No. M., July 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper:—

From M.R.Ry. T. A. ALAGA PILLAI Avargal, Chairman, Municipal Council, Máyavaram, to the Chief Secretary to Government (through Sub-Collector of Tanjore), dated 29th June 1896, No. 572.

I have the honour to submit herewith my report on the working of the Máyavaram Municipality for the official year 1895–96 together with the statements prescribed by Government as per list enclosed.

2. The budget estimate for the year under report was sanctioned by Government in its order No. 464 M., dated 18th March 1895, and the revised estimate was passed in G.O., No. 398 M., dated 10th March 1896.

3. The draft report was placed before, and approved of by, the council at its meeting held on the 24th June 1896—*vide* copy of resolution enclosed.

I.—Constitution of the Council.

4. The maximum strength of the council is eighteen including the ex-officio councillor. Of these four, excluding the ex-officio councillor, are nominated by Government, and the rest elected. The number on the rolls was full both at the beginning and close of the year. The council, as it stood on the 31st March 1896, consisted of sixteen non-official and two official members. All, except the ex-officio councillor, are natives.

5. *Nominations and Elections.*—Two vacancies were created and filled up during the year—one by nomination and the other by election. The former was caused by the resignation of a councillor and the latter by efflux of time.

6. *Office of Chairman.*—M.R.Ry. T. Kothanda Rama Aiyar Avargal, a non-official councillor, continued to act as Chairman till 13th June 1895, when his term of councillorship expired. There was an interim of about three (3) months under the charge of the ex-officio councillor, and I assumed charge on the 14th September 1895, having been, for the fourth time, elected Chairman on the 17th August 1895.

7. *Meetings of the Council.*—The council had 29 sittings during the year against 27 in the year previous, and I am glad to say that no meeting was dissolved for want of quorum. The average attendance increased from 8·5 of the last year to 9·72 in the year under report. The ex-officio councillor was able to attend three meetings during the year.

8. *Audit of Accounts.*—The previous year's accounts were audited during the year, and the audited figures are adopted in column 6 of Statements I and II.

9. *Revision of Registers.*—The house and profession tax registers were revised with the result that the demand of the former rose from Rs. 6,823–3–6 in 1894–95 to Rs. 7,142–8–6, and that of the latter from Rs. 3,416–8–0 to Rs. 3,675–8–0. The land-tax register was partly revised and the revision fetched a small increase of Rs. 29–3–0. The decrease under the tax on arts, compared with the revised estimate, is due, as already stated in my last report, to a general decline in the weaving industry owing to the discouragement of the weaving population in the absence of a brisk demand for their manufactures. The house and land tax assessments continued to be levied at $7\frac{1}{2}$ per cent. of the annual rent value.

## II.—Receipts.

10. The following abstract shows the opening and closing balances and receipts and charges for the year under report:—

| — | Actuals, 1895-96. | Budget estimate, 1895-96. | Revised estimate, 1895-96. | Actuals, 1894-95. |
|---|---|---|---|---|
| | Rs. A. P. | Rs. A. P. | Rs. A. P. | Rs. A. P. |
| Opening balance .. | 7,946 13 10 | 2,780 0 0 | 7,950 0 0 | 1,929 9 2 |
| Receipts .. .. .. .. .. .. | 36,994 7 10 | 33,840 0 0 | 35,070 0 0 | 39,457 3 11 |
| Total .. | 44,941 5 8 | 36,620 0 0 | 43,020 0 0 | 41,386 13 1 |
| Charges .. .. .. .. .. .. | 36,700 4 10 | 35,690 0 0 | 40,100 0 0 | 33,439 15 3 |
| Closing balance .. .. .. .. .. | 8,241 0 10 | 930 0 0 | 2,920 0 0 | 7,946 13 10 |
| Total .. | 44,941 5 8 | 36,620 0 0 | 43,020 0 0 | 41,386 13 1 |

Compared with the budget and the revised estimates, the current receipts show an increase of Rs. 3,154–7–10 and Rs. 1,924–7–10 respectively, the items chiefly contributing to the increase being land tax, avenues, sale of materials, income from markets, school-fees, refunds of expenditure of previous year and advances recovered. The causes of these and other variations are explained below.

11. *Tax on Arts.*—The settled demand of this tax after remissions made on appeal was Rs. 3,688–8–0 including arrears. Of this, a sum of Rs. 3,591–8–0 or 94·7 per cent. of the demand was collected and Rs. 69–8–0 written off the accounts, leaving a small balance of only Rs. 27–8–0 at the close of the year. The number of persons assessed to this tax was 1,636 against 1,521 in the previous year, the average incidence being almost the same as that of last year (Rs. 2–4–0). Owing to depression in trade, the council had to remit a sum of Rs. 70, which was much more than was anticipated. This caused the decrease under the revised estimate.

12. *Tax on Buildings.*—The final demand under this tax after the remission of a very small amount by the council on appeal was Rs. 7,185–5–3, out of which a sum of Rs. 7,156–6–6 was realized as anticipated in the revised estimate and Rs. 5–11–6 was written off as irrecoverable, leaving a very small balance of Rs. 23–3–3 at the close of the year. The number of houses assessed was 4,272 and the average incidence on them was Rs. 1–10–9, against 4,310 and Rs. 1–9–4 respectively in 1894–95. As already stated in paragraph 5 of my budget report for 1896–97, the tax was thoroughly revised and the source of income was developed to the utmost in the year.

13. *Tax on Lands.*—The demand under this head, both arrears and current, was Rs. 710–1–6, out of which Rs. 659–11–6 was collected, Rs. 17–7–10 written off the accounts and only Rs. 32–14–2 was left uncollected, while the balance estimated was Rs. 50. The remission granted by the council was *nil*. Nearly the whole of the arrear demand was realized greatly by collections and partly by writes off. This accounts for the increase over the revised estimate.

14. *Tax on Vehicles, Animals and Carts.*—A sum of Rs. 2,493–12–0 or Rs. 33–12–0 in excess of the revised estimate was realized under this head against Rs. 2,415–4–0, the actuals of the year previous, the increase being due to the rising number of jatkas, consequent on the opening of the Máyavaram-Muttupet line.

15. *Tolls.*—The demand (Rs. 7,000) was fully realized during the year. The collection was contracted and tolls were levied at three-fourths of the schedule rates in the eleven gates of this municipality. The share due to local funds was paid within the year.

16. *Rent of Land and Buildings.*—These items fetched Rs. 192, almost the full demand for the year, though rent of lands fell short of the revised estimate by Rupees 17–8–0.

17. *Avenues.*—The income from this source considerably increased from Rupees 600 in the revised estimate to Rs. 870–7–9, the rise, as already explained in paragraph 7 of my budget report embodied in G.O., No. 398 M., dated 10th March 1896, being due to the sale of a good number of branches of the road side trees.

18. *Sale of Materials.*—A sum of Rs. 84–7–1 was realized under this head, which is Rs. 54–7–1 and Rs. 51–3–7 in excess of the revised estimate and the previous year's actuals respectively. The excess is due to the sale of certain unserviceable materials, such as bedding, &c., of the old travellers' bungalow as well as the old chairs of the offices.

19. *Sale of Street-refuse.*—The income from this source was Rs. 124–15–9 against Rs. 127–15–9, the actuals of 1894–95, and Rs. 75–0–3 below the revised estimate. A portion of the rubbish, estimated to cost Rs. 20, was not sold. Much difficulty is experienced in gathering the purchasers on the spot when the sale is being conducted, owing to the rubbish being ill-suited for manuring purposes, mixed as it is with pieces of pots and other hard materials.

20. *Fees from Educational Institutions.*—The amount realized as fees and fines from the high and primary schools, Máyavaram, the salary-result school, Tiruvelandoor, and the salary-result Muhammadan school, Kornad, was Rs. 10,161–14–0, or Rs. 501–14–0 more than the revised estimate, the municipal high and primary schools, Máyavaram, contributing to the increase in proportion to their advancement in strength.

21. *Sale of Medicines.*—A sum of Rs. 36–15–9 or Rs. 13–0–3 below the revised estimate was realized under this head. The decrease was caused by the opening of two medical shops in the town.

22. *Income from Markets.*—The current demand rose from Rs. 589 in the previous year to Rs. 780, though Rs. 40–14–0, a small portion of it remains unadjusted at the close of the year. The arrear balance of Rs. 66 was adjusted in the year partly by collection and partly by remission. Arrangements are being made to construct a fish market at Kornad in place of the now existing private one in pursuance of the suggestions of the Sanitary Commissioner.

23. *Income from Slaughter-house.*—The contract amount of the municipal slaughter-house, Kornad, rose from Rs. 300 to Rs. 340 which was wholly collected during the year. There is every probability of this source of income being further developed.

24. *Distraint Fees.*—Only a small amount of Rs. 19–6–0 was realized under this head as necessity was avoided for adopting coercive measures on great scale, the collections having been expedited every now and then with mingled activity and vigilance.

25. *License Fees.*—A sum of Rs. 814–7–4 was realized from this source, which is Rs. 64–7–4 and Rs. 133–12–10 more than the revised estimate and the previous year's actuals respectively. This shows a tendency to increase.

26. *Fines under Acts.*—This fluctuating item had a fall from Rs. 805–7–0 in 1894–95 to Rs. 650–10–3.

27. *Contributions from Government.*—A sum of Rs. 1,317–3–11 was received as contribution from Government against Rs. 1,470 in the revised estimate as detailed below:—

| | Rs. | A. | P. |
|---|---|---|---|
| Salary grant for high school .. .. .. .. .. | 1,009 | 5 | 7 |
| Results grants to girls' school .. .. .. .. .. | 96 | 5 | 0 |
| Rent and conductress grant to girls' school .. .. .. | 54 | 1 | 4 |
| Grant on behalf of common gymnast .. .. .. .. | 97 | 8 | 0 |
| Total .. | 1,317 | 3 | 11 |

Applications have been made (1) to the District Magistrate for contribution towards the construction of a dead-house in the hospital compound, and (2) to the Inspector of Schools, Southern Circle, for sanctioning a half salary grant of Rs. 5 on behalf of the common drawing master, and their replies are awaited.

28. A private contribution of Rs. 15 was received for renewing a well in Máyavaram north street.

29. *Miscellaneous.*—The item claiming attention under this head is the private scavenging service. Since the beginning of the current year, the double rates, *i.e.*, As. 2 per mensem for single service and As. 4 for double service, are in force; and the income derived from this source is Rs. 672–6–0 or Rs. 419–10–0 more than the previous year's actuals (Rs. 252–12–0), and nearly the same as the revised estimates. All endeavours are being made to make the system self-supporting.

