No. M., June 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From the Hon'ble K. KALYANA SUNDARAM AIYAR Avargal, Chairman, Municipal Council, Tanjore, to the Chief Secretary to Government (through the Divisional-officer, Tanjore), dated 30th May 1896, No. 865.

I have the honour to submit my report on the working of this municipality for the year 1895–96, together with the statements of receipts and charges in the prescribed form.

2. The report was adopted by the council at a meeting held on the 27th May 1896.

3. The accounts of the year are being audited.

I.—CONSTITUTION OF THE COUNCIL.

4. Out of the maximum number of 24 councillors sanctioned for this municipality, there were four vacancies at the beginning of the year. Eleven vacancies occurred during the year. Out of these fifteen vacancies, fourteen were filled up during the year—thirteen by election and one by nomination. The number of registered voters for the year was 1,758.

5. M.R.Ry. K. S. Srinivasa Pillai Avargal, who was Chairman in the beginning of the year, having resigned his office, the Divisional-officer was in charge from the 4th November to the 19th December 1895. I was elected Chairman on the 18th November 1895 and took charge of the office on the 20th December 1895.

6. There were 59 meetings during the year, fourteen of which had to be adjourned for want of a quorum. The average attendance of the councillors is compared below with that of the previous year:—

	1894–95.	1895–96.
Officials	1	2
Non-officials	11	9
Average attendance	12	11

II.—RECEIPTS.

7. The opening and closing balances and receipts and charges for the year under report are shown below:—

	Rs.	A.	P.
Opening balance	1,21,454	0	1
Receipts	90,695	9	4
Total ..	2,12,149	9	5
Charges	1,41,427	10	8
Closing balance	70,721	14	9
Total ..	2,12,149	9	5

The great disparity between the closing balance of 1894–95 and that of 1895–96 is due to the fact of the greater portion of the unexpended allotment for the Tanjore water-works having been spent during the year under report.

8. The balance at the end of the year as per treasury pass book was Rupees 83,252–2–9, while according to the municipal cash book it was only Rs. 79,776–11–0, inclusive of deposits. The difference is due to cheques to the extent of Rs. 3,475–7–9 issued during the year having remained uncashed on the 31st March 1896.

9. I will now proceed to refer to such of the items of receipts as seem to call for special notice.

10. *Tax on Arts.*—This tax was further revised during the year. The demand for the year as so revised was Rs. 13,774–8–0. A sum of Rs. 443–8–0 was remitted by the council on appeal, leaving a settled demand of Rs. 13,331. Comparing the figures for 1894–95 and 1895–96, Rs. 13,000 in round numbers may be put down as the normal demand of the municipality under this head as assessed under Act IV of 1884.

11. Out of the current demand, a sum of Rs. 8,983 was collected during the year leaving a balance of Rs. 4,340, and thus showing some improvement as compared with 1894–95. A portion of this balance, viz., Rs. 1,005, has since been collected.

12. Out of the arrear demand of Rs. 10,791–8–0, a sum of Rs. 3,494–14–10 was collected during the year. A sum of Rs. 1,504 was remitted by the council, leaving a balance of Rs. 5,792–9–2. I am afraid that a very considerable portion of this balance will finally have to be written off the accounts, inasmuch as lists prepared by bill collectors, in which recommendations for remissions are made, are now under scrutiny.

13. *House-tax, Current.*—This tax was last revised in 1892–93, and the registers were written up during 1894–95. The finally-settled demand for the year under report was Rs. 21,672–12–6. Out of this sum, Rs. 18,856–6–6 were collected during the year leaving a balance of Rs. 2,816–6–0, out of which a sum of Rs. 622–1–0 has since been collected.

14. *House-tax, Arrears.*—Out of the arrear demand of Rs. 5,049–7–2, a sum of Rs. 2,733–6–11 was collected and a sum of Rs. 568–13–0 was remitted during the year, leaving a balance of Rs. 1,747–3–3. Of this balance, a sum of Rs. 573 has been recommended for remission, and the lists are now under scrutiny and a small portion, Rs. 33–11–6, has since been collected.

15. *Land-tax, Current.*—This tax was revised during the year under report. The settled demand under this head was Rs. 3,394–15–6. Out of this sum, Rs. 1,723–8–0 were collected during the year, leaving a balance of Rs. 1,671–7–6. Out of which a small sum of Rs. 367–8–0 has since been collected.

16. *Land-tax, Arrears.*—Out of the arrear demand of Rs. 3,636–6–0, Rupees 1,478–10–0 were collected and Rs. 438–13–0 were remitted during the year, leaving a balance of Rs. 1,718–15–0. Of this a small sum of Rs. 20–9–0 has since been collected, and remission lists to the extent of Rs. 420 are under scrutiny.

17. *Water-tax.*—This tax was newly imposed during the year under report. The settled demand under this head was Rs. 13,533–9–0. Out of this, Rs. 10,350–3–4 were collected during the year, leaving a balance of Rs. 3,183–5–8. The water-works were opened during the year, but the whole of the municipality does not enjoy the benefit of the new water-supply. Residents of such portions of the town as are not served by the water-works make complaints about the imposition of the tax on all alike, and throw great difficulties in the way of its easy collection. It is in contemplation to utilize the expected balance out of the allotment for the water-works in extending the works, but it is feared that it will not be ever possible to reach all parts of the town. In these circumstances, I am afraid that, in order to avoid possible dissatisfaction, the council will at no distant date have to consider the advisability of recommending Government to exempt, under clause (2) of section 75 of the Municipal Act, some parts of the town from the payment of this tax.

18. *Tolls.*—The toll-gates of the town were farmed out for Rs. 25,010 as against Rs. 24,570 in the previous year. The whole of this sum and interest, Rs. 199–0–11, due on instalments not duly paid, were collected during the year. The one-third contribution due to the district board was also paid up during the year. The net income under this head was Rs. 16,806–0–8 against Rs. 16,419 (audited figure) in the previous year.

19. *Private Scavenging.*—The number of houses served during the year was 763, showing an increase of 53 over those served during the previous year. The fees collected amounted to Rs. 956, giving the municipality a profit of Rs. 85–6–8 against Rs. 206–2–0 in the previous year. The difference is due to the fact of the municipality having employed during the year two additional toties within the budget allotment for the more efficient performance of the work.

20. In this connection, I may bring to the notice of Government the difficulty that exists in the development of the system of private scavengering in this municipality. Enquiry and inspection show that there is a large number of houses, especially in the fort and in the Manambuchavadi ward, which are altogether unprovided with privies, and the owners, both males and females, consequently resort to the public latrines and to the uncultivated and uncultivable waste lands lying outside the municipal limits for the purpose of easing themselves, and during nights clandestinely use the public streets and drains for this purpose. The most effective way of affording relief to such people would be by constructing additional public latrines in suitable localities and arranging for the prompt and constant cleaning thereof. I spoke to Dr. Thompson on this subject, and we had intended to go about the town and select suitable places for the construction of these additional latrines; but that gentleman has since been transferred, and so I will consult his successor Dr. Lee as soon as I can and place before the council any arrangements that we may agree upon.

21. The other items of receipts are sufficiently explained by the accompanying statements and call for no special remarks.

22. The incidence of taxation inclusive of tolls was, for the year under report, Rs. 1–4–9 per head of population as against Rs. 1–3–2 of the previous year. The increase is due to the imposition of the water-tax during the year. The incidence of income per head of population was Rs. 1–10–8 as against Rs. 3–8–0 of the previous year. This decrease is accounted for by the fact of there having been special grants of large sums of money in 1894–95 on account of the water-works and for the repair of a road which had been washed away by flood.

III.—Expenditure.

23. The total expenditure during the year under all heads was Rs. 1,41,427–10–8 as shown below :—

	Rs.	A.	P.
Grant I	84,370	2	8
„ II	8,664	13	4
„ III	17,926	15	3
„ IV	8,487	2	6
„ V	7,251	13	6
Repayment of debt and interest	14,145	11	11
Advances recoverable	393	2	0
Refunds other than current collections	82	13	6
Pensions and gratuity	105	0	0
Total ..	1,41,427	10	8

24. *Grant I, Public Works.*—The expenditure under this head included a large sum of Rs. 54,860–8–0 on account of the water-works, which were completed and opened during the year.

25. Under the head of "New works—Communications" a sum of Rs. 1,369–5–6 was spent against Rs. 1,000 provided in the revised estimate. The increase was mainly due to the council having paid during the year a sum of Rs. 342–3–9 on account of a road-dam, which had been constructed and completed but not fully paid for in 1894–95.

