No. 2022 L., 23rd October 1895.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From R. B. CLEGG, Esq., President, District Board, Tanjore, to the Chief Secretary to Government, dated Vallam, 13th July 1895, No. 430-D.B.

I have the honour to report on the administration of local funds in the Tanjore district for the official year 1894–95 and to submit as per enclosed list the prescribed statements.

2. The report was passed by the district board at a meeting held on the 13th instant. A copy of its resolution accompanies.

I.—GENERAL

3. There was no change in the number, constitution or territorial jurisdiction of the local boards and union panchayats in the district.

4. *District Board.*—On the 31st March last, the district board had its full sanctioned maximum strength of 40 members, of whom five held their seats ex-officio, fifteen (four officials and eleven non-officials) by nomination and twenty (four officials and sixteen non-officials) by election from the taluk boards. There was one vacancy at the close of the preceding year and seven more occurred during the year, all of them were filled up within the year as noted in the remarks column of statement XVI.

Tanjore	..	..	..	3
Kumbakónam	..	..	..	7
Negapatam	..	..	..	5
Mannárgudi	..	..	..	3
Pattukkóttai	..	..	..	2
		Total	..	20

Fourteen meetings were held, at all of which business was transacted. The average attendance at each meeting was 21·14 (6·5 officials and 14·64 non-officials), or 52·85 per cent. of the actual strength against 18·55 (4·92 officials and 13·63 non-officials) or 48·82 per cent. of the actual strength in the preceding year. There was a satisfactory improvement in the attendance of both classes of members.

5. *Taluk Boards.*—The total number of members on the five taluk boards in the district on the last day of the year was 74 against the sanctioned maximum strength of 75, fifteen for each of the five boards. The one vacancy on that date was due to the resignation of M.R.Ry. Krishnaswami Pannikondar Avargal, a member of the Pattukkóttai Taluk Board. It has been since filled up. Of the 74 members twenty were officials and 54 non-officials. There were three vacancies on the taluk boards on the 31st March 1894. There occurred 22 more during the year as noted in statement XVI and with the exception of the one above referred to all were filled up within the year. Three members were re-appointed by the President acting under the power delegated in G.O , No. 889 L, dated 17th May 1894.

Excluding the one meeting of the Mannárgudi Taluk Board, dissolved for want of a quorum, the total number of meetings held by all the taluk boards was 67 against 64 in 1893–94. The largest number of meetings (sixteen) was held by Negapatam and the smallest number (twelve) by the Pattukkóttai Taluk Board. The average attendence at each meeting was 8·12 (1·93 officials and 6·19 non-officials) or 54·86 per cent. of the average actual strength against 7·93 (1·44 officials and 6·49 non-officials) or 55·07 per cent. in 1893–94. The attendance of both officials and non-officials in the Tanjore, Negapatam and Pattukkóttai Taluk Boards was good, while the same in Kumbakónam

and Mannárgudi was not satisfactory, being less than half the respective strength of the boards. The attention of the Presidents concerned will be drawn to this in view to improve matters during the current year. The marginally-named four members attended all the meetings of their respective taluk boards.

Pattukkóttai Board.

1. M.R.Ry. Thiagaraja Pillai Avargal.

Tanjore Board.

2. M.R.Ry. Thayuman Chettiyar Avargal.
3. ,, Rangaswami Nayudu Garu.
4. Chinna Badsha Ravuthar Avargal.

6. *Union Panchayats.*—The panchayats of the eighteen unions in the district had, on the 31st March 1895, an aggregate strength of 257 members against the sanctioned maximum of 264, seven vacancies having occurred about the close of the year and been since filled up. Of the 257 members mentioned above, 45 were ex-officio, being village headmen, 25 "other officials" and 187 non-officials. Excluding nine meetings in which a quorum was not secured, the eighteen panchayats held altogether 252 meetings or fourteen, on an average, against 249 in the previous year. The average attendance at each meeting was 8·01 (2·23 officials and 5·78 non-officials) or 56 per cent. of the average actual strength of 14·3. All the panchayats met not less than twelve times for the transaction of business as required by the Act. Tiruvadamarudúr union panchayat stands first in this respect, having held twenty meetings, and Vallam and Shiyali come next with seventeen meetings each.

7. The unions at Tiruvádi, Tiruválúr and Tirutturaippúndi alone were managed by non-official Chairmen; Swamimalai was managed by the village munsif; Nídámangalam and Védáranniyam by Deputy Tahsildars; Muttupet and Adirámpatnam by the Sea Customs Superintendents and Melattur by the Sub-Registrar. All the other unions were managed by the local medical subordinates. The boundaries of certain unions need revision, but the law which requires them to consist of whole revenue villages stands in the way. The administration of the panchayats within the local areas of their respective unions is reported to have been generally satisfactory. The ward system has been in force in fifteen unions as in the previous year and is reported to have worked fairly well in all the unions where it has been adopted, except in Tirutturaippúndi under the Mannárgudi Taluk Board. The President of this board is of opinion that both in this and the other unions under his control the system does not work well, as the members are not capable of working independently. An amount of intelligence and interest in local affairs is necessary if each member is to have the supervision of a defined area, and I fancy his remarks will apply with more or less force to all the unions. The schools in the marginally-noted unions have also been managed by their respective panchayats.

Closing balance	1,28,573	68,973	891	1,98,437	1,71,155	95,780	11,546	2,78,481

Note.—Variations between the figures given in this statement and those in statements I-A and I-B are due to the adoption of round figures.

The year opened with a balance of Rs. 1,98,437, of which Rs. 73,537 belongs to the Railway Guarantee Fund and Rs. 85,502 to the Endowment fund. The current receipts amount to Rs. 10,45,196 (including Rs. 3,01,429 Railway Guarantee fund and Rs. 2,92,610 Endowment fund) against Rs. 10,52,308 in 1893–94, and the charges to Rs. 9,65,152 (including Rs. 3,19,964 Railway Guarantee fund and Rupees 2,55,478 Endowment fund) against Rs. 11,01,744. The year closed with a balance of Rs. 2,78,481 or 26·6 per cent. of the current receipts. The current receipts show a decrease of Rs. 7,112. This is due not to reduction of income under either of the marginally-noted heads of receipts, but to the credit of a considerably less amount under investments, viz., Rs. 1,21,000 against Rs. 3,20,000 in 1893–94. The large balance is chiefly due to short expenditure under grants I and III. Of the aforesaid balance, Rs. 1,22,634 appertains to endowment funds and Rs. 55,003 to the Railway Guarantee fund.

Land-cess and choultry rents being Rs. 1,11,256 and Rs. 43,986 in excess of previous year's figures.

II.—Receipts.

9. (*a*) *Cess on Land.*—As usual this cess was levied at the rate of one anna in the rupee of the land assessment. One-fourth of the income thus realized was set apart for the Railway Guarantee fund, the remainder being divided in equal shares by the district and taluk boards. The total collections amounted to Rs. 4,69,627 against Rs. 3,58,371 in 1893–94, the increase being chiefly due to the introduction of the new settlement rates of land assessment.

10. (*b*) *Tolls.*—There were as in the preceding year five toll-gates maintained on local fund roads in the district, and tolls were collected at all of them at half the scheduled rates. The gates at Búdalúr, Nídámangalam and Koradáchéri were leased out in public auction for a total sum of Rs. 6,890, while the two gates at Tiruválúr were worked departmentally for want of bidders. The above two gates are located on road No. 35, which runs parallel to the Máyavaram-Muttupet Railway. As during the year, in consequence of diminution of traffic, it has been maintained merely as an earth road, no one came forward to purchase. The collections from the five gates amounted to Rs. 10,303 against Rs. 13,357 in 1893–94 and the contribution by the municipalities to Rs. 27,666 against Rs. 29,353 in 1893–94. Excluding charges for establishment, &c., the net income from tolls amounted to Rs. 37,387 and covered 22·4 per cent. of the outlay on roads against 21·2 per cent. in 1893–94.

11. (*c*) *House-tax.*—This tax was levied in all the unions in the district at the maximum rates provided in the Act, but its collection in certain villages of the Tranquebar union was deferred by the Kumbakónam Taluk Board, under the circumstances reported in my letter, No. 365-D.B., dated 14th June 1895. The collections amounted to Rs. 17,443 against Rs. 15,822 in 1893–94, the increase being due to the revision of the tax in certain unions and the collection of arrears. With the view of collecting all the arrears in the Védáranniyam union, the bill-collector was paid a commission at one anna in the rupee collected instead of a fixed salary, and this has had the desired effect. The collections were satisfactory except in Tranquebar, which had an arrear of Rs. 90 at the end of the year. The total number of houses in the unions according to the census returns of 1891 was 28,633 and the number actually assessed to the tax was 30,995. In Melattur, Valangiman, Kudavásal, Tranquebar and Adirámpatnam, the number of houses assessed to the tax was less than the number as per census of 1891. In Melattur this was due to the exemption sanctioned in G.O., Mis. No. 2152 L., dated 29th September 1893, and in Tranquebar to the circumstances mentioned *supra*. The Presidents concerned have not explained the difference observed in the remaining three unions and their attention will be called to it. The average incidence of this tax per house was As. 8–9 against As. 8–3 in 1893–94, and ranged from As. 11–11 in Tiruválúr to As. 6–10 in Pattukkóttai union. Coercive measures were adopted in all the unions except those under the

1. Vallam.
2. Melattur.
3. Valangiman.
4. Tranquebar.
5. Swamimalai.
6. Shiyali.
7. Tiruvadamarudúr.
8. Tiruválúr.
9. Nannilam.
10. Kudavásal.

Mannárgudi Taluk Board, Tiruvádi, Aiyyampet and Swamimalai. Property was distrained in 99 cases to the extent of Rs. 41–7–0, but sold only in two cases for the recovery of Rs. 4–7–0. The collections were 93·4 per cent. of the demand.

12. The incidence of taxation per head of population as per census of 1891, calculated on the income from land-cess, tolls and house-tax was As. 4–2 including tolls, and As. 3–10 excluding them, the corresponding figures for 1893–94 being As. 3–3 and As. 2–11. This increase is due to enhanced receipts under land-cess.

13. *Education*—(*b*) *Contributions*, (3) *From Private Individuals.*—The sum of Rs. 676 realized under this head is a part of the contribution promised by the ryots of Tirutturaippúndi towards the cost of constructing a school-house at that place.

(*c*) *Sale-proceeds of Books.*—During the year the depôt maintained by the board at Tanjore for the sale of school books and admission and attendance registers for village schools was abolished as they could be bought more easily and cheaply in the market. The increase in receipts under this head is due to sale by auction of the surplus stock.

