GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From Surgeon-Major H. M. HAKIM, Chairman, Municipal Council, Anantapur, to the Chief Secretary to Government (through the Revenue Divisional Officer and the Collector of Anantapur), dated 28th May 1896, Cur. No. 87.

I have the honour to submit the following report on the administration of the Anantapur Municipality for the official year 1895–96.

I.—CONSTITUTION OF THE MUNICIPAL COUNCIL.

2. The sanctioned strength of the council is twelve and it was full on the 31st March last.

3. Twenty-eight meetings were called during the year, of which only 24 were actually held against 32 in the preceding year. The average attendance of the councillors at the meetings held was 5·6 against 5·9 in the previous year, that of the official section was, as in the previous year, 1·7, whereas that of the non-official section retrograded being 3·9 against 4·0 in the previous year. The attendance of Europeans and Eurasians rose by ·03, while that of the Natives fell by ·33.

Elective system is not in force in this municipality.

II.—RECEIPTS.

4. The total receipts during the year, inclusive of the opening balance, came up to Rs. 16,151–6–4 against Rs. 15,540 and Rs. 13,483–13–9, the amounts of the revised estimate and the actuals of the preceding year, respectively. The variations resulting in the net increase of Rs. 611–6–4, compared with the revised estimate, occur under different heads, the remarkable of which are explained below.

5. *Tax on Arts.*—The increase of Rs. 301 under this head is due to a large number of artisans having temporarily settled here on work in the Government buildings under construction which has besides added a little to the number of contractors. It is also due, but to a small extent, to the advent of the Revenue Settlement office. The list of assessees was revised during the year. The tax was levied under all the classes of schedule A of the Act. The net current demand amounted to Rs. 1,702–8–0, of which Rs. 42 stood as balance, Rs. 1,542–8–0 having been collected and Rs. 118 written off as irrecoverable. Out of this balance Rupees 14–8–0 have since been collected, Rs. 12–8–0 are under prosecution and Rs. 15 under appeal. The arrears outstanding at the commencement of the year were Rs. 81, of which Rs. 58–8–0 were collected and Rs. 19 written off, leaving a balance of Rs. 3–8–0. One of the defaulters concerned was prosecuted about a year ago and the case is still pending, as his whereabouts are not definitely known. The other item was reported irrecoverable. These amounts will be written off.

6. *Tax on Buildings.*—This tax is levied at 6 per cent. of the annual rental of the buildings. The assessment of some of the buildings which underwent some improvement during the year was revised, resulting in an increase of Rs. 36–14–0 over that of the previous year. The net current demand thus rose to Rs. 2,732–3–5, of which Rs. 2,686–4–5 were collected, Rs. 3–15–0 remitted on account of vacant houses and Rs. 15–15–0 written off, leaving a balance of Rs. 26–1–0. Out of this Rs. 5 have since been collected, Rs. 12–12–0 are under prosecution and Rs. 5–4–0 under appeal. Necessary steps are being taken for the early collection of the remainder Rs. 3–1–0.

26. *Grants from Government.*—The actual receipts were less than the revised estimate by Rs. 147 nearly, as the furniture grant sanctioned by the Director could not be obtained before the end of the year.

27. *Grants from Local Boards.*—Owing to a miscalculation Rs. 1,620 was entered in the revised estimate against this item instead of Rs. 1,720.

28. *Private Scavenging Fees.*—The increase of Rs. 24-3-6 over the revised estimate is due to the opening of more private latrines in the town necessitated by the fields in the vicinity of houses which were used as latrines having been brought under cultivation.

29. *Refunds of Expenditure of previous year.*—The actuals are in excess of the revised estimate by Rs. 58, which is made up of Rs. 50 and 8. The former is the revenue assessment paid last year on the wet lands included in the park and refunded this year on the representation of the fact that from the park the municipality had no net profits; the latter is the balance of the amount of house-rent paid to a hospital assistant last year without sanction and ordered to be recovered from him.

30. *Other Items.*—The budget and the revised estimates were based on the actuals of the previous year, in which there were more items falling under this head than in the year under report, the actuals for which were Rs. 3-7-5 as detailed below:—

	Rs.	A.	P.
Amount recovered by sale of the distrained property of a defaulter—a prosecution instituted against whom for recovery of the balance due was thrown out and the amount of taxes due was written off.	2	13	9
Balance of the sale-proceeds of the distrained property of a defaulter credited to this head as he has not turned up to receive it in spite of repeated calls	0	4	0
Excess collection in previous year in tax on buildings—whereabouts of parties not known	0	1	0
Excess collection in previous year of land tax — whereabouts of parties not known	0	4	8
Total ..	3	7	5

III.—Charges.

31. The total expenditure during the year amounted to Rs. 15,006-6-4 against Rs 15,180, the amount of the revised estimate, and Rs. 13,249-8-11, the actuals of the previous year.

32. The items under which remarkable variations occur, as compared with the revised estimate, are explained below.

33. *New Buildings.*—In G.O., Mis. No. 1185 M., dated 24th July 1895, Rs. 50 were sanctioned for putting up a new shed in the municipal building occupied by the municipal high school. This was curtailed in the revised estimate by Rs. 10 as the work was to be done departmentally, but actually there was, by so executing the work, a further saving of Rs. 9-0-10.

34. *Repairs of Communications.*—The original budget estimate was raised by Rs. 60 to represent half the receipts from tolls, but in fact there was no necessity for a reasonable utilization of this additional amount, all the roads having been put in thorough repair.

35. *Repairs of Buildings.*—There has been a falling off in actuals below the revised estimate by Rs. 26-6-4, as the repairs to the municipal store-rooms could not be taken in hand before the close of the year owing to the non-receipt of the estimate in time.

36. *Repairs to Water-supply, &c.*—The amount of Rs. 13-7-6 over that allotted had to be spent in raising a parapet wall round a municipal well at the instance of the Magistracy from apprehension of danger to the public passing by it.

37. *Municipal Schools on Salary System.*—The decrease compared with the revised estimate is due to the advance of Rs. 125 made in the year for furniture and apparatus not having been adjusted within the year.

38. *Municipal Schools on Salary-result System—Contingencies.*—At the suggestion of the Educational authorities in March last some furniture had to be supplied to the Muhammadan salary-results school.

39. *Results Grants.*—The actuals under this head amounted to Rs. 159-15-0 against Rs. 300 and Rs. 208-11-0, the amount of the revised estimate and the actuals of the preceding year, respectively. The large decrease is due to very poor results produced by the two pial schools at the grant examination.

40. *Hospitals and Dispensaries.*—Compared with the revised estimate, there is a decrease of Rs. 15-6-8 in the establishment due to fines and stoppages in the pay of the hospital servants, Rs. 14-11-11 in medicines and supplies owing to variation in exchange at the time of remittance of cost of medicines to England, and Rupees 29-15-4 in sundries and contingencies partly due to the great economy observed in incurring contingent charges and partly to the less expenditure required in providing bedding and clothing than was first expected. The increase under diet of patients occurred owing to the admission of more patients during the latter part of the year than the average suggested.

41. *Hospital Contributions to Local Boards.*—The expenditure under this head following the receipts from sale of medicines and hospital subscriptions of which it is a moiety, Rs. 134-3-9 should have been paid, but the decrease of Rs. 9-12-6 is due to the board's share of receipts in March having been as usual paid in the following month.

42. One hundred and nineteen in and 12,436 out patients were treated in the hospital during the year under report, which showing an increase of 25 in the former and 2,543 in the latter proves the fact of the growing popularity of the institution which the council notes with great pleasure. The work of the midwife also showed some improvement, as the number of labour cases attended to by her during the year was 105 against 101 in the preceding year.

43. The construction of a new municipal hospital is still under correspondence. The plan and estimate of a hospital commensurate with the requirements of the police which the municipality has to build in case the present police hospital building is made over to them, were received from the Executive Engineer. But seeing that the cost of it and of making some additions to the present police hospital building to render it fitted for the municipal hospital would be so much as would suffice to build a new municipal hospital itself on an approved design, Government were requested to supplement the funds of this municipality and the matter is still pending with them.

44. *Contribution to Provincial Funds.*—The amount of the revised estimate (Rs. 90) was based on the usual budget figure; the actuals showing an increase of Rs. 32 were paid on the advice of the Accountant-General about the close of the year as is always the case.

45. *Vaccination.*—The municipal vaccinator was for nearly two months in charge of the local fund vaccine depôt without prejudice to his legitimate work, and was paid only by the district board. The amount of Rs. 32-14-6 falling short of the revised estimate represents the saving of the vaccinator's pay for that period.

