(from orders) 12/9/96

In his inspection notes on the Timewell municipality, the Sanitary Commissioner suggested that the Conservancy Establishment should be re-organised in order to meet the needs of the town. In this, the Municipal Council appointed a sub-committee to draft a scheme with a view to carrying out his suggestions. The Chairman, in his letter read above, now submits the recommendations of the sub-committee, as modified by the Municipal Council.

- The following statement shows the existing and the proposed establishments:-

3. Orders are solicited as to whether the Council's proposals may be approved and the Chairman requested to submit a proposition statement for formal sanction.

The Council's proposals do not go quite as far as the San. Comm., but which probably are a counsel of perfection, but provide for a better establishment than that now existing. The reduction in ^{cost of} ~~cost~~ is caused chiefly by the employment of 25 Sweepers and 1400 instead of 42 on

I don't see much objection to the scheme, provided that the men who are now unemployed are required to work within a certain time - they might be required to attend the next class - if this is done, I don't see then the arrangement. The permanent staff will be needed to supervise the work. The C. proposed 8, I see.

including the deposit including the deposit including the deposit

I think there have not been only two classes held, so enough men can hardly be available for all training. Let us ask how many men there are; how many have obtained employment; how many more are wanted.

10/9/96

I submit that this arrangement should be sanctioned. The Council just of all decided right enough perhaps to have 1. 2nd class and 2 3rd class Certificated Inspectors. Though the S.C. proposed only two though both were highly paid men. On second thought however they decided to hire one of the 3rd class Certificated men to do an act of justice? I think the two Certificated men shown the power of inspection by M.C. a month and obtaining for that two untrained men (looking the four sweepers more) in place of the untrained one. They now have found men to look after 98 Sweepers and propose in the future to have five to look after 80. What on earth they want with seven peons I cannot imagine. I should have thought that one to the Inspector would be ample. It is submitted that it is pretty nearly of the same time to visit on all municipalities having trained Sanitary Inspectors.
