on the Subject, have the honor to make the following suggestions for the consideration of the Council.

1. The pool referred to by the Deputy Sanitary Commissioner is a low ground belonging to M. R. Ry. P. R. Narayana Sastriar wl, wherein rainwater collects and stagnates. He may be requested to have the pool filled up with pure earth or sand, so that water may not stagnate.

2. As the largest of the wells referred to by the Deputy Sanitary Commissioner is not a well with springs but only a cistern or reservoir for storing rain water, its parapet walls may be raised to such a height that rain water accumulating around it, may not flow into the cistern, except through filterbeds to be constructed for the purpose.

3. It would also be advisable to acquire all the drylands alongside the supply channel and keep them in a sanitary condition. But this would involve a large outlay, which, with the present waterworks on hand, the municipality can ill afford to incur.