26. Under the head of "Buildings" Rs. 2,600 were provided in the revised estimate, but a sum of Rs. 1,074 alone was spent during the year. The reason for this short expenditure was as follows. A sum of Rs. 1,000 was provided for improving the East-gate slaughter-house. The site on which this building stands belongs to the district board and has been leased out to the municipality for ten years. There was some difficulty in arranging for the repayment to the municipality of the value of the proposed building at the end of the term of the lease. It was finally settled that the site should be acquired under the Land Acquisition Act, and proposals for the purpose have been sent by me and are now pending before the Collector. The work in question had therefore to be postponed. A sum of Rs. 1,600 was provided for the construction of latrines. Only one, however, was constructed during the year, but the account with the contractor could not be closed on the 31st March 1896, and so a sum of Rs. 700 alone was paid during the year. The balance due has since been paid. The council found that no more latrines could be constructed during the year, and so a portion of the allotment was used for making certain necessary additions to the dispensary building in Karuntattangudi and providing the travellers' bungalow with a compound wall.

27. *Drainage.*—The provision made under this head was Rs. 1,200, but the expenditure was Rs. 1,546–11–4. The excess was due to minor drainage works of an urgent character not provided for in the budget having been sanctioned by the council and executed during the year.

28. *Water-supply.*—Under this head a sum of Rs. 54,978–6–0 was spent during the year. The major portion of it, viz., Rs. 54,860–8–0, was spent on the water-works as stated in paragraph 24 *supra*, and the balance was spent on improving a municipal well and providing the dispensary building at Karuntattangudi with a water-tap.

29. *Repairs—Communications.*—The expenditure under this head was Rs. 9,520–1–2 as against a provision of Rs. 6,000 in the budget and revised estimates. The increase was necessitated by various unforeseen repairs and was met from savings under other heads of grant I.

30. *Buildings—Repairs.*—The provision made in the estimates under this head was Rs. 2,000, but the expenditure was Rs. 997–5–7. Some further repairs under this head were also executed, but as they were not completed during the year, payment had to be postponed till this year.

31. *Repairs—Drainage.*—The allotment under this head also was Rs. 2,000. The expenditure came to Rs. 1,385–13–7. The decrease was principally due to the adoption of the system of giving contracts for the execution of the works to the lowest bidders. The work so executed was found unsatisfactory, and the system has been since given up.

32. *Tolls and Roads.*—The outlay on roads during the year was Rs. 10,889–6–8 (New Works and Repairs—Communications) and the net income from tolls after deducting the usual contribution to the district board was Rs. 16,806–0–8.

33. *Grant II, Education.*—The expenditure under this head was Rs. 8,664–13–4 as against an estimate (revised) of Rs. 9,410. The decrease was due to the full provision of salary grants not having been earned by the schools in the town, and only a small portion (Rs. 96–4–0) of the estimate of Rs. 560 under building and furniture grants having been recommended by the Educational authorities for payment.

34. *Salary-result System Schools.*—There are three schools under the direct management of this council for the education of three backward classes, viz., the Muhammadans, the silk-weavers and the Paraiyas of the town. The number of pupils on the rolls of these schools is shown in the margin. The students in the Muhammadan and Paraiya schools consist only of boys, while those of the silk-weavers' school consist of boys and girls (66 and 34 respectively). There was a fall in the strength of the Muhammadan school as

	No.
Muhammadan school	46
Silk-weavers' Telugu school	100
Paraiya school	57

compared with the year 1894–95, but this is due to the existence of two other private schools for Muhammadans, one of which was started during the year under report. The decrease does not therefore show that the desire for education among the Muhammadans of the town has diminished. The Government will be glad to note that the strength of the Paraiya school has increased; and the expenditure upon it during the year was Rs. 159–8–1 as against Rs. 68 in 1894–95. The council has sanctioned the use of a better building on an increased rent for this school and is prepared to do everything in its power to improve the school.

35. *Salary Grants.*—One of the six schools that were aided in 1894–95 on this system did not make a claim for grant during the year under report. It appears to have been closed. There was accordingly a diminution in the strength of the schools that were actually aided and in the amount paid to them by the municipality which was Rs. 1,664–0–1 against an estimate of Rs. 2,000 and an expenditure of Rupees 1,803–11–0 in the previous year.

36. *Result Grants.*—It is gratifying to note that there was an increase during the year in the number of schools aided by result grants. The total number aided was 38 against 35 schools in 1894–95. The expenditure under this head was Rs. 5,068–14–0 against a provision of Rs. 4,900 in the estimates and an expenditure of Rs. 4,672–11–5 in 1894–95. The increase was of course due to the increase in the schools and was met from savings under the heads of the same grant. The number on the rolls on the 31st March 1896 was 2,212 boys and 26 girls against 2,054 boys and 27 girls on the 31st March 1895.

37. *Girls' Schools.*—It was during the year under report that the first provision was made by this council for the education of girls by the appointment of a schoolmistress for girls in the silk-weavers' school.

38. *Grant III—Sanitation and Medical Services.*—There are two dispensaries under the council's management for out-patients alone. A sum of Rs. 2,067–2–5 was spent upon these institutions against a provision of Rs. 1,920 in the estimates. A contribution of Rs. 1,500 was paid as usual to the Raja Mirasidar hospital and a sum of Rs. 55–14–0 was paid on account of the Provident Fund bonus payable by the hospital assistants in charge of these dispensaries.

39. I regret I am unable to submit the report of the District Medical and Sanitary Officer as it has not yet been received by me.

40. *Contribution to Provincial Funds.*—A sum of Rs. 700 was provided in the estimate on account of the proportionate contribution for the cost of sanitary inspection, but only Rs. 280 was paid on this account as per Treasury Deputy Collector's advice.

41. *Medical Training of Women.*—This council has taken no action towards getting female medical practitioners educated at its cost. It passed a resolution on the 28th August 1895 by which it resolved to await the action taken by the Tanjore District Board in this direction.

42. *Vaccination.*—The number of cases operated during the year by the vaccinators and the medical subordinates in charge of the two municipal dispensaries was 1,987 as against 1,894 in the previous year. Of these cases, 1,933 proved successful. This branch of municipal work is under the control of the District Medical and Sanitary Officer, and in the absence of his report, I am unable to make any further remarks on this subject.

43. *Midwives.*—There are two midwives, one attached to each of the municipal dispensaries, but I am not in a position to say anything about their work as the report of the District Medical and Sanitary Officer has not yet been received.

44. *Registration of Births and Deaths.*—The number of births and deaths during the year was 1,631 and 1,367 against 1,601 and 1,417 in the previous year. The sub-registrars have been directed to attend their offices between 11 A.M. and 4 P.M. and at other times of the day to go about their divisions and to find out whether all occurrences are regularly reported. The council believes that their work is now more carefully performed than in the previous year.

45. *Deaths.*—The causes of the 1,367 deaths are distributed thus :—

Cholera	4
Small-pox	28
Fevers	331
Bowel-complaints	299
Snake-bite	..
All other causes	705
Total ..	1,367

46. *Conservancy.*—The conservancy arrangements for 1895–96 were the same as those for 1894–95. The want of a proper latrine near the big market had been seriously felt and it has now been supplied by the erection of a big latrine at a suitable place near it. Two temporary tatty latrines were also constructed—one near the big market and the other for the use of chucklers. Improvement has also been effected in the mode of disposal of night-soil, as the council has now made suitable arrangements for burying it in trenches and the contractors are strictly compelled to carry them out.

47. *Grant IV—Lighting and Miscellaneous.*—The total expenditure under this grant was Rs. 8,487–2–6 against a provision of Rs. 9,670 in the estimates.

48. The arrangements made for lighting the town were the same as in 1894–95, and the difference between the allotment of Rs. 4,650 and the actual expenditure of Rs. 4,078–12–10 was principally due to the disparity between the amount provided for purchasing kerosine oil (Rs. 3,290) and the amount actually paid to the contractor, who supplied it to the municipality, viz., Rs. 2,732–2–7.

49. *Travellers' Bungalow.*—A provision of Rs. 300 alone had been made in the budget and revised estimates on account of the travellers' bungalow. The amount spent, however, was Rs. 376–5–9. This increase was found necessary to remedy the complaints made from time to time about the want of suitable furniture, &c., in the bungalow.

50. *Public Garden.*—A sum of Rs. 2,550 was provided in the estimates on account of the "Public gardens." The actual expenditure was Rs. 1,514–0–5. There was an unexpended balance of Rs. 1,000 and odd out of the sum of Rs. 2,000 set apart for the special improvement of the Sivaganga garden. The work for which this provision had been made has already in this year been given on contract and will soon be executed.

51. In the year under report the first instalment on account of the principal amount of the loan advanced by Government to the municipality on account of the water-works was paid by it. This with the interest due on the loan came to Rs. 14,145–11–11.

52. The other items of charges under the various grants do not call for any special remark.

53. The year closes with a balance of Rs. 70,721–14–9.

54. In conclusion, I have the honour to state that the Chairman has been cordially supported by the council in the administration of the municipality.

× × × × × × × ×

From the Hon'ble K. KALIYANASUNDRAM IYER Avergal, Chairman, Municipal Council, Tanjore, to the Chief Secretary to Government (through the Divisional Officer, Tanjore), dated 15th June 1896, No. 915.

In continuation of my administration report, dated 30th May 1896, No. 865, I have the honour to submit the concise medical report of the District Medical and Sanitary Officer since received.