14. (*a*) *Interest on Government Securities.*—A sum of Rs. 45,506 was realized as interest on the investments in Government securities in favour of the Railway Guarantee fund (Rs. 5,42,000), Medical School, Tanjore (Rs. 1,00,100), Rajah's chattrams (Rs. 1,22,200), and chattrams and hospitals under taluk boards (Rupees 2,49,400). The decrease, as compared with the actuals of Rs. 46,831 in 1893–94, is due to the conversion of 4 per cent. into $3\frac{1}{2}$ per cent. It was anticipated in the budget that Rs. 2,00,000 would be withdrawn from the investments on behalf of the Railway Guarantee fund for payment to Government in July 1894, and credit was therefore not taken for interest on this account; but the withdrawal was not effected till the close of the year, and the amount actually withdrawn was only Rs. 1,21,000. This chiefly accounts for the increase as compared with the budget figure Rs. 37,500.

	RS.
Railway Guarantee fund	24,331
Endowment fund, district board ..	9,979
Taluk boards	11,196
Total ..	45,506

15. (*b*) *Choultry rents.*—These were derived from the lands forming chattram endowments. The receipts under this head amounted to Rs. 1,96,590 against Rupees 1,52,604 in 1893–94 and the budget estimate Rs. 1,65,850. The increase is chiefly due to the collection of arrears. It is creditable to the Deputy Collectors of Tanjore and Pattukkóttai who supervise the work of the chattram establishments.

16. (*c*) *Market rents.*—There were five sanctioned markets at the beginning of the year. The market at Peruvalandan, referred to in paragraph 17 of the last year's report, has since been sanctioned in G.O., Mis. No. 2181 L., dated 26th October 1894. The Mannárgudi Taluk Board opened a new market at Vellappallam in Tirutturaippúndi taluk during the year—*vide* G.O., Mis. No. 805 L., dated 6th May 1895. The new market at Pattukkóttai sanctioned in G.O., No. 195 L., dated 1st February 1894, was abolished as it could not compete successfully with the district board market at the same place. There were thus six markets open at the close of the year, and the fees realized from them amounted to Rs. 707 against the budget estimate of Rs. 600.

17. (*d*) *Bungalow fees.*—There were nine travellers' bungalows at the close of the preceding year, four of which were attached to chattrams under the district board, for the use of European and Eurasian travellers. The Negapatam Taluk Board opened a new bungalow at Nannilam from 1st April 1894, so that there were ten bungalows at the close of the year. The travellers' bungalow at Tranquebar fell down and the taluk board disposed of the materials. There being so many vacant bungalows in this decayed town a travellers' bungalow is at present unnecessary. Fees were levied in the taluk board bungalows and the total amount realized was Rs. 283 against Rs. 353 in 1893–94. The decrease was due chiefly to the absence of the special circumstances noticed in paragraph 18 of the last report. All the bungalows were in good condition and fairly furnished.

18. (*e*) *Fees and Fines.*—A total amount of Rs. 2,774 was realized under all heads of "Fees and Fines" against Rs. 2,612 in 1893–94. The net increase is chiefly

due to an increase under nuisance fines due to the strict enforcement of the Town Nuisance Act in all the unions under the Kumbakónam taluk board except Valangiman, and a decrease under pandal fees due to the Tiruválúr festival falling in April, instead of March, as in former years.

19. (*f*) *Ferry Rents.*—The receipts from ferries, of which there were 64 as in 1893–94, amounted to Rs. 7,146 against Rs. 7,802 in that year, the decrease being attributed to dull competition at the sales. The income from ferries on district board roads are credited to the District Board funds.

20. (*h*) *Fishery Rents.*—The amount realized during the year amounted to Rupees 18,220 against Rs. 18,538 in 1893–94 and the budget estimate of Rs. 15,430. The income from this source has decreased as pointed out in last year's report owing to the prohibition of putting up stakes across the rivers and channels. The increase over the budget estimate is due to the collection of arrears.

21. (*i*) *Avenues.*—The receipts under this head amounted to Rs. 5,681 against Rs. 7,147 in 1893–94 and the budget estimate of Rs. 6,660. The decrease occurs chiefly under the district board avenues. The engineer explains that the number of trees removed and sold was less than that in the previous year, probably because there was no damage done to avenue trees as in that year by floods; loppings were restricted owing to want of funds and fruit trees did not bear well.

22. *Excess value realized by the sale of Government Promissory Notes.*—The sum of Rs. 7,221 shown under this head is the premium realized by the sale of Government Promissory Notes for Rs. 1,21,000 referred to in paragraph 14 *supra*.

23. *Contribution from Provincial Funds*—(*a*) *Education.*—A sum of Rs. 6,009 was received as Provincial grants to salary result schools under the local boards against the budget estimate of Rs. 11,580. The decrease is due (1) to short earnings by some of the salary results schools and (2) to the late receipt of bills in the case of others, so that they could not be cashed within the year.

(*d*) *Choultries.*—The decrease as compared with the budget estimate is due to non-adjustment of the contributions in full within the year.

Máyavaram-Muttupet Railway.—The sum of Rs. 31,471 entered under this head represents half the net profits of the railway for the nine months, from April to 31st December 1894, and credited to the district board as advised in G.O., Mis., No. 1020 L., dated 17th June 1895. The total outlay up to the 30th June 1894, according to the Consulting Engineer, is Rs. 22,62,841, and of this the district board provides one-half. The railway is at this rate paying a profit of rather more than $3\frac{1}{2}$ per cent. on the outlay, and the district board may congratulate itself on the success of its enterprise.

24. *Allotment from Taluk to District Funds, Rs.* 2,020.—This represents the recoveries made from taluk boards on account of the bonuses credited to the Provident fund on behalf of their servants from 1890 to 1893.

Allotment from District to Taluk Funds, Rs. 3,323.—This represents the amounts transferred to taluk funds (1) in order to supplement their deficient receipts and (2) towards defraying half the cost of forming feeder roads to the Máyavaram-Muttupet Railway.

25. *Investments in Government Securities.*—A sum of Rs. 1,21,000 was withdrawn from the investment on behalf of the Railway Guarantee fund to pay off to Government a portion of the balance of the expenditure on account of the Máyavaram-Muttupet Railway as already stated.

26. *Provident Fund.*—The receipts amounted to Rs. 5,418 and include the bonus payable by the district board under the rules.

III.—EXPENDITURE.

27. The total expenditure during the year amounted to Rs. 9,65,152 against Rs. 11,01,744 in 1893–94 and the total allotment of Rs. 11,49,348. The decrease as compared with the actuals of 1893–94 is mainly due to the smaller amount of contribution paid during the year to Provincial funds as advised by the Accountant-General

in his letter to the Collector of Tanjore, No. 2052, dated 20th July 1894, on account of the Máyavaram-Muttupet Railway. The decrease as compared with the allotment is due to the foregoing—to short expenditure under "Miscellaneous Public Improvements" (Grant I) and feeding charges in chattrams (Grant III) and to other causes explained hereafter.

28. *Grant I, Public Works.*—The total outlay on works, excluding the contribution towards the Máyavaram-Muttupet Railway, amounted to Rs. 2,48,780 against Rs. 2,58,710 in 1893–94, the difference being due to special expenditure incurred in 1893–94 on account of floods. The expenditure was equivalent to 23·8 per cent. of the year's receipts and 25·8 per cent. of the total charges of the year. It was incurred as particularized below:—

	RS.
By the Local Fund Engineering Agency	2,32,275
Other Agency	3,427
By the Public Works Department	13,078
Total ..	2,48,780

29. (*a*) *New Works*—(1) *Communications.*—The works executed consisted chiefly of constructing tunnels, bridges, and road dams and metalling roads and are shown in statement III. The total expenditure was Rs. 23,380 against the total allotment of Rs. 26,963. The short outlay is chiefly due to (1) non-completion of masonry works on road number 24 in the Pattukkóttai taluk; (2) the non-utilization of the provision for improving the Lakshmangudi village road by the Public Works Department as plan and estimate were not ready; (3) to the postponement of forming a deviation proposed for road number 25 and (4) to full payment for certain works completed towards the close of the year being deferred pending final check-measurement by the Engineer.

(2) *Civil Buildings.*—The expenditure under this head amounted to Rs. 8,238 against a total allotment of Rs. 11,668. The more important buildings provided with allotments in the year were (1) construction of a chattram at Arantangi; (2) constructing additional rooms in the Board's High school, Tiruválúr; (3) constructing the Jubilee chattram at Nannilam; (4) Rebuilding the hospital ward at Pattukkóttai washed away by the floods of 1891; and (5) constructing an additional chattram building at Kasankulam. No. 1 is still in progress and Rs. 865 out of the allotment was not therefore paid within the year; Nos. 2 and 3 were completed; No. 4 for which Rs. 500 were provided in the budget was given up as unnecessary; and on No. 5 only Rs. 701 were spent against Rs. 1,900 allotted, owing to failure of the contractor to complete the work within the stipulated time. The provision made in the budget for school buildings was not fully utilized owing partly to delay on the part of the Educational officers to submit proposals, and partly to the difficulty in procuring suitable sites. These circumstances chiefly account for the short expenditure.

(3) *Miscellaneous Public Improvements.*—The total allotments amounted to Rs. 12,559, of which Rs. 9,220 were actually spent. An allotment of Rs. 2,000 was provided in the budget for constructing a new tank at Alathur in the Pattukkóttai taluk for irrigating chattram lands. As the soil in the ayacut of the proposed tank was subsequently found to be calcareous and unsuitable for cultivation, the work was abandoned. The improvements proposed in the budget for the new market at Pattukkóttai were not carried out, as the market was closed—*vide* paragraph 16 *supra*. These facts chiefly account for the short expenditure under this head.

30. (*b*) *Repairs—Communications.*—The expenditure amounted to Rs. 1,64,555 against Rs. 1,78,162 in 1893–94 and a total allotment of Rs. 1,72,044; 95·6 per cent. of the sanctioned allotment was thus spent. The decrease as compared with the actuals of 1893–94 was mainly due to the absence of special expenditure necessitated in that year by unusual floods. Of the total expenditure noted above, Rs. 1,51,477 was spent by the Local Fund Engineering establishment and Rs. 13,078 by the Public Works Department. The proportion of the former to the total allotment was 95·9 per cent. against 94·15 per cent. in 1893–94. The percentage would have been

higher if the new branch railway line to the gravel quarries near Vallam had been opened in April 1894 as was anticipated instead of in September 1894. The working estimates of the year were framed with reference to the cost of carriage by railway instead of by road to the Tanjore Railway station and the consequence was that the delivery of materials was delayed till the end of the official year. There was also a saving of over Rs. 1,000 in the allotment provided for the maintenance of the Védárannivam canal which is under the charge of the Public Works Department. Statement IV-A shows the mileage and cost of roads in the district. There were 1,856¾ miles of road in charge of the district and taluk boards at the commencement of the year; of this length 1,638⅞ miles were maintained against 1,660⅜ miles in 1893–94, the difference being due to the Mannárgudi taluk board having made no provision, for want of funds, for the village roads noted at foot of statement IV-A. Excluding the charges incurred on bridges, culverts, &c., the average cost of maintaining each mile of road in charge of the Local Fund Engineer was Rs. 138 for the district board, Rs. 72 for the taluk boards and Rs. 46 for village roads, against Rs. 145, 71 and 45 respectively in 1893–94; and the average for each mile of the roads in charge of the Public Works Department was Rs. 65 for the taluk board and Rs. 46 for the village roads against Rs. 63 and Rs. 45 respectively in the previous year. The decrease in the cost of the district board roads in charge of the Local Fund Engineer is due to reduction of allotments for portions of roads Nos. 14, 35, and 55 in consequence of the opening of the Máyavaram-Muttupet Railway. These roads run parallel to the railway line. The total outlay on village roads was Rs. 24,074 or 14·5 per cent. of the total outlay on roads (Rs. 1,66,459) against 13·3 per cent. in 1893–94.

