GOVERNMENT OF MADRAS.

SANITARY BOARD OFFICE.

SANITARY ENGINEERING BRANCH.

CURRENT NO. 3037

Proceedings of the Sanitary Board, No. 3037 dated 16 October 1895.

Presented by Mr. W. G. King, Esq., B.A., D. Litt., Sanitary Commissioner for Madras
J. A. Jones Esq., Member of C. S., F.R.S.E., Sanitary Engineer to Govt.

Read the following:—

Endorsement of Chairman, Municipal Council, Masulipatam, forwarding copy of letter from Collector of Krishna, No. 1144 Eng of 95 dated 10th September 1895 suggesting the substitution of Burnt & glazed pipes in place of the earthenware ones which now exist.

Resolution.

The Sanitary Board considers that whilst the Collector's suggestion would represent an important improvement over unsatisfactory existing condition, it is advisable in view of the expense that would be incurred & the incomplete sanitary results that would ensue, to defer consideration of the question until the

the

the source of the future water supply has been definitely settled and that meantime any money available might be devoted to further preliminary investigation.

2. The Board would add that it considers that the adoption of a supply from the canal should be regarded as the last alternative one and would advise that the boring promised by Government be carried out not in the view that artesian water is likely to be secured, but because the Board believes that good subterranean water may be met with at a reasonable depth. The Board at the same time suggests that the Chairman might put down some test or two Tube Wells at the site already tried and have water drawn at depths of from 6 to 8 feet and the water sent in the proper manner for analysis. The water, it is noted, procured from former borings was never analysed owing to the chemical examination not having been attended to.
