Office of Sanitary Commissioner
Fort Saint George 23rd January 1895
Local & Municipal Department

CURRENT No. 147

From,

Surg^l Lieut Col. W. G. King M.B.C.M.D.S.H.
Ag. Sanitary Commissioner for Madras

Endo. 1

To,

The Chief Secretary to Government
Local & Municipal Department,
Fort Saint George.

Sir,

I have the honor to submit for
the information of Government reports by
the marginally named officers attached to
the East Coast Railway, of their operations in
connection with the successful sinking for
artesian wells in certain localities in the
Godavery District. I believe, in the case of the
Samalkota well, this is the first instance in
British territory in this Presidency where
water having been struck a continuous flow
at any considerable height above the ground
surface has been maintained. The results
are of special interest, with reference to
the possibility of securing artesian wells
for

E. A. S. Bell Esq.
W. H. K. Howard Esq., Asst Engineer, No II Sub Div, Junr.
Mr. A. J. Anderson, Supervisor to the Asst Engineer, Junr.

for the supply of the town of Cocanada.

I have the honor to be,

Sir,

Your most Obedient Servant,

W. E. Ming

Surgeon Lieut Col.
Hq. Sanitary Commission

Local & Municipal DEPARTMENT.

From H. G. King M.B., C.M.,
SURGEON LIEUT.-COL. J. A. LAING, D.C.H.
Ag SANITARY COMMISSIONER FOR MADRAS,

To THE Chief Secretary
to Government
Local & Municipal Dept

No. 137

GOVERNMENT OF MADRAS

Dated 23rd
Despatched 24th
Received
January 1895.

ENCLOSURES. /

Subject.

Submitting for information reports by certain officers of the East Coast Railway of their operations regarding the successful sinking of artesian wells in the Gopuram

H.M. order 9/2/95
misc- 12-2-95 No. 221
Communicated to the Sanitary Engineer.
2. The San. Comm. will be requested to communicate to Govt. any further reports upon the success of the second boring at Cocanada which may receive from Mr. Howard.

Mc 295 8/2/95
Note.
The boring at Cocanada will be especially interesting as the San. Eng. scheme for the water supply of that town has been rejected as financially impracticable. The discharge from the small well will be small. 500 gallons per hour would only provide the Cocanada population with 1/2 a gallon per head per day, & it is not certain whether if more pipes or a well were sunk to increase the discharge, the supply would continue to meet the demand.

To The Sanitary Engineer
(with the printed copy of the report)
