No. 151

10th April 1896

Address of Mr. Rodolph Victor at
Lehmanian. Municipal Council
Tuticora

The Chief Secretary to Government
Fort St. George
Madras.

I have the honour to acknowledge
the receipt of G. O. No. 435 M. this
dated the 16th March last regarding
Water supply Scheme of this town, and in
reply to beg to enclose a copy of the resolution
of the Council on the subject.

The Council is of opinion that 10
gallons of water per head a day are
not at all sufficient, considering
especially the enormous floating
population which comes into the town
every day by sea, land and Railway and
that fully 15 gallons are necessary.

The Korampallam tank which usually
supplies water to this town till April every
year has unfortunately failed this year
in the middle of February on account
of Upper-odai dam shutters having been
kept open for fear of the tank breaching
during the heavy rains in December last.
and also on account of several breaches on
the way from Suvaigentharam ancient
to Korampallam tank. This year is
therefore expected to be one of great
drought. The Government must
seriously consider what will be the
position of this town in case like the
one just above mentioned even though
there was pumping and tapping and
other elaborate arrangements of the Big
Scheme.

The position cannot be any way better.
but on the contrary, it will be worse,
because it is not only that the people
will have no water but have to be put

to the oppression of contributing heavily
towards the interest of the large amount
of money required for the big scheme
and the maintenance of the costly
establishments connected with the pumping
system.

I have therefore, the honour to
request you will be so good as to
inform His Excellency the Governor-in-
Council to reconsider the decision
arrived at in the above G.O. and
dispense with the pumping system
at present, as suggested by the Sanitary
Engineers, in consideration of the utter
inadequacy of the present state of
Municipal finance and for the reasons
stated above.

I have the honour to be
Sir,

Yours most obedient Servant

W. H. C. Victoria

Chairman

Extract from the Proceedings
of the Municipal Council Introsion
in their Special meeting held on
Monday the 30th March 1896 at
5.30 P.M.

Present

8 Read G.O. No. 435 M. Min: dated
16th March last regarding water supply
Scheme of this town.

The Council is of opinion
that even on sanitary grounds,
10 gallons per head a day are
not sufficient & fully 15 gallons
are necessary; neither do they
think that the pumping is
at all necessary in view of
the schemes already submitted
by the District Board Engineer

The San. Board has
decided against them
& recommended the
pumping scheme.

and the Chairman. And there-
fore the Council earnestly request
the Government to reconsider
their decision before finally
Committing themselves to the opinion
of the Sanitary Board. At the
same time, the Council request
the Government to expedite the
decisions in this important matter
as the people are suffering very
much from the failure of supply
from Gorampallam tanks.

(Signed) J. Mrs Pochu Victoria

Chairman
