Water Supply

No. 1342 M. W.

GOVERNMENT OF INDIA.

MILITARY DEPARTMENT.

Simla, the 16th May 1896.

It is requested that the above heading, with number and date of this communication, may be quoted in any subsequent correspondence on this subject.

To

THE SECRETARY TO THE GOVERNMENT OF MADRAS,
Municipal ~~Military~~ *Department.*

SIR,

With reference to the correspondence ending with your letter No. 433/M Mis., dated the 16th March 1896, relative to the provision of a pipe water-supply for the town and the Cantonment of Bellary, I am directed to forward, for the information of His Excellency the Governor in Council, a copy of a further letter from the Director-General of Military Works, urging the necessity for the early provision of a pipe water supply for the Cantonment.

No. 1034 B., dated 16th April 1896, and enclosure.

2. It will be observed that, under the circumstances explained in his letter

the

the Director-General of Military Works recommends the contribution of a lump sum towards the cost of the water-works being made by the Government of India for the supply of water to the Cantonment. With reference to this proposal, I am to say that the Government of India are unable to consider the recommendation until a definite scheme for the provision of a pipe water supply for the town and the Cantonment has been laid before them.

I am,
Sir,
Your most Obedt. Servant,
[illegible] Dallas
Captain R.E.,
for Secretary to the Govt. of India.

Copy to:-
The Dir. Genl., Mily. Wks.

6

Copy of a letter from the Director Genl of Military Works to the Secretary to the Government of India Military Department No. 1034 B.S. 16th April 1896.

No. 936m
22.11.95

In continuation of my letter No. 2891 B.S. 4th October 1895, I have the honor to forward for the information of Government copy of a letter No. 390 dated 29th January 1896, from the Chief Engr., Madras Command, Military Works reporting further on the scheme for the water supply to Bellary city and cantonments, and stating that there is a possibility of the Madras Government giving a grant in aid of 3 lakhs of rupees for the Municipal scheme to enable the city to be supplied with pure water, and recommending that assistance be also given by the Military Department to enable the work to be carried out.

2. In view of the great importance of getting a supply of pure water for the Station, I would so far modify the recommendations contained

in

in my letter above quoted as to recommend to Government that a contribution of one lakh may be made by the Military Department as a grant in aid of the initial expenditure and an annual contribution of 10,000/ to cover share of working expenses and maintenance of the head works and mains. The municipality in return for these contributions to guarantee a minimum supply of 70,000 gallons per diem for the cantonments, and to make no charge for water supplied for use in cantonments.

3 The annual contribution of Rs 10000 for working expenses is calculated as follows. The total cost of working expenses is estimated at Rs 60000 per annum of which Rs 5000/ is due to the extra cost of pumping to enable sufficient head of water to be obtained to command all parts of the cantonments which are on a higher level than the city — of the balance $\frac{1}{11}$th viz Rs 5000 is debitable to the Military Department, the proportion being

being based on the relative number of population of the cantonments and city.

The cost of the military distribution system is estimated to be Rs 1,70000 approximately, so if the present proposals are accepted the initial expenditure on providing the cantonments with pure water will be Rs 2,70,000 and the annual recurring expenditure Rs 10,000 for working charges (pumping, maintenance of mains &ca) of the municipal system plus charges for maintenance of the pipes &ca in cantonments which would probably not exceed Rs 2,000/- per annum making the total amount recurring charges Rs 12,000/.

4 I would suggest the Government of India pressing the Government of Madras to have the scheme worked out and at the same time holding out a hope of a lump sum contribution.

Copy of a letter No. 390 S 29th January 1896, from the Chief Engineer Madras Command, Military Works,

to

to the Director General of Mily Works

With reference to my No 4820 of 10th September 1895, on the subject of a piped water supply for Bellary, I have the honor to report that I had an opportunity in December last of discussing the matter with the Collector of Bellary.

2 From this discussion, and from subsequent correspondence with a Mr Tremenheere, I gather

1stly That it may be possible ~~to a [illegible]~~ to induce the Madras Government to give a grant-in-aid to the Bellary Municipality to enable them to carry out a water supply scheme.

2ndly That the resources of the Municipality will not allow of their providing a yearly sum exceeding Rs 5,000/- for the working and maintenance of water works including interest on any sums which may have to be borrowed and sinking fund to provide for depreciation of machinery and plant and for repayment of loans.

3rdly

3rdly That the Collector of Bellary is not in favor of the scheme for a supply from wells at the foot of the Copper Mountain, and thinks that the Sanitary Engineer to the Government of Madras would be quite prepared to abandon this project if there were a reasonable chance of financing a joint scheme of supply from the Hagari river.

4thly That looking to the great importance of the sanitary condition of Cowle Bazaar which though no longer a part of cantonments, doubtless owes much of its population to the proximity of the cantonment, it might be desirable to ask the Government of India to consider the advisability of bearing a some what larger share of the cost of a water supply scheme than would be due to the actual population of the Military Lines and Fort.

3 The figures given in the rough

Estimate

estimate forwarded to you with my No 4820 d/10th September 1895, showed the total cost of the joint scheme as 7½ lakhs and the annual charges for working and maintenance as Rs 48000/. It was calculated that the military share of initial cost (excluding cantonment distribution) would come to about 1 lakh, and the military share of annual charges to about Rs 9000/. Assuming that a grant-in-aid of 3 lakhs might be obtained from the Madras Government, the calculations showed that the annual charge to be borne by the Municipality would be Rs 60000/ (Rs 58000 was entered by mistake) and this charge would be considerably beyond their means.

4 The figures given in this estimate are, however, mere approximations, and it is hardly possible to deal with the financial aspect of the scheme until the project has been worked out in greater detail. My object in addressing you

now

now is to suggest that the Government of India be moved to urge upon the Madras Government the desirability of preparing a detailed scheme for the water-supply of Bellary to serve both the city and the cantonment and to fix the terms on which the Military Department will join in the scheme, whether on the basis of a share in the initial outlay and cost of maintenance, or on the basis of a rate for water to be supplied by the Municipality to the cantonments system.

COLLECTOR OF

BELLARY.

TO

THE Chief Secretary to Government

L & R Department

Madras

SIR,

I have the honor to submit for sanction and publication a draft declaration for the acquisition of 16 acres of land in the Town of Bellary required for public purposes. The land adjoins the Railway Station and contains a portion of the main supply channel of the mainwaring tank upon which the people of the whole of Brucepetta depend for water for drinking purposes. It was acquired in 1870 as a free hold by Messrs Dymes & Co and lately passed into the hands of one M.R.Ry Kasturi Chetty a pensioned Tahsildar who is intending to make use of it in a manner that would affect the sanitary condition of the tank & who has already cut down all the trees on it except two. The district medical and sanitary officer & the Sanitary Commissioner consider its reservation to be absolutely necessary in the interests of sanitation, & under their advice, the municipal Council has decided to acquire the land.

2 The statement [illegible]tained from the owner of the land is enclosed with a T[illegible]slation in English.

I have the honor to be
