OCTOBER.

Administration Report.

Reviewing the — of the Madura District Board for 1894–95.

taluk boards on the last day of the year.

1893–94	207,709
1894–95	212,071

The number of patients treated in these institutions increased as noted in the margin. Separate orders will be passed on the proposal to substitute a hospital assistant for the apothecary at Uttamapalaiyam referred to in paragraph 57 of the President's report. Nineteen midwives were again employed by the taluk boards, and they attended in all 1,141 cases of labour against 1,060 in the previous year, or, on an average, five cases each per mensem. This figure is still low, and efforts should be made to obtain better results in the current year. A contribution of Rs. 439 was paid to the Dindigul municipality for the maintenance of the women and children's hospital there, which was in charge of a female apothecary trained by the Countess of Dufferin Fund Committee on account of the district board. It is observed that although ample funds were available, no special measures were taken for the furtherance of the medical education of women. The attention of the boards is invited to G.O., No. 1684 A. L., Local and Municipal, dated 5th September 1887.

(4) *Vaccination.*—It is matter for regret that there was a considerable retrogression in the work of the department. This is attributed mainly to the inefficacy of the glycerine lymph supplied to the vaccinators in the early part of the year from the two vaccine depôts which were opened in the district. Increased experience in the preparation of the lymph appears, however, to have resulted in an improvement in its quality, and it is hoped that in the current year the ground which has been lost will be recovered. The total numbers of successful operations and of those on children under one year of age were respectively 29·8 and 11·5 per mille of the population against 35·8 and 13·5 in 1893–94.

(5) *Sanitation.*—The proportion of expenditure to the allotment under this head rose from 86 to 91 per cent. Three new wells were sunk, thirty-three sources of water-supply were improved and forty others were protected by watchmen, the corresponding figures for the previous year being 5, 39 and 36. Fifty-six villages were provided with conservancy establishments against fifty-four in 1893–94. The Government trusts that the local boards have satisfied themselves that these establishments are adequately controlled. Without strict supervision their work is likely to be worthless. The District Medical and Sanitary officer visited forty villages, and it is stated that funds were provided to carry out some of his suggestions. The trench latrine system recommended by the Sanitary Commissioner was tried in two selected villages, but without success. The ten sanitary associations in the district are reported to have worked fairly well on the whole, but their operations also require to be closely watched if full value for the money spent upon them is to be obtained.

5. *General Remarks.*—The year closed with a balance of Rs. 1,46,282; of this sum, however, Rs. 12,282 appertained to unions and Rs. 47,390 to endowed institutions, leaving Rs. 86,610 or 21 per cent. of the receipts available for general purposes. The greater portion of this sum has however been allotted for expenditure in the current year.

Except as regards public works and vaccination, the administration of local affairs continued to be satisfactory.

2. *Local Boards and Union Panchayats.*—The district board held twelve meetings as in 1893–94. The attendance of the non-official members improved and was fair, but that of the officials declined and was indifferent. The taluk boards met a sufficient number of times. The average attendance of the official members of the Madura board and of the non-officials on the Palni board was very poor, and the latter members on the Periyakulam, Ramnad and Sivaganga boards were too often absent. The irregularity of the attendance on the Madura, Palni and Ramnad boards has been noticed in the reviews of the previous two years and steps should be taken to prevent the necessity of remarks upon the subject in future. There were again 35 union panchayats, and they held on an average 14 meetings each. It is, however, to be regretted that, notwithstanding the remarks in paragraph 2 of G.O., No. 2039 L., Local and Municipal, dated 13th October 1894, four of them failed to meet once a month as required by section 129 of the Local Boards Act. The Presidents of the taluk boards should see that the panchayats under their control comply with the provisions of the Act. Early steps should be taken to secure a preponderance of the non-official element on the Sólavandán panchayat. The average attendance of the members was again 5·9 out of a strength of 12. The ward system of supervision, which was in force in 24 unions against 15 in the previous year, is stated to have worked with fair success. The private scavenging system was introduced into the Sivaganga and Uttamapalaiyam unions. The next administration report should state how far it has succeeded. The taluk boards and panchayats are reported generally to have worked satisfactorily.

3. *Receipts.*—(1) Owing to the existence of fewer arrears than in 1893–94 the demand under land-cess declined by Rs. 5,937. The collections amounted to 95 per cent. of this against 96 per cent.

(2) There were nine toll-gates as in the previous year, but the current demand under this head fell from Rs. 27,650 to Rs. 22,810—a decrease which has not been explained. The whole of this sum was, however, realized within the year.

(3) House-tax continued to be levied at the maximum rates in four unions, at three-fourth rates in another, and at half rates in the remaining thirty. The collections amounted to 94 per cent. of the demand against 90 per cent. in 1893–94. They were good in the unions under the Sivaganga, Madura, Mélúr, Ramnad and Periyakulam taluk boards, but very poor in those under the Palni board, where only 47 per cent. of the demand was realized. The number of distress warrants sent out was 2,311 and a large proportion of these were again issued in the Cumbum union.

Property was, however, distrained in only 176 cases and sold in only 29, the corresponding figures for the previous year being 212 and 30.

(4) There were sixty-one markets under the control of the taluk boards against sixty in the previous year, but fees were levied in fifty-seven of them against fifty-eight, and the income under this head fell from Rs. 22,273 to Rs. 21,386. The expenditure on works connected with these institutions was Rs. 16,981 or Rs. 5,179 less than in the previous year, and the balance to their credit at the end of the year was still large, being Rs. 30,749 against Rs. 32,597. The major portion of this has, however, been allotted for expenditure in the current year, and care should be taken that it is duly spent.

(5) The receipts from choultry rents, fishery rents and avenues were higher than in the previous year by Rs. 4,777, Rs. 1,735 and Rs. 1,177, respectively. The large arrears of Rs. 8,350 outstanding under the first of these heads should be collected as soon as possible. The general condition of the avenues is reported to have been good. The result of the endeavours to increase the revenue derived from them should be noticed in the next administration report.

4. *Expenditure*—(1) *Public Works.*—It is much to be regretted that the expenditure under this head was again very low, being only 73 per cent. of the allotment against 74 in the previous year. The explanation offered for this in paragraph 30 of the President's report cannot be considered adequate, and the Government trusts that the new District Board Engineer will show better results in the current year. It is noticed with regret that the general condition of the roads is stated to have deteriorated. The matter calls for prompt action on the part of the local boards. The percentage of the outlay on village roads to the total expenditure on communications was 10 against 9·4 in 1893–94. The cost of the local fund engineering establishment was 16 per cent. of the expenditure on works incurred by that agency against 17 per cent. in 1893–94.

(2) *Education.*—There were eleven inspecting schoolmasters as in the previous year, and with one exception their work is reported to have been on the whole fair. The normal and industrial departments of the technical institute made satisfactory progress. Out of forty-seven students of the normal department who went up for examination thirty-four passed, and in the industrial department, where there were 108 pupils against seventy in the previous year, all of the fifty-six candidates who appeared for the standard examinations were successful. There were seven pupils in the agricultural department on the last day of the year against twelve in 1893–94 and the results of the examination by the Inspector of Schools are reported to have been satisfactory. It is however again reported that this department was not a success. The question of the desirability of its retention should be decided without delay. Thirty-six students attended the three sessional schools maintained by the district board. Of these, thirty-five appeared for examination, but only eighteen passed—a poor result. There was a small increase in the number and strength of the board primary schools as shown in the margin. From these 3,032 pupils appeared for the standard examinations and 2,427 or 80 per cent. passed, the corresponding figures for the previous year being 2,901, 2,254 and 78 per cent. The taluk boards also aided with result grants 500 schools attended by 16,731 pupils against 494 schools with 16,923 pupils in 1893–94. The percentage of passes in the standard examinations rose from 75 to 78, but for reasons explained in paragraph 51 of the President's letter only 89 per cent. of the allotment for result grants was utilized against 97 per cent. in the previous year. Ten of the board schools and twenty-five aided schools were specially maintained for Panchamas, and twenty-one board and twenty-six aided schools for Muhammadans, but it is to be regretted that no separate information of the progress made by them has been given. The total number of boys under instruction in the schools maintained and aided from local funds was 11·4 per cent. of the male population of school-going age against 11·3 in 1893–94, the average for the Presidency in that year being 13·4. Education again showed but little advance.

	Schools.	Pupils.
1893–94	138	4,770
1894–95	144	5,068

(3) *Medical Relief.*—The dispensary at Ilayangudi having been closed in June 1894, there were eight hospitals and twenty-four dispensaries under the control of the

taluk boards on the last day of the year. The number of patients treated in these institutions increased as noted in the margin. Separate orders will be passed on the proposal to substitute a hospital assistant for the apothecary at Uttamapalaiyam referred to in paragraph 57 of the President's report. Nineteen midwives were again employed by the taluk boards, and they attended in all 1,141 cases of labour against 1,060 in the previous year, or, on an average, five cases each per mensem. This figure is still low, and efforts should be made to obtain better results in the current year. A contribution of Rs. 439 was paid to the Dindigul municipality for the maintenance of the women and children's hospital there, which was in charge of a female apothecary trained by the Countess of Dufferin Fund Committee on account of the district board. It is observed that although ample funds were available, no special measures were taken for the furtherance of the medical education of women. The attention of the boards is invited to G.O., No. 1684 A. L., Local and Municipal, dated 5th September 1887.

1893–94	207,709
1894–95	212,071

(4) *Vaccination.*—It is matter for regret that there was a considerable retrogression in the work of the department. This is attributed mainly to the inefficacy of the glycerine lymph supplied to the vaccinators in the early part of the year from the two vaccine depôts which were opened in the district. Increased experience in the preparation of the lymph appears, however, to have resulted in an improvement in its quality, and it is hoped that in the current year the ground which has been lost will be recovered. The total numbers of successful operations and of those on children under one year of age were respectively 29·8 and 11·5 per mille of the population against 35·8 and 13·5 in 1893–94.

(5) *Sanitation.*—The proportion of expenditure to the allotment under this head rose from 86 to 91 per cent. Three new wells were sunk, thirty-three sources of water-supply were improved and forty others were protected by watchmen, the corresponding figures for the previous year being 5, 39 and 36. Fifty-six villages were provided with conservancy establishments against fifty-four in 1893–94. The Government trusts that the local boards have satisfied themselves that these establishments are adequately controlled. Without strict supervision their work is likely to be worthless. The District Medical and Sanitary officer visited forty villages, and it is stated that funds were provided to carry out some of his suggestions. The trench latrine system recommended by the Sanitary Commissioner was tried in two selected villages, but without success. The ten sanitary associations in the district are reported to have worked fairly well on the whole, but their operations also require to be closely watched if full value for the money spent upon them is to be obtained.

5. *General Remarks.*—The year closed with a balance of Rs. 1,46,282; of this sum, however, Rs. 12,282 appertained to unions and Rs. 47,390 to endowed institutions, leaving Rs. 86,610 or 21 per cent. of the receipts available for general purposes. The greater portion of this sum has however been allotted for expenditure in the current year.

Except as regards public works and vaccination, the administration of local affairs continued to be satisfactory.

Editors' Table.
Exd. C. M Brison.

The increase in Aruppukóttai is due to increased rate of pay drawn by the subordinates.

In Kodaikánal it is due to expenditure incurred in converting the dispensary into a hospital.

In the other institutions the increase is due to the decrease in the number of patients.

26. *General Remarks.*—There are lying-in wards at Ramnad, Kodaikánal and Pámban, but no cases have been treated during the year in either of these wards.

27. Out of 33 hospitals and dispensaries, 31 were inspected during the official year.

28. The conduct of the subordinates has been generally good.

From Surgeon-Major F. C. REEVES, District Medical and Sanitary officer, to the President, District Board, Madura, dated 10th May 1895, No. 400.

I have the honour to forward the concise annual report on the vaccination department for the official year 1894–95.

The establishment consists of one first-class deputy inspector on Rs. 70, one on Rs. 60 and one second-class deputy inspector on Rs. 40. There are 14 first-class vaccinators on Rs. 18 each and 22 second-class on Rs. 10 each, 6 probationers on Rs. 5 each and 3 peons on Rs. 6 each.

2. Number of cases vaccinated for the past three years :—

Year.	Number of cases.	Successful.	Cost of each successful case.
			Rs. A. P.
1892–93	85,641	81,368	0 2 5
1893–94	91,401	87,918	0 2 2
1894–95	79,855	73,266	0 2 6

The falling off in vaccination this year is due to the introduction of glycerine lymph, which from want of experience in preparing it, gave very unsatisfactory results at first; also at Paramagudi, owing to the non-supply of calves by the Deputy Tahsildar, vaccination was interrupted for nearly a whole month. Then there were two changes among the deputy inspectors which no doubt had the effect of temporarily retarding work.

3. *Infantile Vaccination*—

Year.	Cases under one year.	Successful.
1892–93	30,982	27,700
1893–94	34,405	33,378
1894–95	30,972	28,267

4. Animal lymph was used up to the 25th November 1894 in the Madura and Dindigul ranges, and up to 5th December 1894 in the Paramagudi range on which dates glycerine paste was introduced, and two depôts for the preparation of glycerine lymph established, one at Madura and the other at Paramagudi.

5. *Re-vaccination.*—There were 4,278 cases re-vaccinated, of which 3,384 were successful, 670 unsuccessful and 24 unknown.

6. *General Remarks.*—The introduction of glycerine lymph will, it is to be expected, result in a substantial saving to the Local Fund department, while, on account of the facility with which the lymph can be transported from place to place in split hollow bamboos, the work in travelling of the vaccinators should be very much lessened (there being no necessity to carry ...lves about), and they will consequently have much more time at their disposal to devote to ...cinatio... A vaccine depôt was established, tentatively, in Paramagudi, but I am not sure ...t it w... not be more economical and efficient to maintain only one depôt at Madura for the ...hole d... ...ict, but this will form the subject later on of a special report.

...om the President, District Board, Madura, dated 28th August 1895, No. 101.

ORDER—No. 1951 L., Local and Municipal, dated 19th October 1895.

The local fund receipts and charges of the Madura district for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

taluk boards on the last day of the year. The number of patients treated in these institutions increased as noted in the margin. Editors' Table.

Exd. C. M Brison.

There was no feeding at Kunnattur chattram during Vandiyur festival and consequently no coutribution from the Madura Taluk Board to the municipality for the purpose; and the Dindigul municipality failed to claim Rs. 300 from the District Board as half the pay of the lady apothecary within the year. This accounts for the decrease.

A sum of Rs. 1,958 was paid as contribution to the following medical institutions against the estimate of Rs. 2,160:—

	Rs.
(1) By the District Board to the American Mission hospital at Madura	500
(2) By the Madura Taluk Board to the American Mission dispensary at Pasumalai	90
(3) By the Dindigul Taluk Board to the American Mission dispensary at Dindigul	1,368

The Mission dispensary at Rajasingamangalam is reported to have been abolished by the Mission authorities as they were unable to maintain it. The contribution of Rs. 200 provided for on this account was not therefore paid during the year.

71. *Miscellaneous.*—A sum of Rs. 6,841 was spent in lighting the several unions against the estimate of Rs. 7,826 and Rs. 7,532, the actuals of 1893–94. Thirty-two union villages were lighted during the year against thirty villages in the previous year, and the number of lights maintained was 993 against 926. The decrease of expenditure under this head is due to the instructions of Government in paragraph 4 (*b*) of its order, No. 2039 L., dated 13th October 1894, having been carried out, and to the fall in the price of kerosine-oil. Lighting was newly introduced in Devipatam union in the year. In Tirumangalam taluk it was conducted purely departmentally; in Mélúr partly departmentally and partly on contract; while in the other taluks it was entirely on contract—the contract rate varying from As. 11 in the Madura Taluk to Re. 1 in Ramnad per lamp per month. Contributions were realised from private individuals for lighting in Ramnad (Rs. 800), Rámesvaram (Rs. 300), Tirupuvanam (Rs. 11) and Sivaganga (Rs. 9) towns, aggregating to Rs. 1,120 against Rs. 1,064 in the previous year. The whole expenditure incurred on lighting was placed by the taluk boards at the disposal of the unions concerned. Rs. 933 were refunded by various taluk boards and the district board on account of proceeds of avenues wrongly credited to them.

72. *Grant IV, Miscellaneous.*—The aggregate expenditure under this grant was Rs. 26,336 against the estimate of Rs. 27,996, and Rs. 25,476, the actuals of 1893–94; and it amounted to 4·1 per cent. of the total receipts and 5·4 per cent. of the total expenditure against 4·2 and 5·4 per cent., respectively, in the previous year. The decrease is observed mainly under the sub-heads "Cost of printing work in Government Press," "Local Board's office establishment," "Stationery," "Printing," and "Law charges." The differences are explained in the remarks column of statement I-B. Travelling allowance to non-official members of the district board was paid by the district board at the rate of 3 annas per mile for road journey and one second and one third class fare for train journey. The Madura and Tirumangalam Taluk Boards did not fix any rates on the ground that no body ever claimed it. Mélúr Taluk Board has fixed a mileage of one anna and the other boards 2 annas. Rs. 68 were refunded by the district and taluk boards on account of excess or improper collections under house-tax, fish rent, cesses and nuisance fine.

73. *Endowed Institutions.*—The number of endowed institutions as detailed in statement VI was one more than in the previous year, being 103 against 102, the addition being the water-shed endowment at Chattrapatti transferred lately to the Madura Taluk Board under G.O., No. 66, Revenue, dated 25th January 1895. The total receipts in favour of all the endowed institutions was Rs. 1,08,223 against Rs. 1,07,598 in 1893–94, deducting from which the expenditure of Rs. 56,915 against Rs. 55,443, there was a balance of Rs. 49,308 in their favour on the 31st March 1895 against Rs. 52,155 in the previous year. The taluk boards will be instructed to see that the deficit balances with which twenty of the institutions closed in the year are

made up either by short expenditure in the current year or by contributions made in their favour, and that the large closing balances are utilised for the benefit of the respective institutions.

74. *Local Fund Accounts.*—The Assistant Inspector of Local Fund Accounts, Madras, inspected and checked the accounts in March last. The maintenance of the accounts of the Audit department was pronounced to be satisfactory; but in respect of the accounts of the District Board Engineer's office, the report was not favourable. Steps have been taken to remedy the defects pointed out. The accounts of eight unions were examined by the Local Fund Audit establishment during the year, and they were reported to have been satisfactorliy maintained.

