No. M., JULY 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. P. VENKATAKRISHNAIYA NAYUDU Garu, Chairman, Municipal Council, Guntúr, to the Chief Secretary to Government (through the Divisional Officer and Collector, Kistna), dated 25th May 1896, No. 178.

I have the honour to submit the administration report of the Guntúr Municipality for 1895–96, together with the following papers :—

(1) Civil Surgeon's report on the working of the municipal hospital.
(2) Educational statements (four in number).
(3) Statements of revenue and expenditure.

2. A copy of the resolution of the municipal council adopting the report is appended.

I.—CONSTITUTION OF THE COUNCIL.

3. At the close of the official year the council consisted of 15 councillors out of the sanctioned strength of 20, *i.e.*, 1 ex-officio, 3 nominated official, 3 nominated non-official, and 8 elected, councillors; of these, 5 were Europeans and the rest natives. There were 5 vacant seats at the end of the year—3 among nominated, and 2 among elected, councillors. Recommendations were submitted in time for the 3 nominated seats vacant, but none was filled up during the year. For the 2 elected seats, elections were duly held within the year, but the gentlemen elected were gazetted after the close of the year.

Four elections were held during the year for 4 vacancies in three wards—2 vacancies were owing to the death of two councillors, 1 owing to the resignation of a councillor and another due to the expiry of the term of office of a councillor. The elections were well contested and the voters evinced much interest therein. Out of 639 voters registered for the three wards, 396, or 62 per cent. of the electors, attended the poll. There was no election in the previous year.

4. M.R.Ry. V. Bhavanacharlu Garu held the office of Chairman from the beginning of the year up to 8th August 1895, with the exception of an interval from 8th May to 20th June 1895, when he delegated his powers to M.R.Ry. A. M. Sundarasiva Avargal. M.R.Ry. Bhavanacharlu's term of office expiring on the 8th August, the Divisional Officer took charge on the 9th of the same month and delegated his powers on the 12th idem to M.R.Ry. M. Rajaratnam Mudaliyar Avargal who continued in the office till the 16th October, when I assumed charge after the expiry of 15 days' interval from the date of election as per rule No. 7 of the election rules, having been unanimously elected to the seat on the 1st October 1895. I was Chairman during the remaining period of the year with the exception of 18 days from 6th to 23rd January 1896, when I delegated my powers to A. P. Fernandez, Esq., Acting Civil Surgeon.

5. Thirty-eight meetings were held during the year against 28 in the previous year. No meeting was adjourned for want of a quorum during the year against 6 in the previous year. The average attendance at each meeting was 10, same as in the previous year. This was made up of 1 official and 9 non-officials against 2 and 8, respectively, in the previous year, and of 2 Europeans and 8 natives against 1 European and 9 natives in the preceding year.

II.—Receipts.

6. The year opened with a balance of Rs. 6,641–11–9 against Rs. 9,444–0–6 in the previous year. The receipts from all sources including the opening balance amounted to Rs. 51,056–8–4, against the revised estimate of Rs. 51,690 and the actuals of Rs. 51,031–1–7 of the previous year.

7. The following statement gives an abstract of the actual receipts as compared with the actuals of the previous year and the revised estimate of the year under report :—

—	Actuals, 1894–95.	Actuals, 1895–96.	Revised estimate of 1895–96.	Variations between columns 3 and 4.
1	2	3	4	5
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
1. Balance	9,444 0 6	6,641 11 9	6,640 0 0	+ 1 11 9

Grand Total ..	51,031 1 7	51,056 8 4	51,690 0 0	— 633 7 8

Excluding balance the advance of Rs. 2,827-11-6 over the previous year in the income under all heads was due to improvement in the collections.

A.—*Municipal Rates and Taxes.*

8. *Tax on Arts.*—The original demand was Rs. 5,040–8–0. Of this amount, Rs. 402–8–0, or 7·9 per cent. of the original demand, was remitted by the council on appeal and the demand finally settled was Rs. 4,638 against Rs. 4,535–8–0 in the previous year. The arrears for collection during the year were Rs. 125–8–0. The total amount that had to be collected was Rs. 4,763–8–0. of which Rs. 4,488–8–0 was realised against the revised estimate of Rs. 4,650 and the actuals of Rs. 4,398 of the previous year. Rs. 214–8–0 was written off by the council as irrecoverable owing to people having either left the station or died, or being too poor to pay. The balance left at the close of the year was Rs. 60–8–0, of which Rs. 12 has since been collected. There was a slight increase of five in the number of persons assessed and the registers of this tax are invariably revised half-yearly.

9. One thousand three hundred and forty-three warrants were issued for the collection of this tax during the year against 1,528 in the previous year. Rs. 2,267 was collected after the issue of the warrants, but before distraint. Distraint was made in seven cases and the property redeemed before sale.

10. *Tax on Buildings.*—The original demand was Rs. 9,334–7–0 against Rupees 9,241–15–0 in the previous year. The increase was due to taxation of a number of newly-built houses and to the improvements and additions made to some old houses. The arrears of the previous years amounted to Rs. 145–5–0. Thus the total amount that had to be collected during the year under report was Rs. 9,479–12–0. Of this amount, Rs. 9,364–6–6 was realised against the revised estimate of Rs. 9,450 and the actuals of Rs. 9,256–1–6 of the previous year. Rs. 26–4–0 was written off as irrecoverable on account of the dilapidated condition of certain houses, leaving thus a

balance of Rs. 89–1–6 at the close of the year, of which Rs. 8–15–0 has since been collected. The balance is mainly due on the jail buildings under the occupation of various Government offices which have not settled among themselves as to the proportionate amount of tax payable by each.

11. One thousand six hundred and ten warrants were issued for this tax against 1,292 of the previous year. Rs. 3,186–9–0 was collected after the issue of warrants, but before distraint. Distraint was made in eight cases. The house-tax registers underwent revision in 1892–93.

12. *Tax on Lands.*—The demand as originally assessed was Rs. 1,973–13–0 against Rs. 2,064–12–0 in the previous year. The decrease was due to the exemption from taxation of certain vacant sites whereon houses were raised. There were Rs. 343–11–0 as arrears of the previous year, thus making a total of Rs. 2,317–8–0 to be collected during the year. Of this amount, Rs. 2,077–4–0 was collected, against the revised estimate of Rs. 2,220 and actuals of Rs. 1,994–15–0 of the previous year. Rupees 101–10–0 was written off as irrecoverable as the whereabouts of some of the defaulters could not be traced, and Rs. 4–12–0 was remitted under section 63, clause (3) of the Municipal Act. The uncollected balance at the close of the year was Rs. 133–14–0. Of this Rs. 89–12–6 belonged to the year under review and Rs. 44–1–6 to the previous years. Prosecutions were instituted in the case of all the defaulters and Rupees 59–10–6 has been collected since 1st April.

13. The total extent of land assessed in the year under review was 1,117·71 acres against 1,157·72 acres in the previous year. One thousand two hundred and eight warrants were issued for the collection of this tax against 644 in the previous year. Rs. 1,272–6–0 was collected after the issue of warrants.

14. *Tax on Vehicles and Animals.*—Steps were taken to prevent evasions of the tax under this head as directed in paragraph 3 of G.O., No. 1613 M., dated 7th October 1895, and the result was the realisation of Rs. 1,526–8–0, against the revised estimate of Rs. 1,500 and the actuals of Rs. 1,479–4–0 in the previous year.

15. *Tax on Carts.*—Against the revised estimate of Rs. 2,000 and the actuals of Rs. 2,084 in the previous year, Rs. 2,182 was realised. The increase was due to a larger number of carts licensed during the year owing to the enforcement of vigilance on the part of the municipal out-door staff.

16. *Tolls.*—The amount of the bid for the year was Rs. 19,510 against Rupees 19,250 in the previous year. The increase was due to keen competition among the bidders. The whole amount was collected during the year, and one-third, or Rupees 6,503–5–4, was made over to the district board as their share. There were nine toll-gates, same as in the previous year, and fees were levied at full rates.

17. *Realisations under Special Acts.*—Rs. 30 was realised against Rs. 20 of the revised estimate. The increase was due to a license granted to an athletic arena newly opened during the year.

B.—*Revenue derived from Municipal property and powers apart from taxation.*

18. *Rent of Lands.*—Rs. 198–11–7 was realised, against the revised estimate of Rs. 200 and the actuals of Rs. 108–1–1 in the previous year. This amount was made up of Rs. 112–2–3, being the receipts on endowment land of Whish's choultry collected from the ryots who cultivated the land according to a fresh lease executed during the year, and Rs. 86–9–4 being the rent received for temporary occupation of municipal ground. The increase under this head, over actuals of the previous year, was due to the leasing out of a site in the main bazaar at Rs. 7 per mensem during the year and to the slight rise in the receipts on the endowment land of Whish's choultry.

19. *Avenue Receipts.*—Rs. 114–3–3 was the amount realised under this head against Rs. 100, revised estimate, and Rs. 61–2–3, actuals in the previous year. The increase was mainly owing to the leasing out of the mango crop for Rs. 46 against Rs. 13 in the previous year.

20. *Fees from Travellers' Bungalow.*—Rs. 129–12–0 was collected against Rs. 150, revised estimate, and Rs. 86–4–0, actuals in the previous year. The increase over last year's actuals was due to the more frequent use of the bungalow than in the previous year.

21. *Sale-proceeds of Lands and Buildings.*—The amount realised under this head was Rs. 1,263–3–4, against the revised estimate of Rs. 1,500 and the actuals of Rs. 89–13–6 in the previous year. The decrease against the revised estimate was due to the postponement of the sale of the old slaughter-house for want of sanction of the Government within the year, and the increase over the actuals of the preceding year was owing to the purchase of many plots of ground in Arundelpet for building purposes.

22. *Produce of Lands, Gardens, &c.*—Rs. 150–12–0 was realised against the revised estimate of Rs. 150 and the actuals of Rs. 164–10–0 in the previous year. This is a fluctuating item and the slight decrease against last year's actuals was due to less competition among the bidders for the purchase of grazing right in municipal lands.

23. *Sale-proceeds of old Materials, &c.*—Rs. 272–9–0 was the amount realised under this head, against Rs. 200 of the revised estimate and Rs. 221–13–6, actuals in the previous year. This was attributed to the sale of a large quantity of old materials such as oil-cans, deal-wood boxes, &c., at higher rates than anticipated.

24. *Sale-proceeds of Night-soil, Street-refuse, &c.*—The revised budget amount was fully realised and it exceeded the actuals in the previous year by Rs. 18 owing to the rubbish being more appreciated by the ryots for manure purposes.

25. *Fees from Educational Institutions.*—Rs. 39–4–0 was collected, against Rs 40 of the revised estimate and Rs. 29–1–6, actuals in the previous year. The increase was due to the improved attendance at the Muhammadan day school.

26. *Sale-proceeds and Composition Fees of Medicines.*—Against the revised estimate of Rs. 100 and the actuals of Rs. 52–6–9 in the previous year, Rs. 149–5–0 was collected during the year, the increase being mainly due to the energetic exertion of the Civil Surgeon in the prompt collection of all dues from subscriptions and sale of medicines.

27. *Other Hospital Receipts.*—Nothing was realised under this head, though Rs. 10 was budgeted in the revised estimate owing to the non-sale of the old materials in the hospital.

28. *Income from Markets.*—Rupees 1,683–10–5 was collected, against the revised estimate of Rs. 1,690 and the actuals of Rs. 1,418–11–2 in the previous year. The increase over last year's actuals was due to keen competition among the bidders at the auction sale of the vegetable market and to the fees on the mutton market having been levied only from the second quarter of 1894–95.

29. *Distraint Fees.*—Against the revised estimate of Rs. 20 and the actuals of Rs. 17–4–0 in the previous year, Rs. 13–4–0 was realised, there was a decrease of Rs. 6–12–0 against the revised estimate, as all the warrants were not executed, the taxes having been collected before the warrants were put in force. This is a fluctuating item.

30. *License Fees.*—Rs. 1,217 was collected against the revised estimate of Rs. 1,000. The increase was owing to a larger number of licenses issued during the year.

31. *Cart-stand Fees.*—The right of collecting fees at the cart-stand was sold for Rs. 610 against Rs. 510 in the previous year. The increase was due to competition among bidders. The whole amount was collected during the year.

32. *Fines under Municipal and other Acts.*—Rupees 742–3–0 was credited to the municipality, against Rs. 600 of the revised estimate and Rs. 600–4–0, actuals in the previous year. The increase was due to the interest evinced by the Bench-Magistracy in the disposal of municipal cases, and was also indicative of the increased activity on the part of the police and the municipal executive in checking nuisances.

33. *Interest on Investments.*—Rupees 127–6–9 is shown under this head as it was the interest for two years (1893–94 and 1894–95) added to the capital of the hospital endowment fund invested in the Postal Savings Bank.

34. *Grants and Contributions—From Government Buildings.*—Nothing was realised under this head against the revised estimate of Rs. 150, as the contribution towards

the cost of the gymnastic shed is still due from Government, the matter being still under correspondence between the Director of Public Instruction and the municipality.

35. *Other purposes.*—Against the revised estimate of Rs. 180, Rs. 77–15–3, being a moiety of grant on the salary of the gymnastic instructor and one-third grant on that of the drawing master, could be collected under this head. Of this Rs. 22–8–0 was realized within the year, but they were not passed for payment in time to be included in the accounts of the year. The decrease against the revised estimate was due to the resignation of the qualified drawing master and to the person appointed in his stead not being eligible for grants.

36. *From Local Boards.*—Rs. 2,647–8–11 was received from the local fund board being a moiety of the hospital expenditure. The contribution is, as a rule, calculated on the actual expenditure for the year and the demand consequently varies from year to year.

37. *Private Scavenging fees.*—The demand under this head was Rs. 1,500–0–2 and the arrears were Rs. 92–11–0, thus making a total of Rs. 1,592–11–2 for collection during the year. Of this amount Rs. 1,446–4–3 was collected against the revised estimate of Rs. 1,800 and the actuals of Rs. 1,302–12–0 of the previous year. The increase over the actuals of the previous year was due to the large increase in the number of private latrines brought under municipal agency in the last quarter of the year under report and the decrease against the revised estimate was due partly to the late commencement of the working of the newly-admitted privies and partly to the registration of most of the houses under the last class, *i.e.*, As. 2 per mensem. Out of Rs. 146–6–11 left uncollected at the close of the year, Rs. 111–11–0 has since been collected.

38. *Refunds of expenditure of previous years.*—Rs. 86–7–11 was recovered under this head as detailed below :—

	Rs.	A.	P.
Recovery of excess payment made as compensation for acquiring A. Subbarayudu's land to extend a road	64	9	11
Sale-proceeds of admission registers purchased in previous years..	21	14	0
Total ..	86	7	11

39. From the statements herewith submitted, it will be seen that the current collections and the arrear realizations under the various heads were very prompt, and the balance uncollected at the close of the year was much less than in the previous years. The greater portion of the outstandings was adjusted during the year and, after careful scrutiny, all such arrears as could not be realized were written off the accounts as irrecoverable and the recoverable balance was taken over into the current year's accounts for collection. Adjustments will be made during the current year in the case of all outstandings as the matter is receiving the very careful attention of the municipal executive. Owing to the frequent changes in the Chairmanship in the course of the year under review and owing, consequently, to the laxity on the part of the out-door staff, the collection was very slack and defective, and only about one-sixth of the total demand taxation was realised up to the 16th October—the date on which I assumed charge of the office. But by strenuous efforts the collection work was improved so as to secure a realization, within the year, of 98·6 per cent. of the estimated receipts for the year under report and 106·8 per cent. of the actual receipts in the previous year.

III.—Expenditure.

40. The expenditure under various heads, as compared with the figures of the previous year and the revised estimate of the year under report, are shown in the following statement :—

21. *Sale-proceeds of Lands and Buildings.*—The amount realised under this head was Rs. 1,263–3–4, against the revised estimate of Rs. 1,500 and the actuals of Rs. 89–13–6 in the previous year. The decrease against the revised estimate was due to the postponement of the sale of the old slaughter-house for want of sanction of the Government within the year, and the increase over the actuals of the preceding year was owing to the purchase of many plots of ground in Arundelpet for building purposes.

22. *Produce of Lands, Gardens, &c.*—Rs. 150–12–0 was realised against the revised estimate of Rs. 150 and the actuals of Rs. 164–10–0 in the previous year. This is a fluctuating item and the slight decrease against last year's actuals was due to less competition among the bidders for the purchase of grazing right in municipal lands.

23. *Sale-proceeds of old Materials, &c.*—Rs. 272–9–0 was the amount realised under this head, against Rs. 200 of the revised estimate and Rs. 221–13–6, actuals in the previous year. This was attributed to the sale of a large quantity of old materials such as oil-cans, deal-wood boxes, &c., at higher rates than anticipated.

24. *Sale-proceeds of Night-soil, Street-refuse, &c.*—The revised budget amount was fully realised and it exceeded the actuals in the previous year by Rs. 18 owing to the rubbish being more appreciated by the ryots for manure purposes.

25. *Fees from Educational Institutions.*—Rs. 39–4–0 was collected, against Rs 40 of the revised estimate and Rs. 29–1–6, actuals in the previous year. The increase was due to the improved attendance at the Muhammadan day school.

26. *Sale-proceeds and Composition Fees of Medicines.*—Against the revised estimate of Rs. 100 and the actuals of Rs. 52–6–9 in the previous year, Rs. 149–5–0 was collected during the year, the increase being mainly due to the energetic exertion of the Civil Surgeon in the prompt collection of all dues from subscriptions and sale of medicines.

27. *Other Hospital Receipts.*—Nothing was realised under this head, though Rs. 10 was budgeted in the revised estimate owing to the non-sale of the old materials in the hospital.

28. *Income from Markets.*—Rupees 1,683–10–5 was collected, against the revised estimate of Rs. 1,690 and the actuals of Rs. 1,418–11–2 in the previous year. The increase over last year's actuals was due to keen competition among the bidders at the auction sale of the vegetable market and to the fees on the mutton market having been levied only from the second quarter of 1894–95.

