, are full of stagnant sewage. The bazaar street drains are still in the most insanitary state. The town was inspected by the District Medical and Sanitary Officer and his assistant seventeen times during the year, and on each occasion the inspection reports were forwarded to the chairman, but little or no effect was given to the recommendations.

The following are the defects brought to notice:—

(1) Northern part of the town overgrown with prickly-pear; this has been frequently observed by the Medical officer but apparently without effect.

(2) The latrines are in a shockingly neglected state.

(3) Street sweepings are deposited within town limits in unauthorized parts.

(4) The entrails of sheep are sold outside the stall instead of in the shed built purposely for this.

(5) *Market latrines.*—In very bad repairs and are shockingly neglected.

(6) The surroundings of sweetmeat bazaar well are very filthy; the platform is in need of urgent repairs; the drain by the side is filled with a black stinking sewage; as this is a most important water-supply of the town it is astonishing to see such neglect.

(7) Latrines in the fort are in a shockingly neglected state.

(8) Drains in several parts of the town are in a very filthy condition with stagnant offensive sewage.

(9) *Iswaran temple well.*—The wall built to prevent people getting into the well does not serve the purpose as they easily get down the steps into the well.

(10) The municipal latrines in Thorayer's lane are in a dilapidated condition; the drains and floors are broken, urine, &c., soak into the ground and the stink is abominable.

(11) The municipal garden near the wall latrines is used as a latrine and for emptying the rubbish and sewage carts.

(12) *Slaughter-house.*—The reservoir for water is dirty, as well as the well that supplies water to the reservoir. It should be cleaned out and a parapet wall raised.

(13) Sweetmeat bazaar well, the most important water-supply of the town, is still in the same condition as reported on the 11th August 1894.

(14) The sanitary condition of Fishermen lane is disgraceful; it is one large latrine.

(15) *Kottarakonian's lane.*—It is one large latrine. The municipal latrine is in a shamefully neglected condition like the other latrines in the town.

(16) The poor house is very much in want of repair and the present accommodation is very limited for the number of inmates now over 100. Several of the inmates complained of the want of mats, none having been supplied for years. The vicinity of the poor house in front and back and all about the night-soil depôt is overgrown with prickly-pear and is very offensive. I have on several occasions brought this to notice and recommended the removal of the prickly-pear, but am sorry to see no notice has been taken of my recommendations. Most of the latrines want repair.

(17) Abib Marakayar's tannery is too close to human habitations; it is in a most insanitary condition and the smell emanating from it most offensive.

(18) *Poor house.*—No measures taken to carry out my recommendations on previous inspection. The contractor does not supply the inmates with good drinking water which is a great source of complaint; the vicinity has not been cleaned of prickly-pear and is in consequence a large latrine and smells abominably.

Night-soil depôt.—This I found as bad as ever; the pit system again in use; the vicinity is overgrown with prickly-pear.

Wells.—Many of the wells have a very limited water-supply, and immediate steps should be taken to deepen those requiring it. The sanitary condition of Wedderburnpettah is in a most deplorable condition.

(19) *Night-soil depôt.*—I deem it desirable to request you to abandon immediately the present night-soil depôt and select another site about 2 or 3 furlongs. As I consider this of the utmost importance, I request you will act in this matter yourself to save delay; the present condition of the depôt is so deplorable and likely to generate disease.

(20) Made sanitary inspection of the Fort, Barber's lane and Big Bazaar street and found the drains in a dreadful condition. The sweetmeat bazaar well is close to a most filthy drain with stagnant sewage; the construction of a pucca V shaped drain here is an urgent necessity; the well also require deepening.

Visited the above places with the overseer and found no improvement.

(21) Inspected Sukkaravarapettah, &c.; the latrine in Christian lane is a regular disgrace to the municipality. The teppakulam contains a fair amount of water which looks dirty and would, I think, be improved if the silt were removed. The pulleys of Iswaran temple well require renewing and the platform remaking.

6. *Vaccination.*—The hospital assistant attached to the municipal main hospital vaccinated 13 cases; all were successful; of these 7 were primary and 6 re-vaccination. The lady apothecary attached to the women and children's dispensary vaccinated 67 cases; all were successful; of these 55 were primary and 12 re-vaccination. The total number of children under one year vaccinated by the two medical subordinates was 36.

By Municipal Vaccinators.—There were two second-class vaccinators working in the municipality and they vaccinated 1,807 cases, of these 1,782 or 98·6 per cent. were successful. The numbers for the previous year were 1,620, 1,564 and 96·0. The total number of children successfully vaccinated under one year was 1,205 against 1,003 in 1893–94.

Vaccination was wholly conducted with animal lymph supplied from the Local fund depôt, Coimbatore, on payment of a moiety of the total cost of the depôt:—

	Total vaccinated.	Successful.
Animal lymph from calf-to-arm	450	450
Do. preserved in glycerine	1,437	1,412
Total ..	1,887	1,862

Including the work done by the medical subordinates, the total number of successful operations performed amounted to 1,862 or 40·1 per mille of the population against 1,771 or 38·2 per mille in the previous year. The total number of infants successfully vaccinated was 1,241 or 70·2 per cent. of the birth-rate against 1,046 or 61·0 per cent. in the previous year.

7. *Hospitals and Dispensaries.*—The total number of in and out patients treated for the past three years and the average daily attendance are as follows:—

	Total treated.	Average daily.
1892–93	32,927	220·84
1893–94	37,473	254·70
1894–95	46,370	292·26

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

The principal source is from wells; almost every house has its own well; the quality is generally bad.

There are 27 public wells, 2 tanks and 1 teppakolam within the municipal limits. The tanks were dry during the whole year. The teppakolam in the neighbourhood of Brahmin quarters has a watchman. All the wells have masonry platforms and walls, but the surroundings are not satisfactory, some being quite close to drains and cess-pools.

5. *Drainage.*—There is no proper system of drainage, the existing drains are side-ditches and, as a rule, are full of stagnant sewage. The bazaar street drains are still in the most insanitary state. The town was inspected by the District Medical and Sanitary Officer and his assistant seventeen times during the year, and on each occasion the inspection reports were forwarded to the chairman, but little or no effect was given to the recommendations.

Visited the above places with the overseer and found no improvement.

(21) Inspected Sukkaravarapettah, &c.; the latrine in Christian lane is a regular disgrace to the municipality. The teppakulam contains a fair amount of water which looks dirty and would, I think, be improved if the silt were removed. The pulleys of Iswaran temple well require renewing and the platform remaking.

6. *Vaccination.*—The hospital assistant attached to the municipal main hospital vaccinated 13 cases; all were successful; of these 7 were primary and 6 re-vaccination. The lady apothecary attached to the women and children's dispensary vaccinated 67 cases; all were successful; of these 55 were primary and 12 re-vaccination. The total number of children under one year vaccinated by the two medical subordinates was 36.

By Municipal Vaccinators.—There were two second-class vaccinators working in the municipality and they vaccinated 1,807 cases, of these 1,782 or 98·6 per cent. were successful. The numbers for the previous year were 1,620, 1,564 and 96·0. The total number of children successfully vaccinated under one year was 1,205 against 1,003 in 1893–94.

Vaccination was wholly conducted with animal lymph supplied from the Local fund depôt, Coimbatore, on payment of a moiety of the total cost of the depôt:—

	Total vaccinated.	Successful.
Animal lymph from calf-to-arm	450	450
Do. preserved in glycerine	1,437	1,412
Total ..	1,887	1,862

Including the work done by the medical subordinates, the total number of successful operations performed amounted to 1,862 or 40·1 per mille of the population against 1,771 or 38·2 per mille in the previous year. The total number of infants successfully vaccinated was 1,241 or 70·2 per cent. of the birth-rate against 1,046 or 61·0 per cent. in the previous year.

7. *Hospitals and Dispensaries.*—The total number of in and out patients treated for the past three years and the average daily attendance are as follows:—

	Total treated.	Average daily.
1892–93	32,927	220·84
1893–94	37,473	254·70
1894–95	46,370	292·26

the allotment of Rs. 1,330 provided in the revised estimate. During the last year, about Rs. 700 worth of medicines were purchased from several chemists on different occasions besides the medicines procured from England from the firm of Messrs. Burgoyne and Co. to the value of Rs. 1,035–6–3, and from Medical Stores to the value of Rs. 301–4–10. In the previous year Rs. 1,851–8–11 were expended on account of this item.

49. *Sundries and Contingencies—Rs.* 1,248–14–10 *or Rs.* 248–14–10 *over the revised estimate of Rs.* 1,000.—The increase was due to the purchase of stationery, bedding and clothing, &c.

50. *Contributions to Provincial Funds.*—A sum of Rs. 370 was paid during the year on account of contribution to the Medical College, sanitary inspection, medical reserve staff and cutlers' establishment.

51. *Vaccination—Contingencies—Rs.* 63–1–0 *or Rs.* 23–1–0 *over the revised estimate of Rs.* 40.—The increase is due to the cost of printed forms supplied to the vaccinators.

52. The total number of persons vaccinated during the year was 1,807, of which 20 were unsuccessful and 5 unknown. The total number of operations on children below one year of age was 1,205. Of this number 1,193 were successful, 9 unsuccessful and 3 unknown. Of the total number of operations (1,782) 450 were from calf direct, 1,332 by glycerine paste. The total number of births registered during the year was 1,765.

53. *Conservancy—(ii) Other Charges.*—Rs. 1,393–5–11 were spent against the allotment of Rs. 1,600 or Rs. 206–10–1 less than the revised estimate. The decrease is due to the non-purchase of new carts, &c.

54. *Conservancy—Contingencies.*—Rs. 383–6–1 were first entered as actual expenditure against this head, but Rs. 120 paid for cleaning butcher's and slaughter house stalls are now charged under the heads of market and slaughter-house contingencies at the suggestion of the auditor. Hence the fall below the revised estimate.

55. *Grant IV, Feeding Paupers.*—The actual charges incurred amounted to Rs. 1,897–11–8 or Rs. 97–11–8 in excess of the revised estimate of Rs. 1,800. This is due to the admission of a large number of paupers into the institution.

56. *Travellers' Bungalow—(a) Establishment.*—The outlay under this item was Rs. 157–11–10. The excess expenditure Rs. 37–11–10 over the revised estimate of Rs. 120 is due to the expenditure incurred up to the leasing of the travellers' bungalow from the 1st January 1895.

57. *Other Charges.*—Rs. 570–7–10 were spent under this item on account of land revenue, numbering houses, printing registration tin tickets, &c., which has exceeded the revised estimate by Rs. 40–7–10.

58. *Grant V, Office Contingencies.*—Rs. 560–13–1 were spent on account of printing voters' lists, &c. The increase over the revised estimate is Rs. 160–13–1.

59. *Sanitation.*—The town was free from cholera and small-pox. The necessity for increasing the number of dust-bins will be borne in mind. Every effort is made to keep the town as clean as possible. The street sweepings and house refuse are collected and daily carted away to the several rubbish depôts. At present no rubbish is shot in unrecognized depôts. The practice of the cartmen to deposit rubbish in private lands and open spaces and the use of old depôts have been strictly prohibited.

60. *Hospitals.*—The total number of in and out patients treated at the main hospital during the year was 503 and 23,774, respectively, against 504 in and 36,969* out patients in the previous year. In the women and children's dispensary, the total number treated was 22,093. It is satisfactory to note that both the institutions are becoming popular.

* 19,072—36,969 is the figure for *both* hospital and dispensary.

(Intld.) H. A. S.

61. *Registration.*—The following statement shows the registration of births and deaths during the official year 1894–95. Much attention is paid to secure correct returns. Thirteen prosecutions were instituted for failure to report occurrences.

Further, the registrars furnish the vaccinators with complete lists of the births occurring in each month so as to facilitate the work of vaccination :—

Year.	Births.	Deaths.
1893–94	1,696	1,314
1894–95	1,765	1,196

Of the total number of deaths, one is ascribed to small-pox, 275 to fever, 122 to bowel-complaints, 15 to accidents and 783 to other causes.

62. *Municipal Accounts.*—The accounts for the year were audited by the Inspector of Local Fund Accounts, and his figures are adopted in the statements accompanying this report.

63. *Concluding Remarks.*—During the year under report, a sub-committee was formed to investigate into the finances of the municipality and to devise measures for the speedy collection of house and land taxes (arrears and current), of taxes on vehicles, animals and carts, imperfectly registered and of private scavenging fees, &c. The suggestions made by them were adopted, and a greater portion of the outstanding taxes and fees under the above heads were collected and thereby the deficit of Rs. 2,239 referred to in the last administration report was made good. The defects brought to notice by the District Medical and Sanitary Officer have received the careful consideration and attention of the council and the steps taken in each case are stated below for the information of Government :—

(1) *Northern part of the town overgrown with prickly-pear.*—A great portion of this belongs to private individuals. They have been called upon to clear the ground.

The establishment maintained for removing prickly-pear is steadily at work in places belonging to the municipality.

(2) *Latrines.*—These as well as other latrines are now in charge and under the special supervision of a maistry.

(3) *Street Sweepings.*—Sweepings deposited in unauthorized parts have been removed.

(4) *Sale of entrails of sheep.*—Sale outside the stalls has been stopped and market peons ordered to prosecute persons violating the rules.