75. The report was passed by the district board in its resolution, No. 112, dated 15th July 1895, copy enclosed.

Enclosures.

From Surgeon-Major F. C. REEVES, District Medical and Sanitary officer, Madura, to the President, District Board, Madura, dated 10th May 1895, No. 399.

I have the honour to forward the annual report on the working of the Local Fund hospitals and dispensaries.

2. *Public health* has not been satisfactory—cholera was prevalent during the year. It broke out in September 1893 and continued through the whole of the official year 1894–95. It was very severe in the Periyakulam taluk—less so in the Madura taluk, and least so in the Mélúr taluk where there were only 158 attacks and 132 deaths. The disease was most prevalent in the months of December 1894 and January 1895.

3. Many subordinates were deputed on special cholera duty, and many medical institutions were temporarily closed on this account.

4. The following gives the attacks and deaths for the past three official years :—

Year.	Attacks.	Deaths.
1892–93	371	171
1893–94	8,347	4,665
1894–95	7,762	4,435

5. *Small-pox.*—Below is given the deaths for the past three years :—

1892–93	1,961
1893–94	906
1894–95	217

So the year under review compares most favourably with the two previous years as regards this disease.

6. *Fevers.*—The deaths from fever were in—

1892–93	8,354
1893–94	8,701
1894–95	9,550

But not much reliance can be placed on these figures, as all fatal diseases if not clearly distinguished at the time are put down to fevers.

7. *Vital Statistics*—

Year.	Births.	Deaths.
1892–93	46,055	26,090
1893–94	44,872	30,348
1894–95	46,804	32,404

8. *Sanitation.*—Sanitation cannot be said to be satisfactory; a little progress has been made, and a few of the numerous suggestions of the District Medical and Sanitary officer have been carried out.

9. There is no money to carry out permanent, and necessarily expensive sanitary works, and I fear that petty tinkering at drains and wells, &c., cannot be said to be of much use.

10. A village, which I inspect and which has never been inspected before, is no worse, as far as my experience goes, than the neighbouring village which is carefully inspected and reported on regularly once or twice a year.

11. *Vaccination*—

Year.	Vaccinated.	Successful.
1892–93	85,641	81,368 or 95·10 per cent.
1893–94	91,401	87,918 or 97·76 ,,
1894–95	79,855	73,266 or 93·20 ,,

The falling off in vaccination this year may be attributed to the introduction of glycerine lymph which did not work well at first owing to want of experience and to the change of deputy inspectors.

12. In the Paramagudi range, vaccination was at a standstill for nearly a month owing to the non-supply of calves.

13. *Hospitals and Dispensaries.*—There were 8 hospitals and 25 dispensaries at the beginning of the year—one dispensary, Ilaiyángudi, was closed in the month of June.

Sixty-nine is the number of beds available, and the number of in-door patients is 839.

14. There is not sufficient accommodation for in-door patients at Bódináyakkanúr. Aruppukóttai, which has now only a small dispensary, should have a good hospital as the population of this place is over 13,000.

The following dispensaries have not sufficient accommodation :—Butlagundu, Káraikkudi, Nilakkóttai, Mudukulattúr, Kannivádi, Mánámadurai, Sáptúr, Thondikkudi, Virupakshi. All these, except Mánámadurai, are rented buildings.

15. Provision has been made at Káraikkudi and Mánámadurai for new buildings.

16. Out of 33 hospitals and dispensaries, one hospital and sixteen dispensaries are in rented buildings.

The following buildings require repairs :—Andipatti, Mélúr, Sólavandán, Kílakarai, Nílakkóttai, Thandikkudi, Kodaikánal, Paramagudi, Ramnad, Rámésvaram, Tirumangalam, Tiruppattúr, Tiruvádánai, Uttamapálaiyam, Virupakshi, but I would recommend that only those buildings which have sufficient accommodation should be repaired at present.

17. The furniture is generally sufficient and in good order. Extra articles are provided from time to time as required.

18. The number of patients treated is as below for three years :—

Year.	Patients. In-door.	Patients. Out-door.
1892–93	794	194,713
1893–94	771	206,938
1894–95	839	211,232

which figures show a satisfactory increase in the year under report.

19. *Mortality.*—The total number of deaths were 311. It is difficult, if not impossible, always to register causes of death among out-patients.

Among in-patients, the principal causes of death were, dysentery, fever and injuries.

20. *Operations.*—Major 144, minor 6,623.

21. The establishment is sufficient.

22. *Midwives.*—There were nineteen midwives employed during the year who conducted 1,141 cases against 1,060 in the previous year.

The total cost was Rs. 1,956–9–11 or Rs. 1–11–5 per case against Rs. 1–12–0 of the preceeding year.

23. *Gosha Dispensary.*—There are two gosha dispensaries in the district, but they do not belong to the Local Fund Department. They will be dealt with separately.

24. *Average cost.*—The average cost per patient treated in the year under report was As. 2–6 against As. 2–9 of the preceding year.

In nine institutions there was an increase in the average cost.

25. Institutions showing an increase of average cost.—

In-patients.	Out-patients.
Paramagudi	Aruppukóttai.
Kodaikánal	Kodaikánal.
Ramnad	Pámban.
	Rámésvaram.
	Tiruvádánai.
	Uttamapálaiyam.
	Védasandúr.

The increase in Aruppukóttai is due to increased rate of pay drawn by the subordinates.

In Kodaikánal it is due to expenditure incurred in converting the dispensary into a hospital.

In the other institutions the increase is due to the decrease in the number of patients.

26. *General Remarks.*—There are lying-in wards at Ramnad, Kodaikánal and Pámban, but no cases have been treated during the year in either of these wards.

27. Out of 33 hospitals and dispensaries, 31 were inspected during the official year.

28. The conduct of the subordinates has been generally good.

From Surgeon-Major F. C. REEVES, District Medical and Sanitary officer, to the President, District Board, Madura, dated 10th May 1895, No. 400.

I have the honour to forward the concise annual report on the vaccination department for the official year 1894–95.

The establishment consists of one first-class deputy inspector on Rs. 70, one on Rs. 60 and one second-class deputy inspector on Rs. 40. There are 14 first-class vaccinators on Rs. 18 each and 22 second-class on Rs. 10 each, 6 probationers on Rs. 5 each and 3 peons on Rs. 6 each.

2. Number of cases vaccinated for the past three years :—

Year.	Number of cases.	Successful.	Cost of each successful case.
			RS. A. P.
1892–93	85,641	81,368	0 2 5
1893–94	91,401	87,918	0 2 2
1894–95	79,855	73,266	0 2 6

The falling off in vaccination this year is due to the introduction of glycerine lymph, which from want of experience in preparing it, gave very unsatisfactory results at first; also at Paramagudi, owing to the non-supply of calves by the Deputy Tahsildar, vaccination was interrupted for nearly a whole month. Then there were two changes among the deputy inspectors which no doubt had the effect of temporarily retarding work.

3. *Infantile Vaccination*—

Year.	Cases under one year.	Successful.
1892–93	30,982	27,700
1893–94	34,405	33,378
1894–95	30,972	28,267

4. Animal lymph was used up to the 25th November 1894 in the Madura and Dindigul ranges, and up to 5th December 1894 in the Paramagudi range on which dates glycerine paste was introduced, and two depôts for the preparation of glycerine lymph established, one at Madura and the other at Paramagudi.

5. *Re-vaccination.*—There were 4,278 cases re-vaccinated, of which 3,384 were successful, 670 unsuccessful and 24 unknown.

6. *General Remarks.*—The introduction of glycerine lymph will, it is to be expected, result in a substantial saving to the Local Fund department, while, on account of the facility with which the lymph can be transported from place to place in split hollow bamboos, the work in travelling of the vaccinators should be very much lessened (there being no necessity to carry calves about), and they will consequently have much more time at their disposal to devote to vaccination. A vaccine depôt was established, tentatively, in Paramagudi, but I am not sure that it would not be more economical and efficient to maintain only one depôt at Madura for the whole district, but this will form the subject later on of a special report.

From the President, District Board, Madura, dated 28th August 1895, No. 101.

ORDER—No. 1951 L., Local and Municipal, dated 19th October 1895.

The local fund receipts and charges of the Madura district for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

67. *Markets.*—The decrease under the sub-head occurs mainly under the item "Contingencies," and this is due to the taluk boards of Tirumangalam, Mélúr and Sivaganga not having fully utilised the allotments made by them for purchase of tools and implements for the markets.

	RS.
Actuals of 1894–95	2,828
Estimate of „	4,275
Actuals of 1893–94	2,931

All the markets are reported to have been freely resorted to by the people. No fees were levied in the markets at Uttarakosamangai and Pogalur in the Ramnad taluk and Kallimanthayam and Porulur in the Palni taluk to make them more popular.

68. *Choultries.*—The establishment charges amounted to Rs. 4,225 against Rs. 4,401, the estimate. The services of the storekeeper, cook and sweeper of the Sólavandán chattram were dispensed with with effect from May 1894 to save funds for the construction of a chattram in Madura and raw rice distributed from that date instead of cooked rice. A kavalgar was entertained for the chattram at Chattrapatti from December 1894. Feeding was stopped in Kottampatti chattram also on account of urgent repairs which were found necessary for the chattram building. The expenditure under "Feeding charges" was Rs. 4,425 against Rs. 4,743.* Eighty-nine thousand two hundred and fifty-five travellers halted in the choultries, of whom 64,421 were fed in the choultries at Sólavandán, Samaiyanallúr, Tirumangalam, Mélúr, and Muttanendal against 66,264 persons fed in the previous year. The number of travellers that halted should be more; but correct statistics were not available in the case of all the choultries. The average cost of feeding one person was 1 anna 1 pie against 1 anna 2 pies in the previous year. The charge under "Contingencies" was Rs. 3,056 against the estimate of Rs. 3,369.

	RS.
Actuals of 1894–95	11,706
Estimate of „	12,199
Actuals of 1893–94	11,151

* Including the contribution of Rs. 53 to the Madura municipality.

69. *Bungalows.*—Establishment and contingencies amounted to Rs. 521 and Rs. 20 against the estimate of Rs. 510 and Rs. 200, respectively. Repairs and improvements were effected to the extent of Rs. 655 in all, which amount excludes Rs. 665 spent by the Mélúr Taluk Board in fitting the American Mission school building at Nattam lately purchased by it for a travellers' bungalow. The bungalows were all in good condition. A sum of Rs. 1,647 was adjusted in favour of Provincial funds towards contribution on account of "Sanitary Inspection." The contribution of Rs. 60 provided on account of "Cutlers' establishment" was not adjusted within the end of the year; and Rs. 56 have since been adjusted as per advice of the Treasury Deputy Collector.

	RS.
Actuals of 1894–95	541
Estimate of „	710
Actuals of 1893–94	690

70. *Contributions.*—Contributions paid to municipalities amounted to Rs. 4,289 against the estimate of Rs. 4,289 :—

	RS.
(1) By District Board for women and children's hospital at Dindigul	89
(2) To the Madura municipality for sanitary arrangements ...	200
(3) To the Madura municipality for diet charges of patients in the municipal hospital	1,300
(4) To Periyakulam municipality for conduct of vaccination in twenty Local Fund villages adjoining Periyakulam for 1894–95	120
(5) By Dindigul Taluk Board to the Dindigul municipality for purchase of medicines	480
(6) By Dindigul Taluk Board to the Dindigul municipality for women and children's hospital	350
(7) By Palni Taluk Board to the Palni municipality for the dispensary	1,000
(8) By Periyakulam Taluk Board to the Periyakulam municipality for the same purpose	750

The increase in Aruppukóttai is due to increased rate of pay drawn by the subordinates.

In Kodaikánal it is due to expenditure incurred in converting the dispensary into a hospital.

In the other institutions the increase is due to the decrease in the number of patients.

26. *General Remarks.*—There are lying-in wards at Ramnad, Kodaikánal and Pámban, but no cases have been treated during the year in either of these wards.

6. *General Remarks.*—The introduction of glycerine lymph will, it is to be expected, result in a substantial saving to the Local Fund department, while, on account of the facility with which the lymph can be transported from place to place in split hollow bamboos, the work in travelling of the vaccinators should be very much lessened (there being no necessity to carry calves about), and they will consequently have much more time at their disposal to devote to vaccination. A vaccine depôt was established, tentatively, in Paramagudi, but I am not sure that it would not be more economical and efficient to maintain only one depôt at Madura for the whole district, but this will form the subject later on of a special report.

From the President, District Board, Madura, dated 28th August 1895, No. 101.

ORDER—No. 1951 L., Local and Municipal, dated 19th October 1895.

The local fund receipts and charges of the Madura district for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

reported that its working is satisfactory, but it has certainly produced a most regrettable amount of friction. Madura, Mélúr and Sivaganga boards introduced the system in all their dispensaries too late in the year to pronounce an opinion on their working. The Dindigul and Ramnad boards have deferred the trial of the system for the present.

57. The District Surgeon visited 31 of the institutions during the year and the conduct of the medical subordinates has been reported to be generally good. He recommends, as in the last year, the conversion of the Aruppukóttai dispensary into a hospital as the population of the place is over 13,000. I shall communicate with the President of the Taluk Board on the subject and see what can be done. The Periyakulam taluk board has again moved for the substitution of a hospital assistant for the civil apothecary at Uttamapálaiyam, but no orders have yet been passed by Government on the subject *. Only one of the hospital assistants is a Government servant. The taluk board concerned has been instructed to allow him house-rent at Rs. 5 per mensem on condition that he removes to within 200 yards of the hospital, under G.O., No. 154 L., dated 24th January 1895.

* This office endorsement, No. 34, dated 28th February 1895, submitted through the Surgeon-General.

58. *Midwives.*—The number of midwives was nineteen as in the previous year, who attended 1,141 cases during the year against 1,060 in 1893–94. This gives an average of five cases for each midwife per mensem. There are lying-in-wards at Kodaikánal, Ramnad and Pámban, but it is reported that no cases were treated in any of these during the year. The short expenditure is explained to be due to short earnings of rewards by midwives and the absence of one widwife during part of the year.

	RS.
Actuals of 1894–95	1,957
Estimate of ,, ...	2,578
Actuals of 1893–94	1,853

59. *Midwifery Pupils.*—There were none available for training till August 1894, when two pupils were admitted against three budgeted for; and these were paid stipends at Rs. 5 per mensem against Rs. 6 provided in the budget. This accounts for the decrease of expenditure under the head.

	RS.
Actuals of 1894–95	70
Estimate of ,, ...	130
Actuals of 1893–94	99

60. *Medicines and Surgical Instruments.*—The large decrease is due to medicines being now obtained not from Government but from England direct. They have been charged to "supplies."

	RS.
Actuals of 1894–95	412
Estimate of ,, ...	6,000
Actuals of 1893–94	7,431

61. *Supplies.* — The above reason accounts for the increase under this head. Taking the two heads of charges together, there has been a decrease of Rs. 2,791 below the actuals of the previous year.

	RS.
Actuals of 1894–95	6,019
Estimate of ,, ...	1,414
Actuals of 1893–94	1,791

62. *Cholera charges.*—Cholera was prevalent throughout the year, being severe in Periyakulam and Madura taluks, and less so in Mélúr. Seven thousand seven hundred and sixty-two persons were attacked, of whom 4,435 died against 8,347 attacks and 4,665 deaths in the previous year. The District Surgeon reports that many medical subordinates were deputed on special relief duty on this account, their medical institutions being temporarily closed; and an additional hospital assistant was employed by each of the taluk boards of Periyakulam and Dindigul. Hospital assistants and failing them village munsifs, union chairmen and revenue inspectors were supplied with medicines for free distribution. district was divided into sanitary circles, and circular instructions were issued in The consultation with the District Medical and Sanitary officer, a copy of which is appended for the information of Government.

	RS.
Actuals of 1894–95	2,012
Estimate of ,, ...	1,881
Actuals of 1893–94	462

63. *Medical Pupils.*—The five students who were already under training in Madras on an allowance of Rs. 9 each per mensem continued their study throughout the year. One of them has since been reported to have been dismissed as he was found to be suffering from incipient leprosy and the rest to have passed their final examination successfully. The two students that were under training in the local hospital having completed a year's pre-collegiate course here by the end of September last, were sent to Madras to complete their two years' training there.

	Rs.
Actuals of 1894–95	1,090
Estimate of „	1,484
Actuals of 1893–94	1,273

The expenditure incurred in payment to reserve hospital assistants was only Rs. 111 against the estimate of Rs. 480, due to these men having been for the most part of the year deputed either on special cholera duty or in relieving duties drawing their pay from the taluk boards concerned.

64. *Vaccination.*—There was no change in the strength of the vaccine staff; but one deputy inspector died and one was transferred, both places being filled by transfers from Malabar. The vaccinators operated 79,855 cases during the year against 91,401 cases in 1893–94, of which 73,266 cases or 91·7 per cent. were successful against 87,918 cases or 96·1 per cent. in the previous year.

	Rs.
Actuals of 1894–95	11,540
Estimate of „	13,547
Actuals of 1893–94	11,918

During the year under report glycerine lymph was substituted for animal lymph and two depôts for its manufacture were opened—one at Paramagudi in December 1894, and the other at Madura in November 1894. The decrease in the number of operations performed during the year is ascribed by the District Surgeon as due mainly to the introduction of glycerine lymph which, owing to want of experience in preparing it, gave very unsatisfactory results at first. There was also an interruption of work for nearly a month owing to failure of supply of calves for Paramagudi depôt. Two vaccinators were sent during the year for special training for a few days at the central depôt in Tanjore.

The expenditure on account of pay of the establishment was Rs. 7,861 against the estimate of Rs. 8,320, the decrease being due to the absence of some of the vaccinators on sick leave, during which period no substitutes were put in and to deductions made in the pay of the vaccinators for short work done by them. The expenditure on account of travelling allowance was Rs. 879 against the estimate of Rs. 880, and that on account of miscellaneous contingencies Rs. 2,800 against Rs. 4,347, the decrease in the latter head being due altogether to the introduction of the glycerine lymph. The cost of animal vaccination was Rs. 2,392 and of vaccination with glycerine lymph was Rs. 408. The average cost of each successful case vaccinated was As. 2–6 against As. 2–2 in 1893–94. Medical subordinates vaccinated only 178 cases during the year against 447 cases in 1893–94, of which 149 against 403 cases were successful. Of the total operations 30,972 were on infants under one year of age, of which 28,267 cases were successful against 34,405 and 33,378 cases respectively in the previous year. The number of re-vaccinations was 4,278, of which 3,384 cases were successful. With more experience in making glycerine lymph it is hoped that better results may be obtained in the current year, but at present the results are not promising. The vaccine depôt at Paramagudi was only tentatively started. One central depôt for the whole district at Madura would probably be more economical and efficient and would be in accordance with the views of the Sanitary Commissioner. But both the depôts will be tried for a little longer and the result reported in the next annual report.

