2. *Local Boards.*—The local boards met a sufficient number of times and the attendance of their members was fair. The District Medical and Sanitary Officer and the Sub-Assistant Inspector of Schools should be warned to be more regular in their attendance in future. The working of the taluk boards is reported to have been satisfactory. No unions have yet been formed in this district.

3. *Receipts.*—(1) The collections under land-cess amounted to 98·2 per cent. of the demand against 98·5 per cent. in the previous year.

(2) There were fourteen toll-gates against fifteen in the previous year, but owing to keen competition at the sale of the farms, the demand under this head rose from Rs. 47,015 to Rs. 48,600 and the whole of it was realised within the year.

(3) Fees were levied in thirteen markets as in the previous year, but the receipts from this source fell from Rs. 3,711 to Rs. 1,630. The cause of this decline has not been explained—an omission which should be supplied.

(4) The receipts from avenues again declined, being Rs. 780 against Rs. 1,253 in 1894-95. The decrease is attributed to the sale of a smaller quantity of avenue clippings and to the failure of a contractor to pay the amount of rent due by him.

4. *Expenditure.*—(1) *Public Works.*—The outlay under this head rose from Rs. 97,993, or 62 per cent. of the allotment, to Rs. 1,30,756, or 70 per cent., and the expenditure on communications exceeded by nearly 4 per cent., the minimum prescribed by Government in its Order, No. 1683 L., dated 14th September 1895. The decrease under the estimate is explained in paragraph 28 of the President's report. The expenditure on village roads was Rs. 8,830, or 11·6 per cent. of the total outlay on roads, against Rs. 6,889, or 9·9 per cent., in the previous year. The condition of the roads is reported to have been good, except in a few cases. Owing to the increased expenditure on public works, the cost of the local fund engineering establishment was only 17 per cent. of the outlay on works against 24 per cent. in 1894-95. The cost of tools and plant, however, slightly exceeded the limit prescribed by Government, in consequence of the purchase of certain mathematical instruments urgently required by the Local Fund Engineer.

(2) *Education.*—As in the previous year, there were seven inspecting school-masters and their work is reported to have been satisfactory. The district board again maintained three sessional schools, but the number of students trained in them fell from 24 to 19. Of the latter, 18 appeared for the primary examination and all of them were successful. The taluk boards continued to maintain an upper and four lower secondary schools and these were attended on the 31st March 1896 by

613 pupils against 641 on the corresponding day in the previous year. The Coondapoor high school sent up 14 candidates for the Matriculation examination, of whom six passed, against twelve and four, respectively, in 1894-95. In the lower secondary examination, however, it fared badly, only eight students having passed out of the 21 that were sent up. The schools at Udipi and Karkal did particularly well in this examination, while the results produced by the Kasaragod school were fair. These institutions were worked at a net profit of Rs. 15 to the taluk boards. There were 141 board primary schools as in the previous year, but their attendance rose from 4,902 to 5,185 and they appear to have made fair progress, 79 per cent. of the pupils examined having passed the standard examination against 81 per cent. Of these schools, two were again maintained for the exclusive benefit of Panchamas and 17 for Muhammadans. Of the former, the school at Jeppu continued to work well, while the other at Kasaragod was not successful and was transferred, at the close of the year, to Kudlu. In the report for 1894-95 it was stated that the question of opening special schools for Mappillas would be taken up and in the next year, but no information on this subject has been given in the present report. The omission should be supplied. The number of schools aided with result grants, which were paid at the maximum rates, rose from 154 with 5,179 pupils to 188 with 6,275 pupils. The total number of boys under instruction in the schools maintained and aided from local funds was 13.8 per cent. of the male population of school-going age against 12.3 per cent. in the previous year.

(3) *Medical Relief.*—The local boards continued to maintain six hospitals and ten dispensaries, but the number of patients treated showed a considerable decline, * which is ascribed by the District Medical Officer chiefly to the closure of many of the institutions for some days in the year, during the absence of the medical subordinates on other duty or on leave, and to the fact that malarial fevers were less prevalent. The eight midwives employed in the district attended 822 cases of labour against 826 in 1894-95, the average for each midwife continuing to be nine cases per mensem. It would not seem desirable to adopt the suggestion made by the District Medical Officer that at least one midwifery pupil should be entertained for filling up temporary vacancies among the midwives, until all the medical institutions in the district have been provided with a midwife apiece. Notwithstanding the remarks of Government in paragraph 4 (3) of the review of the previous year's report, no steps were taken in furtherance of female medical education, but it is observed that provision has been made in the current year's budget for the training of a female pupil for the Apothecary grade.

(4) *Vaccination.*—The work of this department, which declined in 1894-95, showed a slight improvement, though the results obtained were not so good as in 1893-94, the number of successful operations per mille of the population, which fell from 34 to 21.5 in the previous year, having risen to 25.6 during the year under review. The percentage of successful cases to the total number vaccinated was 75.5, against 62.5 in 1894-95 and 90 in 1893-94, while the number of successful operations on children under one year was 2.1 per mille of the population against 0.9 per mille in the previous year and 2.8 per mille in 1893-94. Compared with the registered births of the year, no more than 7 per cent. of the children born during the year were protected by vaccination. There is thus very considerable scope for the extension of the board's operations in this direction, and the Government trusts that every endeavour will be made to show better results in the current year.

(5) *Sanitation.*—The expenditure under this head was Rs. 6,955, or 98 per cent. of the allotment, against Rs. 5,906, or 80 per cent., in the previous year. Eight new wells were sunk as in 1894-95, and twelve improved against eight in that year. Eight existing sources of water-supply were again drawn to the suggestion made by the District Medical and Sanitary Officer that more public wells should be constructed on the roads frequented by travellers. Conservancy establishments continued to be maintained in 23 villages. In cases in which strict supervision over these establishments is not feasible, they might well be dispensed with, as the money expended on them is merely thrown away. No information has been given regarding the working of the private scavenging system, which was in force in a few villages in 1894-95. The report of the District Medical and Sanitary Officer might with advantage have been considerably reduced in bulk.

1910

5. *General Remarks.*—The year closed with a balance of Rs. 96,854, of which Rs. 3,348 appertained to endowed institutions, leaving Rs. 93,506, or nearly 40 per cent. of the receipts, available for general purposes. It is not creditable to the local boards that in spite of the remarks of Government in the reviews of the reports for the preceding three years, such a large balance should have remained unspent. The greater portion of it is allotted for expenditure in the current year, and again Government trusts that it will actually be spent and not left to swell the closing balance as in the year under review. The administration of the local boards showed some improvement on that of the previous year and was, on the whole, satisfactory.
