No. M., JUNE 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From M.R.Ry. S. RAMU AIYAR Avargal, B.A., Chairman, Municipal Council, Adóni, to the Chief Secretary to Government (through the Collector of Bellary), dated 11th June 1896, No. 271.

I have the honour to submit my report on the administration of the District Municipalities Act IV of 1884 in the town of Adóni during the official year 1895–96, accompanied by the usual statements.

I.—CONSTITUTION OF THE MUNICIPAL COUNCIL.

2. (1) On the 31st March 1896 the council consisted of 16 members—the full sanctioned strength; 4 of them were officials including the Revenue Divisional officer (*ex-officio*) and 12 non-officials. Excluding the *ex-officio* councillor, all other councillors were appointed by Government. The office of Chairman was held by me during the year with the exception of two-and-half months, when I was in charge of the Huzur treasury at Bellary. During my absence Mahadi Hussain Sahib Bahadur, the Revenue Divisional officer, was in temporary charge of the municipality under section 15 of the District Municipalities Act IV of 1884. I took charge of the municipality on the 11th December 1895, having returned from Bellary and was re-elected Chairman on the 15th January 1896.

(2) The number of meetings actually held was thirty-seven, while five were adjourned for want of a quorum, the corresponding figures for the previous year being thirty-six and five. The average attendance at each meeting was 9 as against 8·4 in 1894–95. Taking the official and non-official members separately, the average attendance of the officials was 2·4 and that of non-officials 6·6 against 2·1 and 6·3, respectively, in 1894–95. The advance in attendance is encouraging.

The greatest number of councillors present at any one meeting was 14 and the smallest 6.

II.—RECEIPTS.

3. The opening balance, as given in the accompanying statement I—Revenue and Receipts—is Rs. 52,798–15–4. The difference of Rs. 2, as compared with the actual closing balance at the end of 1894–95 of Rs. 52,796–15–4, is explained at the foot of statement No. I. Excluding this balance, the current receipts of the year amounted to Rs. 43,790–10–8 against Rs. 44,340 in the revised estimate and Rs. 1,64,306–10–4, the actuals of the previous year. Compared with the revised estimate there is a net decrease of Rs. 549–5–4 in the receipts which occurred chiefly under "Tax on arts," "Tax on lands," "Sale-proceeds of night-soil and street refuse," "License fees" and "Fines under Municipal and other Acts." The variations under several heads are explained below.

A.—Receipts from Taxation.

4. (1) *Tax on Arts.*—As in the previous year the tax was levied on all classes of the schedule annexed to Act IV of 1884. The demand registers of this tax are prepared for each year and that of the year under report was ready on the 28th August 1895. The original demand was Rs. 8,425 against Rs. 8,113 in 1894–95. The

number of appeals preferred against the tax was 147 as against 61 in 1894–95. The result of the appeals was that in 99 cases the assessment was confirmed, in 40 it was reduced, and in 8 cases the appeals were rejected for want of deposits or other causes. The remissions and reductions granted by the council on appeals amounted to Rs. 226, or 2·7 per cent. of the original demand, against Rs. 304 or 3·7 per cent. in 1894–95. The finally settled demand was Rs. 8,199 or Rs. 390 more than in 1894–95. The gradual increase in the income from this source is due partly to the increased activity in trade and professions, and partly to the careful revision of the assessments by the special sub-committee appointed for the purpose. The whole of the demand, except Rs. 399–8–0, was realised before the end of the year. Of the balance, Rs. 237–8–0 have since been collected and Rs. 23 written off the accounts as irrecoverable, leaving a balance of Rs. 139 still to be collected. Of this amount, 20 cases, involving Rs. 33, are under criminal prosecutions, and in 34 cases, involving Rs. 106, parties have since left the town, but steps are being taken to realise the arrears in these cases. The percentage of collections to finally settled demand was 95·1 against 96·8 in 1894–95. The decrease in the percentage is due to the difficulty experienced during the year, owing to the introduction of additional taxation in the shape of water-tax. The arrears outstanding at the beginning of the year were Rs. 211–8–0, of which Rupees 166–8–0 were realised and the balance, Rs. 45, was written off as irrecoverable within the close of the year. The total number of persons assessed and the average incidence of the tax were 2,015 and Rs. 4–1–1, respectively, against 1,873 and Rs. 4–2–8 in the previous year; the diminution in the average being due to the larger number of assessees under the lowest classes brought on the register. The number of assessees was 7·7 per cent. of the population of the town against 7·1 in the previous year.

(2) *Tax on Buildings.*—This tax continued to be levied at the maximum rate, viz., 7½ per cent., on the annual rent value of buildings and lands. The original demand was Rs. 10,313–14–0, exceeding that of the previous year by Rs. 198–2–0. The number of appeals preferred against the assessment was 47 and all of them were disposed of before the close of the year. In 20 cases the original assessments were confirmed, in 7 they were reduced and in 20 cases appeals were rejected for want of deposits or other causes. The reductions and remissions granted by the council on appeals amounted to Rs. 7–12–0 or ·08 per cent. of the demand. The final demand thus stood at Rs. 10,306–2–0 as compared with Rs. 10,071–2–0, the slight increase being due chiefly to the natural expansion in the number of buildings taxable by the municipality. Of the net demand (Rs. 10,306–2–0), Rs. 9,984–13–0 were realised, and a sum of As. 8 was remitted by the council on the score of poverty of the person concerned under section 51 of the Act, leaving a balance of Rs. 320–13–0 outstanding at close of the year. This has been again reduced by subsequent collections and remissions up to date to Rs. 75–2–0, of which 47 cases, covering Rupees 44–8–0, are under criminal prosecutions. Nineteen cases, involving Rs. 19–12–0, are due from parties who are temporarily absent from the town and who therefore could not be proceeded against. In the remaining 19 cases, amounting to Rupees 10–14–0, the arrears have been ascertained to be irrecoverable and have been written off. The percentage of collection to demand amounted to 96·9 against 98·8 in 1894–95. The decrease is due to reasons given under tax on arts. The assessment registers were ready on the 28th August 1895. The arrears outstanding at the commencement of the year were only Rs. 132–9–0. Of this sum, Rs. 113–7–0 were collected and Rs. 19–2–0 written off as irrecoverable. The total number of buildings taxed and the amount of tax were 5,492 and Rs. 10,306–2–0 against 5,399 and Rs. 10,071–2–0 in the previous year. The average incidence of the tax on buildings was Rs. 1–14–0 against Rs. 1–13–10 in 1894–95.

(3) *Tax on Lands.*—As in 1894–95, the tax was levied at 2 pies for every 80 square yards or As. 10 per acre. The net current demand remained almost stationary, viz., Rs. 518–3–6, of which Rs. 436–1–7, or 84·2 per cent. of the demand, was realised within the close of the year against Rs. 506–7–8 or 95·5 per cent. in 1894–95. Of the balance, Rs. 74–8–4 have since been collected and Rs. 7–9–7 still remains to be collected. The demand register was ready on the 31st August 1895. Two appeals were preferred against the imposition of this tax on technical grounds and the assessment in these was remitted. The arrears outstanding at the commencement

of the year were only Rs. 23–2–10, of which Rs. 17–15–0 were collected within the close of the year and Rs. 5–3–10 were remitted. The extent of the land taxed was 830 acres.

(4) *Water-tax on Buildings and Lands.*—This tax was newly introduced into this town during the year in view to providing funds for the repayment of the loan taken from Government for carrying out the water-supply project and for the maintenance of the water-works. It was levied at the maximum rate, viz., 4 per cent., on the rent value of the buildings and lands. The net demand under this head was Rs. 5,776–8–8, and out of this As. 4–4 were remitted on the score of poverty of the persons concerned under section 51 of the Act and Rs. 5,560–14–11 was collected within the year, leaving a balance of Rs. 215–5–5 at the close of the year. Of the balance, Rs. 171–1–5 have since been collected and Rs. 44–4–0 remain to be collected. This tax being collected along with the tax on buildings and lands, the explanation given in paragraph 4 (2) *supra* for the arrears applies also to this item. The receipts under this head, though the tax was levied at maximum rates, fell short of the normal expenditure.

(5) *Tax on Vehicles with springs, Animals and Carts.*—These taxes were levied at the same rates as in the previous year. The receipts under this head amounted to Rs. 2,830–4–0 against Rs. 2,720 of the revised estimate and Rs. 2,704–8–0, the actuals of the previous year. There is an increase of Rs. 112–4–0 under "Tax on animals and carts" which was due to the vigilance with which animals and carts liable to taxation were detected and brought to the list. The small decrease under "Tax on vehicles with springs" does not call for remarks.

(6) *Coercive Processes.*—The number of warrants issued during the year was 744 against 1,891 in 1894–95. Adding to this the unexecuted warrants of the previous year, the total number for disposal was 1,010, all of which were executed or cancelled within the year. The total amount covered by all these warrants was Rs. 1,944–12–9, and out of this Rs. 1,738–11–6 were collected. Property was distrained in only one case and in this case the arrear was paid at once, and resort to sale became unnecessary.

(7) *Tolls.*—As in the previous year, the tolls were levied at the maximum rates allowed by the Act. There were seven toll-gates, and all of them were, as usual, leased. The gross collection, including interests levied on overdue kists, amounted to Rs. 4,796–14–4; one-fourth of this sum, viz., Rs. 1,199–3–7, was paid to the district board as its share, and the balance of Rs. 3,597–10–9 credited to municipal funds. The total income under this head is less than that of the previous year by Rupees 44–4–5. The decrease is small and calls for no remark.

(8) *Incidence of Taxation.*—The incidence of taxation per head of population, according to the census of 1891, was Rs. 1–2–7 including tolls, and Rs. 1–0–5 excluding them, the corresponding figures for the previous year being As. 15–11 and As. 13–8. The increase is due chiefly to the levy of water-tax during the year.

B.—Miscellaneous Receipts.

5. These amounted to Rs. 13,284–8–5 against Rs. 13,650 of the revised estimate and Rs. 1,38,187–9–10, the actuals of the previous year. The variations under the several items are noticed below.

6. (1) *Realisation under Special Acts.*—The income derived from this source amounted to Rs. 70 or Rs. 20 more than the revised estimate and Rs. 50 more than the actuals of the previous year. This being a fluctuating item, calls for no remark.

(2) *Avenue Receipts.*—These amounted to Rs. 26 or Rs. 4 less than the revised estimate.

(3) *Fees from Travellers' Bungalow.*—The bungalow, which was occupied by the Sanitary Engineering department, was made over to the municipality in November last and has been open to the public since then. A fee of one rupee per diem for each of the two suites of rooms is levied, and Rs. 29 were realised from fees which exceeded the revised estimate by Rs. 9.

(4) *Produce of Lands and Gardens, &c.*—The sale of Thangédu bark in one of the municipal lands realised Rs. 9 against Rs. 10 anticipated in the revised estimate.

number of appeals preferred against the tax was 147 as against 61 in 1894–95. The result of the appeals was that in 99 cases the assessment was confirmed, in 40 it was reduced, and in 8 cases the appeals were rejected for want of deposits or other causes. The remissions and reductions granted by the council on appeals amounted to Rs. 226, or 2·7 per cent. of the original demand, against Rs. 304 or 3·7 per cent. in 1894–95. The finally settled demand was Rs. 8,199 or Rs. 390 more than in 1894–95. The gradual increase in the income from this source is due partly to the increased activity in trade and professions, and partly to the careful revision of the assessments by the special sub-committee appointed for the purpose. The whole of the demand, except Rs. 399–8–0, was realised before the end of the year. Of the balance, Rs. 237–8–0 have since been collected and Rs. 23 written off the accounts as irrecoverable, leaving a balance of Rs. 139 still to be collected. Of this amount, 20 cases, involving Rs. 33, are under criminal prosecutions, and in 34 cases, involving Rs. 106, parties have since left the town, but steps are being taken to realise the arrears in these cases. The percentage of collections to finally settled demand was 95·1 against 96·8 in 1894–95. The decrease in the percentage is due to the difficulty experienced during the year, owing to the introduction of additional taxation in the shape of water-tax. The arrears outstanding at the beginning of the year were Rs. 211–8–0, of which Rupees 166–8–0 were realised and the balance, Rs. 45, was written off as irrecoverable within the close of the year. The total number of persons assessed and the average incidence of the tax were 2,015 and Rs. 4–1–1, respectively, against 1,873 and Rs. 4–2–8 in the previous year; the diminution in the average being due to the larger number of assessees under the lowest classes brought on the register. The number of assessees was 7·7 per cent. of the population of the town against 7·1 in the previous year.

(2) *Tax on Buildings.*—This tax continued to be levied at the maximum rate, viz., 7½ per cent., on the annual rent value of buildings and lands. The original demand was Rs. 10,313–14–0, exceeding that of the previous year by Rs. 198–2–0. The number of appeals preferred against the assessment was 47 and all of them were disposed of before the close of the year. In 20 cases the original assessments were confirmed, in 7 they were reduced and in 20 cases appeals were rejected for want of deposits or other causes. The reductions and remissions granted by the council on appeals amounted to Rs. 7–12–0 or ·08 per cent. of the demand. The final demand thus stood at Rs. 10,306–2–0 as compared with Rs. 10,071–2–0, the slight increase being due chiefly to the natural expansion in the number of buildings taxable by the municipality. Of the net demand (Rs. 10,306–2–0), Rs. 9,984–13–0 were realised, and a sum of As. 8 was remitted by the council on the score of poverty of the person concerned under section 51 of the Act, leaving a balance of Rs. 320–13–0 outstanding at close of the year. This has been again reduced by subsequent collections and remissions up to date to Rs. 75–2–0, of which 47 cases, covering Rupees 44–8–0, are under criminal prosecutions. Nineteen cases, involving Rs. 19–12–0, are due from parties who are temporarily absent from the town and who therefore could not be proceeded against. In the remaining 19 cases, amounting to Rupees 10–14–0, the arrears have been ascertained to be irrecoverable and have been written off. The percentage of collection to demand amounted to 96·9 against 98·8 in 1894–95. The decrease is due to reasons given under tax on arts. The assessment registers were ready on the 28th August 1895. The arrears outstanding at the commencement of the year were only Rs. 132–9–0. Of this sum, Rs. 113–7–0 were collected and Rs. 19–2–0 written off as irrecoverable. The total number of buildings taxed and the amount of tax were 5,492 and Rs. 10,306–2–0 against 5,399 and Rs. 10,071–2–0 in the previous year. The average incidence of the tax on buildings was Rs. 1–14–0 against Rs. 1–13–10 in 1894–95.