2. The number of latrines as given in the enclosure is incorrect. The actual

3. Under the head of conservancy establishment, the District Medical Officer says there were 88 sweepers employed. It would be more correct to say that there were 31 sweepers and 57 drain-cleaners.

4. All the sanitary inspectors work under the direction of the Chief Sanitary Inspector, but to avoid delay their diaries are submitted direct to the Chairman. The District Medical Officer's statement that no diaries are submitted by the Chief Sanitary Inspector is inaccurate, for, as a matter of fact, diaries are received from him by the Chairman every day. I do not see what further authority should be given to the Chief Sanitary Inspector over the other inspectors. If they disobey his directions, he has simply to report them to the Chairman.

5. There is another point on which the District Medical Officer's information is not quite correct. He believes that the sanitary subordinates are *to a large extent* employed in tax-collecting. This is not so. For a long series of years, they have been entrusted with the duty of collecting the private scavenging fees, the license fees for dangerous and offensive trades and the tax on vehicles and animals. This part of their work does not take up more than a few hours every week.

6. The cost of maintaining the vaccine depôt is inaccurately given by the District Medical Officer. The correct figures are those given by me.

7. In the number of patients treated in the municipal dispensaries, the District Medical Officer includes the 40 cases that remained undischarged on the 31st March 1896, while they are excluded from the statement submitted by me.

8. The work turned out by the municipal midwives is very satisfactory as compared with the previous year.

ENCLOSURE.

CONCISE Annual Medical Report for 1895–96.

I. Public health.—The general health of the public throughout the year was good, and no outbreak of cholera or other epidemic disease occurred.

Four deaths from cholera were reported, but it was ascertained after careful enquiry that in no instance was the disease contracted in the town.

II. Vital Statistics.—The total number of births and deaths registered was 1,631 and 1,367, respectively. Of the deaths, 4 were from cholera, 28 from small-pox, 331 from fever, 299 from diarrhœa and dysentery and 705 from all other causes.

The enforcement of the provisions of Act IV of 1884 regarding the registration and regulation of burial-grounds was recommended in last year's report and the attention of the council is again invited to this subject.

III. Sanitation.—The removal of town refuse, sweepings, &c., is leased to two individuals who supply 24 carts and pairs of bullocks for the purpose at the rate of Rs. 13 for each cart per mensem. The sweepings become the property of the same contractors who pay Rs. 2,200 for them, thus the net cost of their removal is Rs. 1,544 per annum. The drawback to this system is that only matter of saleable value is removed, while other rubbish is allowed to accumulate in the streets. Moreover, the contractors' employés are not under the control and therefore pay no attention to the orders and instructions of the municipal sanitary inspection agency. The bullocks too are weakly half-starved animals. As there is a considerable demand for town sweepings, the proceeds of their sale ought more than cover the cost of their removal and perhaps even yield an income to the municipality.

There is at present only one rubbish depôt which is situated close to the road at the north-west of the fort and also in proximity to dwellings. The site is inconvenient and objectionable. Arrangements should therefore be made to establish a rubbish depôt on the land adjoining the night-soil depôt where there is a large vacant space available and where poudrette could be manufactured on the Poona system.

The night-soil is also removed under the contract system. The contractors supply 12 carts for the purpose at Rs. 13 for each cart per mensem. The night-soil is daily removed in these carts to the depôt which is situated at a distance from the town outside municipal limits and is there buried in trenches.

There are 28 masonry latrines and one iron one. The former are simply enclosed spaces without impermiable flooring and most of them are in situations not easy of access. Hence the street side drains are much used as latrines—a practice difficult to prevent or check unless numerous small public latrines be provided in the thickly-populated portions of the town.

Seven hundred and sixty-three private latrines are conserved by municipal agency, a charge of As. 2 per mensem being collected from the occupier for each privy thus cleaned. There is no fixed design for private latrines and the adoption of Donaldsons "Oriental" pattern is therefore recommended.

A list of houses having no latrine accommodation has been submitted to the Chairman. Such house-holders as have hitherto omitted to make adequate arrangements should be warned of the risk of prosecution they incur thereby.

The conservancy establishment consists of one chief sanitary inspector, six sanitary inspectors, 18 peons, 88 sweepers, 35 toties for public latrines and 20 for private ones. The chief sanitary Inspector was appointed on the 19th August 1895 on the recommendation of the Sanitary Commissioner and the District Medical and Sanitary Officer. He is a locally trained hospital assistant and has besides undergone training in Hygiene in the Madras Medical College. Of the other sanitary inspectors, one only is trained, the rest possessing but a rudimentary education. The total cost of the sanitary establishment amounted to Rs. 5,457.

The Chief Inspector is not invested with any authority over his subordinates nor are diaries submitted by the latter to him or by the Chief Inspector to the Chairman. The subordinates are, moreover, to a large extent, employed in tax-collecting. It is not therefore surprising that the working of the department is characterized by much laxity and inefficiency. Diaries such as are in use in the Mangalore Municipality, should be introduced here, and the Chief Inspector should be entrusted with control over his nominal subordinates.

Water-supply.—The new source of water from the bed of the river Vennar is now available and an abundant supply of filtered water is brought almost to the doors of the inhabitants by means of the numerous hydrants distributed throughout the town. Several people still obtain their water from the Sivaganga, Peokólam and Mariakan tanks and from the rivers Vadavar and Vennar direct. There are a few public and many private wells in the Manambuchavadi Division which are used for drinking purposes by the residents of that quarter.

Drainage.—In the Fort there are masonry constructed drains which empty into the main drains that discharge into the Vadavar river. A great many streets are still without drains, and the houses in these have cess-pools, the contents of which are either emptied into the streets or allowed to soak into the ground, there being no arrangements for the periodical removal of their contents.

IV. Vaccination.—Two second-class vaccinators are employed in the town and the result of their work as well as of that performed by the two hospital assistants in charge of municipal dispensaries is shown below :—

—	Total vaccinated.					Under one year of age.			
	Successful.	Unsuccessful.	Unknown.	Total.	Percentage of successful cases.	Successful.	Unsuccessful.	Unknown.	Total.
Medical Subordinate	85	..	..	85	100·00	6	..	..	6
*Vaccinators	1,849	45	8	1,902	97·62	880	20	1	901
Total ..	1,934	45	8	1,987	97·73	886	20	1	907

The total number vaccinated was equal to 36·35 per mille, and of children under one year of age 16·56 per mille.

In the previous year the number of vaccination performed was 1,894, of which 438 were under one year of age.

Fresh animal lymph was used for 1,146 cases and glycerine paste for the remainder. The council has hitherto maintained a separate depôt for the supply of animal lymph, but it is intended to obtain it in future from a central depôt about to be opened by the district board at the Raja Mirasidar hospital.

The total cost of maintaining the depôt was Rs. 465–9–9 and the amount received from the Kumbakónam municipality for vaccine paste was Rs. 214–10–0.

The cost of each successful case was As. 2–1.

V. Hospitals and Dispensaries.—(*a*) Nature and sufficiency of accommodation; (*b*) state of repair of buildings; (*c*) furniture, &c.; (*d*) steps taken to carry out recommendations of inspecting officers.

The council maintains two out-patient dispensaries in charge of hospital assistants. Cases for hospital treatment are received in the Raja Mirasidar hospital to which the council contributes Rs. 1,500 per annum. This is a very inadequate sum, as did the council maintain a municipal hospital, the cost of its upkeep would be at least Rs. 6,000 yearly, which is the amount expended by the Kumbakónam Municipality on its hospital.

Neither of the dispensary buildings is adopted to the purpose, and structures on the standard plan should be provided when circumstances admit.

The expenditure of both institutions was as follows :—

	Rs.	A.	P.
Establishment	1,373	9	3
Medicines	394	8	1
Other contingencies	299	11	1
Total ..	2,067	12	5

(*f*) Number of patients treated as compared with previous years.

Name of dispensary.	1891–92.		1892–93.		1893–94.		1894–95.		1895–96.	
	Total treated.	Average daily attendance.	Total treated.	Average daily attendance.	Total treated.	Average daily attendance.	Total treated.	Average daily attendance.	Total treated.	Average daily attendance.
Manambuchavadi ..	7,732	31·37	11,077	49·16	10,208	41·44	9,604	51·50	10,679	50·56
Karanthattangudi ..	10,527	53·96	11,184	60·21	11,196	61·09	12,038	60·51	12,414	62·21
Total ..	18,259	85·33	22,261	109·37	21,404	102·53	21,642	112·01	23,093	112·77

From the above table it will be seen that there was an increase of 1,428 in the number of patients treated as compared with the previous year. The average daily attendance rose very slightly.

(*g*) *Mortality and actual causes of it.*—Only two deaths are reported to have occurred during the year as compared with 26 in the previous year, the excess in the latter period having been due to cholera.

(*h*) *Operations and results.*—Forty major and 1,668 minor operations were performed in both the dispensaries against 39 major and 1,787 minor operations in the previous year.