65. *Sanitation.*—The details of the expenditure under this head are as follows:—

	1893–94.	1894–95.
	Rs.	Rs.
Improvement of water-supply	2,963	2,985
Do. of village-site	3,506	4,097
Scavengering establishment	25,426	26,443
Arrangements at fairs and festivals	364	392
Other sanitary outlay	531	218

The decrease under the estimate is explained as due to certain sanitary works in the Madura taluk not having been completed and certain payments not having been made within the close of the year. In some unions the allotments were not fully utilised owing to the apathy of the chairmen. The expenditure formed 90·7 per cent. of the allotment against 86·2 per cent. in the previous year. Three new wells were sunk during the year at a cost of Rs. 223 and 33 sources of water-supply were either repaired or improved at a cost of Rs. 1,513. Watchmen were employed to guard forty sources of supply from pollution and these were paid Rs. 1,252 in the year. The sites of 28 villages were improved at a cost of Rs. 3,773 either by laying out or repairing streets and construction of side drains and tunnels. Prickly-pear and rank vegetation were removed and the sites cleared at a cost Rs. 324 in 11 villages and 59 against 54 villages were conserved. The scavenging staff of the district consisted of 304 men—10 sanitary inspectors, 24 maistries, 239 sweepers, 10 toties, 3 kavalgars and 18 chittals; the number of carts used being 134 against 296 men and 113 carts in the previous year. The scavenging establishment was supervised either by revenue inspectors, hospital assistants, union chairmen and village munsifs or by the sanitary inspectors and maistries where the latter have specially been employed. Sanitary arrangements were made in the villages of Tiruparankundram, Sólavandán, Rámésvaram, Aiyampalayam, Agaram, Virapandi, Devadanapatti, and in the Sathuraighiri hills during fairs and festivals, and the expenditure on this account amounted to Rs. 392. Rs. 218 were also spent in the purchase of dust-bins, hoes, spades, baskets, rods for putting out fire, repairs to hand-carts, land assessment on latrine sites and such other miscellaneous charges which are entered under "Other sanitary outlay."

The sanitary condition of the rural tracts has been reported by the presidents of taluk boards to have been on the whole fair. Forty villages were visited by the District Surgeon and instructions were issued to the village heads and union chairmen to see that the defects pointed out by him were rectified as far as possible. Villages were also visited by hospital assistants. Copies of "Simple Sanitary Rules" were purchased by all the taluk boards and distributed to all village officers, union chairmen, hospital assistants, tahsildars and deputy tahsildars, and salary-result school teachers. The sanitation of unions was looked after by the union chairmen and that of other villages by the village officers concerned. The trench latrine system which was strongly recommended by the Sanitary Commissioner was tried in two selected villages, but did not prove a success.

The presidents of taluk boards were advised to introduce the system of private scavenging in some selected unions. But the reports received do not show that much progress was made, as most houses are reported not to possess any latrines at all, and people resort to waste lands adjoining their villages. The system is however being tentatively tried in Sivaganga and Uttamapálaiyam unions and the result will be watched. Public health during the year was not satisfactory. Cholera was prevalent throughout the whole year as already reported, mostly in December 1894 and January 1895, and the deaths from fever were more than in the previous year, being 9,550 against 8,701. The number of deaths from small-pox however compares favourably with the figure for the previous year, being only 217 against 906.

66. *Sanitary Associations.*—The eight associations in the Ramnad zemindari continued to do their work during the year. But of the two in Periyakulam, that at Tandikudi did nothing during the year owing to want of co-operation among its members. The balance in favour of these associations at the commencement of the year was Rs. 1,854. Rs. 1,521 were collected by the association from the people and Rs. 67 were realised as interest on the money invested in the Postal Savings Bank. The taluk boards contributed Rs. 1,302. The aggregate receipts thus amounted to Rs. 4,744, out of which Rs. 2,381 were spent on account of establishment and contingent charges and Rs. 289 on sanitary works. There was left at the close of the year a balance of Rs. 2,074 in favour of the associations. The working of these associations has, on the whole, been reported to be fair.

67. *Markets.*—The decrease under the sub-head occurs mainly under the item "Contingencies," and this is due to the taluk boards of Tirumangalam, Mélúr and Sivaganga not having fully utilised the allotments made by them for purchase of tools and implements for the markets. All the markets are reported to have been freely resorted to by the people. No fees were levied in the markets at Uttarakosamangai and Pogalur in the Ramnad taluk and Kallimanthayam and Porulur in the Palni taluk to make them more popular.

	Rs.
Actuals of 1894–95	2,828
Estimate of ,, ...	4,275
Actuals of 1893–94	2,931

68. *Choultries.*—The establishment charges amounted to Rs. 4,225 against Rs. 4,401, the estimate. The services of the storekeeper, cook and sweeper of the Sólavandán chattram were dispensed with with effect from May 1894 to save funds for the construction of a chattram in Madura and raw rice distributed from that date instead of cooked rice. A kavalgar was entertained for the chattram at Chattrapatti from December 1894. Feeding was stopped in Kottampatti chattram also on account of urgent repairs which were found necessary for the chattram building. The expenditure under "Feeding charges" was Rs. 4,425 against Rs. 4,743.* Eighty-nine thousand two hundred and fifty-five travellers halted in the choultries, of whom 64,421 were fed in the choultries at Sólavandán, Samaiyanallúr, Tirumangalam, Mélúr, and Muttanendal against 66,264 persons fed in the previous year. The number of travellers that halted should be more; but correct statistics were not available in the case of all the choultries. The average cost of feeding one person was 1 anna 1 pie against 1 anna 2 pies in the previous year. The charge under "Contingencies" was Rs. 3,056 against the estimate of Rs. 3,369.

	Rs.
Actuals of 1894–95	11,706
Estimate of ,, ...	12,199
Actuals of 1893–94	11,151

* Including the contribution of Rs. 53 to the Madura municipality.

69. *Bungalows.*—Establishment and contingencies amounted to Rs. 521 and Rs. 20 against the estimate of Rs. 510 and Rs. 200, respectively. Repairs and improvements were effected to the extent of Rs. 655 in all, which amount excludes Rs. 665 spent by the Mélúr Taluk Board in fitting the American Mission school building at Nattam lately purchased by it for a travellers' bungalow. The bungalows were all in good condition. A sum of Rs. 1,647 was adjusted in favour of Provincial funds towards contribution on account of "Sanitary Inspection." The contribution of Rs. 60 provided on account of "Cutlers' establishment" was not adjusted within the end of the year; and Rs. 56 have since been adjusted as per advice from the Treasury Deputy Collector.

	Rs.
Actuals of 1894–95	541
Estimate of ,, ...	710
Actuals of 1893–94	690

70. *Contributions.*—Contributions paid to municipalities amounted to Rs. 4,289 against the estimate of Rs. 4,639:—

	Rs.
(1) By District Board for women and children's hospital at Dindigul	89
(2) To the Madura municipality for sanitary arrangements ...	200
(3) To the Madura municipality for diet charges of patients in the municipal hospital	1,300
(4) To Periyakulam municipality for conduct of vaccination in twenty Local Fund villages adjoining Periyakulam for 1894–95	120
(5) By Dindigul Taluk Board to the Dindigul municipality for purchase of medicines	480
(6) By Dindigul Taluk Board to the Dindigul municipality for women and children's hospital	350
(7) By Palni Taluk Board to the Palni municipality for the dispensary	1,000
(8) By Periyakulam Taluk Board to the Periyakulam municipality for the same purpose	750

introduced during the year, but were not available for sale till late. A commission of Rs. 200 was earned by the district curator and the inspecting schoolmasters on the sale of books effected by them against the estimate of Rs. 190; and a sum of Rs. 48 was paid to the watchman to the "play-ground for schools" at Madura and Rs. 53 on account of contingencies. A sum of Rs. 848 was expended from Grant I for diverting a channel and levelling the play-ground, and Rs. 188 in raising the northern portion of the eastern compound wall of the ground.

55. *Grant III—Hospitals, &c.*—The dispensary at Ilayangudi was abolished in June 1894 under G.O., Mis. No. 1055 L., dated 11th June 1894, and there were, therefore, at the end of the year only eight hospitals and twenty-four dispensaries. One hospital and sixteen dispensaries are located in rented buildings. The zemindarni of Bódináyakkanúr, who promised to have a building for the hospital there, constructed at her own cost, has not yet done so, and the President of the taluk board has been asked to remind her of the promise. The dispensary at Karakudi will soon have a building of its own, towards which a private contribution of Rs. 1,000 has been received; and Sivaganga board has provided for the construction of a new building for the Manamadura dispensary. The District Medical and Sanitary officer, Madura, reports that nine of the institutions have no sufficient accommodation and that fifteen others require repairs. The attention of the Presidents of the taluk boards concerned will be drawn to this matter. A sum of Rs. 4,223 was spent during the year in improvements and repairs to the hospitals and dispensaries in the district. A compound wall to the dispensary at Usilampatti is being raised and a verandah was constructed in front of the Nattam dispensary building at a cost of Rs. 613. Four new latrines were provided for the Kodaikánal hospital and improvements were made to the apothecary's quarters and the hospital building at a cost of Rs. 2,145 * during the year. Quarters for the hospital assistant at Manamadura were constructed and completed at a cost of Rs. 243 and the apothecary's quarters attached to the Uttamapálaiyam hospital were improved at a cost of Rs. 542 † during the year. The dispensary at Tiruvadanai continued to be the only endowed institution in the year. The Madura taluk board has stopped the payment of half the cost of upkeep of the Solavandan dispensary from the Solavandan chattram funds on the ground that the funds are wanted for other proposes. Contributions are made by the Sáptúr estate, the Travancore Government, and the Rámésvaram devastanam towards the dispensaries at Sáptúr, Bódináyakkanúr, and Pámban and Rámésvaram, though the first-mentioned contribution was not received during the year. Rs. 80 were paid by Government for treating the police sick at Ramnad. The district and local boards continued to make their usual contributions towards the municipal and mission dispensaries as detailed later on.

Actuals of 1893–94	42,102

* Includes Rs. 374, Petty works.

† Includes Rs. 93, Petty works.

The number of in-patients treated in all the institutions considerably increased in the year as noted below, notwithstanding the fact that one dispensary, viz., that at Ilayangudi, was closed very early in the year:—

	In-door.	Out-door.
1893–94	771	206,938
1894–95	839	211,232

There were only 69 beds available for in-patients against 77 in the previous year, the decrease being due to the reduction of eight beds in Devakottai dispensary, which was reduced from major to minor. The total net expenditure on the maintenance of hospitals and dispensaries excluding the cost of midwives and midwifery pupils was Rs. 39,080 against the estimate of Rs. 41,797; and the average cost of treating each in-patient was Rs. 1–5–11 against Rs. 1–7–5 in the previous year, that of treating each out-patient As. 2–6 against As. 2–9.

56. The system of supervision of medical institutions by local committees was introduced during the year, Tirumangalam taluk board being the first to establish a committee for the Tirumangalam dispensary. The President, taluk board, has

67. *Markets.*—The decrease under the sub-head occurs mainly under the item "Contingencies," and this is due to the taluk boards of Tirumangalam, Mélúr and Sivaganga not having fully utilised the allotments made by them for purchase of tools and implements for the markets.

	Rs.
Actuals of 1894–95	2,828

(8) By Periyakulam Taluk Board to the Periyakulam municipality for the same purpose	750

12. ∨) and as the examination has lost the value of the late middle school examination as a test qualifying for the public service, few care to enter this class and it may become necessary, the superintendent thinks, to abolish it. Of the students of the primary grade class trained in 1893–94, 38 were presented for the practical test and 29 passed, twelve for trained teachers' certificates and seventeen for untrained teachers' certificates against 37 presented and 22 passed in the previous year. As in the previous year, eight students appeared and seven passed for the primary school examination. In all 42 trained teachers were turned out by these two classes, of whom 39 are reported to have already secured employment as teachers, two are endeavouring to open schools, and one is said to be not likely to remain in the profession.

The net cost to the district board on account of this department as detailed in statement IX was Rs. 2,524 against Rs. 2,187 in the previous year, and the average cost per pupil trained was Rs. 60 against Rs. 48.

The strength of the practising branch of the normal department on the 31st March 1895 was 187 against 153 in the previous year. Thirteen of the students were presented for the primary examination, of whom twelve passed—four for complete certificates, five in compulsory and in one optional subject, and three in the compulsory subjects only.

47. *Industrial Department.*—There were 108 students undergoing instruction in the several industrial and art classes on the 31st March 1895 against seventy in the previous year—33 in the carpentry, fifteen in the rattan, fifteen in the blacksmithy, fourteen in the metal work, five in the special class (teaching, drawing and another industry) 24 in the morning short-hand class (excluding two normal students) and two in the morning drawing class (excluding eight normal students). The increase is chiefly due to the opening of a short-hand class in January 1895 and the revival of the drawing class, but there was an increased attendance in all classes except the rattan class, the fall of one in which is said to be due to the want of a public test in that industry. The Superintendent reports that this class is making satisfactory progress. The number of artisan boys admitted rose from ten to sixteen. To meet the demands of the new curriculam, arrangements were made during the year to give instruction in wood carving in the carpentry classes, in casting in the metal work classes, and in fitters' work in the blacksmithy classes. The Superintendent reports that he is arranging for instruction in chasing to be given in the metal-work class. Two students were sent up for elementary examination in cabinet-making and four for free-hand drawing, of whom both the former passed in the first class, and three of the latter passed in the second class. For the standard examination conducted by the Inspector of Schools, 56 students were presented against 52 in the previous year, of whom all passed with 46 for merit grant against fifty with 21 for merit in the previous year. The Superintendent suggests the closing of the special class in which five students who have already been trained in the primary-grade class, are being instructed in drawing and in another industry, and suggests instead the opening of a class in which a few selected students from the normal department may be taught drawing for six months so as to pass the lower examination in free-hand drawing and be qualified to teach the subject in primary schools. The opinion of the Inspector of Schools will be obtained on this matter. The suggestion made in last year's report that students in the industrial classes should be given a portion of their earnings has been carried out. Among the teaching staff, the drawingmaster and the carpentry instructor were sent up for a special course of training in the School of Arts, Madras, for five months during the year. The former passed the intermediate examination in free-hand outline drawing and the elementary examination in painting. The latter passed the elementary examination in geometrical drawing and acquired a good knowledge of wood carving. The expenditure for job work was Rs. 2,264 and the receipts Rs. 2,018, while Rs. 762 worth of furniture remained on hand. The result was thus a profit to the board of Rs. 516 against Rs. 568 in the previous year on a considerably heavier outlay.

The result of inspection of the general education branch of the Industrial department by the sub-assistant inspector of schools, Madura range, is reported to be fair.

The net cost to the district board on account of the Industrial departm.. Rs. 2,598, giving an average cost of Rs. 19 per student against Rs. 3,216 and Rs. 61, respectively, in the previous year.

48. *Agricultural Department.*—There were seven students on the last day of the year against twelve at the end of the previous year, the number of stipendiaries having been reduced from twelve to eight in the budget for the current year to enable the stipends to be raised. This department is reported to have been examined by the Inspector of Schools and the results pronounced to be satisfactory. Farm-produce sold for Rs. 152 against Rs. 71 in last year. The net cost to the district board on account of this department was Rs. 238 against Rs. 646 in the previous year; and the average cost per student fell from Rs. 72 to Rs. 26 as in this year, the interest on the debenture loan was credited to this department. The department is not a success and it will shortly be decided whether it is worth while to retain it or not.

Extensive improvements were made to the institute and farm buildings during the year at a cost of Rs. 4,289. The construction of the compound wall around the gymnasium ground was completed at a cost of Rs. 548, an additional shed for the normal school boys was erected at a cost of Rs. 1,048, a new tiled shed was constructed at the workshop attached to the institute, which cost the board Rs. 783, a latrine with corrugated iron sheets was put up at a cost of Rs. 241, and the whole institute and the farm buildings repaired at a cost of Rs. 1,669. The total net cost to the district board on account of the Technico-Normal Institute excluding the cost of the public works above referred to amounted to Rs. 5,446 against Rs. 6,150 in the previous year.

49. *Sessional Schools.*—Three schools were established for about three months each as in the previous year—one at Solavandan, one at Batlagundu, and one at Paramagudi. Provision was made for 45 stipends, but only 36 persons came up for admission. The expenditure on account of stipends was Rs. 504, the pay of teachers Rs. 235, and miscellaneous contingent charges Rs. 86. Out of the 36 stipendiaries 35 were sent up for the primary school examination and only eighteen passed—nine in both the compulsory and optional subjects, and nine in the compulsory subject only.

	Rs.
Actuals of 1894–95	825
Estimate of „	950
Actuals of 1893–94	772

50. *Salary-results Schools.*—The total number of primary schools including the practising department of the technical institute at the commencement of the year was 139, of which 73 had also upper primary departments. Fourteen schools were newly opened during the year—seven in Ramnad, four in Sivâganga, two in Mélúr, and one in Madura; and eight old schools were closed—four in Ramnad, two in Madura, one in Dindigul, and one in Periyakulam. There were thus 145 schools at the close of the year, of which 38 had upper primary departments. The strength of the upper primary department on 31st March 1895 was 399 * against 348 in the previous year; and the average attendance was 334 boys throughout the year against 334. There were no girls in the upper primary departments this year, though there were seven in the year before. There were 4,669 pupils (4,460 boys and 209 girls) in the lower primary departments of classes on the last day of March against 4,422 (4,230 boys and 192 girls) in the previous year, and the average attendance was 3,932 against 3,551. The average cost per pupil in the upper primary department was Rs. 9 against Rs. 17 in the previous year. The average cost per pupil of the lower primary department was Rs. 3 as in the last year. The assistant inspector of schools reports that the results of the grant examination were fairly satisfactory during the year, except in the fourth standard in which fewer pupils appeared for examination. The following table compares the number of pupils presented and the number passed for two years:—

	Rs.
Actuals of 1894–95	20,488

Infant Standard	Boys..	19	15	22	17
	Girls..				

