GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

No. 1380-S.

Remarks by the Sanitary Commissioner, Madras, on the recorded vital statistics in the districts and municipalities of the Madras Presidency for the month of March 1896.

DISTRICTS.

Registration of vital statistics for the month under review showed a total of 66,265 births and 48,948 deaths, yielding annual ratios of 24·9 and 18·3 per mille, respectively, of the census population of 1891, and 21·9 and 16·2 per mille of the estimated population. Of the children born, 34,060 were boys and 32,205 girls, and of those who died, 25,543 were males and 23,405 females, or in other words 105·8 boys were born for every 100 girls, and 109·1 males died for every 100 females.

2. In the annexed statement are compared the deaths registered under the several causes with those of the preceding month and the corresponding month of the previous year :—

—	Deaths from							Ratio per mille of population per annum.						
	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhœa.	Injuries.	All other causes.	Total.	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhœa.	Injuries.	All other causes.	Total.
March 1895 ..	2,188	469	21,752	1,491	861	23,437	50,198	0·8	0·2	7·7	0·5	0·3	8·3	17·8
February 1896 ..	372	842	20,492	1,443	802	24,312	48,263	0·1	0·3	7·6	0·5	0·3	9·0	17·8
March " ..	269	1,118	22,070	1,398	932	23,161	48,948	0·1	0·4	8·3	0·5	0·3	8·7	18·3

3. The deaths from cholera aggregated 269, against 372 in February last and 2,188 in March 1895. These were returned from seven districts. All other districts in the Presidency enjoyed complete immunity. Small-pox proved fatal in 1,118 cases against 842 in the preceding month. It was prevalent in all the districts, but the death-rate was below one per mille in all but Kurnool (4·5), Anantapur (1·7), and North Arcot (1·5). Twenty-two thousand and seventy persons were reported to have died of fevers, against 20,492 in February last. The death-rate was large in Cuddapah (20·0), Kurnool (19·2), Ganjám (18·9), Vizagapatam (15·2), and Nilgiris (14·0). One thousand three hundred and ninety-eight persons fell victims to dysentery and diarrhœa, against 1,443 in the preceding month,—Madras, as usual, taking the lead with a death-rate of 3·4 per mille.

4. The accompanying map of the Madras Presidency shows the places where deaths from cholera were recorded. They are indicated by red dots.

MUNICIPALITIES.

5. The births registered in municipalities aggregated 5,567 births (2,882 boys and 2,685 girls) and the deaths 4,932 (2,542 males and 2,390 females). The annual birth and death rates according to the census population of 1891 were 31·4 and 27·8

per mille, respectively, while those according to the estimated population were 2 and 26·1 per mille. The mortality among infants under one year of age was 200·0 per mille per annum of the population of that age in that month, against 207·2 per mille in February last.

6. The accompanying statement compares the registered mortality of the month under the several causes with those of the previous month and the corresponding month of the previous year :—

—	Deaths from							Ratio per mille of population per annum.						
	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhœa.	Injuries.	All other causes.	Total.	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhœa.	Injuries.	All other causes.	Total.
March 1895 ..	155	28	1,379	430	59	2,658	4,709	0·9	0·2	7·9	2·4	0·3	15·2	26·9
February 1896 ..	81	52	1,348	439	67	2,713	4,700	0·4	0·3	7·6	2·5	0·4	15·3	26·5
March ,, ..	95	109	1,547	486	54	2,641	4,932	0·5	0·6	8·7	2·8	0·3	14·9	27·8

7. Deaths from cholera were reported from six municipalities, and they aggregated 95 against 81 in February last. All the other municipal towns in the Presidency were completely free from it. The death-rate was largest in Cochin (30·0). Nineteen towns reported 109 deaths from small-pox,—Vellore returning the highest death-rate of 16·0 per mille. Fevers proved fatal in 1,547 cases against 1,348 in February 1896. The death-rate was largest in Kurnool (28·1), Coonoor (25·8), Cuddapah (18·6), Vániyambádi (16·7), and Anantapur (15·4). It was also large in ten other towns. Dysentery and diarrhœa caused 486 deaths against 439 in the preceding month. The death-rate was large in eight towns, ranging from 4·3 in Tuticorin to 7·7 in Vizagapatam.

Madras,
22nd July 1896.

G.O., No. 930 W., dated 20th April 1885.

Read—the following paper :—

From the Superintending Engineer, IV Circle, dated 25th March 1885, No. 138 E.W.

Order—No. 930 W., dated 20th April 1885.

The above correspondence refers to a claim for house-rent preferred by the Executive Engineer against Mr. Brodie, Head Assistant Collector, Malabar.

2. It would appear that Mr. Brodie vacated his bungalow at Tellicherry on the 12th October 1884 on transfer to Calicut to take charge of the office of the Collector. He gave no notice of having vacated, and left some furniture (a few boxes and some crockery) in the house, in charge of three servants. He returned to Tellicherry on the 24th November 1884, and re-occupied the building. Mr. Brodie now demurs to pay rent for the period of his absence.

3. It will be pointed out to Mr. Brodie that the same rule governs the contract in the case of a Government building as would be applied in that of a house rented from a private individual.

4. In such case the liability to pay rent would certainly continue until the lessee gave notice of his having vacated the house. In G.O., No. 749 W., dated 18th September 1877, communicated to all departments, it is distinctly laid down that such notice must be given in the case of all Government buildings.

5. In these circumstances, Mr. Brodie's application to have the rent of the Sub-Collector's bungalow at Tellicherry remitted during the time he was away at Calicut cannot be acceded to.

(True Extract.)

(Signed) J. SHAW-STEWART, Colonel, R.E.,
Secretary to Govt., P.W.D.

G.O., No. 2935 W., dated 22nd October 1892.

Read—the following paper :—

Office-note from the Examiner, Public Works Accounts, dated Madras, 13th October 1892, No. 242 A.

I beg to forward, herewith, for favour of orders of Government, letter from the Executive Engineer, Coimbatore Division, No. 3418, dated 19th September 1892, inquiring whether the rule in paragraph 1045 of Madras Code (to which there is no corresponding rule in Government of India Code) may still be acted upon.

2. The rule in the Madras Code is based upon G.O., No. 749 W., dated 18th September 1877, and G.O., No. 930 W. of 20th April 1885. In my opinion the ordinary law between landlord and tenant should be observed in all cases and formal notice should be given in every case. Gazette notifications will not be sufficient.