29. *Distraint Fees.*—Against the revised estimate of Rs. 20 and the actuals of Rs. 17–4–0 in the previous year, Rs. 13–4–0 was realised, there was a decrease of Rs. 6–12–0 against the revised estimate, as all the warrants were not executed, the taxes having been collected before the warrants were put in force. This is a fluctuating item.

30. *License Fees.*—Rs. 1,217 was collected against the revised estimate of Rs. 1,000. The increase was owing to a larger number of licenses issued during the year.

31. *Cart-stand Fees.*—The right of collecting fees at the cart-stand was sold for Rs. 610 against Rs. 510 in the previous year. The increase was due to competition among bidders. The whole amount was collected during the year.

32. *Fines under Municipal and other Acts.*—Rupees 742–3–0 was credited to the municipality, against Rs. 600 of the revised estimate and Rs. 600–4–0, actuals in the previous year. The increase was due to the interest evinced by the Bench-Magistracy in the disposal of municipal cases, and was also indicative of the increased activity on the part of the police and the municipal executive in checking nuisances.

33. *Interest on Investments.*—Rupees 127–6–9 is shown under this head as it was the interest for two years (1893–94 and 1894–95) added to the capital of the hospital endowment fund invested in the Postal Savings Bank.

34. *Grants and Contributions—From Government Buildings.*—Nothing was realised under this head against the revised estimate of Rs. 150, as the contribution towards

the cost of the gymnastic shed is still due from Government, the matter being still under correspondence between the Director of Public Instruction and the municipality.

35. *Other purposes.*—Against the revised estimate of Rs. 180, Rs. 77–15–3, being a moiety of grant on the salary of the gymnastic instructor and one-third grant on that of the drawing master, could be collected under this head. Of this Rs. 22–8–0 was realized within the year, but they were not passed for payment in time to be included in the accounts of the year. The decrease against the revised estimate was due to the resignation of the qualified drawing master and to the person appointed in his stead not being eligible for grants.

36. *From Local Boards.*—Rs. 2,647–8–11 was received from the local fund board being a moiety of the hospital expenditure. The contribution is, as a rule, calculated on the actual expenditure for the year and the demand consequently varies from year to year.

37. *Private Scavenging fees.*—The demand under this head was Rs. 1,500–0–2 and the arrears were Rs. 92–11–0, thus making a total of Rs. 1,592–11–2 for collection during the year. Of this amount Rs. 1,446–4–3 was collected against the revised estimate of Rs. 1,800 and the actuals of Rs. 1,302–12–0 of the previous year. The increase over the actuals of the previous year was due to the large increase in the number of private latrines brought under municipal agency in the last quarter of the year under report and the decrease against the revised estimate was due partly to the late commencement of the working of the newly-admitted privies and partly to the registration of most of the houses under the last class, *i.e.*, As. 2 per mensem. Out of Rs. 146–6–11 left uncollected at the close of the year, Rs. 111–11–0 has since been collected.

38. *Refunds of expenditure of previous years.*—Rs. 86–7–11 was recovered under this head as detailed below :—

	Rs.	A.	P.
Recovery of excess payment made as compensation for acquiring A. Subbarayudu's land to extend a road	64	9	11
Sale-proceeds of admission registers purchased in previous years..	21	14	0
Total ..	86	7	11

39. From the statements herewith submitted, it will be seen that the current collections and the arrear realizations under the various heads were very prompt, and the balance uncollected at the close of the year was much less than in the previous years. The greater portion of the outstandings was adjusted during the year and, after careful scrutiny, all such arrears as could not be realized were written off the accounts as irrecoverable and the recoverable balance was taken over into the current year's accounts for collection. Adjustments will be made during the current year in the case of all outstandings as the matter is receiving the very careful attention of the municipal executive. Owing to the frequent changes in the Chairmanship in the course of the year under review and owing, consequently, to the laxity on the part of the out-door staff, the collection was very slack and defective, and only about one-sixth of the total demand taxation was realised up to the 16th October—the date on which I assumed charge of the office. But by strenuous efforts the collection work was improved so as to secure a realization, within the year, of 98·6 per cent. of the estimated receipts for the year under report and 106·8 per cent. of the actual receipts in the previous year.

III.—Expenditure.

40. The expenditure under various heads, as compared with the figures of the previous year and the revised estimate of the year under report, are shown in the following statement :—

—	Actuals, 1894–95.	Actuals, 1895–96.	Revised estimate, 1895–96.	Variations between cols. 3 and 4.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Grant I, Public Works	16,415 9 0	11,346 8 8	16,420 0 0	— 5,073 7 4
,, II, Education	4,649 14 9	5,455 4 8	5,530 0 0	— 74 11 4
,, III, Sanitation and Medical services	15,748 14 10	17,184 4 10	17,750 0 0	— 565 11 2
,, IV, Lighting and Miscellaneous other purposes ..	3,205 13 5	3,708 5 8	3,830 0 0	— 121 10 4
,, V	2,944 5 1	3,023 10 4	3,080 0 0	— 56 5 8
Repayment of debt, &c.	1,424 12 9	1,528 7 0	1,510 0 0	+ 18 7 0
Total ..	44,389 5 10	42,246 9 2	48,120 0 0	— 5,873 6 10

41. *Grant I, Communications.*—Out of the revised estimate of Rs. 5,900 under this head, Rs. 5,634–14–1 was spent against Rs. 4,865–12–7 in the previous year. Details are furnished in statement II A, parts 1 and 2. The decrease of Rupees 265–1–11 was owing to the non-payment of the whole amount budgeted towards the construction of a road to the women's hospital, as it was deemed advisable to allow the earth-work to consolidate before metalling was done. The total expenditure on roads amounted to nearly 50 per cent. of the net proceeds from toll-fees agreeably to the orders of the Government contained in paragraph 4 of G.O., No. 1613 M., dated 7th October 1895. The length of the new roads constructed during the year was 1 mile and that maintained was 39 miles against 34 miles in the previous years owing to the transfer of 5 miles of road by the district board in consequence of the extension of town limits. The roads are kept in a fairly good condition.

42. *New Works—Buildings.*—The total outlay under this head amounted to Rs. 2,184–13–10 against the revised estimate of Rs. 6,100. The difference was due (1) to the non-utilization of Rs. 3,500 provided for the construction of a fish and beef market and (2) to the short expenditure out of allotment for urinals.

(1) With a view to commence work during the year, plans and estimates of the proposed market were forwarded to the Sanitary Board for approval, but they were returned for re-submission with a site plan. A sub-committee appointed thereupon to select a site suggested the advisability of constructing the new market by the side of the existing vegetable market. Some councillors taking objection to this suggestion, the matter was referred to the Sanitary Commissioner for opinion. After further correspondence on the matter, the council resolved finally to convert the existing vegetable market into a fish and beef market, and to construct a new vegetable market on a larger scale in some suitable locality as the present one is found quite inadequate to meet the requirements of sellers and buyers. The sellers are dissatisfied, because in proportion to the high rents demanded from them, they are not given godowns with sufficient accommodating space for their articles and from the paucity of godowns in the market, some of them are compelled to seek rooms elsewhere apart from their brothers in trade. There is a good deal of dissatisfaction among buyers as the cramped condition of the market during the business hours and the narrowness of the moving space within the market premises are daily giving rise to much confusion and promiscuous mixture of all classes. They all appreciate the utility of the market, but condemn the unsatisfactory method adopted in the arrangement of the buildings, which are neither in accordance with native taste nor regardful of caste prejudices, which are in many respects easy to understand. The council have, for these reasons, felt the necessity for a more commodious and spacious vegetable market, and, in view of the improvements contemplated, the work was not taken in hand during the year.

(2) Out of a provision of Rs. 500 for urinals, only Rs. 97–12–10 was spent in constructing a urinal in a crowded part of the town with a view to utilise the unspent portion in providing for platforms in compliance with the suggestion of the Sanitary Commissioner in paragraph 2 of his letter embodied in G.O., No. 370 M., dated 7th March 1895; but as this was closely connected with the improvement recommended subsequently in paragraph 5 (*a*) of his inspection notes recorded on the 6th and 7th August 1895, it was postponed for consideration along with the other proposal, for which plans and estimates are under preparation.

43. Rupees 120–1–9 was spent in erecting a tiled shed on the bund of the Black tank to afford shelter to the watchmen, who have to look after the tank both days and nights as it is the chief source of water-supply to the town. The work must be considered important from the purpose it is serving.

44. Rupees 341–13–9 was spent towards the construction of a shed in the gymnastic ground to give shelter to the large number of boys frequenting the place daily and to protect apparatus, &c., from the effects of heat and rain.

45. Rupees 1,058–6–1 was spent towards the erection of a corrugated iron latrine of 24 seats in place of a masonry one in one of the crowded wards of the town.

46. An expenditure of Rs. 262–13–11 was incurred for raising a compound wall to Whish's choultry—the only charitable institution of the kind under municipal management—as it was found absolutely necessary to protect the choultry from its being used by the neighbours to the great inconvenience of the travellers, for whom it is specially intended.

47. Rupees 187–9–0 was spent in purchasing 24 iron cylindrical dust-bins to provide for the wants of the town.

48. *Repairs—Buildings.*—Rs. 882–9–11 as detailed in statement II-A, Part II, was spent towards repairs to buildings during the year, greater portion of this amount being expended upon repairs to the existing latrines and the municipal office.

49. *Water-supply—New Works.*—Rs. 729–8–7 was spent out of an allotment of Rs. 1,300. Rs. 500 provided for the investigation of the water-supply of the town remained unspent, as the Sanitary Engineer, at whose instance the amount was budgeted, postponed his investigation during the year. Rs. 70–7–5 represented savings; hence the difference of Rs. 570–7–5.

50. Rupees 671–11–7 was spent towards the construction of a sluice to the Black tank to draw off all stagnant water just before the monsoons set in, and Rs. 57–13–0 was spent towards the construction of a masonry wall across the head sluice to the Black tank to prevent the filthy washings of the town from getting into the tank during rains.

51. *Repairs—Water-supply.*—Rs. 505–8–9 was spent for repairing the Red tank reservoir and most of the public wells in the town. The difference was not required as there was no water scarcity during the year.

52. The water-supply of the town continues fairly satisfactory. The town's most urgent needs are schemes for water-supply and drainage, as pointed out by the Sanitary Commissioner. A survey of the town was made some years ago on a large scale with a view to a drainage scheme; this was, however, deferred in preference to the water-supply scheme. But neither for the one nor for the other is a scheme formulated by the Sanitary Board, and the council hope that the matter will soon receive sympathetic consideration at the hands of the Government. At the suggestion of the Sanitary Commissioner in his inspection notes recorded in G.O., No. 56 M., dated 11th January 1896, plans and estimates are under preparation for lifting the water of the big reservoir by steam-engine to an elevated tank for distribution so as to prevent people from entering it for drawing water.

53. *Establishment.*—The establishment charges amounted to Rs. 641–2–6. The difference was due to the delay in the appointment of a competent substitute in place of the works overseer, who was granted sick leave on medical certificate.

54. *Tools and Plant.*—An expenditure of only Rs. 8–1–0 appears against this head as the purchase of fresh plant was postponed to the current year from the adequacy of the existing stock to meet the requirements of the year under report.

55. *Grant II, Stipends to Normal Students.*—Rs. 6–5–0 was paid as travelling allowance to the second master in the Muhammadan day school sent up for training to Madras.

56. *Salary-result System.*—Result grants Rs. 156–15–0 was utilised against the revised estimate of Rs. 170.

The difference was due to the payment of grants to the Hindu night schools at half the maximum rates.

57. *Contingencies.*—The slight increase under this head occurred owing to the purchase of time-pieces for use in the night schools.

58. *Salary Grants.*—The increase of Rs. 24–10–5 was due to the payment of increased salary grants to some teachers in the lower secondary schools from their eligibility for the extra grant.

59. *Inspection—Contribution to Local Boards.*—Nothing is shown under this head as the district board made no claim to the contribution towards the Muhammadan inspecting schoolmaster's pay.

60. *Contingencies.*—The only outlay under this head was Rs. 31–5–0 for the purchase of one almirah supplied to the office of the inspecting schoolmaster as the council deemed that more furniture was not required.

61. *Building, Furniture, &c., Grants.*—Against Rs. 550 of the revised estimate and Rs. 387–10–8, actuals in the previous year, Rs. 542–6–8 was spent as detailed below :—

	Rs.	A.	P.
Rent grant paid for certain result school buildings	27	14	8
Building grant for the construction of a separate building for the use of the lower secondary department of the Sanskrit High school	390	0	0
Furniture grant to the lower secondary department of the same institution	124	8	0
Total ..	542	6	8

62. *Common Drawing Master—Contingencies.*—The decrease of Rs. 6–15–9 under this head was owing to a round figure entered in the revised estimate.

63. The total net expenditure on education amounted to Rs. 5,393–8–8 or 15·69 per cent. of the total receipts from taxation and rents. Of this sum Rs. 4,076–2–3 or 79·69 per cent. was devoted to primary education and the remainder to secondary education. The number of schools maintained by the municipality was 5, same as in the previous year. There was a slight increase in the attendance in all the schools, the number having risen from 114 in the previous year to 118 in the year under review. The cost of educating each pupil in the night schools was Rs. 8–12–9, while in the Muhammadan schools it was Rs. 10–0–10. This is rather high and far above the general average, but considering the backward condition of the Muhammadans and the labouring classes, for whom these schools are specially maintained, the cost cannot be grudged for some years to come. Two lower secondary schools were aided with salary, and twenty-four result schools with result grants. Though the number of schools remained the same as in the previous year, the strength of all of them taken together showed a fair improvement. The total number of pupils under instruction in schools maintained and aided from municipal funds was 1,887 against 1,870 in the previous year, while the male population of the school-going age was 1,763, same as last year.

64. The primary and secondary education continues to be very satisfactory as tested by success in the examinations. Out of thirty-three that appeared for the Lower Secondary examination, thirty passed and sixteen obtained complete certificates. One hundred and thirty-five pupils presented themselves for the Primary examination from all the schools in the town and 104 passed altogether. The salary grant schools and those on the system of results acquitted themselves creditably at the grant examinations. The allotment for result grants was utilized in full and the grants were paid under the assignment system. The lapsed grants were distributed towards the close of the year among over-earned schools in accordance with the Circular, No. 1457, dated 15th February 1896, of the Director of Public Instruction. The Panchama community, for whom four schools were maintained by the American Evangelical Lutheran Mission, received substantial aid from the municipal funds.

65. *Grant III, Hospitals and Dispensaries—Establishment.*—The savings under this head were due to a Third-class Hospital Assistant of the reserve staff having been paid from Provincial funds when he acted for more than a month in place of First-class Hospital Assistant B. Chelamaiya Nayudu transferred.

66. *Medicines and Supplies.*—Rs. 1,731–11–5 was spent against the revised estimate of Rs. 1,600 and the actuals of Rs. 1,202–10–8 in the previous year. The increase was due to the purchase of medicines in London at a high rate of exchange and to the advance in the number of the patients treated in the hospital, testifying to the growing popularity of the institution.

67. *Diet of Patients.*—The decrease of Rs. 109–12–2 under this head was due to the diet bill for the month of February not having been received within the close of the year for adjustment.

68. *Sundries and Contingencies.*—Rs. 774–5–11 was spent against Rs. 950 of the revised estimate and Rs. 783–14–3, actuals in the previous year. The decrease was due to the economic management of the funds under the immediate supervision of Assistant Surgeon A. P. Fernandez, Acting Civil Surgeon, and to the non-receipt of the contingent bill for February during the year.

69. *Contribution to Provincial Funds.*—Rs. 395 was paid against Rs. 320 of the revised estimate and Rs. 397, actuals in the previous year, according to bills received from the Accountant-General, for medical college, sanitary inspection, medical reserve staff and cutlers' establishment.

70. *Contribution to Local Boards.*—Rs. 60 provided for in the budget as contribution to the district board for the clerk attached to the District Surgeon's office was not paid within the year as no claim was made for the same.

71. The municipal hospital is working very satisfactorily. The total number of patients rose from 14,746 to 15,338 during the year. The increase in the number of major operations was also creditable to the Civil Surgeon, it having risen from 169 to 179. The present hospital buildings being considered very defective with regard to light and ventilation from their situation in the most crowded and airless part of the town and from the accommodation therein being quite inadequate to meet the growing needs of the institution, it was resolved to construct a new hospital on the standard plan in a more airy and convenient locality outside the limits of the town proper. Rs. 3,000 was budgeted in the current year to commence work as soon as plans and estimates would receive the approval of the Sanitary Board. The district board has promised a liberal contribution of two-thirds of the entire cost of the buildings, provided that it does not exceed Rs. 40,000. The first-class Hospital Assistant attached to the hospital was given free quarters, and the third-class Hospital Assistant was paid a house-rent of Rs. 5 per mensem. All the suggestions of the Civil Surgeon to improve the existing buildings and to supply any immediate wants received the very careful attention of the council.

72. *Medical Training of Women.*—The midwife attached to the hospital attended 56 labour cases against 72 in the previous year. The fall was due to the indifference of the people to avail themselves of the services of a non-caste midwife, though trained, and all attempts made to secure the services of a caste woman proved vain. The work of the midwife was far from satisfactory.

73. No special action was taken by the council to further female medical education, though the matter was discussed in more than one meeting during the year. The council think that there exists no necessity at present for any action on the part of the municipality seeing that the town is provided by the American Mission with a well-organised women and children's hospital under the charge of Miss A. S. Kugler, M.D., for affording medical relief to women.

74. *Vaccine Contingencies.*—The marked decrease under this head was due to a smaller number of calves having been used for vaccination in consequence of the more careful preservation of lymph. Statement XIII herewith submitted furnishes full particulars of vaccination performed in the town.