Salaries of masters amounted to Rs. 13,038 against the estimate of Rs. 13,225, the decrease being due mainly to non-utilization of allotments for opening a night school at Pillayarpalayam and a school for backward classes in Tirumangalam taluk. Results stipends continued to be paid to salary-result school teachers at 75 per cent. of the maximum rates except in Periyakulam, where it was paid at 50 per cent., and the cost on this account was Rs. 4,860 against the estimate of Rs. 4,994. The pay on account of servants entertained amounted to Rs. 75 against the estimate of Rs. 190, owing to the full establishment of sweepers estimated for not having been employed. The expenditure in the purchase of school books, maps, rent and miscellaneous contingent charges amounted to Rs. 2,515 against the expenditure of Rs. 2,748 in the previous year. The grand total expenditure on account of salary-result schools was Rs. 20,488 against Rs. 19,240. Excluding receipts on account of school-fees and grants paid from provincial funds, which amounted to Rs. 3,218 against Rs. 2,829 in the previous year, the net cost to local funds on account of primary education was Rs. 17,270 against Rs. 16,411.

51. *Grant-in-aid Schools—Results grant.*—Aided schools rose from 491 to 496, the increase of five being the net result of 26 new schools opened and 21 closed. There was an increase of 26 schools in Sivaganga and Ramnad zemindaris, while in the Ayan tracts there was a fall of 21 schools notably in Tirumangalam, Mélúr and Palni. The total strength of the schools was 16,731 pupils on the 31st March last against 16,923 in the previous year; of which number 11,367 were presented for examination and 8,880 pupils found qualified for grants against 8,655 in the previous year. The amount earned Rs. 18,649 was less than the amount Rs. 19,246 earned in the previous year, which is due to fewer passes for merit grant, for which the minimum number of marks was raised, and to reduction in the rate of grant for the first standard from Rs. 1–12–0 to Rs. 1–8–0 under the new Grant-in-aid Code. Only Rs. 17,656 were actually disbursed during the year owing to the late period at which the examination was held. Rs. 311 were paid to the mangers of certain schools either as building or furniture grant. The assistant inspector reports that there was a smaller number of merit passes during the year, and that this was due to the higher minimum fixed for merit grant in the new Code.

	Rs.
Actuals of 1894–95	17,967
Estimate of „	20,285
Actuals of 1893–94	19,210

52. *Panchama Schools.*—There were, on the 31st March 1895, 35 schools specially held for panchamas against 24 schools in the previous year. Ten of the schools were purely board schools and 25 were aided from local funds. The expenditure in the upkeep of the board schools and in the results grant amounted to Rs. 1,973 against Rs. 917 in the previous year.

53. *Muhammadan Schools.*—There were 47 schools against 40 in 1893–94 in which Muhammadan pupils were taught. Of these, 21 were board schools and 26 aided from local funds. The expenditure on these schools was Rs. 3,718 against Rs. 2,981.

54. *Miscellaneous.*—Books for primary school boys were purchased for Rs. 705 for sale during the year against the estimate of Rs. 855 and Rs. 1,270, the actuals of the previous year. The fall was due to the fact that new readers were about to be

introduced during the year, but were not available for sale till late. A commission of Rs. 200 was earned by the district curator and the inspecting schoolmasters on the sale of books effected by them against the estimate of Rs. 190; and a sum of Rs. 48 was paid to the watchman to the "play-ground for schools" at Madura and Rs. 53 on account of contingencies. A sum of Rs. 848 was expended from Grant I for diverting a channel and levelling the play-ground, and Rs. 188 in raising the northern portion of the eastern compound wall of the ground.

55. *Grant III—Hospitals, &c.*—The dispensary at Ilayangudi was abolished in June 1894 under G.O., Mis. No. 1055 L., dated 11th June 1894, and there were, therefore, at the end of the year only eight hospitals and twenty-four dispensaries. One hospital and sixteen dispensaries are located in rented buildings. The zemindarni of Bódináyakkanúr, who promised to have a building for the hospital there, constructed at her own cost, has not yet done so, and the President of the taluk board has been asked to remind her of the promise. The dispensary at Karakudi will soon have a building of its own, towards which a private contribution of Rs. 1,000 has been received; and Sivaganga board has provided for the construction of a new building for the Manamadura dispensary. The District Medical and Sanitary officer, Madura, reports that nine of the institutions have no sufficient accommodation and that fifteen others require repairs. The attention of the Presidents of the taluk boards concerned will be drawn to this matter. A sum of Rs. 4,223 was spent during the year in improvements and repairs to the hospitals and dispensaries in the district. A compound wall to the dispensary at Usilampatti is being raised and a verandah was constructed in front of the Nattam dispensary building at a cost of Rs. 613. Four new latrines were provided for the Kodaikánal hospital and improvements were made to the apothecary's quarters and the hospital building at a cost of Rs. 2,145 * during the year. Quarters for the hospital assistant at Manamadura were constructed and completed at a cost of Rs. 243 and the apothecary's quarters attached to the Uttamapálaiyam hospital were improved at a cost of Rs. 542 † during the year. The dispensary at Tiruvadanai continued to be the only endowed institution in the year. The Madura taluk board has stopped the payment of half the cost of upkeep of the Solavandan dispensary from the Solavandan chattram funds on the ground that the funds are wanted for other proposes. Contributions are made by the Sáptúr estate, the Travancore Government, and the Rámésvaram devastanam towards the dispensaries at Sáptúr, Bódináyakkanúr, and Pámban and Rámésvaram, though the first-mentioned contribution was not received during the year. Rs. 80 were paid by Government for treating the police sick at Ramnad. The district and local boards continued to make their usual contributions towards the municipal and mission dispensaries as detailed later on.

Actuals of 1894–95	... ...	41,107
Estimate of ,,	... ...	44,505
Actuals of 1893–94	... ...	42,102

* Includes Rs. 374, Petty works.

† Includes Rs. 93, Petty works.

The number of in-patients treated in all the institutions considerably increased in the year as noted below, notwithstanding the fact that one dispensary, viz., that at Ilayangudi, was closed very early in the year:—

	In-door.	Out-door.
1893–94	771	206,938
1894–95	839	211,232

There were only 69 beds available for in-patients against 77 in the previous year, the decrease being due to the reduction of eight beds in Devakottai dispensary, which was reduced from major to minor. The total net expenditure on the maintenance of hospitals and dispensaries excluding the cost of midwives and midwifery pupils was Rs. 39,080 against the estimate of Rs. 41,797; and the average cost of treating each in-patient was Rs. 1–5–11 against Rs. 1–7–5 in the previous year, that of treating each out-patient As. 2–6 against As. 2–9.

56. The system of supervision of medical institutions by local committees was introduced during the year, Tirumangalam taluk board being the first to establish a committee for the Tirumangalam dispensary. The President, taluk board, has

39. *Travelling Allowance.*—The increase under travelling allowance is due to the late District Board Engineer having drawn mileage for rapid journeys necessitated during the period he was in charge of the Madura sub-division, and to the fact that no deductions for short touring were made from the fixed travelling allowances of the overseers.

		RS.
Actuals of 1894–95	... ...	6,160
Estimate of ,,	... ...	5,760
Actuals of 1893–94	... ...	5,159

40. *Tools and Plant.*—The decrease is slight and calls for no remark. The expenditure under this head, as in the previous year, formed ·9 per cent. of the total outlay on works.

		RS.
Actuals of 1894–95	... ...	2,177
Estimate of ,,	... ...	2,220
Actuals of 1893–94	... ...	2,134

41. *Contingencies.*—The increase is explained by the Engineer as due to heavy charges for postage owing to increase in office work.

		RS.
Actuals of 1894–95	... ...	5,067
Estimate of ,,	... ...	4,271
Actuals of 1893–94	... ...	3,385

42. The expenditure on establishment, travelling allowance and contingencies was 16·3 per cent. of the outlay on works against 16·8 per cent. in the previous year.

43. *Grant II, Education.*—The total expenditure amounted to Rs. 60,162 against the estimate of Rs. 65,679, and Rs. 62,229, the actuals of 1893–94, being 12·3 per cent. of the current receipts against 12·1 per cent. in the previous year. The decrease below estimate occurred under all sub-heads except "Inspection."

44. *Inspection.*—The strength of the inspecting staff was eleven as in the previous year; and the cost including salary, travelling allowance and contingencies amounted to Rs. 5,701 against Rs. 5,593, the budget provision. The increase is mainly due to the payment of arrears of travelling allowance in the current year and to the supply of furniture to some of the inspecting schoolmasters. During the year 1,244 schools in 1,044 villages were inspected by the inspecting schoolmasters against 1,480 schools in 1,159 villages in the previous year. The work of eight of the inspecting schoolmasters has been reported upon by the assistant inspector of schools as having been fair, of two as satisfactory, and of one, the inspecting schoolmaster, Tirushuli range, as slow and rather superficial. Arrangements are being made to reduce this last to a schoolmaster replacing him by an efficient hand. It is proposed to retire the inspecting schoolmaster of Mélúr, whose work in 1893–94 was reported as unsatisfactory and who has qualifying service for pension.

		RS.

Estimate of ,,	... ...	5,593
Actuals of 1893–94	... ...	5,396

45. *Training Schools—Technico-Normal Institute.*—The institute with its three departments continued to make fair progress during the year.

		RS.
Actuals of 1894–95	... ...	14,175
Estimate of ,,	... ...	15,261
Actuals of 1893–94	... ...	16,067

46. *Normal Department.*—There were on the 31st March 1895, eight students preparing for the lower secondary grade and 37, of whom seven were municipal students, for the primary grade against ten and 38 students, respectively, in the previous year. This small decrease is owing to the fact that none of the municipalities sent a teacher for training for the lower secondary section. Of the ten students admitted to the lower secondary grade in January 1894, nine were presented for examination in theoretical test, of whom six passed for untrained teachers' certificates. Of these six, again five passed the practical test, two for trained and three for untrained teachers' certificates. The result compares unfavourably with that of the previous year and cannot be considered satisfactory. The Superintendent ascribes it to the change in the staff caused by the employment of the first assistant of the institute and of the fourth master on other duty for about six months during the year. He reports that he has found it impossible to secure a larger number of entries to this class. As a pass in the lower secondary examination is not compulsory for promotion to the higher

III.—EXPENDITURE.

29. The total expenditure during the year excluding debt heads (Rs. 12,794) and allotment from district to taluk funds (Rs. 42,340) and that from taluk to union funds (Rs. 8,175) amounted to Rs. 4,72,890 against Rs. 5,76,814, the estimate for the year including subsequent allotments and transfers, and Rs. 4,61,020, the actuals of the previous year. The statement annexed shows at a glance the expenditure incurred under the several heads as compared with the estimate for the year and the actuals of the previous year :—

Balance	1,27,344	— 15,944	51,616	82,535	12,283	1,46,434

30. *Grant I, Public Works.*—The aggregate expenditure was Rs. 2,69,004 against the estimate of Rs. 3,53,918, and Rs. 2,56,723, the actuals of 1893–94. The decrease of Rs. 84,914 below the estimate, as altered by subsequent allotments, is accounted for by the District Board Engineer as due to the following causes :—

(1) Works to the value of Rs. 17,443 were not paid for before the close of the year either pending check-measurement or because bills were received too late.

(2) In many cases works were not carried out owing to failure of contractors, delay in settling on sites for certain markets, presence of water in tanks attached to Narikudi chattram that were to be repaired, &c. All the works were carried out by the Local Fund Engineering agency, and the expenditure under the grant formed 55·4 per cent. of the total charges under all the grants and 42·6 per cent. of the receipts against 54·7 and 43 per cent. respectively in the previous year.

but the taluk board member from whom it is due has promised to pay it in the current year. Rupees 3,000 were budgeted for as contribution from the Tinnevelly district board towards the construction of the Aruppukóttai-Virudupatti road; but the cost of work done during the year was only Rs. 2,288. Of this, Rs. 648 were received; but the balance of Rs. 1,640, though remitted within the year, was received too late to be included in the year's accounts. It has therefore been shown as receipts in the accounts for April 1895.

25. *Refund of Expenditure.*—The sum of Rs. 734 entered under this head consists of the refund of Rs. 429 made by the Tanjore district board, being the charges incurred in the repairs executed to the Tanjore Maharajah's choultries at Rámésvaram and Setukarai in 1893–94, referred to in paragraph 38 of the previous year's report, of Rs. 280 refunded from Provincial funds, being the cost of compensation for the lands acquired for the Pillar Rocks road, which was erroneously paid in 1893–94 from Local funds, and of Rs. 25, being the recovery made by the late District Board Engineer from his subordinates to satisfy audit objections in respect of excess or irregular payments made by them.

Estimate of „	..
Actuals of 1893–94	159

26. *Miscellaneous.*—The items of receipts under this head which are of a fluctuating character are as follow :—

	RS.
(1) Lease amount of the produce of the garden attached to the district board building called Fletcher's bungalow	25
(2) Amount forfeited by market, &c., contractors	276
(3) Surplus cash in the hands of the overseers credited to Local funds.	10
(4) Rent of dispensary buildings occupied by Medical officers	113
(5) Witness batta paid by court to Local Fund overseers	14
(6) Sale of unserviceable articles	28

	RS.
Actuals of 1894–95	466
Estimate of „	210
Actuals of 1893–94	833

27. *Contribution from Provincial Funds.*—The details of the contribution realised under this head are as follow :—

	RS.
(1) Grant on account of salary of teachers and stipends of students, results and building grants	5,806
(2) Annual assignment to choultries	7,774
(3) Aid towards the cost of treating the police sick at Ramnad	80

	RS.
Actuals of 1894–95	13,660
Estimate of „	16,760
Actuals of 1893–94	14,594

The contribution for educational purposes alone was estimated at Rs. 8,780, but only Rs. 5,806 were realised. The decrease is due to the poor results obtained in the Upper Primary Examination, to the furniture grant for some of the Upper Primary schools in the Tirumangalam taluk not having been passed, though the same was applied for in time, and to the full number of stipendiary students budgeted for for admission in the Technical Institute not having come forward for admission and consequently to the poorer scholarship grants earned.

The Government contribution of Rs. 120 towards the Kodaikánal hospital was again not drawn by the Periyakulam taluk board. Contribution for two years is now due, and the President of the new Dindigul taluk board will be asked to take very early steps to draw the amount.

28. *Allotment from the District Fund.*—The decrease below the actuals of the previous year is due to the allotment having been made in reference to the actual requirements of the several taluk boards as explained in the memorandum referred to in paragraph 58 of the budget report for 1894–95.

	RS.

The total expenditure during the year excluding debt heads (Rs. 12,794) and allotment from district to taluk funds (Rs. 42,340) and that from taluk to union funds (Rs. 8,175) amounted to Rs. 4,72,890 against Rs. 5,76,814, the estimate for the year including subsequent allotments and transfers, and Rs. 4,61,020, the actuals of the previous year. The statement annexed shows at a glance the expenditure incurred under the several heads as compared with the estimate for the year and the actuals of the previous year :—

Balance	1,27,344	— 15,944	51,616	82,535	12,283	1,46,434

30. *Grant I, Public Works.*—The aggregate expenditure was Rs. 2,69,004 against the estimate of Rs. 3,53,918, and Rs. 2,56,723, the actuals of 1893–94. The decrease of Rs. 84,914 below the estimate, as altered by subsequent allotments, is accounted for by the District Board Engineer as due to the following causes :—

(1) Works to the value of Rs. 17,443 were not paid for before the close of the year either pending check-measurement or because bills were received too late.

(2) In many cases works were not carried out owing to failure of contractors, delay in settling on sites for certain markets, presence of water in tanks attached to Narikudi chattram that were to be repaired, &c. All the works were carried out by the Local Fund Engineering agency, and the expenditure under the grant formed 55·4 per cent. of the total charges under all the grants and 42·6 per cent. of the receipts against 54·7 and 43 per cent. respectively in the previous year.

The fall below the estimate is due to the contribution usually paid by the Sáptúr estate towards the upkeep of the Sáptúr dispensary not having been realised within the close of the year.

Under "income from endowments," a sum of Rs. 725 was realised from the villages of Kumani and Machiyur attached to the Tiruvádánai dispensary against the estimate of Rs. 700 and Rs. 294 only, the actuals of 1893–94, the increase being due to repairs effected to the irrigation tanks of the villages during the year and to the sale of the paddy harvested in the previous year.

Rupees 110 were realised by the district board from the sale of the calves purchased for inoculation in the vaccine depôt at Madura and Rs. 18 by the several taluk boards from the sale of the unserviceable articles in dispensaries.

14. *Interest.*—The interest realised on the museum and library fund invested in Government securities was Rs. 278 against the estimate of Rs. 240. The small increase is due to the interest received in advance on the notes on their conversion into 3½ per cent. loan of 1894. The Madura municipality paid Rs. 500, the interest on the debenture loan made to it, and Rs. 30 were realised as interest on arrears of land-cess.

	RS.
Actuals of 1894–95	808
Estimate of „	780
Actuals of 1893–94	830

15. *Miscellaneous — Contributions.*—The contributions received from private individuals during the year amounted to only Rs. 1,404. They were for the following purposes :—

	RS.
Actuals of 1894–95	1,404
Estimate of „	2,670
Actuals of 1893–94	2,752

	RS.
(1) By Tiruparankunram Devastanam for the upkeep of the scavengering establishment at Tiruparankunram	21
(2) By Shólavandán union panchayat on account of moiety of the cost of digging a well in Tenkarai and for cost of maintenance of a light	26
(3) By Rajah of Ramnad for lighting Ramnad town	800
(4) By Rámésvaram Devastanam for lighting Rámésvaram	300
(5) By Tirumangalam ryots for lighting	2
(6) By Tiruppuvanam Devastanam for lighting on account of arrears of 1893–94	11
(7) By Ramayee of Sivaganga for lighting on account of arrears of 1893–94	9
(8) By Rámésvaram Devastanam for making sanitary arrangements	100
(9) By Agathipatti ryots for the construction of a tunnel	115
(10) By Tondi ryots for sanitary purposes	20

The decrease is only apparent as the item of Rs. 1,155 under this head in 1893–94 was only the savings of the Cumbum Sanitary Association, received for being invested in Government securities under G.O., Mis. No. 1030 L., dated 8th June 1894, so that interest may accrue on it. The full contribution promised by some of the ryots in the Madura and Tirumangalam taluks was not realised owing to bad season. The Sáptúr estate did not pay its usual contribution of half the cost of the scavengering establishment at Sáptúr within the close of the year. The President of these taluk boards will be requested to see that the contributions due are realised without further delay.