	MLS.
Local Fund Engineer	1,490⅜
Public Works Department	148½

	RS.
New roads by Local Fund Department	8,030
Repairs by Local Fund Department..	15,169
Do. by Public Works Department.	875
Total ..	24,074

31. *Condition of Roads.*—Owing to the delay in the construction of the railway line referred to in the foregoing paragraph, roads Nos. 14, 15 and 39 in the Kumbakónam taluk, No. 15 in the Mannárgudi taluk and Nos. 39 and 1 east in the Tanjore taluk were not repaired as the road metal could not be delivered in proper time. Consequently they were in bad order. The Engineer however promises to make up for these shortcomings in the present year and reports that the work is in rapid progress. With these exceptions the roads of the district are in very fair order.

32. (2) *Civil Buildings.*—The expenditure on the maintenance of the buildings under the district and taluk boards amounted to Rs. 12,358 against the sanctioned allotment of Rs. 13,801, the short outlay being chiefly due to the following causes: (1) the allotment provided by the Tanjore Taluk Board for the Tiruvádi dispensary building was not utilized in view of the present building being abandoned and a new building constructed and (2) all works appertaining to chattrams costing Rs. 100 and under, which had hitherto been entrusted for execution to the chattram officials, were transferred to the Engineer in November last in accordance with a resolution of the district board. A large number of estimates had to be newly prepared or revised by the Engineer after that date and the completion of these petty works was consequently delayed. The most important work executed under this head was the completion of the repairs to the Raja Mirasidar's hospital building at Tanjore at a cost of Rs. 3,199.

33. (3) *Miscellaneous Public Improvements.*—The total expenditure under this head was Rs. 31,030 against Rs. 65,770 or only 47·2 per cent. of the sanctioned allotment. This large difference between the estimate and actual expenditure is chiefly due to the following causes: (1) The provision of Rs. 20,000 made in the budget for the purchase of demarcation stones in connection with the proposed survey of the chattram villages referred to in G.O., Mis. No. 407 L., dated 6th March 1895, remained unutilized pending enquiries regarding the cost and carriage of stones and the completion of arrangements in communication with the Superintendent of the Madras Revenue Survey. It is hoped that the Survey Department will be able to commence this work ere long; (2) eight irrigation works provided for in the Pattukkóttai taluk were

not completed owing to failure on the part of the contractors who have considerable difficulty in procuring labour in that taluk; (3) delay caused in the execution of works costing Rs. 100 and under transferred to the Engineering Department late in the year as stated above; (4) certain allotments made by the Kumbakónam Taluk Board were not utilized as the contributions promised by private individuals were not paid up and repairs to certain tanks and wells proposed had to be abandoned owing to their being full of water; (5) three works under the Tanjore Taluk Board and four under the Negapatam Taluk Board were not executed owing to contractors not being available at the proper time; and (6) the provision for the Survey establishments engaged in measuring and demarcating streets in unions made by the Kumbakónam and Negapatam Taluk Boards was not fully utilized. An establishment consisting of one surveyor on Rs. 30 and five lascars—one on Rs. 6 and four on Rs. 5 each—was entertained by the Kumbakónam board in 1893–94. The services of two lascars were, however, dispensed with in 1894–95 as being superfluous. The establishment under the Negapatam Taluk Board consisted of one surveyor on Rs. 30 and two peons on Rs. 5. The measurement of the streets and roads in all the unions under the Kumbakónam Taluk Board and of those in the Tiruválúr union under the Negapatam Taluk Board has been completed. The surveyor under the Kumbakónam Taluk Board also completed house measurements, prepared plans and planted stones completely in the Tiruvadamarudúr union and partly in Swamimalai union. The work has not been as rapid as it ought to have been, and the two boards have since arranged to place the establishment, as it should be, under the immediate supervision of the Local Fund engineer.

Avenues.—Out of 1,856¾ miles of roads, 1,363⅛ miles have been provided with avenues. The number of trees of all descriptions at the beginning of the year was 277,415 including 15,547 on 133⅝ miles of road in charge of the Public Works Department. The number of trees that were planted during the year was 16,392 and the number that perished, 2,243. There were thus 291,564 trees and young plants at the close of the year. The total expenditure on the planting and upkeep of avenues was Rs. 9,220 against Rs. 8,991 in 1893–94. The general condition of avenues is reported to be good.

34. *Local Fund Engineering Establishment.*—The strength of the establishment remained the same as in the year previous, but the pay of the Engineer was increased from Rs. 650 to Rs. 700 from 1st April 1894 as per G.O., Mis. No. 1301 L., dated 17th July 1894. The cost of the Local Fund Engineer's establishment including contingencies amounted to Rs. 36,369 against the budget estimate of Rs. 38,510 and was 15·7 per cent. of the total outlay on works by that department against 14·47 per cent. in 1893–94.

35. *Contributions*—(1) *To Provincial Funds.*—The amount of Rs. 3,19,964 shown under this head is the contribution paid during the year to Government towards the cost of contribution of the Máyavaram-Muttupet Railway.

(2) *To Municipalities.*—The sum of Rs. 909 shown under this head is the moiety of the receipts of the Kaduviar ferry paid to the Negapatam Municipality—*vide* G.O., Mis. No. 2553 L., dated 14th October 1891.

36. *Grant II, Education.*—Excluding the amount spent on school buildings shown in statement IV and debited to Grant I, the total expenditure on education was Rs. 69,970 against Rs. 63,941 in 1893–94 and the allotment of Rs. 73,464.

37. *Inspection.*—There were 11 Inspecting schoolmasters as in 1893–94. The statistics relating to the work turned out by this staff are given in Educational statement No. V, from which it will be seen that 1,152 villages were visited by them, 621 aided and 367 unaided schools were examined, 92 new schools were started and 125 existing pial schools were brought under inspection. The work of these officers was fair, except that of Raghupathi Rao, who has not improved, notwithstanding his transfer to Pattukkóttai and thence to Mannárgudi. The cost of this establishment amounted to Rs. 5,943 against Rs. 5,506 in 1893–94, the increase being mainly due to the revision of the scale of pay sanctioned in G.O., No. 589 L., dated 28th March 1894.

38. (*b*) *Normal Schools* (Nil)—*Sessional Schools.*—There were three schools of this class maintained for about three months at three different centres—Pattukkóttai, Shiyali and Tirutturaippúndi. The total charges were Rs. 871 against Rs. 634 in 1893–94. The increase is chiefly due to the payment of Rs. 52 incurred during the preceding year on account of pay and stipends, &c., and to a larger number of teachers admitted for training. The total number of teachers that attended these schools was 47, * of whom 37 passed the prescribed examination. The cost of training each teacher was Rs. 17–6–10 † against Rupees 35 in 1893–94. This shows considerable improvement as compared with last year's results.

* Includes three free students.

† Exclusive of arrear payments.

39. *Upper Secondary Schools.*—There were two schools on the salary system as in 1893–94, viz., the High school at Tiruválúr and the Sanscrit school at Tiruvádi. The Tiruválúr school had on its rolls 250 pupils on the 31st March last against 221 on the corresponding date of the previous year and the average attendance was 186. The increase in the strength appears both in the Upper and the Lower departments and is attributed generally to the good results of the school, especially in 1893–94, which made the school more attractive. Twenty-one students appeared for the Matriculation examination, of whom 6 passed; and 27 appeared for the Lower Secondary examination, of whom 17 passed, the corresponding figures for 1893–94 being 14 and 9 and 17 and 8, respectively. The number of passes in the Matriculation declined, while the results in the Lower Secondary examination compare favourably with those of 1893–94. The net cost to Local funds of the Upper Secondary department of this school was Rs. 239, and the average cost of educating a pupil in it, Rs. 4–12–2. The Lower Secondary department was worked at a profit of Rs. 1,156 to the board.

(2) The Sanscrit school at Tiruvádi is maintained from the endowment fund of the Kaliyanamahal chattram under the control of the Tanjore taluk board and has been intended from the Rajah's time for poor boys who are fed in the chattram and taught Sanscrit in the school free of charge. On the 31st March last it had a strength of 99 boys against 87 at the close of the previous year. As usual the school was examined by a pandit from the Town High school, Kumbakónam. Sanction has since been accorded by the Director of Public Instruction in January 1895 to the school being examined in future by the Sanscrit professor of the Presidency College. The cost of this institution was Rs. 1,989 against Rs. 2,003 in 1893–94; and the average cost of educating each pupil, Rs. 25–2–10.

(3) The Middle school at Pattukkóttai was proposed by the Educational officers to be raised to the grade of a High school. The proposal is pending consideration and in the meantime a fourth form has been opened in anticipation of sanction. The school is therefore shown under Upper Secondary schools in statement IX, but pending sanction to the proposal it has not been considered as such in this report.

40. *Lower Secondary Schools, Salary System* (Nil)—*Salary-results System.*—There were 6 schools of this kind as in the previous year including the school at Pattukkóttai. The Nidámangalam girls' school which was an elementary school in 1893–94 was raised to the grade of a Lower Secondary school making the number of these schools 7 at the end of the year. Three of them—Rajamadam, Orattanadu and Nidámangalam—were maintained out of chattram funds and boarders as well as others were taught in them. There were 215 boys and 3 girls in these Lower Secondary schools and departments on the 31st March last with an average attendance of 167 boys and 1 girl. The total number of students sent up for the Lower Secondary examination from them was 45, of whom 22 passed. Forty-nine pupils were presented for the sixth standard and 68 for the fifth, and the number that passed was 35 and 58, respectively. No girl was sent up for examination in any of these standards. The net cost to Local funds by maintaining these schools and departments was Rs. 1,675, and the average cost of educating each pupil was Rs. 9–15–6 against Rs. 6–15–1 in 1893–94—the high average having been caused by heavy expenditure in Tirutturaippúndi and Nidámangalam schools. In Tirutturaippúndi gymnastic apparatus and furniture were purchased.