75. The number of vaccine operations performed during the year by the municipal vaccinator was 1,185 against 1,178 in the previous year. Of these, 1,123 were successful, 37 unsuccessful, and 25 unknown against 1,155, 14 and 9, respectively, in the previous year. The decrease in the number of successful cases was due to a large failure of cases performed in the months of April and May and to the method

57. *Contingencies.*—The slight increase under this head occurred owing to the purchase of time-pieces for use in the night schools.

58. *Salary Grants.*—The increase of Rs. 24–10–5 was due to the payment of increased salary grants to some teachers in the lower secondary schools from their eligibility for the extra grant.

59. *Inspection—Contribution to Local Boards.*—Nothing is shown under this head as the district board made no claim to the contribution towards the Muhammadan inspecting schoolmaster's pay.

60. *Contingencies.*—The only outlay under this head was Rs. 31–5–0 for the purchase of one almirah supplied to the office of the inspecting schoolmaster as the council deemed that more furniture was not required.

61. *Building, Furniture, &c., Grants.*—Against Rs. 550 of the revised estimate and Rs. 387–10–8, actuals in the previous year, Rs. 542–6–8 was spent as detailed below :—

	Rs.	A.	P.
Rent grant paid for certain result school buildings	27	14	8
Building grant for the construction of a separate building for the use of the lower secondary department of the Sanskrit High school	390	0	0
Furniture grant to the lower secondary department of the same institution	124	8	0
Total ..	542	6	8

62. *Common Drawing Master—Contingencies.*—The decrease of Rs. 6–15–9 under this head was owing to a round figure entered in the revised estimate.

63. The total net expenditure on education amounted to Rs. 5,393–8–8 or 15·69 per cent. of the total receipts from taxation and rents. Of this sum Rs. 4,076–2–3 or 79·69 per cent. was devoted to primary education and the remainder to secondary education. The number of schools maintained by the municipality was 5, same as in the previous year. There was a slight increase in the attendance in all the schools, the number having risen from 114 in the previous year to 118 in the year under review. The cost of educating each pupil in the night schools was Rs. 8–12–9, while in the Muhammadan schools it was Rs. 10–0–10. This is rather high and far above the general average, but considering the backward condition of the Muhammadans and the labouring classes, for whom these schools are specially maintained, the cost cannot be grudged for some years to come. Two lower secondary schools were aided with salary, and twenty-four result schools with result grants. Though the number of schools remained the same as in the previous year, the strength of all of them taken together showed a fair improvement. The total number of pupils under instruction in schools maintained and aided from municipal funds was 1,887 against 1,870 in the previous year, while the male population of the school-going age was 1,763, same as last year.

64. The primary and secondary education continues to be very satisfactory as tested by success in the examinations. Out of thirty-three that appeared for the Lower Secondary examination, thirty passed and sixteen obtained complete certificates. One hundred and thirty-five pupils presented themselves for the Primary examination from all the schools in the town and 104 passed altogether. The salary grant schools and those on the system of results acquitted themselves creditably at the grant examinations. The allotment for result grants was utilized in full and the grants were paid under the assignment system. The lapsed grants were distributed towards the close of the year among over-earned schools in accordance with the Circular, No. 1457, dated 15th February 1896, of the Director of Public Instruction. The Panchama community, for whom four schools were maintained by the American Evangelical Lutheran Mission, received substantial aid from the municipal funds.

65. *Grant III, Hospitals and Dispensaries—Establishment.*—The savings under this head were due to a Third-class Hospital Assistant of the reserve staff having been paid from Provincial funds when he acted for more than a month in place of First-class Hospital Assistant B. Chelamaiya Nayudu transferred.

66. *Medicines and Supplies.*—Rs. 1,731–11–5 was spent against the revised estimate of Rs. 1,600 and the actuals of Rs. 1,202–10–8 in the previous year. The increase was due to the purchase of medicines in London at a high rate of exchange and to the advance in the number of the patients treated in the hospital, testifying to the growing popularity of the institution.

67. *Diet of Patients.*—The decrease of Rs. 109–12–2 under this head was due to the diet bill for the month of February not having been received within the close of the year for adjustment.

68. *Sundries and Contingencies.*—Rs. 774–5–11 was spent against Rs. 950 of the revised estimate and Rs. 783–14–3, actuals in the previous year. The decrease was due to the economic management of the funds under the immediate supervision of Assistant Surgeon A. P. Fernandez, Acting Civil Surgeon, and to the non-receipt of the contingent bill for February during the year.

69. *Contribution to Provincial Funds.*—Rs. 395 was paid against Rs. 320 of the revised estimate and Rs. 397, actuals in the previous year, according to bills received from the Accountant-General, for medical college, sanitary inspection, medical reserve staff and cutlers' establishment.

70. *Contribution to Local Boards.*—Rs. 60 provided for in the budget as contribution to the district board for the clerk attached to the District Surgeon's office was not paid within the year as no claim was made for the same.

71. The municipal hospital is working very satisfactorily. The total number of patients rose from 14,746 to 15,338 during the year. The increase in the number of major operations was also creditable to the Civil Surgeon, it having risen from 169 to 179. The present hospital buildings being considered very defective with regard to light and ventilation from their situation in the most crowded and airless part of the town and from the accommodation therein being quite inadequate to meet the growing needs of the institution, it was resolved to construct a new hospital on the standard plan in a more airy and convenient locality outside the limits of the town proper. Rs. 3,000 was budgeted in the current year to commence work as soon as plans and estimates would receive the approval of the Sanitary Board. The district board has promised a liberal contribution of two-thirds of the entire cost of the buildings, provided that it does not exceed Rs. 40,000. The first-class Hospital Assistant attached to the hospital was given free quarters, and the third-class Hospital Assistant was paid a house-rent of Rs. 5 per mensem. All the suggestions of the Civil Surgeon to improve the existing buildings and to supply any immediate wants received the very careful attention of the council.

72. *Medical Training of Women.*—The midwife attached to the hospital attended 56 labour cases against 72 in the previous year. The fall was due to the indifference of the people to avail themselves of the services of a non-caste midwife, though trained, and all attempts made to secure the services of a caste woman proved vain. The work of the midwife was far from satisfactory.

73. No special action was taken by the council to further female medical education, though the matter was discussed in more than one meeting during the year. The council think that there exists no necessity at present for any action on the part of the municipality seeing that the town is provided by the American Mission with a well-organised women and children's hospital under the charge of Miss A. S. Kugler, M.D., for affording medical relief to women.

74. *Vaccine Contingencies.*—The marked decrease under this head was due to a smaller number of calves having been used for vaccination in consequence of the more careful preservation of lymph. Statement XIII herewith submitted furnishes full particulars of vaccination performed in the town.

75. The number of vaccine operations performed during the year by the municipal vaccinator was 1,185 against 1,178 in the previous year. Of these, 1,123 were successful, 57 unsuccessful, and 25 unknown against 1,155, 14 and 9, respectively, in the previous year. The decrease in the number of successful cases was due to a large failure of cases performed in the months of April and May and to the method

adopted for checking the operations as directed by the Government in its Order No. 1502 M., dated 19th October 1894. The operations performed on children under one year of age were 787 against 753 in the previous year. Two hundred and thirty-three persons were prosecuted during the year against 310 in the previous year, of whom 216 were let off by the Magistrate under section 138 of the Municipal Act, and the remaining 17 were punished with fines amounting to Rs. 19-8-0.

76. The vaccine operations were performed with animal lymph under the supervision of the Civil Surgeon who was in charge of the vaccine depôt. The average cost per case during the year was As. 4-8 as compared with As. 6-5 of last year. At the suggestion of the Sanitary Commissioner in his inspection notes recorded in G.O., No. 56 M., dated 11th January 1896, a fee of As. 2 is prescribed in all instances in which the vaccinator has to proceed to the houses of parents or guardians for operation or verification with a view to discourage house visits as much as possible. Owing to the full operation of the compulsory system ever since 1889, vaccination is in a progressive condition in the town. Every month lists of births are supplied to the vaccinator by the registrar of births and deaths and notices are duly served to the parents or guardians after six months' time allowed by the Act.

77. *Registration Contingencies.*—Rs. 32-1-0 was spent against Rs. 20 of the revised estimate, and Rs. 31-13-4, actuals in the previous year. The increase was due to the fixing of six notice boards in conspicuous parts of the town, declaring the law as to registration.

78. The following comparative statement shows the number of births and deaths with the rate per mille of population :—

—	Number of births.	Rate per mille of population.	Number of deaths.	Rate per mille of population.
1894-95	784	33·56	640	27·39
1895-96	880	37·67	629	26·92

The total births and deaths exclude 48 still-born children. The birth-rate exceeded the death-rate, this being ascribed to the general healthy condition of the town throughout the year.

79. The following are the causes of mortality :—

		1894-95.	1895-96.
Deaths from fever		193	219
Do.	cholera	..	..
Do.	small-pox	..	..
Do.	diarrhœa and dysentery	34	34
Do.	suicides	3	2
Do.	wounds	10	18
Do.	accidents	4	4
Do.	all other causes	396	352
	Total ..	640	629

80. The registrar received information as to births from midwives, who attended confinement, and in addition gathered information personally in his morning perambulations. He was informed of deaths by the watchman at the burial grounds. To ensure better and more satisfactory results, the law as to registration was made known by beat of tom-tom and by boards placed in conspicuous parts of the town. The total number of failures to report birth and death occurrences was twenty-two, of which eighteen were excused for sufficient reasons, and in the remaining four cases prosecutions were instituted. The total amount of fines collected during the year on this account was Rs. 14-8-0.

81. *Conservancy Establishment.*—Rs. 6,298-14-3 was spent against Rs. 6,320 of the revised estimate. The decrease was due to savings effected owing to fines and stoppages.

82. *Other charges.*—Rs. 2,031-6-1 was utilized as shown below against Rs. 2,210 of the revised estimate :—

	Rs.	A.	P.
Hire of buffaloes for rubbish carts	1,426	4	11
Purchase of rubbish carts	430	11	11
Repairs to carts	153	14	0
Wages for watering roads	11	13	3
Cost of dry earth	8	10	0
Total ..	2,031	6	1

The decrease was due to the stoppage of watering the roads in consequence of the early setting in of rains, to the construction of rubbish carts in the local market at moderately cheap rates and to the savings effected under other items.

83. *Private Scavenging Establishment.*—Against the revised estimate of Rupees 1,410, Rs. 1,388-9-7 was spent. The decrease was on account of fines imposed on the scavengers.

84. *Contingencies.*—The decrease of Rs. 34-13-7 under this head was due to less expenditure under repairs to carts as the air-tight iron carts purchased during the year required no repairs.

85. Private scavenging being an important branch of sanitation, received my special and steady attention, and with unremitting endeavours I was able to extend the system so as to bring under municipal agency almost all private latrines within the town. The number of privies attended to under private scavenging system at the beginning of the year was 510 out of 1,194 and 528 in October, whereas at the close of the year, the number under municipal management was 1,132. The receipts under the private scavenging system were Rs. 1,446-1-3 and the expenditure amounted to Rs. 2,333-12-0, including Rs. 477-14-0 being the charges for cleaning cess-pools and Rs. 485, being the cost of five night-soil carts. If the cost of carts which does not recur in future and the charges incurred on cess-pools be excluded from the expenditure, that on private latrines alone came up to Rs. 1,370-14-0. The receipts therefrom being Rs. 1,355-14-6, the net loss to the municipality in working them was only Rs. 14-15-6. There would not have been even this loss but for the fact that the privies were brought under municipal management late in the year, and the service was commenced towards the close of the year. Now that the system has been so much extended, no pains would be spared to make it a financial success. The ways and means for effecting improvements were stated in my letter No. 20, dated 6th April 1896, to the Government in connection with the subject. The municipality is performing the cess-pool service at a great loss to itself and it is under contemplation to enhance the rates sufficiently to pay for the cost of the carts and scavengers employed in cleaning cess-pools. I regret to say that the private scavenging fees could not be collected in advance as any coercive measures in this direction would only end in making the system unpopular.

86. *Cholera charges.*—The town being free from cholera, Rs. 48 was the only charge incurred under this head. It was rent of land for a cholera shed erected in a private field. Considering this as an unnecessary charge on municipal funds, I proposed the removal of the shed from the rented land for its construction on a piece of municipal ground far from the town. The council adopted my proposal.

87. *Contingencies.*—The difference was not required as there was no expenditure incurred under cost of preventive measures from the immunity of the town from cholera during the year under report.

88. The sanitation of the town was fairly satisfactory. The town was singularly free from epidemics of any kind during the year. There were no deaths from cholera or small-pox. Seven wooden skeleton carts lined with sheet iron and six single bullock air-tight night-soil carts were purchased during the year. One corrugated iron latrine of the standard pattern was erected in one of the crowded parts of the town. Twenty-four dust-bins were added during the year. The municipality effected as much

improvement in sanitation during the year as the funds at its disposal enabled it regarding the various recommendations made by the Sanitary Commissioner and the Civil Surgeon, and for such of them as could not be carried out during the year, provision, as far as funds permitted, was made in the current year's budget.

The town is divided into six divisions and these are under six conservancy overseers assisted by six peons who are responsible for conservancy under the supervision of the divisional councillors. The town is well looked after and is kept as clean as possible. The Chairman and the divisional councillors exert themselves by systematically inspecting the divisions to see that streets, &c., are kept clean and the conservancy overseers are up to their work.

89. *Grant IV—Lighting—Establishment.*—As per details given in Statement II-B, the total amount required under this head was Rs. 516, but Rs. 520 was put down in the revised estimate for the sake of a round figure. The difference of Rs. 4–8–0 is accounted for as follows:—Remuneration to the lighting superintendent for the month of March 1895 was paid according to the old scale thus causing a difference of Rs. 2, and fines to the extent of Rs. 2–8–0 were imposed upon lamp lighters for neglect of duty.

90. *Contingencies.*—Out of Rs. 1,400 of the revised estimate, Rs. 1,273–8–6 was spent against Rs. 974–7–9, actuals in the previous year. The increase over last year's actuals was due to the fixing of 48 additional lamp posts during the year. The decrease as compared with the revised estimate was owing to the commencement of the lighting of the additional lamps late in the year and to the lighting work being done departmentally. The total number of lamps in the town was 236 against 188 in the previous year. The lighting in the town may yet be considered deficient as there are only five lamps to each mile of road.

91. *Market Contingencies.*—The difference was not required.

92. *Slaughter-house Contingencies.*—Rs. 50 was provided for in the revised estimate to give effect to the recommendations of the Sanitary Commissioner in his last inspection notes to make a garden in the immediate vicinity of the slaughter-house. The garden was laid out, pits were dug, but at the suggestion of the Civil Surgeon who advised planting trees after the conversion of the offal, &c., in the pits into earth, plantation was postponed to the current year. Hence the decrease.

93. *Travellers' Bungalow.*—The slight difference under this head calls for no remarks.

94. *Avenue Contingencies.*—The decrease was due to some plants having been obtained gratis.

95. *Bell Striking Contingencies.*—For the sake of a round figure, Rs. 10 was adopted in the revised estimate. Rs. 1–8–0 was expended for purchasing two mallets.

96. *Fire Contingencies.*—The increase was due to a large number of fire accidents during the year under report.

97. *Rewards for destruction of wild animals.*—The decrease was owing to less number of snakes killed.

98. *Printing.*—Rs. 309–15–2 was paid as per bills received against Rs. 200 of the revised estimate and Rs. 240–15–8, actuals in the previous year. The increase was due to the large outlay incurred for printing council's proceedings in consequence of the large number of meetings held in the year under report.

99. *Compensation for Lands.*—A field to the north of Kottapet was purchased for Rs. 400 to serve as a burial and burning ground in place of the old one which owing to the growth of the town in this direction is brought nearer to the habitations of the people.

100. *Grant V—Establishment.*—Rs. 1,538–10–6 was expended against Rs. 1,550 of the revised estimate and Rs. 1,579, actuals in the previous year. The decrease against last year's actuals was due to the reduction in the scale of salaries of the office establishment in consequence of the late manager's death and that over the revised estimate was on account of savings and stoppages.

101. *Inspection.*—The slight difference was due to the non-receipt of the allowance by the Divisional-officer when he was in charge of the office for three days.

102. *Collection of Municipal taxes—Establishment.*—Rs. 387–0–3 was spent against Rs. 400 of the revised estimate. The less expenditure was due to leave granted on loss of pay and to fines.

103. *Office Contingencies.*—Rs. 303–12–10 was spent against Rs. 320 allotted and Rs. 252–6–9, actuals in the previous year. The increase over last year's actuals was owing to the purchase of eight chairs for the use of the councillors and of two almirahs for office use.

104. *Repayment of debt.*—Rs. 1,300 was paid against Rs. 1,351–4–8, actuals in the previous year. This was made up of Rs. 1,000 being the second instalment of the loan taken from the President, Cotton Merchants' Choultry, Guntúr, and of Rs. 300 being the interest on Rs. 5,000 up to 31st March 1896.

105. *Refunds of other than current collections.*—Rs. 101–0–3 was spent against Rs. 80 of the revised estimate as detailed below:—

	Rs.	A	P.
Remission on vacant buildings	26	0	3
Refund of purchase money for a plot in Arundelpet which was not made over to the purchaser	75	0	0
Total ..	101	0	3

106. *Investments.*—Rs. 127–6–9 was invested in the postal savings bank, being the interest on the funded capital of the hospital for two years as noted in paragraph 33 *supra*.

VI.—Closing Balance.

107. Rs. 8,809–15–2 remained at the close of the year against the revised estimate of Rs. 3,570. The large increase was due to the non-utilization of Rs. 3,500 budgeted for a fish and beef market and to savings under other grants. The balance consists of Rs. 6,401–13–1, municipal fund, Rs. 216–4–1, endowment and Rupees 2,624–6–2, town extension fund. The details of the endowment fund are given in Statement I-A. The minus balance under this fund was due to the construction of a compound wall to the choultry as stated in paragraph 46, and the amount thus expended from the municipal funds will be recouped from the endowment receipts of the choultry.