ENCLOSURE.

From J. C. LARMINIE, Esq., Executive Engineer, Coimbatore Division, to the Examiner, Public Works Accounts, dated 19th September 1892, No. 3418.

I have the honour to bring to your notice that there appears to be no paragraph in the India Code corresponding to Madras Code paragraph 1045, according to which an officer occupying public quarters is liable to pay rent till notice is given of vacating the building or re-occupation of the quarters. In the absence of ruling in the India Code on the subject, I wish to know whether the rule in the Madras Code may still be acted upon or the gazetted notification transferring the officer from the district construed as sufficient authority for discontinuing to charge rent.

Order—No. 2935 W., dated 22nd October 1892.

The Madras rule, which is based on the orders quoted by the Examiner, will continue in force.

(True Extract.)

(Signed) G. T. WALCH,
Ag. Secy. to Govt., P.W.D.

READ—also the following papers :—

From the Executive Engineer, Tinnevelly Division, to the Superintending Engineer, VI Circle, dated 13th March 1896, No. 1027.

I have the honour to bring to your notice that much trouble is caused in my accounts by the non-punctual recovery by the Treasury Deputy Collector of dues from civil officers occupying public buildings.

2. In my latest return of public buildings rented no less than two items out of four items have been outstanding for several months as under :—

—	—	Period for which rent is due.	Amount due,		
			RS.	A.	P.
1. Sub-Collector's bungalow at Tuticorin.	J. A. Cumming, Esq., Acting Sub-Collector	1st to 3rd November 1895 at Rs. 80 per mensem.	8	0	0
2. Sergeant's quarters at Palamcottah.	B. C. Leggatt, Esq., Assistant Superintendent of Police.	1st to 8th December 1895.	5	2	7

3. For the sum outstanding from Mr. Cumming, the Treasury Deputy Collector explains that he is now on furlough. This item will be appearing month after month as objectionable in my accounts probably till Mr. Cumming's return to duty.

4. As regards the sum due from Mr. Leggatt, the Treasury Deputy Collector states "that the Assistant Superintendent of Police has been requested to pay the amount." Mr. Leggatt has since been transferred to Tanjore, and I expect it will be many months more before the objection is removed.

5. I have the honour therefore to draw your attention to the procedure in vogue for recovery of rent from officers and subordinates of this department occupying public buildings, viz., to recover at the time of paying salary and to suggest that there seems no reason why the same course should not be adopted in the case of officers of other departments.

From the Executive Engineer, Tinnevelly Division, to the Superintending Engineer, VI Circle, dated 4th April 1896, No. 1466.

In reply to your No. 313 T. N., dated 23rd March 1896, I have the honour to inform you that the procedure adopted is in accordance with that laid down in Code, Vol. II, Chapter II, paragraphs 54 and 55. The contention is that if the rent is recoverable from the civil officers by the Treasury Deputy Collector from their pay bills as per procedure laid down for Public Works Department officers—*vide* Code, Vol. II, Chapter II, paragraph 55-A, the inconvenience complained of in my No. 1027, dated 13th March 1896, would, I think, be averted.

2. The vacating of the buildings is not generally communicated by the occupants to the Executive Engineer as enjoined in G.O., No. 2935 W., dated 22nd October 1892. The officers are either ignorant of the rule or intentionally omit to do so.

3. I am unable to say if the Deputy Collector is informed then and there by the occupants of their vacating the buildings, but it seems strange, if he were so informed, why he should fail to recover the rent.

4. In the two cases under reference the Treasury Deputy Collector was informed of the amount to be recovered on 11th January 1896 through Public Works Department Form 44 B.

No. 403 T. W.

Copy, submitted with copy of previous letter * from the Executive Engineer, Tinnevelly, to the Chief Engineer, with a request that the Revenue Department may be addressed regarding the delays which sometimes occur in the recovery of rent for official residences. These delays are chiefly in cases when officers are transferred. It would perhaps remove the difficulty if, in such cases, the officer who pays the salaries or gives last pay certificates were to assume, in the absence of information to the contrary, that the transferred officer was in occupation up to the date of his relief.

* No. 1027, 13th March 1896.

(Signed) W. HUGHES,
Superintending Engineer, VI Circle.

15th April 1896.

No. 82 D.

Transferred to the Financial Department for issue of the necessary orders.

(Signed) D. McNEIL CAMPBELL, Colonel, R.E.,
Joint Secy. to Govt., P.W.D.

From F. C. HARRISON, Esq., Officiating Accountant-General to the Government of Madras, to the Chief Secretary to Government, dated Fort. St. George, 13th June 1896, No. 272 I.B.D.

With reference to your memorandum, No. 1070, dated the 22nd May 1896, I have the honour to report that the procedure laid down in paragraph 55 A of Vol. II, Chapter II of the Public Works Department Code, is observed in the Civil department as will be seen from a circular issued by this office in 1887, copy enclosed for information.

The papers received with the memorandum quoted above are herewith returned.

ENCLOSURES.

MEMORANDUM from H. F. CLOGSTOUN, Esq., Accountant-General, to all Treasury Officers, dated Fort St. George, 19th March 1887, No. 8.

At the instance of the Examiner of Public Works Accounts, the undersigned has the honour to request that the amounts due from officers in the Civil department, other than the Public Works Department, on account of rent of public buildings, may be recovered from the salary bills of such officers when they are presented at treasuries for payment.

2. Statements in duplicate in the form enclosed will be forwarded to treasury officers monthly by Executive Engineers showing sums due for rent by civil officers, and one copy of the statement should be returned to the Executive Engineer showing the recoveries effected.

NOTES.

REFERENCE TO MADRAS P.W.D. CODE,
PARA. 1230B.

1. The Executive Engineer will prepare, at the close of each month, statements in duplicate in this form and forward them to the treasury officer concerned in time to enable the necessary recoveries to be effected on the audit of pay bills.

2. The buildings will be entered in column 2 in the order given in form No. M41.

3. The treasury officer will, on recovery of the amounts due, fill in columns 9 and 10, and return one copy of the statement duly signed to the Executive Engineer in time to enable him to prepare the next month's statement. In cases where the treasury officer has failed to effect recovery of the rent due, he should record in the column set apart for that purpose the reasons for the non-recovery.

