Administration Report.

Reviewing the — of the Palamcottah Municipal Council for 1895-96.

improved slightly, but neither in the case of officials or non-officials was it satisfactory. The defaulting members should be made to understand that Government expects them to be more regular in their attendance.

3. *Receipts.*—(1) Owing to a further and more careful revision of the registers during the year under review, the net current demand of the taxes on arts, buildings and lands increased by Rs. 166, Rs. 443 and Rs. 58, respectively. The average incidence of the first two taxes, however, though it increased slightly, was still considerably below the general average for municipalities in 1894–95. The collections under these heads continued to be good. Coercive measures were adopted to a much larger extent than in the previous year, and the execution of warrants was prompt.

(2) There was an increase in the receipts from the tax on vehicles, animals and carts, and from the sale of sweepings, which in the case of the former is again ascribed to the strict enforcement of the provisions of the Act.

(3) The number of houses served by the private scavenging agency and the income from this source rose from 2,184 and Rs. 2,298 to 2,462 and Rs. 3,292, respectively, and the service was worked at a profit of Rs. 548 to the municipal council. It is noted that with this profit the council intends to improve the service in the current year.

4. *Expenditure.*—(1) *Public Works.*—A compound wall round the new Protestant burial-ground and a vaccine shed in the hospital compound, which were constructed at a cost of Rs. 1,097 and Rs. 437, respectively, were the only new works of importance undertaken during the year. The total outlay on communications amounted to Rs. 2,316, or 51·7 per cent. of the net municipal income from tolls, and the town roads are reported by the Revenue Divisional Officer to have been in good order.

(2) *Education.*—The net expenditure on education was Rs. 1,961, or 12·4 per *cent. of the receipts from taxation. All but Rs. 417 of this sum was devoted to primary education. As in the previous year, the municipal council maintained a primary school for Panchamas on the salary-result system, and aided three secondary schools with salary grants and ten primary schools with result grants.* There was a small decline in the attendance at all these institutions, but the municipal and aided primary schools appear to have done fairly well at the departmental and grant examinations, and nearly the whole of the allotment for result grants was utilized. No information has again been furnished regarding the working of the salary-grant schools, and the Director's attention will, in this connection, be drawn to the Chairman's remarks at the close of paragraph 28 of his report. The total number of boys under instruction in the municipal and aided schools fell from 1,198 to 1,132, or 85·4 per cent. of the male population of school-going age, but it was still far above the general average for municipalities in 1894–95. From the statements submitted by the Assistant Inspector of Schools, it appears that the proportion of untrained and unpassed teachers employed in the result-system schools is still large. The council should insist on the managers of these schools employing none but duly qualified men, on pain of a reduction in the grants payable to them.

(3) *Medical Relief.*—There was an increase in the total number of patients treated at the municipal hospital, which is ascribed to the growing popularity of the institution. The midwife employed by the municipal council attended 107 cases of labour against 44 during six months in 1894–95—a satisfactory advance. The municipal council's attention will be drawn to the District Medical and Sanitary Officer's remarks regarding the necessity for an extra sweeper for the hospital.

(4) *Vaccination and Vital Statistics.*—The total number of persons vaccinated during the year was 1,055, or 61 more than in 1894–95. The quality of the work declined slightly, but continued to be fair. Infantile vaccination was still backward, the total number of children under one year successfully operated on being twenty-five less than in the previous year and 186 less than the registered number of births. The Government, however, notes with pleasure that although there were 409 prosecutions for failure to have children vaccinated, the council only found it necessary

to press for a conviction in 34 cases, the majority of the other accused having complied with the requirements of the law subsequent to the institution of criminal proceedings.

There was a very satisfactory improvement in the registration of births and deaths, but the returns cannot yet be regarded as quite complete, the recorded rates being still below the normal.

(5) *Sanitation.*—All but 4·2 per cent. of the allotment under conservancy was utilized, and the expenditure amounted to 26·8 per cent. of the receipts. From paragraph 38 of the Chairman's report it appears that the improvement of the sanitary condition of the town and the remarks and suggestions made by the Sanitary Commissioner in his inspection notes, recorded in G.O., No. 795 M., dated 9th May 1896, are receiving notice. The council should not relax its efforts until all of these latter have been attended to, as far as funds permit. In this connection, its attention will be drawn to the Divisional Officer's remark at the close of paragraph 3 of his endorsement.

5. *General Remarks.*—The year closed with a balance of Rs. 4,860, or 19·3 per cent. of the current receipts.

The administration of the municipality during the year under review showed an improvement on that of the previous year and was, on the whole, satisfactory.

(True Extract.)

J. F. PRICE,
Chief Secretary.

To the Chairman, Municipal Council, Palamcottah.
Collector of Tinnevelly.
,, President, District Board, Tinnevelly.
,, Accountant-General.
,, Director of Public Instruction.
,, Surgeon-General.
Sanitary Commissioner.
Sanitary Engineer.

s' Table.

Exd. A. Baitt

The figures for 1894–95 for coercive processes are not given for purposes of comparison with those for 1895–96; but the large number of processes issued during 1895–96 shows that collection work was done promptly. There has been a large increase in the number of houses brought under private scavengering system during the year. There has been a slight falling off in the strength of the Panchama and the other salary-result schools maintained by the municipality. The decrease in the strength of the Panchama school has not been explained. The attendance of patients at the hospital has also risen. It is to be regretted that cholera prevailed in the municipality for nine months in the year. The chief source of cholera in this, as in the sister municipality of Tinnevelly, is the use for drinking purposes of channel water, which is open to all sorts of contamination. The sooner the suggestions of the Sanitary Commissioner regarding the erection of filter-beds on the banks of the channels are carried out the better.

(Signed) T. RAGHAVAYYA,
Head-quarters Deputy Collector.

30th May 1896.

Endorsement on Current No. 969-Gl.

Submitted to Government, Local and Municipal Department.

2. There were thirty-two meetings of the council during the year against thirty-one in the previous year; only four meetings were adjourned for want of a quorum.

3. The entire final demand under taxes, tolls, rents and other fees amounted to Rs. 17,008, of which Rs. 16,884 were collected within the year, leaving a balance of Rs. 124; of this balance, Rs. 76 have been written off as irrecoverable, leaving Rs. 47 to be collected during the current year. The collections may be regarded as satisfactory. The number of warrants issued during the year was 544, involving a sum of Rs. 1,128, against 286 of the previous year. Although the number of processes issued was larger than in the previous year, still in no case was property brought to sale.