## III.—Expenditure.

30. *Grant I, Public Works.*—The total expenditure under this grant amounted to Rs. 7,981–4–3 against the revised estimate of Rs. 11,710 and the previous year's actuals of Rs. 5,466–10–0; and it was 21·5 per cent. of the receipts and 21·7 per cent. of the entire expenditure of the year. The decrease under the revised estimate is due to the non-utilization of the full amount provided for the construction of the new travellers' bungalow and the amounts allotted for the extension of the high school building and filling up the hospital tank.

31. *Communications.*—The outlay on roads was Rs. 3,941–5–11 or 84·9 per cent. of the net toll receipts, short of the repairs on toll sheds and the local fund share, against the revised estimate of Rs. 4,330 and the actuals of Rs. 2,914–1–10 of the last year. New works received a portion of this (Rs. 268–0–4), while the remainder, viz., Rs. 3,673–5–7, was spent on repairs. The total extent of roads and streets under maintenance was 24 miles 1 furlong and 156 yards, of which 3 miles 1 furlong and 106 yards were gravelled and the remainder unmetalled. During the year under review, the portion of road No. II from Pattamangalam street up to Kornad Police station-house was re-metalled, a dam was constructed, and the bridge over the Palan Cauvery near slaughter-house was constructed in part and is now approaching completion. It will not be too much to say that with the willing co-operation of the councillors, the level of almost all the streets was properly raised and their sides, fairly sectioned. The condition of a major number of roads and streets in the town is fairly satisfactory.

32. *Buildings.*—A sum of Rs. 2,721–1–2 was spent on new works under this head and Rs. 317–7–11 on repairs, the two aggregating to Rs. 3,038–9–1 against Rs. 6,250 in the revised estimate and Rs. 1,253–8–6 in 1894–95. For the decrease below the revised estimate *vide* paragraph 30 *supra*. The construction of the new travellers' bungalow is now in fair progress, and it is hoped to complete it soon. The work of filling up the hospital tank has been taken on hand with the additional fund sanctioned in the current year's budget for the same and is now rapidly progressing. During the year under report, the superstructure of the Máyavaram primary school building was renewed at a cost of Rs. 1,396–5–7, a small portion of the materials purchased and made for the extension of the high school building in a way meeting the required materials for the renewed building. An iron latrine and nine corrugated iron dust-bins were sent for from Madras, and the hospital compound improved by a portion of land purchased being added to it. The construction of the dead-house had to be taken on hand in the current year after finding funds to meet the increased cost as per plan revised by the sanitary board.

33. *Drainage.*—A sum of Rs. 55–10–0 was spent under this head for the construction of a drainage tunnel in Kornad-Aiyanar Koil street.

34. *Water-supply.*—On new works of this kind, a sum of Rs. 257–6–9 was spent for the construction of flights of steps in the Palan Cauvery and for sinking three new wells in important centres, while Rs. 280–5–0 was spent on sundry supplies to water sources and maintaining the tank watch and temporary coolies for river springs.

35. *Grant II, Education.*—Independent of the sum of Rs. 1,493–4–4 spent on educational buildings (shown in Grant I), and against the revised estimate of Rs. 12,820, the actual expenditure under this head was Rs. 12,680–6–11. The decrease, though to some extent compensated by the increase under "salary" and "salary-result contingencies," still exceeded in "salary schools establishments," "result grants," and "building and furniture grants."

36. *Training Schools.*—Out of the allotment of Rs. 60 in the revised estimate only Rs. 48–15–0 was the actual expenditure under this head. Three students were trained in the sessional school, Shiyali, this year, out of four students expected to be trained; hence the decrease.

37. *Municipal Schools on the Salary System.*—The high and primary schools, Máyavaram, were maintained under this system at a cost of Rs. 9,684–1–3 including contingencies, against Rs. 9,480 in the revised estimate. The increase under contingencies was caused by the supply of chemicals, furniture and gymnastic apparatus to the high school. The provision for the second and third assistants was not quite made use of on account of the vacancies caused by the unhappy deaths of the two assistants and the delay in filling up their places owing to the difficulty of securing duly qualified hands.

38. *Municipal Schools on the Salary-result System*—(3) *Upper Primary Schools.*—The salary-result school, Tiruvelandúr, and the Saliya and Muhammadan schools, Kornad, and the lower secondary girls' school, Máyavaram, were kept up under this system. The actual expenditure on them amounted to Rs. 1,192–13–11 as fixed stipends, Rs. 494–9–1 as result grants and Rs. 319–2–9 as contingencies, the corresponding figures of the revised estimate being Rs. 1,190, Rs. 400 and Rs. 230 respectively. The grants earned by the boys' schools greatly exceeded the budget allotment, while that by the girls declined. All the schools received the full amount earned. The Saliya school and the girls' school were supplied with some back benches. This, together with the house-rent paid to the Saliya and Mahammadan schools, Kornad, caused the increase under contingencies, it being necessary to locate them in suitable buildings.

39. *Result Grants.*—The year commenced with fourteen results schools—twelve day schools and two night ones; gave birth to seven new schools—six day and one night; and lost three schools—two having been actually closed and one treated as closed, none of the six pupils presented having been eligible for grant, thus keeping at its close seventeen day schools and a night one. All the eighteen schools were examined and earned grants, against fifteen in the previous year. Two hundred and thirty-five passed in the examination with 48 in the merit out of 362 pupils presented, the corresponding figures of the previous year being 242, 28 and 339 respectively. The increase in the number that secured merit is noted with satisfaction, though the number passed out of those presented had slightly decreased. The total amount earned by the schools was only Rs. 502, while the budget provided Rs. 900. Full amounts as per certifying memoranda of the Assistant Inspector were paid to all the schools but two—the Sarathattai and Padayachi Street schools which were paid 20 per cent. less as they are still handled by unqualified teachers. Every effort is being made to improve the staff of the result schools.

40. *Inspection.*—An inspecting schoolmaster on Rs. 17 per mensem was continued during the year at a cost of Rs. 204 for his salary and Rs. 12–6–6 for contingencies against Rs. 200 and Rs. 10 respectively in the revised estimate. The work turned out by the inspecting schoolmaster may be considered fair.

41. *Miscellaneous.*—Under this head, a sum of Rs. 222–6–5 against an allotment of Rs. 350 in the revised estimate was spent towards maintaining a common gymnast on Rs. 15 and a common drawing master on Rs. 10, with their contingencies. Arrangements are being made for supplying all the result schools with back benches and black-boards and for establishing a common gymnasium, as recommended by the Assistant Inspector of Schools.

42. *Results of Examinations.*—Out of 21 students that appeared for the Matriculation examination, fifteen got through, with three in the first-class, one of whom having stood first in the Presidency. This is indeed highly creditable and throws a very favourable light on the efficiency of the teaching staff. The results of the Lower Secondary examination are likewise very satisfactory, 25 students having been successful with three in the first class, out of 35 presented. For the Primary School examination, 97 pupils were presented from the Municipal schools, 81 of which were successful against 62 and 52 respectively in 1894–95. The number of students had increased with success. The salary-result schools also did fairly well in the grant examinations,

151 out of 187 presented having passed with 53 in the merit, the corresponding figures for the year previous being 106, 131 and 30 respectively. The municipal schools have done very creditably this year in public examinations. The Assistant Inspector's statistics on the progress of education in this municipality are herewith submitted.

43. *Grant III, Sanitation, &c., Hospitals.*—The Municipal Webster Hospital, Máyavaram, was maintained at a cost of Rs. 2,414–7–10 against the revised estimate of Rs. 2,640. The expenditure on establishment was Rs. 1,747–2–5, nearly the same as the revised estimate. The slight decrease under medicines, diet and contingencies seems to be owing to the careful use and satisfactory disbursement of medicines to the patients. With the saving thus effected, the hospital will be supplied with the furniture urgently required.

44. On a perusal of the accompanying concise report of the hospital, it will be seen that 165 in-patients and 11,613 out-patients were treated in the hospital during the year against 194 and 8,810 in the previous year. The decrease in the former is attributed to greater discretion exercised in the selection of really helpless cases, while the latter had fairly increased by 2803—a satisfactory feature. The large increase in the number of out-patients bears testimony to the popular and efficacious treatment of the civil apothecary M.R.Ry. K. Vasudeva Ráoji. Though the average attendance of in-patients had a fall from 7·08 in last year to 5·55 for reasons already assigned, that of the out-patients had a decided increase from 53·62 to 72·12. There were thirteen deaths among the in-patients and three among the other class against nine and two respectively in the previous year. The reasons for the above deaths are shown in paragraph (*g*) of the apothecary's report. The midwife attended only ninety labour cases, *i.e.*, twenty-four less than in the previous year. The decrease is due to the absence of the midwife after her resignation and before her re-entertainment—*vide* paragraph (i) of the concise report.

45. *Vaccination.*—A sum of Rs. 347–4–6 was spent under establishment and contingencies, against the revised estimate of Rs. 330. Vaccination was carried on on the compulsory system by the municipal vaccinator under the careful supervision of the apothecary. The operations were performed from calf-to-arm with pure animal lymph for inoculation. During the year under review, 889 cases were vaccinated, 885 of which proved successful. The high percentage of success was mainly due to careful operations and proper attention. 68·10 per cent. of the total number of cases is reported to have been verified by the civil apothecary. Infantile vaccination improved, 662 of the total number of cases having been successfully operated.

46. *Registration of Births and Deaths.*—The actual expenditure under this head was Rs. 144, the same as the actuals of 1894–95, but a little less than the revised estimate. Eight hundred and eighteen births and 666 deaths were registered during the year against 688 and 649 respectively in the previous year. The registration of vital statistics has thus comparatively improved. During the year there were 19 cases of cholera, 138 of fever and 509 of other causes against 9, 152 and 488 respectively in the previous year. Intense heat during summer was the cause of increase of deaths in fever.

Seven cases of births and the same number of deaths were prosecuted before the Magistrate for failure to give timely information against ten and nine respectively in the previous year.

