READ - Howing papers -

Architect was directed to provide for utilizing the whole width of the site unless the Municipality were willing to make and maintain in proper order a lane between the proposed quarters and the private houses to the north of them. The President, Municipal Commission replied that a street 33 feet wide, to be properly laid out by the owner of the land, would be required. As this would not leave sufficient space for the quarters, the President was requested to state whether a narrower lane would not suffice. No reply ~~+~~ has as yet been received to this reference but the Consulting Architect states in his letter dated 8th June 1896 that the Municipality insist on a road twenty feet wide.

3. The Government does not appear approve of the Consulting Architect's suggestion to make use of the site of the late Women and Children's Hospital, for, besides being too distant from the General Hospital, it is required for other purposes. Moreover the necessity for housing the whole establishment of 138 or 147 subordinates enumerated in paragraph 4 of the Consulting Architect's letter is a matter which has yet to be sanctioned. No communication on the subject from the Surgeon-General has been received by Government.

4. The objections of the Consulting Architect to the site in question do not seem to be insuperable. The clearing away of the earth or the laying of deep foundations are matters of expense which may be well worth incurring in order to utilize a site which offers great advantages for particular purposes. It is observed that a great deal of space is wasted by having roadways nine feet wide in four places where they are obviously not needed. With reference to paragraph 6 of the Consulting Architect's letter it is not apparent how the municipality or the neighbours can object to Government's building what it pleases if a twenty feet roadway is

left.

5. It is observed from the plan forwarded that a block 56' by 40' is provided for one 1st class warrant officer, the Steward and one Senior Apothecary, each individual apparently having one storey. It is not clear way, with such an area, there should be any difficulty as to kitchen and lavatory arrangements. The Consulting Architect will be requested to submit a rough plan of the buildings. The plan also provides quarters for other Apothecaries but no orders have been passed as regards quarters for these subordinates.

6. The Surgeon-General has not furnished the complete scheme called for in the concluding portion of paragraph 3 of G.O. No. 528 Public, dated 26th June 1895 and until this has been submitted and the minimum width of roadway to the north of the proposed buildings to which the Municipality will consent, has been ascertained, no final decision can be arrived at.
