GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

No. 592-S.

Remarks by the Sanitary Commissioner, Madras, on the recorded vital statistics in the Districts and Municipalities of the Madras Presidency for the month of December 1895.

DISTRICTS.

During the month under review 80,866 births and 63,576 deaths were registered in the districts ; they yielded annual ratios of 29·1 and 22·9 per mille, respectively, of the census population of 1891, and 23·9 and 18·8 per mille of the estimated population. Of the children born 41,188 were boys and 39,678 were girls, and of those who died 32,644 were males and 30,932 were females ; or, in other words, 103·8 boys were born for every 100 girls and 105·5 males died for every 100 females.

2. In the annexed table, the deaths registered under the several causes is compared with those of November 1895 and December 1894 :—

—	Deaths from							Ratio per mille of population per annum.						
	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhœa.	Injuries.	All other causes.	Total.	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhœa.	Injuries.	All other causes.	Total.
December 1894 ..	3,094	551	25,478	2,303	848	30,626	62,900	1·1	0·2	9·1	0·8	0·3	10·9	22·4
November 1895 ..	954	401	23,405	2,013	933	29,084	56,790	0·3	0·2	8·4	0·7	0·3	10·5	20·4
December „ ..	716	515	26,624	2,015	774	32,932	63,576	0·3	0·2	9·6	0·7	0·3	11·8	22·9

3. The deaths from cholera, which were reported from eight districts, aggregated 716, against 954 in November last and 3,094 in December 1894. The death-rate was largest in Tinnevelly (2·5) and Ganjám (1·1). In the rest of the affected districts, it was below one per mille. Small-pox caused 515 deaths against 401 in the preceding month. Madras, Nilgiris and South Canara excepted, all the districts in the Presidency have reported deaths from this cause, though in most cases the death-rate was below 0·5 per mille. Fevers accounted for 26,624 deaths, against 23,405 in November last and 25,478 in December 1894. The death-rate from these causes was highest in Vizagapatam (23·2), followed by Cuddapah (18·0), Kurnool and Nilgiris (16·1 each), Madras (14·8), Gódávari (12·3), and Ganjám (11·1). Two thousand and fifteen persons fell victims to dysentery and diarrhœa—Madras, as usual, taking the lead with a death-rate of 4·3 per mille.

4. The accompanying map of the Madras Presidency exhibits the places where deaths from cholera were reported, the affected districts being shaded according to the intensity of the cholera which prevailed there.

MUNICIPALITIES.

5. The births registered in the municipalities aggregated 6,231 (3,074 boys and 3,157 girls) and the deaths 5,582 (2,853 males and 2,729 females). The annual

birth and death rates per mille of the census population of 1891 were 35·1 and 31·4 respectively, while those according to the estimated population were 33·1 and 29·7. The proportion of male births to every 100 female births was 97·4, and that of deaths among males to 100 females was 104·5. The death-rate of infants under one year of age to population of that age in that month was 254·2 per mille per annum, against 232·2 in November last.

6. The accompanying statement compares the deaths from the several causes with those of the preceding month and the corresponding month of the previous year :—

—	Deaths from							Ratio per mille of population per annum.						
	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhœa.	Injuries.	All other causes.	Total.	Cholera.	Small-pox.	Fevers.	Dysentery and diarrhœa.	Injuries.	All other causes.	Total.
December 1894 ..	237	15	1,597	622	50	2,994	5,515	1·3	0·1	9·1	3·6	0·3	17·1	31·5
November 1895 ..	55	24	1,560	584	78	2,834	5,135	0·3	0·1	8·8	3·3	0·4	16·1	28·7
December ,, ..	34	24	1,666	629	77	3,152	5,582	0·2	0·1	9·4	3·5	0·4	17·8	31·4

7. Deaths from cholera aggregated 34 and they were reported from six towns, all other municipal towns in the Presidency having enjoyed complete immunity from this cause. In the whole Presidency, seven towns returned deaths from small-pox (24 in all) and in six of them the death-rate was below one per mille. One thousand six hundred and sixty-six persons fell victims to fevers, against 1,560 in November last and 1,597 in December 1894. The death-rate was largest in Tuticorin (22·9), Karúr (16·7), Cuddapah (16·6), Guntúr (16·4), Madras (14·8), and Gudiyáttam (14·7). It was also large in twelve other towns. Dysentery and diarrhœa proved fatal in 629 cases, against 584 in the preceding month. The death-rate from these causes was large in twelve towns, ranging from 5·1 in Palamcottah to 17·2 in Tuticorin.

Two thousand and fifteen persons fell victims to dysentery and diarrhœa—Madras, as usual, taking the lead with a death-rate of 4·3 per mille.

4. The accompanying map of the Madras Presidency exhibits the places where deaths from cholera were reported, the affected districts being shaded according to the intensity of the cholera which prevailed there.

MUNICIPALITIES.

5. The births registered in the municipalities aggregated 6,231 (3,074 boys and 3,157 girls) and the deaths 5,582 (2,853 males and 2,729 females). The annual

* Where there has been a decrease of population in the decade of 1881–91, the rates on the estimated population have been omitted.

† Where there has been so great an increase owing to prosperity and consequent immigration as to render the rates of increase open to doubt, it has been considered advisable to adopt Mr. Stuart's normal rate of 12·49 per mille, the object being to secure something more approaching accuracy than by calculating on the population of 1891. It is, of course, not to be assumed that complete accuracy is thus attained.

* Where there has been a decrease of population in the decade of 1881–91, the rates on the estimated population have been omitted.

† Where there has been so great an increase owing to prosperity and consequent immigration as to render the rates of increase open to doubt, it has been considered advisable to adopt Mr. Stuart's normal rate of 12·49 per mille, the object being to secure something more approaching accuracy than by calculating on the population of 1891. It is, of course, not to be assumed that complete accuracy is thus attained.

‡ Being a new municipality, the required information is not available.

W. G. KING, Surgn.-Lieut.-Col., M.B., C.M., D.P.H.,
Sanitary Commissioner for Madras.

Office of Sanitary Commissioner, Fort St. George,
March 1896.

* Including the Hill Tracts.

† The exact population for which the return was received is not known; hence the ratios have been calculated on the total population of the district as advised by the Superintendent of Census Operations.