(*i*) *Establishment whether sufficient and efficient.*—Sufficient.

(*j*) *Midwives.*—A midwife is attached to each dispensary. Two hundred and thirteen cases were attended by them as compared with 163 in the previous year.

(*k*) No dispensary was maintained during the year for caste or gosha women.

(*l*) *General Remarks.*—Surgeon-Major C. M. Thompson was the District Medical and Sanitary Officer, Tanjore, and in chief administrative medical charge throughout the year.

TANJORE,
5th June 1896.

No. 1067-Eng.

Forwarded.

(Signed) G. STOKES,
Collector.

Endt. on Cur. No. 848-Ver.

Submitted to the Collector of Tanjore.

2. The condition of the roads of the municipality continued to be good throughout the year, a sum of Rs. 9,520–1–2 having been spent towards their maintenance against a provision of Rs. 6,000.

(Signed) C. MURUGESAM PILLAI,
Deputy Collector.

No. 1315-Rev.

Submitted to Government in the Local and Municipal Department.

2. *Paragraph* 44 *of the Report.*—The rates per mille of births and deaths in this municipality are 29 and 25, respectively, as in the previous year.

3. *Statement No. II-A, Part I-C—Drainage.*—Rs. 184–9–10 is shown as charges for preparing plans and estimates for the improvement of a sewage farm. It is not clear to whom this amount was paid. If it has been paid to a Government officer, Sanitary Engineer, or an officer of the Public Works Department, the charge should more properly be shown under "5 (*b*) Grant I—Contributions to Provincial funds for preparation of estimates, &c."

4. *Statement IV-A and B.*—The balances under the following items are large, indicating want of strict supervision over the collection staff. The old arrears range from the year 1887–88. Speedy steps should be taken to clear them:—

Item.	Demand as finally settled.	Collection.	Remitted, &c.	Subsequent collection.	Balance.	Percentage.
Current.	RS.	RS.	RS.	RS.	RS.	
Tax on Arts	13,331	8,983	8	1,005	3,335	25·01
" on Buildings	21,672	18,856	..	622	2,194	10·12
" on Lands	3,395	1,724	..	367	1,304	38·40
Water-tax	13,533	10,350	..	..	3,183	23·52
Private Scavenging Fees	1,135	749	..	..	386	34·0
Arrears.						
Tax on Arts	10,792	3,495	1,504	..	5,793	53·67
" on Buildings	5,049	2,733	569 / (*a*) 573	33	1,141	22·59
" on Lands	3,636	1,478	439 / (*a*) 420	20	1,279	35·18
Market Rents	772	210	11	..	551	71·37
Scavenging Fees	277	207	..	..	70	25·27

(*a*) Recommended for remission and under scrutiny.

5. *Appendix to the above.*—The number and the amounts of the outstanding warrants are very large (columns 10 and 11), and this fact confirms the supposition in paragraph 4 *supra* that strict supervision was wanting.

6. *Statement No. XIII.*—The number of cases vaccinated by the two hospital assistants was 85 or $3\frac{1}{2}$ cases per vaccinator per month.

VALLAM,
5th June 1896.

Tanjore Municipal Admn. Report for 1895–96

Local DEPARTMENT

[G. / 25 A.] 1,900—21-3-96.

C. No. 1624 of 1853

To be stitched with the proof, [initials] 1.9.96.

FOR ORDERS.

I think the draft order is right, but I should put in a few words to show that no blame is attached by Govt. to Kalyanasundram Iyer who was only in charge as Chairman for 3 months, ~~[illegible]~~ had not therefore ~~have~~ the chance to do very much.
Let H.E. see before issue.
[initials]
29/7/96

Submitted to H.E. the Governor.
[initials] 31-7-96
[initials] 1/8/96

I suppose the sins of this Municipality are set forth in para. 5 of the review. I have no means of comparing the conduct of this Municipality with that of other Municipalities. But, the sins in this case do not seem to me very heinous. There are no charges of bribery or corruption.
C. 25/7 or

The review of the Admn. Report of the Tanjore Munly is submitted for orders with reference to the concluding para thereof.
Govt. for two years running has been threatening the Council and last year said that it would give it one last more chance of mending its ways.
I cannot see that it has mended them to any appreciable extent. It apparently thinks that with the Chairman a member of the Legislative Council it can do what it pleases.
The collections both current and arrears are though a special estab[lishment] was allowed the Munl Council in August last simply disgraceful. [They] are out and away the worst I have come across this year so far as I have gone with the [illegible]

Adm[n]. report. The Chairman has not offered a word of explanation, & the points upon which Govt. had re-marked in the previous review have received little if any attention, and the Council seems to think the threats of Govt. were empty ones.

It is for consideration whether the time has not now come for showing the Council that Govt. will be as good as its words.

There will very probably be questions in the Leg. Council if action on previous threats is taken. But I do not see that this should deter Govt. from dealing with the Municipality as it has with others that would not heed warnings.

If it is decided to take action it is submitted that the portions of the concluding portion of the draft marked with brackets should be omitted.

L & M Department.

Para.3. - General Remarks

The administration of the Municipality during the year under review cannot be considered at all satisfactory. The collections of the current demand, though somewhat better than in the previous year, were bad, and those of arrears were very much worse. The private scavenging agency did not make any material progress, and the registration of vital statistics continued to be imperfect. And there has been but very slight, if any, improvement in the conduct of affairs. For Rs, however the present Chairman cannot, however, be held responsible as he has been so very recently elected, that there has been no sufficient time for him to put the administration of the Municipality on a satisfactory footing. Under these circumstances and in the hope that the Chairman will make every effort and use his best abilities to improve the administration of affairs generally, and particularly in the points mentioned above, the Government will await the receipt of the report for the current year before deciding as to the question of giving effect to the warning conveyed in G.O's. Nos. 1202.M., dated 4th September 1894 and 1477.M., dated 12th September 1895.

REMARKS.

The S.P.G. Fort Lower Secondary School drew no grants during the year, hence the increase of one under unaided & the decrease of one under aided Secondary Schools. The 34 Girls in municipal Primary Schools belong to the Girls' section of the Pattukottai [?] S.P.G. School. The Inspecting Schoolmaster should endeavour to bring all the unaided & indigenous schools on the aided lists.

Class of Institutions.		Number of Teachers employed.	Number possessing Trained Certificates.	Number possessing Untrained Certificates.	Number with General Education Certificates.	Unpassed Men [illegible]	[illegible]	Remarks.
Colleges ...	Government							The qualifications of the teaching staff improved considerably. Among the 6 unpassed teachers in the aided Primary schools 4 possess the service qualification required under the educational rules. These teachers are allowed all the privileges which untrained teachers' certificate holders enjoy. No provision was made for training of teachers from municipality. The provision [illegible] for Sessional School has been utilized - The Gymnastic Instructors and the drawing master employed by the municipality are not shown in the statement.

No. 1461 M., 2nd September 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following papers :—

From the Hon'ble K. KALYANASUNDARAM AIYAR Avargal, Chairman, Municipal Council, Tanjore, to the Chief Secretary to Government (through the Divisional-officer, Tanjore), dated 30th May 1896, No. 865.

I have the honour to submit my report on the working of this municipality for the year 1895–96, together with the statements of receipts and charges in the prescribed form.

2. The report was adopted by the council at a meeting held on the 27th May 1896.

3. The accounts of the year are being audited.

I.—Constitution of the Council.

4. Out of the maximum number of 24 councillors sanctioned for this municipality, there were four vacancies at the beginning of the year. Eleven vacancies occurred during the year. Out of these fifteen vacancies, fourteen were filled up during the year—thirteen by election and one by nomination. The number of registered voters for the year was 1,758.

5. M.R.Ry. K. S. Srinivasa Pillai Avargal, who was Chairman in the beginning of the year, having resigned his office, the Divisional-officer was in charge from the 4th November to the 19th December 1895. I was elected Chairman on the 18th November 1895 and took charge of the office on the 20th December 1895.

6. There were 59 meetings during the year, fourteen of which had to be adjourned for want of a quorum. The average attendance of the councillors is compared below with that of the previous year :—

	1894–95.	1895–96.
Officials	1	2
Non-officials	11	9
Average attendance	12	11

II.—Receipts.

7. The opening and closing balances and receipts and charges for the year under report are shown below :—

	Rs.	A.	P.
Opening balance	1,21,454	0	1
Receipts	90,695	9	4
Total ..	2,12,149	9	5
Charges	1,41,427	10	8
Closing balance	70,721	14	9
Total ..	2,12,149	9	5

The great disparity between the closing balance of 1894–95 and that of 1895–96 is due to the fact of the greater portion of the unexpended allotment for the Tanjore water-works having been spent during the year under report.

8. The balance at the end of the year as per treasury pass book was Rupees 83,252–2–9, while according to the municipal cash book it was only Rs. 79,776–11–0, inclusive of deposits. The difference is due to cheques to the extent of Rs. 3,475–7–9 issued during the year having remained uncashed on the 31st March 1896.