4. The Executive Engineer, on receipt of the statement from the treasury officer, will transmit it to the Examiner for adjustment in his auxiliary accounts.

P.W.D. Form,

Completed and returned to the Executive Engineer.

Dated 188 . Executive Engineer.

Dated 188 . Treasury officer.

Order—No. 413, Financial, dated 8th July 1896.

The Accountant-General will be requested to draw the attention of treasury officers to his office circular of 1887, the procedure laid down in which should be strictly enforced.

2. In accordance with the ruling in the orders read again above, officers occupying public buildings are liable for the rent of the same until notice is given of vacating or until re-occupation. In the case of transfers, in which it is reported that delays in the recovery of rent chiefly occur, treasury officers will assume, in the absence of information to the contrary, that the transferred officer was in occupation up to the date of his relief.

3. As regards the cases reported in the foregoing correspondence, the amount due by Mr. J. A. Cumming will be recovered immediately on his return from furlough, and the Inspector-General of Police will report whether Mr. Leggatt has paid the amount due by him and, if so, when.

SIR,

With reference to paragraph 3 (9) of the G.O No 1788 L, dated 26th September 1895, and to the reminder memorandum No 819, dated 13th July 1896, I have the honour to state that the delay in the issue of the certifying memoranda noticed in paragraph 15 of the Administration report was due to the following unforeseen circumstances.

(1) the absence on sick leave from the 11th March 1895 of M.R.Ry. Krishnamurti Pantulu, Sub Assistant Inspector of the Ellore Range—the range in which there was the largest amount of lapses.

(2) the examination of schools in the Rajahmundry Taluk in the latter part of March.

(3) the sudden departure of the Sub-Assistant's clerk without departmental permission, leaving the records of his office in the most confused state.

(4) the absence of M.R.Ry. Krishnamachari, Acting Assistant Inspector, in the Rampa Agency from the 25th February to 16th March 1895, which caused some delay in the countersigning and the despatching of certifying memoranda.

2. I very much regret the delay caused by the above circumstances. I have, this year, issued very stringent orders that all grant examination should be over by the

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From L. C. MILLER, Esq., Acting Collector of South Canara, to the Sanitary Commissioner for Madras, dated Mangalore, 11th June 1896, Dis. No. 665-Eng.

With reference to your letter, dated 10th April last, No. 765-S., I have the honour to forward herewith a copy of the report drawn up by the civil apothecary in charge of the local fund hospital at Udipi, who was present during the celebration of the last Pariyaya festival at Udipi.

2. The enclosure of your letter is herewith returned.

ENCLOSURE.

REPORT on the Pariyaya Festival held at Udipi in January 1896.

District.	Name of reporter.	Name of festival and where held.	Date of festival.	Number assembled.	Accommodation and sanitary arrangements made.	Water-supply.	Conservancy.	Epidemics.	General health.	Recommendations.	Remarks.
South Canara.	Civil Apothecary, B. Raghavendra Rao.	Biennial Pariyaya festival held at Udipi.	7th to 16th January 1896.	About 30,000 people.	Temporary lights were put up at convenient intervals in the town. Police guards were kept near the tank and other places of public resort to prevent the people from defiling them. As the houses in the town afforded sufficient accommodation, no special arrangements were made under this heading.	Was derived mainly from wells—public and private—and was wholesome and sufficient. No special arrangements, therefore, were necessary under this heading also.	For want of suitable sites, only three latrines and one urinal were constructed, although money was allotted for more, and as all the three latrines had to be put up in one field, the people at a distance made free use of the streets and lanes for purposes of nature. Temporary dust-bins were constructed for the storage of rubbish, and a special conservancy establishment was maintained to keep the streets, &c., clean.	None.	Good.	The taluk board has already at my suggestion taken steps to acquire suitable sites for locating latrines. I have therefore no recommendations to make.	Granting there was no space in the fields, there is no reason why latrines should not have been formed in the streets. There is nothing insanitary in correctly-constructed and correctly-kept latrines; but it *is* highly insanitary to allow the streets to be used hither and thither for the purposes of nature. The whole arrangements as to sanitation were faulty in the extreme, as it does not appear that, although wells were supposed to be "protected" by the police, men were specially detailed for the purpose. The District Sanitary Officer should be required to visit the spot, and furnish the President with a complete statement of requirements previous to the next festival. (Signed) W. G. ~~Sir~~

Sir

One Vijiyaraghavacharry of Tiruvallur and one Manikka Mudaly of Pulicat in the Ponneri Taluk encroached on the public streets of their respective unions of Tiruvallur and Pulicat by erecting brick foundation and a thatched shed respectively and the same having been brought to my predecessor's notice he issued notices to them under section 98 of the Local Boards Act V of 1884 and ordered them to remove the encroachment. They instead of complying with notices filed suits in the District Munsiff's Court at Tiru-vallur. On receipt of summons from the Court the matter was placed for the consideration of the Taluk Board who after goin
throu

through all records of the cases sanctioned the defence of the 2 suits the former of which was disposed of in part favourable to the Taluk Board whilst in the latter the decree of the Court declares plaintiff's title to the plaint-property and directs the Board to pay 3/4ths of the plaintiff's cost which amounts to Rs 69-6-7. This as well as Rs 106-1-9 which was incurred for the defence of the above 2 suits has now to be paid and the Taluk Board which by its resolution No 21 dated 4th Instant (copy enclosed) authorized the payment from the Reserve.

2. I have the honor therefore to request you will be good enough to move the Government to accord its sanction for the expenditure of Rs 175-8-4 incurred in the defence of the above two suits.

Before the taluq Head Accountant
T. S. Gurusami Pillai of Saidapet,

Statement given by Ramasawmi Asari
darmakarta of Kaliamman covil
at Muthialpet, living at Solai,
Madras.

In the feeder road leading to Tiruvottiyur railway station, dry S. No 257 measuring 12 cents assessed at Annas 4 belonging to the said devastanam, has been included. I have no objection for the land being taken up for the purpose. For the land and the trees standing thereon I request that due compensation may be paid.

1/1977-756

AE/167

Before Balakristnama Raja Revenue Inspector Korattur Firka.

Statement given by Mari Lamoni Gramani pattadar No. 269 of Tiruvotthiyur.