108. Details of town extension fund are furnished in the tabular statement below:—

Receipts.	Amount.	Expenditure.	Amount.
	Rs. A. P.		Rs. A. P.
Opening balance	1,393 0 11		
Sale of land—Statement I (4) (*b*) (i)—Sale-proceeds of land	1,263 3 4	Statement II (i) (*a*)—Grant I—New Works—Communications	81 8 1
Sale of grass—Statement I (4) (*b*) (ii)—Produce of lands	28 8 0		81 8 1
Sale of dried trees—Statement I (4) (*c*) (iii)—Avenues receipts	5 0 0	Closing balance	2,624 6 2
Sale of earth—Statement I (4) (*b*) (iii)—Sale proceeds of old materials	16 2 0		
Total ..	2,705 14 3	Total ..	2,705 14 3

109. *New Improvements.*—The following improvements have been effected during the year:—

(1) One corrugated iron latrine has been formed.
(2) One urinal has been newly introduced.
(3) A gymnastic shed has been constructed.
(4) A sluice has been constructed to the black tank to draw off stagnant water.
(5) Twenty-four dust-bins have been purchased.
(6) The old miniature basket rubbish carts have been replaced by wooden skeleton carts lined with sheet iron.

110. In conclusion, I beg to record my thanks for the hearty and willing co-operation of all the councillors in my endeavours to conduct the municipal affairs efficiently and I beg to note specially the considerable interest which M.R.Ry. G. Krishnamma Garu took in the extension of the private scavenging system.

ENCLOSURE.

CONCISE Annual Report on the working of the Municipal Hospital, Guntúr, during the year 1895–96.

The health of the station during the year under review was satisfactory. The town was free from epidemics till the end of December 1895, when chicken-pox and measles were reported to prevail. The type of these eruptive fevers was happily mild, and their duration brief. The epidemics ceased at the end of the year, and no casualties were reported from either of these causes.

The state of the weather was not as oppressive as in the previous year. The temperature, in shade, rose to a maximum of 108° F. as compared with 111° F. in the previous year. The monsoons set in at the end of June, and the rainfall was reported to be, on the whole, seasonable to agricultural operations. There were 31·91 inches of rain registered during the year as against 29·37 of the previous year. With an almost normal rainy season the outturn of crops, as might be expected, was good, and food-grains were consequently sold at rates comparatively cheaper than in the previous year.

I herewith append a tabular statement of cereals used in this station with their respective prices in measures per rupee:—

Kind of grain.	Measures per rupee.	
	1894–95.	1895–96.
Cholum	12 5	13·45
Ragi	14·4	15·29
Wheat	7·75	9·27
Cumbu	11·59	12·51
Rice, second sort	8·35	8·13

2. The number of births and deaths registered during the year is as hereinunder:—

Population, 23,359.	1894–95.		1895–96.	
	Number.	Ratio per mille.	Number.	Ratio per mille.
Births	784	33·56	880	37·67
Deaths	640	27·39	629	26·92

These figures do not include the (48) still-born. From the above statement it will be observed that there is a satisfactory increase in the registration of births but a small decline in the number of deaths. It is, however, hoped that, with the promulgation in last January of the provisions of section 247 of the Municipal Act by beat of tom-tom and by notice boards, there will be in future an improvement in the registration of vital statistics. During the year, twenty-two individuals were reported for failure to register domestic occurrences; of these, eighteen were discharged by the Chairman and four were prosecuted and punished with fines amounting to Rs. 14–8–0.

3. This town, for purposes of conservancy, is divided into six sections, each of which has a permanent staff of sweepers and scavengers working under the immediate supervision of its respective sanitary inspector. The state of roads with regard to repairs and general cleanliness was satisfactory. All the main roads are metalled, but most of the minor lines of communication are in their primitive condition. The town is swept once a day; the street-sweepings are carted to the rubbish depôt and sold with poudrette for agricultural purposes. The sale-proceeds under this head during the year amounted to Rs. 350 as against Rs. 332 of the previous year. The number of dust-bins is sixty-nine, as compared with forty-five of the previous year. These are insufficient for the requirements of the town. During the year all masonry fixtures were replaced by cylindrical, moveable, corrugated-zinc dust-bins; and seven substantial zinc-lined conservancy carts were substituted for the same number of obsolete flimsy bamboo structures. The number of cesspools is the same as in the previous year, viz., thirteen; all these are cleaned out regularly and their contents are removed to the rubbish depôt in air-tight iron carts. Drainage is by natural gravitation. There are a few rudimentary drains in some parts of the town, but all these are ill-constructed and inefficient.

The progress of the private scavenging system has been very satisfactory. At the end of the year there were 1,132 houses under municipal agency as compared with 510 houses in the previous year, showing thus an increase of 622 houses. This is one of the most satisfactory features in the administration of this municipality during the year under review, and it is due to M.R.Ry. P. Venkatakrishnayya Naidu Garu, Chairman of the Municipal Council.

Water-supply is obtained from several public and private wells scattered over the town; but the main sources of drinking-water are three reservoirs, of which the "Jagganatham Pantulu" reservoir is the most important by reason of its being mostly used by the general public. During the year, the long-standing question of preventing the pollution of this source of water-supply was definitely settled. It has been resolved to lift water from this koneru by means of a hand-power force-pump to a cistern constructed on a high basement, and to distribute it thence by several taps. Plans and estimates of this scheme are in progress.

4. The number of vaccinations performed during the year, with their results, are as shown below:—

Year.	Number of cases vaccinated.	Number of cases successful.	Number of cases unsuccessful.	Number of cases unknown.	Percentage of success.	Cost per case.
						Rs. A. P.
1894–95	1,178	1,155	14	9	98 78	0 5 7
1895–96	1,185	1,123	37	25	96·81	0 4 8

From the above statement it will be observed that, although the number of operations is slightly over that of the previous year, there has been a marked (1·97) fall in the percentage of successful vaccinations. The decrease is due to the greater use of preserved lymph in view to lessen the cost per case. Steps will, however, be taken in future to ensure a better percentage of success. Of the total number of cases vaccinated, 787 were under one year of age as against 753 of the previous year. Vaccination has been compulsory in this municipality for the past seven years. There were 233 individuals served with summons for having failed to vaccinate their children, against 340 of the previous year; of these, 216 submitted to vaccination before proceedings were instituted, while the remaining were prosecuted and punished with fines amounting to Rs. 19–8–0. The cost of animal vaccination during the year was Rs. 62–6–9 as against Rs. 114–1–0 of the previous year, showing thus a net economy of Rs. 51–10–3. The difference in expenditure is due to the inoculation of a lesser number of calves than in the previous year.

5. (*a*) The hospital buildings, as reported last year, are defective with regard to lighting and ventilation and inadequate to meet the demand of applicants for in-door aid.

(*b*) & (*c*) The existing hospital buildings are in a fair state of repair. The roofing of the lying-in hospital, however, needs renewal. Furniture, with the exception of a few minor requirements, is sufficient.

(*d*) The number of in and out patients treated during the year is as hereinunder:—

Year.	In-patients.	Out-patients.	Total in and out patients.
1893–94	401	13,604	14,005
1894–95	419	14,327	14,746
1895–96	606	14,732	15,338

From the above statement it will be observed that the number of in and out patients compares very favourably with the preceding years.

Of the total number of in-patients 13·55 per cent. were residents of this station, 11·07 per cent. were mendicants (byragis) and travellers, and 75·38 per cent. came from the several villages in this district. The daily average of in-door sick was 29·16 as against 23·97 of the previous year, showing thus an increase of 5·19 in-patients. Among the sick treated as inmates of this hospital there were, during the year, thirty-three Brahmins and twenty-one Komaties, making thus a total of fifty-four caste patients or about 9 per cent. of the total number of in-patient admissions.

For want of special wards the two bath-rooms to the east of the lying-in hospital were improvised as caste wards, and an old shed adjoining these was converted into a caste cook room. The number of self-dieting patients was 195, as against 95 in the previous year. All caste patients, excepting two who were supplied with raw rations at hospital expense, used their own diets, the kind, quantity and frequency being advised by the medical officer.

110. In conclusion, I beg to record my thanks for the hearty and willing co-operation of all the councillors in my endeavours to conduct the municipal affairs efficiently and I beg to note specially the considerable interest which M.R.Ry. G. Krishnamma Garu took in the extension of the private scavenging system.

ENCLOSURE.

CONCISE Annual Report on the working of the Municipal Hospital, Guntúr, during the year 1895–96.

The health of the station during the year under review was satisfactory. The town was free from epidemics till the end of December 1895, when chicken-pox and measles were reported to prevail. The type of these eruptive fevers was happily mild, and their duration brief. The epidemics ceased at the end of the year, and no casualties were reported from either of these causes.

The state of the weather was not as oppressive as in the previous year. The temperature, in shade, rose to a maximum of 108° F. as compared with 111° F. in the previous year. The monsoons set in at the end of June, and the rainfall was reported to be, on the whole, seasonable to agricultural operations. There were 31·91 inches of rain registered during the year as against 29·37 of the previous year. With an almost normal rainy season the outturn of crops, as might be expected, was good, and food-grains were consequently sold at rates comparatively cheaper than in the previous year.

I herewith append a tabular statement of cereals used in this station with their respective prices in measures per rupee:—

Kind of grain.	Measures per rupee. 1894-95.	1895-96.
Cholum	12 5	13·45
Ragi	14·4	15·29
Wheat	7·75	9·27
Cumbu	11·59	12·51
Rice, second sort	8·35	8·13

2. The number of births and deaths registered during the year is as hereinunder:—

Population, 23,359.	1894-95. Number.	1894-95. Ratio per mille.	1895-96. Number.	1895-96. Ratio per mille.
Births	784	33·56	880	37·67
Deaths	640	27·39	629	26·92

These figures do not include the (48) still-born. From the above statement it will be observed that there is a satisfactory increase in the registration of births but a small decline in the number of deaths. It is, however, hoped that, with the promulgation in last January of the provisions of section 247 of the Municipal Act by beat of tom-tom and by notice boards, there will be in future an improvement in the registration of vital statistics. During the year, twenty-two individuals were reported for failure to register domestic occurrences; of these, eighteen were discharged by the Chairman and four were prosecuted and punished with fines amounting to Rs. 14–8–0.

3. This town, for purposes of conservancy, is divided into six sections, each of which has a permanent staff of sweepers and scavengers working under the immediate supervision of its respective sanitary inspector. The state of roads with regard to repairs and general cleanliness was satisfactory. All the main roads are metalled, but most of the minor lines of communication are in their primitive condition. The town is swept once a day; the street-sweepings are carted to the rubbish depôt and sold with poudrette for agricultural purposes. The sale-proceeds under this head during the year amounted to Rs. 350 as against Rs. 332 of the previous year. The number of dust-bins is sixty-nine, as compared with forty-five of the previous year. These are insufficient for the requirements of the town. During the year all masonry fixtures were replaced by cylindrical, moveable, corrugated-zinc dust-bins; and seven substantial zinc-lined conservancy carts were substituted for the same number of obsolete flimsy bamboo structures. The number of cesspools is the same as in the previous year, viz., thirteen; all these are cleaned out regularly and their contents are removed to the rubbish depôt in air-tight iron carts. Drainage is by natural gravitation. There are a few rudimentary drains in some parts of the town, but all these are ill-constructed and inefficient.

The progress of the private scavenging system has been very satisfactory. At the end of the year there were 1,132 houses under municipal agency as compared with 510 houses in the previous year, showing thus an increase of 622 houses. This is one of the most satisfactory features in the administration of this municipality during the year under review, and it is due to M.R.Ry. P. Venkatakrishnayya Naidu Garu, Chairman of the Municipal Council.

Water-supply is obtained from several public and private wells scattered over the town; but the main sources of drinking-water are three reservoirs, of which the "Jagganatham Pantulu" reservoir is the most important by reason of its being mostly used by the general public. During the year, the long-standing question of preventing the pollution of this source of water-supply was definitely settled. It has been resolved to lift water from this konern by means of a hand-power force-pump to a cistern constructed on a high basement, and to distribute it thence by several taps. Plans and estimates of this scheme are in progress.

4. The number of vaccinations performed during the year, with their results, are as shown below:—

Year.	Number of cases vaccinated.	Number of cases successful.	Number of cases unsuccessful.	Number of cases unknown.	Percentage of success.	Cost per case.
						Rs. A. P.
1894–95	1,178	1,155	14	9	98 78	0 5 7
1895–96	1,185	1,123	37	25	96·81	0 4 8

From the above statement it will be observed that, although the number of operations is slightly over that of the previous year, there has been a marked (1·97) fall in the percentage of successful vaccinations. The decrease is due to the greater use of preserved lymph in view to lessen the cost per case. Steps will, however, be taken in future to ensure a better percentage of success. Of the total number of cases vaccinated, 787 were under one year of age as against 753 of the previous year. Vaccination has been compulsory in this municipality for the past seven years. There were 233 individuals served with summons for having failed to vaccinate their children, against 340 of the previous year; of these, 216 submitted to vaccination before proceedings were instituted, while the remaining were prosecuted and punished with fines amounting to Rs. 19–8–0. The cost of animal vaccination during the year was Rs. 62–6–9 as against Rs. 114–1–0 of the previous year, showing thus a net economy of Rs. 51–10–3. The difference in expenditure is due to the inoculation of a lesser number of calves than in the previous year.

5. (*a*) The hospital buildings, as reported last year, are defective with regard to lighting and ventilation and inadequate to meet the demand of applicants for in-door aid.

(*b*) & (*c*) The existing hospital buildings are in a fair state of repair. The roofing of the lying-in hospital, however, needs renewal. Furniture, with the exception of a few minor requirements, is sufficient.

(*d*) The number of in and out patients treated during the year is as hereinunder:—

Year.	In-patients.	Out-patients.	Total in and out patients.
1893–94	401	13,604	14,005
1894–95	419	14,327	14,746
1895–96	606	14,732	15,338

From the above statement it will be observed that the number of in and out patients compares very favourably with the preceding years.

Of the total number of in-patients 13·55 per cent. were residents of this station, 11·07 per cent. were mendicants (byragis) and travellers, and 75·38 per cent. came from the several villages in this district. The daily average of in-door sick was 29·16 as against 23·97 of the previous year, showing thus an increase of 5·19 in-patients. Among the sick treated as inmates of this hospital there were, during the year, thirty-three Brahmins and twenty-one Komaties, making thus a total of fifty-four caste patients or about 9 per cent. of the total number of in-patient admissions.

For want of special wards the two bath-rooms to the east of the lying-in hospital were improvised as caste wards, and an old shed adjoining these was converted into a caste cook room. The number of self-dieting patients was 195, as against 95 in the previous year. All caste patients, excepting two who were supplied with raw rations at hospital expense, used their own diets, the kind, quantity and frequency being advised by the medical officer.

The most common diseases in order of their frequency were as follows :—

Diseases of digestive system	2,694
„ of skin	2,087
„ of ear	1,352
Ulcers	1,287
General diseases	1,102
Rheumatic affections	799

(*e*) The number of deaths among in and out patients was forty, as against forty-five in the previous year; of these, twenty-one occurred among the former. Of the casualties among the in-door sick, six were due to patients having been brought to the hospital, or sent by the police, in a moribund condition. The actual causes of deaths among the out-patients could not be ascertained; but among the in-patients they were as follows :—

Coma	2
Asphyxia	6
Asthenia	13

The percentage of deaths among in-patients was 3·47 as against 6·44 in the previous year.

(*f*) The number of surgical operations performed during the year is as follows :—

Year.	Major operations.		Minor operations.	
	Number.	Deaths.	Number.	Deaths.
1894–95	169	5	708	..
1895–96	179	6	914	..

From the above figures it will be observed that the surgical work during the year has been satisfactory.

(*g*) The staff is efficient, but insufficient. The hospital establishment needs reorganization, and I propose to look into this question when framing the budget estimate for the ensuing official year.

(*h*) The number of labour cases conducted by the hospital midwife is fifty-six as against seventy-two in the previous year. This is exceedingly unsatisfactory. A caste midwife will probably show better work, but endeavours to obtain her services have, from year to year, proved unsuccessful.

(*i*) *Nil.*

(*j*) *General Remarks.*—During the year, the following alterations and improvements in the hospital buildings were effected.

Hospital Staff.—First-class Hospital Assistant B. Chelamayya Nayudu, No. 293, was transferred to Gokavaram (Rajahmundry district), and the vacancy thus caused was filled up by the appointment of First-class Hospital Assistant D. Iyaswamy Pillai, No. 103.

The undersigned held charge of the station during the whole of the year under review, and avails of this opportunity to thank all the missionaries working in the western section of this district, particularly Dr. A. S. Kughler, M.D., Revd. Van-de-Westelaken and Revd. Dr. L. L. Uhl, for having, from time to time, referred to this hospital for treatment some interesting medical and surgical cases.

GUNTUR,
27*th April* 1896. (Signed) A. P. FERNANDEZ, L.M.S., Asst. Surgeon,
Acting Civil Surgeon.

N. Dis. No. 2697.

Submitted to the Collector.

2. The year under review was uneventful, and the Chairman's report presents no special features.

3. The three great needs of the municipality are proper water-supply, proper drainage and a new hospital. The general question of water-supply still remains unsolved. A sum of Rs. 500 was set apart in the budget for the investigation of a scheme, but was not utilized. A proposal to improve the purity of the reservoir supply, by pumping the water into a cistern and distributing it by taps, has been approved and estimates are being prepared.

The town drainage scheme still lies dormant; it is certainly of secondary importance to that of water-supply.

Only in the matter of the construction of a new hospital has a distinct advance been made in the year under report. A site has been selected and approved for new buildings on the "Cottage" plan, funds have been guaranteed, and the papers are now with the Sanitary Board for preparation of a design. These steps have been taken none too early, for the present hospital buildings, besides being situated in the most populous part of the town, and badly ventilated and lighted are entirely inadequate for the accommodation of patients.

