Government of Madras
No: 1805. Office of Sanitary Engineer
Fort Saint George, 10th June/96.

From

J. A. Jones Esq: Mem: Inst. C. E. F. R. S. E.
Sanitary Engineer to Government

To,

The Assistant Sanitary Engineer
Southern Circle, Trichinopoly.

"Dindigul Water works"

Sir,

With reference to your No: D/323 of 7th June 1896, I have the honor to inform you that I have no objection to your modification of the Staff as proposed by you presuming that it has or will receive the approval of the Municipal Council, and I gather from your letter that you have consulted the Municipal Chairman.

2. I doubt however whether two men will be constantly required at so small an Engine. One man ought to be quite sufficient and if the on

2

side plumber proposed, was also a fireman who could take the driver's place when he was ill, I should think that would be all that is required. The Driver won't have more than four to six hours work a day.

3. As to fuel, I think the amount you put down is too much. Cuddapah Station, of similar horse-power to what our Engines will work, used only an average of 12 cwts of wood daily, and I think that a good deal; that Station is working from 2. A.m to 11 A.m. and 1.30 P.m to 7 P.m. on ~~say~~ that consumption.

4. I think one half ton per day may be reckoned; this would be 182 tons per annum or Rs 1274 annually. Eight annas per day ought to be sufficient for oil, Rs 180 or 1454 in all. At first, I think, Rs 15 to Rs 20 might cover fountain repairs say Rs 200 annually

or

or in all Rs 1654 which is against Rs 1550 given in my letter sent to you under my endorsement No: $\frac{1431}{8\text{-}5\text{-}96}$.

5. It, of course, remains to be seen whether these figures will be justified but I think that with care they can be worked to. An additional allotment can be made by and bye if found necessary.

6. A copy of these remarks and your proposals may be communicated to the Divisional Council and arrangements made accordingly.

I have &c.

(Sd) J. A. Jones

Sanitary Engineer to Govt.

P.S.

Please note that in my letter to Government, I did not state that the balances remaining over after providing for Staff would be sufficient; I only pointed out how much was left between the cost of Staff and amounts originally entered when scheme was sanctioned.

No: $\frac{\text{D/337}}{12\text{-}6\text{-}96}$ D/ $\frac{\text{Enclos: 1}}{13\text{-}6\text{-}96}$

True copy with copy of this office No. D/823, d/ 7th June 1876 forwarded to the Chairman, Municipal Council Dindigul, for information.

He is requested to inform the undersigned, what scale of establishment he proposes to adopt and also when the same is to be appointed. It is expected the works will be ready to be handed over to the Chairman very shortly (the Sanitary Engineer to Government expects the works to be fully completed by the end of the current month). It is therefore advisable to have this matter settled before the end of that time. An early reply is requested.

No: D/323.

From

H. A. Minchins Esqr. C.E. A.M.I.C.
Assistant Sanitary Engineer,
Southern Circle

To

The Sanitary Engineer
to Government
Madras

Sir,

Dindigul Water Works.

As I understand the subject of the maintenance staff (in & outdoor) is still under consideration, I have the honor to submit a few modifications as to these proposals for such disposal as you may thin fit. I have endeavoured to keep in mind that extreme economy is necessary, and al that the staff should be as efficient as possib

The establishment proposed in your le

No.

This man should do the fountain repairs. The man will have to know English, estimate for repairs, house services &c he will also have to do the turncocks work. It is anticipated that, if the 2nd Driver or Fireman as proposed by the Sanitary Engineer is called away to do this work the Head driver will be complaining. The plummers might be placed under the P.W. Overseer if he is a good man. I understand from the Chairman Municipal Council that the Overseers time is now more than occupied by looking after public works, encroachments &c and he (Chairman) does not think he would have time to devote to water works as well. The Sanitary Engineer it is believed intended the Overseer to do public works and

and water works as well.

Two fountain cleaners
@ Rs 6 = 12.

One cleaner is insufficient for 24 fountains. At Trichy we have 8 for 74. Two men should do the work.

Total outdoor staff per mensem Rs 42 (taking the maximum pay) or per annum Rs 504/. 504 + 1080 = 1584 Rs per annum for establishment only.

Further, I understand that Rs 1028 only has been allowed for fuel, oil and waste &c; this, I am very doubtful, will be sufficient.

The engine may be expected to consume at least 3/4 ton of wood a day, this I consider low estimate and would prefer to put it at a ton a day. Rs 7/. is what we can now get wood a ton at Dindigul. Other expenses such as oil, waste, tallow sundries, one rupee is a moderate estimate this gives a daily expense of Rs 8/. at the Engine House or Rs 240/. for the month. 8

For the fountain repairs &c Rs 10 per 6
mensem

mensem should at least be allowed. Rs 30.