I have no objection to part with my puttah land measuring Acres 0-33 in dry S. No. 260 required for the buttai leading to Railway station at Tiruvotthiyur from the basin. I shall receive the compensation due for the land. 28 Cocoa-nut trees standing on the land are tapped and toddy is being drawn. There is time for it till 30. September after which they can be cut. If they are to be cut away before that time, I request that the abkari teerwa may be paid.

12 June /96 Madras, Royapuram.

(Sgnd) Mari Lamany Gramani

(Sgnd) Balakistnama Raju
Revenue Inspector.

Before Balakristnama Raja Revenue Inspector Korattur Firka.

Statement given by Mari Lamoni Gramani pattadar No. 269 of Tiruvotthiyur.

I have no objection to part with my puttah land measuring Acres 0-33 in dry S. No. 260 required for the buttai leading to Railway station at Tiruvotthiyur from the basin. I shall receive the compensation due for the land. 28 Cocoa-nut trees standing on the land are tapped and toddy is being drawn. There is time for it till 30. September after which they can be cut. If they are to be cut away before that time, I request that the abkari teerwa may be paid.

12 June /96 Madras, Royapuram.

(Sgnd) Mari Lamany Gramani

(Sgnd) Balakistnama Raju
Revenue Inspector.

GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

Read—again the following papers :—

G.O., Nos. 511, 512, Public, dated 13th July 1894.

Abstract.—Addressing the Government of India on the proposal to create an Indian Chemical department for the whole of India.

G.O., No. 662, Public, dated 3rd August 1895.

Read—the following letter from Surgeon-Major-General C. SIBTHORPE, F.R.C.P.I., Surgeon-General with the Government of Madras, to the Chief Secretary to Government (through the Director of Public Instruction), dated Ootacamund, 13th June 1895, No. Tour—278 :—

I have the honour to forward, for the information of Government, the accompanying report of a discussion at a meeting of the South India Branch British Medical Association on the 4th April last. The necessity of the appointment of a trained Bacteriologist and of the establishment of Bacteriological Laboratory in Southern India are very fully dealt with at length in these papers.

2. There are, however, some points which I wish to emphasise—

(*a*) That the Medical College at Madras, of which we are all justly proud and which Government has always dealt liberally with, is now seriously behind the time in its want of ability to impart instruction on the subject of Bacteriology to its students.

(*b*) A trained Bacteriologist would by his work elucidate many of the pressing problems of disease among men and animals and so save the Government both in lives and money.

(*c*) The need of a Bacteriologist is felt in the Veterinary Medical Department.

(*d*) Such an official would control a laboratory at which young officers of the Medical and Veterinary services who had a taste for that class of work would be able to work and keep up or improve their knowledge thus fitting them for independent investigations into the cause of actual outbreak of disease.

(*e*) The appointment of a Bacteriologist and the establishment of a properly equipped laboratory would, I am convinced, in a few years save Government more money that the whole scheme would cost.

(*f*) If such an official was sanctioned his duties should be confined to the study of Bacteriology and the teaching of it in the Medical College. He should be placed in the same position as regards Government as the Chemical Examiner now holds as regards his ordinary work and under the Director of Public Instruction as regards his duties in the Educational Department.

(*g*) Several alternatives present themselves in the selection of such an official—

(1) He might be selected by the Right Honourable the Secretary of State on the advice of those University or Collegiate authorities in Great Britain in which Bacteriological schools have been established under the same conditions of service as Professor Bourne of the Presidency College. This would be the quickest but probably the most expensive way of securing his services.

(2) The better plan would be for the Right Honourable the Secretary of State to sanction such an appointment in List I on the cadre of the Indian Medical Service, to select an officer on the advice of the above-mentioned authorities, give him a

commission in the Indian Medical Service, grant him pay commencing at Rs. 500 a month and rising by increments to Rs. 1,000 a month, as no doubt his work would be more valuable as his experience matured. Such an appointment would add to the prestige of the Indian Medical Service, would increase the *esprit de corps* and foster a spirit of scientific investigation amongst the junior members of the service, as they would work with the hope of qualifying for either the officiating or permanent appointment. If such an officer was appointed, he should be allowed a longer course of study at Netley than the usual four months one, and should be permitted to spend three or four months in some selected laboratory either in England or on the continent before coming out to India. On arrival in India he should be sent to one of the established laboratories for a short time and should be exempted from the operation of the rule which requires all medical officers of the Indian Medical Service to complete two years' military duty before they are available for duties in the Civil Department. He should be permitted to expend a sum not exceeding £100 in Europe on the equipment necessary for his laboratory and should be granted an extra allowance of baggage to bring it out. On arrival in Madras he should be provided with a room in the Medical College where he should work during the College Winter (cold weather) session; during the other six months of the year, he should be permitted to move his laboratory to one of the hill stations (preferably Kóttagiri or Ootacamund).

3. I am convinced that, if the proposed plan is carried out, it would do much to increase the efficiency of the sanitary work in the Presidency by raising the standard of knowledge both amongst officers and subordinates.

No. 6711.

Submittted to Government with most cordial support.

22nd *June* 1895.

(Signed) D. DUNCAN,
Director of Public Instruction.

Order—No. 662, Public, dated 3rd August 1895.

The appointment of a Bacteriologist is no doubt desirable, but there are already before Government so many proposals relating to medical requirements which involve extra expenditure, that this matter must lie over for the present on financial grounds.

(True Extract.)

To the Surgeon-General.

(Signed) J. F. PRICE,
Chief Secretary.

G.O., No. 990, Public, dated 2nd December 1895.

Abstract.—Communicating to the Surgeon-General and to the Sanitary Commissioner, for favour of joint remarks, resolutions of the Government of India regarding a scheme for securing a trained reserve of Chemical Examiners and for establishing an Imperial Bacteriological laboratory.

Read—also the following papers:—

From L. M. THORNTON, Esq., Deputy Secretary to the Government of India, Home Department (Sanitary), to the Chief Secretary to the Government of Madras, dated Simla, the 31st October 1895, No. 12-Sany.—340.

With reference to the correspondence ending with your letter, No. 512, Public, dated the 13th July 1894, I am directed to forward a copy of a resolution which has been issued by the Home Department of the Government of India relative to the establishment of a Bacteriological Laboratory in India for the training of young Medical officers in that science, and also as Chemical Examiners at a Central Laboratory at Calcutta under the Chemical Examiner of Bengal.