16. *Choultry Rents.*—Except in the Tirumangalam taluk, where, owing to the removal of the sub-registrar's office at Kallikudi from the Kallikudi chattram, Rs. 153 less were collected under this head, the rental collected in all other taluks was larger than the estimate. The increase is specially noticeable in the case of the Ramnad taluk, Rs. 2,065 having been recovered from the late Hakdar of the Narikudi and Muttanendal chattram who was prosecuted for misappropriation of the chattram funds, as reported in paragraph 19 of the last year's report. The President of the board reports that there is a

	RS.
Actuals of 1894–95	14,639
Estimate of „	10,750
Actuals of 1893–94	9,862

large amount of arrear rental to the extent of Rs. 8,350 on account of this chattram still remaining to be collected, and that he hopes to have the arrears collected soon.

17. *Market Rents.*—The decrease under this head is found in all the taluks except Dindigul, Tirumangalam and Ramnad, the cause being reported to be want of competition at the sales. In Ramnad the decrease of Rs. 46 below the estimate is only apparent, as the deposits made by the respective contractors were not taken credit for within the close of the year towards the last three instalments of kists due from the contractors. In Dindigul, Rs. 783, the excess over the estimate, is due to the deposits of the previous year's contractors having been taken credit for only in 1894–95. In Sivaganga the fall is due to the non-realization of the arrears of the previous year.

	Rs.
Actuals of 1894–95	21,386
Estimate of „	23,200
Actuals of 1893–94	22,273

18. *Bungalow Fees.*—The increase is accounted for by the number of travellers halting in the bungalows, which rose from 996 to 1,331. The bungalows are reported to be in good condition. The cost of improvements and repairs effected to them during the year amounted to Rs. 655.

	Rs.
Actuals of 1894–95	1,019
Estimate of „	700
Actuals of 1893–94	649

19. *Ferries.*—The ferry at Kottagudi in charge of the district board was leased out for Rs. 105 against Rs. 121 in the previous year. The Superintendent of Sea Customs, Kilakarai, reports that the water is getting very shallow, thereby enabling the travellers to ford the channel without the help of a ferry. This is the cause of the fall in the amount of the lease. The whole demand was realised during the year, together with interest on the deposit of the previous year or Rs. 106 in all.

	Rs.
Actuals of 1894–95	106
Estimate of „	100
Actuals of 1893–94	136

20. *Fishery Rents.*—The decrease is noticeable in the Madura and Tirumangalam taluks. The President of these boards reports that large remissions had to be granted to the lessees owing to the unfavourable season. The collections slightly exceeded the estimates in the other taluks.

	Rs.
Actuals of 1894–95	22,274
Estimate of „	23,370
Actuals of 1893–94	20,539

21. *Rent and Produce of Land.*—The receipts under this head comprise the collections of the assessment on the water-pandal inam of Varadanur village made over to the Taluk Board of Madura under G.O., No. 66, Revenue, dated 25th January 1894, for the maintenance of a water-shed at Chattrapatti, teerva on inam lands attached to endowed institutions, and the sale-proceeds of the vegetables raised in the Kamalai tope attached to the Ramnad taluk board.

	Rs.
Actuals of 1894–95	125
Estimate of „	120
Actuals of 1893–94	109

22. *Avenues.*—The sale-proceeds of the old and decayed trees and of the produce of the fruit-bearing trees are credited to this head. Government, in paragraph 3 (5) of its review on the previous year's administration report, remarked that the income usually obtained from this source was falling off and that it should be seen whether an improvement in the system on which the produce is sold, cannot be introduced. I am in communication with the District Board Engineer, Divisional officers, and Presidents of other district boards on the subject to see if any improvement can be made on the present system. The increase in the revenue under this head in the year under report over the estimate is probably due to the larger number of dead trees sold in the year, and to the care

	Rs.
Actuals of 1894–95	7,112
Estimate of „	5,960
Actuals of 1893–94	5,935

with which the collection of kists from the lessees was watched. Statement IV-B attached shows the length of road avenues in the district. According to that statement there were 1,056½ miles of road avenues at the beginning of the year, and the 9 miles of the new road from Théni to Bódináyakkanúr newly brought into account were planted with avenues in the year, making in all 1,065½ miles of road avenues at the close of the year. The number of trees that existed at the beginning of the year was 183,414; 2,675 trees were planted during the year, 400 trees found in excess on being actually counted and 891 trees were reported to have perished, and 1,680 trees found deficient on actual count in some of the roads. Thus, there were 183,918 trees at the close of the year.

The expenditure incurred in the planting and maintenance of avenues during the year was Rs. 7,205. The condition of the avenues is reported to be good.

23. *Sundry Receipts.*—This is a fluctuating item and is composed of the sale-proceeds of unserviceable articles in the Union, Taluk and District Board offices, of sweepings and empty kerosine-oil tins, of batta paid by courts for production of records, of copying and searching fees, and witness batta paid by courts, &c. It also includes the sum of Rs. 784, the contribution paid to the Madura municipality by the Madura taluk board in previous years towards feeding in Kunnattur chattram and now refunded towards meeting the expenses of the construction of a chattram near the Madura Railway station (*vide* G.O., Mis. No. 1095 L., dated 14th June 1894), and Rs. 145, the sale-proceeds of a latrine site at Aruppukóttai which was sold as unsuitable. A sum of Rs. 6 was remitted during the year by a certain vaccinator as contribution towards Local Fund pensions in accordance with the sanction accorded by Government in its order, Mis. No. 962 L., dated 2nd June 1894, for counting the period he was employed under the Madura municipality for pension from Local funds.

	Rs.
Actuals of 1894–95	1,648
Estimate of „	1,690
Actuals of 1893–94	567

	Rs.
Actuals of 1894–95	3,640
Estimate of „	4,550
Actuals of 1893–94	1,400

24. *Public Works—Contributions.*—The following contributions were realised during the year:—

	Rs.
(1) From the Periyakulam municipality, being the 1st instalment of its promised contribution towards the construction of a bridge over the Varahanadi	2,000
(2) From the Tinnevelly district board towards the construction of the portion of road from Aruppukóttai to Virudupatti passing within the limits of that district	648
(3) From Sólavandán ryots for a road from Sólavandán to Rishabam.	50
(4) From Sólavandán ryots for a road from Sólavandán to Karuppatti, Irumbali, &c.	140
(5) From the ryots of Mélúr for a road from Mélúr to Alagarcoil ...	250
(6) From the lessees of Sivaganga for lowering a tunnel on road No. 3, Madura to Kamuthi	135
(7) From the lessees of Kannangudi for lowering a tunnel on road No. 9, Dindigul to Vattanam	30
(8) From Muttuvarada Gavundan of Tirumangalam for a road ...	25
(9) From Arunachelam Chetti of Surakulam for the construction of a tunnel in the 15th mile of road No. 15, Mánámadurai to Tiruppattúr	122
(10) From Temmapatti and Tiruppattúr ryots	100
(11) From the Dharmasanamdars of Santanoduppu for the construction of a tunnel in the 7th mile of road No. 15, Mánámadurai to Tiruppattúr	54
(12) From the Assistant Engineer, Ramnad, and Overseer, Sivaganga, cost of putting right bad work for which they were held responsible	86

A contribution of Rs. 80 from the Madura municipality to the Madura taluk board for the construction of a road branching from road No. 4 to Pasumalai quarry was not realised as the work was not undertaken during the year. The contribution for gravelling the new road from Surakudi to Pudukkóttai frontier was also not realised

but the taluk board member from whom it is due has promised to pay it in the current year. Rupees 3,000 were budgeted for as contribution from the Tinnevelly district board towards the construction of the Aruppukóttai-Virudupatti road; but the cost of work done during the year was only Rs. 2,288. Of this, Rs. 648 were received; but the balance of Rs. 1,640, though remitted within the year, was received too late to be included in the year's accounts. It has therefore been shown as receipts in the accounts for April 1895.

25. *Refund of Expenditure.*—The sum of Rs. 734 entered under this head consists of the refund of Rs. 429 made by the Tanjore district board, being the charges incurred in the repairs executed to the Tanjore Maharajah's choultries at Rámésvaram and Setukarai in 1893–94, referred to in paragraph 38 of the previous year's report, of Rs. 280 refunded from Provincial funds, being the cost of compensation for the lands acquired for the Pillar Rocks road, which was erroneously paid in 1893–94 from Local funds, and of Rs. 25, being the recovery made by the late District Board Engineer from his subordinates to satisfy audit objections in respect of excess or irregular payments made by them.

	Rs.
Actuals of 1894–95	734
Estimate of „	...
Actuals of 1893–94	159

26. *Miscellaneous.*—The items of receipts under this head which are of a fluctuating character are as follow :—

	Rs.
(1) Lease amount of the produce of the garden attached to the district board building called Fletcher's bungalow	25
(2) Amount forfeited by market, &c., contractors	276
(3) Surplus cash in the hands of the overseers credited to Local funds.	10
(4) Rent of dispensary buildings occupied by Medical officers ...	113
(5) Witness batta paid by court to Local Fund overseers	14
(6) Sale of unserviceable articles	28

	Rs.
Actuals of 1894–95	466
Estimate of „	210
Actuals of 1893–94	833

27. *Contribution from Provincial Funds.*—The details of the contribution realised under this head are as follow :—

	Rs.
(1) Grant on account of salary of teachers and stipends of students, results and building grants	5,806
(2) Annual assignment to choultries	7,774
(3) Aid towards the cost of treating the police sick at Ramnad ...	80

	Rs.
Actuals of 1894–95	13,660
Estimate of „	16,760
Actuals of 1893–94	14,594

The contribution for educational purposes alone was estimated at Rs. 8,780, but only Rs. 5,806 were realised. The decrease is due to the poor results obtained in the Upper Primary Examination, to the furniture grant for some of the Upper Primary schools in the Tirumangalam taluk not having been passed, though the same was applied for in time, and to the full number of stipendiary students budgeted for for admission in the Technical Institute not having come forward for admission and consequently to the poorer scholarship grants earned.

The Government contribution of Rs. 120 towards the Kodaikánal hospital was again not drawn by the Periyakulam taluk board. Contribution for two years is now due, and the President of the new Dindigul taluk board will be asked to take very early steps to draw the amount.

28. *Allotment from the District Fund.*—The decrease below the actuals of the previous year is due to the allotment having been made in reference to the actual requirements of the several taluk boards as explained in the memorandum referred to in paragraph 58 of the budget report for 1894–95.

	Rs.
Actuals of 1894–95	42,340
Estimate of „	42,340
Actuals of 1893–94	61,400

the Madura municipality at the beginning of the year, the total contribution on account of tolls due from the four municipalities was Rs. 16,355. Of this amount, Rs. 15,941 were realised leaving a balance of Rs. 414 due from the Madura municipality. The Chairman is being reminded for the early payment of this sum.

11. *Education.*—There is a fall in the receipts under this head due to the closure of the salary-result schools at Pulankurichi and Muraiyur by the Sivaganga taluk board, to fall in the strength of some of the schools, to short receipts from the sale of primary school books, maps, &c., and to fall under the head "Miscellaneous" which comprises the following items of receipts :—

	Rs.
Lease amount of the farm land and of the cocoanut topes attached to the Technical Institute	70
Sale-proceeds of the articles made in the Technical Institute ...	2,018
Sale-proceeds of the produce, &c., of the farm lands	152
Refund of stipends made by the defaulting students of the Board ...	122
Amount paid by the Madura municipality being provincial contribution erroneously credited to municipal fund instead of to local funds	34

	Rs.
Actuals of 1894–95	6,790
Estimate of „	6,370
Actuals of 1893–94	7,126

A sum of Rs. 11 was collected from the students attending the morning and evening classes of the Technical Institute, which were revived about the close of the year. The municipality contributed Rs. 1,000 as usual towards the upkeep of the industrial department of the Technical Institute.

12. *House-tax.*—This was levied in all the unions at the same rates as in the previous year. The total collections amounted to Rs. 37,899 against Rs. 37,111 in the previous year or 94 per cent. of the demand fixed for the year against 90 per cent. in the previous year. Sivaganga taluk board collected 99 per cent. of the demand. Madura, Mélúr, Ramnad and Periyakulam collected 98, 98, 97 and 97 per cent., respectively. The percentage of collection was worst in Palni (47 per cent.) as in the previous years though slightly better than last year (33 per cent.). The cause of this is said to be the resistence offered by the Pallar caste population of the unions to the collection of the tax. It is hoped that in the current year under the amalgamated Board of Dindigul better results may be obtained. Rs. 414 were remitted during the year on account of vacant houses and Rs. 10 were written off the accounts by the Madura taluk board as irrecoverable. The balance of tax left uncollected on the last day of the year was Rs. 1,913 against Rs. 2,757 at the end of the previous year. Fifty-seven thousand one hundred and forty-one houses were finally assessed for tax during the year against 56,258 houses and distress warrants had to be issued in 2,311 cases involving Rs. 1,798, against 3,277 cases involving Rs. 2,537 in the previous year. Property to the value of Rs. 118 was distrained in 176 cases and sold in 29 realizing Rs. 17–8–0. The average incidence of tax per house was As. 10–6 during the year against As. 10–4 in 1893–94; and it ranged from Rs. 3–0–7 in Kodaikánal union to As. 5 in Ayakkudi union.

	Rs.
Actuals of 1894–95	37,905
Estimate of „	37,140
Actuals of 1893–94	37,111

13. *Medical.*—Medicines for Rs. 244 were sold in the year against the estimate of Rs. 350 and the actuals of the previous year, Rs. 383. Under "Contributions" the Madura municipality contributed Rs. 192 towards the pay of the District Surgeon's office establishment against the estimate of Rs. 190; and Rs. 760 were realised from private individuals as contribution towards the following purposes :—

	Rs.
(1) From Travancore Government towards the upkeep of the Bódinayakkanúr dispensary for 1893–94 and 1894–95	220
(2) From the Rámésvaram Devastanam authorities towards the upkeep of the Pámban and Rámésvaram dispensaries ...	540

	Rs.
Actuals of 1894–95	2,049
Estimate of „	2,420
Actuals of 1893–94	1,533

but the taluk board member from whom it is due has promised to pay it in the current year. Rupees 3,000 were budgeted for as contribution from the Tinnevelly district board towards the construction of the Aruppukóttai-Virudupatti road; but the cost of work done during the year was only Rs. 2,288. Of this, Rs. 648 were received; but the balance of Rs. 1,640, though remitted within the year, was received too late to be included in the year's accounts. It has therefore been shown as receipts in the accounts for April 1895.

25. *Refund of Expenditure.*—The sum of Rs. 734 entered under this head consists of the refund of Rs. 429 made by the Tanjore district board, being the charges incurred in the repairs executed to the Tanjore Maharajah's choultries at Rámesvaram and Setukarai in 1893–94, referred to in paragraph 38 of the previous year's report, of Rs. 280 refunded from Provincial funds, being the cost of compensation for the lands acquired for the Pillar Rocks road, which was erroneously paid in 1893–94 from Local funds, and of Rs. 25, being the recovery made by the late District Board Engineer from his subordinates to satisfy audit objections in respect of excess or irregular payments made by them.

	Rs.
Actuals of 1894–95	734
Estimate of „	...
Actuals of 1893–94	159

26. *Miscellaneous.*—The items of receipts under this head which are of a fluctuating character are as follow :—

	Rs.
(1) Lease amount of the produce of the garden attached to the district board building called Fletcher's bungalow	25
(2) Amount forfeited by market, &c., contractors	276
(3) Surplus cash in the hands of the overseers credited to Local funds.	10
(4) Rent of dispensary buildings occupied by Medical officers ...	113
(5) Witness batta paid by court to Local Fund overseers	14
(6) Sale of unserviceable articles	28

	Rs.
Actuals of 1894–95	466
Estimate of „	210
Actuals of 1893–94	833

27. *Contribution from Provincial Funds.*—The details of the contribution realised under this head are as follow :—

	Rs.
(1) Grant on account of salary of teachers and stipends of students, results and building grants	5,806
(2) Annual assignment to choultries	7,774
(3) Aid towards the cost of treating the police sick at Ramnad ...	80

	Rs.
Actuals of 1894–95	13,660
Estimate of „	16,760
Actuals of 1893–94	14,594

The contribution for educational purposes alone was estimated at Rs. 8,780, but only Rs. 5,806 were realised. The decrease is due to the poor results obtained in the Upper Primary Examination, to the furniture grant for some of the Upper Primary schools in the Tirumangalam taluk not having been passed, though the same was applied for in time, and to the full number of stipendiary students budgeted for for admission in the Technical Institute not having come forward for admission and consequently to the poorer scholarship grants earned.

The Government contribution of Rs. 120 towards the Kodaikánal hospital was again not drawn by the Periyakulam taluk board. Contribution for two years is now due, and the President of the new Dindigul taluk board will be asked to take very early steps to draw the amount.

28. *Allotment from the District Fund.*—The decrease below the actuals of the previous year is due to the allotment having been made in reference to the actual requirements of the several taluk boards as explained in the memorandum referred to in paragraph 58 of the budget report for 1894–95.

	Rs.
Actuals of 1894–95	42,340
Estimate of „	42,340
Actuals of 1893–94	61,400

the Madura municipality at the beginning of the year, the total contribution on account of tolls due from the four municipalities was Rs. 16,355. Of this amount, Rs. 15,941 were realised leaving a balance of Rs. 414 due from the Madura municipality. The Chairman is being reminded for the early payment of this sum.

11. *Education.*—There is a fall in the receipts under this head due to the closure of the salary-result schools at Pulankurichi and Muraiyur by the Sivaganga taluk board, to fall in the strength of some of the schools, to short receipts from the sale of primary school books, maps, &c., and to fall under the head "Miscellaneous" which comprises the following items of receipts :—

	Rs.
Actuals of 1894–95	6,790
Estimate of „	6,370
Actuals of 1893–94	7,126

	Rs.
Lease amount of the farm land and of the cocoanut topes attached to the Technical Institute	70
Sale-proceeds of the articles made in the Technical Institute ...	2,018
Sale-proceeds of the produce, &c., of the farm lands	152
Refund of stipends made by the defaulting students of the Board ...	122
Amount paid by the Madura municipality being provincial contribution erroneously credited to municipal fund instead of to local funds	34

A sum of Rs. 11 was collected from the students attending the morning and evening classes of the Technical Institute, which were revived about the close of the year. The municipality contributed Rs. 1,000 as usual towards the upkeep of the industrial department of the Technical Institute.

