Read remarks contained in para 3 (4) reads 4 (4)
of G.O. no 1296 in 25-8-98.

Read also explanation of the Hospital establishment
about the decline of infantile vaccination
Read also draft letter to Government.

The explanation offered by the Hospital assistant as regards infantile vaccination seems to be reasonable. However the Council will pay special attention towards the ~~the~~ problem of infantile vaccination.

The rough reports to Governor which is approved
by the Council.

No 85 From

The Insp. Asst.

Cudiyalam

The Chairman

Municipal Council
Cudiyalam

Sir

With reference to your memo No 290 of 2.10.96.
I have the honor to forward the following explanation
on the decline in the infantile vaccination.

The number of infants vaccinated during
the year 95-96 was 463 against 454 in the previous
year.

Thus there was an apparent increase in
the number of operations on the infants during the
year 95-96, though the success achieved was
less than that in the year 94-95, as many as 5 and
30 operations having been met with failures
during the months of February and March last
respectively. This is attributed to the deteriorated
quality of lymph supplied towards the end of
the year by the Inspector of Vaccination.

The number of infants that
left the town was also considerable on account
of the fact of their mothers making a temporary
stay under their parental roof, and leaving the
same to their respective villages after delivery.

There is an other fact which I want

2/29/96

particularly emphasise, namely, that the children of the weavers who always feel both dry, suffer from cutaneous and other constitutional diseases which quite unfit them for operations. They look simply miserable specimens of humanity.

A great deal of difficulty is experienced to carry on the work of Vaccination among the Muhammadan hubeys here, who go away to attend to their daily pursuits of life leaving their gosha females at home, whose presence is practically useless, thus affording very little opportunity of having their children vaccinated. This fact is borne out by the number of Cases vaccinated among Muhammadan Children which is only 46. Very often they play a dupe upon the Vaccinator, stating that "the mother and the child are not at home", while the fact is they are; and the Vaccinator has very little chance of verifying their statements by reason of their Gosha.

However the Vaccinator has been directed to pay more attention to the work of infantile Vaccination, and produce certificates from the mawagar in the case of those who left the town.

No 436

OFFICE OF MUNICIPAL COUNCIL,

Gudiyalam, 21st Oct 1896

FROM

P. A. Ponnusawmy Mudr. Mudr.
M. SUBRAYADE CHETTY GARDU,
Chairman, Municipal Council,
Gudiyalam.

TO

The Chief Secretary to Govt.
Fort St. George
Thro. The Divisional Officer.

Sir,

Vellor

With reference to remarks contained in G. O. No. 1296 in, dated 5th August 96, I have the honor to submit the explanations called for therein, as detailed below:-

- As to para 3(4). The number of houses served by Private Sanitary agency at the end of 1895-96 was 173 against 63 of the previous year. The number has now risen to 214 and by the end of this official year there is every probability of increasing the number to 300 or so, as the Private Sanitary is being adopted throughout the Town. The system of collecting

feces

less in a dream has been in
force from the beginning of the
year.

As to para 4 (4). The expla-
nation of the Hospital assistant
about the decline of infantile
vaccination is herewith submitted.

The Resolution of the Council
is also herein enclosed for the
favorable consideration of
Government.

I have the honor to be
Dear Sir

Your most obedient servant.