2. It will be observed that the proposal, circulated with this department's letter, Nos. 331-334, dated 24th May 1894, to increase the pay of Chemical Analysers with a view to attracting the best men in the service has been for the present abandoned, and I am to explain that this is due to the relatively paramount importance which the Government of India attach to the establishment, as soon as practicable, of the proposed Bacteriological Laboratory at Agra, and to the anxiety felt by the Governor-General in Council to make trial, before incurring increased expenditure by enhancing the salaries of Chemical Analysers, of a system by which a junior Indian Medical Service officer will be attached for training to the Calcutta Laboratory and will be available, after training for employment in any of the Laboratories at Madras, Bombay, Lahore or Calcutta in which his services may be required.

3. It is also proposed in paragraph 9 of the resolution eventually to attach young Medical officers for a six months' course of training to the Chemical Analyst's office or the Bacteriological Laboratory, and I am to request that, with the permission of His Excellency the Governor in Council, the Government of India may be informed whether arrangements can be made to give effect to this proposal as regards Medical officers who are serving in the Madras Presidency.

No. 2997.

Referred to the Surgeon-General for report with advertence to G.O., No. 990, Public, dated 2nd December 1895.

Fort St. George,
14*th December* 1895.

(Signed) J. F. PRICE,
Chief Secretary.

From Surgeon-Major-General C. SIBTHORPE, F.R.C.P.I., Surgeon-General with the Government of Madras, to the Chief Secretary to Government, dated Camp, Cocanada, 31st December 1895, No. Tour 4—1.

With reference to your endorsement, No. 2997, dated 14th December 1895, herewith returned, with the attached correspondence, regarding the appointment of a junior officer of the Indian Medical Service to the Calcutta Laboratory for training in the duties of a Chemical Examiner, I have the honour to inform you that, owing to the short-handed state of the establishment in Madras, no such officer is available at present, nor is there likely to be one until the arrival of the ten new officers about November 1896.

2. If the rule as now proposed is sanctioned for India as was done in Madras in 1884—*vide* paragraph 3 of my letter, No. Tour—62, dated 26th June 1894, on page 4 of G.O., No. 511, Public, dated 13th July 1894—and an officer was available in Madras, I consider he could be given quite as effectual a training in the laboratory of the Chemical Examiner in the Madras Medical College as he would get in Calcutta, with the advantage that he would not have to live in the more expensive city of Calcutta, and that Government would be saved considerable travelling expenses.

Letter to the Government of India, Home Department, No. 106, dated 22nd January 1896.

From Surgeon-Major-General C. SIBTHORPE, F.R.C.P.I., Surgeon-General with the Government of Madras, to the Chief Secretary to Government, dated Madras, 6th February 1896, No. 83.

With reference to G.O., No. 990, Public, dated the 2nd December 1895, regarding bacteriological research, I fully concur in the remarks of the Government of India on this subject and consider the proposals will meet the present requirements of the part of India alluded to without considering the requirements of the medical schools.

2. In Madras, however, we want a Bacteriologist for the college in whose laboratory future Health Officers could be trained; my views on this subject are fully before Government in the correspondence dealt with in G.O., No. 662, Public, dated the 3rd August 1895.

3. I have consulted the Sanitary Commissioner, and now attach a true copy of a memorandum he has furnished me with on the subject.

In the correspondence ending with my Tour 4–1, dated 31st December 1895, the Government of India have apparently decided that the Chemical Examiners to Government should be commissioned medical officers on what appears to me to be very sufficient grounds. The principal medico-legal work of these officers is steadily increasing and I cannot concur with Surgeon-Lieutenant-Colonel King that it would be desirable to place this work in the hands of a general chemist such as he describes. The importance of having such chemists is well recognised, and in my opinion, if they existed, they would have their time fully occupied without the medico-legal work.

I cannot either concur with the idea of Surgeon-Lieutenant-Colonel King that the appointment of an officer who had at least five years' experience as District Medical and Sanitary Officer to the Sanitary Department attached to a Vaccine institute, who should take charge of the Hygiene laboratory in the Medical College, lecture for six months in the year to the students on Hygiene and instruct the class of Sanitary Inspectors, would at all meet the requirements of the Educational Department as a Bacteriologist; nor would he have any time at his disposal for original work. If such an appointment was made, other proposals would be necessary to carry on the work now done by the Professor of Hygiene as Second Physician in the General Hospital.

Enclosure.

Memorandum as to provision for Bacteriology and Chemical Research in connection with sanitation, with reference to Government of Madras Order, No. 990, Public, dated 2nd December 1895, by Surgeon-Lieutenant-Colonel W. G. KING, Sanitary Commissioner, Madras, dated 28th January 1896.

The opening of an Imperial Bacteriological institute as proposed by the Government of India is a matter of great sanitary import, as to the necessity for which I fully concur, although the suggestion to obtain this at the cost of abolishing a Deputy Sanitary Commissioner will, I trust, be reconsidered. I understand that the Sanitary departments of Local Governments will be permitted to obtain decisions on Bacteriological matters coming within their official work, by making references, or sending specimens for examination; and, secondly, that it shall form a school for young commissioned medical officers to be trained as Chemical Examiners and Bacteriologists for duty with Local Governments.

2. The idea of making a separate branch of the Indian Medical Service from which Chemical Examiners and Bacteriologists can be recruited is excellent; but I think it does not go far enough. If sanitation is to progress, the workers ought not to be hampered by being required to investigate medico-legal questions. This is recognised by the Government of India as to officers selected for bacteriological work; but I consider it applies equally to Chemical Examiners, not with reference to incompatibility, but with regard to quantity and character of work expected.

3. As a first step, I would arrange that, on vacating their appointments in ordinary course, the present class of Chemical Examiners should no longer be continued. I suggest the appointment of professional chemists. The duty expected of these men should be two-fold: firstly, the conduct of medico-legal examinations; secondly, the conduct of investigations into the chemistry of economic products. Bearing in mind the immense stride in trade that Germany has been able to effect by the system adopted by manufacturers having on their premises not one or two, but at times half-a-dozen expert chemists, I consider that the Government of India would find that, if properly administered and encouraged, such men would, by their investigations in various matters affecting the natural products, agriculture, and manufactures of the country, amply repay every rupee spent on them. The head of this department would naturally be the Economic Reporter to the Government of India. Such men should be recruited directly from Great Britain, and should not be foreigners. The officers might be known simply as Government analyst, and should be Professors of Chemistry in Universities. This would aid economy and be of advantage to students.

