Report on Festivals during Dasara at Vizianagram in Vizagapatam District.

District	Vizagapatam.
Name of Reporter	D Seetharamaswamy, 3rd Class Hospital Assistant No 428
Name of Festival	Dasara Festival at Vizianagram
Dates of Festival	From 1st to 10th October 1894
Number assembled	About 30,000
Accommodation and Sanitary arrangements made.	Some people found accommodation in private houses and in the houses of relations. Those from adjacent villages returned to their homes every evening, while others put up in local Choultries permanent Sheds for travellers and in topes &c These places were kept clean.
Water Supply	From 28 Public wells, 4 big tanks and private wells - Public wells were kept clean. The four tanks were conserved for drinking & cooking purposes and were prevented from pollution by watchers - No bathing or washing of clothes was allowed in them. A few small tanks were left specially for bathing & washing purposes - In addition to the above there is a very large tank in the centre of the town, called Peddacheruvu, into which a greater portion of town Sewage enters by a big drain. The place where the drain joins emits a very nasty Smell, and in the vicinity of this are situated the Police Hospital, the Maharajah's College, markets &c - Also the market and the Maharajah's stables have Sluices opening into the tank. On market days (i.e) on Sundays thousands of Cattle brought to the market for Sale, are washed in it and the water is used for drinking and cooking purposes by the people who go there from distant villages. Supply of water is Sufficient.
Conservancy	The town was kept clean by the permanent Sanitary Establishment aided by 4 temporary Sergeants - Nine temporary latrines were constructed in addition to 26 Masonry Public latrines and they were kept clean by the permanent Scavengers ~~aided by~~ 14 temporary men. All were used.
Epidemics	None.
General health	Good.
Recommendations of the reporter	Washing of Cattle in Peddacheruvu and the use of its water for drinking & cooking purposes should be prohibited. There is a public latrine very close to "Fish & Mutton market" - These articles get polluted by flies that sit on faecal matter - A Toty should always be placed to clean the latrine as it is used - And the walls of it should be raised high enough and Screens put on at the entrance.
Remarks by the Sanitary Commissioner.	The Sanitary Board has lately dealt with the subject of improving the Peddacheruvu tank. Seeing that it is the great cess pool of the area in which it is situated, its use for any purpose should be absolutely prohibited. The latrine near the market should be removed: enough accommodation should be provided for stall holders only. W. G. King, M.B., C.M., D.P.H. Surgeon Lieut Col Ag. Sanitary Commissioner for Madras