Against the revised estimate of Rs. 50 under contingencies only Rs. 45-4-6 were expended. The saving of Rs. 4-11-6 was due to the supply of lymph at a cheaper rate. The number of cases vaccinated was 492 showing an increase of 26 over the preceding year. The particulars under this head are given in the accompanying report of the District Medical and Sanitary Officer. The work of the vaccinator was very satisfactory and also far more cheaply done, the average cost of each successful case having fallen to As. 6-9 from As. 9 in the previous year.

Against seventeen in the previous year, fourteen prosecutions were instituted during the year under report for failure to have children vaccinated.

46. *Birth and Death Registration.*—Two hundred and ninety-two births and 129 deaths were registered against 207 and 102, respectively, in the preceding year, and the birth and death rates per mille were 41·7 and 18·4 against 29·6 and 14·5. There were no cases of failure to register births or deaths.

47. *Conservancy—Road-cleaning Establishment.*—The savings under establishment and other charges (hire of sanitary carts) were due to the fines imposed on some sweepers, &c., and cartmen for laxity of work. As usual the number of public latrines was eight—three for males and five for females. Of these four are built with brick, one with stone and the rest with sun-dried mud bricks. Two latrines were repaired during the year at a cost of Rs. 21–9–4. Dry earth was freely used in all of them.

48. For reasons given in paragraph 28 *supra*, the number of private latrines on the 31st March 1896 was 125 against 106 in the preceding year. These were cleaned twice a day, and the work was supervised by the sanitary inspector. The cost of the private scavenging establishment consisting of three male scavengers was, as in the previous year, Rs. 198, and the service was worked at a net profit of Rs. 41–3–6.

49. *Lighting.*—The saving of Rs. 10–1–5 under contingencies was due to repairs of lanterns and some lamp-posts having actually cost less than the estimate.

50. *Avenue Contingencies.*—In the ends of economy the road coolies were utilized now and then for watering the few newly-planted avenues. There was thus a saving in the allotment under this head.

51. *Public Garden—Purchase of seeds, &c.*—Rs. 24–4–4 were spent against the revised allotment of Rs. 40. More expenditure could not be incurred owing to the dearth of water in the park for the upkeep of crops.

52. *Rewards for destruction of wild animals, &c.*—The decrease is due to a large quantity of strychnine purchased in the previous year for the destruction of stray and mangy dogs having remained for use during the year under report.

53. *Printing.*—The increase is due to the receipt, as usual, in the latter part of the year, of a bill from the Accountant-General for printing certain forms.

54. *Other Items.*—The sum of Rs. 60–5–3 shown under this head has the following items for its details :—

	Rs.	A.	P.
Assessment on dry lands included in the park and on the rubbish depôt	31	5	0
Fees for numbering carts	8	11	0
Tom-toming notices	2	1	0
Ropes and pots for use on all works	0	5	6
Preparing two sketches of vacant sites for submission to Government	7	0	0
Preparing three sign-boards for wells	3	0	0
Defending a civil suit brought against the municipality for recovery of profession tax collected	7	6	9
Written off advances	0	8	0
Total ..	60	5	3

55. The increase is mainly due to the expenditure incurred for successfully defending a civil suit brought against the municipality by a tax-payer for the recovery of a profession tax of Rs. 12–8–0 imposed on him as sowcar during the second half of 1894–95. The savings under office and collection establishments are due to stoppages in the pay of the office clerk and fines imposed on the bill-collector for short work. The increase under office contingencies occurred owing to the payment of a bill received about the close of the year for certain forms supplied from the V. N. Jubilee Press, Madras.

56. *Instalments paid during the year.*—At the commencement of the year under report the liabilities of this municipality were Rs. 1,508–8–2 due to the district board and Rs. 800 to Government being the balances out of the amounts of Rs. 2,000 and Rs. 4,000 received from them, respectively, for the erection of a new school-house. In the original budget estimate, an allotment of Rs. 1,200 was made for purpose of paying the district board alone, but the Government Order since received strictly enjoining that the amount due to Government should be paid before the close of the year, an additional allotment of Rs. 200 was applied for and

sanctioned in G.O., Mis. No. 1148 M., dated 24th July 1895, to repay the full amount due to Government appropriating Rs. 600 out of that proposed to be paid to the district board and it was done accordingly. It appeared subsequently that there were prospects of the year closing with a larger balance than anticipated in the revised estimate due to more income from certain sources and to embrace this rare opportunity to wind the council out of debts as much as possible, the payment to the district board was raised by Rs. 250. All endeavours are being made to liquidate the sum of Rs. 658–8–2 still due to the district board (which is all the liability of the council at this date) within the close of the current official year, if not earlier.

57. *Other Advances.*—The increase of Rs. 125 over the revised estimate is due to the advance made for furniture and apparatus required for the Municipal High school not having been adjusted before the close of the year.

58. The year closed with a balance of Rs. 1,145 against Rs. 234–4–10 in the previous year. The former includes Rs. 432–13–4, the amount of advances of two months' kists of tolls, weekly market and slaughter-house relating to this year (1896–97) having been credited to the respective heads.

59. *General Remarks.*—The sanitary improvements made during the year under report have already been brought to the notice of Government in the inspection report of the Deputy Sanitary Commissioner and Inspector of Vaccination recorded in G.O., No. 643 M., dated 8th April 1896. I beg to submit that steps are being taken for obtaining an iron sewage cart and iron hooks for the slaughter-house and roofing a public latrine and the slaughter-house and putting in order two of those public wells which have been remarked to be of faulty construction. The proposal to declare the tank reserved for drinking purposes and appoint a watchman to it has been given up as the tank extends far beyond the municipal limits where its pollution is not guarded against. The scheme for the diversion of the subsoil water of the tank, which was under consideration of the Sanitary Board, has been, I am informed, referred to the Public Works authorities, who are now preparing an estimate to render the bund water-tight.

60. I beg to bring to notice that the annual educational statements V-A and V-B, due in this office from the educational authorities on the 15th instant, have not as yet been received in spite of frequent reminders sent to the Assistant Inspector of Schools, Ceded Districts division, Bellary, for the same. The Inspector of Schools has also been addressed on the subject. These statements will, on receipt, be submitted with a covering report furnishing the required details.

61. A copy of the council's resolution approving this report is herewith submitted.

From Surgeon-Major H. M. HAKIM, Chairman, Municipal Council, Anantapur, to the Chief Secretary to Government, dated Anantapur, the 21st July 1896, Ref. on C. No. 87.

In continuation of my report on the administration of this municipality for the past official year, I have the honour to submit the following supplemental report in connection with education in this municipality during the same period.

2. The working of the municipal high school was satisfactory in the year under report. The strength of the school on the 31st March 1896 was 149 and the average attendance throughout the year showed a very great improvement, being 117 against 74 in the preceding year. The large increase is due partly to the addition of the primary department and partly to better instruction imparted during the year. Nine candidates were sent up for the Lower Secondary examination, of whom one secured a complete pass and two only in compulsory subjects. For the Matriculation examination ten were sent up, of whom three passed. The financial condition of the school also much improved, there having been a net saving of Rs. 189–12–5 (Rs. 228–7–1 from the upper secondary, Rs. 517–5–0 from the lower secondary, and Rs. 99–1–6 from the primary department). The average net cost per pupil in each department was as detailed in the margin. The decrease is due to larger income from school fees and provincial grant.

	1894-95. Rs.	A.	P.	1895-96. Rs.	A.	P.
Upper Secondary ..	23	4	0	7	14	0
Lower Secondary ..	—4	12	9	—8	9	11
Primary	..			3	8	8

3. The instruction imparted in gymnastic exercises was, as usual, good. An addition of forty volumes was made to the library, new furniture, maps and an electric plate machine supplied to the school. Rs. 125 was advanced during the year for the last said two items which not having been adjusted befere the close of the year a large amount has to be shown as net saving. The Educational statements are herewith submitted. Statement V-A relating to the municipal high school was received only yesterday after repeated reminders. After all, it does not furnish the details required nor is it quite accurate. The net difference of Rs. 8-3-6 in school fees has occurred as follows:—As. 12-6, school fees relating to Muhammadan salary-results school, was by an oversight shown under municipal high school, and Rs. 9 which was refunded to a student by the headmaster was erroneously shown both under receipts and charges.