4. There was an increase in the demand under tax on arts, buildings, &c., over that of the previous year, due to the careful revision of the assessment registers. The incidence of taxation consequently rose from As. 12–10 in the previous year to As. 13–6 per head.

5. The progress made in the private scavenging system was satisfactory. The demand was larger than that of the previous year and was collected in full within the year. The service was made more than self-supporting.

6. The outlay on communications was Rs. 2,316, or more than 50 per cent. of the income from tolls as required by Government. The roads were, on the whole, in fair condition.

7. On receipt of G.O., No. 1167 M., dated 24th July 1895, a special report on the registration of vital statistics was called for from the Chairman and the work done by the council under this head shows a great improvement.

8. The expenditure on conservancy was Rs. 6,745 against Rs. 5,220 in the previous year, the entertainment of additional toties and purchase of iron night-soil carts forming the chief items.

9. The administration of the municipality during the year under report was, on the whole, satisfactory.

(Signed) A. W. B. HIGGENS,
Collector.

5th June 1896.

Order—No. 1214 M., dated 18th July 1896.

The receipts and charges of the Palamcottah Municipality for 1895–96 are compared below with the budget and revised estimates for the year and the actuals of 1894–95:—

2. The municipal council held thirty-two meetings against thirty-one in 1894–95 and two were adjourned for want of a quorum. The average attendance of members

the purchase of two iron latrines and twenty-five iron dust-bins and for making two additional sewage carts during the current year. All the latrines are freely resorted to by the people. The dry-earth system is adopted in all the latrines. The sweepings are, as usual, burnt in the cinerator and the ashes obtained therefrom are mixed with the night-soil buried in pits outside the town and ultimately sold to private individuals for manuring their fields.

39. *Grant IV, Lighting.*—This was kept under the direct management of the council. The expenditure incurred under this head was Rs. 1,577 against Rs. 1,499 in 1894–95 and Rs. 1,610 in the revised estimate. The increase of Rs. 78 over the actuals of the previous year is due to the increased rate at which kerosene-oil was purchased during the year. The number of lamps lit during the year was the same as in the previous year, viz., 209. The cost of each lamp per mensem was As. 10–1 against As. 9–7 in 1894–95.

40. *Travellers' Bungalow.*—Rs. 157 was spent under this head against Rs. 140 in 1894–95. Adding to this the cost of repairs to the buildings which amounted to Rs. 25, the total expenditure was Rs. 182.

41. *Other Charges.*—Under this head there was an expenditure of Rs. 417 against Rs. 273 in the previous year. The increase is due to the payment of compensation for the land acquired for the Protestant burial-ground.

42. *Grant V, Supervision and Management.*—The charges incurred under this head amounted to Rs. 2,296 against Rs. 2,243 in 1894–95. The increase is chiefly due to the making of two almirahs and one wooden box for keeping records.

43. *Advances recoverable—Others.*—Rs. 303 was advanced during the year to the Sanitary Engineer to Government for taking preliminary surveys and levels in connection with the joint water-supply scheme. This amount remained unadjusted at the close of the year, as no account of the actual expenditure incurred was submitted by the above officer.

44. *IV. Closing Balance.*—The year under report closed with a balance of Rs. 4,860, or 19·2 per cent. of the actual receipts, against Rs. 5,209, or 21·4 per cent. in the previous year.

Annual Concise Report for 1895–96.

1. *Public Health.*—Cholera prevailed in an epidemic form from October. There were in all 113 attacks and sixty-six deaths. An extra cholera staff was maintained by the municipality and a hospital assistant was deputed for cholera duty solely. The disease abated towards the end of January but made its appearance again in February. The extra staff was again maintained and the disease was prevented from assuming an epidemic form.

2. *Vital Statistics.*—The total number of births registered in the municipal office during the year was 640 against 580 in the preceding year, while the total number of deaths was 522 against 465. The ratio of births and deaths per 1,000 of population was 34·25 and 27·93 respectively. The total number of births and deaths for the past five years is given below in a tabular form :—

—	Births.			Deaths.		
	Males.	Females.	Total.	Males.	Females.	Total.
1891–92	349	285	634	316	307	623
1892–93	328	319	647	183	195	378
1893–94	306	312	618	308	286	594
1894–95	285	295	580	248	217	465
1895–96	311	329	640	262	260	522

3. *Sanitation.*—The roads are in good order and are kept clean. The refuse of the town is burnt in a cinerator and the resulting ashes are used for covering night-soil. Seven sweepers and seven carts are used for conservancy purposes. There are at present twelve public latrines; of these, six are pucka-built, four iron and two mere brick-wall enclosures. Out of these, three are set apart solely for females. The latrines are freely resorted to by the public and are cleaned twice a day. The night-soil is removed to the depôt and buried. Private scavenging is in force

in 2,462 houses, there being an increase of 278 over that of the preceding year. Four wooden and thirty iron hand-carts, all covered, are used for removing the night-soil from private latrines. There are 131 dust-bins, of which 106 are masonry and twenty-five of corrugated iron. These are cleaned daily and kept in fairly good condition. Provision has been made for twenty-five additional iron dust-bins in this year's budget. Two hundred and forty cesspools exist in the town; eight toties and four carts are employed for keeping these clean. Two additional carts and four more toties will be employed from this year.

4. *Vaccination*—is compulsory in the municipality. A first-class vaccinator is employed. He vaccinated 1,041 cases during the year against 994 of the previous year, showing an increase of forty-seven; of these, 958 were successful. Four hundred and sixty-nine children under one year of age were vaccinated against 487 of the previous year. A house-to-house inspection was made in accordance with Circular No. 1558-V., dated 14th November 1893, of the Sanitary Commissioner for the extending of re-vaccination. The number of cases re-vaccinated was 169.

5. *Hospital Buildings.*—(*a*) The main building consists of two male wards—one surgical, the other for medical cases—and a female ward. Each ward has a bath-room attached to it. Detached from the main building is a row of six rooms with a partition wall in the centre dividing them into two, one half for males and the other half for females. There is a cook-room and a contractor's store-room attached to it for the in-patient department. There is also an operation room with the store-room for medicines detached from the main building.