(5) *Market latrines.*—These are cleaned daily. The repairs will be undertaken soon.

(6) *The surroundings of the sweetmeat bazaar well.*—This is a private well. The surroundings are kept clean. The drain by the side has been thoroughly renewed and the platform repaired.

(7) *Fort latrines.*—These are regularly cleaned and inspected daily.

(8) *Drains.*—This is chiefly due to want of masonry drains. The council is prohibited from incurring any expenditure in the construction of drains by order of Government, Mis. No. 183, dated 21st February 1888. The present mode of cleaning tends only to deepen the drains and to prevent free flow of water or sewage.

(9) *Iswaran temple well.*—The wall here has been raised sufficiently high to prevent people from getting into the well.

(10) *Latrines in Torayar's lane.*—These will be repaired soon.

(11) *Municipal garden.*—The use of this as a latrine has been stopped.

(12) *Slaughter-house.*—The reservoir is kept clean. The well has been cleaned and parapet wall raised.

(13) *Sweetmeat bazaar well.*—The needful has been done.

(14) *Fishermen lane.*—There is no place to build a latrine in the lane; care is taken to keep it clean.

(15) *Kottarakonian's lane latrine.*—Estimate for repairs is ready.

(16) *Poor house.*—The compound wall has been repaired. The inmates are only eighty in number. Prickly-pear all round the poor house and near the night-soil depôt has been removed and the latrines repaired.

(17) *Abib Marakayar's tannery.*—This is now closed.

(18) *Supply of drinking water to inmates of Poor house.*—The contractor's attention has been called to the necessity of supplying good drinking water.

(19) *Night-soil depôt.*—This is inspected daily by the ward inspector who superintends the work and regulates the burying of the soil as suggested by the District Medical officer.

A new site has been selected and the matter is before the Collector of the district.

(20) *Sweetmeat bazaar well.*—The construction of the drain is completed. The well has been deepened.

(21) *Latrines in Christian lane.*—All the latrines here have been properly repaired and are kept clean. Silt has been removed from the teppakulam. The pulleys of the Iswaran Kovil well have been renewed and the platform reconstructed.

64. A copy of the resolution of the council passing the annual report and the statements is also submitted.

Enclosure.

Annual report on the working of Municipal Main Hospital and Women and Children's Dispensary, Coimbatore, for the year 1894–95.

Public Health.—Nothing unusual happened to affect the health of the town. The rainfall was considerably less, only 11·49 inches against an average of 22 inches. The water-supply was therefore scanty, but there was no drought. There was no scarcity of food-grains. As ascertained from dispensary statistics the principal diseases and conditions for which advice and treatment were sought were the following :—

Diseases of the digestive system.	Malarious fever.
Diseases of skin.	Local injuries.
Ulcers.	Rheumatic affections.
Diseases of eye.	Syphilis.
Diseases of respiratory system.	Dysentery.
Diseases of ear.	

2. *Vital Statistics.*—The following statement gives the vital statistics of the town for the year under report and for three previous years :—

Years.	Cholera.	Small-pox.	Fever.	Other causes.	Total deaths.	Total births.
1891–92	179	184	229	954	1,546	1,629
1892–93	1	98	250	782	1,131	1,625
1893–94	11	17	309	973	1,310	1,696
1894–95	..	1	275	918 920	1,194	1,767

1194 Vide current 37 of 95

The town was free from cholera and small-pox. The total number of deaths recorded from fevers 275 and from all other causes 918. The ratios of births and deaths per 1,000 of population were 38·1 and 25·7.

3. *Sanitation.*—House refuse collected in 122 moveable iron dust-bins and the street sweepings are daily removed to depôts outside the town in hand-carts. The number of dust-bins is inadequate. The old rubbish depôts within the town which were abandoned some time ago are also at times used and fresh stuff deposited. Rubbish is also found heaped up in non-recognized depôts such as private lands and open spaces. These were on several occasions brought to the notice of the chairman and councillors. There were 29 public latrines (14 pucca built, 8 brick wall enclosures and 7 mud wall enclosures). Most of these are in a dilapidated condition and foul smelling; some are freely resorted to and would be more so if kept in proper repairs and in a good sanitary condition. The urgent necessity of the repairs and the construction of more

Further, the registrars furnish the vaccinators with complete lists of the births occurring in each month so as to facilitate the work of vaccination :—

Year.	Births.	Deaths.
1893–94	1,696	1,314
1894–95	1,765	1,196

Of the total number of deaths, one is ascribed to small-pox, 275 to fever, 122 to bowel-complaints, 15 to accidents and 783 to other causes.

62. *Municipal Accounts.*—The accounts for the year were audited by the Inspector of Local Fund Accounts, and his figures are adopted in the statements accompanying this report.

63. *Concluding Remarks.*—During the year under report, a sub-committee was formed to investigate into the finances of the municipality and to devise measures for the speedy collection of house and land taxes (arrears and current), of taxes on vehicles, animals and carts, imperfectly registered and of private scavenging fees, &c. 2. *Vital Statistics.*—The following statement gives the vital statistics of the town for the year under report and for three previous years :—

Years.	Cholera.	Small-pox.	Fever.	Other causes.	Total deaths.	Total births.
1891–92	179	184	229	954	1,546	1,629
1892–93	1	98	250	782	1,131	1,625
1893–94	11	17	309	973	1,310	1,696
1894–95	..	1	275	~~918~~ 920	~~1,194~~	1,767

1196 Vide current 3774 of 95

The town was free from cholera and small-pox. The total number of deaths recorded from fevers 275 and from all other causes 918. The ratios of births and deaths per 1,000 of population were 38·1 and 25·7.

3. *Sanitation.*—House refuse collected in 122 moveable iron dust-bins and the street sweepings are daily removed to depôts outside the town in hand-carts. The number of dust-bins is inadequate. The old rubbish depôts within the town which were abandoned some time ago are also at times used and fresh stuff deposited. Rubbish is also found heaped up in non-recognized depôts such as private lands and open spaces. These were on several occasions brought to the notice of the chairman and councillors. There were 29 public latrines (14 pucca built, 8 brick wall enclosures and 7 mud wall enclosures). Most of these are in a dilapidated condition and foul smelling; some are freely resorted to and would be more so if kept in proper repairs and in a good sanitary condition. The urgent necessity of the repairs and the construction of more

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

The principal source is from wells; almost every house has its own well; the quality is generally bad.

There are 27 public wells, 2 tanks and 1 teppakolam within the municipal limits. The tanks were dry during the whole year. The teppakolam in the neighbourhood of Brahmin quarters has a watchman. All the wells have masonry platforms and walls, but the surroundings are not satisfactory, some being quite close to drains and cess-pools.

5. *Drainage.*—There is no proper system of drainage, the existing drains are side-ditches and, as a rule, are full of stagnant sewage. The bazaar street drains are still in the most insanitary state. The town was inspected by the District Medical and Sanitary Officer and his assistant seventeen times during the year, and on each occasion the inspection reports were forwarded to the chairman, but little or no effect was given to the recommendations.

The following are the defects brought to notice:—

(1) Northern part of the town overgrown with prickly-pear; this has been frequently observed by the Medical officer but apparently without effect.

(2) The latrines are in a shockingly neglected state.

(3) Street sweepings are deposited within town limits in unauthorized parts.

(4) The entrails of sheep are sold outside the stall instead of in the shed built purposely for this.

(5) *Market latrines.*—In very bad repairs and are shockingly neglected.

(6) The surroundings of sweetmeat bazaar well are very filthy; the platform is in need of urgent repairs; the drain by the side is filled with a black stinking sewage; as this is a most important water-supply of the town it is astonishing to see such neglect.

(7) Latrines in the fort are in a shockingly neglected state.

(8) Drains in several parts of the town are in a very filthy condition with stagnant offensive sewage.

(9) *Iswaran temple well.*—The wall built to prevent people getting into the well does not serve the purpose as they easily get down the steps into the well.

(10) The municipal latrines in Thorayer's lane are in a dilapidated condition; the drains and floors are broken, urine, &c., soak into the ground and the stink is abominable.

(11) The municipal garden near the wall latrines is used as a latrine and for emptying the rubbish and sewage carts.

(12) *Slaughter-house.*—The reservoir for water is dirty, as well as the well that supplies water to the reservoir. It should be cleaned out and a parapet wall raised.

(13) Sweetmeat bazaar well, the most important water-supply of the town, is still in the same condition as reported on the 11th August 1894.

(14) The sanitary condition of Fishermen lane is disgraceful; it is one large latrine.

(15) *Kottarakonian's lane.*—It is one large latrine. The municipal latrine is in a shamefully neglected condition like the other latrines in the town.

(16) The poor house is very much in want of repair and the present accommodation is very limited for the number of inmates now over 100. Several of the inmates complained of the want of mats, none having been supplied for years. The vicinity of the poor house in front and back and all about the night-soil depôt is overgrown with prickly-pear and is very offensive. I have on several occasions brought this to notice and recommended the removal of the prickly-pear, but am sorry to see no notice has been taken of my recommendations. Most of the latrines want repair.

35. *Grant I, Public Works—New Works—Communications.*—Decrease Rs. 200. No new works of any importance were executed during the year.

36. *Repairs—Communications.*—Rs. 6,609–13–9 were expended in repairing 35⅛ miles of town roads, of which 22 miles and 2 furlongs are metalled and the rest unmetalled. In the previous year Rs. 5,657–3–5 were expended. The revised estimate for 1894–95 was Rs. 6,000. The roads were maintained in fair order. Although scarcity of water has to some extent precluded the roads from being properly tamped, endeavours have been made to improve their condition and repairs carried out promptly.

37. *Buildings.*—Rs. 423–13–4 were expended, against Rs. 520 of the revised estimate, and Rs. 1,348–12–10, the actuals of the previous year. The following repairs to buildings were executed during the year:—

	Rs.	A.	P.
For repairing latrines	61	14	1
„ repairing main hospital	328	15	3
„ petty repairs to branch dispensary	13	0	0
„ constructing a cistern	20	0	0
Total ..	423	13	4

38. *Drainage.*—Rs. 542–0–6 were expended in repairing the drains, against Rs. 550 of the revised estimate, and Rs. 1,395–4–1, the actuals of the previous year. During the year under report, Rs. 168 were spent in improving Venkata Gounden's lane, Rs. 197–15–2 for removing drain earth, Rs. 47 for repairing Pothanúr road drain, and Rs. 92–8–0 for improving Torayer's lane drains, Rs. 21–9–4 for repairing Fish Bazaar street drain and Rs. 15 for a cistern near taluk cutcherry lane.

39. The District Medical and Sanitary Officer's remarks regarding the insanitary state of the street drains have been duly noted and although G.O., No. 183, dated 21st February 1888, prohibits any expenditure being incurred on drains till a plan has been prepared and approved for the whole town, still the council is endeavouring its best to keep the drains and side ditches as clean as possible and free from stagnant sewage. The defective state of these drains is undoubtedly due to the want of a proper system of drainage.

40. *Water-supply.*—Rs. 337–3–6 were expended, against the revised estimate of Rs. 280, and Rs. 758–14–3, the actuals of the previous year. Nine wells were repaired and improved during the year.

41. As regards the unsatisfactory condition of the surroundings of the wells, steps will be taken to remedy the defect as far as possible.

42. *Grant II, Education.*—The amount expended under this head was Rupees 5,633–7–3, against Rs. 5,880 of the revised estimate, and Rs. 5,630–11–7, the actuals of the previous year.

43. *Training Schools—Stipends to Normal Students.*—The sum of Rs. 130 provided for the training of two students (one lower secondary and one primary) in the Government training school was not utilized for the purpose as there were no candidates.

44. *Salary Result System Schools—(b) Result Grants.*—The outlay under this head amounted to Rs. 387–9–0, against the revised estimate of Rs. 360, and Rupees 369–7–9, the actuals of last year. The increase was due to over-earned grants.

45. *Salary Grants.*—The amount of salary grant paid to the managers of the Coimbatore College, St. Michael's College, and the Marakáyar Muhammadan school amounted to Rs. 1,575–14–5, against the provision of Rs. 1,900 of the revised estimate, the actuals of the previous year being Rs. 1,686–12–8.

46. *Result Grants.*—The total amount of grant earned by the schools under the result system amounted to Rs. 1,686–14–0 or Rs. 86–14–0 in excess of the revised estimate of Rs. 1,600. The actuals of the previous year were Rs. 1,362–1–3.

47. The other items call for no remarks.

48. *Grant III, Hospitals and Dispensaries—Medicines and Supplies.*—Rupees 1,975–14–2 were spent in the purchase of European and country medicines against

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

The principal source is from wells; almost every house has its own well; the quality is generally bad.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper:—

From M.R.Ry. I. VENKATASWAMI NAYUDU Garu, Chairman-delegate, Municipal Council, Coimbatore, to the Chief Secretary to Government (through the Revenue Officer of the division), dated Coimbatore, 18th July 1895, No. 768.

I have the honour to submit the annual report on the administration of the Coimbatore Municipality for the official year 1894–95, and to enclose the statements prepared in conformity with the instructions conveyed in G.O., No. 2193 M., dated 10th December 1891. The tabular statements of the Assistant Inspector of Schools, Eighth Division, and the report of the District Medical and Sanitary Officer on the working of the municipal hospital and women and children's dispensary are also herewith submitted.