4. There is a slight increase in receipts under almost all heads, the chief factor in the excess of Rs. 2,827–11–6 over the receipts of the previous year being the sale-proceeds of sites in Arundelpet. There was an increase over the previous year in the expenditure on communications, and I am glad to be able to state that my remark on last year's report no longer holds good. All the main lines of communication have been repaired during the year and are now in a very good state.

5. Considerable pains have been taken by the Chairman to improve the sanitation and cleanliness of the town with good results. A satisfactory feature in the report is the increase under private scavenging fees. This establishment is nearly self-supporting. From the Civil Surgeon's report it appears that a proposal is afoot to make it entirely so. Such a course would not, in my opinion, be politic now when the objections of the towns-people to the scheme have only just been overcome. I observe, however, that the Chairman proposes only to increase cess-pool fees, as the cess-pool service is being worked at a considerable loss. To this there is no objection.

GUNTUR,
12*th June* 1896. (Signed) H. W. GILLMAN,
Ag. Sub-Collector.

N. Dis. No. 93-Eng. M.

Submitted to Government in the Local and Municipal Department.

2. The administration of the municipality during the year under report has been satisfactory.

3. The proposal to pump water into a reservoir and distribute it throughout the town is only a temporary expedient. It has nothing to do with the water-supply scheme proper.

22*nd June* 1896. (Signed) J. N. ATKINSON,
Collector.

Note to Statement I.

1. Tax on arts, &c., is levied on ~~the first~~ all classes.
2. Tax on buildings is levied at 6¼ per cent. and tax on lands at 6¼ per cent. of rent value. when they are let out for annas 4 for every 80 square yards.) a particular sum for house sites & 1 pie for every 80 sq. yds of cultivable land.
3. Water-tax on buildings and lands is levied at Nil per cent.
4. Tax on vehicles and animals is levied at —— the maximum rates.
5. Tax on carts, &c., is levied at Rs. 4 per cart. per annum.
6. Tolls are levied at —— the maximum rates.
7. License-fees are levied at the rates sanctioned in G.O. No 852 5-5-79, 419-11 20-3-91 & 1669-11-Mis 4-10-91
8. The house-tax registers were last revised in the official year 1892-93 and the land tax registers in the official year. 1892-93
9. Total extent of land assessed is ~~acres~~ 7117-41 cents.
10. The mode of estimating the annual rental of houses and lands is as follows:—

Where houses are not rented, the annual rental is fixed at 7½ per cent of their valuation depending upon the structure & locality. Where they are rented the annual rental is known & the tax is fixed at 6¼ p.c of the actual annual rental received.
Lands & gardens actually let out for a particular sum monthly or annually were assessed at 6¼ p.c upon such annual rental value. Lands whose rental value was not known were taken up for measurement, thus as house site measuring 80 sq. yds was assessed at 4 annas per annum and a cultivable land measuring 80 sq. yds was assessed at 1 pie per annum

NOTE TO STATEMENT I.

1. Tax on arts, &c., is levied on ~~the first~~ all classes.
2. Tax on buildings is levied at 6¼ per cent. and tax on lands at 6¼ per cent. of rent value. when they are let out for annas 4 for every 80 square yards. a particular sum
3. Water-tax on buildings and lands is levied at Nil per cent. for house sites ¥ 1 pie for every 80 sq. yds of cultivable land.
4. Tax on vehicles and animals is levied at —— the maximum rates.
5. Tax on carts, &c., is levied at Rs. 4 per cart. per annum.
6. Tolls are levied at —— the maximum rates.
7. License-fees are levied at the rates sanctioned in G.O.s No 852 5-5-79, 419-11 20-3-91 ¥ 1669-11 Mis 7-10-91
8. The house-tax registers were last revised in the official year 1892-93 and the land tax registers in the official year.
9. Total extent of land assessed is 7117-41 ~~acres~~ cents.
10. The mode of estimating the annual rental of houses and lands is as follows :—

Where houses are not rented, the annual rental is fixed at 7½ per cent of their valuation depending upon the structure ¥ locality. Where they are rented the annual rental is known ¥ the tax is fixed at 6¼ p.c of the actual annual rental received.
Lands ¥ gardens actually let out for a particular sum monthly or annually were assessed at 6¼ p.c upon such annual rental value. Lands whose rental value was not known were taken up for measurement, thus as house sites measuring 80 sq. yds was assessed at 4 annas per annum and a cultivable land measuring 80 sq. yds was assessed at 1 pie per annum

No. 1339 M., 12th August 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper :—

From M.R.Ry. P. VENKATAKRISHNAYYA NAYUDU Garu, Chairman, Municipal Council, Guntúr, to the Chief Secretary to Government (through the Divisional Officer and Collector, Kistna), dated 25th May 1896, No. 178.

I have the honour to submit the administration report of the Guntúr Municipality for 1895–96, together with the following papers :—

(1) Civil Surgeon's report on the working of the municipal hospital.
(2) Educational statements (four in number).
(3) Statements of revenue and expenditure.

2. A copy of the resolution of the municipal council adopting the report is appended.

I.—Constitution of the Council.

3. At the close of the official year the council consisted of 15 councillors out of the sanctioned strength of 20, *i.e.*, 1 ex-officio, 3 nominated official, 3 nominated non-official, and 8 elected, councillors; of these, 5 were Europeans and the rest natives. There were 5 vacant seats at the end of the year—3 among nominated, and 2 among elected, councillors. Recommendations were submitted in time for the 3 nominated seats vacant, but none was filled up during the year. For the 2 elected seats, elections were duly held within the year, but the gentlemen elected were gazetted after the close of the year.

Four elections were held during the year for 4 vacancies in three wards—2 vacancies were owing to the death of two councillors, 1 owing to the resignation of a councillor and another due to the expiry of the term of office of a councillor. The elections were well contested and the voters evinced much interest therein. Out of 639 voters registered for the three wards, 396, or 62 per cent. of the electors, attended the poll. There was no election in the previous year.

4. M.R.Ry. V. Bhavanacharlu Garu held the office of Chairman from the beginning of the year up to 8th August 1895, with the exception of an interval from 8th May to 20th June 1895, when he delegated his powers to M.R.Ry. A. M. Sundarasiva Avargal. M.R.Ry. Bhavanacharlu's term of office expiring on the 8th August, the Divisional Officer took charge on the 9th of the same month and delegated his powers on the 12th idem to M.R.Ry. M. Rajaratnam Mudaliyar Avargal who continued in the office till the 16th October, when I assumed charge after the expiry of 15 days' interval from the date of election as per rule No. 7 of the election rules, having been unanimously elected to the seat on the 1st October 1895. I was Chairman during the remaining period of the year with the exception of 18 days from 6th to 23rd January 1896, when I delegated my powers to A. P. Fernandez, Esq., Acting Civil Surgeon.

5. Thirty-eight meetings were held during the year against 28 in the previous year. No meeting was adjourned for want of a quorum during the year against 6 in the previous year. The average attendance at each meeting was 10, same as in the previous year. This was made up of 1 official and 9 non-officials against 2 and 8, respectively, in the previous year, and of 2 Europeans and 8 natives against 1 European and 9 natives in the preceding year.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. P. VENKATAKRISHNAYYA NAYUDU Garu, Chairman, Municipal Council, Guntúr, to the Chief Secretary to Government (through the Divisional Officer and Collector, Kistna), dated 25th May 1896, No. 178.

I have the honour to submit the administration report of the Guntúr Municipality for 1895–96, together with the following papers :—

(1) Civil Surgeon's report on the working of the municipal hospital.
(2) Educational statements (four in number).
(3) Statements of revenue and expenditure.

2. A copy of the resolution of the municipal council adopting the report is appended.

I.—CONSTITUTION OF THE COUNCIL.

3. At the close of the official year the council consisted of 15 councillors out of the sanctioned strength of 20, *i.e.*, 1 ex-officio, 3 nominated official, 3 nominated non-official, and 8 elected, councillors; of these, 5 were Europeans and the rest natives. There were 5 vacant seats at the end of the year—3 among nominated, and 2 among elected, councillors. Recommendations were submitted in time for the 3 nominated seats vacant, but none was filled up during the year. For the 2 elected seats, elections were duly held within the year, but the gentlemen elected were gazetted after the close of the year.

Four elections were held during the year for 4 vacancies in three wards—2 vacancies were owing to the death of two councillors, 1 owing to the resignation of a councillor and another due to the expiry of the term of office of a councillor. The elections were well contested and the voters evinced much interest therein. Out of 639 voters registered for the three wards, 396, or 62 per cent. of the electors, attended the poll. There was no election in the previous year.

4. M.R.Ry. V. Bhavanacharlu Garu held the office of Chairman from the beginning of the year up to 8th August 1895, with the exception of an interval from 8th May to 20th June 1895, when he delegated his powers to M.R.Ry. A. M. Sundarasiva Avargal. M.R.Ry. Bhavanacharlu's term of office expiring on the 8th August, the Divisional Officer took charge on the 9th of the same month and delegated his powers on the 12th idem to M.R.Ry. M. Rajaratnam Mudaliyar Avargal who continued in the office till the 16th October, when I assumed charge after the expiry of 15 days' interval from the date of election as per rule No. 7 of the election rules, having been unanimously elected to the seat on the 1st October 1895. I was Chairman during the remaining period of the year with the exception of 18 days from 6th to 23rd January 1896, when I delegated my powers to A. P. Fernandez, Esq., Acting Civil Surgeon.

5. Thirty-eight meetings were held during the year against 28 in the previous year. No meeting was adjourned for want of a quorum during the year against 6 in the previous year. The average attendance at each meeting was 10, same as in the previous year. This was made up of 1 official and 9 non-officials against 2 and 8, respectively, in the previous year, and of 2 Europeans and 8 natives against 1 European and 9 natives in the preceding year.

No. 1339 M., 12TH AUGUST 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. P. VENKATAKRISHNAYYA NAYUDU Garu, Chairman, Municipal Council, Guntúr, to the Chief Secretary to Government (through the Divisional Officer and Collector, Kistna), dated 25th May 1896, No. 178.

I have the honour to submit the administration report of the Guntúr Municipality for 1895–96, together with the following papers :—

(1) Civil Surgeon's report on the working of the municipal hospital.
(2) Educational statements (four in number).
(3) Statements of revenue and expenditure.

2. A copy of the resolution of the municipal council adopting the report is appended.

I.—CONSTITUTION OF THE COUNCIL.

3. At the close of the official year the council consisted of 15 councillors out of the sanctioned strength of 20, *i.e.*, 1 ex-officio, 3 nominated official, 3 nominated non-official, and 8 elected, councillors; of these, 5 were Europeans and the rest natives. There were 5 vacant seats at the end of the year—3 among nominated, and 2 among elected, councillors. Recommendations were submitted in time for the 3 nominated seats vacant, but none was filled up during the year. For the 2 elected seats, elections were duly held within the year, but the gentlemen elected were gazetted after the close of the year.

Four elections were held during the year for 4 vacancies in three wards—2 vacancies were owing to the death of two councillors, 1 owing to the resignation of a councillor and another due to the expiry of the term of office of a councillor. The elections were well contested and the voters evinced much interest therein. Out of 639 voters registered for the three wards, 396, or 62 per cent. of the electors, attended the poll. There was no election in the previous year.

4. M.R.Ry. V. Bhavanacharlu Garu held the office of Chairman from the beginning of the year up to 8th August 1895, with the exception of an interval from 8th May to 20th June 1895, when he delegated his powers to M.R.Ry. A. M. Sundarasiva Avargal. M.R.Ry. Bhavanacharlu's term of office expiring on the 8th August, the Divisional Officer took charge on the 9th of the same month and delegated his powers on the 12th idem to M.R.Ry. M. Rajaratnam Mudaliyar Avargal who continued in the office till the 16th October, when I assumed charge after the expiry of 15 days' interval from the date of election as per rule No. 7 of the election rules, having been unanimously elected to the seat on the 1st October 1895. I was Chairman during the remaining period of the year with the exception of 18 days from 6th to 23rd January 1896, when I delegated my powers to A. P. Fernandez, Esq., Acting Civil Surgeon.

5. Thirty-eight meetings were held during the year against 28 in the previous year. No meeting was adjourned for want of a quorum during the year against 6 in the previous year. The average attendance at each meeting was 10, same as in the previous year. This was made up of 1 official and 9 non-officials against 2 and 8, respectively, in the previous year, and of 2 Europeans and 8 natives against 1 European and 9 natives in the preceding year.

II.—RECEIPTS.

6. The year opened with a balance of Rs. 6,641–11–9 against Rs. 9,444–0–6 in the previous year. The receipts from all sources including the opening balance amounted to Rs. 51,056–8–4, against the revised estimate of Rs. 51,690 and the actuals of Rs. 51,031–1–7 of the previous year.

7. The following statement gives an abstract of the actual receipts as compared with the actuals of the previous year and the revised estimate of the year under report :—

—	Actuals, 1894–95.	Actuals, 1895–96.	Revised estimate of 1895–96.	Variations between columns 3 and 4.

Excluding balance the advance of Rs. 2,827-11-6 over the previous year in the income under all heads was due to improvement in the collections.

A.—Municipal Rates and Taxes.

8. *Tax on Arts.*—The original demand was Rs. 5,040–8–0. Of this amount, Rs. 402–8–0, or 7·9 per cent. of the original demand, was remitted by the council on appeal and the demand finally settled was Rs. 4,638 against Rs. 4,535–8–0 in the previous year. The arrears for collection during the year were Rs. 125–8–0. The total amount that had to be collected was Rs. 4,763–8–0, of which Rs. 4,488–8–0 was realised against the revised estimate of Rs. 4,650 and the actuals of Rs. 4,398 of the previous year. Rs. 214–8–0 was written off by the council as irrecoverable owing to people having either left the station or died, or being too poor to pay. The balance left at the close of the year was Rs. 60–8–0, of which Rs. 12 has since been collected. There was a slight increase of five in the number of persons assessed and the registers of this tax are invariably revised half-yearly.

9. One thousand three hundred and forty-three warrants were issued for the collection of this tax during the year against 1,528 in the previous year. Rs. 2,267 was collected after the issue of the warrants, but before distraint. Distraint was made in seven cases and the property redeemed before sale.

10. *Tax on Buildings.*—The original demand was Rs. 9,334–7–0 against Rupees 9,241–15–0 in the previous year. The increase was due to taxation of a number of newly-built houses and to the improvements and additions made to some old houses. The arrears of the previous years amounted to Rs. 145–5–0. Thus the total amount that had to be collected during the year under report was Rs. 9,479–12–0. Of this amount, Rs. 9,364–6–6 was realised against the revised estimate of Rs. 9,450 and the actuals of Rs. 9,256–1–6 of the previous year. Rs. 26–4–0 was written off as irrecoverable on account of the dilapidated condition of certain houses, leaving thus a

balance of Rs. 89–1–6 at the close of the year, of which Rs. 8–15–0 has since been collected. The balance is mainly due on the jail buildings under the occupation of various Government offices which have not settled among themselves as to the proportionate amount of tax payable by each.

11. One thousand six hundred and ten warrants were issued for this tax against 1,292 of the previous year. Rs. 3,186–9–0 was collected after the issue of warrants, but before distraint. Distraint was made in eight cases. The house-tax registers underwent revision in 1892–93.

12. *Tax on Lands.*—The demand as originally assessed was Rs. 1,973–13–0 against Rs. 2,064–12–0 in the previous year. The decrease was due to the exemption from taxation of certain vacant sites whereon houses were raised. There were Rs. 343–11–0 as arrears of the previous year, thus making a total of Rs. 2,317–8–0 to be collected during the year. Of this amount, Rs. 2,077–4–0 was collected, against the revised estimate of Rs. 2,220 and actuals of Rs. 1,994–15–0 of the previous year. Rupees 101–10–0 was written off as irrecoverable as the whereabouts of some of the defaulters could not be traced, and Rs. 4–12–0 was remitted under section 63, clause (3) of the Municipal Act. The uncollected balance at the close of the year was Rs. 133–14–0. Of this Rs. 89–12–6 belonged to the year under review and Rs. 44–1–6 to the previous years. Prosecutions were instituted in the case of all the defaulters and Rupees 59–10–6 has been collected since 1st April.

13. The total extent of land assessed in the year under review was 1,117·71 acres against 1,157·72 acres in the previous year. One thousand two hundred and eight warrants were issued for the collection of this tax against 644 in the previous year. Rs. 1,272–6–0 was collected after the issue of warrants.

14. *Tax on Vehicles and Animals.*—Steps were taken to prevent evasions of the tax under this head as directed in paragraph 3 of G.O., No. 1613 M., dated 7th October 1895, and the result was the realisation of Rs. 1,526–8–0, against the revised estimate of Rs. 1,500 and the actuals of Rs. 1,479–4–0 in the previous year.

15. *Tax on Carts.*—Against the revised estimate of Rs. 2,000 and the actuals of Rs. 2,084 in the previous year, Rs. 2,182 was realised. The increase was due to a larger number of carts licensed during the year owing to the enforcement of vigilance on the part of the municipal out-door staff.

16. *Tolls.*—The amount of the bid for the year was Rs. 19,510 against Rupees 19,250 in the previous year. The increase was due to keen competition among the bidders. The whole amount was collected during the year, and one-third, or Rupees 6,503–5–4, was made over to the district board as their share. There were nine toll-gates, same as in the previous year, and fees were levied at full rates.

17. *Realisations under Special Acts.*—Rs. 30 was realised against Rs. 20 of the revised estimate. The increase was due to a license granted to an athletic arena newly opened during the year.

B.—Revenue derived from Municipal property and powers apart from taxation.

18. *Rent of Lands.*—Rs. 198–11–7 was realised, against the revised estimate of Rs. 200 and the actuals of Rs. 108–1–1 in the previous year. This amount was collected from the ryots who cultivated the land according to a fresh lease executed during the year, and Rs. 86–9–4 being the rent received for temporary occupation of municipal ground. The increase under this head, over actuals of the previous year, was due to the leasing out of a site in the main bazaar at Rs. 7 per mensem during the year and to the slight rise in the receipts on the endowment land of Whish's choultry.

