IV Read again this Taluk Board's resolution
No 28 dated 20th June 1895 regarding the abolition
of the Tank watchmen and scavenging establishments.

The tank watchmen will be retained
in the union villages for this year. The tank watchmen in
all the non-union villages with the exception of Trichamiar
will be informed that their services are dispensed with
from November 1st and their posts will be abolished.
The sanction of Government will be solicited.

The scavenging establishment will be maintained
in Pakala, Dammalehom and Trichamiar.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf from an old book. The paper has a slightly textured appearance with some faint horizontal lines and numerous small dark spots, possibly foxing or dirt. The left edge of the page shows the binding of the book.

3

1. The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atomic nucleus. It is shown that the structure of the nucleus is determined by the interaction of the nucleons, which are the particles that make up the nucleus. The interaction is described by the strong interaction, which is the most powerful of the four fundamental interactions. The strong interaction is responsible for the binding of the nucleons together in the nucleus. The structure of the nucleus is also determined by the distribution of the nucleons within the nucleus. The distribution is described by the nuclear density, which is the number of nucleons per unit volume. The nuclear density is a function of the mass number of the nucleus, which is the total number of nucleons in the nucleus. The nuclear density is also a function of the atomic number of the nucleus, which is the number of protons in the nucleus. The nuclear density is a function of the radius of the nucleus, which is the distance from the center of the nucleus to the outer edge of the nucleus. The nuclear density is a function of the mass number of the nucleus, which is the total number of nucleons in the nucleus. The nuclear density is a function of the atomic number of the nucleus, which is the number of protons in the nucleus. The nuclear density is a function of the radius of the nucleus, which is the distance from the center of the nucleus to the outer edge of the nucleus.

No. 161

General L.F. No. 2910 of 1895

NORTH ARCOT,

Ranipet Taluk Board's Office,

Ranipet, 25th October 1895.

FROM

J. W. Hughes Esquire,
THE PRESIDENT,

RANIPET TALUK BOARD,

North Arcot.

TO

The Chief Secretary to Government
Local and Municipal Department, Fort Saint George
Through the President, District Board, North Arcot.

Sir,

I have the honor to inform you that the Board at their meeting held on the 20th September 1895 subject to the sanction of Government abolished the posts of all the tank watchmen in all non-union villages with the exception of Trichanur as we are of opinion that their services are worthless owing to the want of proper supervision. This is in accordance with the remarks of Government on the budget vide G.O., 11th March 1895 No 4632.

I therefore request that you will be good enough to sanction the same at an early date.

A copy of the resolution of the Board and the usual proposition statement are herewith sent.

No. 161

Encl. 2 (two) only

Subject

Requesting to accord
Sanction for the abolition
of the tank watchmen
establishment in non-
union villages from 18th
November 1895.

(with order)

is made in the current year's
budget, were dispensed with
as per G.O. Nos 1394 & mis and
1494 L. mis dated 9th and 19th
August 1895 respectively. The
Taluk Board President explains
that through mistake the watch-
man at Padirai has been called
in the budgets as the watchman
at Nagari and that Nagari
should be read as Padirai.

3. An extract of para 3 of the
Taluk Board President's letter
No 180 dated the 9th instant ex-
plaining the delay in the sub-
mission of the proposition state-
ment is enclosed.