The out-patient department consists of a surgery and a place for prescribing and an office-room in which the office of the District Medical and Sanitary Officer is located. There are also two small dressing-rooms—one for males and the other for females.

In the hospital compound a vaccine depôt has been recently built.

(*b*) *State of repair of Buildings.*—The main buildings are in fair state of repair. The kitchen adjoining the main building requires repair to its roof, better lighting, ventilation and a new floor. The roofing of the store-room requires repair. The flooring of the wards should be cemented or asphalted. The latter would be better, as the cement may crack during the hot weather. The flooring of the out-patient department is also very uneven and requires repairing.

(*c*) *State of Furniture.*—The furniture is in a fair state of repair.

(*d*) *Inspections.*—The hospital was inspected by Surgeon-Major-General C. Sibthorpe, Surgeon-General with the Government of Madras, on the 8th October 1895, and by Surgeon-Lieutenant-Colonel W. G. King, Sanitary Commissioner of Madras, on the 1st November 1895.

(1) Steps taken to carry out recommendations of Surgeon-General :—

Resolution passed at a municipal meeting held on 26th November 1895—

"The council will try to carry out the suggestions of the Surgeon-General as far as funds will permit. Rs. 300 has been provided in the budget for 1896–97 for the purchase of iron cots with planks to replace the wooden cots."

(2) No steps have been taken to carry out the recommendations made by other inspecting officers.

(*e*) Recovered from paying patients for dieting—*Nil.* Recovered from paying patients for medicines—Rs. 182–12–0.

(*f*) The number of patients treated during the year was 420 in and 15,753 out patients, against 412 in and 14,541 out patients, respectively, of the preceding year, showing an increase in both in and out patients.

(*g*) There were twenty-five deaths.

The causes of death were—anæmia due to privation, abscess of liver, ascitis, enteritis, tubercular peritonitis, tetanus, valvular disease of heart, spinal injury, dysentery, gangrene, empyema and shock after operation.

(*h*) Five hundred and twenty-four minor and fifty-seven major operations were performed during the year, against 418 minor and 37 major of the preceding year.

(*i*) Establishment is efficient. An extra compounder has been sanctioned, but an extra sweeper is very necessary.

(*i*) A diplomaed midwife is attached to the hospital; 107 cases were attended by her during the year, showing an increase of sixty-three. The large increase is due to the midwife having been on six months' suspension during 1894–95.

Palamcottah,
24th April 1896.

(Signed) K. C. SANJANA, Surgn.-Major,
District Medical and Sanitary Officer.

Submitted to the Collector.

2. The roads are in good condition.

3. The receipts of the municipality have during the year increased all round except under the heads of "sales of medicines" and "interest on investments."

the purchase of two iron latrines and twenty-five iron dust-bins and for making two additional sewage carts during the current year. All the latrines are freely resorted to by the people. The dry-earth system is adopted in all the latrines. The sweepings are, as usual, burnt in the cinerator and the ashes obtained therefrom are mixed with the night-soil buried in pits outside the town and ultimately sold to private individuals for manuring their fields.

39. *Grant IV, Lighting.*—This was kept under the direct management of the council. The expenditure incurred under this head was Rs. 1,577 against Rs. 1,499 in 1894–95 and Rs. 1,610 in the revised estimate. The increase of Rs. 78 over the actuals of the previous year is due to the increased rate at which kerosene-oil was purchased during the year. The number of lamps lit during the year was the same as in the previous year, viz., 209. The cost of each lamp per mensem was As. 10–1 against As. 9–7 in 1894–95.

40. *Travellers' Bungalow.*—Rs. 157 was spent under this head against Rs. 140 in 1894–95. Adding to this the cost of repairs to the buildings which amounted to Rs. 25, the total expenditure was Rs. 182.

41. *Other Charges.*—Under this head there was an expenditure of Rs. 417 against Rs. 273 in the previous year. The increase is due to the payment of compensation for the land acquired for the Protestant burial-ground.

42. *Grant V, Supervision and Management.*—The charges incurred under this head amounted to Rs. 2,296 against Rs. 2,243 in 1894–95. The increase is chiefly due to the making of two almirahs and one wooden box for keeping records.

43. *Advances recoverable—Others.*—Rs. 303 was advanced during the year to the Sanitary Engineer to Government for taking preliminary surveys and levels in connection with the joint water-supply scheme. This amount remained unadjusted at the close of the year, as no account of the actual expenditure incurred was submitted by the above officer.

44. *IV. Closing Balance.*—The year under report closed with a balance of Rs. 4,860, or 19·2 per cent. of the actual receipts, against Rs. 5,209, or 21·4 per cent. in the previous year.

Annual Concise Report for 1895–96.

1. *Public Health.*—Cholera prevailed in an epidemic form from October. There were in all 113 attacks and sixty-six deaths. An extra cholera staff was maintained by the municipality and a hospital assistant was deputed for cholera duty solely. The disease abated towards the end of January but made its appearance again in February. The extra staff was again maintained and the disease was prevented from assuming an epidemic form.

2. *Vital Statistics.*—The total number of births registered in the municipal office during the year was 640 against 580 in the preceding year, while the total number of deaths was 522 against 465. The ratio of births and deaths per 1,000 of population was 34·25 and 27·93 respectively. The total number of births and deaths for the past five years is given below in a tabular form:—

—	Births.			Deaths.		
	Males.	Females.	Total.	Males.	Females.	Total.
1891–92	349	285	634	316	307	623
1892–93	328	319	647	183	195	378
1893–94	306	312	618	308	286	594
1894–95	285	295	580	248	217	465
1895–96	311	329	640	262	260	522

3. *Sanitation.*—The roads are in good order and are kept clean. The refuse of the town is burnt in a cinerator and the resulting ashes are used for covering night-soil. Seven sweepers and seven carts are used for conservancy purposes. There are at present twelve public latrines; of these, six are pucka-built, four iron and two mere brick-wall enclosures. Out of these, three are set apart solely for females. The latrines are freely resorted to by the public and are cleaned twice a day. The night-soil is removed to the depôt and buried. Private scavenging is in force in 2,462 houses, there being an increase of 278 over that of the preceding year. Four wooden and thirty iron hand-carts, all covered, are used for removing the night-soil from private latrines. There are 131 dust-bins, of which 106 are masonry and twenty-five of corrugated iron. These are cleaned daily and kept in fairly good condition. Provision has been made for twenty-five additional iron dust-bins in this year's budget. Two hundred and forty cesspools exist in the town; eight toties and four carts are employed for keeping these clean. Two additional carts and four more toties will be employed from this year.