9. I will now proceed to refer to such of the items of receipts as seem to call for special notice.

10. *Tax on Arts.*—This tax was further revised during the year. The demand for the year as so revised was Rs. 13,774–8–0. A sum of Rs. 443–8–0 was remitted by the council on appeal, leaving a settled demand of Rs. 13,331. Comparing the figures for 1894–95 and 1895–96, Rs. 13,000 in round numbers may be put down as the normal demand of the municipality under this head as assessed under Act IV of 1884.

11. Out of the current demand, a sum of Rs. 8,983 was collected during the year leaving a balance of Rs. 4,340, and thus showing some improvement as compared with 1894–95. A portion of this balance, viz., Rs. 1,005, has since been collected.

12. Out of the arrear demand of Rs. 10,791–8–0, a sum of Rs. 3,494–14–10 was collected during the year. A sum of Rs. 1,504 was remitted by the council, leaving a balance of Rs. 5,792–9–2. I am afraid that a very considerable portion of this balance will finally have to be written off the accounts, inasmuch as lists prepared by bill-collectors, in which recommendations for remissions are made, are now under scrutiny.

13. *House-tax, Current.*—This tax was last revised in 1892–93, and the registers were written up during 1894–95. The finally-settled demand for the year under report was Rs. 21,672–12–6. Out of this sum, Rs. 18,856–6–6 were collected during the year leaving a balance of Rs. 2,816–6–0, out of which a sum of Rs. 622–1–0 has since been collected.

14. *House-tax, Arrears.*—Out of the arrear demand of Rs. 5,049–7–2, a sum of Rs. 2,733–6–11 was collected and a sum of Rs. 568–13–0 was remitted during the year, leaving a balance of Rs. 1,747–3–3. Of this balance, a sum of Rs. 573 has been recommended for remission, and the lists are now under scrutiny and a small portion, Rs. 33–11–6, has since been collected.

15. *Land-tax, Current.*—This tax was revised during the year under report. The settled demand under this head was Rs. 3,394–15–6. Out of this sum, Rs. 1,723–8–0 were collected during the year, leaving a balance of Rs. 1,671–7–6. Out of which a small sum of Rs. 367–8–0 has since been collected.

16. *Land-tax, Arrears.*—Out of the arrear demand of Rs. 3,636–6–0, Rupees 1,478–10–0 were collected and Rs. 438–13–0 were remitted during the year, leaving a balance of Rs. 1,718–15–0. Of this a small sum of Rs. 20–9–0 has since been collected, and remission lists to the extent of Rs. 420 are under scrutiny.

17. *Water-tax.*—This tax was newly imposed during the year under report. The settled demand under this head was Rs. 13,533–9–0. Out of this, Rs. 10,350–3–4 were collected during the year, leaving a balance of Rs. 3,183–5–8. The water-works were opened during the year, but the whole of the municipality does not enjoy the benefit of the new water-supply. Residents of such portions of the town as are not served by the water-works make complaints about the imposition of the tax on all alike, and throw great difficulties in the way of its easy collection. It is in contemplation to utilize the expected balance out of the allotment for the water-works in extending the works, but it is feared that it will not be ever possible to reach all parts of the town. In these circumstances, I am afraid that, in order to avoid possible dissatisfaction, the council will at no distant date have to consider the advisability of recommending Government to exempt, under clause (2) of section 75 of the Municipal Act, some parts of the town from the payment of this tax.

for signature. 25-9-96

18. *Tolls.*—The toll-gates of the town were farmed out for Rs. 25,010 as against Rs. 24,570 in the previous year. The whole of this sum and interest, Rs. 199–0–11, due on instalments not duly paid, were collected during the year. The one-third contribution due to the district board was also paid up during the year. The net income under this head was Rs. 16,806–0–8 against Rs. 16,419 (audited figure) in the previous year.

19. *Private Scavenging.*—The number of houses served during the year was 763, showing an increase of 53 over those served during the previous year. The fees collected amounted to Rs. 956, giving the municipality a profit of Rs. 85–6–8 against Rs. 206–2–0 in the previous year. The difference is due to the fact of the municipality having employed during the year two additional toties within the budget allotment for the more efficient performance of the work.

20. In this connection, I may bring to the notice of Government the difficulty that exists in the development of the system of private scavengering in this municipality. Enquiry and inspection show that there is a large number of houses, especially in the fort and in the Manambuchavadi ward, which are altogether unprovided with privies, and the owners, both males and females, consequently resort to the public latrines and to the uncultivated and uncultivable waste lands lying outside the municipal limits for the purpose of easing themselves, and during nights clandestinely use the public streets and drains for this purpose. The most effective way of affording relief to such people would be by constructing additional public latrines in suitable localities and arranging for the prompt and constant cleaning thereof. I spoke to Dr. Thompson on this subject, and we had intended to go about the town and select suitable places for the construction of these additional latrines; but that gentleman has since been transferred, and so I will consult his successor Dr. Lee as soon as I can and place before the council any arrangements that we may agree upon.

21. The other items of receipts are sufficiently explained by the accompanying statements and call for no special remarks.

22. The incidence of taxation inclusive of tolls was, for the year under report, Rs. 1–4–9 per head of population as against Rs. 1–3–2 of the previous year. The increase is due to the imposition of the water-tax during the year. The incidence of income per head of population was Rs. 1–10–8 as against Rs. 3–8–0 of the previous year. This decrease is accounted for by the fact of there having been special grants of large sums of money in 1894–95 on account of the water-works and for the repair of a road which had been washed away by flood.

III.—EXPENDITURE.

23. The total expenditure during the year under all heads was Rs. 1,41,427–10–8 as shown below :—

	Rs.	A.	P.
Grant I	84,370	2	8
„ II	8,664	13	4
„ III	17,926	15	3
„ IV	8,487	2	6
„ V	7,251	13	6
Repayment of debt and interest	14,145	11	11
Advances recoverable	393	2	0
Refunds other than current collections	82	13	6
Pensions and gratuity	105	0	0
Total ..	1,41,427	10	8

24. *Grant I, Public Works.*—The expenditure under this head included a large sum of Rs. 54,860–8–0 on account of the water-works, which were completed and opened during the year.

25. Under the head of "New works—Communications" a sum of Rs. 1,369–5–6 was spent against Rs. 1,000 provided in the revised estimate. The increase was mainly due to the council having paid during the year a sum of Rs. 342–3–9 on account of a road-dam, which had been constructed and completed but not fully paid for in 1894–95.

Proof for signature. 25-9-96
Number of copies required. Order complete. 120 Letter only. Order complete with Letter.

26. Under the head of "Buildings" Rs. 2,600 were provided in the revised estimate, but a sum of Rs. 1,074 alone was spent during the year. The reason for this short expenditure was as follows. A sum of Rs. 1,000 was provided for improving the East-gate slaughter-house. The site on which this building stands belongs to the district board and has been leased out to the municipality for ten years. There was some difficulty in arranging for the repayment to the municipality of the value of the proposed building at the end of the term of the lease. It was finally settled that the site should be acquired under the Land Acquisition Act, and proposals for the purpose have been sent by me and are now pending before the Collector. The work in question had therefore to be postponed. A sum of Rs. 1,600 was provided for the construction of latrines. Only one, however, was constructed during the year, but the account with the contractor could not be closed on the 31st March 1896, and so a sum of Rs. 700 alone was paid during the year. The balance due has since been paid. The council found that no more latrines could be constructed during the year, and so a portion of the allotment was used for making certain necessary additions to the dispensary building in Karuntattangudi and providing the travellers' bungalow with a compound wall.

27. *Drainage.*—The provision made under this head was Rs. 1,200, but the expenditure was Rs. 1,546–11–4. The excess was due to minor drainage works of an urgent character not provided for in the budget having been sanctioned by the council and executed during the year.

28. *Water-supply.*—Under this head a sum of Rs. 54,978–6–0 was spent during the year. The major portion of it, viz., Rs. 54,860–8–0, was spent on the water-works as stated in paragraph 24 *supra*, and the balance was spent on improving a municipal well and providing the dispensary building at Karuntattangudi with a water-tap.

29. *Repairs—Communications.*—The expenditure under this head was Rs. 9,520–1–2 as against a provision of Rs. 6,000 in the budget and revised estimates. The increase was necessitated by various unforeseen repairs and was met from savings under other heads of grant I.

30. *Buildings—Repairs.*—The provision made in the estimates under this head was Rs. 2,000, but the expenditure was Rs. 997–5–7. Some further repairs under this head were also executed, but as they were not completed during the year, payment had to be postponed till this year.

31. *Repairs—Drainage.*—The allotment under this head also was Rs. 2,000. The expenditure came to Rs. 1,385–13–7. The decrease was principally due to the adoption of the system of giving contracts for the execution of the works to the lowest bidders. The work so executed was found unsatisfactory, and the system has been since given up.