4. There would thus remain as surplus in the Indian Medical Service the number of officers hitherto absorbed as Chemical Examiners; an equivalent number of junior medical officers having not less than five years' experience as district Sanitary officers should then be attached to the Sanitary Department as Assistant Sanitary Commissioners. They should be trained, as contemplated by the Government of India in the Imperial Bacteriological Institute, in Bacteriology and

Chemistry, having special reference to sanitary duties. In my opinion, such men should be absolutely at the disposal of the Sanitary departments, and in the case of Madras, would be best attached to a Vaccine institute intended for supply of animal lymph throughout the Presidency, where exceptionally good facilities for original work could be afforded; but as economy must be regarded, I would advise his being permitted to lecture upon Hygiene in the Medical College and to be responsible for Hygiene course, practical and theoretical, for the suggested new class of sanitary subordinates. The existing Bacteriological and Hygiene laboratory in the Medical College would, with few improvements, fulfil all that is requisite. This arrangement would meet the plea the Surgeon-General makes as to the necessity for provision for the Educational Department, whilst it would sufficiently well meet the requirements of the Sanitary department, holding in mind the fact that for the more serious branches of research the Imperial Institute would be available, and that the work expected of the local Bacteriologist would chiefly consist in the aiding of sanitary precautions by the early identification of well-known microbes, not the searching after the unknown.

From Surgeon-Lieutenant-Colonel W. G. KING, M.B., C.M., D.P.H., Sanitary Commissioner for Madras, to the Chief Secretary to Government, dated Bellary, 10th February 1896, No. 253 S.

With reference to letter No. 83, dated 6th February 1896, to you from the Surgeon-General with the Government of Madras, I have the honour to represent that from the context of the last paragraph of that letter, it is apparent to me that the Surgeon-General has misinterpreted my meaning. This being so, it follows that my memorandum expresses my intentions in a manner open to doubt, which it is desirable should be guarded against on perusal by Government.

2. The Surgeon-General has understood that I would wish the proposed Bacteriologist to perform work that is obviously impossible. He has, however, arrived at this conclusion from not giving the value I had anticipated would be allowed to the following statement: "In my opinion such men should be absolutely at the disposal of the Sanitary departments, and in the case of Madras, would best be attached to a Vaccine institute intended for supply of animal lymph throughout the Presidency, where exceptionally good facilities for original work could be afforded . . ." By this I meant it to be understood that what I considered Madras *should have* was a Bacteriologist attached to the Sanitary Department engaged on original work at a Central Vaccine Institute intended for the cultivation and distribution of animal lymph throughout the Presidency. This would be necessarily in a cool climate, would be worked under special hygienic conditions, and would, by the possession of large numbers of animals (over 200 calves per month) and skilled medical subordinates on the spot, afford opportunities for original research, such as never yet afforded a Bacteriologist. This would form my ideal. *To this officer no other duties should fall.* Before completion of the above sentence, however, I have added—"*but* as economy must be regarded (a conclusion arrived at by the nature of the proposals of the Government of India as to securing funds), I would advise his being permitted," &c. The suggestions which follow pre-suppose that the reader would understand that I considered myself bound to abandon this ideal, in favour of the compromise consequent upon no longer looking for "original research" locally, but trusting for this to the Imperial Bacteriological Laboratory. I was of course perfectly well aware that the extra duties of Assistant Physician of the General Hospital now conducted by the Professor of Hygiene would have to be otherwise arranged for, and considered that so long as I defined the duties expected, this would be sufficiently understood.

3. I therefore trust it will be seen that the Surgeon-General's deduction that the Bacteriologist proposed would not have time at disposal for the duties I have sketched is founded upon a misinterpretation of my doubtless insufficiently exact statements, seeing that his work would extend to solely (1) the present duties of Professor of Hygiene in the Medical College, which would necessarily include the teaching of Bacteriology, theoretically and practically, in a laboratory already existing; (2) the training of the future class of Sanitary Inspectors; and (3) routine bacteriological investigations for the Sanitary Department.

From J. P. HEWETT, Esq., C.I.E., Secretary to the Government of India, Home Department (Medical), to the Chief Secretary to the Government of Madras, dated Calcutta, the 17th February 1896, No. 136.

I am directed to forward the accompanying extract from a report (No. 651, dated the 11th September 1895) by the Sanitary Board on the outbreak of cholera in the Civil and Military Station of Bangalore, which contains a complaint by the Board concerning the absence, in the Madras Presidency, of any means whereby a bacteriological examination of water obtained from suspected polluted sources can be carried out. In inviting the attention of the Government of Madras to this matter, I am to enquire whether His Excellency in Council could suggest means for avoiding the recurrence of such a difficulty in the future. It seems probable that some of the medical officers who have lately joined the service would be competent to make such an examination.

ENCLOSURE.

EXTRACT from a report, No. 651, dated the 11th September 1895, by the Sanitary Board on the outbreak of cholera in the Civil and Military Station of Bangalore.

* * * * *

11. As the water from polluted sources has called for particular attention from the Board* it was considered desirable to send some specimens (particularly from the wells and tank which many persons were known to be in the habit of using in the cholera-infected locality referred to) with the object of its being examined as to the presence or otherwise of the causative organism of cholera, and accordingly several samples were forwarded to Madras for that purpose, but to the extreme surprise of the Board a reply was received from the Chemical Examiner stating that he was unable to undertake the necessary bacteriological examination and was moreover not in a position to say where in the presidency such an examination could be conducted. Now, as it is generally understood that the discovery of the cholera microbe is necessary to the determination of the very important question whether a particular water is infected or not, and also whether a doubtful case is cholera or not, the Board thinks it incumbent on it to express its extreme disappointment and disapprobation at finding that this very necessary bacteriological work cannot be carried out in this presidency, especially when it is considered how many efficient laboratories have for many years past been established throughout Europe.

Samples of water from suspected polluted sources obtained and forwarded for bacteriological examination to Madras, but not carried out.