I.—Constitution of the Municipal Council.

2. The maximum sanctioned strength of the council has been twenty; but on the 31st March last the strength of the council was eleven owing to the term of office of nine councillors having expired on the 2nd February 1895. Of the eleven members, one was ex-officio, four nominated and six elected.

3. The town has been divided into seven wards for electoral purposes. The total number of registered voters at the close of the year was 1,143. During the year under report four uncontested and eight contested municipal elections were held on the 6th October 1894 and on the 16th February and 16th March 1895 in all the seven wards to fill up the vacancies caused by the expiration of the term of office of the councillors. There was very keen competition in canvassing votes in the second, third, fourth, sixth and seventh wards.

4. The total number of meetings held during the year was twenty-three. Only one meeting was adjourned for want of a quorum.

II.—Receipts.

5. The year opened with a deficit balance of Rs. 2,238–13–11. The total receipts during the year were Rs. 46,509–10–9. The net receipts after deducting the deficit balance amounted to Rs. 44,270–12–10. The total expenditure amounted to Rs. 43,665–15–4. The balance of municipal fund at the end of the year was Rs. 604–13–6 exclusive of cash deposit of Rs. 5,217–8–0.

A.—Receipts from Taxation.

6. *Tax on Buildings*—(*a*) *Arrears.*—The amount of arrears at the beginning of the year was Rs. 406–7–10. Of this, Rs. 370–7–10 were realized and Rs. 36 were written off the account as irrecoverable owing to some houses having fallen into ruins and to some house-owners having become paupers. There was no balance of arrears at the close of the year.

(*b*) *Current.*—The original demand was Rs. 17,047–12–0. Of this amount, Rs. 131–4–0 were remitted by the council on appeal. The demand finally settled was Rs. 16,916–8–0. Of this, Rs. 6–5–0 were remitted on account of vacant houses and Rs. 14–8–0 were written off as irrecoverable owing to the poverty of certain rate-payers. The amount collected was Rs. 16,775–11–4, leaving a small balance of Rs. 119–15–8 at the close of the year.

7. The total number of houses assessed was 6,445, and the amount involved was Rs. 16,916–8–0. The incidence of the house-tax per house was Rs. 2–9–11 against Rs. 2–7–2 of the previous year.

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

The principal source is from wells; almost every house has its own well; the quality is generally bad.

There are 27 public wells, 2 tanks and 1 teppakolam within the municipal limits. The tanks were dry during the whole year. The teppakolam in the neighbourhood of Brahmin quarters has a watchman. All the wells have masonry platforms and walls, but the surroundings are not satisfactory, some being quite close to drains and cess-pools.

5. *Drainage.*—There is no proper system of drainage, the existing drains are side-ditches and, as a rule, are full of stagnant sewage. The bazaar street drains are still in the most insanitary state. The town was inspected by the District Medical and Sanitary Officer and his assistant seventeen times during the year, and on each occasion the inspection reports were forwarded to the chairman, but little or no effect was given to the recommendations.

The following are the defects brought to notice:—

(1) Northern part of the town overgrown with prickly-pear; this has been frequently observed by the Medical officer but apparently without effect.

(2) The latrines are in a shockingly neglected state.

(3) Street sweepings are deposited within town limits in unauthorized parts.

(4) The entrails of sheep are sold outside the stall instead of in the shed built purposely for this.

(5) *Market latrines.*—In very bad repairs and are shockingly neglected.

(6) The surroundings of sweetmeat bazaar well are very filthy; the platform is in need of urgent repairs; the drain by the side is filled with a black stinking sewage; as this is a most important water-supply of the town it is astonishing to see such neglect.

(7) Latrines in the fort are in a shockingly neglected state.

(8) Drains in several parts of the town are in a very filthy condition with stagnant offensive sewage.

(9) *Iswaran temple well.*—The wall built to prevent people getting into the well does not serve the purpose as they easily get down the steps into the well.

(10) The municipal latrines in Thorayer's lane are in a dilapidated condition; the drains and floors are broken, urine, &c., soak into the ground and the stink is abominable.

(11) The municipal garden near the wall latrines is used as a latrine and for emptying the rubbish and sewage carts.

(12) *Slaughter-house.*—The reservoir for water is dirty, as well as the well that supplies water to the reservoir. It should be cleaned out and a parapet wall raised.

(13) Sweetmeat bazaar well, the most important water-supply of the town, is still in the same condition as reported on the 11th August 1894.

(14) The sanitary condition of Fishermen lane is disgraceful; it is one large latrine.

(15) *Kottarakonian's lane.*—It is one large latrine. The municipal latrine is in a shamefully neglected condition like the other latrines in the town.

(16) The poor house is very much in want of repair and the present accommodation is very limited for the number of inmates now over 100. Several of the inmates complained of the want of mats, none having been supplied for years. The vicinity of the poor house in front and back and all about the night-soil depôt is overgrown with prickly-pear and is very offensive. I have on several occasions brought this to notice and recommended the removal of the prickly-pear, but am sorry to see no notice has been taken of my recommendations. Most of the latrines want repair.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper:—

From M.R.Ry. I. VENKATASWAMI NAYUDU Garu, Chairman-delegate, Municipal Council, Coimbatore, to the Chief Secretary to Government (through the Revenue Officer of the division), dated Coimbatore, 18th July 1895, No. 768.

I have the honour to submit the annual report on the administration of the Coimbatore Municipality for the official year 1894–95, and to enclose the statements prepared in conformity with the instructions conveyed in G.O., No. 2193 M., dated 10th December 1891. The tabular statements of the Assistant Inspector of Schools, Eighth Division, and the report of the District Medical and Sanitary Officer on the working of the municipal hospital and women and children's dispensary are also herewith submitted.

I.—Constitution of the Municipal Council.

2. The maximum sanctioned strength of the council has been twenty; but on the 31st March last the strength of the council was eleven owing to the term of office of nine councillors having expired on the 2nd February 1895. Of the eleven members, one was ex-officio, four nominated and six elected.

3. The town has been divided into seven wards for electoral purposes. The total number of registered voters at the close of the year was 1,143. During the year under report four uncontested and eight contested municipal elections were held on the 6th October 1894 and on the 16th February and 16th March 1895 in all the seven wards to fill up the vacancies caused by the expiration of the term of office of the councillors. There was very keen competition in canvassing votes in the second, third, fourth, sixth and seventh wards.

4. The total number of meetings held during the year was twenty-three. Only one meeting was adjourned for want of a quorum.

II.—Receipts.

5. The year opened with a deficit balance of Rs. 2,238–13–11. The total receipts during the year were Rs. 46,509–10–9. The net receipts after deducting the deficit balance amounted to Rs. 44,270–12–10. The total expenditure amounted to Rs. 43,665–15–4. The balance of municipal fund at the end of the year was Rs. 604–13–6 exclusive of cash deposit of Rs. 5,217–8–0.

A.—Receipts from Taxation.

6. *Tax on Buildings*—(*a*) *Arrears.*—The amount of arrears at the beginning of the year was Rs. 406–7–10. Of this, Rs. 370–7–10 were realized and Rs. 36 were written off the account as irrecoverable owing to some houses having fallen into ruins and to some house-owners having become paupers. There was no balance of arrears at the close of the year.

(*b*) *Current.*—The original demand was Rs. 17,047–12–0. Of this amount, Rs. 131–4–0 were remitted by the council on appeal. The demand finally settled was Rs. 16,916–8–0. Of this, Rs. 6–5–0 were remitted on account of vacant houses and Rs. 14–8–0 were written off as irrecoverable owing to the poverty of certain rate-payers. The amount collected was Rs. 16,775–11–4, leaving a small balance of Rs. 119–15–8 at the close of the year.

7. The total number of houses assessed was 6,445, and the amount involved was Rs. 16,916–8–0. The incidence of the house-tax per house was Rs. 2–9–11 against Rs. 2–7–2 of the previous year.

8. *Tax on Lands—Arrears.*—At the beginning of the year the arrears under this item amounted to Rs. 273–4–11. Of this sum, Rs. 237–15–11 were collected and Rs. 35–5–0 were written off the accounts as irrecoverable.

9. *Current.*—The finally settled demand was Rs. 1,095–12–0. Of this, Rs. 959–1–0 were collected and Rs. 29–9–0 were written off as irrecoverable. The balance at the close of the year was Rs. 107–2–0. Stringent measures have been adopted to collect this amount as early as possible.

10. *Tax on Vehicles.*—Rupees 718–8–0 were collected against Rs. 800 of the revised estimate, and Rs. 595–8–0, the actuals of the previous year.

11. *Tax on Animals.*—Rupees 1,417–12–0 were realized, against the revised estimate of Rs. 1,550, and Rs. 1,311, the actuals of the previous year.

12. *Tax on Carts.*—Under this head, the amount realized was Rs. 2,704, against Rs. 2,650 of the revised estimate, and Rs. 2,494, the actuals of the previous year. The increase under all these heads over the actuals of 1893–94 is due to the detection of unlicensed carts, vehicles and animals of previous years and to their registration during the current year. These taxes are levied at the maximum rates.

13. *Tolls.*—The collections under this head amounted to Rs. 15,375. Of this sum, Rs. 10,250 were credited to municipal funds and Rs. 5,125 were paid to the district board on account of one-third contribution. The tolls are levied at the maximum rates. In the previous year, the tolls realised Rs. 14,913–7–10. No repairs were executed during the year to any of the seven toll-gates. The full amount of one-third share due to the local fund board was paid during the year.

14. *Incidence of Taxation.*—The total income from taxation amounted to Rs. 33,433–8–1 including, and Rs. 23,183–8–1 excluding, tolls. The incidence of taxation per head of population was As. 11–6 in the former and As. 7–11 in the latter, against As. 10–6 and As. 7–10 in 1893–94.

B.—Revenue derived from Municipal Property and Powers apart from Taxation.

15. *Fees under Act II of* 1888.—Rupees 65 were collected on the two theatrical pandals erected during the year.

16. *The Avenue Tamarind Trees, Avenue Clippings, &c.*, fetched Rs. 527–1–0, against Rs. 460 of the revised estimate, and Rs. 296–9–0, the actuals of the previous year. The sum of Rs. 51–4–0, being the arrears of 1891–92 which had to be paid by the tamarind tree contractor, had to be recovered from him by a civil suit. Of this, only a sum of Rs. 40 was recovered and the balance, Rs. 11–4–0, was written off the accounts as irrecoverable.

17. *Travellers' Bungalow.*—The bungalow was under the direct management of the municipal council from April to December 1894. The fees realized therefrom amounted to Rs. 185–5–0. Of this amount, Rs. 15 represents the sum paid by the contractor for the last three months of 1894–95, at Rs. 5 a month, the bungalow being let on contract from January to March 1895. The actuals of the previous year were Rs. 470–14–0. The revised estimate for 1894–95 was Rs. 270.

18. *Produce of Lands, Gardens, &c.*—Rs. 849–0–1 were realized, against Rs. 640 of the revised estimate, and Rs. 696–6–2, the actuals of the previous year. The increase is due to the sale of the babool, &c., trees grown in the palmyra tope which fetched Rs. 320.

19. *Sale-proceeds of old Materials, &c.*—During the year under report, this item fetched Rs. 101–14–0, against the revised estimate of Rs. 150, and Rs. 35–6–6, the actuals of the previous year.

20. *Conservancy Receipts—Sale-proceeds of Night-soil, Street-refuse, &c.*—Rupees 140–14–0 were realized, against the revised estimate of Rs. 200, and Rs. 90–5–6, the actuals of the previous year.

21. *Fees from Educational Institutions.*—The realization under this head amounted to Rs. 464–6–6, against the revised estimate of Rs. 400, and Rs. 429–5–0, the actuals of the previous year.

22. *Other Hospital Receipts, Rs.* 781–14–9.—This amount represents the cost of treating the wounded persons rescued from the Karamaday accident and paid by the Railway Company.

23. *Income from Markets.*—Rs. 1,454–8–10 were realized, against Rs. 1,450 of the revised estimate, and Rs. 1,814–4–3, the actuals of the previous year. The decrease is due to want of competition.

24. *Income from Slaughter-houses.*—Rs. 777–15–6 were realized, against Rs. 770 of the revised estimate, and Rs. 812–11–1, the actuals of the previous year.

25. *Other Fees—Distraint Fees.*—This item being small calls for no remarks.

26. *License Fees.*—Rs. 719–10–0 were realized, against Rs. 630 of the revised estimate, and Rs. 601, the actuals of the previous year. The particulars of licenses for which the above fees were collected are as follows :—

	Rs.	A.	P.
For wood depôt	311	0	0
„ straw „	7	0	0
„ fish „	20	0	0
„ beef butchering	30	0	0
„ oil-boiling	13	0	0
„ kerosine oil depôt	100	0	0
„ fees under section 180 of Act IV of 1884 ..	55	0	0
„ temporary pandals	183	10	0
Total ..	719	10	0

27. *Cart-stand Fees.*—Rs. 521–8–1 were realized, against Rs. 520 of the revised estimate, and Rs. 490, the actuals of the previous year.

28. *Fines under Municipal and other Acts.*—The realization under this item amounted to Rs. 773–11–0, against the revised estimate of Rs. 550, and Rs. 865–8–6, the actuals of the previous year.