47. *Conservancy.*—A sum of Rs. 6,739–11–9 was spent under this head against Rs. 6,880 of the revised estimate and Rs. 6,262–15–7 of the actuals of 1894–95. The slight fall from the revised estimate (Rs. 37–4–2) on establishment alone was due to fines and stoppages. The establishment consisted of three nuisance inspectors, six peons, seventeen sweepers, six road-cleaning toties and thirteen private scavenging toties. The number of toties (22) furnished by the apothecary in his report is the increased number sanctioned in the current year's budget. The present establishment, however, shows an increase of one peon, one sweeper and one private scavenging toti over that of the last year. Rs. 750 provided in the revised estimate under private scavenging establishment includes provision for temporary toties during

cholera visits, the amount of Rs. 30 in the same under "cholera charges" having been intended for materials required for cholera precautions. The cholera existed for only a short time during the year; hence the provision was not exhausted in full. The pay of toties for cholera purposes is now shown under "cholera charges" with reference to paragraph 5 of the official memorandum, dated 22nd February 1896, No. 252.

48. *Sanitation.*—This important subject is dealt with in the report of the apothecary under different heads. The limited funds of the municipality, as often reported, would be hardly sufficient to think of a satisfactory drainage scheme on a grand scale. In summer, when the Cauvery is dry, the wells sunk by the municipality and many of the private wells afford good water. Such of the tanks, as are in a sanitary point of view unfit for drinking purposes, are reserved for bathing only, watchmen being placed over them. Most of the defects pointed out by the Deputy Sanitary Commissioner are being rectified, provision having been made for the purpose in the recent budget—*vide* paragraph 43 of the budget report for 1896–97. The appointment of a trained sanitary inspector is deferred pending the final order of the Government on the Sanitary Commissioner's letter with reference to G.O., No. 1658 M., dated 16th October 1895. Arrangements are being made in the current year to construct a fish market at Kornad and to close the Roman Catholic burial-ground despite the opposition on religious scruples of the Paraiya community concerned.

The conservancy establishment, especially the private scavenging one, is reported to be insufficient for the needs of the town and this has been receiving the attention of the council.

The general health of the population during the year under review was fair. The precautionary measures adopted for preventing the spread of cholera on its occasional visits, and the vigilance of the apothecary at the time contributed in no small measure to check the progress of the epidemic.

49. *Grant IV, Lighting, &c.—Lighting.*—The sum spent on establishment (Rs. 570–9–2) was the same as the revised estimate, and that on contingencies exceeded the revised estimate by Rs. 111–5–2 owing to the high price of kerosine oil. Lighting was conducted, as hitherto, departmentally by a superintendent with thirteen masalchies under him. More than half the number of days in a month were lighted according to the different phases of the moon. The total number of lamps at the close of the year was 236 or 9 more than in the previous year. Of these, 129 stood on iron posts, 105 on stone posts and two fixed to walls. The number of lights is gradually increasing year by year.

50. *Avenues.*—The actual expenditure under this head was Rs. 287–7–2 or nearly the same as the revised estimate. The avenue establishment consisted of six coolies appointed to look to, and care for, the healthy growth of the avenue plants and trees. Their work was generally supervised by the Public Works Overseer. The amount allotted for contingencies was not made use of owing to the extremely hot weather during the planting season.

51. *Other charges.*—Out of Rs. 520 provided in the revised estimate only Rs. 255–5–9 was utilized, of which Rs. 155–7–9 was spent on printing proceedings and Rs. 99–14–0 on law charges, being costs of defending two suits, &c.

52. *Grant V.*—The total outlay under this grant was Rs. 2,417–3–1 against Rs. 2,210 in the revised estimate, the increase occurring chiefly under "Office contingencies". The increased charge of printing the account forms, the payment of the site rent of the office building for the past five years and the charges incurred for binding certain old records of the office contributed to the increase. The contribution for central office and audit establishments were regularly paid. The total charge, viz., Rs. 2,417–3–1 under this grant, amounted to 6·5 per cent. of the current receipts.

53. *Repayment of Debt.*—A sum of Rs. 554–9–5 was paid during the year under review for repayment of debt, of which Rs. 325 was for the principal and the remainder Rs. 229–9–5 for interest. Other particulars appear in statement VIII.

54. I cannot bring this report to a conclusion without availing myself of this opportunity to express my thanks to the council which has rendered me a good deal of material help during the course of the year.

ENCLOSURE.

CONCISE Report on the working of the Municipal Hospital, Máyavaram, for the year 1895-96.

*Public Health.*—The town consists of a population of 23,675 according to the census of 1891. The public health during the year was fairly good. A few cases of cholera occurred about the end of June and in July, most of which were brought in from the surrounding villages where the epidemic was prevailing at the time. Again in the month of January cholera broke out in a Korava hut attacking five of the inmates and carrying off three of them. This last outbreak could be clearly traced to eating fish brought in from Tranquebar, where the epidemic was prevailing at the time. By the rigorous application of the preventive methods laid down in the G.O., No. 1028 M., dated the 26th June 1895, the epidemic was happily nipped in the bud. During the closing months of the year measles prevailed to a certain extent.

2. *Vital Statistics.*—The information under this head is gathered by the sanitary inspectors and registered in the Municipal office by a registrar. The number of births and deaths is as follows :—

| Years. | Births. | | Deaths. | |
|---|---|---|---|---|
| | Number. | Rate per mille. | Number. | Rate per mille. |
| 1891-92 .. .. .. .. .. | 823 | 34·7 | 853 | 35·01 |
| 1892-93 .. .. .. .. .. | 787 | 33·1 | 633 | 26·60 |
| 1893-94 .. .. .. .. .. | 843 | 35·5 | 808 | 34·0 |
| 1894-95 .. .. .. .. .. | 688 | 29·0 | 649 | 27·3 |
| 1895-96 .. .. .. .. .. | 818 | 34·4 | 666 | 28·0 |

3. *Sanitation.*—The establishment consists of 3 inspectors, 6 peons, 17 sweepers, 22 toties (15 for private scavenging purposes and 7 for streets and public latrines), 17 rubbish carts, 5 night-soil carts, 1 sewage cart, 16 public latrines (3 masonry, 1 corrugated iron sheet and 12 tatty ones), 204 dust-bins, of which 179 are masonry and 25 moveable ones.

*Communications.*—Out of a mileage of 34 miles, 7 furlongs and 30 yards of roads and streets only 3 miles 3 furlongs and 60 yards are metalled. The streets and lanes in the outlying parts of the town become very slushy and absolutely impassable during the rains. An improvement in the condition of these is urgently called for.

The general cleanliness of the town is fair. The main streets are fairly clean. The bye-streets and lanes require greater attention. Considering the large area of the town the number of sweepers and toties is inadequate. The street sweepings are first deposited in the dust-bins and thence carted away to two rubbish depôts outside the town to be stored there and periodically sold to land-owners for manure. There are 204 dust-bins, of which 179 are masonry ones. Many of these are in a dilapidated condition. The sooner they and their kind are replaced by moveable ones the better. The number of dust-bins must be greatly increased and located at much closer intervals. The night-soil from the public and private latrines is carted away to the night-soil depôt, where it is buried in trenches. The private scavenging system does not seem to be in force in all parts of the town; where it so, 15 toties employed for cleansing 5,509 houses are obviously very inadequate. The compulsory extension of the system is highly desirable.

*Water-supply.*—The water-supply of the town is far from satisfactory. The town depends upon the Kaveri for the supply during the floods. When the river is dry, springs and wells are excavated in the bed. There are four tanks nominally reserved for drinking purposes. Their surroundings are not above criticism and their water anything but good, especially in summer. They are all supplied from the Kaveri and none of them has an outlet to drain away the surplus, so that the water has been stagnating for years. That the quality of the water-supply is bad is proved by the fact that elephantiasis is very common in the town, especially at Kornad. Nineteen wells have been sunk by the municipality in different parts of the town. These are for the most part shallow and contain sub-soil water in abundance. The water of some of the wells is brackish and unsuited for drinking. If it be not feasible to undertake a scheme of water-supply on the scale it is done in the larger municipalities, a number of deep wells in suitable localities, plastered with portland cement to exclude the sub-soil water, will, to a certain extent, ameliorate the condition.

*Drainage*—is defective. The system in use is the natural one. During the heavy rains, the rain water discharges itself in the Kaveri and in the irrigation channel called the Palankaveri. In wet weather all the backyards of houses and some streets, including the hospital compound, are knee-deep in water. There are about thirty cess-pools in all attached to some of the houses. They are said to be periodically cleansed by the owners, but this is done at long intervals and very perfunctorily. It is desirable that a systematic scheme of drainage is laid out and executed in part year by year as funds are available.

4. *Vaccination.*—This is done by the municipal vaccinator under the compulsory system. Only animal lymph is used for inoculation. During the year under report 881 cases were vaccinated, of which 877 proved successful against 882 for the previous year. The vaccinator's work is supervised by the civil apothecary who verified 68·10 per cent. of the total cases. Out of the total of 881 cases, 662 were under one year of age giving a percentage of 8·92 to the total births. Only 25 inoculations were performed for re-vaccination. It is desirable that re-vaccination should be steadily pushed on.

5. *Hospital.*—(*a*) There is a main building and four wards together with some out-houses with accommodation for twelve patients at a time. The male side is fairly full always. On the female side only the homeless and abandoned women seek admission for venereal complaints. The District Medical and Sanitary Officer recommended, during his inspection, to have a separate operation room built. This has not been given effect to, nor is there any provision made in the budget to meet the requirement. There is a cess-pool in the hospital compound and it is proposed to be filled up in the current year.

(*b*) The buildings are in a fair state of repair, excepting the dead-house, which it is proposed to rebuild.

(*c*) The furniture is very insufficient. There is only one chair and one stool, neither of which is useful for desk-work. The furniture sanctioned more than a year ago has not been supplied yet. The operation table recommended by the District Medical and Sanitary Officer is not yet supplied.

(*d*) The hospital was inspected by the District Medical and Sanitary Officer in the month of September. His recommendation regarding the sign board to be put up at the end of the lane leading to the hospital has been carried out.

(*e*) Under sale of medicines a sum of Rs. 36–15–9 was realised during the year under report against Rs. 87–13–6 for the previous year. The falling off is due to the opening of two chemists' shops in the town, where those who can afford to pay for their medicines buy them.