4. The amount under "Other receipts" should be Rs. 27-12-6, the difference of Rs. 12 being the cost of two old benches of the municipal high school disposed of. The former amount compared with this office figure shows an increase of Rs. 9-4-6. This, the headmaster reports, is the amount of library fees received by him from certain students and spent in purchasing library books without crediting it to municipal accounts. This is also erroneously added to both sides of the account. The increase of Rs. 143-4-6 under contingencies compared with this office figure is due (1) to Rs. 125 advanced for furniture and apparatus during the year, but not adjusted within the year, being shown in Statement II under "Advances recoverable" whereas the headmaster shows it under the regular head of "Contingencies"; (2) to the two differences explained in the preceding paragraphs amounting to Rs. 18-4-6.

5. The headmaster is a Master of Arts and has evinced a great zeal in the progress of the institution. He completed the L.T. degree last year. The first assistant, an F.A. who was trained as a Matriculate, was required to go up for training again, but the Director exempted him for one year as he is now studying for B.A., which when he passes he should pass L.T. and his undergoing training now is not therefore useful. The second assistant, a graduate, was plucked last year in the practical portion of L.T. The third assistant was exempted from undergoing training in consideration of his vast experience.

6. The lower secondary department is more than self-supporting. It was the case even last year when the financial condition of the school was in a very crippled state. The reduction of scale of establishment brought into force last year affected, so far as it related to old teachers, only the third and fourth assistants. But the former, for reasons stated above, was given his usual pay of Rs. 40 a month and the only subordinate remaining affected is the fourth assistant, who was recommended in the current year for the maximum pay of Rs. 30 but he was granted only an increase of Rupee one.

ENCLOSURE.

ADMINISTRATION REPORT on the working of the Municipal Hospital, Anantapur, for the official year 1895-96.

1. *Public Health.*—The health of the town during the year under review has been good. An epidemic of influenza prevailed during the latter part of February and whole of March, the disease having been imported from Mysore territory; no case proved fatal under treatment. Fevers prevailed to a greater extent than last year. One thousand two hundred and ninety-six cases were treated against eight hundred and sixty-three in the previous year, the increase being due to the tank receiving a certain supply of water and consequent increase in the sub-soil moisture, which is considered one of the chief causes in the production of fevers. Although cholera prevailed in two taluks of the district, this town was happily free from it.

2. *Vital Statistics.*—There were 292 births and 129 deaths registered during the year under review, against 207 births and 102 deaths in the previous year. The deaths were from the following causes:—Small-pox 5, fevers 62, other causes 58, accidents 2, wound 1, and drowning 1. A separate registrar of births and deaths has been employed throughout the year and the registration is satisfactory.

3. *Sanitation.*—(1) The conservancy establishment consists of one inspector, two peons, fourteen sweepers, eight public latrine toties and three private scavenging toties, three rubbish-carts, and one night-soil cart of an approved pattern has been obtained for use since October last in place of the old night-soil cart which was of an obsolete pattern.

(2) The street sweepings and house refuse are collected in dust-bins and carted twice a day to the rubbish depôt about a mile-and-a-half towards the north of the town on the side of the Gooty road and sold by auction to be used as manure. The night-soil from eight public and 125 private latrines is removed twice a day in an iron covered cart and buried in trenches near the rubbish depôt. There has been hitherto very little demand for night-soil as manure, but about the end of the year a ryot came forward to have the night-soil deposited in trenches in his own fields on payment. Of the eight latrines, three are of mud, four of brick and one of stone; and these are all mere enclosures. Dry-earth is being used freely throughout the greater part of the year except during the rainy season when there is much difficulty in procuring and storing it. Two of the latrines were repaired during the year—one male and the other female latrine. These latrines are used by a limited number of people as the majority resort to the fields in the neighbourhood. The council have made provision for roofing some latrines in the budget for 1896-97 and that will mend matters to some extent, and I have suggested that seats also should be provided as far as the funds would permit.

(3) *Drainage.*—There is no proper system of drainage. The main streets are provided with rough stone drains to carry away the surface and rain water to the neighbouring fields. The main drains of the bazaar street are covered over by platforms which prevent the scavengers from cleaning them properly; repeated representations on the subject have had no effect. A new platform over the bazaar drains is now under construction and the matter has been reported to the District Magistrate for necessary action. The small streets and lanes have side-cuttings which are renewed every year before the monsoon. The whole town is honeycombed with cesspools and every house has more than one. These cesspools are cleaned only when they are full or smell from them is very offensive and unbearable. The municipality is endeavouring to improve the condition of cesspools by ordering the construction of pukka impermeable ones when they are to be newly opened or the old ones repaired.

(4) *Drinking-water.*—Drinking-water is from a large tank close to the town and twelve wells. The former supply, which is limited to three or four months in the year, is much used by a certain community of the town, though contaminated by bathing and washing. Of the wells "Garabhavi" is much used for drinking purposes. Every one of the wells has a signboard and some of the wells are protected by parapet walls. The following improvements have been made in the water-supply:—Garabhavi, Subbarayani Bhavi and Bakavandla Bhavi have been cleaned of their silt and provision has been made for cementing the casing wall.

4. *Vaccination.*—The municipal vaccinator, who works under the direct supervision of the District Medical and Sanitary Officer, has vaccinated 492 cases during the year under review against 466 cases in the previous year, thus showing an increase of twenty-six cases. Of the cases vaccinated, 456 were successful, nine unsuccessful, and twenty-seven unknown. The infantile vaccination out of the whole number amounted to 230, of which 228 were successful and two unknown. The total number of births registered from 1st October 1894 to 30th September 1895 was 272, of which 176 were vaccinated, forty-six died, forty-six left the town, one sick and guardians of three were reported to the magistrate for non-compliance with vaccination rules. The percentage of successful cases of primary vaccination being 98·91 and of re-vaccination 84·72. Average cost of each successful case of vaccination was As. 6-9 against As. 9 in the previous year. The municipal vaccinator has been in charge of vaccine depôt since 15th December 1895 without prejudice to his own work. His work has been satisfactory and there are very few unprotected children notwithstanding the opposition and aversion of people to vaccination. Vaccination is compulsory in the station and fourteen cases were reported for failing to get the children vaccinated during the year.

5. *Hospitals and Dispensaries*—(*a*) *Nature and sufficiency of Accommodation.*—The present building consists of (1) main ward for eight beds; (2) a small ward for four beds in continuation of the main ward towards the west is used as office of the District Medical and Sanitary Officer. An enclosed verandah attached to No. 2 ward is used as store-room. Near the north-eastern end of the compound is a small room for two female patients. A thatched shed for six female patients and another shed close to the surgery is set apart for the examination of private cases. Surgery room is very small and quite unsuited for the purpose.

(*b*) *State of Repairs.*—The main building, which was in the occupation of the police sick up to July 1894, has been condemned as insanitary by all inspecting officers, and the erection of a suitable building seems to be as far as ever, and until Government kindly step in and provide a hospital as they have done the school, this long-felt want will remain unrealized. The limited accommodation and insanitary surroundings account for the too small number of in-patients treated at the hospital.

(*c*) *State of repair of Furniture.*—Hospital furniture is old and requires to be replaced. Six new iron cots were purchased during the year to replace old insanitary wooden ones, and one was a gift of Mr. F. A. Nicholson, Collector of the district. Bedding and clothing was replenished at an expense of Rs. 30 during the year.

(*d*) *Inspections.*—(1) The hospital was not inspected by the Surgeon-General with the Government of Madras during the year under review. Recommendation made in the previous year regarding the hospital has not been carried out, but is under contemplation and Government have been addressed on the subject.

(2) The Inspector of Vaccination and Deputy Sanitary Commissioner, Madras, inspected the hospital during the year and his recommendation regarding the construction of a new hospital near the railway station is still under consideration.

(*e*) Amount of recoveries from patients for diets—*Nil.* Amount of recoveries for medicines—Rs. 268-7-6.

(*f*) *Number of Patients treated as compared with the previous year.*—Total number of patients during the year under report was 119 in and 12,436 out patients against 94 in and 9,893 out patients, thus showing an increase of 25 and 2,543 cases, respectively. The increase in the number of in-patients is due to the eight additional beds of the old police hospital transferred to the municipality having been available, and that of the out-patients is due to the absence of cholera scare, which in the previous year prevented the people of the neighbouring villages from seeking treatment at this institution, and to the rising popularity of the institution and also to the prevalence of influenza during the latter part of February and whole of March. The following table shows the working of the institution for the last five years:—

Years.	In-door.		Out-door.	
	Total treated	Average daily sick.	Total treated.	Average daily sick.
1891-92	81	2·72	10,413	108·29
1892-93	68	1·85	9,906	112·26
1893-94	62	1·64	11,080	113·59
1894-95	94	3·57	9,893	74·18
1895-96	119	6·09	12,436	76·45

(*g*) *Mortality and actual causes of it.*—There were four deaths during the year against five in the previous year. One death occurred from Bright's disease, one from gastro-enteritis, one from cancer of breast, and one from chronic enteritis.

