

Local & Munl. (1895) Department.

MISCELLANEOUS.

G.O., No. 502 m

DATED 20th March 1895.

[Despatch Abstract.]

Water-supply.

Recording, with remarks, Sanitary Engineer's letter report
-ing on the suggestions made by the Sanitary Commissioner re-
garding the---of Madura and Erode in his inspection notes.

3. As to the second mentioned L.C.,
and Dr King's proposal as to improvement
of the water supply at Ennis I think the
suggestion might be tried and the Chairman
directed to construct such a filter on a
small scale. If the Chairman communicates
with me on the subject I will give him any
instructions necessary. Temporary expedients
for improvement of water supply are however
of somewhat doubtful utility and in this
case when there is plenty of water in the
channel the pollution cannot be considerable.
When water is most scarce there is no water
in the channel itself and of course the
filter will be useless and dry (for about
three months I believe) and unless well
guarded would probably be defiled and
not fit for use in succeeding season.

I have the honor to be
your most obedient servant

Alfred