Total per mensem Rs 270/-

or per annum Rs 3.240/-

The total annual working expenses including establishment will be, therefore, Rs 4824, which, I understand, greatly exceeds the proposed Budget allotment for these works. In this connection, I must ~~could~~ point out no allowance is made for first cost of necessary maintenance tools (such as spanners, chisels, pipe fitting tools, files &c).

It will be necessary to have something definitely settled, as it is anticipated the works will be started before the end of this month and it is advisable to arrange for the maintenance staff at once, to get them into the way of working before handing over to the Municipal Council.

I have the honor &c

II Read Government Order, No 8 M. Mis, dated 21st May 1896 regarding the entertainment of the establishment necessary for the maintenance of water-works, along with the Assistant Sanitary Engineer's letter No D.323/7.6.96 making certain modificatio in the establishment proposed by the Sanitary Engineer to Government, and the reply of the latter thereto.

Resolved by a majority f 6 against 3, that the establishment roposed by the Assistant anitary Engineer, for water-orks, in his letter No D.323/7.6.96 mmunicated to the unicipal Council, along ith the remarks of the nitary Engineer thereon his letter No 1805, dated une 1896, by the Assistant Sanitary

Sanitary Engineer in his endorsement No D.337/12.6.96, be approved, and that the Sanctn of Government be obtained for the same. The dissenting three Councillors think it neces to have a qualified overseer as suggested by Mr Jones in his letter to Government.

Establishment approved to be entertained by the Council.

Indoor:-

1. One driver on Rs 40 rising to Rs 5 by an annual increment of Rs 2-8-0.

2. One fireman on Rs 10 rising Rs 15 by an increment of one Rup per annum.

3. Two coolies at Rs 6 each	Rs 12
4. Two watchmen at Rs 5 each	Rs 1
5. One Sweeper at Rs 3.	Rs
Total	Rs

Outdoor:-

1. One plumber on Rs 24 risi

to Rs 30 by an increment of Rs 2 per annum.

2. Two fountain cleaners at Rs 6 each Rs 12

Total Rs 42

Resolved also that the said establishment be entertained from the first proximo, in anticipation of the Sanction of Government.

M. R. Ry. P. S. Mahomed Mugthoom Rowther, avergal Councillor dissenting.

To

The Chief Secretary
to
Government
Fort Saint George

Sir,

With reference to Government Order, No 861 M. Mis. dated 21st May 1896, communicating the suggestions of the Sanitary Engineer to Governme in regard to the establishme to be entertained for the ~ Dindigul waterworks, I have the honor to submit that the Government Order and the Assistant Sanitary Engineer's letter No $\frac{D.323}{7-6-96}$ making certain modifications in the ~ establishment proposed by the Sanitary Engineer, together ith a reply thereto, from the Sanitary Engineer, dated 0th June 1896 approving almost of the proposed modifications - copies of which are herein ~ inclosed - received from the Assistant Sanitary Engineer, subsequent to the communication of the Government Order under reply, were

laid

laid before the Council, and that the Council resolved to entertain the establishment as modified by the Assistant Sanitary Engineer. A copy of the said Resolution is also herewith submitted.

The public works of the Municipality are now in the charge of an experienced and hardworking overseer drawing Rs 25 per mensem. So far as public works are concerned, he is, though not qualified, practically as good as any overseer that can be got for Rs 60 per mensem, for Municipal Service. If both the waterworks and the public works were entrusted to one subordinate, either the one or the other would be ~ neglected inasmuch as there is enough of work for a single officer in looking after public works, encroachments etc. What is desirable and necessary in connection with the water-works, is a good mechanic - like a plumber – who could personally attend to fittings, repairs etc as proposed by the Assistant Sanitary ~ Engineer and serve also as a driver in cases of emergency, s pointed out by the Sanitary Engineer. Even from a ~ financial point of view, the ppointment of an Overseer on

on a monthly salary of Rs 60 ~ does not appear to be desirable since the maintenance charges now proposed by the Assistant Sanitary Engineer as well as by the Sanitary Engineer, exceed those provided for, both in the original drawing up of the Scheme and in the budget for 1896-97. Further, I apprehend that there would be a necessity for a further extension of the waterworks, at no distant date, as the water works, as they stan at present, could not, in my opinion, supply water ~ sufficient to meet the existing demand. It is therefore highly desirable, that the water works should be maintained as economically as possible.

It is not out of place to state, in this connection, that the present Overseer was, for sometime, in charge of the water works, when the late Sippimuttu Scheme was working. And, if necessary, he may be directed to acquire the requisite knowledge under the Mechanical Engineer, Madras Municipality, at his own expense.

As the Sanitary ngineer's Department wants o have the establishment eady as early as possible, So

So that it may be trained to the work and the waterworks handed over to the Municipality at a very early date, the Council has resolved to entertain the Staff from the 1st July 1896, in anticipation of the Sanction of Government.

I have the honor, therefore, to request you will be good enough to obtain the Sanction of Government for the above ~~Scheme~~.

The necessary Proposition Statement is also submitted along with the other enclosures.