(*h*) *Operations and Results.*—Twenty-nine major and 510 minor operations were performed during the year, against 31 major and 312 minor operations. One death occurred from thrombosis of heart 2½ hours after delivery by version in placenta prævia. The small area of the town and district, aversion of the people to submit to operative treatment and the limited accommodation and insanitary surroundings account for the small number of major operations.

(*i*) *Establishment whether sufficient and efficient.*—Establishment consists of one compounder, one midwife, one ward attendant, one cook, one peon and one toty. The services of a nurse and a female toty are required to complete the establishment.

(*j*) *Midwife.*—Midwife Murthay has conducted 105 cases during the year against 101 in the previous year. She was qualified at the Government Lying-in Hospital, Madras, and her work has been fair considering the number of barber women who not only conduct cases but also perform all sorts of menial work for a fortnight for a paltry fee varying from As. 4 to As. 8. She is paid Rs. 15 a month—two-thirds from the local funds and one-third from the municipality.

(*k*) There is no separate ward set apart for gosha or caste women. But whenever gosha or caste women are admitted, every consideration is shown to them by issuing raw rations and treating them separately.

(*l*) *General Remarks.*—Municipal funds do not admit of expenditure on some much needed improvements. The undersigned was in charge of the institution during the year under review.

ANANTAPUR,

AUGUST.

Administration Report.

Reviewing the — of the Anantapur Municipal Council for 1895–96.

No. 1403 M., 20TH AUGUST 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From Surgeon-Major H. M. HAKIM, Chairman, Municipal Council, Anantapur, to the Chief Secretary to Government (through the Revenue Divisional Officer and the Collector of Anantapur), dated 28th May 1896, Cur. No. 87.

I have the honour to submit the following report on the administration of the Anantapur Municipality for the official year 1895–96.

I.—CONSTITUTION OF THE MUNICIPAL COUNCIL.

2. The sanctioned strength of the council is twelve and it was full on the 31st March last.

3. Twenty-eight meetings were called during the year, of which only 24 were actually held against 32 in the preceding year. The average attendance of the councillors at the meetings held was 5·6 against 5·9 in the previous year, that of the official section was, as in the previous year, 1·7, whereas that of the non-official section retrograded being 3·9 against 4·0 in the previous year. The attendance of Europeans and Eurasians rose by ·03, while that of the Natives fell by ·33.

Elective system is not in force in this municipality.

II.—RECEIPTS.

4. The total receipts during the year, inclusive of the opening balance, came up to Rs. 16,151–6–4 against Rs. 15,540 and Rs. 13,483–13–9, the amounts of the revised estimate and the actuals of the preceding year, respectively. The variations resulting in the net increase of Rs. 611–6–4, compared with the revised estimate, occur under different heads, the remarkable of which are explained below.

5. *Tax on Arts.*—The increase of Rs. 301 under this head is due to a large number of artisans having temporarily settled here on work in the Government buildings under construction which has besides added a little to the number of contractors. It is also due, but to a small extent, to the advent of the Revenue Settlement office. The list of assessees was revised during the year. The tax was levied under all the classes of schedule A of the Act. The net current demand amounted to Rs. 1,702–8–0, of which Rs. 42 stood as balance, Rs. 1,542–8–0 having been collected and Rs. 118 written off as irrecoverable. Out of this balance Rupees 14–8–0 have since been collected, Rs. 12–8–0 are under prosecution and Rs. 15 under appeal. The arrears outstanding at the commencement of the year were Rs. 81, of which Rs. 58–8–0 were collected and Rs. 19 written off, leaving a balance of Rs. 3–8–0. One of the defaulters concerned was prosecuted about a year ago and the case is still pending, as his whereabouts are not definitely known. The other item was reported irrecoverable. These amounts will be written off.

6. *Tax on Buildings.*—This tax is levied at 6 per cent. of the annual rental of the buildings. The assessment of some of the buildings which underwent some improvement during the year was revised, resulting in an increase of Rs. 36–14–0 over that of the previous year. The net current demand thus rose to Rs. 2,732–3–5, of which Rs. 2,686–4–5 were collected, Rs. 3–15–0 remitted on account of vacant houses and Rs. 15–15–0 written off, leaving a balance of Rs. 26–1–0. Out of this Rs. 5 have since been collected, Rs. 12–12–0 are under prosecution and Rs. 5–4–0 under appeal. Necessary steps are being taken for the early collection of the remainder Rs. 3–1–0.

7. The arrears of this tax outstanding at the commencement of the year amounted to Rs. 147–0–6, of which Rs. 131–14–9 were collected, Rs. 3–9–0 remitted on vacant houses and Rs. 11–5–6 written off, leaving a balance of As. 4–0 which has to be written off, being reported irrecoverable.

The decrease in the actuals compared with the revised estimate is due to the non-completion of the Police office building within the close of the year as expected.

8. *Tax on Lands.*—*Anent* the orders of Government contained in paragraph 3 of G.O., No. 1168 M., dated 24th July 1895, reviewing the administration report of this municipality for last year, the mode of calculating the annual rental of wet and dry lands had to be revised by the council, who, in unanimously adopting the proposition of the Revenue Divisional officer and *ex-officio* councillor, resolved that the tax on a land for a year should be fixed on the actual gross rental of it in the preceding year. There is a difficulty in obtaining the rental of an official year, for the official year would be three months' old when the fasli year commences and the rental for the former, as given by the Revenue authorities, being that of the just past fasli would include nine months of the past official year and only three of the one for which the tax has to be levied. To obviate this difficulty and also the differences of opinion that arise with reference to the mode of calculating the rental it appears to me that the acreage rates now existing in some of the municipalities may be adopted. Though the power of fixing the assessment in the first instance is vested in me by the Act, seeing the importance of the question and the different opinions held by the councillors in the matter, to avoid unnecessary work that may tend to retard the collection of the tax, the original assessment itself was left to the council.

9. As the preceding year (1894–95) was a very unfavourable one for agriculture, only 75–30–1 acres could be brought under cultivation. The current demand therefore came up to Rs. 95–5–7, of which Rs. 66–11–5 were collected and Rs. 28–10–2 stood as balance at the close of the year, out of which Rs. 11 have since been collected, Rs. 5 are under prosecution.

10. The arrears outstanding at the commencement of the year under report amounted to Rs. 295–8–5, of which there remained at the close of the year a balance of Rs. 98–3–4, Rs. 196–11–4 having been collected and As. 9–9 written off. Steps are being taken for the early recovery of the remainder. The assessment for the current year will be fixed with reference to the orders of Government.

11. *Tax on Animals and Vehicles.*—The income from these two sources aggregating Rs. 468 showed an increase of Rs. 48 over that expected in the revised estimate and of Rs. 109–4–0 over the actuals of the previous year. The former is due partly to the officials of the Revenue Settlement Department possessing more vehicles and animals than expected and partly to the taxing of bicycles also as vehicles, and the latter to larger number of animals in the town, those sent to other villages last year for fodder having been brought back here.

12. *Tax on Carts.*—The actuals under this head exceeded the revised estimate by Rs. 47 and those of the preceding year by Rs. 70–8–0, and is attributable to the growing increase in the number of carts owing to several new buildings under rapid construction.

13. The number of distress warrants issued during the year was 408 for Rupees 933–11–10 against 122 in the preceding year for Rs. 250–6–0. Together with those remaining unexecuted at the commencement of the year the number for execution came up to 432 and the amount involved to Rs. 962–14–10. Of these, 407 for Rs. 899–12–4 were either executed or cancelled, leaving a balance of 25 at the close of the year for Rs. 63–2–6, of which 10 for Rs. 15–8–0 have since been executed, the delay in the execution of the rest being mostly due to the absence of parties from the town.

In this connection I beg to observe that though the demand of taxes is rising, there is but one bill-collector on the collection establishment and the work of execution of warrants being a responsible one has to be entrusted to the sanitary inspector who is the only out-door servant of the municipality, and that as he has more than one duty to attend to, more could not be expected from him with all the strictness and punctuality with which he is worked.