29. *Interest on Investments—Medical.*—Rs. 224–7–3 were realized, against the revised estimate of Rs. 140, and Rs. 205–5–0, the actuals of the previous year.

30. *Contribution from Local Board—Medical.*—Rs. 2,448–15–3 were realized, against the revised estimate of Rs. 2,450, and Rs. 1,918–13–10, the actuals of the previous year. The local fund board pay one-third of the net expenditure incurred on account of the upkeep of the hospital.

31. *Miscellaneous—Private scavenging.*—At the beginning of the year, the arrears under this item amounted to Rs. 643–14–4. Of this sum, Rs. 395–12–0 were collected and Rs. 247–4–4 were written off the accounts as irrecoverable, leaving only a balance of As. 14.

32. *Current.*—The demand amounted to Rs. 1,123–8–0. Of this sum, Rupees 1,015–1–6 were collected and Rs. 48–2–0 were written off the accounts, leaving a balance of Rs. 60–4–6 at the end of the year. Owners of several houses do not require private scavenging and several refuse to pay the amount in advance. The sanitary staff has been strictly instructed to take particular care to see that the premises of such persons are kept in proper sanitary condition and to prosecute them when they are not.

33. *Other Items.*—The amount realized under "other items" was Rs. 545–4–8 against the revised estimate of Rs. 500 and the actuals of Rs. 82–4–11 of the previous year.

III.—Expenditure.

34. The total expenditure which amounted to Rs. 43,665–15–4 against the revised estimate of Rs. 42,340 and Rs. 46,058–7–6, the actuals of the previous year, was distributed among all the five grants as follows :—

	Rs.	A.	P.
Grant I	9,717	15	7
„ II	5,633	7	3
„ III	19,364	13	7
„ IV	5,625	3	9
„ V	3,315	9	8
Advance recoverable and refunds	8	13	6
Total ..	43,665	15	4

35. *Grant I, Public Works—New Works—Communications.*—Decrease Rs. 200. No new works of any importance were executed during the year.

36. *Repairs—Communications.*—Rs. 6,609–13–9 were expended in repairing $35\frac{1}{8}$ miles of town roads, of which 22 miles and 2 furlongs are metalled and the rest unmetalled. In the previous year Rs. 5,657–3–5 were expended. The revised estimate for 1894–95 was Rs. 6,000. The roads were maintained in fair order. Although scarcity of water has to some extent precluded the roads from being properly tamped, endeavours have been made to improve their condition and repairs carried out promptly.

37. *Buildings.*—Rs. 423–13–4 were expended, against Rs. 520 of the revised estimate, and Rs. 1,348–12–10, the actuals of the previous year. The following repairs to buildings were executed during the year :—

	Rs.	A.	P.
For repairing latrines	61	14	1
„ repairing main hospital	328	15	3
„ petty repairs to branch dispensary	13	0	0
„ constructing a cistern	20	0	0
Total ..	423	13	4

38. *Drainage.*—Rs. 542–0–6 were expended in repairing the drains, against Rs. 550 of the revised estimate, and Rs. 1,395–4–1, the actuals of the previous year. During the year under report, Rs. 168 were spent in improving Venkata Gounden's lane, Rs. 197–15–2 for removing drain earth, Rs. 47 for repairing Pothanúr road drain, and Rs. 92–8–0 for improving Torayer's lane drains, Rs. 21–9–4 for repairing Fish Bazaar street drain and Rs. 15 for a cistern near taluk cutcherry lane.

39. The District Medical and Sanitary Officer's remarks regarding the insanitary state of the street drains have been duly noted and although G.O., No. 183, dated 21st February 1888, prohibits any expenditure being incurred on drains till a plan has been prepared and approved for the whole town, still the council is endeavouring its best to keep the drains and side ditches as clean as possible and free from stagnant sewage. The defective state of these drains is undoubtedly due to the want of a proper system of drainage.

40. *Water-supply.*—Rs. 337–3–6 were expended, against the revised estimate of Rs. 280, and Rs. 758–14–3, the actuals of the previous year. Nine wells were repaired and improved during the year.

41. As regards the unsatisfactory condition of the surroundings of the wells, steps will be taken to remedy the defect as far as possible.

42. *Grant II, Education.*—The amount expended under this head was Rupees 5,633–7–3, against Rs. 5,880 of the revised estimate, and Rs. 5,630–11–7, the actuals of the previous year.

43. *Training Schools—Stipends to Normal Students.*—The sum of Rs. 130 provided for the training of two students (one lower secondary and one primary) in the Government training school was not utilized for the purpose as there were no candidates.

44. *Salary Result System Schools—(b) Result Grants.*—The outlay under this head amounted to Rs. 387–9–0, against the revised estimate of Rs. 360, and Rupees 369–7–9, the actuals of last year. The increase was due to over-earned grants.

45. *Salary Grants.*—The amount of salary grant paid to the managers of the Coimbatore College, St. Michael's College, and the Marakáyar Muhammadan school amounted to Rs. 1,575–14–5, against the provision of Rs. 1,900 of the revised estimate, the actuals of the previous year being Rs. 1,686–12–8.

46. *Result Grants.*—The total amount of grant earned by the schools under the result system amounted to Rs. 1,686–14–0 or Rs. 86–14–0 in excess of the revised estimate of Rs. 1,600. The actuals of the previous year were Rs. 1,362–1–3.

47. The other items call for no remarks.

48. *Grant III, Hospitals and Dispensaries—Medicines and Supplies.*—Rupees 1,975–14–2 were spent in the purchase of European and country medicines against

Total	43,520	43,610	43,720	44,298

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

The principal source is from wells; almost every house has its own well; the quality is generally bad.

There are 27 public wells, 2 tanks and 1 teppakolam within the municipal limits. The tanks were dry during the whole year. The teppakolam in the neighbourhood of Brahmin quarters has a watchman. All the wells have masonry platforms and walls, but the surroundings are not satisfactory, some being quite close to drains and cess-pools.

5. *Drainage.*—There is no proper system of drainage, the existing drains are side-ditches and, as a rule, are full of stagnant sewage. The bazaar street drains are still in the most insanitary state. The town was inspected by the District Medical and Sanitary Officer and his assistant seventeen times during the year, and on each occasion the inspection reports were forwarded to the chairman, but little or no effect was given to the recommendations.

The following are the defects brought to notice:—

(1) Northern part of the town overgrown with prickly-pear; this has been frequently observed by the Medical officer but apparently without effect.

(2) The latrines are in a shockingly neglected state.

(3) Street sweepings are deposited within town limits in unauthorized parts.

(4) The entrails of sheep are sold outside the stall instead of in the shed built purposely for this.

(5) *Market latrines.*—In very bad repairs and are shockingly neglected.

(6) The surroundings of sweetmeat bazaar well are very filthy; the platform is in need of urgent repairs; the drain by the side is filled with a black stinking sewage; as this is a most important water-supply of the town it is astonishing to see such neglect.

(7) Latrines in the fort are in a shockingly neglected state.

(8) Drains in several parts of the town are in a very filthy condition with stagnant offensive sewage.

(9) *Easwaren Temple Well.*—The wall built to prevent people getting into the well does not serve the purpose as they easily get down the steps into the well.

(10) The municipal latrines in Thorayer's lane are in a dilapidated condition; the drains and floors are broken, urine, &c., soak into the ground and the stink is abominable.

(11) The municipal garden near the wall latrines is used as a latrine and for emptying the rubbish and sewage carts.

(12) *Slaughter-house.*—The reservoir for water is dirty, as well as the well that supplies water to the reservoir. It should be cleaned out and a parapet wall raised.

(13) Sweetmeat bazaar well, the most important water-supply of the town, is still in the same condition as reported on the 11th August 1894.

(14) The sanitary condition of Fishermen lane is disgraceful; it is one large latrine.

(15) *Kottarakonian's lane.*—It is one large latrine. The municipal latrine is in a shamefully neglected condition like the other latrines in the town.

(16) The poor house is very much in want of repair and the present accommodation is very limited for the number of inmates now over 100. Several of the inmates complained of the want of mats, none having been supplied for years. The vicinity of the poor house in front and back and all about the night-soil depôt is overgrown with prickly-pear and is very offensive. I have on several occasions brought this to notice and recommended the removal of the prickly-pear, but am sorry to see no notice has been taken of my recommendations. Most of the latrines want repair.

(17) Abib Marakair's tannery is too close to human habitation; it is in a most insanitary condition and the smell eminating from it most offensive.

(18) *Poor house.*—No measures taken to carry out my recommendations in previous inspection. The contractor does not supply the inmates with good drinking water which is a great source of complaint; the vicinity has not been cleaned of prickly-pear and is in consequence a large latrine and smells abominably.

Night-soil depôt.—This I found as bad as ever; the pit system again in use; the vicinity is overgrown with prickly-pear.

Wells.—Many of the wells have a very limited water-supply, and immediate steps should be taken to deepen those requiring it. The sanitary condition of Wedderburnpettah is in a most deplorable condition.

(19) *Night-soil depôt.*—I deem it desirable to request you to abandon immediately the present night-soil depôt and select another sight about 2 or 3 furlongs. As I consider this of the utmost importance, I request you will act in this matter yourself to save delay; the present condition of the depôt is so deplorable and likely to generate disease.

(20) Made sanitary inspection of the Fort, Barber's lane and Big Bazaar street and found the drains in a dreadful condition. The sweetmeat bazaar well is close to a most filthy drain with stagnant sewage; the construction of a pucca V shaped drain here is an urgent necessity; the well also requires deepening.

Visited the above places with the overseer and found no improvement.

(21) Inspected Sukkaravarapettah, &c.; the latrine in Christian lane is a regular disgrace to the municipality. The teppakolam contains a fair amount of water which looks dirty and would, I think, be improved if the silt were removed. The pulleys of Easwaren temple well requires renewing and the platform remaking.

6. *Vaccination.*—The hospital assistant attached to the municipal main hospital vaccinated 13 cases; all were successful; of these 7 were primary and 6 re-vaccination. The lady apothecary attached to the women and children's dispensary vaccinated 67 cases; all were successful; of these 55 were primary and 12 re-vaccination. The total number of children under one year vaccinated by the two medical subordinates were 36.

By Municipal Vaccinators.—There were two second-class vaccinators working in the municipality and they vaccinated 1,807 cases, of these 1,782 or 98·6 per cent. were successful. The numbers for the previous year were 1,620, 1,564 and 96·0. The total number of children successfully vaccinated under one year was 1,205 against 1,003 in 1893–94.

Vaccination was wholly conducted with animal lymph supplied from the Local fund depôt, Coimbatore, on payment of a moiety of the total cost of the depôt:—

	Total vaccinated.	Successful.
Animal lymph from calf-to-arm	450	450
Do. preserved in glycerine	1,437	1,412
Total ..	1,887	1,862

Including the work done by the medical subordinates, the total number of successful operations performed amounted to 1,862 or 40·1 per mille of the population against 1,771 or 38·2 per mille in the previous year. The total number of infants successfully vaccinated was 1,241 or 70·2 per cent. of the birth-rate against 1,046 or 61·0 per cent. in the previous year.

7. *Hospitals and Dispensaries.*—The total number of in and out patients treated for the past three years and the average daily attendance are as follows:—

	Total treated.	Average daily.
1892–93	32,927	220·84
1893–94	37,473	254·70
1894–95	46,370	292·26

(17) Abib Marakair's tannery is too close to human habitation; it is in a most insanitary condition and the smell eminating from it most offensive.

(18) *Poor house.*—No measures taken to carry out my recommendations in previous inspection. The contractor does not supply the inmates with good drinking water which is a great source of complaint; the vicinity has not been cleaned of prickly-pear and is in consequence a large latrine and smells abominably.

Night-soil depôt.—This I found as bad as ever; the pit system again in use; the vicinity is overgrown with prickly-pear.

Wells.—Many of the wells have a very limited water-supply, and immediate steps should be taken to deepen those requiring it. The sanitary condition of Wedderburnpettah is in a most deplorable condition.

(19) *Night-soil depôt.*—I deem it desirable to request you to abandon immediately the present night-soil depôt and select another sight about 2 or 3 furlongs. As I consider this of the utmost importance, I request you will act in this matter yourself to save delay; the present condition of the depôt is so deplorable and likely to generate disease.

(20) Made sanitary inspection of the Fort, Barber's lane and Big Bazaar street and found the drains in a dreadful condition. The sweetmeat bazaar well is close to a most filthy drain with stagnant sewage; the construction of a pucca V shaped drain here is an urgent necessity; the well also requires deepening.

Visited the above places with the overseer and found no improvement.

(21) Inspected Sukkaravarapettah, &c.; the latrine in Christian lane is a regular disgrace to the municipality. The teppakolam contains a fair amount of water which looks dirty and would, I think, be improved if the silt were removed. The pulleys of Easwaren temple well requires renewing and the platform remaking.

6. *Vaccination.*—The hospital assistant attached to the municipal main hospital vaccinated 13 cases; all were successful; of these 7 were primary and 6 re-vaccination. The lady apothecary attached to the women and children's dispensary vaccinated 67 cases; all were successful; of these 55 were primary and 12 re-vaccination. The total number of children under one year vaccinated by the two medical subordinates were 36.

