The report Submitted with

2. The results of the experiments held
by Mr Minchin go to show that the Cement
pipes at present manufactured are unable,
especially at the socket, to with. stand
any great pressure

3. The want of cheap and strong
ware pipes is a serious impediment to
to

to Carrying out Sanitary improvements in this Country and it would be desirable if the Sanitary Engineer put himself in Communication with Messrs Arbutnot & Co with the view, in the event of their not being able to make Cement pipes of sufficient resisting power, of inducing them to turn their attention to the production of Stoneware pipes fit for use in Sanitary works.