14. *Tolls.*—The collection of tolls at the four toll-gates in this municipality was, as usual, leased out. The amount realized for the year was Rs. 2,158, which shows a falling off of Rs. 337 below the actuals of the preceding year and is due to less competition at the auction sales, the renters in the previous years having sustained a loss. The amount shown in statement I includes Rs. 355—the two months' kist relating to this year (1896–97) which used to be shown under deposits but is now shown here under instructions contained in G.O., No. 1040 M., dated 28th June 1895.

The general incidence of taxation per head of population of 6,994 was Rs. 1–1–9 including tolls and As. 12–10 excluding them against Rs. 1–0–3 and As. 11–11, respectively, in the preceding year.

15. *Fees under Act II of* 1888.—Rs. 95 were realized under this head against Rs. 50 expected in the revised estimate. It is due to two newly-erected dramatic pavilions covering larger areas.

16. *Produce of Lands, Gardens, &c.*—Against the revised estimate of Rs. 30 only Rs. 8–0–8 were realized from the sale of the park produce. During the year under report Rs. 108 were spent for the park establishment, Rs. 24 for contingencies, whereas that recovered from the park produce was only Rs. 8–0–8—a thing which may perhaps be left out of consideration at least if the park were used by the general public for recreation purposes.

17. *Conservancy Receipts.*—The large decrease of Rs. 187–13–4, compared with the revised estimate, is due to the very little demand for manure for want of timely rains and supply in the tank.

18. *Fees from Educational Institutions.*—The receipts under this head amounted to Rs. 2,755–14–10 (Rs. 2,741–8–4 from the municipal high school and Rs. 14–6–6 from the Muhammadan Salary-results school) showing a heavy increase of Rupees 255–14–10 over the revised estimate which is ascribed to the rising progress of the municipal high school, the fact of its stability having of late been widely known.

19. *Other Revenue from Educational Institutions.*—Rs. 18–8–0 shown under this head is made up of Rs. 6–8–0 and Rs. 12. The former is the amount of library fees of As. 4 each paid voluntarily by some of the students of the high school department, and the latter is the cost of two benches of the Municipal High school sold as they were replaced by new ones. This was not anticipated at the time of framing the revised estimate.

20. *Sale-proceeds and Composition Fees of Medicines.*—The actuals fell off the revised estimate by Rs. 11–8–6, some of the bills not having been collected before the close of the official year owing to the absence of persons concerned.

21. *Income from Markets.*—Rs. 418–1–4 shown under this head is made up of Rs. 365, the amount for which the weekly market was leased out for 1895–96, As. 4 penalty on overdue kist levied on the renter and Rs. 52–13–4, the two months' kist relating to this year (1896–97) which, under Government Order quoted above, was even in the first instance credited to the proper head.

22. *Income from Slaughter-house.*—Of Rs. 200–9–2 shown under this head, Rs. 175–9–2 appertain to the year under report and Rs. 25 is the amount of two months' kist for 1896–97 paid in advance.

23. *Distraint Fees.*—The decrease under this head is due to less number of cases of distraint than expected from the dilatory habit of the tax-payer.

24. *Grant IV, Other Fees.*—The decrease is too small to call for any remarks. Re. 1 was for searching the death register and granting an extract from it and As. 10–8, the copying fees for granting an extract from the hospital nominal register.

25. *Fines under Municipal and other Acts.*—Compared with the revised estimate, the actuals show a decrease of Rs. 32–12–0 and it is due partly to the occurrence of less cases of nuisance and partly to the leniency of the Bench Magistrates in imposing fines. Five hundred and twenty-five cases of nuisance were prosecuted during the year under report against 125 in the preceding year.

26. *Grants from Government.*—The actual receipts were less than the revised estimate by Rs. 147 nearly, as the furniture grant sanctioned by the Director could not be obtained before the end of the year.

27. *Grants from Local Boards.*—Owing to a miscalculation Rs. 1,620 was entered in the revised estimate against this item instead of Rs. 1,720.

28. *Private Scavenging Fees.*—The increase of Rs. 24–3–6 over the revised estimate is due to the opening of more private latrines in the town necessitated by the fields in the vicinity of houses which were used as latrines having been brought under cultivation.

29. *Refunds of Expenditure of previous year.*—The actuals are in excess of the revised estimate by Rs. 58, which is made up of Rs. 50 and 8. The former is the revenue assessment paid last year on the wet lands included in the park and refunded this year on the representation of the fact that from the park the municipality had no net profits; the latter is the balance of the amount of house-rent paid to a hospital assistant last year without sanction and ordered to be recovered from him.

30. *Other Items.*—The budget and the revised estimates were based on the actuals of the previous year, in which there were more items falling under this head than in the year under report, the actuals for which were Rs. 3–7–5 as detailed below:—

	RS.	A.	P
Amount recovered by sale of the distrained property of a defaulter—a prosecution instituted against whom for recovery of the balance due was thrown out and the amount of taxes due was written off.	2	13	9
Balance of the sale-proceeds of the distrained property of a defaulter credited to this head as he has not turned up to receive it in spite of repeated calls	0	4	0
Excess collection in previous year in tax on buildings—whereabouts of parties not known	0	1	0
Excess collection in previous year of land tax — whereabouts of parties not known	0	4	8
Total ..	3	7	5

III.—CHARGES.

31. The total expenditure during the year amounted to Rs. 15,006–6–4 against Rs. 15,180, the amount of the revised estimate, and Rs. 13,249–8–11, the actuals of the previous year.

32. The items under which remarkable variations occur, as compared with the revised estimate, are explained below.

33. *New Buildings.*—In G.O., Mis. No. 1185 M., dated 24th July 1895, Rs. 50 were sanctioned for putting up a new shed in the municipal building occupied by the municipal high school. This was curtailed in the revised estimate by Rs. 10 as the work was to be done departmentally, but actually there was, by so executing the work, a further saving of Rs. 9–0–10.

34. *Repairs of Communications.*—The original budget estimate was raised by Rs. 60 to represent half the receipts from tolls, but in fact there was no necessity for a reasonable utilization of this additional amount, all the roads having been put in thorough repair.

35. *Repairs of Buildings.*—There has been a falling off in actuals below the revised estimate by Rs. 26–6–4, as the repairs to the municipal store-rooms could not be taken in hand before the close of the year owing to the non-receipt of the estimate in time.

36. *Repairs to Water-supply, &c.*—The amount of Rs. 13–7–6 over that allotted had to be spent in raising a parapet wall round a municipal well at the instance of the Magistracy from apprehension of danger to the public passing by it.

37. *Municipal Schools on Salary System.*—The decrease compared with the revised estimate is due to the advance of Rs. 125 made in the year for furniture and apparatus not having been adjusted within the year.

38. *Municipal Schools on Salary-result System—Contingencies.*—At the suggestion of the Educational authorities in March last some furniture had to be supplied to the Muhammadan salary-results school.

39. *Results Grants.*—The actuals under this head amounted to Rs. 159–15–0 against Rs. 300 and Rs. 208–11–0, the amount of the revised estimate and the actuals of the preceding year, respectively. The large decrease is due to very poor results produced by the two pial schools at the grant examination.

40. *Hospitals and Dispensaries.*—Compared with the revised estimate, there is a decrease of Rs. 15–6–8 in the establishment due to fines and stoppages in the pay of the hospital servants, Rs. 14–11–11 in medicines and supplies owing to variation in exchange at the time of remittance of cost of medicines to England, and Rupees 29–15–4 in sundries and contingencies partly due to the great economy observed in incurring contingent charges and partly to the less expenditure required in providing bedding and clothing than was first expected. The increase under diet of patients occurred owing to the admission of more patients during the latter part of the year than the average suggested.

41. *Hospital Contributions to Local Boards.*—The expenditure under this head following the receipts from sale of medicines and hospital subscriptions of which it is a moiety, Rs. 134–3–9 should have been paid, but the decrease of Rs. 9–12–6 is due to the board's share of receipts in March having been as usual paid in the following month.

42. One hundred and nineteen in and 12,436 out patients were treated in the hospital during the year under report, which showing an increase of 25 in the former and 2,543 in the latter proves the fact of the growing popularity of the institution which the council notes with great pleasure. The work of the midwife also showed some improvement, as the number of labour cases attended to by her during the year was 105 against 101 in the preceding year.