(*f*) Number of patients treated as compared with the previous years :—

| Years. | In-door. | | | Out-door. | | |
|---|---|---|---|---|---|---|
| | Total treated. | Daily average number. | Deaths. | Total treated. | Daily average number. | Deaths. |
| 1891-92 .. .. .. | 153 | 7·72 | 13 | 7,103 | 42·91 | 8 |
| 1892-93 .. .. .. | 171 | 7·70 | 6 | 8,890 | 55·06 | 1 |
| 1893-94 .. .. .. | 186 | 7·57 | 11 | 7,718 | 46·71 | 8 |
| 1894-95 .. .. .. | 194 | 7·08 | 9 | 8,810 | 53·62 | 2 |
| 1895-96 .. .. .. | 165 | 5·55 | 13 | 11,613 | 72·12 | 3 |

There is a decrease among the in and an increase among the out patients. The decrease in the former is due to greater discretion exercised in selecting cases that are in real need of help.

(*g*) *Mortality and the actual causes of it.*—Thirteen deaths occurred among the in-patients and three among the out-patients. Of the former two were from anæmia, one from fracture of the skull, two from lung complaints, one from kidney disease, one from old age and one following an operation—removal of the lower jaw—and the remaining five were from cholera.

(*h*) Operations—

| | Major | Minor. |
|---|---|---|
| 1894–95 .. .. .. .. .. .. .. | .. | 327 |
| 1895–96 .. .. .. .. .. .. .. | 10 | 446 |

(*i*) The establishment consists of—

| | |
|---|---|
| One civil apothecary. | One ward cooly. |
| One compound. | One cook. |
| One midwife. | One toty. |
| One lascar. | One sweeper. |

Statement showing the number of labour cases attended by the midwife, municipal hospital, Máyavaram, during 1895–96.

| Years. | Natural. | Difficult. | Total. |
|---|---|---|---|
| 1891–92 .. .. .. .. .. | 96 | 2 | 98 |
| 1892–93 .. .. .. .. .. | 118 | 1 | 119 |
| 1893–94 .. .. .. .. .. | 150 | .. | 150 |
| 1894–95 .. .. .. .. .. | 113 | 1 | 114 |
| 1895–96 .. .. .. .. .. | 88 | 2 | 90 |

Provision is made in the budget to entertain a gardener.

The midwife was out of employ from about the middle of May to the middle of September having resigned her appointment on account of some domestic inconveniences. She was re-entertained on the 16th September.

(*k*) There is no hospital or dispensary for caste and gosha women.

*Deputy Collector in Charge.*

---

No. 2099-Rev.

Submitted to Government in the Local and Municipal Department.

2. *Paragraph* 7 *of the report.*—It is satisfactory to note that none of the twenty-nine meetings called have been dissolved for want of a quorum, and that the percentage of attendance rose from 8·5 in 1894–95 to 9·72 in 1895–96. The Sub-Collector's attendance was however poor.

3. The collections under all heads of revenue are satisfactory.

4. *Paragraph* 30.—Under new works—buildings, the allotment has not been fully utilized, notwithstanding the fact that the early completion of the travellers' bungalow is much to be desired.

5. The condition of streets and lanes, and of the water-supply and drainage is, according to the Medical officer's report, anything but satisfactory, and the council should take steps to remedy the defects without further delay.

6. *Paragraph* 45.—It is a matter of surprise that the proportion of successful cases to the total number vaccinated is so high as 99·55 per cent. But the Medical officer avers that it is so and that he verified 68·10 per cent. of the cases.

7. *Paragraph* 48.—The appointment of a sanitary inspector should no longer be postponed.

8. *Statement II-A.*—The cost of land purchased for the extension of the hospital compound, viz., Rs. 165–8–0, has been charged to Grant I, New buildings. Apparently the charge should be shown against 9-iv Compensation for lands under Grant IV.

REMARKS.

The year has on the whole one of progress. A decrease in strength is noted in each of the municipal Primary Schools. These schools would thrive better if the sub-inspector be entrusted with larger powers of supervision, [illegible] grant of leave to masters etc. The increase in the number of aided Primary Schools and in their strength is satisfactory. I think these schools are capable of improvement if the municipality can manage to be a little more liberal in the aid it grants them.

## II.—Statement Showing the distribution of pupils, distinguishing boys and girls under the general classes of population.

| Class. | Population of school-going age. | | Pupils under instruction. | | Percentage. | | REMARKS. |
|---|---|---|---|---|---|---|---|
| | Boys. | Girls. | Boys. | Girls. | Boys. | Girls. | |
| Europeans and Eurasians... | | | | | | | The School population of Mayavaram consists of a large number of outsiders. Hence the high percentage of Boys under instruction. |

Concise Report on the working of the Municipal Hospital, Mayavaram for the year 1895-96.

28

Public Health. The town consists of a population of 23,675 according to the census of 1891. The public health during the year was fairly good. A few cases of cholera occurred about the end of June and in July, most of which were brought in from the surrounding villages where the Epidemic was prevailing at the time. Again in the month of January cholera broke out in a Korava hut attacking five of the inmates and carrying off three of them. This last outbreak could be clearly traced to eating fish brought in from Trangubar where the Epidemic was prevailing at the time. By the rigorous application of the preventive methods laid down in the G.O. No: 1028 dated the 26th June 1895 the Epidemic was happily stopped in the bud. During the closing months of the year Mea-

2. Vital Statistics. The information under this head is gathered by the Sanitary Inspectors and registered in the Municipal office by a Registrar. The number of births and deaths is as follows.

| Year | Births | | Deaths | |
|---|---|---|---|---|
| | No | Rate per mille | No | Rate per mille |
| 1891-92 | 823 | 34·7 | 853 | 35·01 |
| 1892-93 | 787 | 33·1 | 633 | 26·60 |
| 1893-94 | 843 | 35·5 | 808 | 34·10 |
| 1894-95 | 716 | 30·1 | 667 | 28·06 |
| 1895-96 | 818 | 34·55 | 666 | 28·13 |

3. Sanitation. The establishment consists of: 3 Inspectors; 6 peons; 17 Sweepers; 22 Lotis (15 for private scavenging purposes and 7 for streets and public latrines); 17 rubbish carts; 5 night soil carts; 1 sewage cart; 5 public latrines (3 masonry, 1 corrugated iron shed, and 12 latty, ones); dustbins of which 179 are masonry, 25 moveable, ones.

Communications. Out of 37 miles of roads and streets only 3 miles, 3 furlongs and 30 yards are metalled. The lanes and by yards are metalled. The streets and lanes in the outlying parts of the town become very slushy and absolutely impassable during the rains. An improvement in the condition of these is urgently called for.

The general cleanliness of the town is fair. The main streets are fairly clean. The bye-streets and lanes require greater attention. Considering the large area of the town the number of sweepers and lotis is inadequate. The street sweepings are first deposited in the dustbins and these carted away to the rubbish depots outside the town by the slop carts and periodically sold. Landowners for manure. There are 204 dustbins of which 179 are masonry ones. Many of these are in a dilapidated condition. The owner they and their kind are

The number of dustbins must be greatly increased and located at much closer intervals. The night soil from the public and private latrines is carted away often right to rail depot. where it is buried in trenches. The private scavenging system does not seem to be in force in all parts of the town. Were it so, 15 lories employed for cleansing 5509 houses are obviously very inadequate. The compulsory extension of the system is highly desirable.

Water supply. The water supply of the town is far from satisfactory. The town depends upon the Kaveri for the supply during the floods. When the river is dry springs and wells are excavated in the bed. There are four tanks nominally reserved for drinking purposes. Their surroundings are not above criticism and their water anything but especially in Summer. Many

They are all supplied from the Kaveri and none of them has an outlet to drain away the surplus, so that the water has been stagnating for years. That the greater part of the water supply is bad is proved by the fact that Elephantiasis is very common in the town, Especially at Karnad. 19 wells have been sunk by the Municipality in different parts of the town. These are for the most part shallow and contain sufficient water in abundance. The water of some of the wells are is brackish and unsuited for drinking If it be not feasible to undertake a scheme of water supply on the scale it is done in the larger Municipalities, a number of deep extend wells in suitable localities, lined with Portland cement to exclude surface soil water, will, to a certain

Drainage is defective. The system in use is the natural one. During the heavy rains, the rain water discharges itself in the Kaveri and in the irrigation channel called the Palankaveri. In Velivottam all the backyards of houses and some streets, including the hospital Compound, are knee deep in water. There are about 30 cesspools in all, attached to some of the houses. They are said to be periodically cleaned by the owners; but this is done at long intervals and very perfunctorily. It is desirable that a systematic scheme of drainage is laid out and executed in part year by year, as funds are available.

4. Vaccination. This is done by the Municipal Vaccinator under the Compulsory system. Only animal lymph is used for inoculation. During the year under report [illegible]

were vaccinated of which 872 were successful against 882 for the previous year. The Vaccinator's work is supervised by the Civil Apothecary who verified 68.10 per cent of the total cases. Out of the total of 881 cases 662 were under one year of age giving a percentage of 8.92 of the total births. Only 25 inoculations were performed for revaccination. It is desirable that revaccination should be steadily pushed on.

5. Hospital. (a) There is a main building and four wards together with some outhouses, with accommodation for 12 patients at a time. The male side is fairly full always as the female side only the lowest and abandoned women seek admission for Venereal complaints. The District Medical and Sanitary Officer recommended, during his inspection, that there should be

has not been given effect to, nor is
ere any provision made in the
Budget to meet the requirement. +
ere is a cesspool in the Hospital
mpound and it is proposed to
illed up in the current year.

(b) The buildings are in a
fair state of repair, excepting
he dead house which it is proposed
to be rebuild.

(c). The furniture is very
insufficient. There is only one
chair and one stool neither of which
is useful for deskwork. The furni-
ture sanctioned some time a year
ago has not been supplied yet.
he operation table, recommended
by the District Medical and Sanitary
Officer, is not yet supplied.

(d) The Hospital was
inspected by the District Medical

of September. His recommendation,
regarding the signboard to be put up
at the end of the lane leading to the
Hospital, has been carried out.

(e) Under sale of medicines a
sum of Rs 36.15.9 was realised during
the year under report against
Rs 87.13.6 for the previous year.
The falling off is due to the opening
of two Chemist shops in the town
where those who can afford to pay
for their medicines buy them.