4. *Vaccination*—is compulsory in the municipality. A first-class vaccinator is employed. He vaccinated 1,041 cases during the year against 994 of the previous year, showing an increase of forty-seven; of these, 958 were successful. Four hundred and sixty-nine children under one year of age were vaccinated against 487 of the previous year. A house-to-house inspection was made in accordance with Circular No. 1558-V., dated 14th November 1893, of the Sanitary Commissioner for the extending of re-vaccination. The number of cases re-vaccinated was 169.

5. *Hospital Buildings.*—(*a*) The main building consists of two male wards—one surgical, the other for medical cases—and a female ward. Each ward has a bath-room attached to it. Detached from the main building is a row of six rooms with a partition wall in the centre dividing them into two, one half for males and the other half for females. There is a cook-room and a contractor's store-room attached to it for the in-patient department. There is also an operation room with the store-room for medicines detached from the main building.

The out-patient department consists of a surgery and a place for prescribing and an office-room in which the office of the District Medical and Sanitary Officer is located. There are also two small dressing-rooms—one for males and the other for females.

In the hospital compound a vaccine depôt has been recently built.

(*b*) *State of repair of Buildings.*—The main buildings are in fair state of repair. The kitchen adjoining the main building requires repair to its roof, better lighting, ventilation and a new floor. The roofing of the store-room requires repair. The flooring of the wards should be cemented or asphalted. The latter would be better, as the cement may crack during the hot weather. The flooring of the out-patient department is also very uneven and requires repairing.

(*c*) *State of Furniture.*—The furniture is in a fair state of repair.

(*d*) *Inspections.*—The hospital was inspected by Surgeon-Major-General C. Sibthorpe, Surgeon-General with the Government of Madras, on the 8th October 1895, and by Surgeon-Lieutenant-Colonel W. G. King, Sanitary Commissioner of Madras, on the 1st November 1895.

(1) Steps taken to carry out recommendations of Surgeon-General:—

Resolution passed at a municipal meeting held on 26th November 1895—

"The council will try to carry out the suggestions of the Surgeon-General as far as funds will permit. Rs. 300 has been provided in the budget for 1896–97 for the purchase of iron cots with planks to replace the wooden cots."

(2) No steps have been taken to carry out the recommendations made by other inspecting officers.

(*e*) Recovered from paying patients for dieting—*Nil.* Recovered from paying patients for medicines—Rs. 182–12–0.

(*f*) The number of patients treated during the year was 420 in and 15,753 out patients, against 412 in and 14,541 out patients, respectively, of the preceding year, showing an increase in both in and out patients.

(*g*) There were twenty-five deaths.

The causes of death were—anæmia due to privation, abscess of liver, ascitis, enteritis, tubercular peritonitis, tetanus, valvular disease of heart, spinal injury, dysentery, gangrene, empyema and shock after operation.

(*h*) Five hundred and twenty-four minor and fifty-seven major operations were performed during the year, against 418 minor and 37 major of the preceding year.

(*i*) Establishment is efficient. An extra compounder has been sanctioned, but an extra sweeper is very necessary.

(*j*) A diplomaed midwife is attached to the hospital; 107 cases were attended by her during the year, showing an increase of sixty-three. The large increase is due to the midwife having been on six months' suspension during 1894–95.

Palamcottah,
24th April 1896.

(Signed) K. C. SANJANA, Surgn.-Major,
District Medical and Sanitary Officer.

Submitted to the Collector.

2. The roads are in good condition.

3. The receipts of the municipality have during the year increased all round except under the heads of "sales of medicines" and "interest on investments."

17. *Fines under Municipal and other Acts.*—The income derived under this head was Rs. 319 or Rs. 28 in excess of the actuals of the previous year. The excess is due to the large number of prosecutions instituted under section 221 of the Act.

18. *Interest on Investments—Medical.*—The interest due by Government on the funded capital of the municipal hospital at this station was fully recovered within the year, viz., Rs. 2,845. As compared with the previous year there was a large decrease of Rs. 813, which is chiefly due to the causes explained in paragraph 20 of the administration report for 1894–95.

19. *Grants and Contributions from Government—Education—Other Purposes.*—The income under this head exceeded that of the previous year by Rs. 37. The excess is due to the recovery from Government of salary grant on account of the drawingmaster newly entertained from the 19th June 1895.

20. *Contributions from Local Boards—Medical.*—Rs. 400 being one-fourth of the net cost of the hospital for the previous year was recovered from the Taluk Board, Tinnevelly, during the year under report.

21. *Miscellaneous—Private Scavenging.*—The number of houses served on the 31st March 1896 was 2,462 against 2,184 on the corresponding date of the previous year. Of the above number 390 houses were cleaned by the municipal agency without fees being collected on the ground that they were mere huts not liable to house-tax under section 63 (3) of Act IV of 1884, *vide* rules framed by the council, an extract from which is annexed below for the information of Government.

"Such of the owners or occupiers who pay no house-tax to the municipality shall have the benefit of the municipal agency free of all charges." The demand under this head, excluding the arrears of the previous year, was Rs. 3,290 against Rs. 2,298 in 1894–95. The decrease in the latter is due to the levy of fees at the rate of one anna per house instead of two annas in the case of natives for the first half-year of 1894–95. The demand assessed was fully collected within the year. The expenditure incurred under this head amounted to Rs. 2,744, of which Rs. 2,394 was incurred on account of establishment and Rs. 350 on account of contingencies. It will be seen from the above figures that the service was worked at a profit of Rs. 546 during the year under report. The council proposes to utilize the saving by the entertainment of additional toties and by the purchase of additional iron night-soil carts. The number of cases prosecuted under section 221 was 320 against 144 in the previous year. Of the above number 295 cases were convicted, 13 were discharged, 8 were withdrawn for various reasons and 4 remained undisposed of at the close of the year.

The arrears of 1894–95 amounting to Rs. 1–8–0 were also collected within the year.

III.—EXPENDITURE.

22. The total expenditure was Rs. 25,555 against Rs. 26,220 in the revised estimate and Rs. 21,808, the actuals of the previous year. As compared with the previous year there was an increase of Rs. 3,789 under Grants I, III, IV and V and under the head "Advances recoverable," counterbalanced by a decrease of Rs. 42 under Grant II. The principal variations will be explained below.