By Municipal Vaccinators.—There were two second-class vaccinators working in the municipality and they vaccinated 1,807 cases, of these 1,782 or 98·6 per cent. were successful. The numbers for the previous year were 1,620, 1,564 and 96·0. The total number of children successfully vaccinated under one year was 1,205 against 1,003 in 1893–94.

Vaccination was wholly conducted with animal lymph supplied from the Local fund depôt, Coimbatore, on payment of a moiety of the total cost of the depôt:—

	Total vaccinated.	Successful.
Animal lymph from calf-to-arm	450	450
Do. preserved in glycerine	1,437	1,412
Total ..	1,887	1,862

Including the work done by the medical subordinates, the total number of successful operations performed amounted to 1,862 or 40·1 per mille of the population against 1,771 or 38·2 per mille in the previous year. The total number of infants successfully vaccinated was 1,241 or 70·2 per cent. of the birth-rate against 1,046 or 61·0 per cent. in the previous year.

7. *Hospitals and Dispensaries.*—The total number of in and out patients treated for the past three years and the average daily attendance are as follows:—

	Total treated.	Average daily.
1892–93	32,927	220·84
1893–94	37,473	254·70
1894–95	46,370	292·26

The table shows a continuous and satisfactory increase, both in the number treated and in the daily average sick, a strong proof of the growing popularity of the institutions and an appreciation of European methods of treatment.

In-door.—The total treated was 503 against 504 in 1893–94. The number of deaths was 44 or 8·7 against 49 or 9·7 per cent. and the average daily sick was 21·49 against 21·02.

Out-door.—There were 45,867 patients treated against 36,969 in 1893–94, showing an increase of 8,898. The increase is observed in both institutions, viz., main hospital from 19,072 to 23,774 and women and children's dispensary from 17,897 to 22,093. The average daily attendance has also increased 2?2·26 against 233·68, viz., main hospital from 100·15 to 122·29, women and children's dispensary from 133·53 to 148·48.

Surgical Operations.—The number of major and minor operations has considerably increased, 116 major and 1,715 minor against 87 and 1,280 respectively in the previous year; of these 67 major and 831 minor operations were done at the main hospital, 49 major and 884 minor at the women and children's dispensary. There were four deaths—two cases of complex labour in which podalic version was performed in one, and craniotomy in the other, one puerperal convulsion in which forceps were used and the fourth induction of premature labour for puerperal eclampsia.

8. *Midwifery.*—The total number of parturition cases attended by the midwife attached to the municipal hospital and by the lady apothecary attached to the women and children's dispensary was 128 against 130 in the previous year, viz., 87 natural and 41 otherwise, of these 50 by the lady apothecary in private residences, 27 natural and 23 otherwise; the midwife confined 24 in hospital and 54 in the town against 33 and 53 respectively in the previous year. The midwife is paid on result system.

COIMBATORE, *17th May* 1895. (Signed) J. F. FITZPATRICK, Surgeon-Lt.-Col., *District Medical and Sanitary Officer.*

Current No. 227-Rev.

Forwarded.

19th July 1895. (Signed) T. V. NARAYANASWAMI AIYAR, *Deputy Collector.*

Endorsement on the annual report of the Coimbatore Municipality for 1894–95, dated 18th July 1895, No. 768.

Forwarded for the orders of Government.

2. *Constitution.*—Although at the end of the year there was only one official member, there appear to have been three at its commencement, and their average attendance should have been more than one; that of non-officials might also have been more than eight, seeing that the number of them was as many as seventeen for the greater part of the year.

3. *Financial.*—The year opened with a deficit of Rs. 2,238–13–11 and the total receipts amounted to Rs. 46,509–10–9. The net total receipts were therefore Rs. 44,270–12–10 against Rs. 43,060, the sanctioned estimate, and Rs. 43,720, the revised estimate of the year, and Rs. 43,819–9–7, the actuals of the preceding year. The increase occurs chiefly in the items (1) tax on buildings, (2) avenue receipts and (3) produce of lands, garden, &c.

4. The total charges were Rs. 43,665–15–4 or Rs. 1,595–15–4 more than the sanctioned estimate and Rs. 1,325–15–4 in excess of the revised estimate. A large expenditure chiefly in the items (1) repairs of communications, (2) results grants, (3) medicines and supplies and (4) sundries and contingencies, which is explained by the chairman, accounts for the increase. Compared with the actuals of the preceding year,

there is a falling off in the total charges of Rs. 2,392–8–2 which is due to greater expenditure in 1893–94 on account of (1) repairs to buildings and to works under drainage, (2) sundries and contingencies under hospitals and dispensaries and (3) conservancy.

Works.—There were no new works in the year under report, and the repairs to roads, buildings, &c., are detailed in part II of statement II-A. The expenditure on the upkeep of roads amounted to Rs. 6,609 and formed 64 per cent. of the net income from tolls. Of the amount Rs. 3,927–10–8 were paid for road materials, Rupees 1,784–12–0 were spent on account of the pay of road coolies, Rs. 281–6–7 on revetment to roads, repair of culverts and removing road earth, and the remainder Rs. 616–0–6 on the repair of four roads and a lane.

Under buildings, the hospital and latrines were repaired, while under "drainage" and "water-supply," the repairs of four drains and six wells and a pond was carried out. The removal of earth from the side drains was also effected under the former head and the emptying of a popular teppakulam of its dirty water and the cleansing of a well under the latter.

The Revenue Divisional officer has not reported on the condition of the roads as required. His attention has been drawn to the omission. For myself I have just joined the district and am therefore not in a position to say much about them; the main ones are broad and, though dusty, are metalled with kunkur, which stands rain well; but there is still room for improvement in many of the minor ones.

5. Education has been well attended to, the municipality aiding two secondary schools, itself maintaining seven primary schools as in the previous year, and the sum allotted for results grants being Rs. 300 more.

It is to be regretted that the provision of Rs. 130 for stipends to normal students was not utilized owing to candidates not having offered themselves to undergo training.

6. Some Rs. 19,000 was spent on sanitation and medical services, and the town has a good reputation for healthiness, but from the District Medical officer's note to the council on the subject, copy of which is enclosed, there is evidently great room for improvement here also; the *personnel* of the chairman, however, has recently been changed, and the attention of the council being drawn to the matter, this improvement will now, it is to be hoped, be gradually effected. The hospital service remains popular. The Karamadai railway accident added exceptionally to the numbers of in-patients in the previous year, but even so, there was only one in-patient less in the year under report and taking both hospital and branch dispensary together, 8,898 out-patients more.

7. In checking the accounts the following defects were found—

(1) Excess expenditure over budget provision on—

(i) (2) Repairs and communications under Grant I.

(ii) (*b*) Medicines and supplies and (*d*) sundries and contingencies under hospitals and dispensaries in Grant III.

(iii) "Printing" and (v) "other items" under (9) "other charges" subordinate to grant IV; and (iv) (*d*) office contingencies other than (*b*) (ii) under grant V.

(v) From statement V-B, it appears that two secondary schools were aided by the municipal council with a salary grant aggregating Rs. 1,077–10–5. But this is not shown in statement I furnished by the Assistant Inspector of Schools.

(vi) The average net cost per pupil in each class of municipal schools comes to Rs. 12–9–10 and Rs. 3–10–2 and not Rs. 15–8–11 and Rs. 3–14–0 as shown in column 20 of statement V-A.

COIMBATORE, *3rd August* 1895. (Signed) H. A. SIM, *Ag. Collector.*

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

The principal source is from wells; almost every house has its own well; the quality is generally bad.

There are 27 public wells, 2 tanks and 1 teppakolam within the municipal limits. The tanks were dry during the whole year. The teppakolam in the neighbourhood of Brahmin quarters has a watchman. All the wells have masonry platforms and walls, but the surroundings are not satisfactory, some being quite close to drains and cess-pools.

5. *Drainage.*—There is no proper system of drainage, the existing drains are side-ditches and, as a rule, are full of stagnant sewage. The bazaar street drains are still in the most insanitary state. The town was inspected by the District Medical and Sanitary Officer and his assistant seventeen times during the year, and on each occasion the inspection reports were forwarded to the chairman, but little or no effect was given to the recommendations.

The following are the defects brought to notice:—

(1) Northern part of the town overgrown with prickly-pear; this has been frequently observed by the Medical officer but apparently without effect.

(2) The latrines are in a shockingly neglected state.

(3) Street sweepings are deposited within town limits in unauthorized parts.

(4) The entrails of sheep are sold outside the stall instead of in the shed built purposely for this.

(5) *Market latrines.*—In very bad repairs and are shockingly neglected.

(6) The surroundings of sweetmeat bazaar well are very filthy; the platform is in need of urgent repairs; the drain by the side is filled with a black stinking sewage; as this is a most important water-supply of the town it is astonishing to see such neglect.

(7) Latrines in the fort are in a shockingly neglected state.

(8) Drains in several parts of the town are in a very filthy condition with stagnant offensive sewage.

(9) *Easwaren Temple Well.*—The wall built to prevent people getting into the well does not serve the purpose as they easily get down the steps into the well.

(10) The municipal latrines in Thorayer's lane are in a dilapidated condition; the drains and floors are broken, urine, &c., soak into the ground and the stink is abominable.

(11) The municipal garden near the wall latrines is used as a latrine and for emptying the rubbish and sewage carts.

(12) *Slaughter-house.*—The reservoir for water is dirty, as well as the well that supplies water to the reservoir. It should be cleaned out and a parapet wall raised.

(13) Sweetmeat bazaar well, the most important water-supply of the town, is still in the same condition as reported on the 11th August 1894.

(14) The sanitary condition of Fishermen lane is disgraceful; it is one large latrine.

(15) *Kottarakonian's lane.*—It is one large latrine. The municipal latrine is in a shamefully neglected condition like the other latrines in the town.

(16) The poor house is very much in want of repair and the present accommodation is very limited for the number of inmates now over 100. Several of the inmates complained of the want of mats, none having been supplied for years. The vicinity of the poor house in front and back and all about the night-soil depôt is overgrown with prickly-pear and is very offensive. I have on several occasions brought this to notice and recommended the removal of the prickly-pear, but am sorry to see no notice has been taken of my recommendations. Most of the latrines want repair.

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

(12) *Slaughter-house.*—The reservoir for water is dirty, as well as the well that supplies water to the reservoir. It should be cleaned out and a parapet wall raised.

(13) Sweetmeat bazaar well, the most important water-supply of the town, is still in the same condition as reported on the 11th August 1894.

(14) The sanitary condition of Fishermen lane is disgraceful; it is one large latrine.

(15) *Kottarakonian's lane.*—It is one large latrine. The municipal latrine is in a shamefully neglected condition like the other latrines in the town.

(16) The poor house is very much in want of repair and the present accommodation is very limited for the number of inmates now over 100. Several of the inmates complained of the want of mats, none having been supplied for years. The vicinity of the poor house in front and back and all about the night-soil depôt is overgrown with prickly-pear and is very offensive. I have on several occasions brought this to notice and recommended the removal of the prickly-pear, but am sorry to see no notice has been taken of my recommendations. Most of the latrines want repair.

the allotment of Rs. 1,330 provided in the revised estimate. During the last year, about Rs. 700 worth of medicines were purchased from several chemists on different occasions besides the medicines procured from England from the firm of Messrs. Burgoyne and Co. to the value of Rs. 1,035–6–3, and from Medical Stores to the value of Rs. 301–4–10. In the previous year Rs. 1,851–8–11 were expended on account of this item.

49. *Sundries and Contingencies—Rs.* 1,248–14–10 *or Rs.* 248–14–10 *over the revised estimate of Rs.* 1,000.—The increase was due to the purchase of stationery, bedding and clothing, &c.

50. *Contributions to Provincial Funds.*—A sum of Rs. 370 was paid during the year on account of contribution to the Medical College, sanitary inspection, medical reserve staff and cutlers' establishment.

51. *Vaccination—Contingencies—Rs.* 63–1–0 *or Rs.* 23–1–0 *over the revised estimate of Rs.* 40.—The increase is due to the cost of printed forms supplied to the vaccinators.

52. The total number of persons vaccinated during the year was 1,807, of which 20 were unsuccessful and 5 unknown. The total number of operations on children below one year of age was 1,205. Of this number 1,193 were successful, 9 unsuccessful and 3 unknown. Of the total number of operations (1,782) 450 were from calf direct, 1,332 by glycerine paste. The total number of births registered during the year was 1,765.

53. *Conservancy—(ii) Other Charges.*—Rs. 1,393–5–11 were spent against the allotment of Rs. 1,600 or Rs. 206–10–1 less than the revised estimate. The decrease is due to the non-purchase of new carts, &c.

54. *Conservancy—Contingencies.*—Rs. 383–6–1 were first entered as actual expenditure against this head, but Rs. 120 paid for cleaning butcher's and slaughter house stalls are now charged under the heads of market and slaughter-house contingencies at the suggestion of the auditor. Hence the fall below the revised estimate.

55. *Grant IV, Feeding Paupers.*—The actual charges incurred amounted to Rs. 1,897–11–8 or Rs. 97–11–8 in excess of the revised estimate of Rs. 1,800. This is due to the admission of a large number of paupers into the institution.

56. *Travellers' Bungalow—(a) Establishment.*—The outlay under this item was Rs. 157–11–10. The excess expenditure Rs. 37–11–10 over the revised estimate of Rs. 120 is due to the expenditure incurred up to the leasing of the travellers' bungalow from the 1st January 1895.