41. *Primary Schools.*—There were 130 primary schools at the commencement of the year, of which ten were closed in the course of the year and eighteen new schools were opened, so that there were 138 schools or an increase of eight at the close of the year. The figure given above includes the girls' school at Nannilam taken up by the Negapatam taluk board, in the circumstances explained in paragraph 35 of the covering letter to budget for 1894–95. The 138 schools and the primary departments of the five secondary schools shown in statement IX had a total strength of 6,072 boys and 717 girls, and the average attendance was 5,062 boys and 418 girls, the corresponding figures for 1893–94 being 5,498 boys and 761 girls, and a total average attendance of 5,122. The net cost to Local funds of maintaining these schools and departments was Rs. 26,111 and the average cost per pupil Rs. 4–12–3. The cost per pupil in the upper and lower primary departments was Rs. 10–13–8 and Rs. 3–15–4, respectively. The cost was high in both the upper and lower departments of the Nidámangalam girls' school. It was also high in the upper primary department of the schools in the Mannárgudi, Tirutturaippúndi and Negapatam taluks. The high cost in Mannárgudi and Tirutturaippúndi is attributable to the special expenditure incurred on gymnastic apparatus and furniture. In the lower primary departments of the Rajamadam school, it was much higher than the average of the other schools, and this was chiefly due to boarders being taught free. In the schools and departments under the Kumbakónam board, the cost appears much less than in others, but this is because a sum of Rs. 697 shown at foot of statement IX as having been incurred on furniture, was not distributed and included in the body of the statement by the Assistant Inspector of Schools. The total number of boys and girls that were presented for the several standard examinations from these schools and departments was 3,792* and 302,* respectively, of whom 3,049 and 225 passed or 80 per cent. of the total number presented.

	Presented.	Passed.
* Includes Nannilam girls' school.	26	19

42. (*e*) *Grants-in-aid—Results Grants.*—The total number of schools aided on this system was 470 against 456 in 1893–94. They were attended by 12,712 boys and 950 girls against 13,600 of both sexes in 1893–94. Of these, 8,614 † pupils were examined for grant, of whom 6,620 or 77 per cent. were found qualified for grant against 9,067 and 7,322, respectively, or 81 per cent. in 1893–94. This may be due to severity on the part of the examiners or laxity on the part of the Inspecting Agency. The total amount of grant earned was Rs. 15,188, of which Rs. 13,176 was disbursed within the year. The delay on the part of the educational officers to submit the certifying memoranda to the boards concerned is the main cause for the non-payment of the difference. Including a sum of Rs. 1,272 paid for the previous year's claims and Rs. 20 paid to two girls' schools not included in statement No. X, the total expenditure was Rs. 14,468 or 97·7 per cent. of the budget allotment (Rs. 14,811).

	Examined.	Qualified for grant.
† Boys	8,082	6,228
Girls	532	392
Total ..	8,614	6,620

Salary Grants.—A sum of Rs. 15 was paid towards the salary of the gymnastic instructor of the Sri Ganésavidiasala at Ganapathi agraharam.

Building and Miscellaneous Grants.—The total expenditure under these heads amounted to Rs. 190 against a total budget allotment of Rs. 1,013. The short outlay is explained by the Presidents of the Nagapatam and Tanjore boards as being due to the non-submission of proposals by the educational officers in time.

43. *General Progress of Education.*—The total number of board and aided schools increased from 596 in 1893–94 to 618 in the year under report and the number of pupils attending them was 19,355 boys and 1,670 girls against 19,593 and 761, respectively, in 1893–94. The aforesaid figures represent 12·8 and 1·1 per cent., respectively, of the male and female population of school-going age (151,202) calculated at $7\frac{1}{2}$ per cent. for each sex of the total population of the district excluding municipalities. The total net expenditure on education excluding the charges

incurred on school buildings and debited to Grant I was Rs. 49,464 or 5·5 per cent. of the current receipts (excluding debt heads) against Rs. 45,954 or 6·3 per cent. in 1893–94. The difference in the percentages is due to the difference in the income of the two years. Compared with the current charges, it is 5·2 per cent. against 4·3 in 1893–94. On the whole, there was some improvement in the educational operations of the boards though not much to boast of. The remarks of Government in paragraph 29 of the general local fund review for the year 1893–94 regarding the reduction of the net cost of certain schools are engaging the attention of the local boards. The education of the Panchamas and other backward classes also received attention as is evidenced by the fact that seven* of the newly-opened board schools in the year were for them.

	Rs.
The total of Grant II as per statement I-B	69,970
Deduct Educational receipts as per statement I-A.	20,506
	49,464

* 6 for Panchamas.
1 for Muhammadans.
7

44. *Grant III (a)—Hospitals and Dispensaries.*—There were thirteen hospitals and sixteen dispensaries maintained by local boards against fourteen and fifteen, respectively, in 1893–94, the difference being due to the institution at Vilangulam, which was a hospital in that year, being now classed as a dispensary. Of the aforesaid twenty-nine institutions, seven were maintained by the district board and the rest by the taluk boards. The thirteen hospitals and the four dispensaries at Vallam, Tiruvadi, Ayyempettai and Muttupet were located in buildings provided for them by the local boards. The others are located in rented buildings. All the buildings are reported to be in good order except that at Tiruvádi, which is in a dilapidated condition. Steps are being taken to construct a new building as stated in paragraph 32 *supra*. The Raja Mirasidar hospital at Tanjore is maintained by contributions from Government, municipal and chatram funds, supplemented by grants from district board general funds. It is under the immediate supervision of the District Medical and Sanitary officer, who is assisted by an Assistant Surgeon, a civil apothecary and three reserve hospital assistants. In this and the remaining 28 medical institutions, a total number of 2,966 in and 229,843 out patients were treated against 2,747 and 202,020, respectively, in 1893–94. The total number of in and out patients treated bore a proportion of 11·2 per cent. of the total population (2,070,426) excluding municipalities except Tanjore, the corresponding figure for the Presidency being 6·9. There was a slight decrease in the number of in-patients treated in the hospitals at Mannárgudi, Porayár, Tiruválúr and Nannilam, and an increase in the number of out-patients that attended all the hospitals and dispensaries except the Raja Mirasidar's hospital at Tanjore and the hospital at Tiruválúr. Better public health in Tanjore during 1894–95 than 1893–94 probably accounts for the decrease in the attendance at the Tanjore hospital. The net increase in the number of persons treated in all the institutions is satisfactory and indicates a growing appreciation of the European methods of treatment and the popularity of the medical subordinates in charge of them. The total number of beds provided in the hospitals showed a decline from 269 to 263, but the difference represents the number in Velangulam hospital, which was closed for in-patients. Of the above number 120 belong to the Raja Mirasidar's hospital.

The total cost of maintaining the 29 hospitals and dispensaries excluding the cost of midwives amounted to Rs. 42,773 against Rs. 37,199 in 1893–94. The increase in expenditure was chiefly due to the following causes:—

(1) The cost of medicines and instruments supplied to the Raja Mirasidar's hospital in 1893–94 amounting to Rs. 2,131 was paid in the year under report.

(2) The Mimisal hospital and Vilangulam dispensary, which were open for only eight months in 1893–94, were maintained throughout the year 1894–95.

(3) Four apothecaries and three hospital assistants and several compounders were promoted to higher grades during the year.

(4) Eight hospital assistants were given charge allowance for the first time.

The average cost of treatment in these hopitals and dispensaries was Rs. 1–11–4 per in-patient and As. 2–7 per out-patient. Taken separately the cost per in-patient was highest, Rs. 2–11–11 in Adirámpatnam and lowest, As. 15-11 in Orattanadu. The chief causes of variation in cost are the differences (1) in the pay of the medical subordinates in charge of the several institutions; (2) in the local prices of articles of diet and contingencies; and (3) in the number of patients treated.

The concise report of the District Medical and Sanitary officer on hospitals and dispensaries, &c., is enclosed.

45. *His Royal Highness the Prince of Wales' Medical School, Tanjore.*—There were fifteen students at the beginning of the year undergoing training, of whom six were in the third-year course. These appeared at the final examination held in Madras in June and passed in the second class. In October, seven students were admitted into the school including one private student; one of the stipendiary students resigned at the close of the year and refunded the stipends, so that there were again fifteen students at the close of the year—six in the third year, four in the second year and five in the first year classes. The school has a capital of Rs. 1,00,100 invested in Government securities. The opening balance at its credit on the 1st April 1894 was Rs. 645, which together with the (*a*) contribution from municipalities (Rs. 1,020), (*b*) interest on the Government securities (Rs. 4,493) and (*c*) miscellaneous receipts (Rs. 158), amounted to Rs. 6,316. The expenditure of the year was Rs. 5,253, so that there was a closing balance of Rs. 1,063 left at the end of the year.

46. *Midwives and Midwifery pupils.*—There were twelve midwives at the beginning of the year and four were newly appointed during the year, making a total of sixteen midwives on the 31st March last. Provision was made in the budget for entertaining midwives in other dispensaries, but it was not utilized as no trained women could be had. The total number of labour cases attended by the sixteen midwives was 1,009 against 789 in the previous year or five cases were attended by each midwife per month on an average. The largest number of cases (106) were attended by the midwife attached to the Nídamangalam hospital and the smallest number (34) by the midwife attached to the Nannilam hospital. The expenditure on account of the midwives amounted to Rs. 2,333 and the average cost of each case attended was Rs. 2–5–0 against Rs. 2 in 1893–94. Some of the new midwives, having been entertained late in the year, did not attend a sufficiently large number of cases, and this accounts for the increase in the average cost. The result system of payment referred to in paragraph 63 of the last report continued in force, except in the case of the midwives under the Pattukkóttai taluk board who, from financial consideration, limited the pay of a midwife to Rs. 8 a month and fixed the remuneration at Re. 1 for every case attended above a minimum of four cases a month.

47. *The Medical Training of Women.*—This subject received no attention during the year, but the district board has provided for the training of a lady apothecary in the current year.

48. *Vaccination.*—There were two vaccine circles under two deputy inspectors as in the preceding year, with a staff of 33 vaccinators and four probationers. The vaccinatrix who was employed in 1893–94 died at the beginning of the year and her place was not filled up for want of a suitable substitute. The establishment continued to be under the direct supervision of the District Medical and Sanitary officer. The total number of operations performed by this agency was 55,398, of which 50,948 or 91·96 per cent. were successful, the corresponding figures for 1893–94 being 50,743, 47,258 and 93·13. The average outturn by each vaccinator was 1,497 for the year. One first-class vaccinator, seventeen second-class vaccinators and three probationers succeeded in performing a total number of 2,760 cases in excess of the minimum. The average cost of each successful case performed by the local fund vaccinators was As. 2–9 against As. 2–11 in 1893-94.

