Jammalamadugu
Tahsildars office 4th March 1896

From

The Tahsildar of
Jammalamadugu

To

The President Taluk Board
Proddatoor

Sir

Adverting to your official ~ Memorandum No 3317 dated 5th December 1895, requiring me to report on the result of the experiment of Sewage farming and Cropping land used for trenching in night soil, I beg to report as follows:—

2 As per instructions contained in para 5 of letter No 778/5 of 1894 dated 29th March 1894 from Surgeon Major W. G. King M.B. C.M. D.P.H. acting Sanitary Commissioner, Ma

to the Collector and President District
Board Cuddapah, I Selected a
place to the extent of 25 Cents to
the north of Jammalamadugu town in
Survey No 427 belonging to ~~an~~ one Bavaji
D. Babu Rao Satrogi Narasinga Rao.
Privacy to persons using the trenches
was secured by putting fence on
four sides of the place with stones.

3 The experiment was Commenced
on the 10th May 1895 and Completed
by the 11th August 1895. The length of
the place of experiment was 190
links east to west, 123 links
north to South on the ~~eastern~~ western side
22 trenches each to the extent
of 190 links in length, 1½ feet
in breadth and 1 foot in depth
were dug in the ground from
east to west and an average

the latrine every day and moving
the excavated earth at the side
of the trench with their feet when
leaving the place. The place was
so used for 3 months from 10th May to
1895 to 11th August 1895. As September
was the proper Season for Cultivating
lands the experiment was not
Conducted for 6 months as laid down
in Sanitary Commissioner's letter
under reference. The land was
then ~~ploughed~~ ploughed up and sown with
half a Measure of Cholum crop
on the 13th and 14th September 1895.
On the 25th and 26th September last
there was heavy rain to the extent
of 5 inches and the crop which
rose to a foot high was spoiled
by these heavy rains. The land
was again ploughed up and
sown with three measures

at one time

of barige (v.o.d.) on the 24th November last when this crop was on the land there was a quarter inch of rain and the crop rose to a height of 3/4 yard. The crop was harvested on the 1st February 1896 and the grain measured $\frac{755}{8}$ seers of 123 tolas weight

4 The crop in the adjoining lands rose to a height of 1/2 a yard and yielded a crop of 40 seers in an extent of 25 cents. This experiment showed that this land yielded more than the other lands of similar nature.

5 In conclusion I beg to state that the Sanitary Commissioner's letter under reply was received by my predecessor in May 1894. I took charge of this office on the 25th October 1894 and as the cultivation time was then over, I could not commence

---

expenditure of the experiment having been sanctioned in May last the work was commenced immediately.

A statement giving all the information in detail is herewith submitted.

I beg &c

Statement Shewing details of the result of experiment of Sewage farming and Cropping land used for Night Soil in the Jammalamadugu Taluq.

Questions	Answers
1	2
1 Name of Village where experiment was Conducted and extent of land taken for experiment	Jammalamadgu Town 25 Cents
2 Wether the site was fenced or not	Fenced with Stones on four Sides.
3 From what date the experiment was Conducted	From 10th May 1895 to 11th August 1895.
4 How many trenches were dug —	22
5 Dimensions of each trench —	190 links long, 1½ feet broad, and 1 foot deep.
Average No of people who used the trenches every day	200
Whether the defecation was Covered with mud or not every day after the act of deffecation	Yes. The trenches were protected from Cattle entering in.
With how many ploughs the land was ploughed —	one plough Called Madaka
What more agricultural operations were made —	The land was blown in with Gorru and Guntake.
How many measures of Jonna (Cholam) were Sown —	Sown with ½ a Seer cholam on 13th and 14th September 1895

What quantity of rainfell when crop was on land and when	Five inches of rain on 25th and 26th October 95
How high the Jonna Crop rose	One foot high
When Jonna Crop failed and for what reason	On 26th October 1895 owing to excessive rains on 25th and 26th October 1895.
How ploughed again & when	The land was again blown with Jorn and Guntike on 24th November 1895.
What was Sown afterwords and when	Barige on 24th November 95.
How many Seers of barige were Sown.	3 Seers.
What quantity of rain fell when Crop was on the land	Quarter inch.
How high the Crop rose	3/4 yard.
When was the crop harvested	On 1st February 1896.
Quantity of produce	75 5/8 Seers of 123 tolas in weight
How high the adjoining Crops r	1/2 yard
Quantity Of produce produced in the adjoining lands of 25 Cents	40 Seers.