57. *Other Charges.*—Rs. 570–7–10 were spent under this item on account of land revenue, numbering houses, printing registration tin tickets, &c., which has exceeded the revised estimate by Rs. 40–7–10.

58. *Grant V, Office Contingencies.*—Rs. 560–13–1 were spent on account of printing voters' lists, &c. The increase over the revised estimate is Rs. 160–13–1.

59. *Sanitation.*—The town was free from cholera and small-pox. The necessity for increasing the number of dust-bins will be borne in mind. Every effort is made to keep the town as clean as possible. The street sweepings and house refuse are collected and daily carted away to the several rubbish depôts. At present no rubbish is shot in unrecognized depôts. The practice of the cartmen to deposit rubbish in private lands and open spaces and the use of old depôts have been strictly prohibited.

60. *Hospitals.*—The total number of in and out patients treated at the main hospital during the year was 503 and 23,774, respectively, against 504 in and 36,969 * out patients in the previous year. In the women and children's dispensary, the total number treated was 22,093. It is satisfactory to note that both the institutions are becoming popular.

* 19,072—36,969 is the figure for *both* hospital and dispensary.

(Intld.) H. A. S.

61. *Registration.*—The following statement shows the registration of births and deaths during the official year 1894–95. Much attention is paid to secure correct returns. Thirteen prosecutions were instituted for failure to report occurrences.

the allotment of Rs. 1,330 provided in the revised estimate. During the last year, about Rs. 700 worth of medicines were purchased from several chemists on different occasions besides the medicines procured from England from the firm of Messrs. Burgoyne and Co. to the value of Rs. 1,035–6–3, and from Medical Stores to the value of Rs. 301–4–10. In the previous year Rs. 1,851–8–11 were expended on account of this item.

49. *Sundries and Contingencies—Rs.* 1,248–14–10 *or Rs.* 248–14–10 *over the revised estimate of Rs.* 1,000.—The increase was due to the purchase of stationery, bedding and clothing, &c.

57. *Other Charges.*—Rs. 570–7–10 were spent under this item on account of land revenue, numbering houses, printing registration tin tickets, &c., which has exceeded the revised estimate by Rs. 49–7–10.

58. *Grant V, Office Contingencies*.—Rs. 560–13–1 were spent on account of printing voters' lists, &c. The increase over the revised estimate is Rs. 160–13–1.

59. *Sanitation.*—The town was free from cholera and small-pox. The necessity for increasing the number of dust-bins will be borne in mind. Every effort is made to keep the town as clean as possible. The street sweepings and house refuse are collected and daily carted away to the several rubbish depôts. At present no rubbish is shot in unrecognized depôts. The practice of the cartmen to deposit rubbish in private lands and open spaces and the use of old depôts have been strictly prohibited.

60. *Hospitals.*—The total number of in and out patients treated at the main hospital during the year was 503 and 23,774, respectively, against 504 in and 36,969 * out patients in the previous year. In the women and children's dispensary, the total number treated was 22,093. It is satisfactory to note that both the institutions are becoming popular.

* 19,072—36,969 is the figure for *both* hospital and dispensary.

(Intld.) H. A. S.

61. *Registration.*—The following statement shows the registration of births and deaths during the official year 1894–95. Much attention is paid to secure correct returns. Thirteen prosecutions were instituted for failure to report occurrences.

Further, the registrars furnish the vaccinators with complete lists of the births occurring in each month so as to facilitate the work of vaccination :—

Year.	Births.	Deaths.
1893–94	1,696	1,314
1894–95	1,765	1,196

Of the total number of deaths, one is ascribed to small-pox, 275 to fever, 122 to bowel-complaints, 15 to accidents and 783 to other causes.

62. *Municipal Accounts.*—The accounts for the year were audited by the Inspector of Local Fund Accounts, and his figures are adopted in the statements accompanying this report.

63. *Concluding Remarks.*—During the year under report, a sub-committee was formed to investigate into the finances of the municipality and to devise measures for the speedy collection of house and land taxes (arrears and current), of taxes on vehicles, animals and carts, imperfectly registered and of private scavenging fees, &c. The suggestions made by them were adopted, and a greater portion of the outstanding taxes and fees under the above heads were collected and thereby the deficit of Rs. 2,239 referred to in the last administration report was made good. The defects brought to notice by the District Medical and Sanitary Officer have received the careful consideration and attention of the council and the steps taken in each case are stated below for the information of Government :—

(1) *Northern part of the town overgrown with prickly-pear.*—A great portion of this belongs to private individuals. They have been called upon to clear the ground.

The establishment maintained for removing prickly-pear is steadily at work in places belonging to the municipality.

(2) *Latrines.*—These as well as other latrines are now in charge and under the special supervision of a maistry.

(3) *Street Sweepings.*—Sweepings deposited in unauthorized parts have been removed.

(4) *Sale of entrails of sheep.*—Sale outside the stalls has been stopped and market peons ordered to prosecute persons violating the rules.

(5) *Market latrines.*—These are cleaned daily. The repairs will be undertaken soon.

(6) *The surroundings of the sweetmeat bazaar well.*—This is a private well. The surroundings are kept clean. The drain by the side has been thoroughly renewed and the platform repaired.

(7) *Fort latrines.*—These are regularly cleaned and inspected daily.

(8) *Drains.*—This is chiefly due to want of masonry drains. The council is prohibited from incurring any expenditure in the construction of drains by order of Government, Mis. No. 183, dated 21st February 1888. The present mode of cleaning tends only to deepen the drains and to prevent free flow of water or sewage.

(9) *Easwarèn temple well.*—The wall here has been raised sufficiently high to prevent people from getting into the well.

(10) *Latrines in Thorayer's lane.*—These will be repaired soon.

(11) *Municipal garden.*—The use of this as a latrine has been stopped.

(12) *Slaughter-house.*—The reservoir is kept clean. The well has been cleaned and parapet wall raised.

(13) *Sweetmeat bazaar well.*—The needful has been done.

(14) *Fishermen lane.*—There is no place to build a latrine in the lane; care is taken to keep it clean.

(15) *Kottarakonian's lane latrine.*—Estimate for repairs is ready.

(16) *Poor house.*—The compound wall has been repaired. The inmates are only eighty in number. Prickly-pear all round the poor house and near the night-soil depôt has been removed and the latrines repaired.

(17) *Abib Marakair's tannery.*—This is now closed.

(18) *Supply of drinking water to inmates of Poor house.*—The contractor's attention has been called to the necessity of supplying good drinking water.

(19) *Night-soil depôt.*—This is inspected daily by the ward inspector who superintends the work and regulates the burying of the soil as suggested by the District Medical officer.

A new site has been selected and the matter is before the Collector of the district.

(20) *Sweetmeat bazaar well.*—The construction of the drain is completed. The well has been deepened.

(21) *Latrines in Christian lane.*—All the latrines here have been properly repaired and are kept clean. Silt has been removed from the teppakolam. The pulleys of the Easwarèn Kôil well have been renewed and the platform reconstructed.

64. A copy of the resolution of the council passing the annual report and the statements is also submitted.

ENCLOSURE.

ANNUAL report on the working of Municipal Main Hospital and Women and Children's Dispensary, Coimbatore, for the year 1894–95.

Public Health.—Nothing unusual happened to affect the health of the town. The rainfall was considerably less, only 11·49 inches against an average of 22 inches. The water-supply was therefore scanty, but there was no drought. There was no scarcity of food-grains. As ascertained from dispensary statistics the principal diseases and conditions for which advice and treatment were sought were the following :—

Diseases of the digestive system.	Malarious fever.
Diseases of skin.	Local injuries.
Ulcers.	Rheumatic affections.
Diseases of eye.	Syphilis.
Diseases of respiratory system.	Dysentery.
Diseases of ear.	

2. *Vital Statistics.*—The following statement gives the vital statistics of the town for the year under report and for three previous years :—

Years.	Cholera.	Small-pox.	Fever.	Other causes.	Total deaths.	Total births.
1891–92	179	184	229	954	1,546	1,629
1892–93	1	98	250	782	1,131	1,625
1893–94	11	17	309	973	1,310	1,696
1894–95	..	1	275	918	1,194	1,767

The town was free from cholera and small-pox. The total number of deaths recorded from fevers 275 and from all other causes 918. The ratios of births and deaths per 1,000 of population were 38·1 and 25·7.

3. *Sanitation.*—House refuse collected in 122 moveable iron dust-bins and the street sweepings are daily removed to depôts outside the town in hand-carts. The number of dust-bins is inadequate. The old rubbish depôts within the town which were abandoned some time ago are also at times used and fresh stuff deposited. Rubbish is also found heaped up in non-recognized depôts such as private lands and open spaces. These were on several occasions brought to the notice of the chairman and councillors. There were 29 public latrines (14 pucca built, 8 brick wall enclosures and 7 mud wall enclosures). Most of these are in a dilapidated condition and foul smelling; some are freely resorted to and would be more so if kept in proper repairs and in a good sanitary condition. The urgent necessity of the repairs and the construction of more

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

The principal source is from wells; almost every house has its own well; the quality is generally bad.

There are 27 public wells, 2 tanks and 1 teppakolam within the municipal limits. The tanks were dry during the whole year. The teppakolam in the neighbourhood of Brahmin quarters has a watchman. All the wells have masonry platforms and walls, but the surroundings are not satisfactory, some being quite close to drains and cess-pools.

5. *Drainage.*—There is no proper system of drainage, the existing drains are side-ditches and, as a rule, are full of stagnant sewage. The bazaar street drains are still in the most insanitary state. The town was inspected by the District Medical and Sanitary Officer and his assistant seventeen times during the year, and on each occasion the inspection reports were forwarded to the chairman, but little or no effect was given to the recommendations.

The following are the defects brought to notice :—

(1) Northern part of the town overgrown with prickly-pear; this has been frequently observed by the Medical officer but apparently without effect.

(2) The latrines are in a shockingly neglected state.

(3) Street sweepings are deposited within town limits in unauthorized parts.

(4) The entrails of sheep are sold outside the stall instead of in the shed built purposely for this.

(5) *Market latrines.*—In very bad repairs and are shockingly neglected.

(6) The surroundings of sweetmeat bazaar well are very filthy; the platform is in need of urgent repairs; the drain by the side is filled with a black stinking sewage; as this is a most important water-supply of the town it is astonishing to see such neglect.

(7) Latrines in the fort are in a shockingly neglected state.

(8) Drains in several parts of the town are in a very filthy condition with stagnant offensive sewage.

(9) *Easwaren Temple Well.*—The wall built to prevent people getting into the well does not serve the purpose as they easily get down the steps into the well.

(10) The municipal latrines in Thorayer's lane are in a dilapidated condition; the drains and floors are broken, urine, &c., soak into the ground and the stink is abominable.

(11) The municipal garden near the wall latrines is used as a latrine and for emptying the rubbish and sewage carts.

(12) *Slaughter-house.*—The reservoir for water is dirty, as well as the well that supplies water to the reservoir. It should be cleaned out and a parapet wall raised.

(13) Sweetmeat bazaar well, the most important water-supply of the town, is still in the same condition as reported on the 11th August 1894.

(14) The sanitary condition of Fishermen lane is disgraceful; it is one large latrine.

(15) *Kottarakonian's lane.*—It is one large latrine. The municipal latrine is in a shamefully neglected condition like the other latrines in the town.

(16) The poor house is very much in want of repair and the present accommodation is very limited for the number of inmates now over 100. Several of the inmates complained of the want of mats, none having been supplied for years. The vicinity of the poor house in front and back and all about the night-soil depôt is overgrown with prickly-pear and is very offensive. I have on several occasions brought this to notice and recommended the removal of the prickly-pear, but am sorry to see no notice has been taken of my recommendations. Most of the latrines want repair.

35. *Grant I, Public Works—New Works—Communications.*—Decrease Rs. 200. No new works of any importance were executed during the year.

36. *Repairs—Communications.*—Rs. 6,609–13–9 were expended in repairing 35⅛ miles of town roads, of which 22 miles and 2 furlongs are metalled and the rest unmetalled. In the previous year Rs. 5,657–3–5 were expended. The revised estimate for 1894–95 was Rs. 6,000. The roads were maintained in fair order. Although scarcity of water has to some extent precluded the roads from being properly tamped, endeavours have been made to improve their condition and repairs carried out promptly.

37. *Buildings.*—Rs. 423–13–4 were expended, against Rs. 520 of the revised estimate, and Rs. 1,348–12–10, the actuals of the previous year. The following repairs to buildings were executed during the year :—

	Rs.	A.	P.
For repairing latrines	61	14	1
„ repairing main hospital	328	15	3
„ petty repairs to branch dispensary	13	0	0
„ constructing a cistern	20	0	0
Total ..	423	13	4

38. *Drainage.*—Rs. 542–0–6 were expended in repairing the drains, against Rs. 550 of the revised estimate, and Rs. 1,395–4–1, the actuals of the previous year. During the year under report, Rs. 168 were spent in improving Venkate Gounden's lane, Rs. 197–15–2 for removing drain earth, Rs. 47 for repairing Pothanar road drain, and Rs. 92–8–0 for improving Thorayer's lane drains, Rs. 21–9–4 for repairing Fish Bazaar street drain and Rs. 15 for a cistern near taluk cutcherry lane.