(f) Number of patients treated
treated as compared with the pre-
vious years.

| Years | Indoor | | | Outdoor | | |
|---|---|---|---|---|---|---|
| | Total treated | Daily average no: | Deaths | Total treated | Daily average no: | Deaths |
| 1891-92 | 153 | 7.72 | 13 | 7103 | 42.91 | 8 |
| 1892-93 | 171 | 7.70 | 6 | 8890 | 55.06 | 1 |
| 1893-94 | 186 | 7.57 | 11 | 7718 | 46.71 | 8 |
| 1894-95 | 194 | 7.08 | 9 | 8810 | 53.62 | 2 |
| 1895-96 | 165 | 5.55 | 13 | 11613 | 72.12 | 3 |

There is a decrease among the In and an increase among the Out-patients. The decrease in the former is due to greater discretion exercised in admitting cases that are in real need of help.

(g) Mortality and the actual causes of it. 13 deaths occurred among the in-patients, and 3 among the out-patients of the former two were from anaemia, one from fracture of the skull, two from Lung Complaints, one from Kidney disease, one from old age and one following on abscess — removal of the lower jaw — and the remaining five were from Cholera.

(h) Operations.

**SEPTEMBER.**

**Administration Report.**

Reviewing the — of the Máyavaram Municipal Council for 1895–96.

No. 1503 M., 5TH SEPTEMBER 1896.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From M.R.Ry. T. A. ALAGA PILLAI Avargal, Chairman, Municipal Council, Máyavaram, to the Chief Secretary to Government (through Sub-Collector of Tanjore), dated 29th June 1896, No. 572.

I have the honour to submit herewith my report on the working of the Máyavaram Municipality for the official year 1895–96 together with the statements prescribed by Government as per list enclosed.

2. The budget estimate for the year under report was sanctioned by Government in its order No. 464 M., dated 18th March 1895, and the revised estimate was passed in G.O., No. 398 M., dated 10th March 1896.

3. The draft report was placed before, and approved of by, the council at its meeting held on the 24th June 1896—*vide* copy of resolution enclosed.

I.—CONSTITUTION OF THE COUNCIL.

4. The maximum strength of the council is 18 including the ex-officio councillor. Of these four, excluding the ex-officio councillor, are nominated by Government, and the rest elected. The number on the rolls was full both at the beginning and close of the year. The council, as it stood on the 31st March 1896, consisted of 16 non-official and two official members. All, except the ex-officio councillor, are natives.

5. *Nominations and Elections.*—Two vacancies were created and filled up during the year—one by nomination and the other by election. The former was caused by the resignation of a councillor and the latter by efflux of time.

6. *Office of Chairman.*—M.R.Ry. T. Kodanda Rama Aiyar Avargal, a non-official councillor, continued to act as Chairman till 13th June 1895, when his term of councillorship expired. There was an interim of about three (3) months under the charge of the ex-officio councillor, and I assumed charge on the 14th September 1895, having been, for the fourth time, elected Chairman on the 17th August 1895.

7. *Meetings of the Council.*—The council had 29 sittings during the year against 27 in the year previous, and I am glad to say that no meeting was dissolved for want of quorum. The average attendance increased from 8·5 of the last year to 9·72 in the year under report. The ex-officio councillor was able to attend three meetings during the year.

8. *Audit of Accounts.*—The previous year's accounts were audited during the year, and the audited figures are adopted in column 6 of Statements I and II.

9. *Revision of Registers.*—The house and profession tax registers were revised with the result that the demand of the former rose from Rs. 6,823–3–6 in 1894–95 to Rs. 7,142–8–6, and that of the latter from Rs. 3,416–8–0 to Rs. 3,675–8–0. The land-tax register was partly revised and the revision fetched a small increase of Rs. 29–3–0. The decrease under the tax on arts, compared with the revised estimate, is due, as already stated in my last report, to a general decline in the weaving industry owing to the discouragement of the weaving population in the absence of a brisk demand for their manufactures. The house and land tax assessments continued to be levied at 7½ per cent. of the annual rent value.

## II.—Receipts.

10. The following abstract shows the opening and closing balances and receipts and charges for the year under report:—

| — | Actuals, 1895–96. | Budget estimate, 1895–96. | Revised estimate, 1895–96. | Actuals, 1894–95. |
|---|---|---|---|---|
| | Rs. A. P. | Rs. A. P. | Rs. A. P. | Rs. A. P. |
| Opening balance .. .. .. .. .. | 7,946 13 10 | 2,780 0 0 | 7,950 0 0 | 1,929 9 2 |
| Receipts .. .. .. .. .. .. | 36,994 7 10 | 33,840 0 0 | 35,070 0 0 | 39,457 3 11 |
| Total .. | 44,941 5 8 | 36,620 0 0 | 43,020 0 0 | 41,386 13 1 |
| Charges .. .. .. .. .. .. | 36,700 4 10 | 35,690 0 0 | 40,100 0 0 | 33,439 15 3 |
| Closing balance .. .. .. .. .. | 8,241 0 10 | 930 0 0 | 2,920 0 0 | 7,946 13 10 |
| Total .. | 44,941 5 8 | 36,620 0 0 | 43,020 0 0 | 41,386 13 1 |

Compared with the budget and the revised estimates, the current receipts show an increase of Rs. 3,154–7–10 and Rs. 1,924–7–10 respectively, the items chiefly contributing to the increase being land tax, avenues, sale of materials, income from markets, school-fees, refunds of expenditure of previous year and advances recovered. The causes of these and other variations are explained below.

11. *Tax on Arts.*—The settled demand of this tax after remissions made on appeal was Rs. 3,688–8–0 including arrears. Of this, a sum of Rs. 3,591–8–0 or 94·7 per cent. of the demand was collected and Rs. 69–8–0 written off the accounts, leaving a small balance of only Rs. 27–8–0 at the close of the year. The number of persons assessed to this tax was 1,636 against 1,521 in the previous year, the average incidence being almost the same as that of last year (Rs. 2–4–0). Owing to depression in trade, the council had to remit a sum of Rs. 70, which was much more than was anticipated. This caused the decrease under the revised estimate.

12. *Tax on Buildings.*—The final demand under this tax after the remission of a very small amount by the council on appeal was Rs. 7,185–5–3, out of which a sum of Rs. 7,156–6–6 was realized as anticipated in the revised estimate and Rs. 5–11–6 was written off as irrecoverable, leaving a very small balance of Rs. 23–3–3 at the close of the year. The number of houses assessed was 4,272 and the average incidence on them was Rs. 1–10–9, against 4,310 and Rs. 1–9–4 respectively in 1894–95. As already stated in paragraph 5 of my budget report for 1896–97, the tax was thoroughly revised and the source of income was developed to the utmost in the year.

13. *Tax on Lands.*—The demand under this head, both arrears and current, was Rs. 710–1–6, out of which Rs. 659–11–6 was collected, Rs. 17–7–10 written off the accounts and only Rs. 32–14–2 was left uncollected, while the balance estimated was Rs. 50. The remission granted by the council was *nil*. Nearly the whole of the arrear demand was realized greatly by collections and partly by writes off. This accounts for the increase over the revised estimate.

14. *Tax on Vehicles, Animals and Carts.*—A sum of Rs. 2,493–12–0 or Rs. 33–12–0 in excess of the revised estimate was realized under this head against Rs. 2,415–4–0, the actuals of the year previous, the increase being due to the rising number of jatkas, consequent on the opening of the Máyavaram-Muttupet line.

15. *Tolls.*—The demand (Rs. 7,000) was fully realized during the year. The collection was contracted and tolls were levied at three-fourths of the schedule rates in the eleven gates of this municipality. The share due to local funds was paid within the year.

16. *Rent of Land and Buildings.*—These items fetched Rs. 192, almost the full demand for the year, though rent of lands fell short of the revised estimate by Rupees 17–8–0.

17. *Avenues.*—The income from this source considerably increased from Rupees 600 in the revised estimate to Rs. 870–7–9, the rise, as already explained in paragraph 7 of my budget report embodied in G.O., No. 398 M., dated 10th March 1896, being due to the sale of a good number of branches of the road side trees.

18. *Sale of Materials.*—A sum of Rs. 84–7–1 was realized under this head, which is Rs. 54–7–1 and Rs. 51–3–7 in excess of the revised estimate and the previous year's actuals respectively. The excess is due to the sale of certain unserviceable materials, such as bedding, &c., of the old travellers' bungalow as well as the old chairs of the offices.

19. *Sale of Street-refuse.*—The income from this source was Rs. 124–15–9 against Rs. 127–15–9, the actuals of 1894–95, and Rs. 75–0–3 below the revised estimate. A portion of the rubbish, estimated to cost Rs. 20, was not sold. Much difficulty is experienced in gathering the purchasers on the spot when the sale is being conducted, owing to the rubbish being ill-suited for manuring purposes, mixed as it is with pieces of pots and other hard materials.

20. *Fees from Educational Institutions.*—The amount realized as fees and fines from the high and primary schools, Máyavaram, the salary-result school, Tiruvelandoor, and the salary-result Muhammadan school, Kornad, was Rs. 10,161–14–0, or Rs. 501–14–0 more than the revised estimate, the municipal high and primary schools, Máyavaram, contributing to the increase in proportion to their advancement in strength.

21. *Sale of Medicines.*—A sum of Rs. 36–15–9 or Rs. 13–0–3 below the revised estimate was realized under this head. The decrease was caused by the opening of two medical shops in the town.

22. *Income from Markets.*—The current demand rose from Rs. 589 in the previous year to Rs. 780, though Rs. 40–14–0, a small portion of it remains unadjusted at the close of the year. The arrear balance of Rs. 66 was adjusted in the year partly by collection and partly by remission. Arrangements are being made to construct a fish market at Kornad in place of the now existing private one in pursuance of the suggestions of the Sanitary Commissioner.

23. *Income from Slaughter-house.*—The contract amount of the municipal slaughter-house, Kornad, rose from Rs. 300 to Rs. 340 which was wholly collected during the year. There is every probability of this source of income being further developed.

24. *Distraint Fees.*—Only a small amount of Rs. 19–6–0 was realized under this head as necessity was avoided for adopting coercive measures on great scale, the collections having been expedited every now and then with mingled activity and vigilance.

25. *License Fees.*—A sum of Rs. 814–7–4 was realized from this source, which is Rs. 64–7–4 and Rs. 133–12–10 more than the revised estimate and the previous year's actuals respectively. This shows a tendency to increase.

26. *Fines under Acts.*—This fluctuating item had a fall from Rs. 805–7–0 in 1894–95 to Rs. 650–10–3.