12. *House-tax.*—This was levied in all the unions at the same rates as in the previous year. The total collections amounted to Rs. 37,899 against Rs. 37,111 in the previous year or 94 per cent. of the demand fixed for the year against 90 per cent. in the previous year. Sivaganga taluk board collected 99 per cent. of the demand. Madura, Mélúr, Ramnad and Periyakulam collected 98, 98, 97 and 97 per cent., respectively. The percentage of collection was worst in Palni (47 per cent.) as in the previous years though slightly better than last year (33 per cent.). The cause of this is said to be the resistence offered by the Pallar caste population of the unions to the collection of the tax. It is hoped that in the current year under the amalgamated Board of Dindigul better results may be obtained. Rs. 414 were remitted during the year on account of vacant houses and Rs. 10 were written off the accounts by the Madura taluk board as irrecoverable. The balance of tax left uncollected on the last day of the year was Rs. 1,913 against Rs. 2,757 at the end of the previous year. Fifty-seven thousand one hundred and forty-one houses were finally assessed for tax during the year against 56,258 houses and distress warrants had to be issued in 2,311 cases involving Rs. 1,798, against 3,277 cases involving Rs. 2,537 in the previous year. Property to the value of Rs. 118 was distrained in 176 cases and sold in 29 realizing Rs. 17–8–0. The average incidence of tax per house was As. 10–6 during the year against As. 10–4 in 1893–94; and it ranged from Rs. 3–0–7 in Kodaikánal union to As. 5 in Ayakkudi union.

	Rs.
Actuals of 1894–95	37,905
Estimate of „	37,140
Actuals of 1893–94	37,111

13. *Medical.*—Medicines for Rs. 244 were sold in the year against the estimate of Rs. 350 and the actuals of the previous year, Rs. 383. Under "Contributions" the Madura municipality contributed Rs. 192 towards the pay of the District Surgeon's office establishment against the estimate of Rs. 190; and Rs. 760 were realised from private individuals as contribution towards the following purposes :—

	Rs.
(1) From Travancore Government towards the upkeep of the Bódinayakkanúr dispensary for 1893–94 and 1894–95	220
(2) From the Rámésvaram Devastanam authorities towards the upkeep of the Pámban and Rámésvaram dispensaries ...	540

	Rs.
Actuals of 1894–95	2,049
Estimate of „	2,420
Actuals of 1893–94	1,533

but the taluk board member from whom it is due has promised to pay it in the current year. Rupees 3,000 were budgeted for as contribution from the Tinnevelly district board towards the construction of the Aruppukóttai-Virudupatti road; but the cost of work done during the year was only Rs. 2,288. Of this, Rs. 648 were received; but the balance of Rs. 1,640, though remitted within the year, was received too late to be included in the year's accounts. It has therefore been shown as receipts in the accounts for April 1895.

25. *Refund of Expenditure.*—The sum of Rs. 734 entered under this head consists of the refund of Rs. 429 made by the Tanjore district board, being the charges incurred in the repairs executed to the Tanjore Maharajah's choultries at Rámésvaram and Setukarai in 1893–94, referred to in paragraph 38 of the previous year's report, of Rs. 280 refunded from Provincial funds, being the cost of compensation for the lands acquired for the Pillar Rocks road, which was erroneously paid in 1893–94 from Local funds, and of Rs. 25, being the recovery made by the late District Board Engineer from his subordinates to satisfy audit objections in respect of excess or irregular payments made by them.

	Rs.
Actuals of 1894–95	734
Estimate of „	...
Actuals of 1893–94	159

26. *Miscellaneous.*—The items of receipts under this head which are of a fluctuating character are as follow:—

	Rs.
(1) Lease amount of the produce of the garden attached to the district board building called Fletcher's bungalow	25
(2) Amount forfeited by market, &c., contractors	276
(3) Surplus cash in the hands of the overseers credited to Local funds.	10
(4) Rent of dispensary buildings occupied by Medical officers ...	113
(5) Witness batta paid by court to Local Fund overseers	14
(6) Sale of unserviceable articles	28

	Rs.
Actuals of 1894–95	466
Estimate of „	210
Actuals of 1893–94	833

27. *Contribution from Provincial Funds.*—The details of the contribution realised under this head are as follow:—

	Rs.
(1) Grant on account of salary of teachers and stipends of students, results and building grants	5,806
(2) Annual assignment to choultries	7,774
(3) Aid towards the cost of treating the police sick at Ramnad ...	80

	Rs.
Actuals of 1894–95	13,660
Estimate of „	16,760
Actuals of 1893–94	14,594

The contribution for educational purposes alone was estimated at Rs. 8,780, but only Rs. 5,806 were realised. The decrease is due to the poor results obtained in the Upper Primary Examination, to the furniture grant for some of the Upper Primary schools in the Tirumangalam taluk not having been passed, though the same was applied for in time, and to the full number of stipendiary students budgeted for for admission in the Technical Institute not having come forward for admission and consequently to the poorer scholarship grants earned.

The Government contribution of Rs. 120 towards the Kodaikánal hospital was again not drawn by the Periyakulam taluk board. Contribution for two years is now due, and the President of the new Dindigul taluk board will be asked to take very early steps to draw the amount.

28. *Allotment from the District Fund.*—The decrease below the actuals of the previous year is due to the allotment having been made in reference to the actual requirements of the several taluk boards as explained in the memorandum referred to in paragraph 58 of the budget report for 1894–95.

	Rs.
Actuals of 1894–95	42,340
Estimate of „	42,340
Actuals of 1893–94	61,400

GOVERNMENT OF MADRAS

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following papers:—

From J. TWIGG, Esq., President, District Board, Madura, to the Chief Secretary to Government, dated Madura, 22nd July 1895, No. 83.

I have the honour to submit the annual report on the operations of the district and taluk boards during 1894–95 together with the prescribed statements.

I.—General.

2. *Administration.*—There were 8 taluk boards and 35 unions working with the district board throughout the year. The amalgamation of the taluk boards of Dindigul, Palni and Periyakulam into one taluk board was sanctioned in G.O., No. 2647 L., dated 20th December 1894, and it was carried into effect on 1st April last. During the year under report the village of Velampatti with its hamlets was included in the Nattam union, as sanctioned in G.O., No. 1624 L., dated 27th August 1894.

3. The district board had, as usual, forty members on its rolls, of which four were ex-officio, twenty elected by the taluk boards and sixteen nominated by Government. The strength on the last day of March 1895 was 39, as an elected member vacated his seat on the Ramnad taluk board, and consequently on the district board on 15th February 1895, by efflux of time. The vacancy has since been filled up in the current year. Of these 39 members, 15 were officials (6 elected by the taluk boards, 4 ex-officio and 5 nominated) and the rest 24 non-officials.

The number of meetings held was twelve as in the previous year. No meeting was adjourned for want of a quorum. The average attendance of official members was 6 and of non-officials 12 against 7·6 and 11·2 respectively in the previous year. Mr. Turner, Mr. Miller and myself were successively Presidents, and presided at nine out of the twelve meetings. The other three were presided over by M.R.Ry. E. Srinivasachariar Avargal who was Vice-President throughout the year.

4. *Taluk Boards.*—The boards were complete on 31st March with the exception of the Dindigul board, an official member of which was transferred towards the close of the year. One hundred and seventeen meetings, excluding 2 adjourned by the Ramnad taluk board and 2 by the Sivaganga board for want of quorum, were held against 119 in the previous year. Periyakulam, as before, held the largest number of meetings (19), and in no case did the taluk boards fail to meet once in every month. The average attendance of members was 1·1 among officials and 4·8 among non-officials, against 1·3 and 4·9 in the previous year; and it ranged between 1·73 in Palni and 0·2 in Madura among officials and 6·4 in Mélúr and 2·7 in Palni among non-officials. The attendance in all the boards except Madura and Mélúr was slightly lower than in the previous year, and the attention of the Presidents of these boards will be drawn to the matter.

5. *Union Panchayats.*—The 35 unions held altogether 487 meetings against 476 in 1893–94. Uttamapálaiyam held the largest number (19). Four unions failed to meet once in every month against twelve in the previous year. All were defaulters last year, and the Presidents of the taluk boards concerned report that the Chairmen have been warned in the matter. The attention of the Presidents of taluk boards concerned will again be drawn to the suggestion of the Government in paragraph 2 of its review of the last year's report, and they will be asked to see that such default does not occur in the current year. Twenty-two meetings against twenty in the previous year were adjourned for want of quorum. There was only one vacancy. This was in Cumbum caused by the death of a panchayatdar. The number of official members in Solavandan alone predominated over the number of non-officials. But of the seven officials, five are village munsifs and ex-officio members; the remaining two are the sub-registrar, who is the Chairman, and the hospital assistant.

Kodaikánal	9	Usilampatti	11
Ayyampalayam	10	Palayampalli	11

The average attendance of the members was 5·9 as in the previous year; but the proportion of attendance of the officials and non-officials varied slightly being 1·7 and 4·2 against 1·5 and 4·4 respectively in 1893–94.

6. *Working of Taluk Boards and Unions.*—The taluk boards and unions are reported to have worked satisfactorily. The ward system of supervision which already existed in fifteen unions was extended to nine more in the year under report, viz., Usilampatti, Péraiyúr, Ramnad, Palayampatti, Batlagundu, Aiyampalayam, Kodaikánal, Melmangalam and Kilmangalam. In some unions the panchayatdars had the management of markets under section 142 of the Act. The system worked fairly satisfactorily during the year.

7. *Financial Position.*—Statements I-A and I-B attached exhibit particulars of the receipts and charges in respect of the district and taluk boards. The total receipts for 1894–95 are compared below with those for 1893–94:—

—	Actuals of 1893–94.				Actuals of 1894–95.			
	District fund.	Taluk fund.	Union fund.	Total.	District fund.	Taluk fund.	Union fund.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Opening Balance ..	— 9,395	85,016	8,062	83,683	21,953	93,808	11,583	1,27,344
Receipts	2,27,373	2,45,028	40,879	5,13,280	2,20,526	2,43,357	40,891	5,04,774
Allotment from district to taluk funds.	..	61,400	..	..	..	42,340	..	..
Allotment from taluk to union funds.	..	..	9,727	..	..	..	8,175	..
Total, Receipts ..	2,17,978	3,91,444	58,668	5,96,963	2,42,479	3,79,505	60,649	6,32,118
Total, Expenditure ..	1,96,025	2,97,636	47,085	4,69,619	1,90,863	2,96,970	48,366	4,85,684
Closing Balance ..	21,953	93,808	11,583	1,27,344	51,616	82,535	12,283	1,46,434

Excluding the debt heads (Rs. 16,099) and contributions from district to taluk funds (Rs. 42,340) and from taluk to union funds (Rs. 8,175), the receipts for the year amounted to Rs. 4,88,675 against Rs. 4,96,305 in the previous year, and the charges to Rs. 4,72,890 against Rs. 4,61,020. The year closed with a balance of Rs. 1,46,434 against Rs. 1,27,344 including the debt head transactions or 29 per cent. of the receipts against 24·8 per cent. in 1893–94. Rs. 50,503 of this formed the balance under endowment funds, Rs. 12,283, the balance in favour of unions, and deducting these, the balance under general funds was Rs. 83,648.

II.—Receipts.

8. The table subjoined compares the details of the receipts of the year with the estimate for the year and the actuals of 1893–94. The opening balance, Rupees 1,27,344, is considerably higher than the estimate, Rs. 79,090, and this is due to the

non-utilization of the full allotments made in the previous year for expenditure especially under Grant I, Public Works:—

—	Actuals of 1893–94.	Budget estimate for 1894–95.	Actuals of 1894–95.			
			District fund.	Taluk fund.	Union fund.	Total.

Total ..	5,96,963	5,60,870	2,42,479	3,79,505	60,649	6,32,118

9. *Land-cess.*—The demand for the year including the arrears of Rs. 11,653 of the previous year was Rs. 3,26,335 according to the statement furnished by the Treasury Deputy Collector; of which Rs. 3,11,240 or 95 per cent. of the demand were realised during the year against 96·4 per cent. collected in the previous year. The increase over the estimate is due to the collection of arrears. A sum of Rs. 120 was written off the accounts as irrecoverable, and this left a balance of arrears of Rs. 14,975 at the close of the year. The receipts under this head formed 61·6 per cent. of the total receipts against 53·7 per cent. in the previous year.

	Rs.
Actuals of 1894–95	3,11,240
Estimate of „	2,98,740
Actuals of 1893–94	3,20,404

10. *Tolls.*—The details of the receipts under this head are contained in Statement V attached. The nine local fund toll-gates of the district were leased out for Rs. 22,810 only against Rs. 27,650 in 1893–94. The fall is considerable, but the amount realised is only 1 rupee below the lease amount of 1892–93. The sum was collected in full during the year together with Rs. 22 being interest on overdue kists. The fees for compounding licenses issued in favour of transit agents in respect of the Palkanuth and Butlagundu toll-gates amounted to Rs. 178, and costs awarded by court in the appeal suit filed by the contractor of the Kariyapatti gate for 1891–92 for the recovery of the whole of his deposit referred to in paragraph 10 of the last annual report, which was defended by the board successfully amounted to Rs. 90. The aggregate receipts on account of the tolls established under Act V of 1884 were thus Rs. 23,100 for the year. Government Order, Mis. No. 1553 L., dated 18th August 1894, sanctioned the removal of the Tiruvadanai gate to a position near Tondi, and the establishment of a gate at Devakkottai from the commencement of the current year. The contribution due to the district board on the lease amounts of the municipal toll-gates was Rs. 15,739 only against Rs. 17,605 in the previous year. Including the arrears of Rs. 616 due from

	Rs.
Actuals of 1894–95	39,041
Estimate of „	44,000
Actuals of 1893–94	47,122

the Madura municipality at the beginning of the year, the total contribution on account of tolls due from the four municipalities was Rs. 16,355. Of this amount, Rs. 15,941 were realised leaving a balance of Rs. 414 due from the Madura municipality. The Chairman is being reminded for the early payment of this sum.

11. *Education.*—There is a fall in the receipts under this head due to the closure of the salary-result schools at Pulankurichi and Muraiyur by the Sivaganga taluk board, to fall in the strength of some of the schools, to short receipts from the sale of primary school books, maps, &c., and to fall under the head "Miscellaneous" which comprises the following items of receipts :—

	Rs.
Actuals of 1894–95	6,790
Estimate of ,, ...	6,370
Actuals of 1893–94	7,126

	Rs.
Lease amount of the farm land and of the cocoanut topes attached to the Technical Institute	70
Sale-proceeds of the articles made in the Technical Institute ...	2,018
Sale-proceeds of the produce, &c., of the farm lands	152
Refund of stipends made by the defaulting students of the Board ...	122
Amount paid by the Madura municipality being provincial contribution erroneously credited to municipal fund instead of to local funds	34

A sum of Rs. 11 was collected from the students attending the morning and evening classes of the Technical Institute, which were revived about the close of the year. The municipality contributed Rs. 1,000 as usual towards the upkeep of the industrial department of the Technical Institute.

12. *House-tax.*—This was levied in all the unions at the same rates as in the previous year. The total collections amounted to Rs. 37,899 against Rs. 37,111 in the previous year or 94 per cent. of the demand fixed for the year against 90 per cent. in the previous year. Sivaganga taluk board collected 99 per cent. of the demand. Madura, Mélúr, Ramnad and Periyakulam collected 98, 98, 97 and 97 per cent., respectively. The percentage of collection was worst in Palni (47 per cent.) as in the previous years though slightly better than last year (33 per cent.). The cause of this is said to be the resistence offered by the Pallar caste population of the unions to the collection of the tax. It is hoped that in the current year under the amalgamated Board of Dindigul better results may be obtained. Rs. 414 were remitted during the year on account of vacant houses and Rs. 10 were written off the accounts by the Madura taluk board as irrecoverable. The balance of tax left uncollected on the last day of the year was Rs. 1,913 against Rs. 2,757 at the end of the previous year. Fifty-seven thousand one hundred and forty-one houses were finally assessed for tax during the year against 56,258 houses and distress warrants had to be issued in 2,311 cases involving Rs. 1,798, against 3,277 cases involving Rs. 2,537 in the previous year. Property to the value of Rs. 118 was distrained in 176 cases and sold in 29 realizing Rs. 17–8–0. The average incidence of tax per house was As. 10–6 during the year against As. 10–4 in 1893–94; and it ranged from Rs. 3–0–7 in Kodaikánal union to As. 5 in Ayakkudi union.

	Rs.

Estimate of ,, ...	37,140
Actuals of 1893–94	37,111

13. *Medical.*—Medicines for Rs. 244 were sold in the year against the estimate of Rs. 350 and the actuals of the previous year, Rs. 383. Under "Contributions" the Madura municipality contributed Rs. 192 towards the pay of the District Surgeon's office establishment against the estimate of Rs. 190; and Rs. 760 were realised from private individuals as contribution towards the following purposes :—

	Rs.
Actuals of 1894–95	2,049
Estimate of ,, ...	2,420
Actuals of 1893–94	1,533

	Rs.
(1) From Travancore Government towards the upkeep of the Bódináyakkanúr dispensary for 1893–94 and 1894–95	220
(2) From the Rámésvaram Devastanam authorities towards the upkeep of the Pámban and Rámésvaram dispensaries ...	540

the Madura municipality at the beginning of the year, the total contribution on account of tolls due from the four municipalities was Rs. 16,355. Of this amount, Rs. 15,941 were realised leaving a balance of Rs. 414 due from the Madura municipality. The Chairman is being reminded for the early payment of this sum.