(3) *Tax on Lands.*—As in 1894–95, the tax was levied at 2 pies for every 80 square yards or As. 10 per acre. The net current demand remained almost stationary, viz., Rs. 518–3–6, of which Rs. 436–1–7, or 84·2 per cent. of the demand, was realised within the close of the year against Rs. 506–7–8 or 95·5 per cent. in 1894–95. Of the balance, Rs. 74–8–4 have since been collected and Rs. 7–9–7 still remains to be collected. The demand register was ready on the 31st August 1895. Two appeals were preferred against the imposition of this tax on technical grounds and the assessment in these was remitted. The arrears outstanding at the commencement

of the year were only Rs. 23–2–10, of which Rs. 17–15–0 were collected within the close of the year and Rs. 5–3–10 were remitted. The extent of the land taxed was 830 acres.

(4) *Water-tax on Buildings and Lands.*—This tax was newly introduced into this town during the year in view to providing funds for the repayment of the loan taken from Government for carrying out the water-supply project and for the maintenance of the water-works. It was levied at the maximum rate, viz., 4 per cent., on the rent value of the buildings and lands. The net demand under this head was Rs. 5,776–8–8, and out of this As. 4–4 were remitted on the score of poverty of the persons concerned under section 51 of the Act and Rs. 5,560–14–11 was collected within the year, leaving a balance of Rs. 215–5–5 at the close of the year. Of the balance, Rs. 171–1–5 have since been collected and Rs. 44–4–0 remain to be collected. This tax being collected along with the tax on buildings and lands, the explanation given in paragraph 4 (2) *supra* for the arrears applies also to this item. The receipts under this head, though the tax was levied at maximum rates, fell short of the normal expenditure.

(5) *Tax on Vehicles with springs, Animals and Carts.*—These taxes were levied at the same rates as in the previous year. The receipts under this head amounted to Rs. 2,830–4–0 against Rs. 2,720 of the revised estimate and Rs. 2,704–8–0, the actuals of the previous year. There is an increase of Rs. 112–4–0 under "Tax on animals and carts" which was due to the vigilance with which animals and carts liable to taxation were detected and brought to the list. The small decrease under "Tax on vehicles with springs" does not call for remarks.

(6) *Coercive Processes.*—The number of warrants issued during the year was 744 against 1,891 in 1894–95. Adding to this the unexecuted warrants of the previous year, the total number for disposal was 1,010, all of which were executed or cancelled within the year. The total amount covered by all these warrants was Rs. 1,944–12–9, and out of this Rs. 1,738–11–6 were collected. Property was distrained in only one case and in this case the arrear was paid at once, and resort to sale became unnecessary.

(7) *Tolls.*—As in the previous year, the tolls were levied at the maximum rates allowed by the Act. There were seven toll-gates, and all of them were, as usual, leased. The gross collection, including interests levied on overdue kists, amounted to Rs. 4,796–14–4; one-fourth of this sum, viz., Rs. 1,199–3–7, was paid to the district board as its share, and the balance of Rs. 3,597–10–9 credited to municipal funds. The total income under this head is less than that of the previous year by Rupees 44–4–5. The decrease is small and calls for no remark.

(8) *Incidence of Taxation.*—The incidence of taxation per head of population, according to the census of 1891, was Rs. 1–2–7 including tolls, and Rs. 1–0–5 excluding them, the corresponding figures for the previous year being As. 15–11 and As. 13–8. The increase is due chiefly to the levy of water-tax during the year.

B.—Miscellaneous Receipts.

5. These amounted to Rs. 13,284–8–5 against Rs. 13,650 of the revised estimate and Rs. 1,38,187–9–10, the actuals of the previous year. The variations under the several items are noticed below.

6. (1) *Realisation under Special Acts.*—The income derived from this source amounted to Rs. 70 or Rs. 20 more than the revised estimate and Rs. 50 more than the actuals of the previous year. This being a fluctuating item, calls for no remark.

(2) *Avenue Receipts.*—These amounted to Rs. 26 or Rs. 4 less than the revised estimate.

(3) *Fees from Travellers' Bungalow.*—The bungalow, which was occupied by the Sanitary Engineering department, was made over to the municipality in November last and has been open to the public since then. A fee of one rupee per diem for each of the two suites of rooms is levied, and Rs. 29 were realised from fees which exceeded the revised estimate by Rs. 9.

(4) *Produce of Lands and Gardens, &c.*—The sale of Thangédu bark in one of the municipal lands realised Rs. 9 against Rs. 10 anticipated in the revised estimate.

(5) *Sale-proceeds of old Materials, &c.*—The amount realised from this source was Rs. 45–7–6, or Rs. 4–8–6 less than the revised estimate. This small decrease calls for no remark.

(6) *Conservancy Receipts—Sale-proceeds of Night-soil, Street refuse, &c.*—The receipts under this head, comprising sale-proceeds of street refuse (Rs. 338–0–7), of night-soil manure (Rs. 392–0–7), and of sale-proceeds of carbolic acid, &c. (Rs. 10–5–9), amounted to Rs. 740–6–11 against Rs. 900 in the revised estimate and Rs. 515–15–2, the actuals of the previous year. The decrease, as compared with the revised estimate, is due to the ale of the night-soil accumulated during the year not having been sold within the year. Part of it has been since sold and has realised Rs. 280–8–0.

(7) *Fees from Educational Institutions.*—The income derived from this source is Rs. 269–7–3 against Rs. 270 as per revised estimate and Rs. 271–14–9, the actuals of the previous year.

(8) *Sale-proceeds and Composition Fees of Medicines.*—The receipts under this head amounted to Rs. 73–6–1 or Rs. 3–6–1 over the revised estimate.

(9) *Income from Markets.*—The income derived from this source amounted to Rs. 1,519–15–4 against Rs. 1,510 in the revised estimate and Rs. 1,230–12–3, the actuals of the previous year. The increase of Rs. 289–3–1, as compared with the preceding year, is due to the keen competition at the auction sale of the lease. As in the previous year, the collection of fees in the market was farmed out to the contractor and the whole amount was collected within the year. The market was in good condition, having only been recently improved at a cost of over Rs. 3,000. Further improvements have been provided for in the current year's budget.

(10) *Fees from Slaughter-houses.*—The receipts from this source were almost the same as in the revised estimate. There are two slaughter-houses, one for sheep and goats and the other for horned cattle; both are stone-walled enclosures and are in fairly good condition. The collection of fees in them was, as usual, leased out to contractors.

(11) *License Fees.*—These amounted to Rs. 475–13–8, showing a decrease of Rs. 74–2–4 as compared with the revised estimate. The falling off in the receipts is due partly to the trades taxable under this head not having been exercised to such an extent as was anticipated when the revised estimate was prepared, and partly perhaps to less vigilance on the part of the out-door staff in reporting cases liable to taxation. The council will see that improvement takes place in this respect.

(12) *Fines under Municipal and other Acts.*—The receipts under this head brought in Rs. 317–7–0 against Rs. 500 in the revised and Rs. 480–13–0, the actuals of the previous year. The decrease is due partly to a smaller number of prosecutions instituted under the conservancy clauses of the District Municipalities Act now in force and partly to light fines imposed by the Bench-Magistrates.

(13) *Cart-stand Fees.*—There is only one cart-stand which is situated to the east of the town. It was, as usual, leased out to a contractor. The amount realised from it was Rs. 40–6–8, which shows little variation over the revised estimate.

(14) *Grants and Contributions from Government.*—Grants from Provincial funds for normal stipends to Muhammadan teachers undergoing training at Madras Muhammadan Training school and for girls attending the municipal schools were not drawn during the year, there being no necessity to utilise the same, owing in the former case to the difficulty experienced in inducing any of the Muhammadan pial school teachers to undergo training, and in the latter case to no girls having attended any of the municipal schools owing to there being separate Hindu and Muhammadan girls' schools in the town. An amount of Rs. 54–10–6 was drawn as grants for other purposes, such as common gymnasium and drawing against Rs. 110 expected in the revised estimate. The decrease is due partly to the non-purchase of gymnastic apparatus and drawing articles and partly to the actual grant drawn on account of salaries of the gymnastic instructor and drawing master having been less than was expected at the time of framing the revised estimate.

(15) *Contributions from Local Funds.*—These amounted to Rs. 503–15–2 against the revised estimate of Rs. 520 and the actuals of Rs. 635–8–2 in the previous year. The amount includes Rs. 160 contributed for the upkeep of the Local Fund roads lying within the municipal limits, and Rs. 343–15–2 being the one-eighth of the cost of the municipal hospital here.

(16) *Recoveries for services to Private Individuals—Private Scavenging fees.*—The income derived under this head amounted to Rs. 1,949–8–2 being practically the amount shown in the revised estimate and Rs. 37–9–11 less than the actuals of the previous year. The current demand under this head was Rs. 1,961–10–3, of which Rs. 1,946–15–8 were collected; and Rs. 8–12–1 were written off the accounts as irrecoverable, leaving a balance of Rs. 5–14–6 outstanding at the close of the year. The arrears outstanding at the beginning of the year were Rs. 12–6–7, of which Rs. 2–8–6 were collected and Rs. 9–14–1 were written off the accounts as irrecoverable. The number of houses served by the private scavengering agency was 848 as against 826, while those assessed to the tax on buildings were 5,492. The service was worked at a profit of Rs. 213–6–10 against Rs. 176–2–1 in the preceding year. The council bear in mind the remarks of Government in paragraph 3 (5) of its order, No. 1551 M., dated 20th September 1895, reviewing the administration report of this municipality for the year 1894–95, and is endeavouring to extend the service and to insist upon the pre-payment of the fees.

(17) *Other Items—Refunds of expenditure of previous year.*—The sum of Rs. 3,832–13–7 shown under this head includes the refund to the municipality of a portion of the cost, viz., Rs. 3,000, incurred by the municipality in the construction of a travellers' bungalow in connection with the new water-supply project and of Rupees 763–4–8 spent by the municipality on the preliminary operations and surveys of the town in connection with the same project. These sums have been adjusted by debit to water works and credit to the municipal funds. The remaining sum consists of Rs. 62–9–4 being the recovery of the cost incurred in defending law suits brought against the council, and of Rs. 6–12–0 recovered from the contractor of the travellers' bungalow on account of over-payments made to him in the previous year in the settlement of his accounts.

(18) *Advances recovered.*—The sum of Rs. 3,037–0–7 shown under this head represents Rs. 2,990–2–7 paid to the Sanitary Engineer to Government in 1894–95 and remaining unadjusted at the close of that year, Rs. 13–8–0 incurred in the payment of process fees in municipal cases, Rs. 26 paid to the pleader at Gooty for meeting the charges incurred in defending law suits brought against the council, Rupees 1–4–0 paid as demurrage charges on goods received from Messrs. West and Company, Madras, and Rs. 6–2–0 misappropriated by the acting Hindu inspecting schoolmaster Dustaghir Saib from the permanent advance in his charge. All these sums have been adjusted by debiting them to service heads and crediting to municipal funds. As regards the money misappropriated by Dustaghir Saib, he absconded on a certain night with the unspent portion of the advance. A criminal complaint has been laid against him, but he is still at large. The pay due to him at the time covers, however, more than the amount made away with by him.

III.—Expenditure.

7. The expenditure aggregated Rs. 69,611–6–1 against Rs. 85,240 in the revised estimate, and Rs. 1,19,176–4–0 the actuals of the previous year. It was distributed among the various grants in the proportion shown below:—

	Amount.			Percentage.
	Rs.	A.	P.	
Grant I	45,446	5	6	65·3
„ II	3,681	11	2	5·3
„ III	11,690	15	6	16·8
„ IV	1,400	6	0	2 0
„ V	3,406	12	11	4·9
Repayment of debt	3,933	0	0	5·6
Advances	52	3	0	·1

8. *Grant I, Public Works.*—(1) The total outlay on public works was Rupees 45,446–5–6 against the revised estimate of Rs. 59,980, the actuals of the preceding year being Rs. 91,532–10–3. The large decrease as compared with the revised estimate appears under water-supply and buildings, and was due to the allotments made for the completion of water-supply project and the construction of the municipal office building not having been fully spent, and to some of the sanctioned works not having been undertaken during the year for want of plans and estimates.

(2) *New Works—Communications.*—An allotment of Rs. 1,000 was provided for improving the Kumbardidy road, but only a sum of Rs. 127–6–8 was incurred in the construction of revetment side channels to carry off storm water. For the greater portion of the year, the municipality found difficulty in procuring the services of a competent overseer, and in the absence of such a one, it was not possible to carry out works provided for in the budget. Hence the balance of Rs. 872–9–4 under this head could not be spent within the close of the year. More work has been turned out since, and the balance will be expended in the current year.

(3) *Repairs—Communications.*—An expenditure of Rs. 2,052–1–0, out of an allotment of Rs. 2,980 provided for in the revised estimate, was incurred in re-metalling of portions of three main street roads and in executing petty repairs to some other roads. The collection of further metal and gravel was commenced before the close of the year, and is nearly completed now, and the work of spreading will be proceeded with as soon as rains set in.

9. The total expenditure on roads both under new and old was Rs. 2,179–7–8 against Rs. 502–13–3 in 1894–95.

10. The total length of the roads maintained by the municipal council is $8\frac{3}{4}$ miles, of which $6\frac{1}{4}$ miles were metalled or gravelled and $2\frac{1}{2}$ miles were unmetalled. All the town roads were kept in fair condition during the year under report.

11. *Road charges and tolls.*—The total expenditure on roads amounted to 60·6 per cent. of the net revenue from tolls against 13·9 per cent. in the previous year.

12. (1) *New works—Buildings.*—The outlay incurred under this head was Rs. 5,392–9–6 against Rs. 12,760 in the revised estimate. The large decrease in expenditure was due partly to the construction of a cattle-shed, three zinc latrines and five zinc urinals not having been undertaken, in expectation of new standard designs for them which have since been received, and partly to short expenditure on the construction of the municipal office building which could not be taken in hand earlier, as no contractor could be got, in spite of tenders duly published, to take up the work. It was then resolved to do it departmentally and Rs. 2,784–10–4 out of Rs. 7,320 were spent within the year. The work is progressing and will be completed shortly. The improvements to the Jubilee market, the construction of a zinc latrine and two urinals were completed during the year 1894–95, and their accounts were finally settled in the year under report.