32. *Tolls and Roads.*—The outlay on roads during the year was Rs. 10,889–6–8 (New Works and Repairs—Communications) and the net income from tolls after deducting the usual contribution to the district board was Rs. 16,806–0–8.

33. *Grant II, Education.*—The expenditure under this head was Rs. 8,664–13–4 as against an estimate (revised) of Rs. 9,410. The decrease was due to the full provision of salary grants not having been earned by the schools in the town, and only a small portion (Rs. 96–4–0) of the estimate of Rs. 560 under building and furniture grants having been recommended by the Educational authorities for payment.

34. *Salary-result System Schools.*—There are three schools under the direct management of this council for the education of three backward classes, viz., the Muhammadans, the silk-weavers and the Paraiyas of the town. The number of pupils on the rolls of these schools is shown in the margin. The students in the Muhammadan and Paraiya schools consist only of boys, while those of the silk-weavers' school consist of boys and girls (66 and 34 respectively). There was a fall in the strength of the Muhammadan school as

	No.
Muhammadan school	46
Silk-weavers' Telugu school	100
Paraiya school	57

compared with the year 1894–95, but this is due to the existence of two other private schools for Muhammadans, one of which was started during the year under report. The decrease does not therefore show that the desire for education among the Muhammadans of the town has diminished. The Government will be glad to note that the strength of the Paraiya school has increased; and the expenditure upon it during the year was Rs. 159–8–1 as against Rs. 68 in 1894–95. The council has sanctioned the use of a better building on an increased rent for this school and is prepared to do everything in its power to improve the school.

35. *Salary Grants.*—One of the six schools that were aided in 1894–95 on this system did not make a claim for grant during the year under report. It appears to have been closed. There was accordingly a diminution in the strength of the schools that were actually aided and in the amount paid to them by the municipality which was Rs. 1,664–0–1 against an estimate of Rs. 2,000 and an expenditure of Rupees 1,803–11–0 in the previous year.

36. *Result Grants.*—It is gratifying to note that there was an increase during the year in the number of schools aided by result grants. The total number aided was 38 against 35 schools in 1894–95. The expenditure under this head was Rs. 5,068–14–0 against a provision of Rs. 4,900 in the estimates and an expenditure of Rs. 4,672–11–5 in 1894–95. The increase was of course due to the increase in the schools and was met from savings under the heads of the same grant. The number on the rolls on the 31st March 1896 was 2,212 boys and 26 girls against 2,054 boys and 27 girls on the 31st March 1895.

37. *Girls' Schools.*—It was during the year under report that the first provision was made by this council for the education of girls by the appointment of a schoolmistress for girls in the silk-weavers' school.

38. *Grant III—Sanitation and Medical Services.*—There are two dispensaries under the council's management for out-patients alone. A sum of Rs. 2,067–12–5 was spent upon these institutions against a provision of Rs. 1,920 in the estimates. A contribution of Rs. 1,500 was paid as usual to the Raja Mirasidar hospital and a sum of Rs. 55–14–0 was paid on account of the Provident Fund bonus payable by the hospital assistants in charge of these dispensaries.

39. I regret I am unable to submit the report of the District Medical and Sanitary Officer as it has not yet been received by me.

40. *Contribution to Provincial Funds.*—A sum of Rs. 700 was provided in the estimate on account of the proportionate contribution for the cost of sanitary inspection, but only Rs. 280 was paid on this account as per Treasury Deputy Collector's advice.

41. *Medical Training of Women.*—This council has taken no action towards getting female medical practitioners educated at its cost. It passed a resolution on the 28th August 1895 by which it resolved to await the action taken by the Tanjore District Board in this direction.

42. *Vaccination.*—The number of cases operated during the year by the vaccinators and the medical subordinates in charge of the two municipal dispensaries was 1,987 as against 1,894 in the previous year. Of these cases, 1,933 proved successful. This branch of municipal work is under the control of the District Medical and Sanitary Officer, and in the absence of his report, I am unable to make any further remarks on this subject.

43. *Midwives.*—There are two midwives, one attached to each of the municipal dispensaries, but I am not in a position to say anything about their work as the report of the District Medical and Sanitary Officer has not yet been received.

44. *Registration of Births and Deaths.*—The number of births and deaths during the year was 1,631 and 1,367 against 1,601 and 1,417 in the previous year. The sub-registrars have been directed to attend their offices between 11 A.M. and 4 P.M. and at other times of the day to go about their divisions and to find out whether all occurrences are regularly reported. The council believes that their work is now more carefully performed than in the previous year.

45. *Deaths.*—The causes of the 1,367 deaths are distributed thus :—

Cholera	4
Small-pox	28
Fevers	331
Bowel-complaints	299
Snake-bite	..
All other causes	705
Total ..	1,367

46. *Conservancy.*—The conservancy arrangements for 1895–96 were the same as those for 1894–95. The want of a proper latrine near the big market had been seriously felt and it has now been supplied by the erection of a big latrine at a suitable place near it. Two temporary tatty latrines were also constructed—one near the big market and the other for the use of chucklers. Improvement has also been effected in the mode of disposal of night-soil, as the council has now made suitable arrangements for burying it in trenches and the contractors are strictly compelled to carry them out.

47. *Grant IV—Lighting and Miscellaneous.*—The total expenditure under this grant was Rs. 8,487–2–6 against a provision of Rs. 9,670 in the estimates.

48. The arrangements made for lighting the town were the same as in 1894–95, and the difference between the allotment of Rs. 4,650 and the actual expenditure of Rs. 4,078–12–10 was principally due to the disparity between the amount provided for purchasing kerosine oil (Rs. 3,290) and the amount actually paid to the contractor, who supplied it to the municipality, viz., Rs. 2,732–2–7.

49. *Travellers' Bungalow.*—A provision of Rs. 300 alone had been made in the budget and revised estimates on account of the travellers' bungalow. The amount spent, however, was Rs. 376–5–9. This increase was found necessary to remedy the complaints made from time to time about the want of suitable furniture, &c., in the bungalow.

50. *Public Garden.*—A sum of Rs. 2,550 was provided in the estimates on account of the "Public gardens." The actual expenditure was Rs. 1,514–0–5. There was an unexpended balance of Rs. 1,000 and odd out of the sum of Rs. 2,000 set apart for the special improvement of the Sivaganga garden. The work for which this provision had been made has already in this year been given on contract and will soon be executed.

51. In the year under report the first instalment on account of the principal amount of the loan advanced by Government to the municipality on account of the water-works was paid by it. This with the interest due on the loan came to Rs. 14,145–11–11.

52. The other items of charges under the various grants do not call for any special remark.

53. The year closes with a balance of Rs. 70,721–14–9.

54. In conclusion, I have the honour to state that the Chairman has been cordially supported by the council in the administration of the municipality.

Endt. on Cur. No. 848-Ver.

Submitted to the Collector of Tanjore.

2. The condition of the roads of the municipality continued to be good throughout the year, a sum of Rs. 9,520–1–2 having been spent towards their maintenance against a provision of Rs. 6,000.

(Signed) C. MURUGESAM PILLAI,
Deputy Collector.

No. 1315-Rev.

Submitted to Government in the Local and Municipal Department.

2. *Paragraph 44 of the Report.*—The rates per mille of births and deaths in this municipality are 29 and 25, respectively, as in the previous year.

3. *Statement II-A, Part I-c—Drainage.*—Rs. 184–9–10 is shown as charges for preparing plans and estimates for the improvement of a sewage farm. It is not clear to whom this amount was paid. If it has been paid to a Government officer, Sanitary Engineer, or an officer of the Public Works Department, the charge should more properly be shown under "5 (*b*) Grant I—Contributions to Provincial funds for preparation of estimates, &c."

4. *Statements IV-A and IV-B.*—The balances under the following items are large, indicating want of strict supervision over the collection staff. The old arrears range from the year 1887–88. Speedy steps should be taken to clear them :—

Item.	Demand as finally settled.	Collection.	Remitted, &c.	Subsequent collection.	Balance.	Percentage.
Current.	Rs.	Rs.	Rs.	Rs.	Rs.	
Tax on Arts	13,331	8,983	8	1,005	3,335	25·01
,, on Buildings	21,672	18,856	..	622	2,194	10·12
,, on Lands	3,395	1,724	..	367	1,304	38·40
Water-tax	13,533	10,350	..	..	3,183	23·52
Private Scavenging Fees	1,135	749	..	..	386	34·0
Arrears.						
Tax on Arts	10,792	3,495	1,504	..	5,793	53·67
,, on Buildings	5,049	2,733	569 / (*a*) 573	33	1,141	22·59
,, on Lands	3,636	1,478	439 / (*a*) 420	20	1,279	35·18
Market Rents	772	210	11	..	551	71·37
Scavenging Fees	277	207	..	..	70	25·27

(*a*) Recommended for remission and under scrutiny.

5. *Appendix to the above.*—The number and the amounts of the outstanding warrants are very large (columns 10 and 11), and this fact confirms the supposition in paragraph 4 *supra* that strict supervision was wanting.

