In the draft notification, submitted by the Collector, the eastern and western boundaries of the municipality are not clearly defined. Lines drawn across the Tungabhadra should be substituted for the river itself & the exact spots where these lines terminate should be stated. In some cases, the boundary line is indefinite, as it passes through certain survey numbers instead of being within them. The wording of the notification also appears to be capable of improvement. The form in Notification No. 548 at page 177 of the Fort St. George Gazette, Part I-A dated 20th August 1895, might with advantage be adopted.