(2) *Repairs—Buildings.*—An expenditure of only Rs. 91–6–9, out of an allotment of Rs. 300 provided for in the budget, was incurred in executing urgent repairs to the following works :—

	Rs.	A.	P.
Repairs to hospital latrine	47	1	8
„ to Kilchipet „	..	..	
„ to Jubilee market	13	1	3
„ to bullock slaughter-house	2	13	0
„ to municipal choultry	0	11	0
„ to Venkannakeri latrine	0	15	0
„ to latrine near Government school	24	6	0
„ to municipal office	2	6	10
Total ..	91	6	9

The short expenditure under this head is explained in the remarks column of statement II.-A, Part II—Repairs.

(3) *Drainage and water-supply.*—The expenditure under drainage exceeded the allotment (Rs. 200) by Rs. 20–14–11. The increase could not be avoided. The water-supply project which was commenced in 1893–94 was completed during the year under report at a total cost of Rs. 1,57,319–3–8, the estimated cost being Rupees 1,62,000. At the close of the year, there remained an unspent balance of Rupees 4,680–12–4 out of the estimate. This and the additional allotment of Rs. 3,000 made in the current year's budget will be spent on the works which have still to be carried out in connection with these works (*vide* paragraphs 11 and 21 of the budget report embodied in G.O., No. 528 M., dated 25th March 1896). The water works were formally opened for public use on the 23rd September 1895 by J. H. A. Tremenheere, Esq., Collector of Bellary, in the presence of a large gathering of people and several European and Native gentlemen, Mr. and Mrs. Jones being among the former. The people at large have greatly appreciated the boon. Some ignorant people had prejudice against pipe-water, but it is dying out. Towards the close of the year, the syphon gave way and unfiltered water was taken direct to the pipes through the sluice. The nature of the damage to the syphon has since been ascertained and it has been repaired and is working all right. The tank received only a moderate supply last year, but there has been sufficiency of water to meet the requirements of the town.

(4) The expenditure under repairs of water works was Rs. 594–9–0 being less than the sanctioned allotment by Rs. 275–7–0, the decrease being due to the works having been entirely handed over in November only instead of in the beginning of the year as had been anticipated.

13. *Grant II, Education.*—The total expenditure on education was Rupees 3,681–11–2 against Rs. 4,210 in the revised estimate and Rs. 3,185–7–2, the actuals of the previous year. The decrease, as compared with the revised estimate, occurs chiefly under "Result stipends" and "Contingencies" in the salary-result system schools and under result-grant schools, and was due to in the first and third cases to the grants earned by all the municipal and result-grant schools having been less than had been anticipated and in the second to the non-purchase within the year of furniture and other articles provided for in the budget.

14. (1) *Training Schools.*—Nothing was spent in the payment of stipendiary scholarships for Muhammadan pupils provided for in the budget as explained in paragraph 6 (14) *supra*. An expenditure of Rs. 11–0–9 was, however, incurred in the payment of scholarship grants to the teachers that attended the sessional school which was opened here during the year at the suggestion of the Educational officers, and other contingencies attendant on the opening of the school. A sessional school was opened on the 2nd September 1895 under the supervision of the Hindu inspecting schoolmaster of this municipality and kept up to 20th January 1896. Two pial school teachers attended the school. One was taught free having passed the Primary examination in the compulsory subject and the other was allowed Rs. 4 per month. These two were persuaded to appear for the Primary examination but only one actually did so, the other having been prevented by illness from attending it. The one that appeared for the examination failed.

(2) *Municipal Schools.*—On the 31st March 1896, there were six primary schools on the salary-result system maintained by the municipal council as against five on the corresponding date in 1895, a school for Panchamas having been newly opened in the year. Of these, four are day schools, of which one is intended for Muhammadans, and two night schools, one for the Hindus and the other for Muhammadans. The strength of, and the average attendance in, these schools on the 31st March 1896 were 386 and 318, respectively, against 337 and 302 on the corresponding date in 1895. The increase is due chiefly to the establishment of a school for Panchamas referred to above. Omitting the figures of this school from the accounts, the strength of the schools rose from 337 to 359, while attendance at them fell from 302 to 291. There was a falling off in the attendance at the Havannapet poor school and Muhammadan day school, but this was partly counterbalanced by a slight increase in the other schools. All these schools sent up for the standard examination 266 pupils, of whom 178 passed, the corresponding figures in 1894–95 being 240 and 126. The

total expenditure on these schools was Rs. 2,198–7–11, and the net cost to the municipal council, after taking credit for the fees amounting to Rs. 269–7–3, was Rupees 1,929–0–8 against Rs. 1,692–3–3 in 1894–95, and the average cost of educating each pupil was Rs. 6–1–1 against Rs. 5–9–8 in the previous year. The working of all these schools is reported by the Educational officers to have been fair.

(3) *Grant-in-aid Schools.*—There were 15 schools of this kind attended by 562 pupils at the close of the year, against 16 schools with 620 pupils in the preceding year. The difference is the net result of three schools which earned grants in the year previous having been closed, and of two new ones having been brought under inspection for the first time during the year under report. The municipal council aided one secondary and fourteen primary schools against one and fifteen, respectively, in 1894–95. The strength of the secondary school showed an increase of 10 pupils, while that of the primary schools suffered a loss of 75 pupils. This decrease is ascribed to the strict enforcement of the rules regarding the attendance of pupils and the employment of trained teachers. From these schools, 429 students were presented for the standard examination and 276 of them were successful, the corresponding figures for the previous year being 493 and 302. The total expenditure under grant-in-aid was Rs. 1,018–12–0 or 84·9 per cent. of the allotment, against Rs. 926–11–0 or 92·7 per cent. in 1894–95. The decrease is due to poor grants earned by the result-grant schools. Results grants were paid at maximum rates to such schools only as continued to employ trained or certificated teachers and at 75 per cent. to all other schools aided from municipal funds.

(4) Of the 38 teachers employed in municipal and aided schools, only 11 possessed trained teachers' certificates, 5 had untrained teachers' certificates, 14 with general education certificates and 8 were unpassed or unqualified. Steps will be taken to warn the managers of the aided institution by further reductions in the grants payable to them, if they should fail to employ qualified teachers.

(5) There were nine unaided schools with a strength of 246 pupils against 8 schools and 182 pupils in the preceding year, showing an advance in the number of schools and scholars.

(6) The total number of boys under instruction in municipal and aided schools was 46·8 per cent. of the male population of school-going age against 48·1 per cent. in 1894–95.

(7) *Inspection.*—The municipal council employed two inspecting schoolmasters as in the previous year. These officers examined 35 schools with 17,205 pupils. The permanent Hindu inspecting schoolmaster underwent training at the Government Training School at Bellary for nine months. He failed, however, to get the required certificate. He has however appeared again. The work of the inspecting schoolmasters has been pronounced by the Assistant Inspector of Schools as fair. The charges on account of inspection amounted to Rs. 302–1–6, or Rs. 52–1–6 more than the revised estimate. This increase is due to the purchase of the educational portion of the *Fort St. George Gazette* at the suggestions of the Director of Public Instruction and to the travelling allowance, &c., paid to the inspecting schoolmasters being larger than was anticipated.

15. *Grant III, Medical Services and Sanitation*—(1) *Hospitals and Dispensaries.*—The expenditure under this head amounted to Rs. 2,781–13–7, or Rs. 98–2–5 less than the revised estimate and Rs. 989–14–10 less than the actuals of 1894–95. The large decrease, as compared with the actuals of the previous year, appears entirely under medicines and supplies, and was due to the fact that in the year previous, the payment made on that account included the cost of two years' supply. The total number of sick treated at the hospital was 72 in-patients and 12,233 out-patients against 79 and 11,634, respectively, in 1894–95.

(2) *Midwives.*—A midwife was, as usual, attached to the municipal hospital here. She attended 88 cases of labour against 66 in 1894–95. The present midwife does not appear sufficiently energetic for a town like this.

(3) *Contribution to Provincial Funds.*—The total amount paid to provincial funds was Rs. 766 against Rs. 290 in the revised estimate and Rs. 853, the actuals of the previous year. The increase over the revised estimate figures is due, as in the previous year, to the contributions having been calculated on the receipts including the special grant on account of water-works. A reference has been made to the Accountant-General taking exception to this principle of calculating the contribution and his reply is awaited.

(4) *Medical Training of Women.*—The midwife attached to the municipal hospital is a trained nurse. The council does not see its way to providing funds for the training of female medical practitioners, having regard to the fact that they have to discharge a heavy liability to Government, in the shape of the loans obtained on account of water-works, and to meet the maintenance charges thereof for which, as already stated, the receipts from water-tax have been found inadequate, and also bearing in mind that there are more pressing needs, such as drainage and improvement of streets, which are so essential from a sanitary point of view, and to carry out which a large outlay and probably further grants and loans from Government will be necessary. The system of removing street refuse departmentally, which has been undertaken by the municipality, is also likely to entail additional expenditure of about Rs. 2,000 net per annum. For these reasons the council regrets its inability for the present to meet the wishes of Government in this respect.

(5) *Vaccination.*—The outlay on this account was Rs. 307–2–6, being less than the revised estimate by Rs. 22–13–6 and Rs. 81–15–1 less than the actuals of the previous year. The decrease is due partly to the cheapness of the fodder bought for feeding calves and partly to the introduction of lanoline paste for vaccination purposes in the latter part of the year:—

(6) Vaccination has been compulsory in this town since 1886. The total number of operations performed by the municipal vaccinator was 1,300 (primary 1,201 and 99 re-vaccination) against 1,396 (primary 1,259 and re-vaccination 137) in 1894–95. Of the former 1,081, or 83·2 per cent., were successful, the corresponding figures for the previous year being 1,180 or 84·5 per cent. The number of children under one year successfully vaccinated was 837, or 31·9 per cent. per mille of the population, against 796 or 30·9 per mille in 1894–95. Taking the normal birth-rate to be 40 per mille, the results can be said to be satisfactory as compared with those of the previous year. As the number of unprotected cases of children above one year has been greatly diminished, the total number of vaccinations shows a decrease in the year under report as compared with the previous year. Four hundred and seventeen cases of failure to have children vaccinated were reported to the magistrate during the year against 685 in the preceding year. It will be seen from the civil apothecary's report that the system of vaccination direct from animal lymph was in vogue till 31st January 1896 when lanoline paste was introduced. The vaccinator's work is supervised by the civil apothecary in charge of the municipal hospital, Adóni, who verified 974 cases against 866 in the previous year. The average cost of each successful operation was As. 4–7 against As. 5–3 in the previous year.

(7) The civil apothecary performed 57 operations, 39 of which were successful as against 204 and 190 respectively in 1894–95, the large decrease being due to the fact that vaccination in dispensaries is now optional.

(8) *Vital Statistics.*—The subjoined abstract shows the number of births and deaths registered during the year as compared with the previous year:—

—	Births.	Rate per mille.	Deaths.	Rate per mille.
1894–95	955	36·3	642	24·5
1895–96	1,122	42·8	606	23·1

From the above figures it will be seen that there was a large increase in the number of births and a small decrease in the number of deaths, which may be attributed in a great measure to the generally more healthy condition of the town

during the year. The increase in the former case is also probably due to some extent to better registration. Thirty-nine prosecutions were instituted for failure to register births and deaths against 81 in 1894–95. The warning given to people by the prosecutions instituted in the previous year has had the intended effect on the people who now come regularly and report the occurrences in their houses. The expenditure on this account amounted to Rs. 150–11–3 against Rs. 150 in the revised estimate.

(9) *Conservancy.*—The expenditure on conservancy, road-cleaning and road-watering was Rs. 7,685–4–2 against the revised estimate of Rs. 8,370 and the actuals of Rs. 7,672–7–1 in 1894–95. The decrease as compared with the revised estimate appears chiefly under "Establishment" other charges, such as purchase of or hire of carts and under "Contingencies," and was due in the former case to the inability of the council to procure the services of water-bearer for watering streets on Rs. 5 provided for in the budget and in the latter two cases to the night-soil carts, buckets, water-tubs, scrapers, &c., ordered from Madras not having been received within the close of the year. An expenditure of Rs. 6–4–0 out of an allotment of Rs. 10 was incurred in adopting necessary measures to prevent the spread of cholera which appeared during the year. There were four attacks and two deaths from the disease.

(10) The conservancy of the town was well attended to. The strength of the establishment is shown below :—

Inspector	1
Maistry	1
Peons	6
Toties	26
Sweepers	30
Water-bearers	3
Cattle-shed keeper	1
Private scavengering—	
Maistry	1
Toties	16

There are 125 dust-bins, 74 being of stone slabs fixed upright in the ground and the remainder circular movable galvanised iron structures. The number is insufficient. Some more are required, but they could not be purchased for want of a suitable pattern. The rubbish was removed in carts by ryots to a place further away from the town than before and there deposited till ploughing season when it was removed to fields and used as manure. This system has been since discontinued.

The public latrines were seventeen in number including a new iron one erected during the year under report. Of these seven are made of corrugated iron sheets, six of masonry walls and four mud-walled. There are also five urinals, three being of galvanised iron and the rest are enclosures of stone slabs. All these were in good order. They were cleaned twice a day and kept in a clean state. There were eight night-soil carts at work during the year.

(11) *Private scavengering.*—The expenditure under this head amounted to Rs. 1,736–1–4 against Rs. 1,780 of the revised estimate and Rs. 1,751–9–0, the actuals of the previous year. The decrease, as compared with the revised estimate, is small and calls for no remark. The number of houses served by the municipal agency at the close of the year was 848 against 826 in 1894–95. This service was worked at a profit of Rs. 213–6–10 to the municipal council against Rs. 176–2–1 in 1894–95. The council is aware that there is much room for improvements in this respect, and it is taking necessary steps in the matter.

(12) The night-soil from both public and private latrines was taken in municipal carts to the depôt a mile away from the town and there buried in trenches and covered with earth and sweepings.

