Note of 1891-92, the rates on the estimated population have been omitted. Subsequent immigration as to render the rates of increase open to doubt, it has been considered advisable to adopt Mr. Stuart's normal rate of increase, based on the population of 1891. It is, of course, not to be assumed that complete accuracy is thus attained.

Where there has been a decrease of population in the decade of 1881-91, the rates on the estimated population have been omitted.
 Where there has been so great an increase owing to prosperity and consequent immigration as to render the rates of increase open to doubt, it has been considered advisable to adopt Mr. Stuart's normal rate of 13-49 per mille, the object being to secure something more approaching accuracy than by calculating on the population of 1891. It is, of course, not to be assumed that complete accuracy is thus attained.

Office of Sanitary Commissioner, Fort St. George,
 5th December 1895.

W. G. KING, Surgeon-Lieut.-Col., M.B., O.M., D.P.H.,

Local and Municipal {1895} Dept.

Returns of Vital Statistics for the month

of July 1895.

110 Proof of diagram will be presented from the Survey Dept on the 10 of Jan 96

No. 2333 L., 2ND DECEMBER 1895.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

No. 2152-S.

Remarks by the Sanitary Commissioner, Madras, on the recorded vital statistics in the Districts and Municipalities of the Madras Presidency for the month of July 1895.

DISTRICTS.

Registration of vital statistics for the month under review showed a total of 93,286 births and 58,103 deaths, yielding, respectively, annual ratios of 33.2 and 20.7 per mille of the census population of 1891 and 31.2 and 19.4 per mille of the estimated population. Of the children born, 47,555 were boys and the rest girls, while of the total deaths, 29,646 were males and 28,457 females, or, in other words, 104 boys were born for every 100 girls and 104.2 males died for every 100 females.

2. The subjoined table compares the deaths under the several causes in July last with those of June 1895 and July 1894 :—

	Deaths from							Ratio per mille of population per annum.						
	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhoea.	Injuries.	All other causes.	Total.	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhoea.	Injuries.	All other causes.	Total.
July 1894	648	621	21,225	1,892	868	24,731	49,985	0.2	0.2	7.6	0.7	0.3	8.8	17.8
June 1895	1,430	334	21,891	1,987	818	24,832	51,292	0.5	0.1	7.8	0.7	0.3	8.8	18.2
July	2,667	380	23,883	2,275	778	28,120	58,103	1.0	0.1	8.5	0.8	0.3	10.0	20.7

3. Deaths from cholera were reported from fifteen districts, and they aggregated 2,667, against 1,430 in the previous month and 648 in July 1894. The death-rate was highest in Bellary (6.4), followed by South Arcot (5.8) and Tinnevely (3.7). 380 persons succumbed to small-pox against 334 in June last. Fevers proved fatal in 23,883 cases against 21,891 in the preceding month. They were largely prevalent in Nilgiris (27.7), Vizagapatam (16.7), Kurnool (15.8), Cuddapah (13.8), and Madras (12.7). Dysentery and diarrhoea caused 2,275 deaths against 1,987 in June 1895, Madras, as usual, returning the highest death-rate (4.5).

4. The accompanying map of the Madras Presidency exhibits the places where deaths from cholera were recorded, the affected districts being shaded according to the intensity of the cholera which prevailed there.

No. 2333 L., 2ND DECEMBER 1895.

MUNICIPALITIES.

5. The births and deaths registered in the municipal towns during July last aggregated 6,661 and 5,178, respectively. These yielded annual ratios of 38.0 and 29.6 per mille, respectively, of the census population of 1891 and 36.1 and 28.0 per mille of the estimated population. Of the births, 3,437 were boys and 3,224 were girls, and of the deaths, 2,635 were males and the rest females. The mortality of infants under one year of age was 225.2 per mille per annum of the population of that age in that month, against 203.9 in June last.

6. In the accompanying statement are compared the deaths under the several causes in the month under review with those of the previous month and the corresponding month of the previous year:—

		Deaths from							Ratio per mille of population per annum.						
		Cholera.	Small-pox.	Fevers.	Dysentery and diarrhoea.	Injuries.	All other causes.	Total.	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhoea.	Injuries.	All other causes.	Total.
July 1894		2	19	1,349	541	59	2,558	4,528	0.01	0.1	7.7	3.1	0.3	14.6	25.8
June 1895		31	22	1,430	523	61	2,549	4,616	0.2	0.1	8.2	3.0	0.3	14.6	26.4
July "		150	11	1,504	644	50	2,819	5,178	0.9	0.1	8.6	3.7	0.3	16.0	29.6

7. In the whole President

7. In the whole Presidency only fourteen towns returned deaths from cholera, which aggregated 150 against 31 in June last. Ten towns reported 11 deaths from small-pox. Fevers contributed 1,504 deaths against 1,430 in the previous month. They were largely prevalent in Vaniyambadi (16.7), Walajapet (14.9), Kurnool (14.7), Ootacamund (13.5), Chicacole (13.21), and Cuddapah (13.1). Dysentery and diarrhoea proved fatal in 644 cases against 523 in June 1895, Vizagapatam suffering the most with a death-rate of 14.6 per mille.