6. *Statement XIII.*—The number of cases vaccinated by the two hospital assistants was 85 or $3\frac{1}{2}$ cases per vaccinator per month.

VALLAM,
5*th June* 1896.

(Signed) M. SIVAGNANAM PILLAI,
for *Acting Collector.*

From the Hon'ble K. KALYANASUNDARAM AIYAR Avargal, Chairman, Municipal Council, Tanjore, to the Chief Secretary to Government (through the Divisional Officer, Tanjore), dated 15th June 1896, No. 915.

In continuation of my administration report, dated 30th May 1896, No. 865, I have the honour to submit the concise medical report of the District Medical and Sanitary Officer since received.

2. The number of latrines as given in the enclosure is incorrect. The actual number is that given in my report.

3. Under the head of conservancy establishment, the District Medical Officer says there were 88 sweepers employed. It would be more correct to say that there were 31 sweepers and 57 drain-cleaners.

4. All the sanitary inspectors work under the direction of the Chief Sanitary Inspector, but to avoid delay their diaries are submitted direct to the Chairman. The District Medical Officer's statement that no diaries are submitted by the Chief Sanitary Inspector is inaccurate, for, as a matter of fact, diaries are received from him by the Chairman every day. I do not see what further authority should be given to the Chief Sanitary Inspector over the other inspectors. If they disobey his directions, he has simply to report them to the Chairman.

5. There is another point on which the District Medical Officer's information is not quite correct. He believes that the sanitary subordinates are *to a large extent* employed in tax-collecting. This is not so. For a long series of years, they have been entrusted with the duty of collecting the private scavenging fees, the license fees for dangerous and offensive trades and the tax on vehicles and animals. This part of their work does not take up more than a few hours every week.

6. The cost of maintaining the vaccine depôt is inaccurately given by the District Medical Officer. The correct figures are those given by me.

7. In the number of patients treated in the municipal dispensaries, the District Medical Officer includes the 40 cases that remained undischarged on the 31st March 1896, while they are excluded from the statement submitted by me.

8. The work turned out by the municipal midwives is very satisfactory as compared with the previous year.

ENCLOSURE.

CONCISE Annual Medical Report for 1895-96.

I. Public health.—The general health of the public throughout the year was good, and no outbreak of cholera or other epidemic disease occurred.

Four deaths from cholera were reported, but it was ascertained after careful enquiry that in no instance was the disease contracted in the town.

II. Vital Statistics.—The total number of births and deaths registered was 1,631 and 1,367, respectively. Of the deaths, 4 were from cholera, 28 from small-pox, 331 from fever, 299 from diarrhœa and dysentery and 705 from all other causes.

The enforcement of the provisions of Act IV of 1884 regarding the registration and regulation of burial-grounds was recommended in last year's report and the attention of the council is again invited to this subject.

III. Sanitation.—The removal of town refuse, sweepings, &c., is leased to two individuals who supply 24 carts and pairs of bullocks for the purpose at the rate of Rs. 13 for each cart per mensem. The sweepings become the property of the same contractors who pay Rs. 2,200 for them, thus the net cost of their removal is Rs. 1,544 per annum. The drawback to this system is that only matter of saleable value is removed, while other rubbish is allowed to accumulate in the streets. Moreover, the contractors' employés are not under the control and therefore pay no attention to the orders and instructions of the municipal sanitary inspection agency. The bullocks too are weakly half-starved animals. As there is a considerable demand for town sweepings, the proceeds of their sale ought more than cover the cost of their removal and perhaps even yield an income to the municipality.

There is at present only one rubbish depôt which is situated close to the road at the north-west of the fort and also in proximity to dwellings. The site is inconvenient and objectionable. Arrangements should therefore be made to establish a rubbish depôt on the land adjoining the night-soil depôt where there is a large vacant space available and where poudrette could be manufactured on the Poona system.

The night-soil is also removed under the contract system. The contractors supply 12 carts for the purpose at Rs. 13 for each cart per mensem. The night-soil is daily removed in these carts to the depôt which is situated at a distance from the town outside municipal limits and is there buried in trenches.

There are 28 masonry latrines and one iron one. The former are simply enclosed spaces without impermeable flooring and most of them are in situations not easy of access. Hence the street side drains are much used as latrines—a practice difficult to prevent or check unless numerous small public latrines be provided in the thickly-populated portions of the town.

Seven hundred and sixty-three private latrines are conserved by municipal agency, a charge of As. 2 per mensem being collected from the occupier for each privy thus cleaned. There is no fixed design for private latrines and the adoption of Donaldsons "Oriental" pattern is therefore recommended.

A list of houses having no latrine accommodation has been submitted to the Chairman. Such house-holders as have hitherto omitted to make adequate arrangements should be warned of the risk of prosecution they incur thereby.

The conservancy establishment consists of one chief sanitary inspector, six sanitary inspectors, 18 peons, 88 sweepers, 35 toties for public latrines and 20 for private ones. The Chief Sanitary Inspector was appointed on the 19th August 1895 on the recommendation of the Sanitary Commissioner and the District Medical and Sanitary Officer. He is a locally trained hospital assistant and has besides undergone training in Hygiene in the Madras Medical College. Of the other sanitary inspectors, one only is trained, the rest possessing but a rudimentary education. The total cost of the sanitary establishment amounted to Rs. 5,457.

The Chief Inspector is not invested with any authority over his subordinates nor are diaries submitted by the latter to him or by the Chief Inspector to the Chairman. The subordinates are, moreover, to a large extent, employed in tax-collecting. It is not therefore surprising that the working of the department is characterized by much laxity and inefficiency. Diaries such as are in use in the Mangalore Municipality, should be introduced here, and the Chief Inspector should be entrusted with control over his nominal subordinates.

Water-supply.—The new source of water from the bed of the river Vennar is now available and an abundant supply of filtered water is brought almost to the doors of the inhabitants by means of the numerous hydrants distributed throughout the town. Several people still obtain their water from the Sivaganga, Púkulam and Mariakan tanks and from the rivers Vadavar and Vennar direct. There are a few public and many private wells in the Manambuchavadi Division which are used for drinking purposes by the residents of that quarter.

Drainage.—In the Fort there are masonry constructed drains which empty into the main drains that discharge into the Vadavar river. A great many streets are still without drains, and the houses in these have cess-pools, the contents of which are either emptied into the streets or allowed to soak into the ground, there being no arrangements for the periodical removal of their contents.

IV. Vaccination.—Two second-class vaccinators are employed in the town and the result of their work as well as of that performed by the two hospital assistants in charge of municipal dispensaries is shown below :—

—	Total vaccinated.				Percentage of successful cases.	Under one year of age.			
	Successful.	Unsuccessful.	Unknown.	Total.		Successful.	Unsuccessful.	Unknown.	Total.
Medical Subordinate	85	..	..	85	100·00	6	..	..	6
Vaccinators	1,849	45	8	1,902	97·62	880	20	1	901
Total ..	1,934	45	8	1,987	97·73	886	20	1	907

The total number vaccinated was equal to 36·35 per mille, and of children under one year of age 16·56 per mille.

In the previous year the number of vaccinations performed was 1,894, of which 438 were under one year of age.

Fresh animal lymph was used for 1,146 cases and glycerine paste for the remainder. The council has hitherto maintained a separate depôt for the supply of animal lymph, but it is intended to obtain it in future from a central depôt about to be opened by the district board at the Raja Mirasidar hospital.

The total cost of maintaining the depôt was Rs. 465-9-9 and the amount received from the Kumbakónam municipality for vaccine paste was Rs. 214-10-0.

The cost of each successful case was As. 2-1.

V. Hospitals and Dispensaries.—(*a*) Nature and sufficiency of accommodation; (*b*) state of repair of buildings; (*c*) furniture, &c.; (*d*) steps taken to carry out recommendations of inspectir - officers.

The council maintains two out-patient dispensaries in charge of hospital assistants. Cases for hospital treatment are received in the Raja Mirasidar hospital to which the council contributes Rs. 1,500 per annum. This is a very inadequate sum, as did the council maintain a municipal hospital, the cost of its upkeep would be at least Rs. 6,000 yearly, which is the amount expended by the Kumbakónam Municipality on its hospital.

Neither of the dispensary buildings is adopted to the purpose, and structures on the standard plan should be provided when circumstances admit.

The expenditure of both institutions was as follows:—

	Rs.	A.	P.
Establishment	1,373	9	3
Medicines	394	8	1
Other contingencies	299	11	1
Total ..	2,067	12	5

(*f*) Number of patients treated as compared with previous years.

Name of dispensary.	1891–92.		1892–93.		1893–94.		1894–95.		1895–96.	
	Total treated.	Average daily attendance.	Total treated.	Average daily attendance.	Total treated.	Average daily attendance.	Total treated.	Average daily attendance.	Total treated.	Average daily attendance.
Manambuchavadi ..	7,732	31·37	11,077	49·16	10,208	41·44	9,604	51·50	10,679	50·56
Karantattangudi ..	10,527	53·96	11,184	60·21	11,196	61·09	12,038	60·51	12,414	62·21
Total ..	18,259	85·33	22,261	109·37	21,404	102·53	21,642	112·01	23,093	112·77

From the above table it will be seen that there was an increase of 1,428 in the number of patients treated as compared with the previous year. The average daily attendance rose very slightly.