23. *Grant I, Public Works—Communications.*—The expenditure under this head amounted to Rs. 2,316 against Rs. 2,350 in the revised estimate. Of this sum Rs. 465 was spent on new works and Rs. 1,851 on repairs. The decrease being small calls for no remarks.

24. *Buildings.*—The outlay under new works and repairs was Rs. 2,266 against the revised estimate of Rs. 2,310. As compared with the previous year there was a large increase of Rs. 1,762 in the current expenditure, which is attributable mainly to the construction of a vaccine shed in the hospital compound and a pucka compound wall round the new Protestant burial-ground.

25. *Drainage and Water-supply.*—Rupees 145 was spent under this head against Rs. 240 in the previous year. The increase in the latter is due to the construction of an outlet on the eastern bank of the Mulikulam reservoir.

26. *Grant II, Education—Training Schools—Stipends to Normal Students.*—Rs. 27 was spent under this head against Rs. 30 in the revised estimate and Rs. 28, the actuals of the previous year. The expenditure of Rs. 27 above referred to relates to the payment of stipends to one old student for six months from January 1895. As compared with the budget there was a decrease of Rs. 930 which is due to the fact that no teacher was available for training during the year.

27. *Municipal Schools on Salary-result System.*—The council continued to maintain a Primary school for Panchamas on the salary-result system. The number of boys on the rolls on the 31st March 1896 was 41 against 43 in the previous year; but the average attendance throughout the year was only 21. The total cost of maintaining the school was Rs. 177, of which Rs. 159 was incurred on account of establishment and contingencies and Rs. 18, being result grants earned for 1895–96, was paid to the teacher of the said school. The school was examined for result grants by the Assistant Inspector and out of eighteen pupils presented for examination under the infant, 1st and 2nd standards, thirteen passed. It appears from the remarks of the Assistant Inspector in statement IV herewith sent that the school acquitted itself very satisfactorily at the grant examination. This is due to the exertions of the inspecting schoolmaster employed by this municipality.

28. *Salary Grants.*—Three Lower Secondary schools were aided with salary grants during the year. The amount spent under this head was Rs. 711 against Rs. 1,070 in the revised estimate. The decrease is due to the payment of salary grants to the above schools at the reduced rates prescribed in the Director's proceedings, No. 2022, dated 9th March 1894. The number of boys on the rolls on the 31st March 1896 was 464 against 500 on the corresponding date of the previous year. I regret I am unable to report on the working of the schools, as neither the Inspector's report on the state and progress of the schools, nor the Director's review thereon, was communicated to this office.

29. *Result Grants.*—Of the eleven primary schools registered at the beginning of the year, ten were examined and one was closed during the year. The amount passed by the educational officer for the above 10 schools was Rs. 662 which was fully paid within the year. Adding to this the sum of Rs. 50 paid to the Chettiakudy street school for 1894–95, the totai expenditure came up to Rs. 712 against Rs. 630 in the revised estimate. The excess was met by the transfer of funds from the allotment under "Salary Grants." Payment was made to all the schools at the maximum rates allowed by the revised Grant-in-aid Code. The number of boys on the rolls on 31st March 1896 was 627 against 655 (exclusive of the figure relating to the Chettiakudy street school—*vide* memorandum, No. 1035, dated 29th July 1895) in 1894–95. The decrease in the number of boys is due to the opening of a Lower Secondary school by the C.M.S. Mission in the Murugankurichi ward. From the statement submitted by the Assistant Inspector, it is observed that the number of boys presented and passed in compulsory subjects was 368 and 315, respectively, against 382 and 310 in 1894–95. The percentage of passes to the total number presented showed an improvement on that of the previous year. Of the several optional subjects taught in the schools, drawing was one which was introduced during the year for the first time. One drawing-master was entertained by the municipality on a salary of Rs. 15 per mensem with the sanction of Government conveyed in G.O., Mis. No. 657 M., dated 10th April 1895. Physical education continued to be satisfactory.

30. *Inspection.*—The expenditure under this head amounted to Rs. 149 against Rs. 157 in 1894–95. For the supervision of Primary schools in the town one inspecting schoolmaster was employed during the year on a salary of Rs. 30 per mensem; one-third of his salary was paid by this municipality and two-thirds by the Tinnevelly Municipality. His work during the year continued to be satisfactory.

31. *Common Gymnasium.*—Rs. 111 was spent under this head or Rs. 17 less than the actuals of the previous year. Pupils in each of the Primary schools aided by the municipality receive instructions in gymnastics once a week and the instructor works

No. 1214 M., 18th July 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper:—

From M.R.Ry. S. R. KRISHNASWAMI AIYANGAR Avargal, Chairman-Delegate, Municipal Council, Palamcottah, to the Chief Secretary to Government (through the Divisional Officer and Collector of Tinnevelly), dated 27th May 1896, No. 213.

I have the honour to submit the annual report on the working of this municipality for 1895–96, together with the enclosures specified below:—

(1) Statements of receipts and charges for 1895–96.
(2) Statements of the state and progress of male education for 1895–96.
(3) District Medical and Sanitary Officer's report for 1895–96.
(4) Returns of vaccination for 1895–96.
(5) Returns of births and deaths for 1895–96.
(6) Copy of resolution No. 1, dated 23rd May 1896.

I.—Constitution of Municipal Council.

2. The office of Chairman continued to be held by Mr. Balu S. Srinivasa up to the 21st March 1896, when his term of office as councillor expired, and the Revenue officer in charge of the division assumed charge and administered the affairs of the municipality by delegating his powers to the undersigned during the remaining portion of the year. The actual number of councillors on the 31st March 1896 was only nine against the sanctioned strength of twelve members. Three elective seats fell vacant at the close of the year under report, and these vacancies were filled by election on the 3rd April 1896. The total number of registered voters in the Murugankurichy, Fort and Cantonment wards on 31st March 1896, as per lists revised on the 15th October 1895, was 134, 171 and 88 respectively against 122, 154 and 83 on the corresponding date of the year 1894–95.

3. The council held 32 meetings during the year against 31 in the previous year, and only 4 meetings had to be adjourned as the number of councillors present on each occasion was not sufficient to form a quorum. The average attendance of councillors at each meeting actually held was 6·22 (official 1·25 and non-official 4·97) against 5·5 (official 1·2 and non-official 4·3) in the previous year.