39. The District Medical and Sanitary Officer's remarks regarding the insanitary state of the street drains have been duly noted and although G.O., No. 183, dated 21st February 1888, prohibits any expenditure being incurred on drains till a plan has been prepared and approved for the whole town, still the council is endeavouring its best to keep the drains and side ditches as clean as possible and free from stagnant sewage. The defective state of these drains is undoubtedly due to the want of a proper system of drainage.

40. *Water-supply.*—Rs. 337–3–6 were expended, against the revised estimate of Rs. 280, and Rs. 758–14–3, the actuals of the previous year. Nine wells were repaired and improved during the year.

41. As regards the unsatisfactory condition of the surroundings of the wells, steps will be taken to remedy the defect as far as possible.

42. *Grant II, Education.*—The amount expended under this head was Rupees 5,633–7–3, against Rs. 5,880 of the revised estimate, and Rs. 5,630–11–7, the actuals of the previous year.

43. *Training Schools—Stipends to Normal Students.*—The sum of Rs. 130 provided for the training of two students (one lower secondary and one primary) in the Government training school was not utilized for the purpose as there were no candidates.

44. *Salary Result System Schools—(b) Results Grants.*—The outlay under this head amounted to Rs. 387–9–0, against the revised estimate of Rs. 360, and Rupees 369–7–9, the actuals of last year. The increase was due to over-earned grants.

45. *Salary Grants.*—The amount of salary grant paid to the managers of the Coimbatore College, St. Michael's College, and the Meracoir Muhammadan school amounted to Rs. 1,575–14–5, against the provision of Rs. 1,900 of the revised estimate, the actuals of the previous year being Rs. 1,686–12–8.

46. *Results Grants.*—The total amount of grant earned by the schools under the results system amounted to Rs. 1,686–14–0 or Rs. 86–14–0 in excess of the revised estimate of Rs. 1,600. The actuals of the previous year were Rs. 1,362–1–3.

47. The other items call for no remarks.

48. *Grant III, Hospitals and Dispensaries—Medicines and Supplies.*—Rupees 1,975–14–2 were spent in the purchase of European and country medicines against

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

The principal source is from wells; almost every house has its own well; the quality is generally bad.

There are 27 public wells, 2 tanks and 1 teppakolam within the municipal limits. The tanks were dry during the whole year. The teppakolam in the neighbourhood of Brahmin quarters has a watchman. All the wells have masonry platforms and walls, but the surroundings are not satisfactory, some being quite close to drains and cess-pools.

5. *Drainage.*—There is no proper system of drainage, the existing drains are side-ditches and, as a rule, are full of stagnant sewage. The bazaar street drains are still in the most insanitary state. The town was inspected by the District Medical and Sanitary Officer and his assistant seventeen times during the year, and on each occasion the inspection reports were forwarded to the chairman, but little or no effect was given to the recommendations.

The following are the defects brought to notice :—

(1) Northern part of the town overgrown with prickly-pear; this has been frequently observed by the Medical officer but apparently without effect.

(2) The latrines are in a shockingly neglected state.

(3) Street sweepings are deposited within town limits in unauthorized parts.

(4) The entrails of sheep are sold outside the stall instead of in the shed built purposely for this.

(5) *Market latrines.*—In very bad repairs and are shockingly neglected.

(6) The surroundings of sweetmeat bazaar well are very filthy; the platform is in need of urgent repairs; the drain by the side is filled with a black stinking sewage; as this is a most important water-supply of the town it is astonishing to see such neglect.

(7) Latrines in the fort are in a shockingly neglected state.

(8) Drains in several parts of the town are in a very filthy condition with stagnant offensive sewage.

(9) *Easwaren Temple Well.*—The wall built to prevent people getting into the well does not serve the purpose as they easily get down the steps into the well.

(10) The municipal latrines in Thorayer's lane are in a dilapidated condition; the drains and floors are broken, urine, &c., soak into the ground and the stink is abominable.

(11) The municipal garden near the wall latrines is used as a latrine and for emptying the rubbish and sewage carts.

(12) *Slaughter-house.*—The reservoir for water is dirty, as well as the well that supplies water to the reservoir. It should be cleaned out and a parapet wall raised.

(13) Sweetmeat bazaar well, the most important water-supply of the town, is still in the same condition as reported on the 11th August 1894.

(14) The sanitary condition of Fishermen lane is disgraceful; it is one large latrine.

(15) *Kottarakonian's lane.*—It is one large latrine. The municipal latrine is in a shamefully neglected condition like the other latrines in the town.

(16) The poor house is very much in want of repair and the present accommodation is very limited for the number of inmates now over 100. Several of the inmates complained of the want of mats, none having been supplied for years. The vicinity of the poor house in front and back and all about the night-soil depôt is overgrown with prickly-pear and is very offensive. I have on several occasions brought this to notice and recommended the removal of the prickly-pear, but am sorry to see no notice has been taken of my recommendations. Most of the latrines want repair.

35. *Grant I, Public Works—New Works—Communications.*—Decrease Rs. 200. No new works of any importance were executed during the year.

36. *Repairs—Communications.*—Rs. 6,609–13–9 were expended in repairing 35⅛ miles of town roads, of which 22 miles and 2 furlongs are metalled and the rest unmetalled. In the previous year Rs. 5,657–3–5 were expended. The revised estimate for 1894–95 was Rs. 6,000. The roads were maintained in fair order. Although scarcity of water has to some extent precluded the roads from being properly tamped, endeavours have been made to improve their condition and repairs carried out promptly.

37. *Buildings.*—Rs. 423–13–4 were expended, against Rs. 520 of the revised estimate, and Rs. 1,348–12–10, the actuals of the previous year. The following repairs to buildings were executed during the year :—

	Rs.	A.	P.
For repairing latrines	61	14	1
„ repairing main hospital	328	15	3
„ petty repairs to branch dispensary	13	0	0
„ constructing a cistern	20	0	0
Total ..	423	13	4

38. *Drainage.*—Rs. 542–0–6 were expended in repairing the drains, against Rs. 550 of the revised estimate, and Rs. 1,395–4–1, the actuals of the previous year. During the year under report, Rs. 168 were spent in improving Venkate Gounden's lane, Rs. 197–15–2 for removing drain earth, Rs. 47 for repairing Pothanar road drain, and Rs. 92–8–0 for improving Thorayer's lane drains, Rs. 21–9–4 for repairing Fish Bazaar street drain and Rs. 15 for a cistern near taluk cutcherry lane.

39. The District Medical and Sanitary Officer's remarks regarding the insanitary state of the street drains have been duly noted and although G.O., No. 183, dated 21st February 1888, prohibits any expenditure being incurred on drains till a plan has been prepared and approved for the whole town, still the council is endeavouring its best to keep the drains and side ditches as clean as possible and free from stagnant sewage. The defective state of these drains is undoubtedly due to the want of a proper system of drainage.

40. *Water-supply.*—Rs. 337–3–6 were expended, against the revised estimate of Rs. 280, and Rs. 758–14–3, the actuals of the previous year. Nine wells were repaired and improved during the year.

41. As regards the unsatisfactory condition of the surroundings of the wells, steps will be taken to remedy the defect as far as possible.

42. *Grant II, Education.*—The amount expended under this head was Rupees 5,633–7–3, against Rs. 5,880 of the revised estimate, and Rs. 5,630–11–7, the actuals of the previous year.

43. *Training Schools—Stipends to Normal Students.*—The sum of Rs. 130 provided for the training of two students (one lower secondary and one primary) in the Government training school was not utilized for the purpose as there were no candidates.

44. *Salary Result System Schools—(b) Results Grants.*—The outlay under this head amounted to Rs. 387–9–0, against the revised estimate of Rs. 360, and Rupees 369–7–9, the actuals of last year. The increase was due to over-earned grants.

45. *Salary Grants.*—The amount of salary grant paid to the managers of the Coimbatore College, St. Michael's College, and the Meracoir Muhammadan school amounted to Rs. 1,575–14–5, against the provision of Rs. 1,900 of the revised estimate, the actuals of the previous year being Rs. 1,686–12–8.

46. *Results Grants.*—The total amount of grant earned by the schools under the results system amounted to Rs. 1,686–14–0 or Rs. 86–14–0 in excess of the revised estimate of Rs. 1,600. The actuals of the previous year were Rs. 1,362–1–3.

47. The other items call for no remarks.

48. *Grant III, Hospitals and Dispensaries—Medicines and Supplies.*—Rupees 1,975–14–2 were spent in the purchase of European and country medicines against

latrines were on several times brought to the notice of the chairman without any effect. The few repairs executed at a cost of Rs. 62 consisted principally of white-washing.

4. *Water-supply.*—No improvement has been done in this direction except repairing a few wells at a cost of Rs. 279.

The principal source is from wells; almost every house has its own well; the quality is generally bad.

There are 27 public wells, 2 tanks and 1 teppakolam within the municipal limits. The tanks were dry during the whole year. The teppakolam in the neighbourhood of Brahmin quarters has a watchman. All the wells have masonry platforms and walls, but the surroundings are not satisfactory, some being quite close to drains and cess-pools.

5. *Drainage.*—There is no proper system of drainage, the existing drains are side-ditches and, as a rule, are full of stagnant sewage. The bazaar street drains are still in the most insanitary state. The town was inspected by the District Medical and Sanitary Officer and his assistant seventeen times during the year, and on each occasion the inspection reports were forwarded to the chairman, but little or no effect was given to the recommendations.

The following are the defects brought to notice:—

(1) Northern part of the town overgrown with prickly-pear; this has been frequently observed by the Medical officer but apparently without effect.

(2) The latrines are in a shockingly neglected state.

(3) Street sweepings are deposited within town limits in unauthorized parts.

(4) The entrails of sheep are sold outside the stall instead of in the shed built purposely for this.

(5) *Market latrines.*—In very bad repairs and are shockingly neglected.

(6) The surroundings of sweetmeat bazaar well are very filthy; the platform is in need of urgent repairs; the drain by the side is filled with a black stinking sewage; as this is a most important water-supply of the town it is astonishing to see such neglect.

(7) Latrines in the fort are in a shockingly neglected state.

(8) Drains in several parts of the town are in a very filthy condition with stagnant offensive sewage.

(9) *Easwaren Temple Well.*—The wall built to prevent people getting into the well does not serve the purpose as they easily get down the steps into the well.

(10) The municipal latrines in Thorayer's lane are in a dilapidated condition; the drains and floors are broken, urine, &c., soak into the ground and the stink is abominable.

(11) The municipal garden near the wall latrines is used as a latrine and for emptying the rubbish and sewage carts.

(12) *Slaughter-house.*—The reservoir for water is dirty, as well as the well that supplies water to the reservoir. It should be cleaned out and a parapet wall raised.

(13) Sweetmeat bazaar well, the most important water-supply of the town, is still in the same condition as reported on the 11th August 1894.

(14) The sanitary condition of Fishermen lane is disgraceful; it is one large latrine.

(15) *Kottarakonian's lane.*—It is one large latrine. The municipal latrine is in a shamefully neglected condition like the other latrines in the town.

(16) The poor house is very much in want of repair and the present accommodation is very limited for the number of inmates now over 100. Several of the inmates complained of the want of mats, none having been supplied for years. The vicinity of the poor house in front and back and all about the night-soil depôt is overgrown with prickly-pear and is very offensive. I have on several occasions brought this to notice and recommended the removal of the prickly-pear, but am sorry to see no notice has been taken of my recommendations. Most of the latrines want repair.

Corrections as far as practicable to be attended to when complete proof is submitted

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper:—

From M.R.Ry. I. VENKATASAWMY NAIDU Garu, Chairman-delegate, Municipal Council, Coimbatore, to the Chief Secretary to Government (through the Revenue Officer of the division), dated Coimbatore, 18th July 1895, No. 768.

I have the honour to submit the annual report on the administration of the Coimbatore Municipality for the official year 1894–95, and to enclose the statements prepared in conformity to the instructions conveyed in G.O., No. 2193 M., dated 10th December 1891. The tabular statements of the Assistant Inspector of Schools, Eighth Division, and the report of the District Medical and Sanitary Officer on the working of the municipal hospital and women and children's dispensary are also herewith submitted.

I.—Constitution of the Municipal Council.

2. The maximum sanctioned strength of the council has been twenty; but on the 31st March last the strength of the council was eleven owing to the term of office of nine councillors having expired on the 2nd February 1895. Of the eleven members, one was ex-officio, four nominated and six elected.

3. The town has been divided into seven wards for electoral purposes. The total number of registered voters at the close of the year was 1,143. During the year under report four uncontested and eight contested municipal elections were held on the 6th October 1894 and on the 16th February and 16th March 1895 in all the seven wards to fill up the vacancies caused by the expiration of the term of office of the councillors. There was very keen competition in canvassing votes in the second, third, fourth, sixth and seventh wards.

4. The total number of meetings held during the year was twenty-three. Only one meeting was adjourned for want of a quorum.

II.—Receipts.

5. The year opened with a deficit balance of Rs. 2,238–13–11. The total receipts during the year was Rs. 46,509–10–9. The net receipt after deducting the deficit balance amounted to Rs. 44,270–12–10. The total expenditure amounted to Rs. 43,665–15–4. The balance of municipal fund at the end of the year was Rs. 604–13–6 exclusive of cash deposit of Rs. 5,217–8–0.