43. The construction of a new municipal hospital is still under correspondence. The plan and estimate of a hospital commensurate with the requirements of the police which the municipality has to build in case the present police hospital building is made over to them, were received from the Executive Engineer. But seeing that the cost of it and of making some additions to the present police hospital building to render it fitted for the municipal hospital would be so much as would suffice to build a new municipal hospital itself on an approved design, Government were requested to supplement the funds of this municipality and the matter is still pending with them.

44. *Contribution to Provincial Funds.*—The amount of the revised estimate (Rs. 90) was based on the usual budget figure; the actuals showing an increase of Rs. 32 were paid on the advice of the Accountant-General about the close of the year as is always the case.

45. *Vaccination.*—The municipal vaccinator was for nearly two months in charge of the local fund vaccine depôt without prejudice to his legitimate work, and was paid only by the district board. The amount of Rs. 32–14–6 falling short of the revised estimate represents the saving of the vaccinator's pay for that period.

Against the revised estimate of Rs. 50 under contingencies only Rs. 45–4–6 were expended. The saving of Rs. 4–11–6 was due to the supply of lymph at a cheaper rate. The number of cases vaccinated was 492 showing an increase of 26 over the preceding year. The particulars under this head are given in the accompanying report of the District Medical and Sanitary Officer. The work of the vaccinator was very satisfactory and also far more cheaply done, the average cost of each successful case having fallen to As. 6–9 from As. 9 in the previous year.

Against seventeen in the previous year, fourteen prosecutions were instituted during the year under report for failure to have children vaccinated.

46. *Birth and Death Registration.*—Two hundred and ninety-two births and 129 deaths were registered against 207 and 102, respectively, in the preceding year, and the birth and death rates per mille were 41·7 and 18·4 against 29·6 and 14·5. There were no cases of failure to register births or deaths.

47. *Conservancy—Road-cleaning Establishment.*—The savings under establishment and other charges (hire of sanitary carts) were due to the fines imposed on some sweepers, &c., and cartmen for laxity of work. As usual the number of public latrines was eight—three for males and five for females. Of these four are built with brick, one with stone and the rest with sun-dried mud bricks. Two latrines were repaired during the year at a cost of Rs. 21–9–4. Dry earth was freely used in all of them.

48. For reasons given in paragraph 28 *supra*, the number of private latrines on the 31st March 1896 was 125 against 106 in the preceding year. These were cleaned twice a day, and the work was supervised by the sanitary inspector. The cost of the private scavenging establishment consisting of three male scavengers was, as in the previous year, Rs. 198, and the service was worked at a net profit of Rs. 41–3–6.

49. *Lighting.*—The saving of Rs. 10–1–5 under contingencies was due to repairs of lanterns and some lamp-posts having actually cost less than the estimate.

50. *Avenue Contingencies.*—In the ends of economy the road coolies were utilized now and then for watering the few newly-planted avenues. There was thus a saving in the allotment under this head.

51. *Public Garden—Purchase of seeds, &c.*—Rs. 24–4–4 were spent against the revised allotment of Rs. 40. More expenditure could not be incurred owing to the dearth of water in the park for the upkeep of crops.

52. *Rewards for destruction of wild animals, &c.*—The decrease is due to a large quantity of strychnine purchased in the previous year for the destruction of stray and mangy dogs having remained for use during the year under report.

53. *Printing.*—The increase is due to the receipt, as usual, in the latter part of the year, of a bill from the Accountant-General for printing certain forms.

54. *Other Items.*—The sum of Rs. 60–5–3 shown under this head has the following items for its details :—

	Rs.	A.	P.
Assessment on dry lands included in the park and on the rubbish depôt	31	5	0
Fees for numbering carts	8	11	0
Tom-toming notices	2	1	0
Ropes and pots for use on all works	0	5	6
Preparing two sketches of vacant sites for submission to Government	7	0	0
Preparing three sign-boards for wells	3	0	0
Defending a civil suit brought against the municipality for recovery of profession tax collected	7	6	9
Written off advances	0	8	0
Total ..	60	5	3

55. The increase is mainly due to the expenditure incurred for successfully defending a civil suit brought against the municipality by a tax-payer for the recovery of a profession tax of Rs. 12–8–0 imposed on him as sowcar during the second half of 1894–95. The savings under office and collection establishments are due to stoppages in the pay of the office clerk and fines imposed on the bill-collector for short work. The increase under office contingencies occurred owing to the payment of a bill received about the close of the year for certain forms supplied from the V. N. Jubilee Press, Madras.

56. *Instalments paid during the year.*—At the commencement of the year under report the liabilities of this municipality were Rs. 1,508–8–2 due to the district board and Rs. 800 to Government being the balances out of the amounts of Rs. 2,000 and Rs. 4,000 received from them, respectively, for the erection of a new school-house. In the original budget estimate, an allotment of Rs. 1,200 was made for purpose of paying the district board alone, but the Government Order since received strictly enjoining that the amount due to Government should be paid before the close of the year, an additional allotment of Rs. 200 was applied for and

sanctioned in G.O., Mis. No. 1148 M., dated 24th July 1895, to repay the full amount due to Government appropriating Rs. 600 out of that proposed to be paid to the district board and it was done accordingly. It appeared subsequently that there were prospects of the year closing with a larger balance than anticipated in the revised estimate due to more income from certain sources and to embrace this rare opportunity to wind the council out of debts as much as possible, the payment to the district board was raised by Rs. 250. All endeavours are being made to liquidate the sum of Rs. 658–8–2 still due to the district board (which is all the liability of the council at this date) within the close of the current official year, if not earlier.

57. *Other Advances.*—The increase of Rs. 125 over the revised estimate is due to the advance made for furniture and apparatus required for the Municipal High school not having been adjusted before the close of the year.

58. The year closed with a balance of Rs. 1,145 against Rs. 234–4–10 in the previous year. The former includes Rs. 432–13–4, the amount of advances of two months' kists of tolls, weekly market and slaughter-house relating to this year (1896–97) having been credited to the respective heads.

59. *General Remarks.*—The sanitary improvements made during the year under report have already been brought to the notice of Government in the inspection report of the Deputy Sanitary Commissioner and Inspector of Vaccination recorded in G.O., No. 643 M., dated 8th April 1896. I beg to submit that steps are being taken for obtaining an iron sewage cart and iron hooks for the slaughter-house and roofing a public latrine and the slaughter-house and putting in order two of those public wells which have been remarked to be of faulty construction. The proposal to declare the tank reserved for drinking purposes and appoint a watchman to it has been given up as the tank extends far beyond the municipal limits where its pollution is not guarded against. The scheme for the diversion of the subsoil water of the tank, which was under consideration of the Sanitary Board, has been, I am informed, referred to the Public Works authorities, who are now preparing an estimate to render the bund water-tight.

60. I beg to bring to notice that the annual educational statements V-A and V-B, due in this office from the educational authorities on the 15th instant, have not as yet been received in spite of frequent reminders sent to the Assistant Inspector of Schools, Ceded Districts division, Bellary, for the same. The Inspector of Schools has also been addressed on the subject. These statements will, on receipt, be submitted with a covering report furnishing the required details.

61. A copy of the council's resolution approving this report is herewith submitted.

From Surgeon-Major H. M. HAKIM, Chairman, Municipal Council, Anantapur, to the Chief Secretary to Government, dated Anantapur, the 21st July 1896, Ref. on C. No. 87.

In continuation of my report on the administration of this municipality for the past official year, I have the honour to submit the following supplemental report in connection with education in this municipality during the same period.

2. The working of the municipal high school was satisfactory in the year under report. The strength of the school on the 31st March 1896 was 149 and the average attendance throughout the year showed a very great improvement, being 117 against 74 in the preceding year. The large increase is due partly to the addition of the primary department and partly to better instruction imparted during the year. Nine candidates were sent up for the Lower Secondary examination, of whom one secured a complete pass and two only in compulsory subjects. For the Matriculation examination ten were sent up, of whom three passed. The financial condition of the school also much improved, there having been a net saving of Rs. 189–12–5 (Rs. 228–7–1 from the upper secondary, Rs. — 517–5–0 from the lower secondary, and Rs. 99–1–6 from the primary department). The average net cost per pupil in each department was as detailed in the margin. The decrease is due to larger income from school fees and provincial grant.

