FROM

W Hughes Esqre
THE SUPERINTENDING ENGINEER,

6th CIRCLE.

TO

THE CHIEF ENGINEER, for Irrigation
Madras.

SIR,

ENCLOSURES.

your memo no VT of 12th January 1895.
I. M. D.

The recently made survey of the Berijam catchment area shows that the area draining into the portion of the swamp when it was proposed to form a lake is only 3.13 Sq. miles. By shifting the site of the northern bund a slightly larger supply could be obtained but the bund would be rather more expensive. It is therefore considered that if the lake is to be made the area must be approximately what was designed. The reduction in necessary capacity due to

to the area of catchment being less than supposed would reduce the estimate to about Rs 30000.

2- As things are I recommend that further consideration of the Project be deferred until the Sanitary Engineer has drawn up an acceptable scheme for the water supply of Perakulam and if it is then found that a reservoir at Berijam would be of assistance, the estimate might be recommended for sanction.

I have the honor to be
Sir

your most obedt servt

W. Hughes
Supr Engineer
6th circle.