27. *Contributions from Government.*—A sum of Rs. 1,317–3–11 was received as contribution from Government against Rs. 1,470 in the revised estimate as detailed below:—

| | Rs. | A. | P. |
|---|---|---|---|
| Salary grant for high school .. .. .. .. .. | 1,069 | 5 | 7 |
| Result grants to girls' school .. .. .. .. .. | 96 | 5 | 0 |
| Rent and conductress grant to girls' school .. .. .. .. | 54 | 1 | 4 |
| Grant on behalf of common gymnast .. .. .. .. | 97 | 8 | 0 |
| Total .. | 1,317 | 3 | 11 |

Applications have been made (1) to the District Magistrate for contribution towards the construction of a dead-house in the hospital compound, and (2) to the Inspector of Schools, Southern Circle, for sanctioning a half salary grant of Rs. 5 on behalf of the common drawing master, and their replies are awaited.

28. A private contribution of Rs. 15 was received for renewing a well in Máyavaram north street.

29. *Miscellaneous.*—The item claiming attention under this head is the private scavenging service. Since the beginning of the current year, the double rates, *i.e.*, As. 2 per mensem for single service and As. 4 for double service, are in force; and the income derived from this source is Rs. 672–6–0 or Rs. 419–10–0 more than the previous year's actuals (Rs. 252–12–0), and nearly the same as the revised estimates. All endeavours are being made to make the system self-supporting.

## III.—EXPENDITURE.

30. *Grant I, Public Works.*—The total expenditure under this grant amounted to Rs. 7,981–4–3 against the revised estimate of Rs. 11,710 and the previous year's actuals of Rs. 5,466–10–0; and it was 21·5 per cent. of the receipts and 21·7 per cent. of the entire expenditure of the year. The decrease under the revised estimate is due to the non-utilization of the full amount provided for the construction of the new travellers' bungalow and the amounts allotted for the extension of the high school building and filling up the hospital tank.

31. *Communications.*—The outlay on roads was Rs. 3,941–5–11 or 84·9 per cent. of the net toll receipts, short of the repairs on toll sheds and the local fund share, against the revised estimate of Rs. 4,330 and the actuals of Rs. 2,914–1–10 of the last year. New works received a portion of this (Rs. 268–0–4), while the remainder, viz., Rs. 3,673–5–7, was spent on repairs. The total extent of roads and streets under maintenance was 24 miles 1 furlong and 156 yards, of which 3 miles 1 furlong and 106 yards were gravelled and the remainder unmetalled. During the year under review, the portion of road No. II from Pattamangalam street up to Kornad Police station-house was re-metalled, a dam was constructed, and the bridge over the Palan Cauvery near slaughter-house was constructed in part and is now approaching completion. It will not be too much to say that with the willing co-operation of the councillors, the level of almost all the streets was properly raised and their sides, fairly sectioned. The condition of a major number of roads and streets in the town is fairly satisfactory.

32. *Buildings.*—A sum of Rs. 2,721–1–2 was spent on new works under this head and Rs. 317–7–11 on repairs, the two aggregating to Rs. 3,038–9–1 against Rs. 6,250 in the revised estimate and Rs. 1,253–8–6 in 1894–95. For the decrease below the revised estimate *vide* paragraph 30 *supra*. The construction of the new travellers' bungalow is now in fair progress, and it is hoped to complete it soon. The work of filling up the hospital tank has been taken on hand with the additional fund sanctioned in the current year's budget for the same and is now rapidly progressing. During the year under report, the superstructure of the Máyavaram primary school building was renewed at a cost of Rs. 1,396–5–7, a small portion of the materials purchased and made for the extension of the high school building in a way meeting the required materials for the renewed building. An iron latrine and nine corrugated iron dust-bins were sent for from Madras, and the hospital compound improved by a portion of land purchased being added to it. The construction of the dead-house had to be taken on hand in the current year after finding funds to meet the increased cost as per plan revised by the sanitary board.

33. *Drainage.*—A sum of Rs. 55–10–0 was spent under this head for the construction of a drainage tunnel in Kornad-Aiyanar Kovil street.

34. *Water-supply.*—On new works of this kind, a sum of Rs. 257–6–9 was spent for the construction of flights of steps in the Palan Cauvery and for sinking three new wells in important centres, while Rs. 280–5–0 was spent on sundry supplies to water sources and maintaining the tank watch and temporary coolies for river springs.

35. *Grant II, Education.*—Independent of the sum of Rs. 1,493–4–4 spent on educational buildings (shown in Grant I), and against the revised estimate of Rs. 12,820, the actual expenditure under this head was Rs. 12,680–6–11. The decrease, though to some extent compensated by the increase under "salary" and "salary-result contingencies," still exceeded in "salary schools establishments," "result grants," and "building and furniture grants."

36. *Training Schools.*—Out of the allotment of Rs. 60 in the revised estimate only Rs. 48–15–0 was the actual expenditure under this head. Three students were trained in the sessional school, Shiyali, this year, out of four students expected to be trained; hence the decrease.

37. *Municipal Schools on the Salary System.*—The high and primary schools, Máyavaram, were maintained under this system at a cost of Rs. 9,684–1–3 including contingencies, against Rs. 9,480 in the revised estimate. The increase under contingencies was caused by the supply of chemicals, furniture and gymnastic apparatus to the high school. The provision for the second and third assistants was not quite made use of on account of the vacancies caused by the unhappy deaths of the two assistants and the delay in filling up their places owing to the difficulty of securing duly qualified hands.

38. *Municipal Schools on the Salary-result System*—(3) *Upper Primary Schools.*—The salary-result school, Tiruvelandúr, and the Saliya and Muhammadan schools, Kornad, and the lower secondary girls' school, Máyavaram, were kept up under this system. The actual expenditure on them amounted to Rs. 1,192–13–11 as fixed stipends, Rs. 494–9–1 as result grants and Rs. 319–2–9 as contingencies, the corresponding figures of the revised estimate being Rs. 1,190, Rs. 400 and Rs. 230 respectively. The grants earned by the boys' schools greatly exceeded the budget allotment, while that by the girls declined. All the schools received the full amount earned. The Saliya school and the girls' school were supplied with some back benches. This, together with the house-rent paid to the Saliya and Mahammadan schools, Kornad, caused the increase under contingencies, it being necessary to locate them in suitable buildings.

39. *Result Grants.*—The year commenced with 14 result schools—12 day schools and two night ones; gave birth to seven new schools—six day and one night; and lost three schools—two having been actually closed and one treated as closed, none of the six pupils presented having been eligible for grant, thus keeping at its close 17 day schools and a night one. All the 18 schools were examined and earned grants, against 15 in the previous year. Two hundred and thirty-five passed in the examination with 48 in the merit out of 362 pupils presented, the corresponding figures of the previous year being 242, 28 and 339 respectively. The increase in the number that secured merit is noted with satisfaction, though the number passed out of those presented had slightly decreased. The total amount earned by the schools was only Rs. 502, while the budget provided Rs. 900. Full amounts as per certifying memoranda of the Assistant Inspector were paid to all the schools but two—the Sarathattai and Padayachi Street schools which were paid 20 per cent. less as they are still handled by unqualified teachers. Every effort is being made to improve the staff of the result schools.

40. *Inspection.*—An inspecting schoolmaster on Rs. 17 per mensem was continued during the year at a cost of Rs. 204 for his salary and Rs. 12–6–6 for contingencies against Rs. 200 and Rs. 10 respectively in the revised estimate. The work turned out by the inspecting schoolmaster may be considered fair.

41. *Miscellaneous.*—Under this head, a sum of Rs. 222–6–5 against an allotment of Rs. 350 in the revised estimate was spent towards maintaining a common gymnast on Rs. 15 and a common drawing master on Rs. 10, with their contingencies. Arrangements are being made for supplying all the result schools with back benches and black-boards and for establishing a common gymnasium, as recommended by the Assistant Inspector of Schools.

42. *Results of Examinations.*—Out of 21 students that appeared for the Matriculation examination, fifteen got through, with three in the first-class, one of whom having stood first in the Presidency. This is indeed highly creditable and throws a very favourable light on the efficiency of the teaching staff. The results of the Lower Secondary examination are likewise very satisfactory, 25 students having been successful with three in the first class, out of 35 presented. For the Primary School examination, 97 pupils were presented from the Municipal schools, 81 of which were successful against 62 and 52 respectively in 1894–95. The number of students had increased with success. The salary-result schools also did fairly well in the grant examinations,

151 out of 187 presented having passed with 53 in the merit, the corresponding figures for the year previous being 106, 131 and 30 respectively. The municipal schools have done very creditably this year in public examinations. The Assistant Inspector's statistics on the progress of education in this municipality are herewith submitted.

43. *Grant III, Sanitation, &c., Hospitals.*—The Municipal Webster Hospital, Máyavaram, was maintained at a cost of Rs. 2,414-7-10 against the revised estimate of Rs. 2,640. The expenditure on establishment was Rs. 1,747-2-5, nearly the same as the revised estimate. The slight decrease under medicines, diet and contingencies seems to be owing to the careful use and satisfactory disbursement of medicines to the patients. With the saving thus effected, the hospital will be supplied with the furniture urgently required.

44. On a perusal of the accompanying concise report of the hospital, it will be seen that 165 in-patients and 11,613 out-patients were treated in the hospital during the year against 194 and 8,810 in the previous year. The decrease in the former is attributed to greater discretion exercised in the selection of really helpless cases, while the latter had fairly increased by 2803—a satisfactory feature. The large increase in the number of out-patients bears testimony to the popular and efficacious treatment of the Civil Apothecary M.R.Ry. K. Vasudeva Ráoji. Though the average attendance of in-patients had a fall from 7·08 in last year to 5·55 for reasons already assigned, that of the out-patients had a decided increase from 53·62 to 72·12. There were thirteen deaths among the in-patients and three among the other class against nine and two respectively in the previous year. The reasons for the above deaths are shown in paragraph (*g*) of the apothecary's report. The midwife attended only ninety labour cases, *i.e.*, twenty-four less than in the previous year. The decrease is due to the absence of the midwife after her resignation and before her re-entertainment—*vide* paragraph (i) of the concise report.

45. *Vaccination.*—A sum of Rs. 347-4-6 was spent under establishment and contingencies, against the revised estimate of Rs. 330. Vaccination was carried on on the compulsory system by the municipal vaccinator under the careful supervision of the apothecary. The operations were performed from calf-to-arm with pure animal lymph for inoculation. During the year under review, 889 cases were vaccinated, 885 of which proved successful. The high percentage of success was mainly due to careful operations and proper attention. 68·10 per cent. of the total number of cases is reported to have been verified by the civil apothecary. Infantile vaccination improved, 662 of the total number of cases having been successfully operated.