16. (1) *Grant IV, Lighting and Miscellaneous—Lighting.*—The outlay on this account was Rs. 795–7–9 or Rs. 444–8–3 below the revised estimate. The large decrease appears under contingencies and was due to lanterns, burners, chimneys, &c., ordered from Madras to replace broken ones not having been received within the close

of the year. The lighting of the town was carried on departmentally as in the preceding year. The town was lit with 120 lamps against 176 in the preceding year, the decrease being due to a number of old lanterns having become unserviceable. They will be replaced before long.

(2) *Choultries.*—The charges under this head amounted to Rs. 24 or Rs. 6 less than the revised estimate. This does not call for remark. The daily number of people who halted in it was four.

(3) *Avenues.*—The expenditure under this head was Rs. 58–9–3 or Rs. 8–9–3 in excess of the revised estimate. The slight increase does not call for remark.

(4) *Other charges.*—These amounted to Rs. 503–10–1 against Rs. 620 in the revised estimate and Rs. 534–3–5, the actuals of the previous year. The decrease is due to no charges for the destruction of stray dogs having been incurred, no necessity having arisen for the same, and to cost of printing having fallen short of the estimate by Rs. 52–6–6.

17. *Grant V, General Establishment—Office.*—The charges under this head were Rs. 3,406–12–11 against Rs. 3,140 in the estimate and Rs. 2,610–15–3, the actuals of the preceding year. The increase as compared with the revised estimate is due chiefly to a sum of Rs. 325–15–1 due by the Bellary Municipality on account of supply of account books and forms having been recovered from this municipality by the Inspecter of Local Fund Accounts through the Accountant-General. This sum has, however, been refunded subsequent to the close of the year. The decrease under office contingencies is due to the economy observed in the expenditure of stationery articles, &c.

18. *Repayment of debt.*—The council paid Rs. 1,193–12–4, as the second instalment of the principal and Rs. 2,739–3–8 as interest in respect of the loan of Rupees 66,000 obtained from Government in 1893–94 for the execution of water-works in this municipality.

19. The accounts of this municipality for 1894–95 were audited during the year under report by M.R Ry. S. Rajacannu Mudaliyar, B.A., the municipal auditor attached to the Accountant-General's office, and the results of his audit were satisfactory.

20. I regret the delay that has occurred in the submission of this report. It was due partly to some difficulty experienced in the office in reconciling certain differences in the figures showing demand, collection and balance of house and water-taxes owing to the fact that the water-tax was introduced during the year and the calculation of the tax at 4 per cent. resulted in the occurrence of pies, and partly to the fact that the educational statements were received only on the 30th ultimo. Even now the figures as entered against secondary school in statement I do not tally with those shown in the statement V-B furnished to this office. I have had to return them to the Assistant Inspector of Schools for necessary corrections and retransmission to this office. They will be submitted to you on receipt.

21. The report from the civil apothecary in medical charge of the municipal hospital, Adóni, on the working of the hospital and on the sanitation of the town is enclosed.

22. A copy of council's resolution approving the report is submitted.

ENCLOSURE.

From M.R.Ry. S. J. PARTHASARATHY IYER, Civil Apothecary, in medical charge Adóni to the Chairman, Municipal Council, Adóni (through the District Medical and Sanitary Officer, Bellary), dated 7th April 1896.

I have the honour to submit the following administration report on the state and progress of the Municipal Hospital, Adóni, and on the sanitation of Adóni for the official year ending 1895–96.

Public Health.—The public health during the year was satisfactory. Two deaths from cholera were recorded. The following comparative statement shows the prevalence of the principal diseases :—

Disease	1894-95.	1895-96.
Cholera	..	2
Fevers	223	223
All other causes	419	381
Total deaths ..	642	606
Births including born dead	955	1,122
Deaths from all causes excluding born dead	642	606

2. *Vital Statistics*—

	1894-95.	1895-96.
Population	26,243	23,243
Total births	955	1,122
Total deaths	642	606
Birth-rate per mille	36·3	42·8
Death-rate „	24·5	23·1

3. *Sanitation.*—One additional zinc latrine was constructed during the year under report. There are 17 latrines and 5 urinals; 848 private latrines are scavenged by the municipality. One of the great insanitary conditions of Adóni is its numerous lanes and bye-lanes, and the chief want of Adóni is a proper drainage scheme.

4. *Vaccination.*—Compulsory vaccination is in force since 1886. The expenditure incurred upon vaccination is Rs. 114-6-0 against Rs. 187-13-1. Number of calves inoculated is 41 against 62 of last year. The decrease in the charges is due to the less number of calves inoculated. Animal vaccination was kept up till 31st January 1896, when vaccination by lanoline paste was introduced. Total number of cases vaccinated in the town is 1,357. There is a decrease of 243 operations as compared with that of last year. The decrease is due to the very few cases of unprotected children. Number of children vaccinated under one year is 938, of which 837 were successful.

	Total.	Successful.	Unsuccessful.
Animal lymph direct	542	532	10
Glycerine paste	249	191	58
Lanoline do.	141	114	26

5. *Hospitals and Dispensaries*—(*a*) *Nature and sufficiency of accommodation.*—A fine masonry building specially built for the purpose. A dressing-room, both for males and females, is badly wanted. A veranda to the post-mortem room or some other protection from sun, wind or rain is highly desirable. The building ($10' \times 9' \times 8\frac{5}{6}'$) has not enough of space to permit of a writing table being placed to enable the medical officer to write his notes.

The figures show that vaccination direct from the calf was the most successful.
(Intld.) S.R.

Provision will be made in the next year's budget for a better room.
(Intld.) S.R.

He cannot conveniently move round the table.

The performance of the post-mortem is thus rendered a task of danger and difficulty.

(*b*) *State of repair of buildings.*—They are in good state of repair.

(*c*) *State of repair of furniture.*—In fair order.

(*d*) *Inspections*—
(1) By the Surgeon-General, *nil.*
(2) Latrines and cook-room repaired.

(*e*) *Amount of recoveries from patients, &c., nil.*

(*f*) *Number of patients treated as compared with previous years.*—In 1893–94 in-patients 90, average number 3·89; out-patients 16,654, average number 108·29. In 1894–95 total number of in-patients treated was 79 and the average number 3·12; total number of out-patients treated is 11,634 and the average number was 78·23. In 1895–96 total number of in-patients treated was 72 and the average number 4·51; total number of out-patients treated is 12,233 and the average number was 83·35.

The most common diseases among the out-patients were malarial fevers, diseases of the eye and diseases of the digestive system, and those among the in-patients were malarial fevers, rheumatic affections and diseases of the digestive system and local injuries.

(*g*) *Mortality and actual causes of it.*—There were two deaths among the in-patients—one from local injuries and the other from diseases of the digestive system; and among the out-patients two were from cholera and one from all other general diseases.

This is a curious way of putting it. It being only one case, the particular disease might as well have been mentioned, especially in the case of in-patient.
(Intld.) S. R.

(*h*) *Operations and Results.*—There were 11 major operations and 585 minor operations. There is an increase of 3 major and 143 minor operations.

The opinion of the District Medical and Sanitary Officer will be sought as to what may be done with the man.
(Intld.) S. R.

(*i*) *Establishment whether sufficient and efficient.*—It is sufficient. The Hospital Assistant is incompetent and belongs to Nellore school.

(*j*) *Midwives—work actually done.*—During the year under report Thippama, a trained midwife, conducted 88 cases against 66 of last year. The minimum number of cases is 8 to entitle her to her fixed pay (Rs. 15).

(*k*) No caste and gosha women dispensary.

(*l*) Expenditure during the year under report, as compared with the previous year, is as follows—salaries of medical subordinates for 1895–96 are Rs. 1,505–15–7. There is a decrease of Rs. 30–11–1 due to the absence of the temporary hospital assistant on cholera duty in the district. Salaries of servants are Rs. 592–13–7 against Rs. 542–6–7 of last year. The increase of Rs. 50–7–0 represents increase in the pay of the compounder and the absence of stoppages in the pay of the midwife as in the previous year. The dieting of patients costs Rs. 89–10–3 against Rs. 96–11–5. Miscellaneous and contingencies cost Rs. 285–5–8 against Rs. 275–14–8. Slight variations under the last two items call for no remarks. Medical stores and instruments cost Rs. 308–0–6 against Rs. 1,260–1–1. The decrease of Rs. 952–0–7 is due to the non-purchase of any surgical instruments and many European medicines.

Is this the correct explanation? I believe that last year two years' supplies were paid for within the year.
(Intld.) S. R.

No. 1610.

Forwarded to the Chairman, Municipal Council, Adóni.

15*th May* 1896. (Signed) F. J. CRAWFORD, Surgeon-Captain,
Ag. District Medical and Sanitary Officer.

C. No. 1434.

Forwarded.

2. The roads were in better condition in 1895–96 than in the previous year, the most important of them having been remetalled. The municipality is taking up all the remaining roads for making similar improvement.

ADONI,
14*th June* 1896. (Signed) S. RAMU AIYAR,
Deputy Collector.

Forwarded with the following remarks.

2. *Paragraph 3 of the Chairman's letter.*—The receipts during the year under report were Rs. 43,790–10–8 against Rs. 1,64,306–10–4 of the preceding year. The large decrease is apparently due to the two special items of receipts during 1894–95, viz., Government contribution for water-supply works and the adjustment of advances made to the Sanitary Engineer. This should have been clearly explained in the report.

3. *Paragraph* 6 (11), *License Fees.*—The decrease and the explanation are both very unsatisfactory.

4. *Paragraph* 6 (12), *Fines.*—The decrease would be more satisfactory if it were due to a decrease in the amount of nuisances committed which the Collector is afraid is not the case.

5. *Paragraph* 6 (16), *Service to private individuals.*—There is a slight but satisfactory increase in the number of houses served by private scavengering, but the number is still too small.

6. *Paragraph* 6 (18), *Advances recovered.*—It is not understood how Dastagiri Sahib can be an "Acting Hindu Inspecting Schoolmaster."

7. *Paragraph* 7, *Expenditure.*—The large decrease under this item, as compared with that of the preceding year, is apparently due to the large sum spent in the preceding year for water-works. This should have been clearly explained in the report.

8. *Paragraphs* 8 (1), 8 (2) *and* 12 (1).—The explanations for the short expenditure are not at all satisfactory.

9. *Paragraph* 14 (4).—There are only eleven trained teachers out of a total of 38—an absurdly low figure. This requires the earnest attention of the council.

10. *Paragraph* 16 (1), *Lighting*.—The explanation of the short expenditure under this head is most unsatisfactory, as also is the fact that the number of lights in the town decreased from 176 to 120. New lamps should have been obtained before the old ones became so unserviceable as to be quite useless. If the new lamps had been ordered in time they would have been received long before the close of the year.

11. The remarks of the civil apothecary on the insufficiency of the *post-mortem* room and the hospital assistant seem to require the early attention of the council.

18*th June* 1896.

(Signed) J. T. LEVER,
for *Collector*.

NOTE TO STATEMENT I.

1. Tax on arts, &c., is levied on ~~the first~~ all classes. (Schedule A of the Act.)
2. Tax on buildings is levied at 7½ per cent. and tax on lands at ~~per cent. of rent value.~~ annas 2/per for every 80 square yards.
3. Water-tax on buildings and lands is levied at 4 per cent.
4. Tax on vehicles and animals is levied at ~~the full~~ the maximum rates. (Schedules B of the Act.)—
5. Tax on carts, &c., is levied at Rs. 4 per cart. per annum.
6. Tolls are levied at ~~the~~ full ~~the~~ maximum rates. (Schedules D of the Act.).—
7. License-fees are levied at the rates sanctioned in G.O. 1398 11-11-68, 1072 28-8-70, 1188 7-4-77, 981 7-8-89, 1129 6-9-89
8. The house-tax registers were last revised in the official year 1894-95 and the land tax registers in the official year. 1894-95
9. Total extent of land assessed is 830 acres.
10. The mode of estimating the annual rental of houses and lands is as follows:—

The buildings are assessed with reference to the gross rent for which each building might reasonably be expected to be let and the locality in which it is situated.—

Adoni Municipal Council Office June 1896

Ramaswamy Naidu Manager

S. Rama Rao Chairman A. M. C.

STATEMENT I-A.—Endowments entrusted to the Municipal Council under Section

Name of Institution	Amount of Funded Capital.	Opening Balance.	Interest, Produce of Land, or Rent of buildings.	Appropriation from Capital for Expenditure.	Private Contributions and Donations. on the Sanitation of Adoni for the official year ending 1895-96.

Public Health — The public health during the year was satisfactory. Two deaths from cholera were recorded. The following comparative statement shows the prevalence of the principal diseases: —

Vaccination

Disease	1894-95	1895-96
Cholera	"	2
Fevers	223	223
All other causes	419	381
Total deaths	642	606

Births excluding born dead 955 ... 1122

Deaths from all causes — excluding born dead } 642 ... 606

2. Vital Statistics —

	1894-95	1895-96
Population	26,243	26,243
Total births	955	1122
Total deaths	642	606
Birth-rate per mille	36·3	42·8
Death-rate	24·5	23·1

3. Sanitation - One additional Zinc latrine was constructed during the year under report. There are 17 latrines & 5 urinals, 848 private latrines are scavenged by the municipality. One of the great insanitary conditions of Adoni is its numerous lanes & bye lanes and the chief want of Adoni is a proper drainage scheme.

4. Vaccination - Compulsory

Vaccination

Disease	1894-95	1895-96
Cholera	"	2
Fevers	223	223
All other causes	419	381
		606
Total deaths	642.	~~627~~

Births excluding born dead 955 ... 1122

Deaths from all causes — excluding born dead } 642 ... 606

2. Vital Statistics —

	1894-95	1895-96
Population	26,243	26,243
Total births	955	1122
Total deaths	642	606
Birth-rate per mille	36·3	42·8
Death-rate	24·5	23·1

3. Sanitation - One additional Zinc latrine was constructed during the year under report. There are 14 latrines & 5 urinals, 848 private latrines are scavenged by the municipality. One of the great insanitary conditions of Adoni is its numerous lanes & bye lanes and the chief want of Adoni is a proper drainage scheme.