19. *Avenue Receipts.*—Rs. 114–3–3 was the amount realised under this head against Rs. 100, revised estimate, and Rs. 61–2–3, actuals in the previous year. The increase was mainly owing to the leasing out of the mango crop for Rs. 46 against Rs. 13 in the previous year.

20. *Fees from Travellers' Bungalow.*—Rs. 129–12–0 was collected against Rs. 150, revised estimate, and Rs. 86–4–0, actuals in the previous year. The increase over last year's actuals was due to the more frequent use of the bungalow than in the previous year.

21. *Sale-proceeds of Lands and Buildings.*—The amount realised under this head was Rs. 1,263–3–4, against the revised estimate of Rs. 1,500 and the actuals of Rs. 89–13–6 in the previous year. The decrease against the revised estimate was due to the postponement of the sale of the old slaughter-house for want of sanction of the Government within the year, and the increase over the actuals of the preceding year was owing to the purchase of many plots of ground in Arundelpet for building purposes.

22. *Produce of Lands, Gardens, &c.*—Rs. 150–12–0 was realised against the revised estimate of Rs. 150 and the actuals of Rs. 164–10–0 in the previous year. This is a fluctuating item and the slight decrease against last year's actuals was due to less competition among the bidders for the purchase of grazing right in municipal lands.

23. *Sale-proceeds of old Materials, &c.*—Rs. 272–9–0 was the amount realised under this head, against Rs. 200 of the revised estimate and Rs. 221–13–6, actuals in the previous year. This was attributed to the sale of a large quantity of old materials such as oil-cans, deal-wood boxes, &c., at higher rates than anticipated.

24. *Sale-proceeds of Night-soil, Street-refuse, &c.*—The revised budget amount was fully realised and it exceeded the actuals in the previous year by Rs. 18 owing to the rubbish being more appreciated by the ryots for manure purposes.

25. *Fees from Educational Institutions.*—Rs. 39–4–0 was collected, against Rs. 40 of the revised estimate and Rs. 29–1–6, actuals in the previous year. The increase was due to the improved attendance at the Muhammadan day school.

26. *Sale-proceeds and Composition Fees of Medicines.*—Against the revised estimate of Rs. 100 and the actuals of Rs. 52–6–9 in the previous year, Rs. 149–5–0 was collected during the year, the increase being mainly due to the energetic exertion of the Civil Surgeon in the prompt collection of all dues from subscriptions and sale of medicines.

27. *Other Hospital Receipts.*—Nothing was realised under this head, though Rs. 10 was budgeted in the revised estimate owing to the non-sale of the old materials in the hospital.

28. *Income from Markets.*—Rupees 1,683–10–5 was collected, against the revised estimate of Rs. 1,690 and the actuals of Rs. 1,418–11–2 in the previous year. The increase over last year's actuals was due to keen competition among the bidders at the auction sale of the vegetable market and to the fees on the mutton market having been levied only from the second quarter of 1894–95.

29. *Distraint Fees.*—Against the revised estimate of Rs. 20 and the actuals of Rs. 17–4–0 in the previous year, Rs. 13–4–0 was realised, there was a decrease of Rs. 6–12–0 against the revised estimate, as all the warrants were not executed, the taxes having been collected before the warrants were put in force. This is a fluctuating item.

30. *License Fees.*—Rs. 1,217 was collected against the revised estimate of Rs. 1,000. The increase was owing to a larger number of licenses issued during the year.

31. *Cart-stand Fees.*—The right of collecting fees at the cart-stand was sold for Rs. 610 against Rs. 510 in the previous year. The increase was due to competition among bidders. The whole amount was collected during the year.

32. *Fines under Municipal and other Acts.*—Rupees 742–3–0 was credited to the municipality, against Rs. 600 of the revised estimate and Rs. 600–4–0, actuals in the previous year. The increase was due to the interest evinced by the Bench-Magistracy in the disposal of municipal cases, and was also indicative of the increased activity on the part of the police and the municipal executive in checking nuisances.

33. *Interest on Investments.*—Rupees 127–6–9 is shown under this head as it was the interest for two years (1893–94 and 1894–95) added to the capital of the hospital endowment fund invested in the Postal Savings Bank.

34. *Grants and Contributions—From Government Buildings.*—Nothing was realised under this head against the revised estimate of Rs. 150, as the contribution towards

the cost of the gymnastic shed is still due from Government, the matter being still under correspondence between the Director of Public Instruction and the municipality.

35. *Other purposes.*—Against the revised estimate of Rs. 180, Rs. 77–15–3, being a moiety of grant on the salary of the gymnastic instructor and one-third grant on that of the drawing master, could be collected under this head. Of this Rs. 22–8–0 was realized within the year, but they were not passed for payment in time to be included in the accounts of the year. The decrease against the revised estimate was due to the resignation of the qualified drawing master and to the person appointed in his stead not being eligible for grants.

36. *From Local Boards.*—Rs. 2,647–8–11 was received from the local fund board being a moiety of the hospital expenditure. The contribution is, as a rule, calculated on the actual expenditure for the year and the demand consequently varies from year to year.

37. *Private Scavenging fees.*—The demand under this head was Rs. 1,500–0–2 and the arrears were Rs. 92–11–0, thus making a total of Rs. 1,592–11–2 for collection during the year. Of this amount Rs. 1,446–4–3 was collected against the revised estimate of Rs. 1,800 and the actuals of Rs. 1,302–12–0 of the previous year. The increase over the actuals of the previous year was due to the large increase in the number of private latrines brought under municipal agency in the last quarter of the year under report and the decrease against the revised estimate was due partly to the late commencement of the working of the newly-admitted privies and partly to the registration of most of the houses under the last class, *i.e.*, As. 2 per mensem. Out of Rs. 146–6–11 left uncollected at the close of the year, Rs. 111–11–0 has since been collected.

38. *Refunds of expenditure of previous years.*—Rs. 86–7–11 was recovered under this head as detailed below :—

	Rs.	A.	P.
Recovery of excess payment made as compensation for acquiring A. Subbarayudu's land to extend a road	64	9	11
Sale-proceeds of admission registers purchased in previous years..	21	14	0
Total ..	86	7	11

39. From the statements herewith submitted, it will be seen that the current collections and the arrear realizations under the various heads were very prompt, and the balance uncollected at the close of the year was much less than in the previous years. The greater portion of the outstandings was adjusted during the year and, after careful scrutiny, all such arrears as could not be realized were written off the accounts as irrecoverable and the recoverable balance was taken over into the current year's accounts for collection. Adjustments will be made during the current year in the case of all outstandings as the matter is receiving the very careful attention of the municipal executive. Owing to the frequent changes in the Chairmanship in the course of the year under review and owing, consequently, to the laxity on the part of the out-door staff, the collection was very slack and defective, and only about one-sixth of the total demand taxation was realised up to the 16th October—the date on which I assumed charge of the office. But by strenuous efforts the collection work was improved so as to secure a realization, within the year, of 98·6 per cent. of the estimated receipts for the year under report and 106·8 per cent. of the actual receipts in the previous year.

III.—EXPENDITURE.

40. The expenditure under various heads, as compared with the figures of the previous year and the revised estimate of the year under report, are shown in the following statement :—

	Actuals, 1894–95.	Actuals, 1895–96.	Revised estimate, 1895–96.	Variations between cols. 3 and 4.
	RS. A. P.	RS. A. P.	RS. A. P.	RS. A. P.

,, V	2,944 5 1	3,023 10 4	3,080 0 0	— 56 5 8
Repayment of debt, &c.	1,424 12 9	1,528 7 0	1,510 0 0	+ 18 7 0
Total ..	44,389 5 10	42,246 9 2	48,120 0 0	—5,873 6 10

41. *Grant I, Communications.*—Out of the revised estimate of Rs. 5,900 under this head, Rs. 5,634–14–1 was spent against Rs. 4,865–12–7 in the previous year. Details are furnished in statement II A, parts 1 and 2. The decrease of Rupees 265–1–11 was owing to the non-payment of the whole amount budgeted towards the construction of a road to the women's hospital, as it was deemed advisable to allow the earth-work to consolidate before metalling was done. The total expenditure on roads amounted to nearly 50 per cent. of the net proceeds from toll-fees agreeably to the orders of the Government contained in paragraph 4 of G.O., No. 1613 M., dated 7th October 1895. The length of the new roads constructed during the year was 1 mile and that maintained was 39 miles against 34 miles in the previous years owing to the transfer of 5 miles of road by the district board in consequence of the extension of town limits. The roads are kept in a fairly good condition.

42. *New Works—Buildings.*—The total outlay under this head amounted to Rs. 2,184–13–10 against the revised estimate of Rs. 6,100. The difference was due (1) to the non-utilization of Rs. 3,500 provided for the construction of a fish and beef market and (2) to the short expenditure out of allotment for urinals.

(1) With a view to commence work during the year, plans and estimates of the proposed market were forwarded to the Sanitary Board for approval, but they were returned for re-submission with a site plan. A sub-committee appointed thereupon to select a site suggested the advisability of constructing the new market by the side of the existing vegetable market. Some councillors taking objection to this suggestion, the matter was referred to the Sanitary Commissioner for opinion. After further correspondence on the matter, the council resolved finally to convert the existing vegetable market into a fish and beef market, and to construct a new vegetable market on a larger scale in some suitable locality as the present one is found quite inadequate to meet the requirements of sellers and buyers. The sellers are dissatisfied, because in proportion to the high rents demanded from them, they are not given godowns with sufficient accommodating space for their articles and from the paucity of godowns in the market, some of them are compelled to seek rooms elsewhere apart from their brothers in trade. There is a good deal of dissatisfaction among buyers as the cramped condition of the market during the business hours and the narrowness of the moving space within the market premises are daily giving rise to much confusion and promiscuous mixture of all classes. They all appreciate the utility of the market, but condemn the unsatisfactory method adopted in the arrangement of the buildings, which are neither in accordance with native taste nor regardful of caste prejudices, which are in many respects easy to understand. The council have, for these reasons, felt the necessity for a more commodious and spacious vegetable market, and, in view of the improvements contemplated, the work was not taken in hand during the year.

(2) Out of a provision of Rs. 500 for urinals, only Rs. 97–12–10 was spent in constructing a urinal in a crowded part of the town with a view to utilise the unspent portion in providing for platforms in compliance with the suggestion of the Sanitary Commissioner in paragraph 2 of his letter embodied in G.O., No. 370 M., dated 7th March 1895; but as this was closely connected with the improvement recommended subsequently in paragraph 5 (*a*) of his inspection notes recorded on the 6th and 7th August 1895, it was postponed for consideration along with the other proposal, for which plans and estimates are under preparation.

43. Rupees 120–1–9 was spent in erecting a tiled shed on the bund of the Black tank to afford shelter to the watchmen, who have to look after the tank both days and nights as it is the chief source of water-supply to the town. The work must be considered important from the purpose it is serving.

44. Rupees 341–13–9 was spent towards the construction of a shed in the gymnastic ground to give shelter to the large number of boys frequenting the place daily and to protect apparatus, &c., from the effects of heat and rain.

45. Rupees 1,058–6–1 was spent towards the erection of a corrugated iron latrine of 24 seats in place of a masonry one in one of the crowded wards of the town.

46. An expenditure of Rs. 262–13–11 was incurred for raising a compound wall to Whish's choultry—the only charitable institution of the kind under municipal management—as it was found absolutely necessary to protect the choultry from its being used by the neighbours to the great inconvenience of the travellers, for whom it is specially intended.

47. Rupees 187–9–0 was spent in purchasing 24 iron cylindrical dust-bins to provide for the wants of the town.

48. *Repairs—Buildings.*—Rs. 882–9–11 as detailed in statement II-A, Part II, was spent towards repairs to buildings during the year, greater portion of this amount being expended upon repairs to the existing latrines and the municipal office.

49. *Water-supply—New Works.*—Rs. 729–8–7 was spent out of an allotment of Rs. 1,300. Rs. 500 provided for the investigation of the water-supply of the town remained unspent, as the Sanitary Engineer, at whose instance the amount was budgeted, postponed his investigation during the year. Rs. 70–7–5 represented savings; hence the difference of Rs. 570–7–5.

50. Rupees 671–11–7 was spent towards the construction of a sluice to the Black tank to draw off all stagnant water just before the monsoons set in, and Rs. 57–13–0 was spent towards the construction of a masonry wall across the head sluice to the Black tank to prevent the filthy washings of the town from getting into the tank during rains.

51. *Repairs—Water-supply.*—Rs. 505–8–9 was spent for repairing the Red tank reservoir and most of the public wells in the town. The difference was not required as there was no water scarcity during the year.

52. The water-supply of the town continues fairly satisfactory. The town's most urgent needs are schemes for water-supply and drainage, as pointed out by the Sanitary Commissioner. A survey of the town was made some years ago on a large scale with a view to a drainage scheme; this was, however, deferred in preference to the water-supply scheme. But neither for the one nor for the other is a scheme formulated by the Sanitary Board, and the council hopes that the matter will soon receive sympathetic consideration at the hands of the Government. At the suggestion of the Sanitary Commissioner in his inspection notes recorded in G.O., No. 56 M., dated 11th January 1896, plans and estimates are under preparation for lifting the water of the big reservoir by steam-engine to an elevated tank for distribution so as to prevent people from entering it for drawing water.

53. *Establishment.*—The establishment charges amounted to Rs. 641–2–6. The difference was due to the delay in the appointment of a competent substitute in place of the works overseer, who was granted sick leave on medical certificate.

54. *Tools and Plant.*—An expenditure of only Rs. 8–1–0 appears against this head as the purchase of fresh plant was postponed to the current year from the adequacy of the existing stock to meet the requirements of the year under report.

55. *Grant II, Stipends to Normal Students.*—Rs. 6–5–0 was paid as travelling allowance to the second master in the Muhammadan day school sent up for training to Madras.

56. *Salary-result System.*—Result grants Rs. 156–15–0 was utilised against the revised estimate of Rs. 170.

The difference was due to the payment of grants to the Hindu night schools at half the maximum rates.

57. *Contingencies.*—The slight increase under this head occurred owing to the purchase of time-pieces for use in the night schools.

58. *Salary Grants.*—The increase of Rs. 24–10–5 was due to the payment of increased salary grants to some teachers in the lower secondary schools from their eligibility for the extra grant.

59. *Inspection—Contribution to Local Boards.*—Nothing is shown under this head as the district board made no claim to the contribution towards the Muhammadan inspecting schoolmaster's pay.

60. *Contingencies.*—The only outlay under this head was Rs. 31–5–0 for the purchase of one almirah supplied to the office of the inspecting schoolmaster as the council deemed that more furniture was not required.

61. *Building, Furniture, &c., Grants.*—Against Rs. 550 of the revised estimate and Rs. 387–10–8, actuals in the previous year, Rs. 542–6–8 was spent as detailed below :—

	Rs.	A.	P.
Rent grant paid for certain result school buildings	27	14	8
Building grant for the construction of a separate building for the use of the lower secondary department of the Sanskrit High school	390	0	0
Furniture grant to the lower secondary department of the same institution	124	8	0
Total ..	542	6	8

62. *Common Drawing Master—Contingencies.*—The decrease of Rs. 6–15–9 under this head was owing to a round figure entered in the revised estimate.

63. The total net expenditure on education amounted to Rs. 5,393–8–8 or 15·69 per cent. of the total receipts from taxation and rents. Of this sum Rs. 4,076–2–3 or 79·69 per cent. was devoted to primary education and the remainder to secondary education. The number of schools maintained by the municipality was 5, same as in the previous year. There was a slight increase in the attendance in all the schools, the number having risen from 114 in the previous year to 118 in the year under review. The cost of educating each pupil in the night schools was Rs. 8–12–9, while in the Muhammadan schools it was Rs. 10–0–10. This is rather high and far above the general average, but considering the backward condition of the Muhammadans and the labouring classes, for whom these schools are specially maintained, the cost cannot be grudged for some years to come. Two lower secondary schools were aided with salary, and twenty-four result schools with result grants. Though the number of schools remained the same as in the previous year, the strength of all of them taken together showed a fair improvement. The total number of pupils under instruction in schools maintained and aided from municipal funds was 1,887 against 1,870 in the previous year, while the male population of the school-going age was 1,763, same as last year.

64. The primary and secondary education continues to be very satisfactory as tested by success in the examinations. Out of thirty-three that appeared for the Lower Secondary examination, thirty passed and sixteen obtained complete certificates. One hundred and thirty-five pupils presented themselves for the Primary examination from all the schools in the town and 104 passed altogether. The salary grant schools and those on the system of results acquitted themselves creditably at the grant examinations. The allotment for result grants was utilized in full and the grants were paid under the assignment system. The lapsed grants were distributed towards the close of the year among over-earned schools in accordance with the Circular, No. 1457, dated 15th February 1896, of the Director of Public Instruction. The Panchama community, for whom four schools were maintained by the American Evangelical Lutheran Mission, received substantial aid from the municipal funds.

65. *Grant III, Hospitals and Dispensaries—Establishment.*—The savings under this head were due to a Third-class Hospital Assistant of the reserve staff having been paid from Provincial funds when he acted for more than a month in place of First-class Hospital Assistant B. Chelamayya Nayudu transferred.

66. *Medicines and Supplies.*—Rs. 1,731–11–5 was spent against the revised estimate of Rs. 1,600 and the actuals of Rs. 1,202–10–8 in the previous year. The increase was due to the purchase of medicines in London at a high rate of exchange and to the advance in the number of the patients treated in the hospital, testifying to the growing popularity of the institution.

67. *Diet of Patients.*—The decrease of Rs. 109–12–2 under this head was due to the diet bill for the month of February not having been received within the close of the year for adjustment.

