GOVERNMENT OF MADRAS.

OFFICE OF SANITARY ENGINEER,

Fort St. George, 20 Nov 1896

To	1 Dept.
	3145-M

From

J. A. JONES, Esq. MEM. INST. C.E., F.R.S.E.,

SANITARY ENGINEER TO GOVERNMENT,

To

The Secretary to Government,

Local & Municipal Department.

SIR,

With reference to G.O., No.493 M, dated 21st. March 1896, I have the honor to state that to adequately fill up the swamps that surround the town would require the expenditure of very large sums of money; a more efficacious and cheaper remedy would be to improve the land drainage by increasing or enlarging the outlet channels. It will however be readily conceded that if money is available for the improvement of the town it had better be utilised in improving its water supply rather than its drainage.

2. As regards the advisability or otherwise of attempting an artesian well, I cannot say anything definitely. The chances of success are not very favorable; part of the apparatus, as Government is aware, was lost at Cochin & new rods & tubes would have to be procured. It might be well to consult the Geological Department before a boring is undertaken.

I have the honor to be,

Sir,

Your most obedient servant,

[Signature]

Sanitary Engineer to Government.