4. Vaccination - Compulsory

Vaccination

Vaccination is inforce since 1886. The expenditure incurred upon Vaccination is Rs 114-6-0 against Rs 187-13-1. Number of Calves inoculated is 41 against 62 of last year. The decrease in the charges is due to the less number of Calves inoculated. Animal Vaccination was kept up till 31st January 96 when Vaccination by lanoline paste was introduced. Total Number of Cases Vaccinated in the town is 1357. There is a decrease of 243 operations as Compared with that of last year. The decrease is due to the very few Cases of unprotected children. Number of children vaccinated under one year is ~~932~~ 938 of which 837 were Successful.

	Total	Successful	Unsuccessful
Animal Lymph direct	542	532	10
Glycerine paste	249	191	58
Lanoline paste	141	114	26

The figures shew that vaccination direct from the calf was the most successful

SL

No 5. Hospitals & Dispensaries (a) nature and Sufficiency of accomodation – A fine masonry building specially built for the purpose. A dressing-room both

for

for males and females is badly wanted.
A veranda to the Post-mortem room or some other protection from sun wind or rain is highly desirable The building 10'x9'x8 6/12 has not enough of space to permit of a writing table being placed to enable the Medical officer to write his notes He cannot conveniently move round the table! The performance of the post-mortem is thus rendered a task of danger and difficulty.

Provision will be made in the next year's budget for a better room SM

(b) State of repair of buildings —
√ They are in good state of repair.
(c) State of repair of furniture —
In fair order.
(d) Inspections
(1) By the Surgeon-General .. Nil
(2) Latrines & cook rooms repaired.
(e) Amount of recoveries from patients &c
Nil —
(f) Number of patients treated as
Compared with previous years — In 1893-94 In-patients 90, Average number 3.89; out-patients 1665 Average number 108.29 In 1894-95 total

number

number of in-patients treated was 79 and the average number 3·12; total number of out-patients treated is 11,634, and the average number was 78·23. In 1895-96 Total no of in-patients treated was 72 and the average number 4·61. 96 total no of out-patients treated is 12,233 and the average no was 83·35.

The most common diseases among the out-patients were - Malarial fevers, diseases of the eye & diseases of the digestive System and those among the In-patients were:— Malarial fevers, Rheumatic - affections and diseases of the digestive System & local Injuries.

(g) Mortality and actual causes of it.-- There were two deaths among the In-patients - one from Local Injuries and the other from diseases of the - digestive System; and among the out-patients 2 were from Cholera & one from all other general diseases -

(H) Operations & results - There were 11 Major operations and 585 minor - operations. There is an increase of 3 Major and 143 minor operations.

(i) Establishment whether sufficient and

Most accurate way of putting it - It being only one case, the particular disease might as well have been mentioned especially in the case of in-patients.

and efficient. It is sufficient. The Hospl. Assistant is incompetent and belongs to Nellore School.

[Margin note:] opinion of the D M & S C with the consent ~~requested~~ as to what may be done with the man — SC

(J) Midwives - Work actually done - During the year under report Thippama a trained midwife conducted 88 cases against 66 of last year. The minimum No of cases is 8 to entitle her to her fixed pay (Rs 15-0-0)

(K) No caste and gosha women dispensary.

(L) Expenditure during the year under report as compared with the previous year is as follows:- Salaries of Medical Subordinates for 1895-96 are Rs 1505-15-7. There is a decrease of Rs 30-11-1 due to the absence of the temporary Hospl. Assistant on cholera duty in the District. Salaries of Servants are Rs 592-13-7 against ~~Rs 542~~ 1536-10-8 Rs 542-6-7 of last year: the increase of Rs 50-7-0 represents increase in the pay of the Compounder and the absence of stoppages ~~of~~ in the ~~of~~ pay of the midwife as in the previous year. The dieting of patients costs Rs

Rs 89 „ 10 „ 3 against Rs 96 „ 11 „ 5 [illegible]

Miscellaneous and Contingencies Cost Rs ~~270 „ 4 „ 8~~ 285 - 5 - 8 - Against Rs 275 - 14 - 8.

Slight variations under the last two items call for no remarks. Medical Stores and instruments Cost Rs 308 „ 0 „ 6 against Rs 1260 „ 1 „ 1. The decrease of Rs 952 „ 0 „ 7 is due to the non-purchase of any Surgical instruments and many European medicines—

Is this the correct explanation?

I believe that last year two years' supplies were paid for within the year

READ—the following paper:—

From M.R.Ry. S. RAMU AIYAR Avargal, B.A., Chairman, Municipal Council, Adóni, to the Chief Secretary to Government (through the Collector of Bellary), dated 11th June 1896, No. 271.

I have the honour to submit my report on the administration of the District Municipalities Act IV of 1884 in the town of Adóni during the official year 1895–96, accompanied by the usual statements.

I.—CONSTITUTION OF THE MUNICIPAL COUNCIL.

2. (1) On the 31st March 1896 the council consisted of 16 members—the full sanctioned strength; 4 of them were officials including the Revenue Divisional officer (*ex-officio*) and 12 non-officials. Excluding the *ex-officio* councillor, all other councillors were appointed by Government. The office of Chairman was held by me during the year with the exception of two-and-half months, when I was in charge of the Huzur treasury at Bellary. During my absence Mahadi Hussain Sahib Bahadur, the Revenue Divisional officer, was in temporary charge of the municipality under section 15 of the District Municipalities Act IV of 1884. I took charge of the municipality on the 11th December 1895, having returned from Bellary and was re-elected Chairman on the 15th January 1896.

(2) The number of meetings actually held was thirty-seven, while five were adjourned for want of a quorum, the corresponding figures for the previous year being thirty-six and five. The average attendance at each meeting was 9 as against 8·4 in 1894–95. Taking the official and non-official members separately, the average attendance of the officials was 2·4 and that of non-officials 6·6 against 2·1 and 6·3, respectively, in 1894–95. The advance in attendance is encouraging.

The greatest number of councillors present at any one meeting was 14 and the smallest 6.

II.—RECEIPTS.

3. The opening balance, as given in the accompanying statement I—Revenue and Receipts—is Rs. 52,798–15–4. The difference of Rs. 2, as compared with the actual closing balance at the end of 1894–95 of Rs. 52,796–15–4, is explained at the foot of statement No. I. Excluding this balance, the current receipts of the year amounted to Rs. 43,790–10–8 against Rs. 44,340 in the revised estimate and Rs. 1,64,306–10–4, the actuals of the previous year. Compared with the revised estimate there is a net decrease of Rs. 549–5–4 in the receipts which occurred chiefly under "Tax on arts," "Tax on lands," "Sale-proceeds of night-soil and street refuse," "License fees" and "Fines under Municipal and other Acts." The variations under several heads are explained below.

A.—Receipts from Taxation.

4. (1) *Tax on Arts.*—As in the previous year the tax was levied on all classes of the schedule annexed to Act IV of 1884. The demand registers of this tax are prepared for each year and that of the year under report was ready on the 28th August 1895. The original demand was Rs. 8,425 against Rs. 8,113 in 1894–95. The

number of appeals preferred against the tax was 147 as against 61 in 1894–95. The result of the appeals was that in 99 cases the assessment was confirmed, in 40 it was reduced, and in 8 cases the appeals were rejected for want of deposits or other causes. The remissions and reductions granted by the council on appeals amounted to Rs. 226, or 2·7 per cent. of the original demand, against Rs. 304 or 3·7 per cent. in 1894–95. The finally settled demand was Rs. 8,199 or Rs. 390 more than in 1894–95. The gradual increase in the income from this source is due partly to the increased activity in trade and professions, and partly to the careful revision of the assessments by the special sub-committee appointed for the purpose. The whole of the demand, except Rs. 399–8–0, was realised before the end of the year. Of the balance, Rs. 237–8–0 have since been collected and Rs. 23 written off the accounts as irrecoverable, leaving a balance of Rs. 139 still to be collected. Of this amount, 20 cases, involving Rs. 33, are under criminal prosecutions, and in 34 cases, involving Rs. 106, parties have since left the town, but steps are being taken to realise the arrears in these cases. The percentage of collections to finally settled demand was 95·1 against 96·8 in 1894–95. The decrease in the percentage is due to the difficulty experienced during the year, owing to the introduction of additional taxation in the shape of water-tax. The arrears outstanding at the beginning of the year were Rs. 211–8–0, of which Rupees 166–8–0 were realised and the balance, Rs. 45, was written off as irrecoverable within the close of the year. The total number of persons assessed and the average incidence of the tax were 2,015 and Rs. 4–1–1, respectively, against 1,873 and Rs. 4–2–8 in the previous year; the diminution in the average being due to the larger number of assessees under the lowest classes brought on the register. The number of assessees was 7·7 per cent. of the population of the town against 7·1 in the previous year.

(2) *Tax on Buildings.*—This tax continued to be levied at the maximum rate, viz., $7\frac{1}{2}$ per cent., on the annual rent value of buildings and lands. The original demand was Rs. 10,313–14–0, exceeding that of the previous year by Rs. 198–2–0. The number of appeals preferred against the assessment was 47 and all of them were disposed of before the close of the year. In 20 cases the original assessments were confirmed, in 7 they were reduced and in 20 cases appeals were rejected for want of deposits or other causes. The reductions and remissions granted by the council on appeals amounted to Rs. 7–12–0 or ·08 per cent. of the demand. The final demand thus stood at Rs. 10,306–2–0 as compared with Rs. 10,071–2–0, the slight increase being due chiefly to the natural expansion in the number of buildings taxable by the municipality. Of the net demand (Rs. 10,306–2–0), Rs. 9,984–13–0 were realised, and a sum of As. 8 was remitted by the council on the score of poverty of the person concerned under section 51 of the Act, leaving a balance of Rs. 320–13–0 outstanding at close of the year. This has been again reduced by subsequent collections and remissions up to date to Rs. 75–2–0, of which 47 cases, covering Rupees 44–8–0, are under criminal prosecutions. Nineteen cases, involving Rs. 19–12–0, are due from parties who are temporarily absent from the town and who therefore could not be proceeded against. In the remaining 19 cases, amounting to Rupees 10–14–0, the arrears have been ascertained to be irrecoverable and have been written off. The percentage of collection to demand amounted to 96·9 against 98·8 in 1894–95. The decrease is due to reasons given under tax on arts. The assessment registers were ready on the 28th August 1895. The arrears outstanding at the commencement of the year were only Rs. 132–9–0. Of this sum, Rs. 113–7–0 were collected and Rs. 19–2–0 written off as irrecoverable. The total number of buildings taxed and the amount of tax were 5,492 and Rs. 10,306–2–0 against 5,399 and Rs. 10,071–2–0 in the previous year. The average incidence of the tax on buildings was Rs. 1–14–0 against Rs. 1–13–10 in 1894–95.

(3) *Tax on Lands.*—As in 1894–95, the tax was levied at 2 pies for every 80 square yards or As. 10 per acre. The net current demand remained almost stationary, viz., Rs. 518–3–6, of which Rs. 436–1–7, or 84·2 per cent. of the demand, was realised within the close of the year against Rs. 506–7–8 or 95·5 per cent. in 1894–95. Of the balance, Rs. 74–8–4 have since been collected and Rs. 7–9–7 still remains to be collected. The demand register was ready on the 31st August 1895. Two appeals were preferred against the imposition of this tax on technical grounds and the assessment in these was remitted. The arrears outstanding at the commencement

of the year were only Rs. 23–2–10, of which Rs. 17–15–0 were collected within the close of the year and Rs. 5–3–10 were remitted. The extent of the land taxed was 830 acres.

(4) *Water-tax on Buildings and Lands.*—This tax was newly introduced into this town during the year in view to providing funds for the repayment of the loan taken from Government for carrying out the water-supply project and for the maintenance of the water-works. It was levied at the maximum rate, viz., 4 per cent., on the rent value of the buildings and lands. The net demand under this head was Rs. 5,776–8–8, and out of this As. 4–4 were remitted on the score of poverty of the persons concerned under section 51 of the Act and Rs. 5,560–14–11 was collected within the year, leaving a balance of Rs. 215–5–5 at the close of the year. Of the balance, Rs. 171–1–5 have since been collected and Rs. 44–4–0 remain to be collected. This tax being collected along with the tax on buildings and lands, the explanation given in paragraph 4 (2) *supra* for the arrears applies also to this item. The receipts under this head, though the tax was levied at maximum rates, fell short of the normal expenditure.

(5) *Tax on Vehicles with springs, Animals and Carts.*—These taxes were levied at the same rates as in the previous year. The receipts under this head amounted to Rs. 2,830–4–0 against Rs. 2,720 of the revised estimate and Rs. 2,704–8–0, the actuals of the previous year. There is an increase of Rs. 112–4–0 under "Tax on animals and carts" which was due to the vigilance with which animals and carts liable to taxation were detected and brought to the list. The small decrease under "Tax on vehicles with springs" does not call for remarks.

(6) *Coercive Processes.*—The number of warrants issued during the year was 744 against 1,891 in 1894–95. Adding to this the unexecuted warrants of the previous year, the total number for disposal was 1,010, all of which were executed or cancelled within the year. The total amount covered by all these warrants was Rs. 1,944–12–9, and out of this Rs. 1,738–11–6 were collected. Property was distrained in only one case and in this case the arrear was paid at once, and resort to sale became unnecessary.

(7) *Tolls.*—As in the previous year, the tolls were levied at the maximum rates allowed by the Act. There were seven toll-gates, and all of them were, as usual, leased. The gross collection, including interests levied on overdue kists, amounted to Rs. 4,796–14–4; one-fourth of this sum, viz., Rs. 1,199–3–7, was paid to the district board as its share, and the balance of Rs. 3,597–10–9 credited to municipal funds. The total income under this head is less than that of the previous year by Rupees 44–4–5. The decrease is small and calls for no remark.

(8) *Incidence of Taxation.*—The incidence of taxation per head of population, according to the census of 1891, was Rs. 1–2–7 including tolls, and Rs. 1–0–5 excluding them, the corresponding figures for the previous year being As. 15–11 and As. 13–8. The increase is due chiefly to the levy of water-tax during the year.

B.—Miscellaneous Receipts.

5. These amounted to Rs. 13,284–8–5 against Rs. 13,650 of the revised estimate and Rs. 1,38,187–9–10, the actuals of the previous year. The variations under the several items are noticed below.