* Sanitary Board of Bangalore.

From Surgeon-Major-General C. SIBTHORPE, F.R.C.P.I., Surgeon-General with the Government of Madras, to the Chief Secretary to Government, dated Madras, 30th March 1896, No. 260.

I have the honour to acknowledge the receipt of your endorsement, No. 435, dated the 25th February 1896, referring for my remarks letter, No. 136, dated the 17th February 1896, from the Government of India, forwarding a complaint by the Sanitary Board in Bangalore concerning the absence, in the Madras Presidency, of any means whereby a bacteriological examination of water obtained from suspected polluted sources can be carried out. The Government of India further enquire whether any means could be suggested for avoiding the recurrence of such a difficulty in the future, and consider that some of the medical officers who have lately joined the service would probably be competent to make such an examination.

2. In reply I have the honour to state that it is a fact that no arrangements exist for making such examinations.

3. There are now two propositions before Government which will, if sanctioned, provide such arrangements. The first is contained in the proposition of the Special Committee of 1892 appointed to report upon the re-organization of the Medical College, forwarded with my letter, No. 671, dated 12th December 1894. In this the committee recommended that the teaching of hygiene should be viewed from two different standpoints—

(1) the actual requirements of the students; and
(2) the requirements of science—pure and simple;

and they suggested that, if the former view was taken, the Professor should give a course of systematic lectures and a practical course and have not more than forty beds in a hospital. In the interest of the Sanitary Science, however (including such duties as are now under reference, the proper superintendence of the Hygiene Laboratory already built and fairly equipped, the instruction of the College medical students and the Sanitary Inspectors' class by practical demonstrations of sanitary work throughout the city, and the organization, equipment and superintendence of a museum of hygiene), the duties of the Professor should not be confined to the teaching of students, but he should be provided with a well-equipped laboratory and establishment for the purposes of sanitary research—clinical, mechanical and biological. If these were to be his duties, the committee was strongly of opinion that he should not have any attached duties.

The second proposition, which would meet the requirements now under consideration, is the appointment of a Professor of Bacteriology—pure and simple—as proposed by me in the correspondence dealt with in G.O., No. 662, Public, dated the 3rd August 1895, and my letter, No. 83, dated 6th February 1896. I am strongly of opinion that the Professor of Hygiene should be able to devote his whole time to the teaching and investigation of sanitary subjects and that the proposed Professor of Bacteriology should be able to devote his whole time to the study of Bacteriology. Either of these Professors would be in a position to carry out the investigations now under reference in his laboratory if it was properly equipped.

4. I forwarded the correspondence under reference to the Principal of the Medical College, through the Director of Public Instruction, for his suggestions and to report how far it is possible at present to make a bacteriological examination of water with the present appliances in the Hygiene laboratory. In reply he forwards me the remarks of the Professor of Hygiene who is in charge of the laboratory and who states—

> "With regard to the first question, the means—if that term be used in its fullest sense—do not at present exist, for the simple reason that no one has the time or opportunity to undertake such work. When equipping this laboratory, I took the greatest care to furnish it with everything essential for such work. I have the training and I have the appliances, but most certainly I have not the time, nor will I have it until relieved of my present hospital duties in connection with the clinical teaching and the charge of seventy to ninety beds throughout the year * * *
>
> "With regard to the second question, as to the possibility of carrying out such work at the present moment, I have no hesitation in saying that it could not be done without neglect of routine work. Scientific work to be of any value must be deliberate, and none more so than Bacteriology. The laboratory requires very slight and inexpensive alterations to make part of it suitable for bacteriological work, but some changes in arrangement must be made before the latter can be attempted with reasonable chance of accuracy. It might be possible to produce a report of a kind on the subject without much delay, but certainly not a report for the accuracy of which I would care to stand sponsor. The provision of various culture media and the growth and cultivation of numerous micro-organisms for purposes of identification is a very different matter from simple microscopical and chemical examinations, and the more one knows of the subject the more clear does it become that such work cannot be systematically left undone and then suddenly attempted" * * *

I concur fully in these views of the Professor of Hygiene.

5. As to the appointment of one of the officers lately joined to carry out such investigations, it should be remembered that none of them are at my disposal. All the more junior officers have received the training at Netley, but those who are in civil employ have other duties which fully occupy their time, and those in military employment are rarely in Madras and even when here are not available for such

duties. Moreover, as the Professor of Hygiene states, the reports of such investigations to be of any value must be from men who are in the habit of carrying on such scientific work continuously.

6. The correspondence is herewith returned as requested.

From J. P. HEWETT, Esq., C.I.E., Secretary to the Government of India, Home Department (Medical), to the Chief Secretary to the Government of Madras, dated Simla, the 21st May 1896, No. 391.

No. 393-95, dated the 21st May 1896.

With reference to the correspondence ending with your letter No. 106-Public—1081, dated the 22nd January 1896, I am directed to forward, for the information of the Government of Madras, a copy of a letter marginally noted on the subject of the proposed deputation of medical officers of the Indian Medical Service for instruction in Bacteriology.

2. I am to request that, should the Government of Madras find it convenient, and consider it desirable, to depute an officer in the manner suggested, the Government of India may, with the permission of His Excellency the Governor in Council, be informed of the fact.

Enclosure.

From J. P. HEWETT, Esq., C.I.E., Secretary to the Government of India, Home Department (Medical), to the Government of
Bengal
N. W. Provinces and Oudh,
Panjab
dated Simla, the 21st May 1896, No. 393-95.

With reference to the correspondence ending with the letter from this office, No. 12-Sanitary—342-344, dated the 31st October 1895, regarding the establishment of a Bacteriological Laboratory in India for the training of young medical officers, I am directed to state that the Director-General of the Indian Medical Service has suggested to the Government of India that, in consideration of the growing importance of Bacteriology in connection with sanitation and specific diseases, it would be desirable that junior officers of the Indian Medical Service should, if possible, be posted either to the Bacteriological Laboratory at Calcutta or Agra, as may be thought expedient, for the purpose of assisting Dr. Cunningham and Mr. Hankin in their investigations and of acquiring a practical knowledge of Bacteriology.