68. *Sundries and Contingencies.*—Rs. 774–5–11 was spent against Rs. 950 of the revised estimate and Rs. 783–14–3, actuals in the previous year. The decrease was due to the economic management of the funds under the immediate supervision of Assistant Surgeon A. P. Fernandez, Acting Civil Surgeon, and to the non-receipt of the contingent bill for February during the year.

69. *Contribution to Provincial Funds.*—Rs. 395 was paid against Rs. 320 of the revised estimate and Rs. 397, actuals in the previous year, according to bills received from the Accountant-General, for medical college, sanitary inspection, medical reserve staff and cutlers' establishment.

70. *Contribution to Local Boards.*—Rs. 60 provided for in the budget as contribution to the district board for the clerk attached to the District Surgeon's office was not paid within the year as no claim was made for the same.

71. The municipal hospital is working very satisfactorily. The total number of patients rose from 14,746 to 15,338 during the year. The increase in the number of major operations was also creditable to the Civil Surgeon, it having risen from 169 to 179. The present hospital buildings being considered very defective with regard to light and ventilation from their situation in the most crowded and airless part of the town and from the accommodation therein being quite inadequate to meet the growing needs of the institution, it was resolved to construct a new hospital on the standard plan in a more airy and convenient locality outside the limits of the town proper. Rs. 3,000 was budgeted in the current year to commence work as soon as plans and estimates would receive the approval of the Sanitary Board. The district board has promised a liberal contribution of two-thirds of the entire cost of the buildings, provided that it does not exceed Rs. 40,000. The first-class Hospital Assistant attached to the hospital was given free quarters, and the third-class Hospital Assistant was paid a house-rent of Rs. 5 per mensem. All the suggestions of the Civil Surgeon to improve the existing buildings and to supply any immediate wants received the very careful attention of the council.

72. *Medical Training of Women.*—The midwife attached to the hospital attended 56 labour cases against 72 in the previous year. The fall was due to the indifference of the people to avail themselves of the services of a non-caste midwife, though trained, and all attempts made to secure the services of a caste woman proved vain. The work of the midwife was far from satisfactory.

73. No special action was taken by the council to further female medical education, though the matter was discussed in more than one meeting during the year. The council think that there exists no necessity at present for any action on the part of the municipality seeing that the town is provided by the American Mission with a well-organised women and children's hospital under the charge of Miss A. S. Kugler, M.D., for affording medical relief to women.

74. *Vaccine Contingencies.*—The marked decrease under this head was due to a smaller number of calves having been used for vaccination in consequence of the more careful preservation of lymph. Statement XIII herewith submitted furnishes full particulars of vaccination performed in the town.

75. The number of vaccine operations performed during the year by the municipal vaccinator was 1,185 against 1,178 in the previous year. Of these, 1,123 were successful, 37 unsuccessful, and 25 unknown against 1,155, 14 and 9, respectively, in the previous year. The decrease in the number of successful cases was due to a large failure of cases performed in the months of April and May and to the method

adopted for checking the operations as directed by the Government in its Order No. 1502 M., dated 19th October 1894. The operations performed on children under one year of age were 787 against 753 in the previous year. Two hundred and thirty-three persons were prosecuted during the year against 340 in the previous year, of whom 216 were let off by the Magistrate under section 138 of the Municipal Act, and the remaining 17 were punished with fines amounting to Rs. 19–8–0.

76. The vaccine operations were performed with animal lymph under the supervision of the Civil Surgeon who was in charge of the vaccine depôt. The average cost per case during the year was As. 4–8 as compared with As. 6–5 of last year. At the suggestion of the Sanitary Commissioner in his inspection notes recorded in G.O., No. 56 M., dated 11th January 1896, a fee of As. 2 is prescribed in all instances in which the vaccinator has to proceed to the houses of parents or guardians for operation or verification with a view to discourage house visits as much as possible. Owing to the full operation of the compulsory system ever since 1889, vaccination is in a progressive condition in the town. Every month lists of births are supplied to the vaccinator by the registrar of births and deaths and notices are duly served to the parents or guardians after six months' time allowed by the Act.

77. *Registration, Contingencies.*—Rs. 32–1–0 was spent against Rs. 20 of the revised estimate, and Rs. 31–13–4, actuals in the previous year. The increase was due to the fixing of six notice boards in conspicuous parts of the town, declaring the law as to registration.

78. The following comparative statement shows the number of births and deaths with the rate per mille of population :—

—	Number of births.	Rate per mille of population.	Number of deaths.	Rate per mille of population.
1894–95	784	33·56	640	27·39
1895–96	880	37·67	629	26·92

The total births and deaths exclude 48 still-born children. The birth-rate exceeded the death-rate, this being ascribed to the general healthy condition of the town throughout the year.

79. The following are the causes of mortality :—

		1894–95.	1895–96.
Deaths from fever		193	219
Do.	cholera	..	..
Do.	small-pox	..	..
Do.	diarrhœa and dysentery	34	34
Do.	suicides	3	2
Do.	wounds	10	18
Do.	accidents	4	4
Do.	all other causes	396	352
	Total ..	640	629

80. The registrar received information as to births from midwives, who attended confinement, and in addition gathered information personally in his morning perambulations. He was informed of deaths by the watchman at the burial grounds. To ensure better and more satisfactory results, the law as to registration was made known by beat of tom-tom and by boards placed in conspicuous parts of the town. The total number of failures to report birth and death occurrences was twenty-two, of which eighteen were excused for sufficient reasons, and in the remaining four cases prosecutions were instituted. The total amount of fines collected during the year on this account was Rs. 14–8–0.

81. *Conservancy Establishment.*—Rs. 6,298-14-3 was spent against Rs. 6,320 of the revised estimate. The decrease was due to savings effected owing to fines and stoppages.

82. *Other charges.*—Rs. 2,031–6–1 was utilized as shown below against Rs. 2,210 of the revised estimate :—

	Rs.	A.	P.
Hire of buffaloes for rubbish carts	1,426	4	11
Purchase of rubbish carts	430	11	11
Repairs to carts	153	14	0
Wages for watering roads	11	13	3
Cost of dry earth	8	10	0
Total ..	2,031	6	1

The decrease was due to the stoppage of watering the roads in consequence of the early setting in of rains, to the construction of rubbish carts in the local market at moderately cheap rates and to the savings effected under other items.

83. *Private Scavenging Establishment.*—Against the revised estimate of Rupees 1,410, Rs. 1,388–9–7 was spent. The decrease was on account of fines imposed on the scavengers.

84. *Contingencies.*—The decrease of Rs. 34–13–7 under this head was due to less expenditure under repairs to carts as the air-tight iron carts purchased during the year required no repairs.

85. Private scavenging being an important branch of sanitation, received my special and steady attention, and with unremitting endeavours I was able to extend the system so as to bring under municipal agency almost all private latrines within the town. The number of privies attended to under private scavenging system at the beginning of the year was 510 out of 1,194 and 528 in October, whereas at the close of the year, the number under municipal management was 1,132. The receipts under the private scavenging system were Rs. 1,446–4–3 and the expenditure amounted to Rs. 2,333–12–0, including Rs. 477–14–0 being the charges for cleaning cess-pools and Rs. 485, being the cost of five night-soil carts. If the cost of carts which does not recur in future and the charges incurred on cess-pools be excluded from the expenditure, that on private latrines alone came up to Rs. 1,370–14–0. The receipts therefrom being Rs. 1,355–14–6, the net loss to the municipality in working them was only Rs. 14–15–6. There would not have been even this loss but for the fact that the privies were brought under municipal management late in the year, and the service was commenced towards the close of the year. Now that the system has been so much extended, no pains would be spared to make it a financial success. The ways and means for effecting improvements were stated in my letter No. 20, dated 6th April 1896, to the Government in connection with the subject. The municipality is performing the cess-pool service at a great loss to itself and it is under contemplation to enhance the rates sufficiently to pay for the cost of the carts and scavengers employed in cleaning cess-pools. I regret to say that the private scavenging fees could not be collected in advance as any coercive measures in this direction would only end in making the system unpopular.

86. *Cholera charges.*—The town being free from cholera, Rs. 48 was the only charge incurred under this head. It was rent of land for a cholera shed erected in a private field. Considering this as an unnecessary charge on municipal funds, I proposed the removal of the shed from the rented land for its construction on a piece of municipal ground far from the town. The council adopted my proposal.

87. *Contingencies.*—The difference was not required as there was no expenditure incurred under cost of preventive measures from the immunity of the town from cholera during the year under report.

88. The sanitation of the town was fairly satisfactory. The town was singularly free from epidemics of any kind during the year. There were no deaths from cholera or small-pox. Seven wooden skeleton carts lined with sheet iron and six single bullock air-tight night-soil carts were purchased during the year. One corrugated iron latrine of the standard pattern was erected in one of the crowded parts of the town. Twenty-four dust-bins were added during the year. The municipality effected as much

improvement in sanitation during the year as the funds at its disposal enabled it regarding the various recommendations made by the Sanitary Commissioner and the Civil Surgeon, and for such of them as could not be carried out during the year, provision, as far as funds permitted, was made in the current year's budget.

The town is divided into six divisions and these are under six conservancy overseers assisted by six peons who are responsible for conservancy under the supervision of the divisional councillors. The town is well looked after and is kept as clean as possible. The Chairman and the divisional councillors exert themselves by systematically inspecting the divisions to see that streets, &c., are kept clean and the conservancy overseers are up to their work.

89. *Grant IV—Lighting—Establishment.*—As per details given in Statement II-B, the total amount required under this head was Rs. 516, but Rs. 520 was put down in the revised estimate for the sake of a round figure. The difference of Rs. 4–8–0 is accounted for as follows:—Remuneration to the lighting superintendent for the month of March 1895 was paid according to the old scale thus causing a difference of Rs. 2, and fines to the extent of Rs. 2–8–0 were imposed upon lamp-lighters for neglect of duty.

90. *Contingencies.*—Out of Rs. 1,400 of the revised estimate, Rs. 1,273–8–6 was spent against Rs. 974–7–9, actuals in the previous year. The increase over last year's actuals was due to the fixing of 48 additional lamp posts during the year. The decrease as compared with the revised estimate was owing to the commencement of the lighting of the additional lamps late in the year and to the lighting work being done departmentally. The total number of lamps in the town was 236 against 188 in the previous year. The lighting in the town may yet be considered deficient as there are only five lamps to each mile of road.

91. *Market Contingencies.*—The difference was not required.

92. *Slaughter-house Contingencies.*—Rs. 50 was provided for in the revised estimate to give effect to the recommendations of the Sanitary Commissioner in his last inspection notes to make a garden in the immediate vicinity of the slaughter-house. The garden was laid out, pits were dug, but at the suggestion of the Civil Surgeon who advised planting trees after the conversion of the offal, &c., in the pits into earth, plantation was postponed to the current year. Hence the decrease.

93. *Travellers' Bungalow.*—The slight difference under this head calls for no remarks.

94. *Avenue Contingencies.*—The decrease was due to some plants having been obtained gratis.

95. *Bell Striking Contingencies.*—For the sake of a round figure, Rs. 10 was adopted in the revised estimate. Rs. 1–8–0 was expended for purchasing two mallets.

96. *Fire Contingencies.*—The increase was due to a large number of fire accidents during the year under report.

97. *Rewards for destruction of wild animals.*—The decrease was owing to less number of snakes killed.

98. *Printing.*—Rs. 309–15–2 was paid as per bills received against Rs. 200 of the revised estimate and Rs. 240–15–8, actuals in the previous year. The increase was due to the large outlay incurred for printing council's proceedings in consequence of the large number of meetings held in the year under report.

99. *Compensation for Lands.*—A field to the north of Kottapet was purchased for Rs. 400 to serve as a burial and burning ground in place of the old one which owing to the growth of the town in this direction is brought nearer to the habitations of the people.

100. *Grant V—Establishment.*—Rs. 1,538–10–6 was expended against Rs. 1,550 of the revised estimate and Rs. 1,579, actuals in the previous year. The decrease against last year's actuals was due to the reduction in the scale of salaries of the office establishment in consequence of the late manager's death and that over the revised estimate was on account of savings and stoppages.

101. *Inspection.*—The slight difference was due to the non-receipt of the allowance by the Divisional-officer when he was in charge of the office for three days.

102. *Collection of Municipal taxes—Establishment.*—Rs. 387–0–3 was spent against Rs. 400 of the revised estimate. The less expenditure was due to leave granted on loss of pay and to fines.

103. *Office Contingencies.*—Rs. 303–12–10 was spent against Rs. 320 allotted and Rs. 252–6–9, actuals in the previous year. The increase over last year's actuals was owing to the purchase of eight chairs for the use of the councillors and of two almirahs for office use.

104. *Repayment of debt.*—Rs. 1,300 was paid against Rs. 1,351–4–8, actuals in the previous year. This was made up of Rs. 1,000 being the second instalment of the loan taken from the President, Cotton Merchants' Choultry, Guntúr, and of Rs. 300 being the interest on Rs. 5,000 up to 31st March 1896.

105. *Refunds of other than current collections.*—Rs. 101–0–3 was spent against Rs. 80 of the revised estimate as detailed below:—

	Rs.	A.	P.
Remission on vacant buildings	26	0	3
Refund of purchase money for a plot in Arundelpet which was not made over to the purchaser	75	0	0
Total ..	101	0	3

106. *Investments.*—Rs. 127–6–9 was invested in the postal savings bank, being the interest on the funded capital of the hospital for two years as noted in paragraph 33 *supra*.

VI.—CLOSING BALANCE.

107. Rs. 8,809–15–2 remained at the close of the year against the revised estimate of Rs. 3,570. The large increase was due to the non-utilization of Rs. 3,500 budgeted for a fish and beef market and to savings under other grants. The balance consists of Rs. 6,401–13–1, municipal fund, Rs. 216–4–1, endowment and Rupees 2,624–6–2, town extension fund. The details of the endowment fund are given in Statement I-A. The minus balance under this fund was due to the construction of a compound wall to the choultry as stated in paragraph 46, and the amount thus expended from the municipal funds will be recouped from the endowment receipts of the choultry.

108. Details of town extension fund are furnished in the tabular statement below:—

Receipts.	Amount.			Expenditure.	Amount.		
	Rs.	A.	P.		Rs.	A.	P.
Opening balance	1,393	0	11				
Sale of land—Statement I (4) (*b*) (i)—Sale-proceeds of land	1,263	3	4	Statement II (i) (*a*)—Grant I—New Works—Communications	81	8	1
Sale of grass—Statement I (4) (*b*) (ii)—Produce of lands	28	8	0		81	8	1
Sale of dried trees—Statement I (4) (*a*) (iii)—Avenues receipts	5	0	0	Closing balance	2,624	6	2
Sale of earth—Statement I (4) (*b*) (iii)—Sale-proceeds of old materials	16	2	0				
Total ..	2,705	14	3	Total ..	2,705	14	3

109. *New Improvements.*—The following improvements have been effected during the year:—

(1) One corrugated iron latrine has been formed.
(2) One urinal has been newly introduced.
(3) A gymnastic shed has been constructed.
(4) A sluice has been constructed to the black tank to draw off stagnant water.
(5) Twenty-four dust-bins have been purchased.
(6) The old miniature basket rubbish carts have been replaced by wooden skeleton carts lined with sheet iron.

110. In conclusion, I beg to record my thanks for the hearty and willing co-operation of all the councillors in my endeavours to conduct the municipal affairs efficiently and I beg to note specially the considerable interest which M.R.Ry. G. Krishnamma Garu took in the extension of the private scavenging system.

ENCLOSURE.

CONCISE Annual Report on the working of the Municipal Hospital, Guntúr, during the year 1895–96.

The health of the station during the year under review was satisfactory. The town was free from epidemics till the end of December 1895, when chicken-pox and measles were reported to prevail. The type of these eruptive fevers was happily mild, and their duration brief. The epidemics ceased at the end of the year, and no casualties were reported from either of these causes.

The state of the weather was not as oppressive as in the previous year. The temperature, in shade, rose to a maximum of 108° F. as compared with 111° F. in the previous year. The monsoons set in at the end of June, and the rainfall was reported to be, on the whole, seasonable to agricultural operations. There were 31·91 inches of rain registered during the year as against 29·37 of the previous year. With an almost normal rainy season the outturn of crops, as might be expected, was good, and food-grains were consequently sold at rates comparatively cheaper than in the previous year.

I herewith append a tabular statement of cereals used in this station with their respective prices in measures per rupee:—

Kind of grain.	Measures per rupee.	
	1894–95.	1895–96.
Cholum	12·5	13·45
Ragi	14·4	15·29
Wheat	7·75	9·27
Cumbu	11·59	12·51
Rice, second sort	8·35	8·63

2. The number of births and deaths registered during the year is as hereinunder :—

Population, 23,359.	1894–95.		1895–96.	
	Number.	Ratio per mille.	Number.	Ratio per mille.
Births	784	33·56	880	37·67
Deaths	640	27·39	629	26·92

These figures do not include the (48) still-born. From the above statement it will be observed that there is a satisfactory increase in the registration of births but a small decline in the number of deaths. It is, however, hoped that, with the promulgation in last January of the provisions of section 247 of the Municipal Act by beat of tom-tom and by notice boards, there will be in future an improvement in the registration of vital statistics. During the year, twenty-two individuals were reported for failure to register domestic occurrences; of these, eighteen were discharged by the Chairman and four were prosecuted and punished with fines amounting to Rs. 14–8–0.

3. This town, for purposes of conservancy, is divided into six sections, each of which has a permanent staff of sweepers and scavengers working under the immediate supervision of its respective sanitary inspector. The state of roads with regard to repairs and general cleanliness was satisfactory. All the main roads are metalled, but most of the minor lines of communication are in their primitive condition. The town is swept once a day; the street-sweepings are carted to the rubbish depôt and sold with poudrette for agricultural purposes. The sale-proceeds under this head during the year amounted to Rs. 350 as against Rs. 332 of the previous year. The number of dust-bins is sixty-nine, as compared with forty-five of the previous year. These are insufficient for the requirements of the town. During the year all masonry fixtures were replaced by cylindrical, moveable, corrugated-zinc dust-bins; and seven substantial zinc-lined conservancy carts were substituted for the same number of obsolete flimsy bamboo structures. The number of cesspools is the same as in the previous year, viz., thirteen; all these are cleaned out regularly and their contents are removed to the rubbish depôt in air-tight iron carts. Drainage is by natural gravitation. There are a few rudimentary drains in some parts of the town, but all these are ill-constructed and inefficient.