6. (1) *Realisation under Special Acts.*—The income derived from this source amounted to Rs. 70 or Rs. 20 more than the revised estimate and Rs. 50 more than the actuals of the previous year. This being a fluctuating item, calls for no remark.

(2) *Avenue Receipts.*—These amounted to Rs. 26 or Rs. 4 less than the revised estimate.

(3) *Fees from Travellers' Bungalow.*—The bungalow, which was occupied by the Sanitary Engineering department, was made over to the municipality in November last and has been open to the public since then. A fee of one rupee per diem for each of the two suites of rooms is levied, and Rs. 29 were realised from fees which exceeded the revised estimate by Rs. 9.

(4) *Produce of Lands and Gardens, &c.*—The sale of Thangédu bark in one of the municipal lands realised Rs. 9 against Rs. 10 anticipated in the revised estimate.

(5) *Sale-proceeds of old Materials, &c.*—The amount realised from this source was Rs. 45–7–6, or Rs. 4–8–6 less than the revised estimate. This small decrease calls for no remark.

(6) *Conservancy Receipts—Sale-proceeds of Night-soil, Street refuse, &c.*—The receipts under this head, comprising sale-proceeds of street refuse (Rs. 338–0–7), of night-soil manure (Rs. 392–0–7), and of sale-proceeds of carbolic acid, &c. (Rs. 10–5–9), amounted to Rs. 740–6–11 against Rs. 900 in the revised estimate and Rs. 515–15–2, the actuals of the previous year. The decrease, as compared with the revised estimate, is due to the ale of the night-soil accumulated during the year not having been sold within the year. Part of it has been since sold and has realised Rs. 280–8–0.

(7) *Fees from Educational Institutions.*—The income derived from this source is Rs. 269–7–3 against Rs. 270 as per revised estimate and Rs. 271–14–9, the actuals of the previous year.

(8) *Sale-proceeds and Composition Fees of Medicines.*—The receipts under this head amounted to Rs. 73–6–1 or Rs. 3–6–1 over the revised estimate.

(9) *Income from Markets.*—The income derived from this source amounted to Rs. 1,519–15–4 against Rs. 1,510 in the revised estimate and Rs. 1,230–12–3, the actuals of the previous year. The increase of Rs. 289–3–1, as compared with the preceding year, is due to the keen competition at the auction sale of the lease. As in the previous year, the collection of fees in the market was farmed out to the contractor and the whole amount was collected within the year. The market was in good condition, having only been recently improved at a cost of over Rs. 3,000. Further improvements have been provided for in the current year's budget.

(10) *Fees from Slaughter-houses.*—The receipts from this source were almost the same as in the revised estimate. There are two slaughter-houses, one for sheep and goats and the other for horned cattle; both are stone-walled enclosures and are in fairly good condition. The collection of fees in them was, as usual, leased out to contractors.

(11) *License Fees.*—These amounted to Rs. 475–13–8, showing a decrease of Rs. 74–2–4 as compared with the revised estimate. The falling off in the receipts is due partly to the trades taxable under this head not having been exercised to such an extent as was anticipated when the revised estimate was prepared, and partly perhaps to less vigilance on the part of the out-door staff in reporting cases liable to taxation. The council will see that improvement takes place in this respect.

(12) *Fines under Municipal and other Acts.*—The receipts under this head brought in Rs. 317–7–0 against Rs. 500 in the revised and Rs. 480–13–0, the actuals of the previous year. The decrease is due partly to a smaller number of prosecutions instituted under the conservancy clauses of the District Municipalities Act now in force and partly to light fines imposed by the Bench-Magistrates.

(13) *Cart-stand Fees.*—There is only one cart-stand which is situated to the east of the town. It was, as usual, leased out to a contractor. The amount realised from it was Rs. 40–6–8, which shows little variation over the revised estimate.

(14) *Grants and Contributions from Government.*—Grants from Provincial funds for normal stipends to Muhammadan teachers undergoing training at Madras Muhammadan Training school and for girls attending the municipal schools were not drawn during the year, there being no necessity to utilise the same, owing in the former case to the difficulty experienced in inducing any of the Muhammadan pial school teachers to undergo training, and in the latter case to no girls having attended any of the municipal schools owing to there being separate Hindu and Muhammadan girls' schools in the town. An amount of Rs. 54–10–6 was drawn as grants for other purposes, such as common gymnasium and drawing against Rs. 110 expected in the revised estimate. The decrease is due partly to the non-purchase of gymnastic apparatus and drawing articles and partly to the actual grant drawn on account of salaries of the gymnastic instructor and drawing master having been less than was expected at the time of framing the revised estimate.

(15) *Contributions from Local Funds.*—These amounted to Rs. 503–15–2 against the revised estimate of Rs. 520 and the actuals of Rs. 635–8–2 in the previous year. The amount includes Rs. 160 contributed for the upkeep of the Local Fund roads lying within the municipal limits, and Rs. 343–15–2 being the one-eighth of the cost of the municipal hospital here.

(16) *Recoveries for services to Private Individuals—Private Scavenging fees.*—The income derived under this head amounted to Rs. 1,949–8–2 being practically the amount shown in the revised estimate and Rs. 37–9–11 less than the actuals of the previous year. The current demand under this head was Rs. 1,961–10–3, of which Rs. 1,946–15–8 were collected; and Rs. 8–12–1 were written off the accounts as irrecoverable, leaving a balance of Rs. 5–14–6 outstanding at the close of the year. The arrears outstanding at the beginning of the year were Rs. 12–6–7, of which Rs. 2–8–6 were collected and Rs. 9–14–1 were written off the accounts as irrecoverable. The number of houses served by the private scavengering agency was 848 as against 826, while those assessed to the tax on buildings were 5,492. The service was worked at a profit of Rs. 213–6–10 against Rs. 176–2–1 in the preceding year. The council bear in mind the remarks of Government in paragraph 3 (5) of its order, No. 1551 M., dated 20th September 1895, reviewing the administration report of this municipality for the year 1894–95, and is endeavouring to extend the service and to insist upon the pre-payment of the fees.

(17) *Other Items—Refunds of expenditure of previous year.*—The sum of Rs. 3,832–13–7 shown under this head includes the refund to the municipality of a portion of the cost, viz., Rs. 3,000, incurred by the municipality in the construction of a travellers' bungalow in connection with the new water-supply project and of Rupees 763–4–8 spent by the municipality on the preliminary operations and surveys of the town in connection with the same project. These sums have been adjusted by debit to water works and credit to the municipal funds. The remaining sum consists of Rs. 62–9–4 being the recovery of the cost incurred in defending law suits brought against the council, and of Rs. 6–12–0 recovered from the contractor of the travellers' bungalow on account of over-payments made to him in the previous year in the settlement of his accounts.

(18) *Advances recovered.*—The sum of Rs. 3,037–0–7 shown under this head represents Rs. 2,990–2–7 paid to the Sanitary Engineer to Government in 1894–95 and remaining unadjusted at the close of that year, Rs. 13–8–0 incurred in the payment of process fees in municipal cases, Rs. 26 paid to the pleader at Gooty for meeting the charges incurred in defending law suits brought against the council, Rupees 1–4–0 paid as demurrage charges on goods received from Messrs. West and Company, Madras, and Rs. 6–2–0 misappropriated by the acting Hindu inspecting schoolmaster Dustaghir Saib from the permanent advance in his charge. All these sums have been adjusted by debiting them to service heads and crediting to municipal funds. As regards the money misappropriated by Dustaghir Saib, he absconded on a certain night with the unspent portion of the advance. A criminal complaint has been laid against him, but he is still at large. The pay due to him at the time covers, however, more than the amount made away with by him.

III.—EXPENDITURE.

7. The expenditure aggregated Rs. 69,611–6–1 against Rs. 85,240 in the revised estimate, and Rs. 1,19,176–4–0 the actuals of the previous year. It was distributed among the various grants in the proportion shown below:—

	Amount.			Percentage.
	RS.	A.	P.	
Grant I	45,446	5	6	65·3
„ II	3,681	11	2	5·3
„ III	11,690	15	6	16·8
„ IV	1,400	6	0	2·0
„ V	3,406	12	11	4·9
Repayment of debt	3,933	0	0	5·6
Advances	52	3	0	·1
				2

8. *Grant I, Public Works.*—(1) The total outlay on public works was Rupees 45,446–5–6 against the revised estimate of Rs. 59,980, the actuals of the preceding year being Rs. 91,532–10–3. The large decrease as compared with the revised estimate appears under water-supply and buildings, and was due to the allotments made for the completion of water-supply project and the construction of the municipal office building not having been fully spent, and to some of the sanctioned works not having been undertaken during the year for want of plans and estimates.

(2) *New Works—Communications.*—An allotment of Rs. 1,000 was provided for improving the Kumbardidy road, but only a sum of Rs. 127–6–8 was incurred in the construction of revetment side channels to carry off storm water. For the greater portion of the year, the municipality found difficulty in procuring the services of a competent overseer, and in the absence of such a one, it was not possible to carry out works provided for in the budget. Hence the balance of Rs. 872–9–4 under this head could not be spent within the close of the year. More work has been turned out since, and the balance will be expended in the current year.

(3) *Repairs—Communications.*—An expenditure of Rs. 2,052–1–0, out of an allotment of Rs. 2,980 provided for in the revised estimate, was incurred in re-metalling of portions of three main street roads and in executing petty repairs to some other roads. The collection of further metal and gravel was commenced before the close of the year, and is nearly completed now, and the work of spreading will be proceeded with as soon as rains set in.

9. The total expenditure on roads both under new and old was Rs. 2,179–7–8 against Rs. 502–13–3 in 1894–95.

10. The total length of the roads maintained by the municipal council is $8\frac{3}{4}$ miles, of which $6\frac{1}{4}$ miles were metalled or gravelled and $2\frac{1}{2}$ miles were unmetalled. All the town roads were kept in fair condition during the year under report.

11. *Road charges and tolls.*—The total expenditure on roads amounted to 60·6 per cent. of the net revenue from tolls against 13·9 per cent. in the previous year.

12. (1) *New works—Buildings.*—The outlay incurred under this head was Rs. 5,392–9–6 against Rs. 12,760 in the revised estimate. The large decrease in expenditure was due partly to the construction of a cattle-shed, three zinc latrines and five zinc urinals not having been undertaken, in expectation of new standard designs for them which have since been received, and partly to short expenditure on the construction of the municipal office building which could not be taken in hand earlier, as no contractor could be got, in spite of tenders duly published, to take up the work. It was then resolved to do it departmentally and Rs. 2,784–10–4 out of Rs. 7,320 were spent within the year. The work is progressing and will be completed shortly. The improvements to the Jubilee market, the construction of a zinc latrine and two urinals were completed during the year 1894–95, and their accounts were finally settled in the year under report.

(2) *Repairs—Buildings.*—An expenditure of only Rs. 91–6–9, out of an allotment of Rs. 300 provided for in the budget, was incurred in executing urgent repairs to the following works :—

	Rs.	A.	P.
Repairs to hospital latrine	47	1	8
" to Kilchipet "	..	..	
" to Jubilee market	13	1	3
" to bullock slaughter-house	2	13	0
" to municipal choultry	0	11	0
" to Venkannakeri latrine	0	15	0
" to latrine near Government school	24	6	0
" to municipal office	2	6	10
Total ..	91	6	9

The short expenditure under this head is explained in the remarks column of Statement II.-A, Part II—Repairs.

(3) *Drainage and water-supply.*—The expenditure under drainage exceeded the allotment (Rs. 200) by Rs. 20–14–11. The increase could not be avoided. The water-supply project which was commenced in 1893–94 was completed during the year under report at a total cost of Rs. 1,57,319–3–8, the estimated cost being Rupees 1,62,000. At the close of the year, there remained an unspent balance of Rupees 4,680–12–4 out of the estimate. This and the additional allotment of Rs. 3,000 made in the current year's budget will be spent on the works which have still to be carried out in connection with these works (*vide* paragraphs 11 and 21 of the budget report embodied in G.O., No. 528 M., dated 25th March 1896). The water works were formally opened for public use on the 23rd September 1895 by J. H. A. Tremenheere, Esq., Collector of Bellary, in the presence of a large gathering of people and several European and Native gentlemen, Mr. and Mrs. Jones being among the former. The people at large have greatly appreciated the boon. Some ignorant people had prejudice against pipe-water, but it is dying out. Towards the close of the year, the syphon gave way and unfiltered water was taken direct to the pipes through the sluice. The nature of the damage to the syphon has since been ascertained and it has been repaired and is working all right. The tank received only a moderate supply last year, but there has been sufficiency of water to meet the requirements of the town.

(4) The expenditure under repairs of water works was Rs. 594–9–0 being less than the sanctioned allotment by Rs. 275–7–0, the decrease being due to the works having been entirely handed over in November only instead of in the beginning of the year as had been anticipated.

13. *Grant II, Education.*—The total expenditure on education was Rupees 3,681–11–2 against Rs. 4,210 in the revised estimate and Rs. 3,185–7–2, the actuals of the previous year. The decrease, as compared with the revised estimate, occurs chiefly under "Result stipends" and "Contingencies" in the salary-result system schools and under result-grant schools, and was due to in the first and third cases to the grants earned by all the municipal and result-grant schools having been less than had been anticipated and in the second to the non-purchase within the year of furniture and other articles provided for in the budget.

14. (1) *Training Schools.*—Nothing was spent in the payment of stipendiary scholarships for Muhammadan pupils provided for in the budget as explained in paragraph 6 (14) *supra*. An expenditure of Rs. 11–0–9 was, however, incurred in the payment of scholarship grants to the teachers that attended the sessional school which was opened here during the year at the suggestion of the Educational officers, and other contingencies attendant on the opening of the school. A sessional school was opened on the 2nd September 1895 under the supervision of the Hindu inspecting schoolmaster of this municipality and kept up to 20th January 1896. Two pial school teachers attended the school. One was taught free having passed the Primary examination in the compulsory subject and the other was allowed Rs. 4 per month. These two were persuaded to appear for the Primary examination but only one actually did so, the other having been prevented by illness from attending it. The one that appeared for the examination failed.