2. It will be seen that this proposal anticipates to some extent the scheme sketched in the resolution of the 31st October 1895, a copy of which was forwarded to the Government of with the letter above quoted. The object of the Director-General's suggestion, which is to obtain as soon as possible a few officers capable of conducting independent investigations of a reliable character, is, however, one of which the Government of India approve, and they anticipate that Local Governments would find great advantage from having a few officers at their disposal who had undergone this training.

3. In the opinion of the Director-General of the Indian Medical Service this training should last for from 6 to 12 months and it has been suggested that Local Governments might find it possible to occasionally spare a medical officer from the number of supernumerary medical officers placed at the disposal of the Government of by Home Department Resolution, No. 14-Medical—760-772, dated the 12th December 1894. The Governor-General in Council anticipates that this might at all events be found feasible from (say) the beginning of October to the end of April, and I am to enquire whether, under the circumstances set forth above, His Honour the Lieutenant-Governor would have any objection to deputing a medical officer as proposed from time to time. I am to explain that the officer so deputed would, while attending the Laboratory, continue to receive his grade pay under Article 306, Army Regulations, India, Volume I, Part I, as laid down in the resolution quoted.

Order—No. 714, Public, dated 8th July 1896.

* G.O., No. 662, dated 3rd August 1895.

The importance of bacteriology and of bacteriological investigations so far as the requirements of this Presidency are concerned has already been recognized,* and the correspondence read above points to the necessity of adopting some definite measures for attaining the objects aimed at by the Surgeon-General and the Sanitary Commissioner; but these officers have not expressed themselves with any degree of clearness or precision as to what their actual requirements are, and some additional information is necessary before orders can be passed on the proposals made.

2. The demand for the services of a professional bacteriologist presents itself under three aspects, according as he is required—

(i) for original bacteriological research, *i.e.*, the study and investigation of unsolved problems of disease among men and animals;

(ii) for teaching the science theoretically at the Medical College and practically to young medical, sanitary, veterinary and other officers at a laboratory;

(iii) for practical bacteriological investigations required by the Sanitary, Vaccine, Veterinary and other departments.

3. The measures to be adopted as regards original research and education in bacteriology must depend on the ultimate results of the re-organisation of the Medical College and the redistribution of work among the chief medical officers of the Presidency town.

4. As regards the provision to be made for the practical bacteriological investigations of the Sanitary and other departments, full information should be furnished with statistics and rough estimates of cost on the following points:—

(i) For what departments of the public service practical analyses of this kind should be undertaken.

(ii) What particular articles should be subjected to bacteriological examination besides water. Surgeon-Lieutenant-Colonel King's reference to "the aiding of sanitary precautions by the early identification of well-known microbes" seems somewhat indefinite and might be amplified.

(iii) What amount of work will be required of the bacteriologist by the Sanitary Board in connection with actual local requirements, apart from general and theoretical researches.

(iv) What portion of the work can be undertaken by the Chemical Examiner, and by the Professor of Hygiene, if he is relieved of the charge of a certain number of beds.

(v) What additional establishment would be required in each of the existing departments to carry out the necessary reforms.

5. It is to be regretted that in an isolated reference of the kind such as was made from Bangalore, the investigation of the sample was not undertaken by the Professor of Hygiene, who is reported to have had both the ability and equipment necessary for the purpose. It is not clear why no reference was made to him.

6. The Surgeon-General will in due course report the names of such officers as can be spared for training at the laboratories in Agra and Calcutta, in accordance with the scheme proposed by the Government of India.

No. 25 TH JULY 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From Surgeon-Lieutenant-Colonel W. G. KING, M.B., C.M., D.P.H., Sanitary Commissioner for Madras, to the Chief Secretary to Government, dated Fort St. George, 29th June 1896, No. 1139-V.

I have the honour to forward herewith the report on the Vaccination department of the Madras Presidency for the year 1895–96. This is written as usual by the Inspector of Vaccination, and embraces a review of the work of the last three years, as required in G.O., No. 1455, Public, dated 12th July 1886.

2. Government is aware that in my opinion the organization of the department is very faulty, and that I have duly submitted proposals for effecting a re-organization both prior and subsequent to receipt of G.O., No. 1000, Public, dated 9th December 1895. It is, however, presumed that financial difficulties have hitherto prevented the introduction of reforms that Government itself has already declared were desirable (G.O., No. 61 L., dated 12th January 1891). I refer to these facts with the hope that Government will kindly remember that, as organized, the staff at my disposal cannot be expected to effect a very high grade of results. Nevertheless, during the past three years every effort has been made to remedy evils, and to expand the utility of the department.

3. As already reported in my Annual Sanitary Report, Surgeon-Major C. Mallins, who held the post of Acting Inspector of Vaccination during the whole of the past official year, exhibited much zeal and energy in the performance of his duties, and in the course of his inspections did good service in detecting inaccurate and false work by subordinates.

AD
24/7/96

ORDER—No. 1346 L, dated 27th July 1896.

The report on the working of the Vaccination department received with the letter read above reviews the work of the past three years and, as required in paragraph 7 of G.O., No. 1455, Public, dated 12th July 1886, deals fully with the subject.

2. *Work done by the several agencies.*—The following statement shows the total reported number of operations performed by the several agencies employed in each of the last five years and the average cost of each successful case :—

Vaccine agency.	Number of operations performed.				
	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
(a) Government vaccinators in hill tracts	16,501	15,142	15,805	18,960	20,537
(b) Local Fund vaccinators	860,301	967,991	992,390	1,009,994	1,011,802
(c) Municipal vaccinators	110,590	114,953	113,837	118,135	1,20,190
(d) Cantonment staffs	3,585	6,089	5,489	3,739	5,366

I sent away the papers relating to the reorganization of the Vaccn. Dept. on 27/9/95 on the ground that I had other more pressing work in hand. The Hon. Mr. Grose did the same on the following day. From that time

/e

(1) to this (10 months) the matter has not again been brought to my notice. I don't know whether the matter in any way depends on the Civil Medical reorganization question which I then had in hand. If not, the papers

(2) had better be returned to me after the despatch hereof.

By the way, have any orders

(3) issued on the Medical reorganization, Medical College &c &c questions? I don't remember.

(1) The papers were not sent up to H. M. earlier, as the file relating to the reorganization of the Medical Establishments was disposed of by him only on the 21st Feby 1896 & ordered to lie over until the disposal of Medl. College reorganization papers