11. *Education.*—There is a fall in the receipts under this head due to the closure of the salary-result schools at Pulankurichi and Muraiyur by the Sivaganga taluk board, to fall in the strength of some of the schools, to short receipts from the sale of primary school books, maps, &c., and to fall under the head "Miscellaneous" which comprises the following items of receipts :—

	RS.
Actuals of 1894–95	6,790
Estimate of „	6,370
Actuals of 1893–94	7,126

	RS.
Lease amount of the farm land and of the cocoanut topes attached to the Technical Institute	70
Sale-proceeds of the articles made in the Technical Institute ...	2,018
Sale-proceeds of the produce, &c., of the farm lands	152
Refund of stipends made by the defaulting students of the Board ...	122
Amount paid by the Madura municipality being provincial contribution erroneously credited to municipal fund instead of to local funds	34

A sum of Rs. 11 was collected from the students attending the morning and evening classes of the Technical Institute, which were revived about the close of the year. The municipality contributed Rs. 1,000 as usual towards the upkeep of the industrial department of the Technical Institute.

12. *House-tax.*—This was levied in all the unions at the same rates as in the previous year. The total collections amounted to Rs. 37,899 against Rs. 37,111 in the previous year or 94 per cent. of the demand fixed for the year against 90 per cent. in the previous year. Sivaganga taluk board collected 99 per cent. of the demand. Madura, Mélúr, Ramnad and Periyakulam collected 98, 98, 97 and 97 per cent., respectively. The percentage of collection was worst in Palni (47 per cent.) as in the previous years though slightly better than last year (33 per cent.). The cause of this is said to be the resistence offered by the Pallar caste population of the unions to the collection of the tax. It is hoped that in the current year under the amalgamated Board of Dindigul better results may be obtained. Rs. 414 were remitted during the year on account of vacant houses and Rs. 10 were written off the accounts by the Madura taluk board as irrecoverable. The balance of tax left uncollected on the last day of the year was Rs. 1,913 against Rs. 2,757 at the end of the previous year. Fifty-seven thousand one hundred and forty-one houses were finally assessed for tax during the year against 56,258 houses and distress warrants had to be issued in 2,311 cases involving Rs. 1,798, against 3,277 cases involving Rs. 2,537 in the previous year. Property to the value of Rs. 118 was distrained in 176 cases and sold in 29 realizing Rs. 17–8–0. The average incidence of tax per house was As. 10–6 during the year against As. 10–4 in 1893–94; and it ranged from Rs. 3–0–7 in Kodaikánal union to As. 5 in Ayakkudi union.

4. Expenditure on Public Works

It is much to be regretted that the expenditure under this head was again very low, being only 73 per cent of the allotment against 74 in the previous year. The explanation offered for this in para. 30 of the President's report cannot be considered adequate. ~~Village roads, however, continued to receive a fair share of attention,~~ the percentage of the outlay on them to the total expenditure on communications was 10 against 9·4 in 1893-94. ~~The condition of the roads is reported to have deteriorated.~~ The cost of the Local Fund Engineering establishment amounted to 76 per cent of the expenditure on works incurred by that agency against 17 per cent in 1893-94.

The Govt. trusts that the Dt. Bd. new Engineer will be able to show better results in the current year. It is noticed with regret that the general condition of the roads is stated to have deteriorated. The matter calls for prompt action on the part of the local boards on village roads.

The boards will do well to restrict the outlay upon them until the main roads are in better order.

(2) Education There were eleven Inspecting school masters as in the previous year, and their work, with one exception, is reported to have been on the whole fair. The normal and industrial departments of the technical institute made satisfactory progress. Out of forty students of the normal department who appeared for examination, thirty-four passed successfully and in the industrial department, where there were 108 pupils against seventy in the previous year, fifty-six candidates who appeared for the standard examinations were successful. In the agricultural department there were seven pupils on the last day of the year against twelve in 1893-94 and the results of the examination by the Inspector of schools are reported to have been satisfactory. This department has

each. It is however to be regretted that four of them failed to meet once a month as required by section 129 of the Local Boards Act, notwithstanding the remarks in para 2 of Go. dated 18th October 1894 No. 2039 L. The Presidents of the Taluk Boards should see that the panchayats under their control comply with the provisions of the Act in this respect. Early steps should be taken to secure a preponderance of the non official element on the Salavandan panchayat. The average attendance of the members has again continued to be 5-9 out of a strength of twelve. The ward system of supervision, which was in force in twenty four unions against fifteen in the previous year, is stated to have worked fairly successfully. The private scavenging system introduced into Madura has been tried in the Sivaganga and Uttamapalaiyam Unions. The Taluk Boards and Panchayats are reported to have worked satisfactorily.

The next administration report should state how far it has succeeded.

3. Receipts (1) The collections under land cess amounted to 95 per cent of this demand against 96 per cent in 1893-94.

Owing to the existence of fever arrears from 1893-94 the demand under land cess declined by Rs. 5937.

(2) There were nine toll gates as in the previous year, but the current demand under this head fell from Rs 27,650 to Rs 22,810 — a decrease which has not been explained. The whole of this sum however, was realized within the year.

(3) House tax has continued to be levied at the maximum rates in four Unions, at three fourths rates in another one, and at half rates in the remaining thirty. The collections under this head amounted to 94 per cent of the demand against

No. 101

MADURA DISTRICT BOARD OFFICE,

28th August 1895.

From

J. Swigg Esquire,
President, District Board,
Madura.

To

The Chief Secretary to Government,
Local and Municipal Department,
Madras.

Sir,

I have the honor to forward herewith revised Statements I-A & I-B to be substituted for those submitted as enclosure to this office No 83 22-7-95 and extracts of Statements II-B and II containing certain alterations in the receipts and expenditure on account of 2 Unions and some endowed institutions. The alterations were rendered necessary owing to proposals received from the Presidents of some of the Local Boards since the submission of the consolidated report to Government. The reasons for the alterations are explained in the remarks column of the respective Statements.

I have the honor to be
Sir,
Your most obedient servant,

B Ramasamy
for President.

Enclosures. 3

SUBJECT.

Forwarding received annual statements I & B & extracts of statement No. II & III containing certain alterations in the receipts & expenditure on account of 2 Inams & some endowed institutions.

No. 101

MADURA DISTRICT BOARD OFFICE,

28th August 1895.

From

J. Twigg Esquire,
President, District Board,
Madura.

To

The Chief Secretary to Government,
Local and Municipal Department,
Madras.

Sir,

I have the honor to forward herewith revised Statements I-A + I-B to be subsidiaded for those submitted as enclosure to this office ltr No 83 22-7-95 and extracts of Statements II-B and II containing certain alterations in the receipts and expenditure on account of 2 Unions and some endowed institutions. The alterations were rendered necessary owing to proposals received from the Presidents of some of the Local Boards since the submission of the consolidated report to Government. The reasons for the alterations are explained in the remarks column of the respective Statements.

I have the honor to be
Sir,
Your most obedient servant,

B Ramasarma
for President.

2. Local Boards & Union Panchayats.

The District Board held twelve meetings as in 1893-94. The attendance of the non-official members improved and was fair, ~~while~~ that of the officials declined and was indifferent. The Taluk Boards met a sufficient number of ~~meetings~~ times. The average attendance of the official members of the Madura Board and of the non-officials on the Palni Board was very poor, ~~while~~ and ~~that of~~ the latter on the Periyakulam, Ramnad and Sivaganga Boards were irregular. The irregularity of attendance of the ~~members~~ on the Madura, Palni and Ramnad Boards was too often absent. The ~~difference~~ has been noticed in the reviews of the last two years ~~also~~. There were thirty-five union panchayats, ~~at work in the previous year~~ and they again held on an average fourteen meetings each

and steps should be taken to prevent the necessity of remarks upon the subject in future.

each. It is however to be regretted that four of them failed to meet once a month as required by section 129 of the Local Boards Act, notwithstanding the remarks in para 2 of Go. dated 13th October 1894 No. 2039 L. The Presidents of the Taluk Boards should see that the panchayats under their control comply with the provisions of the Act in this respect. Early steps should be taken to secure a preponderance of the non official element on the Solavandan panchayat. The average attendance of the members has again continued to be 5-9 out of a strength of twelve. The ward system of supervision which was in force adopted in twenty four unions against fifteen in the previous year, is stated to have worked fairly successfully. The private scavenging system introduced into was being tried in the Sivaganga and Uttamapalaiyam unions. The Taluk Boards and Panchayats are reported to have worked satisfactorily.

The next administration report should state how far it has succeeded.

3. Receipts (1) The collections under land cess amounted to 95 per cent of the demand against 96 per cent. in 1893-94.

Owing to the existence of five years arrears in 1893-94 the demand under land cess declined by Rs. 5937.

(2) There were nine toll gates as in the previous year, but the current demand under this head fell from Rs 27,650 to Rs 22,810 — a decrease which has not been explained. The whole of this sum however, was realized within the year.

(3) House tax continued to be levied at the maximum rates in four Unions, at three-fourths rates in another one, and at half rates in the remaining thirty. The collections under this head amounted to 94 per cent of the demand against

against 90 per cent in 1893-94. They were good in the Unions under the Sivaganga, Madura, Melur, Ramnad & Periyakulam Taluk Boards, but very poor in those under the Palni board, where only 47 per cent of the demand was realized. A large proportion of the ~~total number (2311) of distress warrants~~ were again issued in the Cumbum Union. Property however was distrained only in 176 cases and sold in 29, the corresponding figures for the previous year being 212 & 30.

The number of distress warrants issued was 2311 and

(4) There were sixty-one markets under the control of the Taluk Boards against sixty in the previous year, but fees were levied in fifty-seven of them against fifty-eight, and the income under this head fell from Rs 22,273 to Rs 21,386. The expenditure on works

The major portion of this has, however been allotted for expenditure in the current year.

works connected with these institutions was Rs 16,981 or Rs 5,779 less than that in the previous year, and the balance to their credit at the end of the year was still large, being Rs 30,749 against Rs 32,597. Early steps should be taken to utilize this amount in the improvement of the markets themselves or of the roads leading to them or in the sanitation of the villages in which the markets are held.

(5) The receipts from Choultry rents, fishery rents and avenues exceeded those of the previous year by Rs 4,777, Rs 1735 & Rs 1177 respectively. The large arrears of Rs 8,350 outstanding under the first of these heads should be adjusted as soon as possible. The general condition of the avenues is reported to have been good.

The result of the endeavours to increase the revenue from them should be noticed in the next administration report.

4

4. Expenditure on Public Works

It is much to be regretted that the expenditure under this head was again very low, being only 73 per cent of the allotment against 74 in the previous year. The explanation offered for this in para. 30 of the President's report cannot be considered adequate. Village roads, however, continued to receive a fair share of attention, the percentage of the outlay thereon to the total expenditure on communications being 10 against 9·4 in 1893-94. The condition of the roads is reported to have deteriorated. The cost of the Local Fund Engineering Establishment amounted to 76 per cent of the expenditure on works incurred by that agency against 17 per cent in 1893-94.

The Govt. trusts Mr. Bz New Engineer will be show better results in the current year. It is noted with regret that the general condition of the roads is stated to have deteriorated. The matter calls for prompt action on the part of the local boards.

The boards Govt. do well to restrict the outlay upon them until the main roads are in better order.

(2) Education There were eleven Inspecting school masters as in the previous year, and their work, with one exception is reported to have been on the whole fair. The normal and industrial departments of the technical institute made satisfactory progress. Out of forty-seven students of the normal department, who sat up for examination, thirty-four passed and in the industrial department, where there were 108 pupils against seventy in the previous year, fifty-six candidates who appeared for the standard examinations were successful. In the agricultural department there were seven pupils on the last day of the year against twelve in 1893-94 and the results of the examination by the Inspector of schools are reported to have been satisfactory. This department

it is however again reported that the Department is not a success. ~~Lemsden is stated to be not successful, and the question of its retention was under consideration.~~ A decision as to the desirability of retaining it should be come to with out delay.

The question of the desirability of its retention should be decided with out delay.

Thirty-Six students attended the ~~three~~ sessional schools maintained by the District Board. ~~were attended by thirty-six~~ Of these three ~~students of whom~~ thirty five appeared for examination, but only eighteen passed - a poor result. There was a small increase in the number and strength of the board primary Schools as shown in the margin.

Schools	pupils.
1893-94	138 - 4770
1894-95	144 - 5068

~~Twenty one of these were specially~~ maintained for the benefit of the Musalmans and ~~two for Panchamas, against fifteen and six respectively in the previous year.~~ From these ~~schools~~ 3,032 pupils appeared for standard examinations and 2,427, or 80 per cent passed, the corresponding figures for the previous year being 2901, 2254 & 78 percent.

~~but no separate information as to the progress of these has been given.~~

The Taluk Boards also aided 500 schools attended by 16,731 pupils with result grants against 494 schools with 16,923 pupils in 1893-94. The percentage of passes in the standard examinations rose from 75 to 78, but only 89 per cent of the allotment for result grants was utilized against 97 in the previous year. The total number of boys under instruction in the schools maintained and aided from Local Funds, was 11.40 per cent of the male population of School going age against 11.3 in 1893-94, the average for the Presidency in that year being 13.4. Education again ~~advanced~~ showed but little advance.

(3) Medical Relief The dispensary at Mayaingudi having been closed in June 1894, there were eight hospitals and twenty-four dispensaries under the control of the Taluk Boards on the last day of the year.

for reasons explained in para 51. of the Presidt. letter

Ten of the board schools & ~~twenty~~ five aided schools were specially maintained for Panchamas, and twenty one board & twenty six aided schools for Muhammadans but it is to be regretted that no separate information of the progress made by them has been ~~reported~~ given.

~~There was an increase in~~ the number of patients treated in these institutions, as noted in the margin. Separate orders will be passed on the proposal to substitute a hospital assistant for the apothecary at Uttamapâlaiyam, ~~which is~~ referred to in para. 57 of the President's report. Nineteen midwives ~~are attached to the~~ were again employed by the Taluk Boards and they attended in all 1141 cases of labour against 1060 in the previous year, ~~the average being~~ or on an average five cases each per mensem. ~~Every~~ Steps should be ~~taken~~ made to ~~secure~~ obtain better results in the current year. A contribution of Rs 439 was paid to the Dindigul Municipality for the maintenance of the women and Children's hospital there, which was in charge of a female apothecary trained by the Countess of

1893-94 - 207,709
1894-95 - 212,071

This figure is still low, and efforts

of Dufferin Fund Committee on account of the District Board. It is ~~to be regretted~~ observed that no special measures were ~~adopted~~ taken for the furtherance of ~~female~~ the medical education of women, ~~as required~~ The attention of the board is invited to G.O. dated 5th September 1887, No. 1684 although ample funds were available.

(4) Vaccination It is a matter for regret that there was a considerable retrogression in the work of this department. ~~This is attributed~~ mainly to the introduction of glycerine lymph, which owing to want of experience in preparing it, gave very unsatisfactory ~~results~~ at first. The total number of successful operations and of those on children under one year of age were respectively 29.8 and 11.5 per mille of the population against 35.8 and 13.5 in 1893-94, ~~It is however hoped~~ that

The cause of this was the inefficacy of the glycerine lymph supplied to the vaccinators in the early part of the year from the two depôts which were started in the district. Increased experience in the preparation of the lymph appears, however, to have resulted in an improvement in its quality; and it is hoped that in the current year the ground which has been lost will be ~~made up~~ recovered.

There was an increase in the number of patients treated in these institutions as noted in the margin. Separate orders will be passed on the proposal to substitute a hospital assistant for the apothecary at Uttamapâlaiyam, referred to in para. 57 of the President's report. Nineteen midwives were again employed by the Taluk Boards and they attended in all 1141 cases of labour against 1060 in the previous year, or on an average five cases each per mensem. This figure is still low, and efforts should be taken to obtain better results in the current year. A contribution of Rs 439 was paid to the Dindigul Municipality for the maintenance of the women and children's hospital there, which was in charge of a female apothecary trained by the Countess of

1893-94 - 20,709
1894-95 - 21,071

of Dufferin Fund Committee on account of the District Board.

It is observed that no special measures were taken for the furtherance of medical education of women. The attention of the boards is invited to Go. dated 5th September 1887, No. 1684 although ample funds were available.

(4) Vaccination It is a matter for regret that there was a considerable retrogression in the work of this department. This is attributed mainly to the introduction of glycerine lymph, which owing to want of experience in preparing it, gave very unsatisfactory results at first. The total number of successful operations and of these on children under one year of age were respectively 29.8 and 11.5 per mille of the population as against 35.8 and 13.5 in 1893-94, It is however hoped that

The cause of this was the inefficacy of the glycerine lymph supplied to the vaccinators in the early part of the year from the two Depots which were opened in the district. Increased experience in the preparation of the lymph appears, however, to have resulted in an improvement in its quality; and it is hoped that in the current year the ground which has been lost will be recovered.

~~that better results will be secured~~
~~in the current year~~.

(5) Sanitation. The proportion of expenditure to the allotment under this head rose from 86 to 91 per cent. Three new wells were sunk, thirty-three sources of water supply were improved and forty others were protected by watchmen ~~were employed~~ ~~to guard drinking water supplies~~; the corresponding figures for the previous year being Five, 39 and 36. Fifty-six villages were provided with conservancy establishments against fifty-four in 1893-94. ~~and~~ The District Medical and Sanitary ~~and Sanitary~~ officers visited forty villages, and it is stated that funds were provided to carry out some of the suggestions. The trench latrine system recommended by the Sanitary Commissioner ~~is reported to have been~~ selected tried in two villages, but without success. The ten Sanitary associations

The Govt. trusts that the Local boards have satisfied themselves that these Establishments are adequately controlled. Without strict supervision their work is likely to be worthless, & the funds expended in paying them wasted. —

required to be closely watched if full value for the money spent upon them is to be obtained.

associations in the District are reported to have worked fairly well on the whole, but their operations ~~work~~ also

5. General Remarks. The year closed with a balance of Rs 176282. Of this sum however Rs 12,282 appertained to unions and Rs 47,390 to endowed institutions, leaving Rs 86610 or 21 per cent of the receipts available for general purposes. The greater portion of this has however been allotted for ~~sum should have been spent~~ Expenditure in the current year. ~~in improving the roads and the Sanitary Condition of the rural tracts~~.

Except as regards public works and Vaccination, the administration of local affairs ~~show~~ continued to be ~~an improvement on that of the~~ previous year ~~was~~ satisfactory.

The report is adopted.

(Irene Eggleston)

Pre[illegible]

Local

The following rules for the prevention of cholera when its attack is anticipated, as well as for its suppression when present are published for general information and guidance.

1. For the sake of convenience, the whole District excluding Municipal limits will be divided into 34 circles, the head quarters of each circle being a village containing a Local Fund Hospital. Appendix I gives the names of the circles and the villages comprised within each. The Tahsildar or the Deputy Tahsildar of each circle will be considered to be in sanitary charge of it.