II.—Receipts.

4. The opening balance was Rs. 5,209 and the actual receipts of the year from all sources amounted to Rs. 25,206, of which Rs. 15,802 was derived from taxation and Rs. 9,404 from miscellaneous sources. The total expenditure was Rs. 25,555 and the year thus closed with a balance of Rs. 4,860 which tallies with the figures in the treasury accounts to the credit of the municipality. The actual receipts of the year were in excess of those of the previous year, and the revised estimate by Rs. 863 and Rs. 706, respectively, the increase occurring mainly under the several heads of taxation and private scavenging.

3. Water-tax on buildings and lands is levied at ✓ per cent.
4. Tax on vehicles and animals is levied ~~at~~ at the maximum rates.
5. Tax on carts, &c., is levied at Rs. 2 per cart per annum.
6. Tolls are levied ~~at the maximum rates.~~ by the District Board Tinnevelly.
7. License-fees are levied at the rates sanctioned in G.Os Nos 2294/20-12-78, 269/9-7-85, 1224/7-8-91 & 927/20-7-94
8. The house-tax registers were last revised in the official year 1895-96 and the land tax registers in the official year. 1895-96.
9. Total extent of land assessed is 191 acres. and 36 cents
10. The mode of estimating the annual rental of houses and lands is as follows:—

House tax. The assessment was levied at the maximum rate of 7½ per cent on the annual value calculated in accordance with section 65 (1) of Act IV of 1884. In the case of houses let out the actual rent was taken for the purpose of assessment.

Land tax. The mode of estimating the annual rental of lands was the same as that adopted for house assessment.

Palamcotta

the purchase of two iron latrines and twenty-five iron dust-bins and for making two additional sewage carts during the current year. All the latrines are freely resorted to by the people. The dry-earth system is adopted in all the latrines. The sweepings are, as usual, burnt in the cinerator and the ashes obtained therefrom are mixed with the night-soil buried in pits outside the town and ultimately sold to private individuals for manuring their fields.

39. *Grant IV, Lighting.*—This was kept under the direct management of the council. The expenditure incurred under this head was Rs. 1,577 against Rs. 1,499 in 1894–95 and Rs. 1,610 in the revised estimate. The increase of Rs. 78 over the actuals of the previous year is due to the increased rate at which kerosene-oil was purchased during the year. The number of lamps lit during the year was the same as in the previous year, viz., 209. The cost of each lamp per mensem was As. 10–1 against As. 9–7 in 1894–95.

40. *Travellers' Bungalow.*—Rs. 157 was spent under this head against Rs. 140 in 1894–95. Adding to this the cost of repairs to the buildings which amounted to Rs. 25, the total expenditure was Rs. 182.

41. *Other Charges.*—Under this head there was an expenditure of Rs. 417 against Rs. 273 in the previous year. The increase is due to the payment of compensation for the land acquired for the Protestant burial-ground.

42. *Grant V, Supervision and Management.*—The charges incurred under this head amounted to Rs. 2,296 against Rs. 2,243 in 1894–95. The increase is chiefly due to the making of two almirahs and one wooden box for keeping records.

43. *Advances recoverable—Others.*—Rs. 303 was advanced during the year to the Sanitary Engineer to Government for taking preliminary surveys and levels in connection with the joint water-supply scheme. This amount remained unadjusted at the close of the year, as no account of the actual expenditure incurred was submitted by the above officer.

44. *IV. Closing Balance.*—The year under report closed with a balance of Rs. 4,860, or 19·2 per cent. of the actual receipts, against Rs. 5,209, or 21·4 per cent. in the previous year.

ANNUAL Concise Report for 1895–96.

1. *Public Health.*—Cholera prevailed in an epidemic form from October. There were in all 113 attacks and sixty-six deaths. An extra cholera staff was maintained by the municipality and a hospital assistant was deputed for cholera duty solely. The disease abated towards the end of January but made its appearance again in February. The extra staff was again maintained and the disease was prevented from assuming an epidemic form.

2. *Vital Statistics.*—The total number of births registered in the municipal office during the year was 640 against 580 in the preceding year, while the total number of deaths was 522 against 465. The ratio of births and deaths per 1,000 of population was 34·25 and 27·93 respectively. The total number of births and deaths for the past five years is given below in a tabular form :—

—	Births.			Deaths.		
	Males.	Females.	Total.	Males.	Females.	Total.
1891–92	349	285	634	316	307	623
1892–93	328	319	647	183	195	378
1893–94	306	312	618	308	286	594
1894–95	285	295	580	248	217	46[illegible]
1895–96	311	329	640	262	260	[illegible]

3. *Sanitation.*—The roads are in good order and are kept clean. The refuse of [illegible] is burnt in a cinerator and the resulting ashes are used for covering night-soil. [illegible] pers and seven carts are used for conservancy purposes. There are at present twel[illegible] nes; of these, six are pucka-built, four iron and two mere brick-wall enclosures [illegible] three are set apart solely for females. The latrines are freely resorted to by the p[illegible] eaned twice a day. The night-soil is removed to the depôt and buried. Private sca[illegible] force

in 2,[illegible]62 houses, there being an increase of 278 over that of the preceding year. Four wooden and thirty iron hand-carts, all covered, are used for removing the night-soil from private latrines. There are 131 dust-bins, of which 106 are masonry and twenty-five of corrugated iron. These are cleaned daily and kept in fairly good condition. Provision has been made for twenty-five additional iron dust-bins in this year's budget. Two hundred and forty cesspools exist in the town; eight toties and four carts are employed for keeping these clean. Two additional carts and four more toties will be employed from this year.

4. *Vaccination*—is compulsory in the municipality. A first-class vaccinator is employed. He vaccinated 1,041 cases during the year against 994 of the previous year, showing an increase of forty-seven; of these, 958 were successful. Four hundred and sixty-nine children under one year of age were vaccinated against 487 of the previous year. A house-to-house inspection was made in accordance with Circular No. 1558-V., dated 14th November 1893, of the Sanitary Commissioner for the extending of re-vaccination. The number of cases re-vaccinated was 169.