DISTRICT BOARD'S OFFICE,

Dated 20th July 1896.

Recd 22nd July/96

Enclosures 2

FROM

A. C. Tate Esqr. M.A. I.C.S.

PRESIDENT,

DISTRICT BOARD,

CUDDAPAH.

CURRENT No. 2032L

To

The CHIEF SECRETARY TO GOVT.,

LOCAL FUND DEPARTMENT,

FORT SAINT GEORGE.

SIR,

In reference to G.O. No: 2050 L dated 25th October/95, I have the honor to report as follows: —

Para 2.

2 The attention of the Chairman of Chitvelu, Chennur, and Royachoty unions has been drawn to the remarks of Government regarding the small number of meetings held by them, and they were requested to comply with the provisions of section 129 of the act.

at one time

3 With reference to the strength of the Royachoty union, I beg to state that it consisted of the 5 marginally noted Villages and the heads of these 5 Villages were Ex-officio members of the union. In the revision of the Village Establishment Kusba Gollapalli and Chelamakkapalli were clubbed with Masapet and Royachoty respectively and the number of Ex-officio Members was therefore reduced from 5 to 3. I request therefore that Government will be pleased to sanction the reduction in the strength of the ex-officio Members of Royachoty union.

(1) Royachoty
(2) Masapet.
(3) Kusba Gollapalli
(4) Abbavaram
(5) Chelamakkapalem.

Pd
Para 3. Clause 4.

4. In reference to this clause, I beg to state that the necessary readjustments were effected in the Local Fund Supplemental Account for March/96. This

This fact was fully explained in paras 17 & 18 of the Local Fund Administration Report for 1895-96 as bearing this office No: 570/D3 of 96 dated 11th July /96.

C.No. 2006 L/96 in the office of

Para 4. Clause 2

5. The Treasury Deputy Collector reports that the figure 10,180, being the amount of Result Grants paid during the year 1894-95 is made up of the following items:-

Amount paid on account of 1893-94	2597-12-3
Do — Do: 1894-95	5310-1-0
	7907-13-3
Amount adjusted from Provincial funds by transfer credit to Local Funds & debit to the same	2272-5-6
	10180-2-9

In connection with this sum of Rs: 2272-5-6, I beg to state that

(4)

that, the Treasury Deputy Collector, in his letter above quoted, reports that this sum represents the Results Grants earned from Provincial Funds by Local Fund Schools under the direct management of the Presidents of Local Boards, in other words they are the "Results Stipends" paid to teachers of Local Fund Primary schools in addition to the fixed salary and as such this sum was adjusted in the Local Fund Accounts and shewn both on the credit and debit sides. The sums so adjusted were hitherto erroneously shewn on the debit side of the accounts against the head "Payments by Results to pure Result schools" instead of

Treasury Deputy Collector has now bee ordered to debit vide letter No: 22a/304 dated 28th February /96 from the Inspector of Local Fund Accounts to the above officer. If this sum of Rs 2272-5-6 is deducted from the amount of Rs 10180-2-9 the amount that was actually spent under Results Grants from Local Funds during 1894-95 would be Rs 7907-13-3.

Para 4. Clause 5.

6 In this connection I beg to state that the President Taluk Board Madanapalle reports that the well work sanctioned at Brahmana Yerragudi would not be completed as there was not sufficient time for blasting rocks in that wells. The

at one time

(6)

President Talook Board Siddhavattam reports that out of Rs 330 allotted for other sanitary outlay, Rs 109 was the actual expenditure. Out of the balance, Rs 221 the Cost of purchasing iron night soil Carts for Badvel union has erroneously been debited to Scavengering Establishment instead of to other sanitary outlay in the Treasury Account, and Rs 85 the amount of cost of purchasing iron night soil cart for Rajampet union was paid after the close of the official year, as there was delay in obtaining Remittance Transfer Receipts and Rs 36 was too small

the results of the introduction of the sewage farming and cropping land. I beg to submit herewith Copy of Jammalamadugu Tahsildar's (Arzee Report No: 1038 d/13th April/96) together with Copy of its enclosure.

202 d/ 4th [illegible]/96

I have the honor to be
Sir
Your Most Obedient Servant