(2) *Municipal Schools.*—On the 31st March 1896, there were six primary schools on the salary-result system maintained by the municipal council as against five on the corresponding date in 1895, a school for Panchamas having been newly opened in the year. Of these, four are day schools, of which one is intended for Muhammadans, and two night schools, one for the Hindus and the other for Muhammadans. The strength of, and the average attendance in, these schools on the 31st March 1896 were 386 and 318, respectively, against 337 and 302 on the corresponding date in 1895. The increase is due chiefly to the establishment of a school for Panchamas referred to above. Omitting the figures of this school from the accounts, the strength of the schools rose from 337 to 359, while attendance at them fell from 302 to 291. There was a falling off in the attendance at the Havannapet poor school and Muhammadan day school, but this was partly counterbalanced by a slight increase in the other schools. All these schools sent up for the standard examination 266 pupils, of whom 178 passed, the corresponding figures in 1894–95 being 240 and 126. The

total expenditure on these schools was Rs. 2,198–7–11, and the net cost to the municipal council, after taking credit for the fees amounting to Rs. 269–7–3, was Rupees 1,929–0–8 against Rs. 1,692–3–3 in 1894–95, and the average cost of educating each pupil was Rs. 6–1–1 against Rs. 5–9–8 in the previous year. The working of all these schools is reported by the Educational officers to have been fair.

(3) *Grant-in-aid Schools.*—There were 15 schools of this kind attended by 562 pupils at the close of the year, against 16 schools with 620 pupils in the preceding year. The difference is the net result of three schools which earned grants in the year previous having been closed, and of two new ones having been brought under inspection for the first time during the year under report. The municipal council aided one secondary and fourteen primary schools against one and fifteen, respectively, in 1894–95. The strength of the secondary school showed an increase of 10 pupils, while that of the primary schools suffered a loss of 75 pupils. This decrease is ascribed to the strict enforcement of the rules regarding the attendance of pupils and the employment of trained teachers. From these schools, 429 students were presented for the standard examination and 276 of them were successful, the corresponding figures for the previous year being 493 and 302. The total expenditure under grant-in-aid was Rs. 1,018–12–0 or 84·9 per cent. of the allotment, against Rs. 926–11–0 or 92·7 per cent. in 1894–95. The decrease is due to poor grants earned by the result-grant schools. Result grants were paid at maximum rates to such schools only as continued to employ trained or certificated teachers and at 75 per cent. to all other schools aided from municipal funds.

(4) Of the 38 teachers employed in municipal and aided schools, only 11 possessed trained teachers' certificates, 5 had untrained teachers' certificates, 14 with general education certificates and 8 were unpassed or unqualified. Steps will be taken to warn the managers of the aided institution by further reductions in the grants payable to them, if they should fail to employ qualified teachers.

(5) There were nine unaided schools with a strength of 246 pupils against 8 schools and 182 pupils in the preceding year, showing an advance in the number of schools and scholars.

(6) The total number of boys under instruction in municipal and aided schools was 46·8 per cent. of the male population of school-going age against 48·1 per cent. in 1894–95.

(7) *Inspection.*—The municipal council employed two inspecting schoolmasters as in the previous year. These officers examined 35 schools with 17,205 pupils. The permanent Hindu inspecting schoolmaster underwent training at the Government Training School at Bellary for nine months. He failed, however, to get the required certificate. He has however appeared again. The work of the inspecting schoolmasters has been pronounced by the Assistant Inspector of Schools as fair. The charges on account of inspection amounted to Rs. 302–1–6, or Rs. 52–1–6 more than the revised estimate. This increase is due to the purchase of the educational portion of the *Fort St. George Gazette* at the suggestions of the Director of Public Instruction and to the travelling allowance, &c., paid to the inspecting schoolmasters being larger than was anticipated.

15. *Grant III, Medical Services and Sanitation*—(1) *Hospitals and Dispensaries.*—The expenditure under this head amounted to Rs. 2,781–13–7, or Rs. 98–2–5 less than the revised estimate and Rs. 989–14–10 less than the actuals of 1894–95. The large decrease, as compared with the actuals of the previous year, appears entirely under medicines and supplies, and was due to the fact that in the year previous, the payment made on that account included the cost of two years' supply. The total number of sick treated at the hospital was 72 in-patients and 12,233 out-patients against 79 and 11,634, respectively, in 1894–95.

(2) *Midwives.*—A midwife was, as usual, attached to the municipal hospital here. She attended 88 cases of labour against 66 in 1894–95. The present midwife does not appear sufficiently energetic for a town like this.

(3) *Contribution to Provincial Funds.*—The total amount paid to provincial funds was Rs. 766 against Rs. 290 in the revised estimate and Rs. 853, the actuals of the previous year. The increase over the revised estimate figures is due, as in the previous year, to the contributions having been calculated on the receipts including the special grant on account of water-works. A reference has been made to the Accountant-General taking exception to this principle of calculating the contribution and his reply is awaited.

(4) *Medical Training of Women.*—The midwife attached to the municipal hospital is a trained nurse. The council does not see its way to providing funds for the training of female medical practitioners, having regard to the fact that they have to discharge a heavy liability to Government, in the shape of the loans obtained on account of water-works, and to meet the maintenance charges thereof for which, as already stated, the receipts from water-tax have been found inadequate, and also bearing in mind that there are more pressing needs, such as drainage and improvement of streets, which are so essential from a sanitary point of view, and to carry out which a large outlay and probably further grants and loans from Government will be necessary. The system of removing street refuse departmentally, which has been undertaken by the municipality, is also likely to entail additional expenditure of about Rs. 2,000 net per annum. For these reasons the council regrets its inability for the present to meet the wishes of Government in this respect.

(5) *Vaccination.*—The outlay on this account was Rs. 307–2–6, being less than the revised estimate by Rs. 22–13–6 and Rs. 81–15–1 less than the actuals of the previous year. The decrease is due partly to the cheapness of the fodder bought for feeding calves and partly to the introduction of lanoline paste for vaccination purposes in the latter part of the year:—

(6) Vaccination has been compulsory in this town since 1886. The total number of operations performed by the municipal vaccinator was 1,300 (primary 1,201 and 99 re-vaccination) against 1,396 (primary 1,259 and re-vaccination 137) in 1894–95. Of the former 1,081, or 83·2 per cent., were successful, the corresponding figures for the previous year being 1,180 or 84·5 per cent. The number of children under one year successfully vaccinated was 837, or 31·9 per cent. per mille of the population, against 796 or 30·9 per mille in 1894–95. Taking the normal birth-rate to be 40 per mille, the results can be said to be satisfactory as compared with those of the previous year. As the number of unprotected cases of children above one year has been greatly diminished, the total number of vaccinations shows a decrease in the year under report as compared with the previous year. Four hundred and seventeen cases of failure to have children vaccinated were reported to the magistrate during the year against 685 in the preceding year. It will be seen from the civil apothecary's report that the system of vaccination direct from animal lymph was in vogue till 31st January 1896 when lanoline paste was introduced. The vaccinator's work is supervised by the civil apothecary in charge of the municipal hospital, Adóni, who verified 974 cases against 866 in the previous year. The average cost of each successful operation was As. 4–7 against As. 5–3 in the previous year.

(7) The civil apothecary performed 57 operations, 39 of which were successful as against 204 and 190 respectively in 1894–95, the large decrease being due to the fact that vaccination in dispensaries is now optional.

(8) *Vital Statistics.*—The subjoined abstract shows the number of births and deaths registered during the year as compared with the previous year:—

	Births.	Rate per mille.	Deaths.	Rate per mille.
1894–95	955	36·3	642	24·5
1895–96	1,122	42·8	606	23·1

From the above figures it will be seen that there was a large increase in the number of births and a small decrease in the number of deaths, which may be attributed in a great measure to the generally more healthy condition of the town

during the year. The increase in the former case is also probably due to some extent to better registration. Thirty-nine prosecutions were instituted for failure to register births and deaths against 81 in 1894–95. The warning given to people by the prosecutions instituted in the previous year has had the intended effect on the people who now come regularly and report the occurrences in their houses. The expenditure on this account amounted to Rs. 150–11–3 against Rs. 150 in the revised estimate.

(9) *Conservancy.*—The expenditure on conservancy, road-cleaning and road-watering was Rs. 7,685–4–2 against the revised estimate of Rs. 8,370 and the actuals of Rs. 7,672–7–1 in 1894–95. The decrease as compared with the revised estimate appears chiefly under "Establishment" other charges, such as purchase of or hire of carts and under "Contingencies," and was due in the former case to the inability of the council to procure the services of water-bearer for watering streets on Rs. 5 provided for in the budget and in the latter two cases to the night-soil carts, buckets, water-tubs, scrapers, &c., ordered from Madras not having been received within the close of the year. An expenditure of Rs. 6–4–0 out of an allotment of Rs. 10 was incurred in adopting necessary measures to prevent the spread of cholera which appeared during the year. There were four attacks and two deaths from the disease.

(10) The conservancy of the town was well attended to. The strength of the establishment is shown below :—

Inspector	1
Maistry	1
Peons	6
Toties	26
Sweepers	30
Water-bearers	3
Cattle-shed keeper	1
Private scavengering—	
Maistry	1
Toties	16

There are 125 dust-bins, 74 being of stone slabs fixed upright in the ground and the remainder circular movable galvanised iron structures. The number is insufficient. Some more are required, but they could not be purchased for want of a suitable pattern. The rubbish was removed in carts by ryots to a place further away from the town than before and there deposited till ploughing season when it was removed to fields and used as manure. This system has been since discontinued.

The public latrines were seventeen in number including a new iron one erected during the year under report. Of these seven are made of corrugated iron sheets, six of masonry walls and four mud-walled. There are also five urinals, three being of galvanised iron and the rest are enclosures of stone slabs. All these were in good order. They were cleaned twice a day and kept in a clean state. There were eight night-soil carts at work during the year.

(11) *Private scavengering.*—The expenditure under this head amounted to Rs. 1,736–1–4 against Rs. 1,780 of the revised estimate and Rs. 1,751–9–0, the actuals of the previous year. The decrease, as compared with the revised estimate, is small and calls for no remark. The number of houses served by the municipal agency at the close of the year was 848 against 826 in 1894–95. This service was worked at a profit of Rs. 213–6–10 to the municipal council against Rs. 176–2–1 in 1894–95. The council is aware that there is much room for improvements in this respect, and it is taking necessary steps in the matter.

(12) The night-soil from both public and private latrines was taken in municipal carts to the depôt a mile away from the town and there buried in trenches and covered with earth and sweepings.

16. (1) *Grant IV, Lighting and Miscellaneous—Lighting.*—The outlay on this account was Rs. 795–7–9 or Rs. 444–8–3 below the revised estimate. The large decrease appears under contingencies and was due to lanterns, burners, chimneys, &c., ordered from Madras to replace broken ones not having been received within the close

of the year. The lighting of the town was carried on departmentally as in the preceding year. The town was lit with 120 lamps against 176 in the preceding year, the decrease being due to a number of old lanterns having become unserviceable. They will be replaced before long.

(2) *Choultries.*—The charges under this head amounted to Rs. 24 or Rs. 6 less than the revised estimate. This does not call for remark. The daily number of people who halted in it was four.

(3) *Avenues.*—The expenditure under this head was Rs. 58–9–3 or Rs. 8–9–3 in excess of the revised estimate. The slight increase does not call for remark.

(4) *Other charges.*—These amounted to Rs. 503–10–1 against Rs. 620 in the revised estimate and Rs. 534–3–5, the actuals of the previous year. The decrease is due to no charges for the destruction of stray dogs having been incurred, no necessity having arisen for the same, and to cost of printing having fallen short of the estimate by Rs. 52–6–6.

17. *Grant V, General Establishment—Office.*—The charges under this head were Rs. 3,406–12–11 against Rs. 3,140 in the estimate and Rs. 2,610–15–3, the actuals of the preceding year. The increase as compared with the revised estimate is due chiefly to a sum of Rs. 325–15–1 due by the Bellary Municipality on account of supply of account books and forms having been recovered from this municipality by the Inspecter of Local Fund Accounts through the Accountant-General. This sum has, however, been refunded subsequent to the close of the year. The decrease under office contingencies is due to the economy observed in the expenditure of stationery articles, &c.

18. *Repayment of debt.*—The council paid Rs. 1,193–12–4, as the second instalment of the principal and Rs. 2,739–3–8 as interest in respect of the loan of Rupees 66,000 obtained from Government in 1893–94 for the execution of water-works in this municipality.

19. The accounts of this municipality for 1894–95 were audited during the year under report by M.R.Ry. S. Rajacannu Mudaliyar, B.A., the municipal auditor attached to the Accountant-General's office, and the results of his audit were satisfactory.

20. I regret the delay that has occurred in the submission of this report. It was due partly to some difficulty experienced in the office in reconciling certain differences in the figures showing demand, collection and balance of house and water-taxes owing to the fact that the water-tax was introduced during the year and the calculation of the tax at 4 per cent. resulted in the occurrence of pies, and partly to the fact that the educational statements were received only on the 30th ultimo. Even now the figures as entered against secondary school in statement I do not tally with those shown in the statement V-B furnished to this office. I have had to return them to the Assistant Inspector of Schools for necessary corrections and retransmission to this office. They will be submitted to you on receipt.

21. The report from the civil apothecary in medical charge of the municipal hospital, Adóni, on the working of the hospital and on the sanitation of the town is enclosed.

22. A copy of council's resolution approving the report is submitted.

ENCLOSURE.

From M.R.Ry. S. J. PARTHASARATHI AIYAR, Civil Apothecary, in medical charge Adóni to the Chairman, Municipal Council, Adóni (through the District Medical and Sanitary Officer, Bellary), dated 7th April 1896.

I have the honour to submit the following administration report on the state and progress of the Municipal Hospital, Adóni, and on the sanitation of Adóni for the official year ending 1895–96.

Public Health.—The public health during the year was satisfactory. Two deaths from cholera were recorded. The following comparative statement shows the prevalence of the principal diseases :—

Disease.	1894–95.	1895–96.
Cholera	..	2
Fevers	223	223
All other causes	419	381
Total deaths ..	642	606
Births including born dead	955	1,122
Deaths from all causes excluding born dead	642	606

2. *Vital Statistics*—

	1894-95.	1895–96.
Population	26,243	23,243
Total births	955	1,122
Total deaths	642	606
Birth-rate per mille	36·3	42·8
Death-rate „	24·5	23·1

3. *Sanitation.*—One additional zinc latrine was constructed during the year under report. There are 17 latrines and 5 urinals; 848 private latrines are scavenged by the municipality. One of the great insanitary conditions of Adóni is its numerous lanes and bye-lanes, and the chief want of Adóni is a proper drainage scheme.