(*g*) *Mortality and actual causes of it.*—Only two deaths are reported to have occurred during the year as compared with 26 in the previous year, the excess in the latter period having been due to cholera.

(*h*) *Operations and results.*—Forty major and 1,668 minor operations were performed in both the dispensaries against 39 major and 1,787 minor operations in the previous year.

(*i*) *Establishment whether sufficient and efficient.*—Sufficient.

(*j*) *Midwives.*—A midwife is attached to each dispensary. Two hundred and thirteen cases were attended by them as compared with 163 in the previous year.

(*k*) No dispensary was maintained during the year for caste or gosha women.

(*l*) *General Remarks.*—Surgeon-Major C. M. Thompson was the District Medical and Sanitary Officer, Tanjore, and in chief administrative medical charge throughout the year.

TANJORE,
5th June 1896.

(Signed) W. A. LEE, Surgn.-Major,
District Medical and Sanitary Officer.

No. 1067-Eng.

Forwarded.

(Signed) G. STOKES,
Collector.

ORDER—No. 1461 M., dated 2nd September 1896.

The receipts and charges of the Tanjore Municipality for 1895–96 are compared below with the budget and revised estimates for the year and the actuals of 1894–95:—

	Actuals, 1894–95.	Budget estimate, 1895–96.	Revised estimate, 1895–96.	Actuals, 1895–96.

2. The number of meetings held by the municipal council was 45 against 54 in the previous year, and as many as 14 others were adjourned for want of a quorum as in that year. There was an improvement in the average attendance of the official members, while that of the non-officials declined, but in neither case was it satisfactory. Thirteen seats were filled by election during the year and four of these were contested, 62·9 per cent. of the voters concerned attending the poll.

3. *Receipts.*—(1) In the review of the previous year's administration, the Government remarked that the incidence of the arts tax was considerably below the general average for municipalities. In the year under review, the registers were again revised with the result that, instead of an increase, there were decreases of 42 in the number of persons assessed, chiefly under the fourth and sixth classes of the schedule, of Rs. 248 in the net current demand, and of pies 5 in its average incidence. Notwithstanding the fact that the average incidence of this tax is so much below the general average, no attempt has been made to explain the general decrease caused by the recent revision of the registers. This omission should be supplied without delay. The demand of the tax on buildings remained almost stationary, but that of the tax on lands rose by Rs. 288. Water-tax was, for the first time, imposed in this town during the year under review and its net current demand amounted to Rs. 13,534.

(2) The current collections under the principal taxes, though slightly better than in the previous year, were not at all satisfactory, nearly 33 per cent. of the tax on arts and 50 per cent. of the tax on lands having been left in arrears. The arrear collections under all these heads were also very bad, only 32·4 per cent. of the demand under the tax on arts and 40·7 per cent. of that under land tax having been realized. No explanation has been offered for this state of things. In G.O., No. 1357 M., dated 17th August 1895, the Government sanctioned an addition to the staff of collection peons in the expectation that the council would take vigorous steps to realize the outstandings, but the balance left at the close of the year amounted to Rs. 22,412, some of the outstandings dating as far back as 18–8788. Such a result is most unsatisfactory. Had proper inquiry been held, it could have been ascertained long ago what arrears were recoverable and what not and they could have been dealt with accordingly.

(3) Notwithstanding the backward state of the collections above referred to, there was a very large decline in the number of warrants issued during the year and nearly 46 per cent. of the total number under disposal remained unexecuted on the 31st March 1896. This is very discreditable to the municipal executive. The Chairman should see that there is no occasion for a repetition of this remark in future. In this connection the municipal council's attention will be drawn to clauses (4) and (5) of the Collector's endorsement.

(4) Street sweepings brought in an income of Rs. 2,231, but it appears from the medical report that notwithstanding this there was a net loss of Rs. 1,544 to the council incurred in the removal of the town rubbish. The system as described by Dr. Lee does not seem to be by any means satisfactory, and the council's attention should be devoted to its improvement. The receipts from the taxes on vehicles, animals and carts and license and cart-stand fees showed a decline, which should not have been left unexplained The increase in the revenue from fines, which was more than double that of the previous year, is noted with satisfaction as an indication that more attention is being paid to the sanitation of the town.

(5) The number of houses served by the private scavenging agency rose from 710 to 763 and the service was worked at a small profit of Rs. 84 to the municipal council against Rs. 204 in the previous year. It is to be regretted that, notwithstanding the remarks in paragraph 3 (4) of G.O., No. 1477 M., dated 12th September 1895, this system has made very little progress, nearly 94 per cent. of the houses assessed to the tax on buildings being still unserved by it. It is also observed that over a third of the current demand under this head again remained uncollected at the close of the year. The Chairman reports the existence of certain obstacles to the extension of this system, but as these have been overcome in other towns, there appears to be no reason why they should be insurmountable in Tanjore. The people should be made to understand by the systematic prosecution of those who fail to keep their premises clean that the municipal council will not tolerate any infringement of the sanitary provisions of the law.

4. *Expenditure*—(1) *Public Works.*—With the exception of the water-works, which were completed at a total cost of Rs. 4,04,600, no new work of any importance was undertaken during the year. The total outlay on communications amounted to Rs. 10,889, or 64·8 per cent. of the net income from tolls, and the town roads are reported by the Divisional Officer to have been in fair condition.

(2) *Education.*—The net expenditure on education was Rs. 8,651, or 12·2 per cent. of the income from taxation. Of this, a sum of Rs. 1,664 was spent on secondary, and the remainder on primary, education. The municipal council continued to maintain three primary schools on the salary-result system. The attendance at these institutions taken as a whole showed an improvement, but the average cost of educating pupils in the Muhammadan school was excessive and should be reduced as far as possible. The results of the departmental examinations in these schools were fair. The council also aided five secondary schools with salary grants and 38 primary schools with result grants, against six and 35, respectively, in 1894–95. The number of pupils in these institutions rose from 2,561 to 2,615, and the results of the grant examinations were fair. Nearly 98 per cent. of the allotment for grants was utilized and the total number of boys under instruction in the municipal and aided schools rose from 69·0 to 70·9 per cent. of the male population of school-going age. The sanction of Government should have been obtained for the entertainment of a schoolmistress on Rs. 7 for the Telugu school on the salary-result system for six months from 1st October 1895. It is, however, now approved.

(3) *Medical Relief.*—The total number of patients treated at the two municipal dispensaries rose from 21,677 to 23,053, which, as the year was a healthy one, was apparently due to the growing popularity of the institutions. The midwives attached to these dispensaries attended 213 cases of labour against 163 in 1894–95, which is a satisfactory improvement.

(4) *Vaccination and Vital Statistics.*—The reported number of persons vaccinated during the year rose from 1,894 to 1,987 and the quality of the work turned out also apparently improved, the reported ratio of success being 97·3 per cent. against 96·7 in 1894–95. Infantile vaccination made good progress, but there is considerable room for improvement, the reported number of successful operations on children under one year being only 886 against 1,631 births registered during the year.

There was a small increase in the number of births registered and a decrease in that of deaths. The returns in both cases were far from being complete, the rates recorded being much below the normal. This is not a matter for surprise as no prosecutions at all, against sixty in the previous year, were instituted during the year for failure to register births and deaths. This subject demands increased attention.

(5) *Sanitation.*—The expenditure under this head was Rs. 12,534, or 98·5 per cent. of the allotment and 13·8 per cent. of the current receipts. The Government is glad to learn from paragraph 46 of the Chairman's report that some improvement has been effected in the sanitary condition of the town since it was last visited by the Deputy Sanitary Commissioner, but the council should not rest satisfied until all the defects noticed by that officer, as well as by the District Surgeon, have been remedied.

5. *General Remarks.*—The year closed with a balance of Rs. 70,722, or 78 per cent. of the ordinary current receipts, but the greater portion of this sum is reserved for the extension of the water-supply scheme.

The administration of the municipality during the year under review cannot be considered at all satisfactory. The collections of the current demand, though somewhat better than in the previous year, were bad, and those of arrears were very much worse. The private scavenging agency did not make any material progress, the registration of vital statistics continued to be imperfect, and there has been but very slight, if any, improvement in the conduct of affairs. For this, however, the present Chairman cannot be held responsible as he has been so very recently elected that there has been no sufficient time for him to put the administration of the municipality

on a satisfactory footing. Under these circumstances and in the hope that the Chairman will make every effort to improve the administration of affairs generally, and particularly in the points mentioned above, the Government will await the receipt of the report for the current year before deciding on the question of giving effect to the warnings conveyed in G.Os., Nos. 1202 M., dated 4th September 1894, and 1477 M., dated 12th September 1895.