The progress of the private scavenging system has been very satisfactory. At the end of the year there were 1,132 houses under municipal agency as compared with 510 houses in the previous year, showing thus an increase of 622 houses. This is one of the most satisfactory features in the administration of this municipality during the year under review, and it is due to M.R.Ry. P. Venkatakrishnayya Nayudu Garu, Chairman of the Municipal Council.

* * * * *

Water-supply is obtained from several public and private wells scattered over the town; but the main sources of drinking-water are three reservoirs, of which the "Jagganadam Pantulu" reservoir is the most important by reason of its being mostly used by the general public. During the year, the long-standing question of preventing the pollution of this source of water-supply was definitely settled. It has been resolved to lift water from this koneru by means of a hand-power force-pump to a cistern constructed on a high basement, and to distribute it thence by several taps. Plans and estimates of this scheme are in progress.

4. The number of vaccinations performed during the year, with their results, are as shown below:—

Year.	Number of cases vaccinated.	Number of cases successful.	Number of cases unsuccessful.	Number of cases unknown.	Percentage of success.	Cost per case.
						Rs. A. P.
1894–95	1,178	1,155	14	9	98·78	0 5 7
1895–96	1,185	1,123	37	25	96·81	0 4 8

From the above statement it will be observed that, although the number of operations is slightly over that of the previous year, there has been a marked (1·97) fall in the percentage of successful vaccinations. The decrease is due to the greater use of preserved lymph in view to lessen the cost per case. Steps will, however, be taken in future to ensure a better percentage of success. Of the total number of cases vaccinated, 787 were under one year of age as against 753 of the previous year. Vaccination has been compulsory in this municipality for the past seven years. There were 233 individuals served with summons for having failed to vaccinate their children, against 340 of the previous year; of these, 216 submitted to vaccination before proceedings were instituted, while the remaining were prosecuted and punished with fines amounting to Rs. 19–8–0. The cost of animal vaccination during the year was Rs. 62–6–9 as against Rs. 114–1–0 of the previous year, showing thus a net economy of Rs. 51–10–3. The difference in expenditure is due to the inoculation of a smaller number of calves than in the previous year.

5. (*a*) The hospital buildings, as reported last year, are defective with regard to lighting and ventilation and inadequate to meet the demand of applicants for in-door aid.

* * * * *

(*b*) & (*c*) The existing hospital buildings are in a fair state of repair. The roofing of the lying-in hospital, however, needs renewal. Furniture, with the exception of a few minor requirements, is sufficient.

(*d*) The number of in and out patients treated during the year is as hereinunder:—

Year.	In-patients.	Out-patients.	Total in and out patients.
1893–94	401	13,604	14,005
1894–95	419	14,327	14,746
1895–96	606	14,732	15,338

From the above statement it will be observed that the number of in and out patients compares very favourably with the preceding years.

Of the total number of in-patients 13·55 per cent. were residents of this station, 11·07 per cent. were mendicants (byragis) and travellers, and 75·38 per cent. came from the several villages in this district. The daily average of in-door sick was 29·16 as against 23·97 of the

previous year, showing thus an increase of 5·19 in-patients. Among the sick treated as inmates of this hospital there were, during the year, thirty-three Brahmins and twenty-one Komaties, making thus a total of fifty-four caste patients or about 9 per cent. of the total number of in-patient admissions.

For want of special wards the two bath-rooms to the east of the lying-in hospital were improvised as caste wards, and an old shed adjoining these was converted into a caste cook-room. The number of self-dieting patients was 195, as against 95 in the previous year. All caste patients, excepting two who were supplied with raw rations at hospital expense, used their own diets, the kind, quantity and frequency being advised by the medical officer.

The most common diseases in order of their frequency were as follows :—

Diseases of digestive system	2,694
,, of skin	2,087
,, of ear	1,352
Ulcers	1,287
General diseases	1,102
Rheumatic affections	799

(*e*) The number of deaths among in and out patients was forty, as against forty-five in the previous year; of these, twenty-one occurred among the former. Of the casualties among the in-door sick, six were due to patients having been brought to the hospital, or sent by the police, in a moribund condition. The actual causes of deaths among the out-patients could not be ascertained; but among the in-patients they were as follows :—

Coma	2
Asphyxia	6
Asthenia	13

The percentage of deaths among in-patients was 3·47 as against 6·44 in the previous year.

(*f*) The number of surgical operations performed during the year is as follows :—

Year.	Major operations.		Minor operations.	
	Number.	Deaths.	Number.	Deaths.
1894–95	169	5	708	..
1895–96	179	6	914	..

From the above figures it will be observed that the surgical work during the year has been satisfactory.

(*g*) The staff is efficient, but insufficient. The hospital establishment needs reorganization, and I propose to look into this question when framing the budget estimate for the ensuing official year.

(*h*) The number of labour cases conducted by the hospital midwife is fifty-six as against seventy-two in the previous year. This is exceedingly unsatisfactory. A caste midwife will probably show better work, but endeavours to obtain her services have, from year to year, proved unsuccessful.

(*i*) *Nil.*

(*j*) *General Remarks.*—During the year, alterations and improvements in the hospital buildings were effected.

* * * * *

Hospital Staff.—First-class Hospital Assistant B. Chelamayya Nayudu, No. 293, was transferred to Gokavaram (Rajahmundry district), and the vacancy thus caused was filled up by the appointment of First-class Hospital Assistant D. Aiyaswami Pillai, No. 103.

The undersigned held charge of the station during the whole of the year under review, and avails of this opportunity to thank all the missionaries working in the western section of this district, particularly Dr. A. S. Kughler, M.D., Revd. Van-de-Westelaken and Revd. Dr. L. L. Uhl, for having, from time to time, referred to this hospital for treatment some interesting medical and surgical cases.

GUNTUR, (Signed) A. P. FERNANDEZ, L.M.S., Asst. Surgeon,
27th April 1896. *Acting Civil Surgeon.*

N. Dis. No. 2697.

Submitted to the Collector.

2. The year under review was uneventful, and the Chairman's report presents no special features.

3. The three great needs of the municipality are proper water-supply, proper drainage and a new hospital. The general question of water-supply still remains unsolved. A sum of Rs. 500 was set apart in the budget for the investigation of a scheme, but was not utilized. A proposal to improve the purity of the reservoir supply, by pumping the water into a cistern and distributing it by taps, has been approved and estimates are being prepared.

The town drainage scheme still lies dormant; it is certainly of secondary importance to that of water-supply.

Only in the matter of the construction of a new hospital has a distinct advance been made in the year under report. A site has been selected and approved for new buildings on the "Cottage" plan, funds have been guaranteed, and the papers are now with the Sanitary Board for preparation of a design. These steps have been taken none too early, for the present hospital buildings, besides being situated in the most populous part of the town, and badly ventilated and lighted are entirely inadequate for the accommodation of patients.

4. There is a slight increase in receipts under almost all heads, the chief factor in the excess of Rs. 2,827–11–6 over the receipts of the previous year being the sale-proceeds of sites in Arundelpet. There was an increase over the previous year in the expenditure on communications, and I am glad to be able to state that my remark on last year's report no longer holds good. All the main lines of communication have been repaired during the year and are now in a very good state.

5. Considerable pains have been taken by the Chairman to improve the sanitation and cleanliness of the town with good results. A satisfactory feature in the report is the increase under private scavenging fees. This establishment is nearly self-supporting. From the Civil Surgeon's report it appears that a proposal is afoot to make it entirely so. Such a course would not, in my opinion, be politic now when the objections of the towns-people to the scheme have only just been overcome. I observe, however, that the Chairman proposes only to increase cess-pool fees, as the cess-pool service is being worked at a considerable loss. To this there is no objection.

GUNTUR, (Signed) H. W. GILLMAN,
12th June 1896. *Ag. Sub-Collector.*

N. Dis. No. 93-Eng. M.

Submitted to Government in the Local and Municipal Department.

2. The administration of the municipality during the year under report has been satisfactory.

3. The proposal to pump water into a reservoir and distribute it throughout the town is only a temporary expedient. It has nothing to do with the water-supply scheme proper.

(Signed) J. N. ATKINSON,
Collector.
22nd June 1896.

ORDER—No. 1339 M., dated 12th August 1896.

The receipts and charges of the Guntúr Municipality for 1895–96 are compared below with the budget and revised estimates for the year and the actuals of 1894–95 :—

	Actuals, 1894–95.	Budget estimate, 1895–96.	Revised estimate, 1895–96.	Actuals, 1895–96.

2. Thirty-eight meetings were held by the municipal council against 28 in the previous year. The average attendance of the non-official members improved and was fair, but that of the officials declined and was very poor. The Collector should inform the latter that the Government expects them to be more regular in their attendance in future. Three seats were filled by election during the year and all of them were contested, 62 per cent. of the voters concerned attending the poll.

3. *Receipts.*—(1) Owing, apparently, to more careful assessment, the demand of the tax on arts rose from Rs. 4,701 to Rs. 5,040, but it is unsatisfactory to observe that as much as 8 per cent. of this sum was remitted by the council on appeal. The grounds upon which this remission was granted are not stated. The Chairman should now furnish this information. Notwithstanding the remission granted, however, there was an increase of Rs. 102 in the net current demand. The demand of the tax on buildings also showed an advance of Rs. 92 in the circumstances explained in paragraph 10 of the Chairman's report, but that of the tax on lands fell by Rs. 91 owing to the exemption from taxation of certain vacant sites on which houses had been built. The collections under these heads improved and were, on the whole, good. Coercive measures were adopted to a considerably larger extent than in 1894–95 and the execution of warrants was satisfactorily prompt.

(2) There was an increase in the receipts from the taxes on vehicles, animals and carts, the explanation of which is given in paragraphs 14 and 15 of the Chairman's report. The income from tolls and markets also showed an improvement, which is ascribed to brisk competition at the sale of the farms. Owing to numerous sales of the plots of ground set apart for building purposes in Arundelpet, the receipts under this head amounted to Rs. 1,263 against Rs. 90 in the previous year. A sum of Rs. 350 was realized from the sale of town sweepings, against Rs. 332 in 1894–95; but this source of revenue should be capable of considerable further development. The increase in the revenue from fines, which is attributed to greater energy on the part of the police and the municipal executive in detecting nuisance cases and to the infliction of deterrent fines by the Bench Magistrates, is satisfactory.

(3) It is gratifying to observe that the number of houses served by the private scavenging agency rose from 510 to 1,132 and that the receipts from this source from Rs. 1,303 to Rs. 1,371, but the service was again worked at a slight loss to the council. The whole of the demand was not collected in advance as has repeatedly been ordered by Government; if this had been done, the service would have been worked at a profit. It is noted that the Chairman intends to improve the system during the current year, and it is hoped that the results of his endeavours will be as satisfactory as in the past year.

4. *Expenditure*—(1) *Public Works.*—With the exception of an iron latrine and a sluice to the Black tank, which were constructed at a cost of Rs. 1,058 and Rs. 672, respectively, no new work of any importance was undertaken during the year. The outlay on communications amounted to Rs. 5,635, or 43·3 per cent. of the net municipal income from tolls against the minimum of 50 per cent. fixed by Government, but all the main roads of the town are reported to have been in good order at the close of the year. With reference to paragraph 52 of the Chairman's report, the Sanitary Engineer will be requested to state when the investigation of the water-supply scheme will be taken up.

(2) *Education.*—The net expenditure on education was Rs. 5,393, or 16·5 per cent. of the income from taxation. Of this, Rs. 1,379 were spent on secondary, and the remainder on primary, education. The municipal council continued to maintain five primary schools on the salary-result system, two of which were for Muhammadans. The attendance at those institutions remained almost stationary. As in the previous year, two secondary schools were aided by the council with salary grants and twenty-four primary schools with result grants. The number of pupils on the rolls of these schools showed an increase. The results of the lower secondary, departmental and grant examinations in the municipal and aided institutions were good; the allotment for grants to the latter was exceeded by 10·0 per cent, and the total number of boys under instruction rose from 84·3 to 91·7 per cent. of the male population of school-going age—a very satisfactory proportion.

(3) *Medical Relief.*—There was again an increase in the number of patients treated at the municipal hospital, which, as the year was a healthy one, was apparently

The collections under these heads improved and were, on the whole, good. Coercive measures were adopted to a considerably larger extent than in 1894–95 and the execution of warrants was satisfactorily prompt.

(2) There was an increase in the receipts from the taxes on vehicles, animals and carts, the explanation of which is given in paragraphs 14 and 15 of the Chairman's report. The income from tolls and markets also showed an improvement, which is ascribed to brisk competition at the sale of the farms. Owing to numerous sales of the plots of ground set apart for building purposes in Arundelpet, the receipts under this head amounted to Rs. 1,263 against Rs. 90 in the previous year. A sum of Rs. 350 was realized from the sale of town sweepings, against Rs. 332 in 1894–95; but this source of revenue should be capable of considerable further development. The increase in the revenue from fines, which is attributed to greater energy on the part of the police and the municipal executive in detecting nuisance cases and to the infliction of deterrent fines by the Bench Magistrates, is satisfactory.

(3) It is gratifying to observe that the number of houses served by the private scavenging agency rose from 510 to 1,132 and that the receipts from this source from Rs. 1,303 to Rs. 1,371, but the service was again worked at a slight loss to the council. The whole of the demand was not collected in advance as has repeatedly been ordered by Government; if this had been done, the service would have been worked at a profit. It is noted that the Chairman intends to improve the system during the current year, and it is hoped that the results of his endeavours will be as satisfactory as in the past year.

4. *Expenditure*—(1) *Public Works.*—With the exception of an iron latrine and a sluice to the Black tank, which were constructed at a cost of Rs. 1,058 and Rs. 672, respectively, no new work of any importance was undertaken during the year. The outlay on communications amounted to Rs. 5,635, or 43·3 per cent. of the net municipal income from tolls against the minimum of 50 per cent. fixed by Government, but all the main roads of the town are reported to have been in good order at the close of the year. With reference to paragraph 52 of the Chairman's report, the Sanitary Engineer will be requested to state when the investigation of the water-supply scheme will be taken up.

(2) *Education.*—The net expenditure on education was Rs. 5,393, or 16·5 per cent. of the income from taxation. Of this, Rs. 1,379 were spent on secondary, and the remainder on primary, education. The municipal council continued to maintain five primary schools on the salary-result system, two of which were for Muhammadans. The attendance at these institutions remained almost stationary. As in the previous year, two secondary schools were aided by the council with salary grants and twenty-four primary schools with result grants. The number of pupils on the rolls of these schools showed an increase. The results of the lower secondary, departmental and grant examinations in the municipal and aided institutions were good; the allotment for grants to the latter was exceeded by 10·0 per cent. and the total number of boys under instruction rose from 84·3 to 91·7 per cent. of the male population of school-going age—a very satisfactory proportion.

(3) *Medical Relief.*—There was again an increase in the number of patients treated at the municipal hospital, which, as the year was a healthy one, was apparently

due to the growing popularity of the institution. Only 56 cases of labour were attended by the midwife against 72 in 1894–95. This decline is, however, explained in paragraph 72 of the Chairman's report.

(4) *Vaccination and Vital Statistics.*—The reported number of persons vaccinated during the year was almost the same as in the previous year, but the quality of the work deteriorated, only 93·6 per cent. of the cases having been successful against 97·3 in 1894–95. This is attributed to the use of preserved lymph. The number of children under one year successfully vaccinated also fell from 753 to 742 against 880 births registered during the year.

There was an improvement in the number of births registered, but that of deaths declined. The returns in both cases cannot be considered complete as the rates were much below the normal. The Government is, however, glad to note that greater attention is being devoted to this matter as it is of the utmost importance to ensure accurate registration returns. The course adopted for making the law as to registration better known, referred to in paragraph 80 of the report, is an excellent one and might well be followed by other municipalities, but it should be combined with prompt and unremitting prosecution of those neglecting the warning given.

As regards the remark made in the concluding portion of paragraph 78, it is observed that in any municipality the births registered should, except under abnormal conditions, such as the outbreak of an epidemic or a particularly unhealthy season, always exceed the deaths.

(5) *Sanitation.*—On conservancy a sum of Rs. 10,810, or 96·3 per cent. of the sanctioned allotment and 24·3 per cent. of the current receipts, was spent. The Government is glad to find, from paragraphs 88 and 109 of the Chairman's report, paragraph 5 of the Sub-Collector's endorsement and paragraph 12 of the Sanitary Commissioner's inspection notes recorded in G.O., No. 56 M., dated 11th January 1896, that the sanitary condition of the town has received much attention. The council, however, should see that all the defects pointed out by Dr. King in his notes, and by the District Medical Officer in paragraph 3 of his report, are attended to as far as funds permit. The due provision of properly constructed latrines sufficient to meet the requirements of the population should have particular attention.

5. *General Remarks.*—The year closed with a balance of Rs. 8,810, or 19·8 per cent. of the current receipts. The statements in paragraphs 7, 40 and 79 of the Chairman's report were unnecessary and should be omitted in future. The medical report is very lengthy, and contains much unnecessary matter which has been omitted in printing. The statement appended to paragraph 1, that appearing at the close of clause (*d*), paragraph 5, and that in clause (*e*) of the same paragraph, should in future be omitted.

The administration of the municipality during the year under review continued to be efficient and satisfactory, and shows that the council and the Chairman are taking a praiseworthy interest in the affairs committed to their charge. The Government notes with pleasure the testimony borne by the Chairman to the assistance rendered by the councillors referred to in paragraph 110 of his report particularly M.R.Ry. G. Krishnamma Garu.