46. *Registration of Births and Deaths.*—The actual expenditure under this head was Rs. 144, the same as the actuals of 1894-95, but a little less than the revised estimate. Eight hundred and eighteen births and 666 deaths were registered during the year against 688 and 649 respectively in the previous year. The registration of vital statistics has thus comparatively improved. During the year there were 19 cases of cholera, 138 of fever and 509 of other causes against 9, 152 and 488 respectively in the previous year. Intense heat during summer was the cause of increase of deaths in fever.

Seven cases of births and the same number of deaths were prosecuted before the Magistrate for failure to give timely information against ten and nine respectively in the previous year.

47. *Conservancy.*—A sum of Rs. 6,739-11-9 was spent under this head against Rs. 6,880 of the revised estimate and Rs. 6,262-15-7 of the actuals of 1894-95. The slight fall from the revised estimate (Rs. 37-4-2) on establishment alone was due to fines and stoppages. The establishment consisted of three nuisance inspectors, six peons, seventeen sweepers, six road-cleaning toties and thirteen private scavenging toties. The number of toties (22) furnished by the apothecary in his report is the increased number sanctioned in the current year's budget. The present establishment, however, shows an increase of one peon, one sweeper and one private scavenging toti over that of the last year. Rs. 750 provided in the revised estimate under private scavenging establishment includes provision for temporary toties during

cholera visits, the amount of Rs. 30 in the same under "cholera charges" having been intended for materials required for cholera precautions. The cholera existed for only a short time during the year; hence the provision was not exhausted in full. The pay of toties for cholera purposes is now shown under "cholera charges" with reference to paragraph 5 of the official memorandum, dated 22nd February 1896, No. 252.

48. *Sanitation.*—This important subject is dealt with in the report of the apothecary under different heads. The limited funds of the municipality, as often reported, would be hardly sufficient to think of a satisfactory drainage scheme on a grand scale. In summer, when the Cauvery is dry, the wells sunk by the municipality and many of the private wells afford good water. Such of the tanks, as are in a sanitary point of view unfit for drinking purposes, are reserved for bathing only, watchmen being placed over them. Most of the defects pointed out by the Deputy Sanitary Commissioner are being rectified, provision having been made for the purpose in the recent budget—*vide* paragraph 43 of the budget report for 1896-97. The appointment of a trained sanitary inspector is deferred pending the final order of the Government on the Sanitary Commissioner's letter with reference to G.O., No. 1658 M., dated 16th October 1895. Arrangements are being made in the current year to construct a fish market at Kornad and to close the Roman Catholic burial-ground despite the opposition on religious scruples of the Paraiya community concerned.

The conservancy establishment, especially the private scavenging one, is reported to be insufficient for the needs of the town and this has been receiving the attention of the council.

The general health of the population during the year under review was fair. The precautionary measures adopted for preventing the spread of cholera on its occasional visits, and the vigilance of the apothecary at the time contributed in no small measure to check the progress of the epidemic.

49. *Grant IV, Lighting, &c.—Lighting.*—The sum spent on establishment (Rs. 570-9-2) was the same as the revised estimate, and that on contingencies exceeded the revised estimate by Rs. 111-5-2 owing to the high price of kerosine oil. Lighting was conducted, as hitherto, departmentally by a superintendent with thirteen masalchies under him. More than half the number of days in a month were lighted according to the different phases of the moon. The total number of lamps at the close of the year was 236 or 9 more than in the previous year. Of these, 129 stood on iron posts, 105 on stone posts and two fixed to walls. The number of lights is gradually increasing year by year.

50. *Avenues.*—The actual expenditure under this head was Rs. 287-7-2 or nearly the same as the revised estimate. The avenue establishment consisted of six coolies appointed to look to, and care for, the healthy growth of the avenue plants and trees. Their work was generally supervised by the Public Works Overseer. The amount allotted for contingencies was not made use of owing to the extremely hot weather during the planting season.

51. *Other charges.*—Out of Rs. 520 provided in the revised estimate only Rs. 255-5-9 was utilized, of which Rs. 155-7-9 was spent on printing proceedings and Rs. 99-14-0 on law charges, being costs of defending two suits, &c.

52. *Grant V.*—The total outlay under this grant was Rs. 2,417-3-1 against Rs. 2,210 in the revised estimate, the increase occurring chiefly under "Office contingencies". The increased charge of printing the account forms, the payment of the site rent of the office building for the past five years and the charges incurred for binding certain old records of the office contributed to the increase. The contribution for central office and audit establishments were regularly paid. The total charge, viz., Rs. 2,417-3-1 under this grant, amounted to 6·5 per cent. of the current receipts.

53. *Repayment of Debt.*—A sum of Rs. 554-9-5 was paid during the year under review for repayment of debt, of which Rs. 325 was for the principal and the remainder Rs. 229-9-5 for interest. Other particulars appear in statement VIII.

54. I cannot bring this report to a conclusion without availing myself of this opportunity to express my thanks to the council which has rendered me a good deal of material help during the course of the year.

Enclosure.

Concise Report on the working of the Municipal Hospital, Máyavaram, for the year 1895–96.

*Public Health.*—The town consists of a population of 23,675 according to the census of 1891. The public health during the year was fairly good. A few cases of cholera occurred about the end of June and in July, most of which were brought in from the surrounding villages where the epidemic was prevailing at the time. Again in the month of January cholera broke out in a Korava hut attacking five of the inmates and carrying off three of them. This last outbreak could be clearly traced to eating fish brought in from Tranquebar, where the epidemic was prevailing at the time. By the rigorous application of the preventive methods laid down in the G.O., No. 1028 M., dated the 26th June 1895, the epidemic was happily nipped in the bud. During the closing months of the year measles prevailed to a certain extent.

2. *Vital Statistics.*—The information under this head is gathered by the sanitary inspectors and registered in the Municipal office by a registrar. The number of births and deaths is as follows :—

| Years. | Births. | | Deaths. | |
|---|---|---|---|---|
| | Number. | Rate per mille. | Number. | Rate per mille. |
| 1891–92 .. .. .. .. .. | 823 | 34·7 | 853 | 35·01 |
| 1892–93 .. .. .. .. .. | 787 | 33·1 | 633 | 26·60 |
| 1893–94 .. .. .. .. .. | 843 | 35·5 | 808 | 34·0 |
| 1894–95 .. .. .. .. .. | 688 | 29·0 | 649 | 27·3 |
| 1895–96 .. .. .. .. .. | 818 | 34·4 | 666 | 28·0 |

3. *Sanitation.*—The establishment consists of 3 inspectors, 6 peons, 17 sweepers, 22 toties (15 for private scavenging purposes and 7 for streets and public latrines), 17 rubbish carts, 5 night-soil carts, 1 sewage cart, 16 public latrines (3 masonry, 1 corrugated iron sheet and 12 tatti ones), 204 dust-bins, of which 179 are masonry and 25 moveable ones.

*Communications.*—Out of a mileage of 34 miles, 7 furlongs and 30 yards of roads and streets only 3 miles 3 furlongs and 60 yards are metalled. The streets and lanes in the outlying parts of the town become very slushy and absolutely impassable during the rains. An improvement in the condition of these is urgently called for.

The general cleanliness of the town is fair. The main streets are fairly clean. The bye-streets and lanes require greater attention. Considering the large area of the town the number of sweepers and toties is inadequate. The street sweepings are first deposited in the dust-bins and thence carted away to two rubbish depôts outside the town to be stored there and periodically sold to land-owners for manure. There are 204 dust-bins, of which 179 are masonry ones. Many of these are in a dilapidated condition. The sooner they and their kind are replaced by moveable ones the better. The number of dust-bins must be greatly increased and located at much closer intervals. The night-soil from the public and private latrines is carted away to the night-soil depôt, where it is buried in trenches. The private scavenging system does not seem to be in force in all parts of the town; were it so, 15 toties employed for cleansing 5,509 houses would be obviously very inadequate. The compulsory extension of the system is highly desirable.

*Water-supply.*—The water-supply of the town is far from satisfactory. The town depends upon the Kaveri for the supply during the floods. When the river is dry, springs and wells are excavated in the bed. There are four tanks nominally reserved for drinking purposes. Their surroundings are not above criticism and their water anything but good, especially in summer. They are all supplied from the Kaveri and none of them has an outlet to drain away the surplus, so that the water has been stagnating for years. That the quality of the water-supply is bad is proved by the fact that elephantiasis is very common in the town, especially at Kornad. Nineteen wells have been sunk by the municipality in different parts of the town. These are for the most part shallow and contain sub-soil water in abundance. The water of some of the wells is brackish and unsuited for drinking. If it be not feasible to undertake a scheme of water-supply on the scale it is done in the larger municipalities, a number of deep wells in suitable localities, plastered with portland cement to exclude the sub-soil water, will, to a certain extent, ameliorate the condition.

*Drainage*—is defective. The system in use is the natural one. During the heavy rains, the rain water discharges itself in the Kaveri and in the irrigation channel called the Palankaveri. In wet weather all the backyards of houses and some streets, including the hospital compound, are knee-deep in water. There are about thirty cess-pools in all attached to some of the houses. They are said to be periodically cleansed by the owners, but this is done at long intervals and very perfunctorily. It is desirable that a systematic scheme of drainage is laid out and executed in part year by year as funds are available.

4. *Vaccination.*—This is done by the municipal vaccinator under the compulsory system. Only animal lymph is used for inoculation. During the year under report 881 cases were vaccinated, of which 877 proved successful against 882 for the previous year. The vaccinator's work is supervised by the civil apothecary who verified 68·10 per cent. of the total cases. Out of the total of 881 cases, 662 were under one year of age giving a percentage of 8·92 to the total births. Only 25 inoculations were performed for re-vaccination. It is desirable that re-vaccination should be steadily pushed on.

5. *Hospital.*—(*a*) There is a main building and four wards together with some out-houses with accommodation for twelve patients at a time. The male side is fairly full always. On the female side only the homeless and abandoned women seek admission for venereal complaints. The District Medical and Sanitary Officer recommended, during his inspection, to have a separate operation room built. This has not been given effect to, nor is there any provision made in the budget to meet the requirement. There is a cess-pool in the hospital compound and it is proposed to be filled up in the current year.