The number of cases vaccinated by medical subordinates in charge of hospitals and dispensaries was 4,194, of which 3,752 or 89·46 per cent. were successful, the corresponding figures for 1893–94 being 3,155, 2,819 and 89·5.

The total number of successful operations by the local fund vaccinators and the medical subordinates was 54,700 or 27·13 per *mille* of the population against 26·9 per *mille* in 1893–94. The total number of operations on children under one year of age was 7,145, of which 6,680 were successfully protected against small-pox.

	Vaccinated	Successful.
Local fund vaccinators ..	6,761	6,323
Medical subordinates ..	384	357
Total ..	7,145	6,680

This gives 3·3 per *mille*, the recorded birth-rate being 25·05 per *mille* of the population.

Calf lymph preserved in glycerine was used throughout the year. In the two depôts at Tanjore and Negapatam 231 calves were inoculated against 254 in 1893–94. This gives an average of 258 cases for the lymph obtained from each calf. The total cost of maintaining these depôts was Rs. 1,003 against Rs. 1,218 in 1893–94.

The closure of the depôt at Negapatam and the establishment of a central one at the head-quarters under the immediate supervision of the District Surgeon for supply of calf lymph to the whole district having been sanctioned by Government in its Order No. 2642 L., dated 18th December 1894, Mis., arrangements are in progress to give effect to the proposal and better results are expected.

49. *Sanitation.*—Excluding the expenditure incurred on works of a sanitary nature shown in statement No. III and debited to Grant I, Rs. 31,477 were spent under this head against the sanctioned total allotments of Rs. 35,607 and the actuals of Rs. 30,467 in 1893–94 as shown below:—

—	1893–94.	1894–95.	Allotment for 1894–95.
	Rs.	Rs.	Rs.
1. Improvement of water-supply	2,447	3,670	6,176
2. Village-site	1,917	1,438	1,785
3. Conservancy establishment	24,182	24,270	25,501
4. Arrangements at fairs and festivals	1,156	1,349	1,376
5. Other sanitary outlay	765	750	769
Total ..	30,467	31,477	35,607

The decrease under item 1 is due (1) to the Mannárgudi taluk board having had to abandon sanctioned works to the extent of Rs. 2,065 to make up for the deficit with which its funds closed in the preceding year; (2) to a sluice under the Pattukkóttai taluk board not having been constructed owing to disagreement between the board and the Engineer regarding its design; and (3) to two of the sanctioned works under the Kumbakónam taluk board and one under the Tanjore board having been postponed. The decrease under item (2) is chiefly due to the transfer by the Negapatam taluk board of Rs. 175 to other more emergent works and the non-utilization by the Mannárgudi taluk board of the allotments amounting to Rs. 205 provided for repair of streets in Muttupet and Kuttanallur which was found unnecessary. The decrease under item (3) is due to cheaper rates at which scavenging carts were hired during the year. Seven wells were sunk (four in unions) and 74 tanks and wells (67 in unions) were cleaned out and repaired. Thirty-four tank watchmen (26 in unions) were employed and 29 village-sites (25 in unions) were improved. In addition to the union villages, 23 other villages were provided with conservancy establishments. As usual special sanitary arrangements were made at all important festivals in the district. Under "other sanitary outlay" in addition to the cost of preventive measures adopted against cholera and small-pox, 25 dust-bins were repaired and 45 new ones were purchased or made. Two iron latrines were also purchased by the Tiruvadi union. Except in the unions and a few villages above mentioned no attempt has been made to improve village sanitation. All that is possible is being done by the officers of the revenue department and the village officers.

50. *Public Health.*—Cholera and small-pox and fever were prevalent. Full information on the origin and progress of these diseases is furnished in the District

Medical and Sanitary officer's report. Cholera broke out in December, but was not nearly so virulent as in 1893–94. Prompt attention was paid to it by the District Medical officer and his subordinates. On the whole, public health was better than in the year previous.

51. *Choultries.*—The following abstract exhibits the receipts and charges of the district and taluk board chattrams during the year 1894–95:—

—	Number of chattrams.	Opening balance.	Receipts.	Total.	Expenditure.	Balance.
		RS.	RS.	RS.	RS.	RS.
District Board	19	55,247	2,30,938	2,86,185	2,00,287	85,898
Tanjore Taluk Board	9	19,061	28,234	47,295	25,018	22,277
Kumbakónam Taluk Board	5	4,681	635	5,316	689	4,627
Negapatam ,, ...	5	—115	1,529	1,414	1,340	74
Mannárgudi ,, ...	2	5,027	2,468	7,495	281	7,214
Pattokkóttai ,, ...	4	535	143	678	174	504
Total ..	44	84,436	2,63,947	3,48,383	2,27,789	1,20,594

The Nachiyarkoil water-pandal with the endowment attached to it was taken up by the district board under its management under G.O., No. 2843 L., Mis., dated 20th December 1893, and including itthe total number of endowed institutions under the local boards was 44 against 43 in 1893–94. The expenditure as per abstract above includes Rs. 31,761 spent on public works in the form of construction and repair of irrigation works and buildings. The cost of establishment, feeding and contingent charges was as shown below:—

—	1893–94. Actuals.	1894–95. Expenditure.	1894–95. Estimate.
	RS.	RS.	RS.
(1) Establishment charges	30,682	31,662	32,649
(2) Feeding charges	67,710	58,899	82,224
(3) Contingent charges	49,298	48,740	46,575

The short outlay under (1) as compared with the budget estimate is due to fines and stoppages of pay of the chattram establishments and that under item (2) to the purchase of paddy for the chattrams in the northern range at a lower rate than in the previous year. The savings in the budget estimates are considerable in the chattrams named in the margin. The increase in the establishment charges as compared with the actuals of 1893–94 is due to the entertainment of certain temporary establishments for the Chattram Superintendent's office, Northern range, and the re-entertainment of the establishment of the Vennár chattram by sanction conveyed in G.O., No. 589 L., dated 28th March 1894. The excess under item (3) as compared with the estimate is chiefly due to the payment of Government dues on the ryotwar lands belonging to the chattrams at the enhanced rates fixed by the new settlement, and to the purchase of new brass vessels for the use of the Kalyanamahal chattram. The total number of persons fed was 982,693 against 892,409 in the previous year. Dividing the total expenditure on chattram establishments and feeding charges by the number of persons fed the cost of each meal was annas 1–5 as in 1893–94.

Names of chattrams.	Estimate.	Actuals.	Savings.
	RS.	RS.	RS.
Muktambalpuram	14,757	9,011	5,746
Kasangulam	2,590	705	1,885
Sulakshanambalpuram ..	5,000	3,111	1,889
Dropadambalpuram ..	4,500	3,616	884
Suckwarambalpuram ..	7,355	3,140	4,215
Kalyanamahal chattram ..	10,343	7,427	2,916

52. *Lighting charges.*—The expenditure under this head amounted to Rs. 4,730 against Rs. 6,141 in 1893–94 and the allotment to Rs. 5,900. The decrease was chiefly due to a smaller number of new lamps being purchased in the year. The average cost of maintaining each light was Rs. 5–2–2 against Rs. 4–13–10 in 1893–94. The increase in cost is due to additional lights erected and additional lamp-lighters employed and also to some extent to the increased cost of kerosine-oil. The whole

expenditure was met by contribution from taluk funds to union funds. A special statement containing details of the number and cost of lights and the places where they are kept accompanies.

53. *Grant IV, Miscellaneous—Supervision and Office management.*—The total expenditure under this head was Rs. 25,158 against Rs. 26,426 in 1893–94 and the total allotment of Rs. 26,861. It amounted to 2·4 per cent. of the current receipts and 2·6 per cent. of the current charges against 2·5 and 2·4, respectively, in 1893–94. The decrease, as compared with the actuals of 1893–94, chiefly appears under (1) the charges paid for the controlling establishment at the presidency, (2) travelling allowance to non-official members, (3) law charges, and (4) pensions. The rates of travelling allowances paid to the non-official members of the local boards were the same as in the preceding year.

54. *Máyavaram-Muttupet Railway.*—At the commencement of the year there was in favour of the Railway Guarantee Fund a balance of Rs. 5,42,000 in Government securities and Rs. 73,537 in cash. Of the former, Rs. 1,21,000 were withdrawn for expenditure. This amount, *plus* the balance, *plus* the year's current receipts amounting to Rs. 1,80,430, as shown in the margin, raised the total amount available for expenditure to Rs. 3,74,967; of this a sum of Rs. 3,19,964 was repaid to Provincial funds towards the balance of the cost of the railway. These transactions left in favour of the fund at the close of the year a balance of Rs. 4,21,000 in Government paper and Rs. 55,003 in cash.

	RS.
Cess on land	1,17,407
Interest on Government securities ..	24,331
Excess realized by sale of promissory notes	7,221
Half the profits of the Máyavaram-Muttupet Railway for the nine months from April to December 1894	31,471
Total ..	1,80,430

55. *Local Fund Accounts.*—The accounts of the Local Fund Engineer and the Treasury Deputy Collector for the period from October 1893 to September 1894 were inspected by the Assistant Inspector of Local Fund Accounts. He reported in January 1895 that the results of inspection were satisfactory. The local audit head clerk inspected the accounts of ten unions and three taluk boards.

56. There is nothing remarkable to chronicle during the year's administration. The usual amount of hard work has been got through in a fairly satisfactory manner.

ENCLOSURES.

EXTRACT from the Proceedings of the District Board of Tanjore, dated 13th July 1895.

* * * * *

1. Read the draft Administration Report of the Local Funds of the Tanjore District for the official year 1894-95.

Resolution.—Approved. The President is authorized to make such modifications and alterations as he deems necessary subsequently.

(Signed) ROBERT B. CLEGG,
President.

CONCISE report on the working of the Local Fund Hospitals and Dispensaries in the Tanjore District for the official year 1894–95.

I. Public Health.—(*a*) Cholera was epidemic in the district at the close of 1893, and cases continued to occur till April 1894 when the disease disappeared. The district was free from the disease from April till early in December when it broke out amongst the pilgrims returning from the Tiruvannámalai Kartigai festival in the South Arcot district. The first cases occurred at Shiyáli; on the arrival of a passenger train four passengers were found to be suffering from the disease. They were removed to a shed which had been erected close to the station in anticipation of the disease breaking out. I myself visited Shiyáli and found that all possible precautions

had been taken by the Civil Apothecary to prevent the further spread of the disease; it is, I think, due entirely to the energetic measures adopted by Civil Apothecary Narayanaswami that the disease was stamped out and never afterwards obtained a footing in the Shiyáli taluk, which from its close proximity to the infected district of South Arcot would under ordinary circumstances have suffered heavily.