2. Generally it will be the duty of every village head man—the Nattamaigar—to attend as far as possible to the sanitation of his village and of all its hamlets, that is to say, he will have to see

i that the village is kept clean.

ii that rubbish heaps and street sweepings are removed daily outside the village.

iii that the sources of drinking water—such as rivers or streams, wells or tanks—are, as far as possible, conserved; that people are not allowed to use the same well or tank or the same part of a river both for washing and drinking; that the people are strictly forbidden to foul drinking water by placing their hands and feet in it.

iv that defœcation is not allowed in village streets and that people go out a good way from the village for the purpose.

v that cow houses &c. are cleaned of dung &c. daily and kept dry; that the cattle are not allowed to stray about the village.

vi that burial and burning of dead bodies are not allowed to take place close to living houses or drinking water sources.

In fact it is his duty to adopt all those measures which will prevent the outbreak of any epidemic in his village (*vide* village officer's manual volume II).

3. As soon as the head of a village has reason to suspect the appearance of a case of cholera, the symptoms of which are given in Appendix II to these instructions, he will adopt the precautions mentioned in para 3 thereof and immediately thereafter send a report of the fact by a messenger to the Hospital Assistant at the head quarters of the sanitary circle and to the Tahsildar or Deputy Tahsildar in charge of the circle. If the latter office is not at the same place the report to the latter will be sent by post service bearing, *vide* Appendix for form.

* will follow.

In fact it is his duty to adopt all those measures which will prevent the outbreak of any epidemic in his village (*vide* village officer's manual volume II).

3. As soon as the head of a village has reason to suspect the appearance of a case of cholera, the symptoms of which are given in Appendix II to these instructions, he will adopt the precautions mentioned in para 3 thereof and immediately thereafter send a report of the fact by a messenger to the Hospital Assistant at the head quarters of the sanitar. circle and to the Tahsildar or Deputy Tahsildar in charge of the circle. If the latter office is not at the same place the report to the latter will be sent by post service bearing, *vide* Appendix for form.

4. On receipt of this report, the Hospital Assistant will immediately proceed to the affected village duly intimating the fact to the District Surgeon by wire if he (the Hospital Assistant) is in a telegraph station, with the necessary medicines and take such immediate steps as are essential. He should not stay there longer than is absolutely necessary, as in most cases clear instructions may be left with village officers in charge as to exactly what should be done with the available staff of servants. For telegraphing to the District Medical and Sanitary Officer or the Presidents of the District or Taluk Boards, Hospital Assistants, Tahsildars and Deputy Tahsildars may make use of the code given in the "Simple Sanitary Rules." (for form of detailed report vide Appendix).

5. The village Munsiff should, as soon as the first case of cholera appears in his village, publish the fact by intimation to the head men of all villages within a distance of 3 miles from his village and warn them of the consequence of people visiting the village. He should further, so long as the epidemic lasts, stop in his village and have all his staff in readiness for duty.

6. In the Sanitary circles of Madura and Palni for which Local Fund Medical subordinates are not available, the village heads will make the report referred to in para 3 *supra* direct to the District Medical and Sanitary Officer, to the Chairman of the Municipalities of Madura and Palni respectively and to the Tahsildars concerned. The District Medical and Sanitary Officer will thereupon at once communicate with the Chairmen and Tahsildars concerned and make immediate arrangements for deputing medical subordinates to visit the affected villages and take the necessary steps for stamping out the disease and report his action to the Boards concerned.

7. The Tahsildar or Deputy Tahsildar on receipt of the village report (vide para 3 supra) will put himself in communication with the Hospital Assistant of the circle and, if he finds it necessary, will thereafter engage in anticipation of sanction of the L. F. Board, a temporary staff of sweepers for such period as may appear necessary for employment in the village during the prevalence of the epidemic. These should be employed on the special duty of cleaning infected ground and removing infected matter from the village. They should *not* be employed to remove long standing rubbish heaps or generally to stir up dirt. They should be provided with covered receptacles and in them should remove all infected matter from houses—such as cholera excreta, infected clothing and bedding, scrapings of floors and walls soiled with cholera excreta &c. to a place outside the village and to the leeward of it to be selected by the medical officer and the Tahsildar or Deputy Tahsildar. In the place, selected all the infected matter removed should be buried 4 or 5 feet deep and covered up and the receptacle should be carefully cleaned before being taken back to the village. The Hospital Assistant will supply instructions in detail for this work and the "Simple Sanitary Rules" should also be studied.

8. The Tahsildar or Deputy Tahsildar should apply to the Taluq Board concerned for a supply of good disinfectants. Burning tar and sulphur spasmodically in the streets is

of little or no use. The interior of dwellings and rubbish heaps require disinfection. The Apothecary or the Hospital Assistant should be invited to make suggestions *which should be carried out.* Any drinking water source objected to should be closed. If necessary, an order under section 144 of the Criminal Procedure Code can be obtained from the Magistrate, or the Taluq Board or Union, if any, can proceed under Section 99 of the Local Board's Act. The staff of sweepers should be under the village Munsiff, but the Tahsildar or Deputy Tahsildar and the medical officer should go as often as possible and see that they are working properly and should send other persons—peons, compounders clerks &c—at odd times, to see if work *is* going on properly.

9. Revenue officers in charge of Taluks and Deputy Tahsildars will understand that owing to the largeness of some of the Sanitary circles it will not be possible for the medical officer to make any long stay at some of the villages far from his head quarters if he is able to go there at all. They will have therefore in many cases to hold him as merely a consultative officer in adopting measures to check the spread of cholera. During outbreaks of cholera, Tahsildars should also direct the Revenue Inspectors to render every assistance in carrying out sanitary arrangements.

10. In case of a severe outbreak the Taluk Boards will be expected to supplement the ordinary supervising staff by the addition of trained Sanitary Inspectors, if possible, under whom gangs of coolies and scavengers will be placed for itineration in the villages of the affected circle and whose duty it will be chiefly to attend to the sanitation of affected villages; this staff will work under, and report its operations to such officers as the Taluk Boards may appoint for the purpose. If the Medical and Sanitary Officer states that in his opinion such a staff is required in any particular locality the Boards must at once provide it so far as their funds allow.

11. It should be remembered that the prevention of cholera is perhaps the most important of all the duties of the District staff and objections that Revenue Inspectors and village servants are taken away from other work to carry messages or supervise sanitary measures will be of no avail.

12. A copy of the rules framed by the District Medical and Sanitary officer, Madura to be observed for the prevention of the spread of cholera is annexed with this, as Appendix II.

13. It is desirable that all Tahsildars, Deputy Tahsildars, Revenue Inspectors and Union Chairmen should make themselves acquainted with the instructions contained in "Simple Sanitary Rules" in order that they may have sufficient elementary knowledge to enable them to assist in stamping out epidemics. For this purpose Taluq Boards should provide themselves with a sufficient number of copies of the book for distribution.

14. The Taluk Boards should always provide in their medical indents for a sufficient quantity of cholera medicines, disinfectants and air-tight covered vessels so that every hospital may have a sufficient stock of the medicines to meet an emergency. For the Sanitary circles of Madura and Palni the necessary stock will be kept by the Tahsildars of Madura and Palni respectively.

15. The Taluk Boards must consider the stamping out of cholera, a first charge on their funds and should not hesitate to divert funds if necessary from less important matters. The saving of life is more important than any L. F. Public work.

16. In Union centres and villages forming part of Unions, the Chairmen of the Panchayats should be able to superintend the measures adopted for putting down cholera, and in such of them as have the ward system of supervision in force, the services of the ward members should be availed of.

17. For the reason that prevention of cholera is the most important duty to be attended to, every officer—both Revenue and Local Fund—should earnestly co-operate with Medical officers in making timely arrangements for the stamping out of the disease.

18. In this connection, the following forms of reports are prescribed for adoption by the several officers concerned.

I By village officers to Tahsildars or Deputy Tahsildars a daily report of cholera in the form given in para 1 of Appendix No. III.

II By Tahsildars or Deputy Tahsildars to the Collector of the District, to the Treasury Deputy Collector and to the Divisional officer.

(a) A daily report in the form above referred to

(b) A weekly report in the form given in para 2 of Appendix III.

III By Hospital Assistants to the District Medical and Sanitary officer and to the Collector of the District

1 report immediately after visiting the affected village or town.

2 Weekly report.

19. Divisional officers will see that the rules are strictly carried out. Any subordinate failing to do his duty, should be dealt with in the most exemplary manner.

(Signed) L. C. MILLER,
Collector and President.

H. 2043/H/9

Measures to be adopted when the epidemic threatens.

3. When the disease has made its appearance in any town or village, the nearest medical man should be informed at once, so that he may render aid and take steps to prevent its spread.

Cholera discharges allowed to remain in dwellings very dangerous.

All motions and vomitted matter from the patient should be received in Chatties and disinfected with carbolic acid or perchloride of mercury solution or Mc'Dougalls' powder. None of the discharges should be allowed to touch the floor as they are very dangerous if allowed to remain. As before a medical officer visits the village such disinfectants as those mentioned will not generally be available fresh lime should be obtained and the fœces

Discharges and cloth-ing. How to dispose of.

covered with it and removed in chatties any charge incurred by the village headman will be paid by the officer in-charge of the circle. A trench should be dug far away from the village and from the drinking water and special toties should be employed to bury the contents of the chatties in them at least twice daily and cover them deeply with earth. All clothing worn by the patient during his illness should be either buried, if not valuable, or specially disinfected by boiling for a couple of hours, first in water mixed with a disinfectant and afterwards in pure water. Only those in attendance on the sick person should be allowed to remain with him and they should not eat or drink in the house.

Further Sanitary measures.

The neighbouring villages should be warned of the proximity of cholera. The floor—if it has been contaminated with cholera discharges, should be dug up, sprinkled with disinfectants and removed and a new one put down. The house should be disinfected by burning sulphur in it with all doors and windows closed for some hours. Finally every nook and corner should be swept and the walls whitewashed. All drains, cesspools and latrines should be thoroughly cleaned and disinfectants freely sprinkled over them. The drinking water and the milk should be boiled before using and food should be well cooked and eaten warm with plenty of salt.

Disposal of the dead

4. In case of death from the disease, the corpse should be covered with a cloth saturated with carbolic acid or perchloride of mercury solution and Mc'Dougalls' powder should be sprinkled on everything it touches. The body should either be burnt or buried deeply in the ground not near any drinking water.

Treatment.

To check diarrhœa early very important.

5. As regards medical treatment, friction of the extremities with turpentine, and a mustard poltice to the abdomen are good. A dose of chlorodyne may be given and it is very important to check diarrhœa by astringents at the earliest possible moment. Stimulants such as brandy are also useful but in very severe cases no treatment will avail so that the only hope lies in prevention.

C. ADAMS,
Surgeon Major,
District Surgeon.

14. The Taluk Boards should always provide in their medical indents for a sufficient quantity of cholera medicines, disinfectants and air-tight covered vessels so that every hospital may have a sufficient stock of the medicines to meet an emergency. For the Sanitary circles of Madura and Palni the necessary stock will be kept by the Tahsildars of Madura and Palni respectively.

15. The Taluk Boards must consider the stamping out of cholera, a first charge on their funds and should not hesitate to divert funds if necessary from less important matters. The saving of life is more important than any L. F. Public work.

16. In Union centres and villages forming part of Unions, the Chairmen of the Panchayats should be able to superintend the measures adopted for putting down cholera, and in such of them as have the ward system of supervision in force, the services of the ward members should be availed of.

Surgeon Major,
District

APPENDIX II.

Cholera—with the Precautions to be observed for its prevention and during its prevalence based on Dr. King's Simple Sanitary Rules.

Cause. Symptoms. Progress.

Cholera is caused by the entrance into the stomach of a poison derived from the fœcal discharges and vomit of persons previously affected. It manifests itself by diarrhœa and vomitting, by cramps, suppression of urine &c. and in many cases produces speedy collapse and death. The discharges from the bowels are the main source of the poison, which may be conveyed in the air or food or drink, and its spread from person to person may thus go on indefinitely. It may be carried from place to place in the clothing of those affected or of those who have had intercourse with persons suffering from the disease.

Favouring agents. Attention to Sanitary matters very necessary.

Dirt is especially favourable to its spread—hence to prevent cholera, cleanliness is of the first importance, not only of the person and clothing, but of the dwellings and surroundings of persons subjected to its influence. Buildings should be swept and cleaned daily and all rubbish and filth regularly removed to fields or to a distance. They should be periodically whitewashed inside and out Private latrines and drains should be thoroughly cleaned twice daily and attention paid to conservancy generally. No fœcal matter should be allowed for a moment in or near human dwellings and cattle should not be allowed on any account to occupy parts of them, but should have separate sheds at a distance. Lastly houses should be so constructed as to allow an abundance of fresh air to the inmates.

How the poison gets into drinking water.

2. The poison may be conveyed to drinking water by the water pots or feet or hands of any one in whose house there are or have been cases of cholera, or it may soak into wells or tanks from drains or cesspools or rubbish heaps in which the cholera discharges have been thrown. When once the poison finds its way into dirty water, it feeds upon the impurities and grows rapidly and all who drink the water run the risk of contracting the disease.

Water contaminated with cholera poison—the most common source of the disease. How to keep the water free from contamination.

This is the most common source of cholera and too much cannot be urged on the necessity of maintaining at all times a pure supply of drinking water. Buckets for drawing water should be kept clean at the wells and people should not be allowed to dip their own dirty pots in them. They should never on any account be permitted to bathe or wash their clothes in or near the tanks, wells or rivers which are used for drinking purposes. Animals should never be allowed near them and people committing nuisances near wells or in the beds of tanks, as they often do, should be severely punished. Heaps of rubbish or manure ought never to be allowed near wells &c. Watchmen as at present employed are utterly useless. The people themselves must not be indifferent, else the drinking water will remain a source of the greatest danger.

Milk may carry the poison and so when in doubt the milk should be boiled before use and the practice of taking rice cold is not a good one. The above measures should be carried out as far a possible at all times. Sweeping the streets and the removal of rubbish and night soil are no doubt good, but they are not by any means enough. So long as the insides of houses as well as the outside, the house drains, private latrines &c. are not kept clean, it will be impossible to prevent cholera.

Form of Medical Subordinates report to the District Surgeon.

1. Describe symptoms in the first attack.	
2. State how the disease was imported, or the cause of the attack?	
3. Briefly describe sanitary condition of the village in the following reports. a. Drinking water sources b. Houses c. Streets d. Cow houses e. Exposure to damp f. Any other surroundings which help the reception and the spread of cholera	
4. What is the strength of the village establishment?	
5. Is the above establishment sufficient to supervise sanitary precautions taken? or is addition required? If so what addition is proposed?	
6. Have warnings to other villages been sent?	
7. Any proposals and suggestions.

Second Language Tamil	26	8	-	8	-	-	-	-	

In decrease in Geography, Singalese and Tamil may be partly due to the transfer of the Pandatarippu School to the Jaffna Circuit. The decrease in Primary Schools is due mainly to decline in the Jaffna Division, Batticaloa, Timmaccaly, Pesalai, Tirukkovil and Point Pedro. The number of French pupils is due to the higher minimum fixed for French grant in the New Code.

Statement No. I relating to General Statistics in the Madura District Board for 1894-95

		1893-94			1894-95			Remarks.
		Number of Schools.	Number of pupils on 31st March.		Number of Schools.	Number of pupils on 31st March.		
			Boys.	Girls.		Boys.	Girls.	
Colleges	Government							(a) The Pamban S.P.G. School got reduced in Standard and so transferred from this section. The Rajahs High School, Sivaganga and the American Mission School Aruppukottai which were in the Unaided Section in 1893-94 ranked as aided and so the increase of a School.
	Board or Municipal							
	Aided from Provincial Funds							
	Aided from Local or Municipal Funds							
	Unaided and Indigenous							
Secondary Schools	Government							(b) The two schools referred to in (a) got removed from the Unaided section. So also, the Lower Secondary Department of the Pasumalai School which was amalgamated with the Lower Secondary department under same management.
	Board or Municipal							
	Aided from Provincial Funds	(a) 7	550	13	(a) 8	805	16	
	Aided from Local or Municipal Funds							
	Unaided and Indigenous	(b) 8	428	-	(b) 7	199	.	
Primary Schools	Government							A Sanskrit school in Sholamandan and an A.V. School in Kattamanolayanam came to the list newly. Thus the decrease of one school.
	Board or Municipal	139	4724	19	(c) 145	5046	209	
	Aided from Provincial Funds	10	371	119	23	885	129	
	Aided from Local or Municipal Funds	478	16491	631	469 (d)	15768	591	
	Unaided and Indigenous	614	13461	29	677	15196	287	(c). 14 schools were newly opened (7 in Ramnad, 4 in Sivaganga, 2 in Madura and one in Dindigul) and 8 old schools got closed (4 in Ramnad, one in each of Dindigul and Periyakulam and two in Madura).
Training Schools	Government							
	Board or Municipal	1	48	.	1	45	.	
	Aided from Provincial Funds	1	26	.	1	34	.	
	Aided from Local or Municipal Funds							
	Unaided and Indigenous							(d) Aided schools increased on the whole by 4. The increase would have been satisfactory if the Madura and Dindigul Ranges had not gone down. Schools in Sivaganga and Ramnad Zamindaris increased by 24, while in the Taluqs of Madura and Dindigul Ranges, they decreased by 18 and 2 respectively. It was in the Taluqs of Madura and Palani especially that the decrease was considerable. The other variations call for no remarks.
Sessional Schools	Government							
	Board or Municipal							
	Aided from Provincial Funds							
	Aided from Local or Municipal Funds							
	Unaided and Indigenous							
Industrial Schools	Government							On the whole, Schools increased by 73 and pupils by 1887.
	Board or Municipal	.	130	.	.	160	.	
	Aided from Provincial Funds	1	21		1	22	.	
	Aided from Local or Municipal Funds							
	Unaided and Indigenous							

Note.—1. *Where an institution is aided from Provincial or Local (or Municipal) Funds, it should be shown against Pr... or Local (or Municipal) according as it has received a larger grant from Provincial or Local (or Municipal) Funds.*

2. *No comments should be made except as notes entered in the column of remarks.*

3. *This statement should be submitted in time to reach the Presidents of Local Boards or the Chairmen of Mu... Councils concerned before the 1st May.*