(*b*) The buildings are in a fair state of repair, excepting the dead-house, which it is proposed to rebuild.

(*c*) The furniture is very insufficient. There is only one chair and one stool, neither of which is useful for desk-work. The furniture sanctioned more than a year ago has not been supplied yet. The operation table recommended by the District Medical and Sanitary Officer is not yet supplied.

(*d*) The hospital was inspected by the District Medical and Sanitary Officer in the month of September. His recommendation regarding the sign board to be put up at the end of the lane leading to the hospital has been carried out.

(*e*) Under sale of medicines a sum of Rs. 36–15–9 was realised during the year under report against Rs. 87–13–6 for the previous year. The falling off is due to the opening of two chemists' shops in the town, where those who can afford to pay for their medicines buy them.

(*f*) Number of patients treated as compared with the previous years :—

| Years. | In-door. | | | Out-door. | | |
|---|---|---|---|---|---|---|
| | Total treated. | Daily average number. | Deaths. | Total treated. | Daily average number. | Deaths. |
| 1891–92 .. .. .. | 153 | 7·72 | 13 | 7,103 | 42·91 | 8 |
| 1892–93 .. .. .. | 171 | 7·70 | 6 | 8,890 | 55·06 | 1 |
| 1893–94 .. .. .. | 186 | 7·57 | 11 | 7,718 | 46·71 | 8 |
| 1894–95 .. .. .. | 194 | 7·08 | 9 | 8,810 | 53·62 | 2 |
| 1895–96 .. .. .. | 165 | 5·55 | 13 | 11,613 | 72·12 | 3 |

There is a decrease among the in- and an increase among the out-patients. The decrease in the former is due to greater discretion exercised in selecting cases that are in real need of help.

(*g*) *Mortality and the actual causes of it.*—Thirteen deaths occurred among the in-patients and three among the out-patients. Of the former two were from anæmia, one from fracture of the skull, two from lung complaints, one from kidney disease, one from old age and one following an operation—removal of the lower jaw—and the remaining five were from cholera.

(*h*) Operations—

| | Major | Minor. |
|---|---|---|
| 1894–95 .. .. .. .. .. .. | .. | 327 |
| 1895–96 .. .. .. .. .. .. | 10 | 446 |

(*i*) The establishment consists of—

| | |
|---|---|
| One civil apothecary. | One ward cooly. |
| One compounder. | One cook. |
| One midwife. | One toti. |
| One lascar. | One sweeper. |

Statement showing the number of labour cases attended by the midwife, municipal hospital, Máyavaram, during 1895–96.

| Years. | Natural. | Difficult. | Total. |
|---|---|---|---|
| 1891–92 .. .. .. .. .. | 96 | 2 | 98 |
| 1892–93 .. .. .. .. .. | 118 | 1 | 119 |

No. 1503 M., 5TH SEPTEMBER 1896.

Provision is made in the budget to entertain a gardener.

The midwife was out of employ from about the middle of May to the middle of September having resigned her appointment on account of some domestic inconveniences. She was re-entertained on the 16th September.

(*k*) There is no hospital or dispensary for caste and gosha women.

*4th July* 1896. (Signed) M. SIVAGNANAM PILLAI,
*Deputy Collector in Charge.*

---

No. 2099-Rev.

Submitted to Government in the Local and Municipal Department.

2. *Paragraph 7 of the report.*—It is satisfactory to note that none of the twenty-nine meetings called have been dissolved for want of a quorum, and that the percentage of attendance rose from 8·5 in 1894–95 to 9·72 in 1895–96. The Sub-Collector's attendance was however poor.

3. The collections under all heads of revenue are satisfactory.

4. *Paragraph* 30.—Under new works—buildings, the allotment has not been fully utilized, notwithstanding the fact that the early completion of the travellers' bungalow is much to be desired.

5. The condition of streets and lanes, and of the water-supply and drainage is, according to the Medical officer's report, anything but satisfactory, and the council should take steps to remedy the defects without further delay.

6. *Paragraph* 45.—It is a matter of surprise that the proportion of successful cases to the total number vaccinated is so high as 99·55 per cent. But the Medical officer avers that it is so and that he verified 68·10 per cent. of the cases.

7. *Paragraph* 48.—The appointment of a sanitary inspector should no longer be postponed.

8. *Statement II-A.*—The cost of land purchased for the extension of the hospital compound, viz., Rs. 165–8–0, has been charged to Grant I, New buildings. Apparently the charge should be shown against 9-iv Compensation for lands, under Grant IV.

*13th July* 1896. (Signed) M. SIVAGNANAM PILLAI,

| Total | 41,387 | 36,620 | 43,020 | 44,941 |

2. The municipal council held 29 meetings against 27 in the previous year. The attendance of the non-official members improved and was fair, but that of the officials was poor. It is unsatisfactory that the Revenue Divisional Officer should have been able to attend only three meetings. One seat was filled by election during the year, but was not contested.

3. *Receipts.*—(1) Owing apparently to more careful assessment the number of persons assessed to the tax on arts rose from 1,521 to 1,636 and the net demand under this head from Rs. 3,417 to Rs. 3,675. The incidence of this tax, however, was only Rs. 2-3-11 per head against an average of Rs. 4-2-5 for municipalities in 1894-95. The house-tax was fully revised during the year and the land-tax underwent a partial revision. In consequence of this, the demand under these heads increased from Rs. 6,823 and Rs. 591 to Rs. 7,143 and Rs. 620, respectively.

(2) The current collections under the principal taxes improved and were satisfactory. The realization of arrears was fair, showing a slight increase under the land-tax, but a fall under the arts and house taxes, and was good only under the last. The number of warrants issued for the collection of the several taxes was larger than in 1894-95 and their execution was prompt.

(3) There was an increase in the receipts from the tax on vehicles with springs, avenue receipts, license-fees, and grants from Government, but a decrease under rent of lands and buildings and fines. With reference to paragraph 19 of the Chairman's letter it is observed that in many other municipalities the street refuse forms a very considerable item of revenue, although it is mixed with pieces of pots and other hard materials: there is no reason to suppose the proportion of that in the rubbish of Máyavaram is greater than elsewhere and there appears to be none excepting want of sufficient attention to the matter why the income derived by the council from this source should not be materially increased.

(4) The number of houses served by the private scavenging agency again rose from 423 to 504, and the service was practically self-supporting, the loss to the council on this account being only Rs. 2 against Rs. 274 in the previous year. The council, however, should not relax its efforts to extend this service until all the private latrines in the town are brought under municipal agency.

4. *Expenditure*—(1) *Public Works.*—The renewal of the superstructure of the municipal primary school-house and the construction of a travellers' bungalow were the only new works of importance under execution during the year. The former was completed at a cost of Rs. 1,396 and a sum of Rs. 773 was spent on the latter against an estimate of Rs. 4,500. With reference to paragraph 4 of the Collector's endorsement the Chairman will be requested to explain why the travellers' bungalow was not completed during the year notwithstanding the remark in paragraph 4 (1) of G.O., No. 1666 M., dated 18th October 1895. The expenditure on communications was Rs. 3,941, or 85 per cent. of the net municipal income from tolls, and the roads are reported by the Revenue Divisional Officer to have been in fair order. In this connection, however, the council's attention will be drawn to the remarks in paragraph 5 of the Collector's endorsement.

(2) *Education.*—The net expenditure on primary education was Rs. 2,170, while secondary education was worked at a profit of Rs. 969. Thus the total net outlay under this head was only Rs. 1,201, or 6·5 per cent. of the income from taxation. There were six municipal schools, as in the previous year, one being a high school, one a lower secondary school for girls, and the remaining four primary schools, and the council aided 18 primary schools against 14 in the previous year. The attendance at the municipal schools fell from 1,109 to 1,050, while in the aided schools it rose from 471 to 732. The municipal high school did very well at the Matriculation and Lower Secondary examinations. In the former examination 15 pupils passed out of 21 sent up, and three were placed in the first class, one of them heading the list, and in the latter 25 pupils were successful out of 35 presented. The results of the municipal primary schools at the departmental examinations were good, while those of the aided schools at the grant examinations were fair. Only 55·8 per cent. of the allotment for result grants was utilized, but no explanation of this short outlay has been offered—an

omission which should be supplied. The total number of boys under instruction in the municipal and aided schools rose from 1,408 to 1,620, or 93·6 per cent. of the male population of school-going age. The number of unpassed teachers in the aided schools is still large, and it is noticed that two of the teachers in municipal schools are also unpassed. The council's attention is again drawn to the remarks of Government in its review of the previous year's administration report.

(3) *Medical Relief.*—The number of in-patients treated in the municipal hospital fell from 194 to 165, owing, it is stated, to greater strictness in regulating admissions, but that of out-patients rose from 8,810 to 11,613—a satisfactory increase, testifying to the growing popularity of the institution. The midwife attached to the hospital attended only 90 cases of labour against 114 in the previous year; the decrease is explained in paragraph 5 (i) of the medical report.

(4) *Vaccination and Vital Statistics.*—The total number of vaccine operations fell from 926 to 889, but the quality of the work, if the figures are correct, which seems hardly possible, continued to be very good. Infantile vaccination also showed a retrogression, the number of children under one year successfully vaccinated declining from 30 to 27·9 per mille of the population. The advancement of the work of this department should receive the special attention of the council during the current year.

The registration of births and deaths improved, but the returns cannot yet be regarded as complete. To ensure accuracy in these figures, prosecution for failure to register these occurrences should be more largely resorted to than it has been.

(5) *Sanitation.*—The expenditure under this head was Rs. 6,740, or 98·7 per cent. of the allotment and 18·2 per cent. of the receipts. Steps should be taken to remedy, as far as possible, the defects in the sanitation of the town pointed out by the Civil Apothecary in paragraph 3 of his report. The appointment of a trained sanitary inspector should not be deferred, but should be made without delay.

5. *General Remarks.*—The year closed with a balance of Rs. 8,241, or 22·3 per cent. of the receipts. Of this sum, however, Rs. 3,727 represents the unexpended portion of the allotment for the construction of the travellers' bungalow. The retention for an additional period of three and-a-half months of the services of the temporary peon referred to in the note to Statement II-B is approved, but reference should have been made to this in the Chairman's report. The statements in paragraphs 10 and 27 were unnecessary and should not be repeated.

Except as regards vaccination the administration of the municipality during the year under review was satisfactory, and the Government notes with pleasure the testimony borne by the Chairman to the help rendered to him by the councillors.