(*b*) The next case occurred at Tanjore, the patient was a man who had attended the Tiruvannámalai festival; then a girl was attacked shortly after her arrival at Tanjore from the same place. From this date, December 15th, cases were reported from all parts of the district, and in every instance the disease was introduced by some person who had been to attend the Kartigai festival at Tiruvannámalai. In several places the disease, thus introduced, spread among the people and caused many deaths. Long before the actual outbreak in the district Apothecaries and Hospital Assistants were warned of its probable advent, and were given clear and explicit instructions in regard to the importance of isolating the first case and disinfecting clothes soiled by excreta, and they were directed to communicate with local authorities for the purpose of having small sheds erected for the treatment of the first cases. I have no doubt that it is only by carefully and completely isolating the first cases and disinfecting soiled clothes, burning or sufficiently disinfecting all excreta, that there is any chance of preventing the spread of the disease, once it has broken out in a locality.

	Deaths.
Tanjore taluk	772
Kumbakónam taluk	424
Máyavaram do.	151
Nannilam do.	102

(*c*) The railway materially assists the dissemination of the disease. All the Apothecaries and Hospital Assistants were provided with an ample supply of cholera medicines and disinfectants long before the disease broke out; medicines were supplied also to the Tahsildars who distributed them amongst the people as necessity demanded; in fact the usual routine of distributing cholera pills and draughts was religiously adhered to as in former years. Except for cholera the health of the district appears to have been much as in former years. The total number of deaths from cholera was 1,726—928 males and 798 females—against 18,252 in the previous year.

(*d*) Other diseases that were prevalent during the year were "fever" and "small-pox," and the mortality from these diseases was 3,441 and 760 against 3,945 and 1,233 in the previous year.

(*e*) The largest number of deaths from small-pox occurred in the Máyavaram (247), Shiyáli (172), Kumbakónam (115), and Nannilam (91) taluks. There was no localised epidemic outbreak, cases of the disease were distributed in small numbers throughout the villages. Whenever the disease appeared in a village a vaccinator was deputed to visit the affected village and endeavours to persuade the people to have all unprotected persons vaccinated. In some parts of the district there is a marked prejudice against vaccination, especially in villages inhabited by Muhammadans; in these parts vaccination is carried on under great difficulties.

II. Vital Statistics.—(*a*) This district is divided into nine taluks, the number of births and deaths in these taluks amounted to 50,510 and 42,702, respectively, as particularized in the margin, against 60,127 and 65,604 in the previous year.

Name of Taluk.	Births.	Deaths.
Tanjore	8,208	7,806
Kumbakónam	8,114	7,072
Máyavaram	6,709	5,606
Shiyáli	3,520	2,629
Nannilam	5,581	5,061
Negapatam	3,933	3,766
Tirutturaippundi ..	4,495	3,534
Mannárgudi	4,115	3,247
Pattukkottai	5,835	3,981
Total ..	50,510	42,702

(*b*) The number of births registered shows a marked falling off as compared with the previous year, the reason for which I am unable to explain. While touring in the district I made it a rule to carefully examine the birth and death registers in each village I visited. I found that in most cases the death registers were very carelessly kept, nearly all the deaths were returned under one heading "all other causes" and in some cases

still births were returned under the heading of births as well as deaths. The large decrease in the number of deaths is accounted for by the lower mortality from cholera than in the previous year, when there were 18,252 deaths from this disease.

III. Sanitation.—(*a*) There are five taluk boards in this district—Tanjore, Negapatam, Kumbakónam, Mannárgudi, Pattukkóttai. The number of unions in each taluk and the number of villages conserved is as follows:—

Name of Taluk Boards.	Unions.	Villages conserved.
Tanjore Taluk Board	4	7
Negapatam do.	3	11
Kumbakónam do.	5	15
Mannárgudi do.	4	6
Pattukkóttai do.	2	5
Total ..	18	44

(*b*) It will be seen from the above that in this large district, excluding municipalities with a population of over two millions, there are only 44 villages in which any attempt is made to carry out the most elementary sanitary arrangements. The sanitary establishment employed during the year consisted of 32 maistries, 207 sweepers and 88 carts for collection of rubbish and sweepings; there was no material change in the conservancy establishment as compared with the previous year, nor were any new unions formed.

(*c*) The actual number of latrines in use was not very great. I am unable to give the exact number; very little use is made of the latrines which do exist. During my inspection tours I found that the majority of the people preferred to make use of the banks of irrigation channels and tanks for the purposes of nature, and from local inquiries which I made I have been led to believe that very few people ever think of making use of a latrine, even if situated in a place easy of access which most of these are not. It is a great mistake to construct latrines in out-of-the-way corners as the people won't take the trouble to go to them.

(*d*) In all the towns and villages conserved the street sweepings, &c., are carted outside the village and deposited in a rubbish depôt, where periodical auctions are held for the sale of the rubbish as manure. In some places the rubbish is given as part payment to the contractor who supplies the carts; I think this is not a desirable arrangement, because the contractor only takes away in the cart what he considers he can dispose of to advantage and leaves old rags, broken pots, straw, &c., lying about the streets. In Tiruvádi, in the Tanjore taluk, all rubbish is burnt in an incinerator and the ashes sold as manure. In no place in the district is any attempt made to entrench night-soil. An endeavour will, I trust, be made next year to trench in the night-soil and crop the ground after a proper interval.

(*e*) In the villages where no conservancy staff is entertained, the people sweep the streets in front of their houses, but make no attempt to remove the sweepings from the village. In some places private toties are employed to remove night-soil from the backyards; the persons who take the trouble to do this are very few; all of, the backyards I personally inspected were in a deplorably filthy, insanitary condition.

Water-supply.—(*a*) Most of the district is watered by the river Cauvery and its numerous branches from which the people get their water in the wet season. There are numerous tanks filled from these rivers and in some places certain tanks are reserved for drinking purposes. In the Tanjore taluk no tanks are reserved, but in Vallam four wells and in Tiruvádi five wells are specially reserved. In Negapatam taluk three tanks, in Kumbakónam taluk nine tanks, in Mannárgudi taluk five tanks and in Pattukkóttai taluk four tanks are reserved for drinking purposes.

(*b*) In these parts of the district through which rivers flow the public dig wells in the river beds when the water in the river dries up. The quality of the water cannot be good, as many of the tanks receive the surface drainage from the neighbouring villages and the water in the rivers is liable to pollution of various kinds. It is only in the unions and conserved villages that tanks are set apart specially for

drinking purposes; in all other villages the tank water is used both for drinking and bathing. I think that for every village of importance, not provided with good well water, at least one tank should be reserved for drinking and should be carefully preserved from all sources of pollution by having the banks fenced in and drains constructed so as to catch the surface drainage.

Drainage.—There is no regular system of properly constructed drains in any town or village in this district; at Tiruvádi, Vallam and Tranquebar some of the streets have been provided with masonry drains, which carry the sewage water out on the outlying fields and gardens. In most of the unions and conserved villages the streets are provided with side cuttings, and where there is sufficient fall, these cuttings convey the drainage from the houses into the fields. In very few of the places I have inspected however was there a sufficient fall to allow water flowing along even masonry drains; the question of the best means of draining an Indian village is one beset with difficulties and which still awaits solution. I have not seen many large cesspools, but in most villages there are numerous small ones, in most cases without any impermeable living materials to prevent soakage into the soil.

IV. (*a*) *Vaccination.*—This district is divided into two vaccination circles, viz., Tanjore and Negapatam, which are under 2 first-class Deputy Inspectors of Vaccination. The head-quarters of one is Tanjore and that of the other is Negapatam. Under these 2 Deputy Inspectors, 9 first-class vaccinators worked on a salary of Rs. 15 a month, 24 second-class vaccinators on Rs. 10, and 4 probationary vaccinators on Rs. 5 a month each. The vaccinatrix who was entertained in 1892, under G.O., No. 2052 L., Mis., dated 9th September 1892, to carry on vaccination among Muhammadan and other gosha females, died at the beginning of the year. The vaccination establishment worked, as in previous years, under the direct supervision of the District Medical and Sanitary Officer.

(*b*) The charges under vaccination amounted to Rs. 8,843 against Rs. 8,714 in the previous year. The total number of cases vaccinated in both the ranges was Rs. 55,398 against Rs. 50,743 in the previous year. All these cases were done with animal lymph. The increase is due to the rule that the vaccinators will be liable to a fine of one anna for each case short of the minimum and to a reward of one anna for every successful case above the minimum.

(*c*) One first-class vaccinator, 17 second-class vaccinators and 3 probationary vaccinators, each vaccinated above the minimum fixed and are entitled to remuneration according to the above scale. The total number of cases operated upon above the minimum by these men was 2,762. They have not yet received the remuneration due to them, as all the cases have not yet been inspected by the Deputy Inspector or certified to as successful by a village munsif.

(*d*) Of the 55,398 cases vaccinated 50,948 were reported as successful, 2,309 as unsuccessful and 2,141 as unknown: The number of infants vaccinated under one year of age was 6,761 against 6,806 in the previous year. Of these 6,761 cases, 6,323 are returned as successful.

(*e*) The number of cases vaccinated by the medical subordinates was 4,194 against 3,155 in 1893–94. Of these 4,194 cases, 3,752 were reported as successful, 310 as unsuccessful and 132 as unknown.

(*f*) The total number of cases performed by the vaccinators and the medical subordinates was 59,592 against 54,268 in 1893–94. The proportion of the total number of cases performed to the total population of the district, excluding municipalities, viz., 2,016,036, was 29·56 per mille against 26·9 in the previous year. As regards infantile vaccination, it appears that while the recorded birth-rate was 25·05 per mille of population, the percentage of children under one year of age who were vaccinated was only 3·3 per mille. Infantile vaccination is apparently still as unsatisfactory as in previous years, and it is difficult to see in what way the unsatisfactory results may be improved as long as vaccination is not made compulsory in the rural parts of the district.

(*g*) Two depôts were maintained for the supply of calf lymph, one at Tanjore under the immediate supervision of the District Medical and Sanitary Officer, and the other at Negapatam under the Civil Surgeon as in the previous year. Two hundred and thirty-one calves were inoculated during the year against 254 in 1893–94, and 59,585 cases were vaccinated with the paste prepared in the depôts, which shows that on an average 258 cases were performed with lymph obtained from one calf. The total expenditure in maintaining a supply of lymph at both depôts amounted to Rs. 1,003 against Rs. 1,218 in the previous year.

(*h*) The duty of supplying calves to the depôts is entrusted to the Tahsildars of Tanjore and Negapatam who are supplied with an advance of Rs. 100 each for the purpose. This system is not found to work verily satisfactorily, owing to the irregularity with which calves are supplied, and to the fact that they are supplied on the very day on which the inoculation has to be carried out—often when the calves are not in a suitable condition to give the best results, either on account of their poor condition, or because they have been sent from a long distance and are tired and weary when they arrive at the depôt. It was due, I think, to these causes that the supply of vaccine paste was interrupted on one occasion during the year; from the 1st to 22nd August, there was no vaccine paste available for distribution from the Tanjore depôt owing to the inoculation of the calves not being successful. The calves should be sent to the depôt for rest and to be fed up for at least six days before the operation of inoculation is performed. To remedy the present unsatisfactory condition of affairs, I proposed a scheme for the establishment of a large central depôt in Tanjore, and the purchase of a sufficient number of calves to secure a constant and efficient supply of vaccine paste to the whole district, and to abolish the existing depôt at Negapatam which has lately received the sanction of Government, and which I hope will very soon be in full working order.