5. *Hospital Buildings.*—(*a*) The main building consists of two male wards—one surgical, the other for medical cases—and a female ward. Each ward has a bath-room attached to it. Detached from the main building is a row of six rooms with a partition wall in the centre dividing them into two, one half for males and the other half for females. There is a cook-room and a contractor's store-room attached to it for the in-patient department. There is also an operation room with the store-room for medicines detached from the main building.

The out-patient department consists of a surgery and a place for prescribing and an office-room in which the office of the District Medical and Sanitary Officer is located. There are also two small dressing-rooms—one for males and the other for females.

In the hospital compound a vaccine depôt has been recently built.

(*b*) *State of repair of Buildings.*—The main buildings are in fair state of repair. The kitchen adjoining the main building requires repair to its roof, better lighting, ventilation and a new floor. The roofing of the store-room requires repair. The flooring of the wards should be cemented or asphalted. The latter would be better, as the cement may crack during the hot weather. The flooring of the out-patient department is also very uneven and requires repairing.

(*c*) *State of Furniture.*—The furniture is in a fair state of repair.

(*d*) *Inspections.*—The hospital was inspected by Surgeon-Major-General C. Sibthorpe, Surgeon-General with the Government of Madras, on the 8th October 1895, and by Surgeon-Lieutenant-Colonel W. G. King, Sanitary Commissioner of Madras, on the 1st November 1895.

(1) Steps taken to carry out recommendations of Surgeon-General :—

Resolution passed at a municipal meeting held on 26th November 1895—

"The council will try to carry out the suggestions of the Surgeon-General as far as funds will permit. Rs. 300 has been provided in the budget for 1896–97 for the purchase of iron cots with planks to replace the wooden cots."

(2) No steps have been taken to carry out the recommendations made by other inspecting officers.

(*e*) Recovered from paying patients for dieting—*Nil.* Recovered from paying patients for medicines—Rs. 182–12–0.

(*f*) The number of patients treated during the year was 420 in and 15,753 out patients, against 412 in and 14,541 out patients, respectively, of the preceding year, showing an increase in both in and out patients.

(*g*) There were twenty-five deaths.

The causes of death were—anæmia due to privation, abscess of liver, ascitis, enteritis, tubercular peritonitis, tetanus, valvular disease of heart, spinal injury, dysentery, gangrene, empyema and shock after operation.

(*h*) Five hundred and twenty-four minor and fifty-seven major operations were performed during the year, against 418 minor and 37 major of the preceding year.

(*i*) Establishment is efficient. An extra compounder has been sanctioned, but an extra sweeper is very necessary.

(*j*) A diplomaed midwife is attached to the hospital; 107 cases were attended by her during the year, showing an increase of sixty-three. The large increase is due to the midwife having been on six months' suspension during 1894–95.

(Signed) K. C. SANJANA, Surgn.-Major,
District Medical and Sanitary Officer.

PALAMCOTTAH,
2[illegible] *April* 1896.

Submitted to the Collector.

2. The roads are in good condition.

3. The receipts of the municipality have during the year increased all round except under the heads of "sales of medicines" and "interest on investments."

17. *Fines under Municipal and other Acts.*—The income derived under this head was Rs. 319 or Rs. 28 in excess of the actuals of the previous year. The excess is due to the large number of prosecutions instituted under section 221 of the Act.

18. *Interest on Investments—Medical.*—The interest due by Government on the funded capital of the municipal hospital at this station was fully recovered within the year, viz., Rs. 2,845. As compared with the previous year there was a large decrease of Rs. 813, which is chiefly due to the causes explained in paragraph 20 of the administration report for 1894–95.

19. *Grants and Contributions from Government—Education—Other Purposes.*—The income under this head exceeded that of the previous year by Rs. 37. The excess is due to the recovery from Government of salary grant on account of the drawingmaster newly entertained from the 19th June 1895.

20. *Contributions from Local Boards—Medical.*—Rs. 400 being one-fourth of the net cost of the hospital for the previous year was recovered from the Taluk Board, Tinnevelly, during the year under report.

21. *Miscellaneous—Private Scavenging.*—The number of houses served on the 31st March 1896 was 2,462 against 2,184 on the corresponding date of the previous year. Of the above number 390 houses were cleaned by the municipal agency without fees being collected on the ground that they were mere huts not liable to house-tax under section 63 (3) of Act IV of 1884, *vide* rules framed by the council, an extract from which is annexed below for the information of Government.

"Such of the owners or occupiers who pay no house-tax to the municipality shall have the benefit of the municipal agency free of all charges." The demand under this head, excluding the arrears of the previous year, was Rs. 3,290 against Rs. 2,298 in 1894–95. The decrease in the latter is due to the levy of fees at the rate of one anna per house instead of two annas in the case of natives for the first half-year of 1894–95. The demand assessed was fully collected within the year. The expenditure incurred under this head amounted to Rs. 2,744, of which Rs. 2,394 was incurred on account of establishment and Rs. 350 on account of contingencies. It will be seen from the above figures that the service was worked at a profit of Rs. 546 during the year under report. The council proposes to utilize the saving by the entertainment of additional toties and by the purchase of additional iron night-soil carts. The number of cases prosecuted under section 221 was 320 against 144 in the previous year. Of the above number 295 cases were convicted, 13 were discharged, 8 were withdrawn for various reasons and 4 remained undisposed of at the close of the year.

The arrears of 1894–95 amounting to Rs. 1–8–0 were also collected within the year.

III.—EXPENDITURE.

22. The total expenditure was Rs. 25,555 against Rs. 26,220 in the revised estimate and Rs. 21,808, the actuals of the previous year. As compared with the previous year there was an increase of Rs. 3,789 under Grants I, III, IV and V and under the head "Advances recoverable," counterbalanced by a decrease of Rs. 42 under Grant II. The principal variations will be explained below.

23. *Grant I, Public Works—Communications.*—The expenditure under this head amounted to Rs. 2,316 against Rs. 2,350 in the revised estimate. Of this sum Rs. 465 was spent on new works and Rs. 1,851 on repairs. The decrease being small calls for no remarks.

24. *Buildings.*—The outlay under new works and repairs was Rs. 2,266 against the revised estimate of Rs. 2,310. As compared with the previous year there was a large increase of Rs. 1,762 in the current expenditure, which is attributable mainly to the construction of a vaccine shed in the hospital compound and a pucka compound wall round the new Protestant burial-ground.

