

according to the census population of 1891 were 32.3 and 25.3 per mille, respectively, while those according to the estimated population were 30.2 and 23.8. Mortality among infants under one year of age was 209.0 per mille per annum of population of that age in that month against 200.0 per mille in March last.

6. In the subjoined statement is compared the deaths registered under the several causes with those of the previous month in the current year and the corresponding month of the previous year:—

		Deaths from							Ratio per mille of population per annum						
		Cholera.	Small-pox.	Fever.	Dysentery and diarrhoea.	Injuries.	All other causes.	Total.	Cholera.	Small-pox.	Fever.	Dysentery and diarrhoea.	Injuries.	All other causes.	
April 1895 ..	..	117	25	1,268	409	46	2,361	4,216	0.7	0.1	7.2	2.3	0.3	13.4	
March 1896	..	95	109	1,547	486	64	2,641	4,932	0.5	0.6	8.7	2.8	0.3	14.9	
April	..	23	70	1,318	519	70	2,500	4,500	0.1	0.4	7.4	2.9	0.4	14.1	

7. All but five municipalities in the Presidency enjoyed complete immunity from cholera, and even in these only 23 deaths were recorded during the month. Two towns reported 70 deaths from small-pox. One thousand three hundred and eighty persons succumbed to fevers against 1,547 in March last and 1,268 in April last. The death-rate from this cause was highest in Kurnool (19.7), Karur (19.0), Tirupati (15.1). It was also severe in ten other towns. Dysentery and diarrhoea proved fatal in 519 cases against 486 in March last. The death-rate from these causes was large in seven towns ranging from 5.1 in Berhampur to 10.8 in Guntur.