A.—Receipts from Taxation.

6. *Tax on Buildings—(a) Arrears.*—The amount of arrears at the beginning of the year was Rs. 406–7–10. Of this, Rs. 370–7–10 were realized and Rs. 36 were written off the account as irrecoverable owing to some houses having fallen into ruins and to some house-owners having become paupers. There was no balance of arrears at the close of the year.

(*b*) *Current.*—The original demand was Rs. 17,047–12–0. Of this amount, Rs. 131–4–0 were remitted by the council on appeal. The demand finally settled was Rs. 16,916–8–0. Of this, Rs. 6–5–0 were remitted on account of vacant houses and Rs. 14–8–0 were written off as irrecoverable owing to the poverty of certain rate-payers. The amount collected was Rs. 16,775–11–4, leaving a small balance of Rs. 119–15–8 at the close of the year.

7. The total number of houses assessed was 6,445, and the amount involved was Rs. 16,916–8–0. The incidence of the house-tax per house was Rs. 2–9–11 against Rs. 2–7–2 of the previous year.

8. *Tax on Lands—Arrears.*—At the beginning of the year the arrears under this item amounted to Rs. 273–4–11. Of this sum, Rs. 237–15–11 were collected and Rs. 35–5–0 were written off the accounts as irrecoverable.

9. *Current.*—The finally settled demand was Rs. 1,095–12–0. Of this, Rs. 959–9–0 were collected and Rs. 29–9–0 were written off as irrecoverable. The balance at the close of the year was Rs. 106–10–0. Stringent measures have been adopted to collect this amount as early as possible.

10. *Tax on Vehicles.*—Rupees 718–8–0 were collected against Rs. 800 of the revised estimate, and Rs. 595–8–0, the actuals of the previous year.

11. *Tax on Animals.*—Rupees 1,417–12–0 were realized, against the revised estimate of Rs. 1,550, and Rs. 1,311, the actuals of the previous year.

12. *Tax on Carts.*—Under this head, the amount realized was Rs. 2,704, against Rs. 2,650 of the revised estimate, and Rs. 2,494, the actuals of the previous year. The increase under all these heads over the actuals of 1893–94 is due to the detection of unlicensed carts, vehicles and animals of previous years and to their registration during the current year. These taxes are levied at the maximum rates.

13. *Tolls.*—The collections under this head amounted to Rs. 15,375. Of this sum, Rs. 10,250 were credited to municipal funds and Rs. 5,125 were paid to the district board on account of one-third contribution. The tolls are levied at the maximum rates. In the previous year, the tolls realised Rs. 14,913–7–10. No repairs were executed during the year to any of the seven toll-gates. The full amount of one-third share due to the local fund board was paid during the year.

14. *Incidence of Taxation.*—The total income from taxation amounted to Rs. 33,433–8–1 including, and Rs. 23,183–8–1 excluding, tolls. The incidence of taxation per head of population was As. 11–6 in the former and As. 7–11 in the latter, against As. 10–6 and As. 7–10 in 1893–94.

B.—Revenue derived from Municipal Property and Powers apart from Taxation.

15. *Fees under Act II of* 1888.—Rupees 65 were collected on the two theatrical pandals erected during the year.

16. *The Avenue Tamarind Trees, Avenue Clippings, &c.*, fetched Rs. 527–1–0, against Rs. 460 of the revised estimate, and Rs. 296–9–0, the actuals of the previous year. The sum of Rs. 51–4–0, being the arrears of 1891–92 which had to be paid by the tamarind tree contractor, had to be recovered from him by a civil suit. Of this, only a sum of Rs. 40 was recovered and the balance, Rs. 11–4–0, was written off the accounts as irrecoverable.

17. *Travellers' Bungalow.*—The bungalow was under the direct management of the municipal council from April to December 1894. The fees realized therefrom amounted to Rs. 185–5–0. Of this amount, Rs. 15 represents the sum paid by the contractor for the last three months of 1894–95, at Rs. 5 a month, the bungalow being let on contract from January to March 1895. The actuals of the previous year was Rs. 470–14–0. The revised estimate for 1894–95 was Rs. 270.

18. *Produce of Lands, Gardens, &c.*—Rs. 849–0–1 were realized, against Rs. 640 of the revised estimate, and Rs. 696–6–2, the actuals of the previous year. The increase is due to the sale of the babool, &c., trees grown in the palmyra tope which fetched Rs. 320.

19. *Sale-proceeds of old Materials, &c.*—During the year under report, this item fetched Rs. 101–14–0, against the revised estimate of Rs. 150, and Rs. 35–6–6, the actuals of the previous year.

20. *Conservancy Receipts—Sale-proceeds of Night-soil, Street-refuse, &c.*—Rupees 140–14–0 were realized, against the revised estimate of Rs. 200, and Rs. 90–5–6, the actuals of the previous year.

21. *Fees from Educational Institutions.*—The realization under this head amounted to Rs. 461–6–6, against the revised estimate of Rs. 400, and Rs. 429–5–0, the actuals of the previous year.

22. *Other Hospital Receipts, Rs.* 781–14–9.—This amount represents the cost of treating the wounded persons rescued from the Karamaday accident and paid by the Railway Company.

23. *Income from Market.*—Rs. 1,454–8–10 were realized, against Rs. 1,450 of the revised estimate, and Rs. 1,814–4–3, the actuals of the previous year. The decrease is due to want of competition.

24. *Income from Slaughter-house.*—Rs. 777–15–6 were realized, against Rs. 770 of the revised estimate, and Rs. 812–11–1, the actuals of the previous year.

25. *Other Fees—Distraint Fees.*—This item being small calls for no remarks.

26. *License Fees.*—Rs. 719–10–0 were realized, against Rs. 630 of the revised estimate, and Rs. 601, the actuals of the previous year. The particulars of licenses for which the above fees were collected are as follows :—

	Rs.	A.	P.
For wood depôt	311	0	0
„ straw „	7	0	0
„ fish „	20	0	0
„ beef butchering	30	0	0
„ oil-boiling	13	0	0
„ kerosine oil depôt	100	0	0
„ fees under section 180 of Act IV of 1884 ..	55	0	0
„ temporary pandals	183	10	0
Total ..	719	10	0

27. *Cart-stand Fees.*—Rs. 521–8–1 were realized, against Rs. 520 of the revised estimate, and Rs. 490, the actuals of the previous year.

28. *Fines under Municipal and other Acts.*—The realization under this item amounted to Rs. 773–11–0, against the revised estimate of Rs. 550, and Rs. 865–8–6, the actuals of the previous year.

29. *Interest on Investments—Medical.*—Rs. 224–7–3 were realized, against the revised estimate of Rs. 140, and Rs. 205–5–0, the actuals of the previous year.

30. *Contribution from Local Board—Medical.*—Rs. 2,448–15–3 were realized, against the revised estimate of Rs. 2,450, and Rs. 1,918–13–10, the actuals of the previous year. The local fund board pay one-third of the net expenditure incurred on account of the upkeep of the hospital.

31. *Miscellaneous—Private scavenging.*—At the beginning of the year, the arrears under this item amounted to Rs. 643–14–4. Of this sum, Rs. 395–12–0 were collected and Rs. 247–4–4 were written off the accounts as irrecoverable, leaving only a balance of As. 14.

32. *Current.*—The demand amounted to Rs. 1,123–8–0. Of this sum, Rupees 1,015–1–6 were collected and Rs. 48–2–0 were written off the accounts, leaving a balance of Rs. 60–4–6 at the end of the year. Owners of several houses do not require private scavenging and several refuse to pay the amount in advance. The sanitary staff has been strictly instructed to take particular care to see that the premises of such persons are kept in proper sanitary condition and to prosecute them when they are not.

33. *Other Items.*—The amount realized under "other items" was Rs. 545–4–8 against the revised estimate of Rs. 500 and the actuals of Rs. 82–4–11 of the previous year.

III.—Expenditure.

34. The total expenditure which amounted to Rs. 43,665–15–4 against the revised estimate of Rs. 42,340 and Rs. 46,058–7–6, the actuals of the previous year, were distributed to all the five grants as follows :—

	Rs.	A.	P.
Grant I	9,717	15	7
„ II	5,633	7	3
„ III	19,364	13	7
„ IV	5,625	3	9
„ V	3,315	9	8
Advance recoverable and refunds	8	13	6
Total ..	43,665	15	4

35. *Grant I, Public Works—New Works—Communications.*—Decrease Rs. 200. No new works of any importance were executed during the year.

36. *Repairs—Communications.*—Rs. 6,609–13–9 were expended in repairing 35⅛ miles of town roads, of which 22 miles and 2 furlongs are metalled and the rest unmetalled. In the previous year Rs. 5,657–3–5 were expended. The revised estimate for 1894–95 was Rs. 6,000. The roads were maintained in fair order. Although scarcity of water has to some extent precluded the roads from being properly tamped, endeavours have been made to improve their condition and repairs carried out promptly.

37. *Buildings.*—Rs. 423–13–4 were expended, against Rs. 520 of the revised estimate, and Rs. 1,348–12–10, the actuals of the previous year. The following repairs to buildings were executed during the year:—

	Rs.	A.	P.
For repairing latrines	61	14	1
„ repairing main hospital	328	15	3
„ petty repairs to branch dispensary	13	0	0
„ constructing a cistern	20	0	0
Total ..	423	13	4

38. *Drainage.*—Rs. 542–0–6 were expended in repairing the drains, against Rs. 550 of the revised estimate, and Rs. 1,395–4–1, the actuals of the previous year. During the year under report, Rs. 168 were spent in improving Venkate Gounden's lane, Rs. 197–15–2 for removing drain earth, Rs. 47 for repairing Pothanar road drain, and Rs. 92–8–0 for improving Thorayer's lane drains, Rs. 21–9–4 for repairing Fish Bazaar street drain and Rs. 15 for a cistern near taluk cutcherry lane.

39. The District Medical and Sanitary Officer's remarks regarding the insanitary state of the street drains have been duly noted and although G.O., No. 183, dated 21st February 1888, prohibits any expenditure being incurred on drains till a plan has been prepared and approved for the whole town, still the council is endeavouring its best to keep the drains and side ditches as clean as possible and free from stagnant sewage. The defective state of these drains is undoubtedly due to the want of a proper system of drainage.

40. *Water-supply.*—Rs. 337–3–6 were expended, against the revised estimate of Rs. 280, and Rs. 758–14–3, the actuals of the previous year. Nine wells were repaired and improved during the year.

41. As regards the unsatisfactory condition of the surroundings of the wells, steps will be taken to remedy the defect as far as possible.

42. *Grant II, Education.*—The amount expended under this head was Rupees 5,633–7–3, against Rs. 5,880 of the revised estimate, and Rs. 5,630–11–7, the actuals of the previous year.

43. *Training Schools—Stipends to Normal Students.*—The sum of Rs. 130 provided for the training of two students (one lower secondary and one primary) in the Government training school was not utilized for the purpose as there were no candidates.

44. *Salary Result System Schools—(b) Results Grants.*—The outlay under this head amounted to Rs. 387–9–0, against the revised estimate of Rs. 360, and Rupees 369–7–9, the actuals of last year. The increase was due to over-earned grants.

45. *Salary Grants.*—The amount of salary grant paid to the managers of the Coimbatore College, St. Michael's College, and the Meracoir Muhammadan school amounted to Rs. 1,575–14–5, against the provision of Rs. 1,900 of the revised estimate, the actuals of the previous year being Rs. 1,686–12–8.

46. *Results Grants.*—The total amount of grant earned by the schools under the results system amounted to Rs. 1,686–14–0 or Rs. 86–14–0 in excess of the revised estimate of Rs. 1,600. The actuals of the previous year were Rs. 1,362–1–3.

47. The other items call for no remarks.

48. *Grant III, Hospitals and Dispensaries—Medicines and Supplies.*—Rupees 1,975–14–2 were spent in the purchase of European and country medicines against

NOTE TO STATEMENT I.

1. Tax on arts, &c., is not levied ~~on the first all classes.~~
2. Tax on buildings is levied at 7½ per cent. and tax on lands not at ~~per cent.~~ annas 4 per cent. of rent value. for every 80 square yards.
3. Water-tax on buildings and lands is not levied ~~at. per cent.~~.
4. Tax on vehicles and animals is levied at ——— the maximum rates.
5. Tax on carts, &c., is levied at Rs. 4 per cart per annum.
6. Tolls are levied at ——— the maximum rates.
7. License-fees are levied at the rates sanctioned in G.O. 21st March 1891. No. 422. M. Mis:
8. The house-tax registers were last revised in the official year 1894/95 and the land tax registers in the official year 1892-93.
9. Total extent of land assessed is 951½ acres.
10. The mode of estimating the annual rental of houses and lands is as follows:—

The annual rental value in the case of private buildings is arrived at with reference to buildings that are leased out in the same street or locality and in the case of public buildings such a procedure not being possible, the rental value as a rule is calculated at 7½ per cent on the capital cost of a building.

The principle on which rental value on lands is fixed is as follows:— For Punjay lands 1½ times the assessment paid to Government as the yearly rental. For Nunjay and Garden lands at Rs 20 per acre.