25. *Drainage and Water-supply.*—Rupees 145 was spent under this head against Rs. 240 in the previous year. The increase in the latter is due to the construction of an outlet on the eastern bank of the Mulikulam reservoir.

26. *Grant II, Education—Training Schools—Stipends to Normal Students.*—Rs. 27 was spent under this head against Rs. 30 in the revised estimate and Rs. 28, the actuals of the previous year. The expenditure of Rs. 27 above referred to relates to the payment of stipends to one old student for six months from January 1895. As compared with the budget there was a decrease of Rs. 930 which is due to the fact that no teacher was available for training during the year.

27. *Municipal Schools on Salary-result~~s~~ System.*—The council continued to maintain a Primary school for Panchamas on the salary-result system. The number of boys on the rolls on the 31st March 1896 was 41 against 43 in the previous year; *but the average attendance throughout the year was only 21. The total cost of maintaining the school was Rs. 177, of which Rs. 159 was incurred on account of establishment and contingencies and Rs. 18, being result~~s~~ grants earned for 1895–96, was paid to the teacher of the said school. The school was examined for results grants by the Assistant Inspector* and out of eighteen pupils presented for examination under the infant, 1st and 2nd standards, thirteen passed. It appears from the remarks of the Assistant Inspector in statement IV herewith sent that the school acquitted itself very satisfactorily at the grant examination. This is due to the exertions of the inspecting schoolmaster employed by this municipality.

28. *Salary Grants.*—Three Lower Secondary schools were aided with salary grants during the year. The amount spent under this head was Rs. 711 against Rs. 1,070 in the revised estimate. The decrease is due to the payment of salary grants to the above schools at the reduced rates prescribed in the Director's proceedings, No. 2022, dated 9th March 1894. The number of boys on the rolls on the 31st March 1896 was 464 against 500 on the corresponding date of the previous year. I regret I am unable to report on the working of the schools, as neither the Inspector's report on the state and progress of the schools, nor the Director's review thereon, was communicated to this office.

29. *Result~~s~~ Grants.*—Of the eleven primary schools registered at the beginning of the year, ten were examined and one was closed during the year. The amount passed by the educational officer for the above 10 schools was Rs. 662 which was fully paid within the year. Adding to this the sum of Rs. 50 paid to the Chettiakudy street school for 1894–95, the total expenditure came up to Rs. 712 against Rs. 630 in the revised estimate. The excess was met by the transfer of funds from the allotment under "Salary Grants." Payment was made to all the schools at the maximum rates allowed by the revised Grant-in-aid Code. The number of boys on the rolls on 31st March 1896 was 627 against 655 (exclusive of the figure relating to the Chettiakudy street school—*vide* memorandum, No. 1035, dated 29th July 1895) in 1894–95. The decrease in the number of boys is due to the opening of a Lower Secondary school by the C.M.S. Mission in the Murugankurichi ward. From the statement submitted by the Assistant Inspector, it is observed that the number of boys presented and passed in compulsory subjects was 368 and 315, respectively, against 382 and 310 in 1894–95. The percentage of passes to the total number presented showed an improvement on that of the previous year. Of the several optional subjects taught in the schools, drawing was one which was introduced during the year for the first time. One drawingmaster was entertained by the municipality on a salary of Rs. 15 per mensem with the sanction of Government conveyed in G.O., Mis. No. 657 M., dated 10th April 1895. Physical education continued to be satisfactory.

30. *Inspection.*—The expenditure under this head amounted to Rs. 149 against Rs. 157 in 1894–95. For the supervision of Primary schools in the town one inspecting schoolmaster was employed during the year on a salary of Rs. 30 per mensem; one-third of his salary was paid by this municipality and two-thirds by the Tinnevelly Municipality. His work during the year continued to be satisfactory.

31. *Common Gymnasium.*—Rs. 111 was spent under this head or Rs. 17 less than the actuals of the previous year. Pupils in each of the Primary schools aided by the municipality receive instructions in gymnastics once a week and the instructor works

1214 18 July

No. M., 1896.

GOVERNMENT O DRAS.

LOCAL AND MUNICIPEPARTMENT.

Read—the following paper:—

From M.R.Ry. S. R. KRISHNASWAIYANGAR Avargal, Chairman-Delegate, Municipal Council, Palam, to the Chief Secretary to Government (through the Divisional Offid Collector of Tinnevelly), dated 27th May 1896, No. 213.

I have the honour to submit the annuart on the working of this municipality for 1895–96, together with the enclosuecified below:—

(1) Statements of receipts and charge 895–96.
(2) Statements of the state and progrenale education for 1895–96.
(3) District Medical and Sanitary Offieport for 1895–96.
(4) Returns of vaccination for 1895–9
(5) Returns of births and deaths for D6.
(6) Copy of resolution No. 1, dated 2ay 1896.

I.—Constitution of Mpal Council.

2. The office of Chairman continued to d by Mr. Balu S. Shreenivassa up to the 21st March 1896, when his term of offiouncillor expired, and the Revenue officer in charge of the division assumed chnd administered the affairs of the municipality by delegating his powers to ndersigned during the remaining portion of the year. The actual number of illors on the 31st March 1896 was only nine against the sanctioned strength of tmembers. Three elective seats fell vacant at the close of the year under report, aese vacancies were filled by election on the 3rd April 1896. The total number of ered voters in the Murugankurichy, Fort and Cantonment wards on 31st March, as per lists revised on the 15th October 1895, was 134, 171 and 88 respey against 122, 154 and 83 on the corresponding date of the year 1894–95.

3. The council held 32 meetings during ear against 31 in the previous year, and only 4 meetings had to be adjourned a number of councillors present on each occasion was not sufficient to form orum. The average attendance of councillors at each meeting actually held was (official 1·25 and non-official 4·97) against 5·5 (official 1·2 and non-official 4·3) i previous year.

II.—Reci

4. The opening balance was Rs. 5,209 the actual receipts of the year from all sources amounted to Rs. 25,206, of whic 15,802 was derived from taxation and Rs. 9,404 from miscellaneous sources. e total expenditure was Rs. 25,555 and the year thus closed with a balance of R60 which tallies with the figures in the treasury accounts to the credit of the mpality. The actual receipts of the year were in excess of those of the previous and the revised estimate by Rs. 863 and Rs. 706, respectively, the increase occu mainly under the several heads of taxation and private scavenging.