	1894-95. Rs.	A.	P.	1895-96. Rs.	A.	P.
Upper Secondary ..	23	4	0	7	14	0
Lower Secondary ..	—4	12	9	—8	9	11
Primary				3	8	8

3. The instruction imparted in gymnastic exercises was, as usual, good. An addition of forty volumes was made to the library, new furniture, maps and an electric plate machine supplied to the school. Rs. 125 were advanced during the year for the last said two items which not having been adjusted befere the close of the year a large amount has to be shown as net saving. The Educational statements are herewith submitted. Statement V-A relating to the municipal high school was received only yesterday after repeated reminders. After all, it does not furnish the details required nor is it quite accurate. The net difference of Rs. 8-3-6 in school fees has occurred as follows:—As. 12-6, school fees relating to Muhammadan salary-results school, was by an oversight shown under municipal high school, and Rs. 9 which was refunded to a student by the headmaster was erroneously shown both under receipts and charges.

4. The amount under "Other receipts" should be Rs. 27-12-6, the difference of Rs. 12 being the cost of two old benches of the municipal high school disposed of. The former amount compared with this office figure shows an increase of Rs. 9-4-6. This, the headmaster reports, is the amount of library fees received by him from certain students and spent in purchasing library books without crediting it to municipal accounts. This is also erroneously added to both sides of the account. The increase of Rs. 143-4-6 under contingencies compared with this office figure is due (1) to Rs. 125 advanced for furniture and apparatus during the year, but not adjusted within the year, being shown in Statement II under "Advances recoverable" whereas the headmaster shows it under the regular head of "Contingencies"; (2) to the two differences explained in the preceding paragraphs amounting to Rs. 18-4-6.

5. The headmaster is a Master of Arts and has evinced a great zeal in the progress of the institution. He completed the L.T. degree last year. The first assistant, an F.A. who was trained as a Matriculate, was required to go up for training again, but the Director exempted him for one year as he is now studying for B.A., which when he passes he should pass L.T. and his undergoing training now is not therefore useful. The second assistant, a graduate, was plucked last year in the practical portion of L.T. The third assistant was exempted from undergoing training in consideration of his vast experience.

6. The lower secondary department is more than self-supporting. It was the case even last year when the financial condition of the school was in a very crippled state. The reduction of scale of establishment brought into force last year affected, so far as it related to old teachers, only the third and fourth assistants. But the former, for reasons stated above, was given his usual pay of Rs. 40 a month and the only subordinate remaining affected is the fourth assistant, who was recommended in the current year for the maximum pay of Rs. 30 but he was granted only an increase of Rupee one.

ENCLOSURE.

CONCISE REPORT on the working of the Municipal Hospital, Anantapur, for the official year 1895-96.

1. *Public Health.*—The health of the town during the year under review has been good. An epidemic of influenza prevailed during the latter part of February and whole of March, the disease having been imported from Mysore territory; no case proved fatal under treatment. Fevers prevailed to a greater extent than last year. One thousand two hundred and ninety-six cases were treated against eight hundred and sixty-three in the previous year, the increase being due to the tank receiving a certain supply of water and consequent increase in the sub-soil moisture, which is considered one of the chief causes in the production of fevers. Although cholera prevailed in two taluks of the district, this town was happily free from it.

2. *Vital Statistics.*—There were 292 births and 129 deaths registered during the year under review, against 207 births and 102 deaths in the previous year. The deaths were from the following causes:—Small-pox 5, fevers 62, other causes 58, accidents 2, wound 1, and drowning 1. A separate registrar of births and deaths has been employed throughout the year and the registration is satisfactory.

3. *Sanitation.*—(1) The conservancy establishment consists of one inspector, two peons, fourteen sweepers, eight public latrine toties and three private scavenging toties, three rubbish-carts, and one night-soil cart of an approved pattern has been obtained for use since October last in place of the old night-soil cart which was of an obsolete pattern.

(2) The street sweepings and house refuse are collected in dust-bins and carted twice a day to the rubbish depôt about a mile-and-a-half towards the north of the town on the side of the Gooty road and sold by auction to be used as manure. The night-soil from eight public and 125 private latrines is removed twice a day in an iron covered cart and buried in trenches near the rubbish depôt. There has been hitherto very little demand for night-soil as manure, but about the end of the year a ryot came forward to have the night-soil deposited in trenches in his own fields on payment. Of the eight latrines, three are of mud, four of brick and one of stone; and these are all mere enclosures. Dry-earth is being used freely throughout the greater part of the year except during the rainy season when there is much difficulty in procuring and storing it. Two of the latrines were repaired during the year—one male and the other female latrine. These latrines are used by a limited number of people as the majority resort to the fields in the neighbourhood. The council have made provision for roofing some latrines in the budget for 1896-97 and that will mend matters to some extent, and I have suggested that seats also should be provided as far as the funds would permit.

(3) *Drainage.*—There is no proper system of drainage. The main streets are provided with rough stone drains to carry away the surface and rain water to the neighbouring fields. The main drains of the bazaar street are covered over by platforms which prevent the scavengers from cleaning them properly; repeated representations on the subject have had no effect. A new platform over the bazaar drains is now under construction and the matter has been reported to the District Magistrate for necessary action. The small streets and lanes have side-cuttings which are renewed every year before the monsoon. The whole town is honeycombed with cesspools and every house has more than one. These cesspools are cleaned only when they are full or smell from them is very offensive and unbearable. The municipality is endeavouring to improve the condition of cesspools by ordering the construction of pukka impermeable ones when they are to be newly opened or the old ones repaired.

(4) *Drinking-water.*—Drinking-water is from a large tank close to the town and twelve wells. The former supply, which is limited to three or four months in the year, is much used by a certain community of the town, though contaminated by bathing and washing. Of the wells "Garabhavi" is much used for drinking purposes. Every one of the wells has a signboard and some of the wells are protected by parapet walls. The following improvements have been made in the water-supply:—Garabhavi, Subbarayani Bhavi and Bakavandla Bhavi have been cleaned of their silt and provision has been made for cementing the casing wall.

4. *Vaccination.*—The municipal vaccinator, who works under the direct supervision of the District Medical and Sanitary Officer, has vaccinated 492 cases during the year under review against 466 cases in the previous year, thus showing an increase of twenty-six cases. Of the cases vaccinated, 456 were successful, nine unsuccessful, and twenty-seven unknown. The infantile vaccination out of the whole number amounted to 230, of which 228 were successful and two unknown. The total number of births registered from 1st October 1894 to 30th September 1895 was 272, of which 176 were vaccinated, forty-six died, forty-six left the town, one sick and guardians of three were reported to the magistrate for non-compliance with vaccination rules. The percentage of successful cases of primary vaccination being 98·91 and of re-vaccination 84·72. Average cost of each successful case of vaccination was As. 6-9 against As. 9 in the previous year. The municipal vaccinator has been in charge of vaccine depôt since 15th December 1895 without prejudice to his own work. His work has been satisfactory and there are very few unprotected children notwithstanding the opposition and aversion of people to vaccination. Vaccination is compulsory in the station and fourteen cases were reported for failing to get the children vaccinated during the year.

5. *Hospitals and Dispensaries*—(*a*) *Nature and sufficiency of Accommodation.*—The present building consists of (1) main ward for eight beds; (2) a small ward for four beds in continuation of the main ward towards the west is used as office of the District Medical and Sanitary Officer. An enclosed verandah attached to No. 2 ward is used as store-room. Near the north-eastern end of the compound is a small room for two female patients. A thatched shed for six female patients and another shed close to the surgery is set apart for the examination of private cases. Surgery room is very small and quite unsuited for the purpose.

(*b*) *State of Repairs.*—The main building, which was in the occupation of the police sick up to July 1894, has been condemned as insanitary by all inspecting officers, and the erection of a suitable building seems to be as far as ever, and until Government kindly step in and provide a hospital as they have done the school, this long-felt want will remain unrealized. The limited accommodation and insanitary surroundings account for the too small number of in-patients treated at the hospital.

(*c*) *State of repair of Furniture.*—Hospital furniture is old and requires to be replaced. Six new iron cots were purchased during the year to replace old insanitary wooden ones, and one was a gift of Mr. F. A. Nicholson, Collector of the district. Bedding and clothing was replenished at an expense of Rs. 30 during the year.

(*d*) *Inspections.*—(1) The hospital was not inspected by the Surgeon-General with the Government of Madras during the year under review. Recommendation made in the previous year regarding the hospital has not been carried out, but is under contemplation and Government have been addressed on the subject.

(2) The Inspector of Vaccination and Deputy Sanitary Commissioner, Madras, inspected the hospital during the year and his recommendation regarding the construction of a new hospital near the railway station is still under consideration.

(*e*) Amount of recoveries from patients for diets—*Nil.* Amount of recoveries for medicines—Rs. 268-7-6.