(*i*) Detailed reports and returns on the working of the department received from the deputy inspectors of vaccination are herewith sent. During the year under report several vaccinators were fined for short work, the total amount of the fines imposed amounting to Rs. 33–8–0.

(*j*) Both the deputy inspectors of vaccination have done a fair amount of inspection during the year.

V. Hospitals and Dispensaries—(*a*) *Nature and sufficiency of Accommodation.*—The information called for under this head is furnished in the statement attached.

(*b*) *State of Repair of Buildings.*—All the hospitals (thirteen in number) and the dispensaries at Vallam, Tiruvádi, Ayyampéttai and Muttupet are located in local fund buildings, which are in good repair, except the one at Tiruvádi which is in a dilapidated state. Arrangements have therefore been made to pull down the whole building and to erect a new one in its place on the standard plan; all the other dispensaries are located in rented buildings which are reported to be in good repair.

(*c*) *State of Repair of Furniture.*—In good repair.

(*d*) *Number of patients treated as compared with previous years.*—(1) The information called for under this head is furnished in a tabular statement.

(2) From this statement it will be seen that thirteen hospitals and sixteen dispensaries were maintained by the local boards during the year against the same number in the previous year. Of these 29 institutions, 7 were supported by the District Board, 5 by the Taluk Board, Tanjore, 4 by the Taluk Board, Pattukkóttai, 4 by the Taluk Board, Mannárgudi, 3 by the Taluk Board, Negapatam, and 6 by the Taluk Board, Kumbakónam.

(3) *District Board Hospitals and Dispensaries.*—The Rajahmirasidar hospital, which is the largest one in the Tanjore district, is under the immediate supervision of the District Medical and Sanitary Officer who is assisted by an Assistant Surgeon, a civil apothecary and three reserve hospital assistants. It is maintained by contributions from Government, municipal and chattram funds supplemented by allotments from the district board general funds. It has accommodation for 120 in-patients.

The number of in and out patients treated in it was 1,617 and 21,464, respectively against 1,598 and 23,952 in the previous year. There was a slight increase (19) among in-patients, but a decrease of 2,488 in the number of out-patients, which was chiefly due to change of medical officers during the year. The cost of maintaining this hospital amounted to Rs. 9,822 against Rs. 7,223 in the previous year. The increase of expenditure was mainly due to the cost of medicines and instruments for 1893–94, viz., Rs. 2,131 having been paid during the year under review. The average cost of treating each in-patient was Rs. 1–12–10 against Rs. 1–13–0 in the previous year.

(4) In all the hospitals and dispensaries under the district board 2,127 in-patients and 59,877 out-patients were treated against 1,874 in-patients and 54,383 out-patients in the previous year. The cost of establishment (including midwives) and contingencies was Rs. 16,921 against Rs. 13,416 in the previous year. The increase of expenditure was chiefly due to the cause mentioned in paragraph (*d*) (3) and also to the fact that the Mimisal hospital and the Velangulam dispensary were maintained throughout the year, while in 1893–94 they were in operation for eight months only. The average cost for each in-patient ranged from As. 15–11 in the Orattanadu hospital to Rs. 2–11–10 in the Adirámpatnam hospital. The chief cause for the difference in cost is that the hospital assistant attached to the Orattanadu hospital drew Rs. 30–10–0 a month, while the apothecary in charge of the Adirámpatnam hospital was paid Rs. 109–6–0 a month. Besides the number of in-patients treated in the Adirámpatnam hospital was very small.

(5) *Taluk Board Hospitals and Dispensaries.*—The number of hospitals and dispensaries under the taluk boards were seven and fifteen respectively. The number of in and out patients treated in these institutions were 839 and 16,966 respectively against 873 in-patients and 147,637 out-patients in 1893–94. There was a slight decrease (34) among in-patients, but a large increase in the number of out-patients, viz., 22,329. The total outlay on establishment (including midwives) and contingencies, was Rs. 28,185 against Rs. 25,358 in the previous year. The increase in expenditure was chiefly due to the following causes :—

(*a*) Four apothecaries and three hospital assistants were promoted to the next higher grade during the year.
(*b*) Eight hospital assistants were given charge allowance for the first time.
(*c*) Several compounders were promoted to the next higher grade.
(*d*) Two midwives were newly entertained.
(*e*) The pay of the midwives under the Taluk Board, Kumbakónam, was increased from Rs. 8 to 10.

(6) The average cost of each in-patient ranged from Rs. 1–6–5 in the Kudavásal hospital to Rs. 2–8–7 in the Porayar hospital. The average cost of each out-patient ranged from As. 1–2 in the Tirukkáttuppalli dispensary to As. 7–5 in the Porayar hospital. The difference in cost in the different institutions depended in a great measure on the difference in pay and allowances drawn by the medical subordinates in charge, thus in the Porayar hospital, the pay, &c., of the apothecary amounted to Rs. 131–4–0 per month, while in the Tirukkáttuppalli dispensary the pay, &c., of the hospital assistant was only Rs. 39–6–0. Provisions are expensive in Porayar and in the Pattukkóttai taluk as compared with other parts of the district.

(7) On the whole the total number of in and out patients treated in all the hospitals and dispensaries under the district and taluk boards was 2,966 and 229,843 against 2,747 and 202,020 in the previous year, that is, an increase of 219 in-patients and 27,823 out-patients over the past year. This increase shows that the medical subordinates are gaining the confidence of the people and are making themselves acceptable and useful as medical practitioners.

(*e*) *Mortality and actual causes of it.*—The mortality amongst in and out patients was 310 against 754 in the previous year. The decrease is due to fewer deaths having occurred from cholera than in the previous year.

(*f*) *Operations and Results.*—A return showing the number of major and minor operations performed in the hospitals and dispensaries during the year under review and the three previous years is enclosed.

(*g*) *Establishment, whether sufficient and efficient.*—An increase to the staff of the Rajahmirasidar hospital was sanctioned, consisting of a matron, one midwife and nurse, second apothecary, two ward attendants and one water-woman; this increase was absolutely necessary to carry on the work of this large hospital in an efficient manner. All the other hospitals and dispensaries were provided with sufficient establishment.

(*h*) *Midwives.*—(1) At the close of the year 1893–94, there were twelve midwives. During the year under review, the midwife attached to the Arantángi dispensary was transferred to Tiruvádi as her services at the former station did not appear to have been freely utilized by the public. The midwife attached to the Rajahmirasidar hospital, who was a locally trained woman, was found to be quite unsuited for such a large hospital; she was therefore transferred to a less important municipal dispensary, and a qualified midwife from the Lying-in hospital, Madras, entertained in her place. Four midwives were also newly entertained at the hospitals and dispensaries named in the margin, so that the number of midwives at the close of the year under report was sixteen.

Adirámpatam hospital.	
Orattanádu do.	
Tirutturaippúndi hospital.	
Gandarvakóttai dispensary.	

(2) The expenditure on account of these sixteen midwives was Rs. 2,333 against Rs. 1,574 for twelve midwives in 1893–94. A return showing the number of labour cases attended by the midwives during the year is enclosed from which it will be seen that 1,009 cases of labour were attended by them against 789 in the previous year. This gives an average of about five cases per month for each midwife. The largest number was attended by the midwife at Nídámangalam, viz., 106. Next comes the midwife at Tiruválúr, who conducted 103 cases. The third in the list is the woman attached to the Ayyampéttai dispensary, who attended 95 cases. The fourth is the one at Pattukkóttai, who attended 85 cases. The woman attached to the Kudavásal hospital attended eighty cases and stands fifth in the list. The midwives attached to the institutions marginally named attended on an average more than five cases a month. The work of the other midwives was very poor especially of the one at Nannilam, who only attended 34 cases during the year. This woman does not appear to have been popular, though no complaints were made against her during the year.

Porayar.	Tiruvádi.
Vallam.	Muttupet.
Orattanádu.	

(3) The midwife at Adirámpatam was only entertained in December 1894, and consequently she has not had time to become known to the people and make herself popular. The midwife attached to the Rajahmirasidar hospital attended only 45 cases against 76 in the previous year. The cause for the short work in the case of this midwife is that she is occupied in the hospital where she combines the duties of nurse and midwife.

(4) The rules passed by the District Board, Tanjore, in 1893 agreeably to the wishes of Government in paragraph 5 (3) of G.O., No. 594 L., dated 18th March 1893, were observed by all taluk boards during the year except the Taluk Board, Pattukkóttai. The rules are that each midwife should receive a fixed stipend of Rs. 10; that she should receive full pay, Rs. 15, if she attends eight cases per mensem; that As. 10 should be deducted for each case under that number; and that she should be permitted to make good a deficiency in one month by extra cases in the month following. The Taluk Board, Pattukkóttai, refused on financial grounds to make any alterations in the rules observed by them in 1893–94, viz., that each midwife in their employ be paid Rs. 8 a month and a remuneration of one rupee per case over the minimum number, viz., four cases a month. There was only one midwife in their employ during the year, and she attended 85 cases, that is, 37 cases over the

minimum number. The remuneration for these cases was not paid within the year. She attended the largest number of cases in 1893–94, and was paid a remuneration of Rs. 56 during the year under review.

(5) There was also provision in the budget for the entertainment of midwives in the following places, viz., Mimisal, Tiruvadamarudúr and Valangiman, but no trained midwives could be had.

(*i*) There are no dispensaries in this district for caste and gosha women. In the last budget meeting the board have sanctioned funds for the training of a female apothecary at Madras, and I trust that before the commencement of the winter session a suitable lady may be selected and sent to attend the apothecary class in the Madras Medical College.

2. Tirutturaippúndi.
3. Muttupet.
4. Védáranniyam.

(*j*) *General Remarks.*—All the hospitals and dispensaries in the district were inspected during the year except the institutions marginally named.

Medical School.—(1) At the close of the year 1893–94, there were on the roll six third year students, six second year students and three first year students. All the third year students appeared for final examination held at Madras in June, in which all of them passed in the second class, with the exception of one, all have secured appointments elsewhere as there were no vacancies in this district. The six second year students and the three first year students, having passed the annual examination of the school, were promoted to the next higher class.

(2) In October 1894, six candidates were taken in the school as first year stipendiary students and one as a private pupil in the second year class, having paid the prescribed fees of Rs. 50. Of this number, one stipendiary student resigned, having paid back the stipend received by him, so that at the close of the year under review there were fifteen students—six in the third year course, four in the second year and five in the first year.