4. *Vaccination.*—Compulsory vaccination is in force since 1886. The expenditure incurred upon vaccination is Rs. 114–6–0 against Rs. 187–13–1. Number of calves inoculated is 41 against 62 of last year. The decrease in the charges is due to the less number of calves inoculated. Animal vaccination was kept up till 31st January 1896, when vaccination by lanoline paste was introduced. Total number of cases vaccinated in the town is 1,357. There is a decrease of 243 operations as compared with that of last year. The decrease is due to the very few cases of unprotected children. Number of children vaccinated under one year is 938, of which 837 were successful.

	Total.	Successful.	Unsuccessful.
Animal lymph direct	542	532	10
Glycerine paste	249	191	58
Lanoline do.	141	114	26

The figures show that vaccination direct from the calf was the most successful.
(Intld.) S.R.

5. *Hospitals and Dispensaries*—(*a*) *Nature and sufficiency of accommodation.*—A fine masonry building specially built for the purpose. A dressing-room, both for males and females, is badly wanted. A veranda to the post-mortem room or some other protection from sun, wind or rain is highly desirable. The building ($10' \times 9' \times 8\frac{3}{6}'$) has not enough of space to permit of a writing table being placed to enable the medical officer to write his notes.

Provision will be made in the next year's budget for a better room.
(Intld.) S.R.

He cannot conveniently move round the table.

The performance of the post-mortem is thus rendered a task of danger and difficulty.

(*b*) *State of repair of buildings.*—They are in good state of repair.

(*c*) *State of repair of furniture.*—In fair order.

(*d*) *Inspections*—

(1) By the Surgeon-General, *nil.*

(2) Latrines and cook-room repaired.

(*e*) *Amount of recoveries from patients, &c., nil.*

(*f*) *Number of patients treated as compared with previous years.*—In 1893–94 in-patients 90, average number 3·89; out-patients 16,654, average number 108·29. In 1894–95 total number of in-patients treated was 79 and the average number 3·12; total number of out-patients treated is 11,634 and the average number was 78·23. In 1895–96 total number of in-patients treated was 72 and the average number 4·51; total number of out-patients treated is 12,233 and the average number was 83·35.

The most common diseases among the out-patients were malarial fevers, diseases of the eye and diseases of the digestive system, and those among the in-patients were malarial fevers, rheumatic affections and diseases of the digestive system and local injuries.

(*g*) *Mortality and actual causes of it.*—There were two deaths among the in-patients—one from local injuries and the other from diseases of the digestive system; and among the out-patients two were from cholera and one from all other general diseases.

This is a curious way of putting it. It being only one case, the particular disease might as well have been mentioned, especially in the case of in-patient.
(Intld.) S. R.

(*h*) *Operations and Results.*—There were 11 major operations and 585 minor operations. There is an increase of 3 major and 143 minor operations.

The opinion of the District Medical and Sanitary Officer will be sought as to what may be done with the man.
(Intld.) S. R.

(*i*) *Establishment whether sufficient and efficient.*—It is sufficient. The Hospital Assistant is incompetent and belongs to Nellore school.

(*j*) *Midwives—work actually done.*—During the year under report Thippama, a trained midwife, conducted 88 cases against 66 of last year. The minimum number of cases is 8 to entitle her to her fixed pay (Rs. 15).

(*k*) No caste and gosha women dispensary.

(*l*) Expenditure during the year under report, as compared with the previous year, is as follows—salaries of medical subordinates for 1895–96 are Rs. 1,505–15–7. There is a decrease of Rs. 30–11–1 due to the absence of the temporary hospital assistant on cholera duty in the district. Salaries of servants are Rs. 592–13–7 against Rs. 542–6–7 of last year. The increase of Rs. 50–7–0 represents increase in the pay of the compounder and the absence of stoppages in the pay of the midwife as in the previous year. The dieting of patients costs Rs. 89–10–3 against Rs. 96–11–5. Miscellaneous and contingencies cost Rs. 285–5–8 against Rs. 275–14–8.

Is this the correct explanation? I believe that last year two years' supplies were paid for within the year.
(Intld.) S. R.

Slight variations under the last two items call for no remarks. Medical stores and instruments cost Rs. 308–0–6 against Rs. 1,260–1–1. The decrease of Rs. 952–0–7 is due to the non-purchase of any surgical instruments and many European medicines.

No. 1610.

Forwarded to the Chairman, Municipal Council, Adóni.

15*th May* 1896. (Signed) F. J. CRAWFORD, Surgeon-Captain,
Ag. District Medical and Sanitary Officer.

C. No. 1434.

Forwarded.

2. The roads were in better condition in 1895–96 than in the previous year, the most important of them having been remetalled. The municipality is taking up all the remaining roads for making similar improvement.

ADONI,
14*th June* 1896. (Signed) S. RAMU AIYAR,
Deputy Collector.

Forwarded with the following remarks.

2. *Paragraph 3 of the Chairman's letter.*—The receipts during the year under report were Rs. 43,790–10–8 against Rs. 1,64,306–10–4 of the preceding year. The large decrease is apparently due to the two special items of receipts during 1894–95, viz., Government contribution for water-supply works and the adjustment of advances made to the Sanitary Engineer. This should have been clearly explained in the report.

3. *Paragraph* 6 (11), *License Fees.*—The decrease and the explanation are both very unsatisfactory.

4. *Paragraph* 6 (12), *Fines.*—The decrease would be more satisfactory if it were due to a decrease in the amount of nuisances committed which the Collector is afraid is not the case.

5. *Paragraph* 6 (16), *Service to private individuals.*—There is a slight but satisfactory increase in the number of houses served by private scavengering, but the number is still too small.

6. *Paragraph* 6 (18), *Advances recovered.*—It is not understood how Dastagiri Sahib can be an "Acting Hindu Inspecting Schoolmaster."

7. *Paragraph* 7, *Expenditure.*—The large decrease under this item, as compared with that of the preceding year, is apparently due to the large sum spent in the preceding year for water-works. This should have been clearly explained in the report.

Disease.	1894–95.	1895–96.
Cholera	..	2
Fevers	223	223
All other causes	419	381
Total deaths	642	606

ADONI,
14*th June* 1896.

(Signed) S. RAMU AIYAR,
Deputy Collector.

Forwarded with the following remarks.

2. *Paragraph 3 of the Chairman's letter.*—The receipts during the year under report were Rs. 43,790–10–8 against Rs. 1,64,306–10–4 of the preceding year. The large decrease is apparently due to the two special items of receipts during 1894–95, viz., Government contribution for water-supply works and the adjustment of advances made to the Sanitary Engineer. This should have been clearly explained in the report.

3. *Paragraph* 6 (11), *License Fees.*—The decrease and the explanation are both very unsatisfactory.

4. *Paragraph* 6 (12), *Fines.*—The decrease would be more satisfactory if it were due to a decrease in the amount of nuisances committed which the Collector is afraid is not the case.

5. *Paragraph* 6 (16), *Service to private individuals.*—There is a slight but satisfactory increase in the number of houses served by private scavengering, but the number is still too small.

6. *Paragraph* 6 (18), *Advances recovered.*—It is not understood how Dastagiri Sahib can be an "Acting Hindu Inspecting Schoolmaster."

7. *Paragraph* 7, *Expenditure.*—The large decrease under this item, as compared with that of the preceding year, is apparently due to the large sum spent in the preceding year for water-works. This should have been clearly explained in the report.

8. *Paragraphs* 8 (1), 8 (2) *and* 12 (1).—The explanations for the short expenditure are not at all satisfactory.

9. *Paragraph* 14 (4).—There are only eleven trained teachers out of a total of 38—an absurdly low figure. This requires the earnest attention of the council.

10. *Paragraph* 16 (1), *Lighting.*—The explanation of the short expenditure under this head is most unsatisfactory, as also is the fact that the number of lights in the town decreased from 176 to 120. New lamps should have been obtained before the old ones became so unserviceable as to be quite useless. If the new lamps had been ordered in time they would have been received long before the close of the year.

11. The remarks of the civil apothecary on the insufficiency of the *post-mortem* room and the hospital assistant seem to require the early attention of the council.

(Signed) J. T. LEVER,
for *Collector.*

18*th June* 1896.

ORDER—No. 1251 M., dated 27th July 1896.

The receipts and charges of the Adóni Municipality for 1895–96 are compared below with the budget and revised estimates for the year and the actuals of 1894–95 :—

—	Actuals, 1894–95.	Budget estimate, 1895–96.	Revised estimate, 1895–96.	Actuals, 1895–96.
Receipts.	RS.	RS.	RS.	RS.
Balance brought forward	7,667	6,960	52,800	52,799
Tax on Arts	8,322	7,600	8,100	7,965

Total ..	1,71,975	43,280	97,140	96,590

2. Thirty-seven meetings were held by the municipal council against thirty-six in 1894–95 and, as in that year, five others were adjourned for want of a quorum. The average attendance of the members improved and was fairly satisfactory.

3. *Receipts.*—(1) There was again an increase of Rs. 390 and Rs. 235, respectively, in the net current demand of the taxes on arts and buildings, but that of the tax on lands remained almost stationary. The water-tax was, for the first time, imposed in the town during the year under review and its net demand amounted to Rs. 5,777. The collections under these heads were on the whole satisfactory, although in the case of the first three taxes, they were not as good as in 1894–95. The number of coercive processes issued for the collection of the several taxes was considerably smaller than in the previous year, but they were executed with satisfactory promptitude, and none were outstanding at the end of the year.

(2) The receipts from the tax on animals and carts, sale of sweepings and market rents showed an increase, which, in the case of the last, is attributed to keen competition at the sale of the farm. The income from license fees and fines however declined slightly and, in this connection, the municipal council's attention will be drawn to the Collector's remarks in paragraphs 3 and 4 of his endorsement.

(3) The number of houses served by the private scavenging agency rose from 826 to 848 and the service was worked at a profit of Rs. 214 to the municipal council. This amount might well have been utilized in improving the service, which should only be maintained in order to provide for adequate conservancy without additional expense to the municipality and not as a source of revenue. No efforts should be spared in the current year to extend the system which is now confined to but a small portion of the occupied houses in the town.

4. *Expenditure*—(1) *Public Works.*—The water-supply scheme, which was commenced in 1893–94, was completed during the year under review at a total cost of Rs. 1,57,319 against an estimate of Rs. 1,62,000, and the work was opened on the 23rd September 1895. Some further improvements, costing Rs. 2,172, were also effected in the Jubilee market and a sum of Rs. 2,785 was spent on the construction of the municipal office building out of an estimate of Rs. 7,320. The municipal council's attention will be drawn to the Collector's remarks in paragraph 8 of his

endorsement in which the Government fully concurs. The total outlay on communications amounted to Rs. 2,179, or 60·6 per cent. of the net municipal income from tolls, and the town roads are stated to have been in fair order.

(2) *Education.*—The net expenditure on education was Rs. 3,358, or 11·1 per cent. of the income from taxation, and all but Rs. 336 of this sum was devoted to primary education. A primary school for Panchamas having been opened during the year, there were on the 31st March 1896 six primary schools on the salary-result system maintained by the municipal council. The attendance at the Panchama school was fair, while, at the other institutions taken together, there was a slight improvement. Judging from the results of the departmental examinations, these schools appear to have worked well on the whole. The municipal council also aided one secondary and fourteen primary schools with result grants, against one and fifteen, respectively, in 1894–95. Owing to the causes explained in paragraph 14 (3) of the Chairman's report, there was a decline in the strength of these institutions, the results of the grant examinations were not satisfactory and nearly 16 per cent. of the allotment for result grants was left unutilized. The total number of boys under instruction in the municipal and aided schools fell from 957 to 930, being only 46·8 per cent. of the male population of school-going age against the general average of 54·3 per cent. for municipalities in 1894–95. The municipal council's attention will be drawn to the Collector's remarks in paragraph 9 of his endorsement and the instructions contained in paragraph 4 (2) of G.O., No. 1555 M., dated 25th September 1895, should be strictly carried out.

(3) *Medical Relief.*—The number of in-patients treated at the municipal hospital fell from 79 to 72, but that of out-patients increased by 599. The midwife attached to this institution attended eighty-eight cases of labour against sixty-six in 1894–95, the number being still below the prescribed minimum. This is not satisfactory and steps should be taken to exact better work from her in the current year. The municipal council's attention will be drawn to the Collector's remarks in paragraph 11 of his endorsement.

(4) *Vaccination and Vital Statistics.*—The reported number of persons vaccinated during the year showed a decrease of 243. The quality of the work done also slightly deteriorated and was again poor, the ratio of successful operations being 82·5 per cent. against 85·6 in 1894–95. Infantile vaccination improved slightly, but the number of children under one year successfully operated on was only 31·9 per mille of the population against a registered birth-rate of 42·8. If it is true, as stated in paragraph 4 of the medical report, that the number of unprotected children is so small that the number of cases vaccinated must decrease, greater attention should be paid to re-vaccination. The work of the vaccinator should be more carefully supervised than it seems to be.

The registration of births improved and the returns may now be considered fairly accurate. Care should be taken that there is no deterioration in future, while the subject of improving the registration of deaths should receive careful attention, as it is at present not at all satisfactory, the statistics being still very defective.

(5) *Sanitation.*—Nearly 13 per cent. of the allotment under this head was allowed to lapse under the circumstances explained in paragraph 15 (9) of the Chairman's report, and the expenditure amounted to only 17·5 per cent. of the receipts. It is, however, gratifying to observe that some improvements have been effected in the sanitary condition of the town since it was last inspected by the Sanitary Commissioner, but the council should not rest satisfied until all the defects pointed out by him have been fully remedied. The council's attention will be drawn to the Collector's remarks in paragraph 10 of his endorsement.

5. *General Remarks.*—The year closed with a balance of Rs. 26,978, or 61·6 per cent. of the receipts, but the greater portion of this sum, which represents the unutilized portion of the provision for public works, has been allotted for expenditure in the current year.

[ ]
13,000-24-3-05.

Except in regard to education, vaccination and registration of deaths, which were not satisfactory, the administration of the municipality during the year under review continued to be fairly efficient.