(*f*) *Number of Patients treated as compared with the previous year.*—Total number of patients during the year under report was 119 in and 12,436 out patients against 94 in and 9,893 out patients, thus showing an increase of 25 and 2,543 cases, respectively. The increase in the number of in-patients is due to the eight additional beds of the old police hospital transferred to the municipality having been available, and that of the out-patients is due to the absence of cholera scare, which in the previous year prevented the people of the neighbouring villages from seeking treatment at this institution, and to the rising popularity of the institution and also to the prevalence of influenza during the latter part of February and whole of March. The following table shows the working of the institution for the last five years:—

Years.	In-door.		Out-door.	
	Total treated	Average daily sick.	Total treated.	Average daily sick.
1891–92	81	2·72	10,413	108·29
1892–93	68	1·85	9,906	112·26
1893–94	62	1·64	11,080	113·59
1894–95	94	3·57	9,893	74·18
1895–96	119	6·09	12,436	76·45

(*g*) *Mortality and actual causes of it.*—There were four deaths during the year against five in the previous year. One death occurred from Bright's disease, one from gastro-enteritis, one from cancer of breast, and one from chronic enteritis.

(*h*) *Operations and Results.*—Twenty-nine major and 510 minor operations were performed during the year, against 31 major and 312 minor operations. One death occurred from thrombosis of heart 2½ hours after delivery by version in placenta prævia. The small area of the town and district, aversion of the people to submit to operative treatment and the limited accommodation and insanitary surroundings account for the small number of major operations.

(*i*) *Establishment whether sufficient and efficient.*—Establishment consists of one compounder, one midwife, one ward attendant, one cook, one peon and one toti. The services of a nurse and a female toti are required to complete the establishment.

(*j*) *Midwife.*—Midwife Murthay has conducted 105 cases during the year against 101 in the previous year. She was qualified at the Government Lying-in Hospital, Madras, and her work has been fair considering the number of barber women who not only conduct cases but also perform all sorts of menial work for a fortnight for a paltry fee varying from As. 4 to As. 8. She is paid Rs. 15 a month—two-thirds from the local funds and one-third from the municipality.

(*k*) There is no separate ward set apart for gosha or caste women. But whenever gosha or caste women are admitted, every consideration is shown to them by issuing raw rations and treating them separately.

(*l*) *General Remarks.*—Municipal funds do not admit of expenditure on some much needed improvements. The undersigned was in charge of the institution during the year under review.

ANANTAPUR, 26*th May* 1896. (Signed) H. M. HAKIM, Surgeon-Major, *District Medical and Sanitary Officer.*

E. on C. No. 1196.

Submitted.

2. There has been considerable improvement in the condition of the roads, which is due to the exertions of the present Chairman. Their condition is good.

30*th May* 1896. (Signed) J. WILLIAMS, *Ag. Deputy Collector.*

N. Dis. C. No. 1571.

Submitted to the Chief Secretary to Government, Local and Municipal Department, Fort St. George, Madras.

ANANTAPUR, 3*rd June* 1896. (Signed) K. C. MANAVEDAN RAJA, *Acting Collector.*

ORDER—No. 1403 M., dated 20th August 1896.

The receipts and charges of the Anantapur Municipality for 1895–96 are compared below with the budget and revised estimates for the year and the actuals of 1894–95:—

—	Actuals, 1894–95.	Budget estimate, 1895–96.	Revised estimate, 1895–96.	Actuals, 1895–96.

2. The municipal council held 24 meetings against 32 in the previous year. The average attendance of the official members continued to be fair, but that of the non-officials declined and was decidedly indifferent.

3. *Receipts.*—(1) Owing to the circumstances explained by the Chairman in paragraph 5 of the report, there was an increase of 41 in the number of persons assessed to the tax on arts and of Rs. 400 in the net current demand under this head. The average incidence of this tax also rose from Rs. 3–8–4 to Rs. 4–2–4. There was a trifling increase in the demand of the tax on buildings, but that of the tax on lands showed a marked decline. It is to be regretted that, notwithstanding the remarks of Government in paragraph 3 of its review of the report for the previous year, the duty of fixing the original assessments under the land tax was left to the council instead of the Chairman. The matter referred to at the conclusion of paragraph 13 should form the subject of a separate communication.

(2) The current collections under the principal taxes improved. They were good under the taxes on arts and buildings, but not under the land tax. The realization of arrears under the house tax improved and was fair, but that under the arts and land taxes declined. Coercive measures were adopted to a much larger extent than in the previous year and their execution was effected with promptitude.

(3) There was an increase in the receipts from the taxes on vehicles and animals and carts and a more marked rise in the income from school fees and fines. On the other hand, the receipts from the sale of sweepings showed a decline, which is explained in paragraph 17 of the Chairman's report. The remark in paragraph 25 with regard to leniency on the part of the Bench Magistrates in inflicting fines will be brought in the Judicial Department to the notice of the District Magistrate.

(4) The number of houses served by the private scavenging agency and the collections under this head improved, and the service was worked at a small profit of Rs. 41 to the municipal council. As, however, this system is now adopted by less than 9 per cent. of the total number of houses assessed to the tax on buildings, its extension is essential and earnest efforts should be made by the council to achieve this end in the current year.

4. *Expenditure*—(1) *Public Works.*—No new work of any importance was undertaken during the year. The outlay on communications amounted to Rs. 817, or 43·3 per cent. of the net municipal income from tolls against the minimum of 50 per cent. fixed by Government, but the town roads are reported by the Revenue Divisional Officer to have been in good order.

(2) *Education.*—The council spent a net sum of Rs. 451 on primary education and worked its secondary school at a profit of Rs. 271. The total net expenditure on education was thus Rs. 180, or only 2·4 per cent. of the receipts from taxation. As in the previous year, the municipal council maintained a high school on the salary system, to which a primary department was added during the year, and a primary school for Muhammadans on the salary-result system. The attendance at the high school improved, but that at the Muhammadan school fell from 36 to 27; the decrease has not been explained. The results of the Matriculation and of the Lower Secondary examinations were poor. The council continued to aid two primary schools with result grants. The attendance at these institutions fell from 109 to 87; but the results of the grant examinations were satisfactory. It is to be regretted that, for the reason assigned in paragraph 39 of the Chairman's report, nearly 47 per cent. of the allotment for grants was not utilized. The total number of boys under instruction in the municipal and aided schools rose from 46·7 to 50·4 per cent. of the male population of school-going age. The attention of the Director of Public Instruction will be drawn to the delay in the submission of the educational statements referred to in paragraph 60 of the Chairman's report.

(3) *Medical Relief.*—The number of in and out patients treated at the municipal hospital rose from 94 and 9,893 to 119 and 12,436, respectively, the increase being attributed to the growing popularity of the institution. The midwife attached to the hospital attended 105 cases of labour against 101 in 1894–95. This can hardly be regarded as an improvement.

(4) *Vaccination and Vital Statistics.*—The total number of vaccine operations performed during the year rose from 466 to 492 and the quality of the work done also improved, 92·7 per cent. of the total number of operations having been successful against 88·0 per cent. in 1894–95. Infantile vaccination also showed a considerable advance, the number of children under one year successfully vaccinated being 32·6 per mille of the population against 24·7 in the previous year. It also appears from the last inspection notes of the Deputy Sanitary Commissioner that the number of unprotected children in the town is small, which is very satisfactory. The cost of each successful operation fell from As. 9 to As. 6–9, but it was still higher than it should be and steps should be taken to reduce it in the current year.

There was an improvement in the registration of vital statistics, which appears to have received some attention. The birth returns may now be regarded as fairly complete, but those of deaths are still considerably below the normal rate. Increased attention should be paid to this in the current year.

(5) *Sanitation.*—The allotment under this head was exceeded by nearly 2 per cent. and the expenditure amounted to 17·1 per cent. of the receipts. The Government is glad to observe from paragraph 59 of the Chairman's report that the

remarks and suggestions of the Deputy Sanitary Commissioner in his last inspection notes have received some attention. Several defects are, however, pointed out by the District Medical Officer which should be remedied, as far as funds permit. With reference to paragraph 52 of his report the Chairman will be requested to report the procedure adopted in destroying dogs by strychnine therein referred to.

5. *General Remarks.*—The year closed with a balance of Rs. 1,056, or 6·7 per cent. of the receipts.

The administration of the municipality during the year under review showed a considerable improvement on that of the previous year in several respects, and with the exception of the registration of deaths was satisfactory.