(3) The conduct of the students was on the whole satisfactory.

(4) *Clinical Lectures.*—The students undergoing instruction in the school attend the Rajahmirasidar hospital for clinical instruction. The hospital is a very large one, having 120 beds for in-patients, and the pupils have every advantage of studying disease at the bedside of patients and of acquiring a practical knowledge of their profession.

(5) *Financial condition of the School.*—On 1st April 1894 the opening balance at the credit of the school was Rs. 645 which, together with the income from the following sources, amounted to Rs. 6,316–3–3.

(*a*) Interest on the funded capital, Rs. 1,00,100, invested in Government securities, Rs. 4,493–8–11.

(*b*) Contribution from municipalities, Rs. 1,020.

(*c*) Miscellaneous receipts, Rs. 157–10–4.

(6) The expenditure on establishment and contingencies was Rs. 5,252, so that the year closed with a balance of Rs. 1,064 at the credit of the school.

Tanjore, 20*th June* 1895. (Signed) C. M. THOMPSON, M.B., Surgeon-Major, *District Medical and Sanitary Officer.*

Order—No. 2022 L., dated 23rd October 1895.

The Local Fund receipts and charges of the Tanjore district for 1894–95 are compared below with the budget and revised estimates for the year and the actuals of 1893–94 :—

2. *Local Boards and Union Panchayats.*—The district board held fourteen meetings as in 1893–94, and the average attendance of both classes of members improved. The taluk boards met a sufficient number of times and the attendance of their members, excepting the officials on the Negapatam board and the non-officials on the Kumbakónam and Mannárgudi boards, was, on the whole, good. There were again eighteen union panchayats at work and they held on an average fourteen meetings each. The attendance of their members continued to be fair, being eight out of an average strength of fourteen. The ward system of supervision, which was in force in fifteen unions as in the previous year, is reported to have worked well in all of them except Tirutturaippúndi. Ten of the panchayats were, in addition to their ordinary duties, entrusted with the management of the schools within their limits. The working of these bodies is reported to have been generally satisfactory.

3. *Receipts.*—(1) Owing chiefly to the introduction of the rates of assessments in the new settlement, the demand under land-cess increased by Rs. 1,12,348 and the collections continued to be excellent, being again 99 per cent. of the demand.

(2) The receipts from tolls amounted to Rs. 37,969 against Rs. 42,709 in 1893–94, the decrease being due to the diminution of traffic on certain of the roads caused by the opening of the Máyavaram-Muttupet Railway. Nearly the whole of the demand was realized within the year.

(3) House-tax was levied at the maximum rates in all the eighteen unions and the collections amounted to 93 per cent. of the demand against 84 per cent. in the previous year. The whole of the current demand was realized in Tiruvádi, Ayyampettai, Melattúr and Pattukkóttai, a result which is creditable to the Chairmen of the panchayats concerned. In some of the unions, however, arrears existed which have been outstanding since 1891–92. These should be adjusted without further delay. Coercive measures were resorted to in eleven unions in 211 cases, but property was actually distrained in 99 cases and sold in only two, the amount involved being Rs. 4.

(4) Owing chiefly to the collection of arrears, the receipts from land forming the choultry endowments rose from Rs. 1,52,604 to Rs. 1,96,590.

(5) During the year two additional markets were opened and one of those already existing was abolished, so that at its close there were six markets under the control of the local boards against five in 1893–94.

(6) There was a slight decrease in the income from avenues, which is explained in paragraph 21 of the President's report. Their extension, however, received fair attention and their general condition is reported to have been good.

(7) The Máyavaram-Muttupet Railway was opened for public traffic on the 2nd April 1894 and the district board derived a net profit from its working during the nine months ending with December 1894 of Rs. 31,471, which represents a little more than $3\frac{1}{2}$ per cent. on the capital outlay.

4. *Expenditure—Public Works.*—(1) The total expenditure under this head was slightly less than that in 1893–94, but amounted to 82 per cent. of the allotments against 79 in that year. The decrease as compared with the allotment occurs under all heads and is explained in paragraphs 29 to 33 of the President's report. In several cases, however, the explanations are insufficient to show who was to blame for the short expenditure, and it appears that in some instances works were again entered in the budgets before the arrangements for their execution had been completed. The outlay upon repairs to communications was 95·6 of the provision made. Except in a few cases in which the supply of metal was delayed by the late opening of the new railway to the quarries near Vallam, the roads in the district are reported to have been in very fair order. The Local Fund Engineer promises that the ground which has been lost in the former cases will be recovered in the current year. Owing to the smaller expenditure above referred to, the cost of the engineering establishment increased from 14 to 16 per cent. of the outlay on works. A contribution of Rs. 3,19,964 was paid to Government, being half the expenditure incurred by the Public Works Department on the Máyavaram-Muttupet Railway in 1893–94.

(2) *Education.*—There were again eleven inspecting schoolmasters, and their work, with one exception, is reported to have been fair. The sessional school worked at three centres in succession and trained 47 students, of whom 37 passed the Primary examination. Nine secondary and 138 primary schools were maintained by the local boards against 8 and 131, respectively, in the previous year. The Tiruvalúr high school sent up twenty-one students for the Matriculation examination, of whom only six passed; it fared better, however, in the Lower Secondary examination, as seventeen out of the 27 candidates who went up were successful. The progress of the Sanskrit school at Tiruvádi has not been reported. From the remaining secondary schools 45 pupils in all were sent up for the Lower Secondary examination, of whom 22 passed, but the results obtained by each school have not been separately shown. The attendance at the primary schools rose from 5,992 pupils to 6,442 and their progress was satisfactory, 80 per cent. of the pupils sent up for the standard examinations having passed. Six of the primary schools were for the exclusive benefit of Panchamas and one for Muhammadans, but the progress made by them has not been reported. This omission should be supplied in future. The taluk boards also aided with result grants 470 schools, attended by 12,323 pupils, against 456 schools with 12,275 pupils in the previous year, and the expenditure under grants of all kinds was 93 per cent. of the allotments against 106 per cent. The decrease in the latter case is ascribed in part to delay on the part of the educational officers in submitting certifying memoranda. The attention of the Director of Public Instruction will be drawn to the matter. The total number of boys under instruction in the schools maintained and aided from local funds fell from 12·1 to 11·9 per cent. of the male population of school-going age.

(3) *Medical Relief.*—Owing to the reduction of one of the hospitals to a dispensary, there were thirteen hospitals and sixteen dispensaries maintained by the local boards against fourteen and fifteen, respectively, in 1893–94. The number of patients treated in them showed a satisfactory increase from 204,767 to 232,809. Six out of the fifteen students who underwent training in the Prince of Wales' Medical school at Tanjore appeared for the final examination and all of them passed in the second class. Sixteen midwives were employed against twelve in 1893–94 and they attended in all 1,009 cases of labour, which gives an average of five cases each per mensem as in that year. No steps were taken for the furtherance of the medical education of women although ample funds were available; the district board

has however provided for the training of a female apothecary in the current year. The board's attention will be called to G.O., No. 1684-A.L., dated 5th September 1887, and it will be requested to consider the desirability of granting scholarships to students trained by the Countess of Dufferin Fund Committee.

(4) *Vaccination.*—The work of this department showed a further advance, the reported number of successful operations having risen from 25·0 to 27·1 per mille of the population. Infantile vaccination, however, did not make much progress, the number of children under one year of age successfully protected being 6,680, or only 13 per cent. of the registered births of the year, against 6,525 in the previous year. This matter should receive attention in the current year.

(5) *Sanitation.*—The expenditure on sanitation was 88 per cent. of the allotment against 80 per cent. in the previous year. There was an increase in the outlay on the improvement of water-supply, seven new wells having been sunk and 74 existing sources of supply, against 43 in 1893–94, having been repaired. Twenty-five village-sites were improved against twenty in the previous year, and eighteen unions and 23 other villages were again provided with conservancy establishments. The Government trusts that the boards have satisfied themselves that these establishments are adequately supervised in non-union villages. Unless this is ensured, their work is likely to be worthless and the money spent upon them would be more usefully devoted to permanent improvements to local sources of water-supply. The number of towns and villages visited by the District Medical and Sanitary officer has not been reported—an omission which should be supplied in future.

5. *General Remarks.*—The year closed with a balance of Rs. 2,78,481, of which Rs. 11,546 appertained to unions, Rs. 1,22,634 to endowed institutions and Rupees 55,003 to the Railway Guarantee Fund, leaving Rs. 89,298, or 20 per cent. of the receipts, available for general purposes. The greater portion of this has, however, been allotted for expenditure in the current year. The deficits with which the market at Pattukkóttai, the choultry at Rámésvaram, and the unions of Nannilam and Kudavásal closed the year should have been made good by a loan or contribution from the General Funds, as required in No. 25 of the Local Fund rules.

The President's report is full and clear. That of the District Medical and Sanitary officer might, with advantage, have been considerably condensed. The administration of local affairs showed, on the whole, an improvement on that of the previous year and continued to be efficient.

IV-A & IV-B

* The difference between this figure and that given in the Statement Submitted for 1893-94 appears in the avenues in charge of the Public Works Department and is due to the inclusion in this Statement of avenue trees which were omitted in the Statement Submitted for 1893-94 on the ground that they were in the enjoyment of Inamdars.

(a) The number of schools is increased by one. This is due to the raising of the standard of the Chatram girls school Nedamangalam.

(b) Aided Schools. There is an increase of two schools. This is accounted for as follows:— Maharajapuram school is closed Koneirajapuram Sanskrit school went to unaided section. Four schools i.e. Papanasam, Umayalpuram and Thugili in Kumbakonam Range and Marur School in Tanjore Range were aided during the year.

(c) Unaided Schools. The increase of one school is accounted for as follows. Of the 22 schools of the last year, 4 schools, namely Chandrasekariapuram, Pattiswaram, Thanpattis Hindu School and Ieralandur in Kumbakonam Range were closed. Koneirajapuram was brought to this section from aided section. Seven schools, Kadiramangalam, Mananjeri, Vilattur and Thiruvisalur in Kumbakonam Range Tiruvadi, Oradaypalcoil and Kidaram in digenous schools in Tanjore Range were brought to the unaided list. Three schools, Papanasam, Umayalpuram and Thugili in Kumbakonam Range were brought to aided Section. Hence the increase of one school.

Primary Schools.

(d) Board schools. There is an increase of Seven schools, which is explained as follows. Nidamangalam Girls School has been brought to Middle schools as its standard was raised. Ten schools were closed and 17 schools opened during the year. Hence the increase of 7 schools. The increase of 15 schools and only 79 pupils in the aided schools shows a slight improvement. On the whole there is an increase of 23 schools and 1548 pupils.

Tanjore
5th July 1895.

L E Wilkinson
Assistant Inspector of Schools,
6th Division

District Board, Tanjore.
